THIRON, or **THIRON DE GARDAIS**, a town of France in the dep. of Enre and Loire; 7½ miles E. of Rozeat le Rotrou, and 21 SW. of Chartres.

THIRSK, or **THRUSK**, a borough of England, in the N. Riding of Yorkshire, anciently famous for its strong castle, which was destroyed by Henry II. on the rebellion of Roger Mowbray, who set up his standard in it, and called the Scots to his assistance. It has a market on Monday, and sends two members to parliament. It is 20 miles NW. of York, 41 W. of Scarborough, and 230 N. of London. Lon. 1. 16. W. Lat. 54. 15. N.

(1.) * **THIRST**. *n. f.* [*thyrst*, Saxon; *dorst*, Dutch.] 1. The pain suffered for want of drink; want of drink.—

But fearless they pursue, nor can the flood
Quench their dire *thirst*; alas! they thirst for
blood. *Denham*.

Thus accurs'd,

In midst of water I complain of *thirst*. *Dryden*.
—*Thirst* and hunger denote the state of spittle and liquor of the stomach. *Thirst* is the sign of an acrimony commonly alkalescent or muriatick. *Arbutnot*.

For forty years

I've liv'd an anchorite in pray'rs and tears:
Yon spring, which bubbles from the mountain's
side,

Has all the luxury of *thirst* supply'd. *Harte*.
2. Eagerness; vehement desire: with *of*, *for*, or *after*.—

Not hope of praise, nor *thirst* of worldly
good,

Enticed us to follow this emprise. *Fairfax*.
Thou hast allay'd the *thirst* I had of know-
ledge. *Milton*.

Say, is't thy bounty, or thy *thirst* of praise?
Granville.

—This is an active and ardent *thirst* after happiness, or after a full, beautifying object. *Cleynce*. 3. Drought.—

The rapid current, through veins
Of porous earth with kindly *thirst* updrawn,
Rise a fresh fountain. *Milton*.

(2.) **THIRST** an uneasy sensation arising from a deficiency of the saliva to moisten the inward parts of the mouth. Hence arises a strong desire for drink; and *thirst* is a symptom generally attending fevers of all kinds.—*Thirst* is best allayed by acids; water kept a while in the mouth, then spit out, and repeated as required; a bit of bread chewed with a little water, which latter may be gradually swallowed; if the person is very hot, brandy, or any good spirit, is the safest remedy. In all cases of great *thirst*, which always arises from debility, large draughts of cold water are hurtful; and in cases of high perspiration, from hard labour or violent exercise, not only cold water, but beer, porter, strong ale, and in short every cold liquor, are attended with the most fatal consequences; often producing the most dangerous diseases.

(3.) **THIRST AND HUNGER, METHODS OF ALLEVIATING AND PREVENTING.** See *HUNGER*, § 4.

(1.) * **To THIRST**. *v. n.* [*thyrstan*, Saxon; *derstien*,

derſten, Dutch.] 1. To feel want of drink; to be thirsty or athirst: with *for*.—They shall not hunger nor *thirst*. *Iſa.* xlix. 1.—The people *thirsted* there for water. *Exod.* xvii. 3.—

They as they *thirsted* scoop the brimming stream. *Milton.*

2. To have a vehement desire for any thing; with *for* or *after*.—My soul *thirsteth* for the living God. *Pſal.* xlii. 2.—Till a man hungers and *thirsts* after righteousness, till he feels an uneasiness in the want of it, his will will not be determined to any action in pursuit of this confessed, greater good. *Locke.*—

But furious *thirsting* thus for gore,
The fons of men shall ne'er approach thy shore.

(2.) * *TO THIRST.* *v. a.* To want to drink. This structure is not usual.—
Untam'd and fierce the tyger still remains:
For the kind gifts of water and of food,
He seek's his keeper's flesh, and *thirsts* his blood.

* *THIRSTINESS.* *n. f.* [from *thirst*.] The state of being thirsty.—Next they will want a sucking and soaking *thirstiness*, or a fiery appetite to drink in the lime. *Wotton.*

(1.) * *THIRSTY.* *adj.* [*tburſtig*, Sax.] 1. Suffering want of drink; pained for want of drink.—
Thy brother's blood the *thirsty* earth hath drank,
Broach'd with the steely point of Clifford's lance.
—Give me a little water to drink, for I am *thirsty*.

Unworthy was thy fate,
To fall beneath a base assassin's stab,
Whom all the *thirsty* instruments of death
Had in the field of battle fought in vain. *Roave.*
2. Possessed with any vehement desire: as, blood-thirsty.

(2.) *THIRSTY SOUND*, a bay of the South Sea, on the NE. coast of New Holland. *Lon.* 210. 18. *W. Lat.* 22. 10. S.
* *THIRTEEN.* *adj.* [*threotene*, Saxon.] Ten and three.—Speaking at the one end, I heard it return the voice *thirteen* times. *Bacon.*
* *THIRTEENTH.* *adj.* [from *thirteen*; *threoteotha*, Saxon.] The third after the tenth.—
If he could prove a *thirteenth* task for him
Who twelve achiev'd, the work would me be-
seem.

—The *thirteenth* part difference bringeth the business but to such a pass, that every woman may have an husband. *Graunt.*
* *THIRTIETH.* *adj.* [from *thirty*; *thrittegotha*, Saxon.] The tenth thrice told; the ordinal of thirty.—Henry shall espouse the lady Margaret ere the *thirtieth* of May next ensuing. *Shak.*—A *thirtieth* part of the sun's revolution. *Hale.*—
More will wonder at so short an age,
To find a blank beyond the *thirteenth* page.

(1.) * *THIRTY.* *adj.* [*thrittig*, Saxon.] Thrice ten.—
I have slept fifteen years.
—Ay, and the time seems *thirty* unto me. *Shak.*
—The Claudian aqueduct ran *thirty* eight miles. *Addison.*

(2.) *THIRTY TYRANTS OF ATHENS.* See *ATICA*, § 14.
(3.) *THIRTY TYRANTS ROME.* See *ROME*, § 73.

* *THIS.* *pronoun.* [*this*, Saxon.] 1. That which is present; what is now mentioned.—Bardolph and Nim had more valour than *this*, yet they were both hang'd; and so would *this* be, if he durst steal. *Shak.*—
Come a little nearer *this* way. *Shak.*
Within *this* three miles may you see it coming;

I lay a moving grove.
Must I endure all *this*?

—*This* same shall comfort us concerning our toil. *Gen.* v. 29.—*This* is not the place for a large reduction. *Hale.*—There is a very great inequality among men as to their internal endowments, and their external conditions, in *this* life. *Calamy.* 2. The next future.—I will speak yet but *this* once. *Gen.* xviii. 32. 3. *This* is used for *this time*.—
By *this* the vessel half her course had run.

4. The last past.—
I have not wept *this* forty years.

5. It is often opposed to *that*.—
As when two winds with rival force contend,
This way and *that*.
—According as the small parts of matter are connected together after *this* or that determinate manner, a body of *this* or that denomination is produced. *Boyle.*—Do we not often hear of *this* or that young heir? *South.*—
This way and *that* the impatient captives tend.

6. When *this* and *that* respect a former sentence, *this* relates to the latter, *that* to the former member. See *THOSE*.—Their judgment in *this* we may not, and in *that* we need not follow. *Hooker.*

7. Sometimes it is opposed to the other.—Consider the arguments which the author had to write *this*, or to design the other. *Dryden.*—
With endless pain *this* man pursues,
And *pofter* fondly hopes to see
What never was, nor e'er shall be.

THISATON, a river of Canada, which runs into lake Huron.
(1.) * *THISTLE.* *n. f.* [*thiſſel*, Saxon; *diſſel*, Dutch; *carduus*, Latin.] A prickly weed growing in corn fields.—The leaves of the *thistle* grow alternately on the branches, and are prickly; and the heads are, for the most part, squamose and prickly. *Miller.*—
The roots of *thistles* have my hunger fed.

Hateful docks, rough *thistles*.
—There thou prick't her with a *thistle*.
Thorns also and *thistles* it shall bring thee forth.
Though *thistles* choak'd the fields, and kill'd the corn.
—Rie grafs will kill *thistles*. *Mortimer.*
(2.) *THISTLE*, a well known weed in corn fields. In Britain there are 8 species of *Thistles* according to the vulgar arrangement; the carduus lanceolatus or spear-thistle, the nutans or milk-thistle, the palustris or marsh-thistle, the marianus or milk-thistle, acanthoides or wetted-thistle, cris-

pins or curled-thistle, onopordum, acanthium or cotton-thistle, ferratula arvensis or corn-thistle. All these, except the last, are annual or biennial, and therefore may be easily destroyed by cutting them down before their seed ripens; but the ferratula arvensis is perennial, and continues in the earth, increasing and throwing up new shoots every year. Mr Curtis ascertained the annual increase of its root, by planting in a garden a piece of the root two inches long, and about the thickness of a goose's quill, and a small head of leaves. By the ad of November the root had extended itself 8 feet, and when dug and washed, it weighed 4 lb. As to the uses of the thistle, they are not well known. The corn-thistle is eaten by the ass, and formerly was pulled with great care by the farmers in some parts of Scotland, as food for their horses. For a botanical description of the different kinds of thistle, see CACTUS, CARDUUS, DIPSACUS, ONOPORDUM, SERRATULA, SONCHUS.

(3.) *THISTLE, GOLDEN. *n. f.* A plant. *Miller.*
(4.) THISTLE, GOLDEN. See SCOLYMUS.
(5.) THISTLE, ORDER OF THE, or OF ST ANDREW, a military order of knighthood in Scotland, the rite and institution of which is variously related by different authors. Lesley, bishop of Ross, reports, that the night before the battle between Athelstan king of Northumberland and Hungus king of the Picts, a bright cross, in form of that whereon St Andrew (the tutelary saint of Scotland) suffered martyrdom, appeared to Hungus; who having gained the victory, ever after bore the figure of that cross on his banners. Others assert, that Achaius king of Scotland first instituted this order, after having made the famous league offensive and defensive with Charlemagne king of France. But although the thistle had been acknowledged as the symbol of the kingdom of Scotland from the reign of Achaius, yet some refer the beginning of this order to Charles VII. of France. Others place the foundation of it as low as the year 1500. The chief and principal ensign is a gold collar composed of thistles and sprigs of rue interlinked with amulets of gold, having pendent thereto the image of St Andrew with his cross, and the motto, NEMO ME IMPUNE LACESIT. The ordinary or common ensign worn by the knights is a star of four silver points, and over them a green circle, bordered and lettered with gold, containing the said motto, and in the centre is a thistle; all which is embroidered on their left breast, and worn with the collar, with a green ribband over the left shoulder, and brought under the right arm; pendent thereto is the image of St Andrew, with his cross, in a purple robe, within an oval of gold enamelled vert, with the former motto; but sometimes they wear, encircled in the same manner, a thistle crowned. About the time of the Reformation, this order was dropped, till James II. of Great Britain resumed it by creating eight knights. The Revolution unsettled it again; and it lay neglected, till queen Anne, in 1703, restored it to the primitive design, of twelve knights of St Andrew.

*THISTLY. *adj.* [from *thistle*.] Overgrown with thistles.—

Wide o'er the *thistly* lawn as swells the breeze.

Thomson.

* THITHER. *adv.* [*thither*, Saxon.] *i. To* that place: it is opposed to *hither*.—

We're coming *thither*.

Shaks.

'Tis the way too *thither*.

Cowley.

He *thither*, whence he came, doth run.

Denham.

There Phoenix and Ulysses watch the prey,
And *thither* all the wealth of Troy convey.

Dryden.

2. To that end; to that point.

* THITHERTO. *adv.* [*thither* and *to*.] To that end; so far.

* THITHERWARD. *adv.* [*thither* and *ward*.] Towards that place.—

Ne would he suffer sleep once *thitherward*.

Spenser.

We met him *thitherward*.

Shaks.

By quick instinctive motion, up I sprung,

As *thitherward* endeavouring.

Milton.

—The foolish beasts went to the lion's den, leaving very goodly footsteps of their journey *thitherward*, but not the like of their return. *L'Estrange*.—

Thitherward they bent their way. *Dryden.*

THIVA, } or *Stibes*, a town of European Tur-

THIVE, } key, in Livadia, anciently called

Thebes. (See *THEBES*, N° II. § 7.) It contains about 5000 inhabitants, partly Christians, partly Turks, who have many Greek churches, and several mosques. It is 20 miles NW. of Setines or Athens, and 280 SW. of Constantinople. Lon. 23. 40. E. Lat. 38. 17. N.

THIVIERS, a town of France, in the dep. of the Dordogne; 7½ miles SW. of Exideuil, and 18 NNE. of Perigueux.

THIZY, a town of France, in the dep. of the Rhone and Loire; 9 miles E. of Roanne, and 27 NW. of Lyons.

THLASPI, EASTARD CRESS, or MITHRIDATE MUSTARD, in botany, a genus of plants belonging to the class of *tetradynamia*, and order of *siliquosa*; and in the natural system ranging under the 39th order, *Siliquosa*. The pod is emarginated, obcordate, and polyspermous; the valves are boat-shaped, and marginato-carinated. There are 12 species, of which 6 only grow in Britain; viz.

1. THLASPI ARVENSE, treacle-mustard or penny-cress, has orbiculate pods, and leaves oblong, smooth, and scalloped. It smells like garlic, and has a white flower.

2. THLASPI BURSA PASTORIS, or SHEPHERD'S PURSE, has obcordate pods; the radical leaves are pinnated. The seeds of some of these species have an acrid biting taste, approaching to that of the common mustard; with which they agree nearly in their pharmaceutical properties. They are rarely made use of any otherwise than as ingredients in the compositions whose names they bear; though some recommend them in different disorders, preferably to the common mustard.

3. THLASPI CAMPESTRE, mithridate-mustard, has roundish pods, sagittate leaves, dentated and hairy.

4. THLASPI HIRTUM, perennial mithridate-mustard, has roundish hairy pods; the cauline leaves are sagittate and villous.

5. THLASPI MONTANUM, or mountain mithridate-mustard, has obcordate pods, smooth leaves; the radical leaves somewhat fleshy, obovate and entire;

T t

entire; the cauline embracing the stalk, and the corolla being larger than the calyx.

6. *THLASPI PERFOLIATUM*, perfoliate treacle-mustard, has obcordate pods; the cauline leaves are smooth and subdentate; the petals of the length of the calyx, and the stalk branchy.

* *THO'*, *adv.* [*thonne*, Saxon.] 1. Then. *Spenser*.
2. *Tho'* contracted for *though*.

THOANTHUM, an ancient town of Rhodes.

THOARD, a town of France, in the dep. of the Lower Alps; 9 miles ESE. of Sisteron.

(1.) THOAS, a son of Bacchus and Ariadne; made king of Lemnos by RHADAMANTHUS. He afterwards resigned it to his daughter Hypsipyle, who saved his life, when the Lemnian women killed all the men. See HYPSPYILE.

(2.) THOAS, king of Taurica. See ORESTES.

THOIRY, a town of France, in the dep. of Ain; 6 miles SSW. of Gex, and $7\frac{1}{2}$ W. of Geneva.

THOISSEL, a considerable town of France, in the dep. of Ain, and late prov. of Bresse, with a fine college; seated in a fertile country, between the Saône and Chalcrone; 10 miles N. of TREVoux, and 200 SE. of Paris. Lon. 4. 50. E. Lat. 46. 11. N.

* *To THOLE*. *v. n.* To wait a while. *Ainsl.*

THOLOUSE. See TOULOUSE.

THOMÉANS, THOMISTS. See CHRISTIANS OF ST THOMAS.

THOMAR, a town of Portugal, in Estremadura, containing two churches, and about 3600 inhabitants; 63 miles NE. of Lisbon, and 14 S. of Coimbra. Lon. 11. 26. E. Ferro. Lat. 39. 34. N.

(1.) THOMAS, an apostle of Jesus Christ, and the only one of the eleven who could not believe in his Lord's resurrection till he had satisfied himself by feeling the marks of his wounds, which our Saviour graciously condescended to allow him to do. Thomas was a native of Galilee, and was surnamed *Didymus*, or *the Twin*. He preached the gospel in the eastern countries, and at last suffered martyrdom in India.

(2.) THOMAS AQUINAS. See AQUINAS.

(3.) THOMAS, Christian, was born at Leipzig in 1655. He was professor of jurisprudence, first at Berlin, and afterwards at Hull. He died at Hull in 1748. He was author of an *Introduction to Puffendorf*, and many other works on logic, morals, and jurisprudence, in which he advanced a variety of dogmas contrary to received opinions.

(4.) THOMAS, James Ernest, an eminent landscape painter, born at Hagelstein in 1588. He studied long in Italy, under Elzheimer, whose manner and whose friendship he acquired. He died in 1635.

(5.) THOMAS, Anthony Leonard, a French poet, and learned member of the French academy, born at Clermont, in Auvergne, in 1332. He published *Reflections, historical and literary, on Voltaire's Poem on Natural Religion*, 1756; wherein he defended Christianity with great ability. In 1759 he wrote *Elegie on Count Saxe*, and was crowned by the French academy. He afterwards celebrated the memories of *Marcus Aurelius, Sully, Troupin*, and others. He died in 1785. His whole works were printed at Paris in 1802, in 7 vols. 8vo.

(6, 7.) THOMAS, Joseph and John, brothers of

Anthony, were also very eminent in literature; the latter excelled in Latin poetry. Joseph died in 1755, and John in 1785.

(8.) THOMAS, Elizabeth, an ingenious English lady, born in 1675, and distinguished by the title of *Corinna* in Pope's *Dunciad*, for the silly reason because she had communicated some of that irritable poet's letters to Curll the bookseller. Among other misfortunes the early lost her lover. Her poems and letters are entertaining, and were published in 2 vols. folio.

(9.) THOMAS, ST. OF CANTERBURY. See BECKET, N° 2. and ENGLAND, § 23.

(10.) THOMAS the REYMOOR, called also *Thomas Learmont*, and *Thomas of Erceldou*, was born at Erceldou, a village near Melrose in Tweedale, in what year is uncertain; but he was an old man when Edward I. was carrying on war in Scotland. (See LEARMONTH, and RHYMER, N° 1.) The character of Learmont as a prophet, and which was common to him with Lirius, Orpheus, and other early poets in many countries, arose, if we may believe Muckenzie, in his *Lives of Scottish Writers*, from his having conferences with Eliza, a nun and prophetess at Haddington. Learmont put her predictions into verse, and thus came in for his share of the prophetic spirit. The prophecies of Learmont appear to have been merely traditional; nay, it seems doubtful if he ever pretended to such folly. Those however which bear his name were printed at Edinburgh, 1515, reprinted 1680 and 1742.

(1.) THOMASIVS, James, a learned German, born of a good family, at Leipzig, who became professor of eloquence at Leipzig, and among his pupils was the celebrated LEIBNITZ. His chief works are, *The Origin of Philosophical and Ecclesiastical History*, and several learned *Dissertations*, in 11 vols. 8vo.

(2.) THOMASIVS, Christian, son of the above. See THOMAS, N° 3.

(1.) THOMAS'S DAY, ST. a festival of the Christian church, observed on December 21, in commemoration of St Thomas the apostle.

(2.) THOMAS'S DAY, ST. OF CANTERBURY, a festival of the Romish church, observed on December 29, in memory of Thomas Becket archbishop of Canterbury, who was murdered, or, as the Romanists say, martyred, in the reign of king Henry II.

(1.) THOMAS, ST. a Danish island in the West Indian Ocean, near St Bartholomews, 15 miles in circumference. Lon. 65. 26. W. Lat. 18. 22. N.

(2.) THOMAS, ST. an island of Africa, belonging to the Portuguese, discovered in 1429. It is nearly circular, and about 30 miles in diameter. The soil is fertile, and produces vines, sugar-canes, and other fruits; but the climate is unhealthy.

(3.) THOMAS, ST. a town of Guiana, on the Orinoko, belonging to Spain. It was attacked by Sir W. Raleigh, but without success. Lon. 63. 50. W. Lat. 7. 6. N.

THOMASTOWN, a town of Ireland, in Kilkenny, on a rivulet which runs into the Nore; 8 miles SSE. of Kilkenny, and 16 N. of Waterford.

THOMDAM, a town of Saxony, in Saxe-Lauenburg; 58 miles SE. of Hamburg, and 25 of Lauenburg.

THOMISTS.

THOMISTS. See **CHRISTIANS**, N° 8.

THOMOND, a county of Ireland, called also *Clare*. See **CLARE**, N° 1.

THOMSI, a town of Hungary, 11 miles SW. of Canischa.

THOMSON, James, an excellent British poet, the son of a Scottish divine, was born in the shire of Roxburgh, in 1700, and was educated in the university of Edinburgh, with a view to the ministry. But his genius inclining him to the study of poetry, which he soon found would be incompatible with that of theology, or at least might prevent his being provided for in that way in his own country, he relinquished his views of engaging in the sacred function, and repaired to London, in consequence of some engagement which he had received from a lady of quality there, a friend of his mother. The reception he met with wherever he was introduced, emboldened him to risk the publication of his excellent poem on *Winter*.—This piece was published in 1726; and from the universal applause it met with, Mr Thomson's acquaintance was courted by people of the first taste and fashion. But the chief advantage which it procured him was the acquaintance of Dr Rundle, afterwards bishop of Derry, who introduced him to the late lord chancellor Talbot; and some years after, when the eldest son of that nobleman was to make his tour on the continent, Mr Thomson was chosen as a proper companion for him. The expectations which his *Winter* had raised, were fully satisfied by the successive publications of the other seasons; of *Summer* in 1727; of *Spring*, in 1728; and of *Autumn*, in a 4to edition of his works in 1730. Besides the Seasons, and his tragedy of *Sophonisba*, written and acted with applause in 1729, he had, in 1727, published his poem to the memory of Sir Isaac Newton, with an account of his chief discoveries; in which he was assisted by his friend Mr Gray, a gentleman well versed in the Newtonian philosophy. That same year the resentment of our merchants, for the interruption of their trade by the Spaniards in America, running very high, Mr Thomson zealously took part in it, and wrote his *Britannia*, to rouse the nation to revenge. With the Hon. Charles Talbot, our author visited most of the courts in Europe, and returned with his views greatly enlarged. On his return to England with Mr Talbot (who soon after died), the chancellor made him his secretary of briefs; a place of little attendance, suiting his retired indolent way of life, and equal to all his wants. From this office he was removed, when death, not long after, deprived him of his noble patron. He then found himself reduced to a state of precarious dependence. The profits arising from his works were not inconsiderable; his tragedy of *Agamemnon*, acted in 1738, yielded a good sum. But his chief dependence was upon the prince of Wales, who settled on him a handsome allowance, and honoured him with many marks of particular favour. Notwithstanding this, however, he was refused a licence for his tragedy of *Edward and Eleanor*, which he had prepared for the stage in 1736, for some political reasons. Mr Thomson's next performance was the Masque of *Alfred*, written in

1740 jointly with Mr Mallet; by the command of the prince of Wales, for the entertainment of his royal highness's court at Clifden, his summer residence. Mr Thomson's poem, entitled *The Captivity of Indolence*, was his last work published by himself; his tragedy of *Coriolanus* being only prepared for the theatre, when he died, August 27, 1748, in consequence of a cold he caught on the Thames, after being overheated in walking. The distinguishing qualities of his mind and heart, appear best in his writings. There his devotion to the supreme Being, his love of mankind, of his country, and friends, shine out in every page; his tenderness of heart was so unbounded, that it took in even the brute creation. It is not known, that through his whole life he ever gave any person a moment's pain, either by his writings or otherwise. He took no part in the political squabbles of his time, and was therefore respected and left undisturbed by both sides. His testamentary executors were lord Lyttleton, and Mr Mitchell. By their united interests, the orphan play of *Coriolanus* was brought on the stage to the best advantage; from the profits of which, and the sale of MSS. and other effects, a handsome sum was remitted to his sisters. His remains were deposited in the church of Richmond, under a plain stone, without any inscription. A handsome monument was erected to him in Westminster Abbey in 1762, the charge of which was defrayed by the profits arising from a splendid edition of all his works in 4to: Mr Millar the bookseller, who had purchased all Mr Thomson's copies, giving up his property on this grateful occasion. A monument has also been erected to him at the place of his birth.

THOMYRIS, or **TOMYRIS**. See **CYRUS**, N° 1.

THONE, a river of England, in Leicestershire, which joins the **PARRET**.

* **THONG**. *n. f.* [*thrang*, *throng*, Saxon.] A strap, or string of leather.—

The Tufcan king

Laid by the lance, and took him to the sling;
Thrice whirled the *thong* about his head, and threw

The heated lead half melted as it flew. *Dryd.*
—The ancient cestus only consisted of so many large *thongs* about the hand. *Addison.*

The smiths and armourers on palfreys ride,
And nails for loosened spears, and *thongs* for shields provide. *Dryden.*

THONNA, a town of Upper Saxony, in Saxo-Gotha; 12 miles from Gotha.

THONNAUSTAUF, a town of Bavaria, on the banks of the Danube; 3 miles from Ratibon.

THONNES, a town of the French empire, in the dep. of the Lac Lemane, and late duchy of Geneva; 9 miles SE. of Annecy, and 23 NNW. of Montier.

THONON, a town of the French empire, in the dep. of Mont Blanc, and ci-devant capital of Chablais, in the late duchy of Savoy. It is situated on the lake of Geneva, 13 miles SW. of Lausanne. Lon. 6. 44. E. Lat. 46. 19. N.

THOOSA, a sea nymph, the daughter of Phorcys, and mother of **POLYPHEMUS** by Neptune.

(1.) **THOR**, the eldest and bravest of the sons of Odin and Frea, was, after his parents, the greatest god of the Saxons and Danes while they continued heathens. They believed, that Thor reigned over all the aerial regions, which composed his immense palace, consisting of 540 halls; that he launched the thunder, pointed the lightning, and directed the meteors, winds, and storms. To him they addressed their prayers for favourable winds, refreshing rains, and fruitful seasons; and to him the fifth day of the week, which still bears his name, was consecrated. See **POLYTHEISM**.

(2.) **THOR**, in geography, a town of France, in the dep. of the mouths of the Rhone; 9 miles E. of Avignon, and 9 S. of Carpentras.

(1.) * **THORACICK**, *adj.* [from *thorax*.] Belonging to the breast.—The chyle grows grey in the *thoracick* duct. *Arbutnot*.

(2.) **THORACICK DUCT**. See **ANATOMY**, *Index*.

* **THORAL**, *adj.* [from *thorus*, Lat.] Relating to the bed.—The punishment of adultery, according to the Roman law, was sometimes made by a *thoral* separation. *Ayliffe*.

(1.) **THORAX**. See **ANATOMY**.

(2.) **THORAX**, in ancient geography, a mountain of Ionia, near Magnesia; on which *Daphitas* the grammarian was crucified.

THORESBY, Ralph, F. R. S. a celebrated antiquary and topographer, born at Leeds, in Yorkshire, in 1658. He wrote the *Topography of Leeds and the adjacent country*. He died in 1725.

(1.) **THORIGNY**, a town of France, in the dep. of the Channel, 6 miles SSE. of St Lo, and 15 NE. of Ville Dieu.

(2.) **THORIGNY**, a town of France, in the dep. of Yonne; 7½ miles NE. of Sens, and 18 SSE. of Provins.

THORIUS, Raphael, a learned French physician, who, being a protestant, settled in England, in the reign of James I. He wrote a poem on *Topacco*; and other works; and died at London of the plague in 1625.

(1.) **THORN**, in geography, a town of Regal Prussia, in the palatinate of Culm, formerly a Hanseatic town. It still enjoys great privileges; is well fortified; but part of the fortifications, and a great number of houses, were ruined by the Swedes in 1703. It is seated on the Vistula, and contains 10,000 inhabitants. Lon. 18. 42. E. Lat. 53. 6. N.

(2.) **THORN**, a town of England, in the West Riding of Yorkshire, with a market on Wednesday, seated in a marsh, which has been drained, on the Don; 31 miles S. of York, and 166 N. of London.

(3.) **THORNE**, a town of the French empire, in the dep. of the Ourte, and late bishoprick of Liege; 7 miles SW. of Ruremond.

(4.) * **THORN**, *n. f.* [*thaurns*, Gothick; *thorn*, Saxon; *doorne*, Dutch.] 1. A prickly tree of several kinds.—*Thorns* and thistles shall it bring forth. *Gen. iii. 12*.—The most upright is sharper than a *thorn* hedge. *Mic. vii. 2*. A prickly growing on the thorn bush.—

Without *thorn* the rose.

Milton.

3. Any thing troublesome.—

The guilt of empire; all its *thorns* and cares
Be paly mine. *Southern's Spartan Dame.*

(5.) **THORN**, BLACK, in botany. See **PRUNUS**.

(6.) **THORN**, BOX. See **LYCIUM**.

(7.) **THORN**, CHRIST'S. See **RHAMNUS**.

(8.) **THORN**, EGYPTIAN. See **MIMOSA**, N^o 11.

(9.) **THORN**, EVERGREEN. See **MELPICE** N^o 7.

(10.) **THORN**, GOAT'S. See **ASTRAGALUS** N^o 2.

(11.) **THORN**, LILY. See **CATESBEA**.

(12.) **THORN**, SPANISH; a species of **ANTHYLLIS**.

(13.) **THORN**, WHITE, or HAWTHORN. See **CRATAGUS**.

(1.) * **THORN-APPLE**, *n. f.* A plant. *Morimer*.

(2.) **THORN APPLE**. See **DATURA**.

THORNAX, a mountain of Argolis. *Paus. viii. 27.*

(1.) * **THORNBACK**, *n. f.* [*raia clavata*, Lat.] A sea-fish.—The *thornback*, when dried, tastes of sal ammoniac. *Arbutnot*.

(2.) **THORNBARK**, in ichthyology. See **RASA**.
THORNBURY, an incorporate town of England, in Gloucestershire; with a market on Saturday on the Severn, 24 miles SW. of Gloucester and 21 W. of London. Lon. 2. 31. W. Lat. 51. 35. N.

* **THORNBUT**, *n. f.* [*rhombus aculeatus*, Lat.] A sort of sea-fish, *Ainsl.* which he distinguishes from thornback. A bird or turbot.

THORNDIKE, Herbert, B. D. a learned English divine of the 17th century. He was educated at Trinity College Cambridge, where he graduated. In 1613, he was elected master of Trinity College; but was soon after ejected for his loyalty. In 1660, he obtained a prebend in Westminster Abbey. He wrote 1. *Epilogus*, a Latin treatise in defence of the Church of England, folio; 2. *A Treatise on Weights and Measures*; 3. *A treatise On Church Censures*. He also assisted *Walton* in the *Polyglot Bible*. He died in 1672.

THORNDON, EAST and WEST, 2 small towns of England in Essex, in parishes of the same names, between Brentwood and Hornndon.

THORNE. See **THORN**, N^o 2.

THORNESS BAY, a bay on the NW. coast of the Isle of Wight.

(1.) **THORNEY ABBEY**, a town of England in Cambridgeshire, which had anciently an abbey, the name of which only remains; 6 miles NE. of Peterborough, and 87 N. of London.

(2, 3.) **THORNEY ISLAND**, an island in the English Channel, near the coast of Sussex, 4 miles in circuit; with a town so named, at the mouth of the Levant; 7 miles SW. of Chichester.

(1.) **THORNHILL**, Sir James, an eminent English painter, was born in Dorsetshire in 1676, of an ancient family; but was constrained to apply to some profession by the distresses of his father, who had been obliged to sell his family-estate. His inclination directed him to the art of painting; and on his arrival at London he applied to his uncle, the famous Dr Sydenham, who enabled him to proceed in the study of the art under the direction of a painter who was not very eminent. However, the genius of Thornhill made ample amends for the insufficiency of his instructor, and by a happy application of his talents he made so great a progress, that he gradually rose to the highest reputation.

reputation. His genius was well adapted to historical and allegorical compositions; he possessed a fertile and fine invention; and he sketched his thoughts with great ease, freedom, and spirit. He excelled also equally in portrait, perspective, and architecture: shewed an excellent taste for design, and had a free and firm pencil. His performances in the dome of St Paul's church at London, in the hospital at Greenwich, and at Hampton-court, are such public proofs of his merit as will convey his name to posterity with great honour. He lived in general esteem; enriched himself by the excellence of his works; was appointed state-painter to Queen Anne, from whom he received the honour of knighthood; had the singular satisfaction to repurchase his family estate; and was elected member of parliament. He died in 1734.

(1.) THORNHILL, in geography, an elegant town of Scotland in Dumfries-shire, in the parish of Morton, pleasantly seated on an eminence, half a mile E. of the Nith. The high road from Edin. to Lead-hills, and that from Dumfries to Ayr, cross each other in it. It has fairs in the 2d Tues. O. S. of Feb. May. Aug. and Nov. where great quantities of coarse linen and woollen cloths, made in or near it are sold. The population, in 1791, was 430. It lies 15 m. NW. of Dumfries.

(3.) THORNHILL, a village of Perthshire in the parish of Kincardine, adjacent to Norriestown; in 1794, the population of both was 626.

THORNTON, Bonnel, A. M. and M. B. an English poet, born in Maiden-lane, London, in 1724. He was the son of an apothecary; and being educated at Westminster school, was elected to Christ Church, Oxford, in 1743. The first work in which he was concerned was, "*The Student, or Oxford and Cambridge Miscellany*," which appeared in monthly numbers; and was collected in 2 vols. 8vo, in 1748. Smart was the chief conductor of the work; but Thornton, and other wits of both universities, assisted in it. He took his degrees in 1750 and 1754. In 1754, he undertook *The Connoisseur*, in conjunction with Colman, which they continued weekly to the 30th Sept. 1756. To the *Public Advertiser*, then in high reputation, he was a frequent contributor. In 1764, he married Miss Sylvia Brathwaite, youngest daughter of col. Brathwaite. In 1766, he published a translation of Plautus in blank verse, in 2 vols. These volumes contained 7 plays, of which the *Captive* was translated by Mr Warner, who afterwards completed all that Thornton left unfinished. Thornton published in 1767, *The Battle of the Wigs*, on the disputes then subsisting between the fellows and licentiates. He died, of the gout in his stomach, May 9, 1768, aged 44. He wrote the papers in the *Adventurer* marked A; *An Ode to St Cecilia's day*, *The Oxford Barber*; with many detached essays in the public papers. His character in his epitaph, written in Latin by Dr Warton, and placed on his monument in Westminster Abbey, is to this effect: "His genius, cultivated most happily by every kind of polite literature, was accompanied and recommended by manners open, sincere, and candid. In his writings and conversation he had a wonderful liveliness, with a vein of pleasantry peculiarly his own.

In ridiculing the failings of men, without bitterness, and with much humour, he was singularly happy; as a companion, he was delightful."

* THORNY. *adj.* [from *thorn*.] 1. Full of thorns; spiny; rough; prickly.—

He wore, sweet head, a *thorny* diadem.

Randolph.
His neck shoots up a thickset *thorny* wood.

Dryden.
A *thorny*, or at best a barren soil.

They on the bleak top

Of rugged hills, the *thorny* bramble crop.

Dryden.

2. Pricking; vexatious.—

The sharp *thorny* points

Of my alleged reasons drive this forward. *Shak.*

Thorny care, and stinging hate. *Young.*

3. Difficult; perplexing.—By how many *thorny* and hard ways they are come thereunto. *Spenser.*

THOROE, an island of Denmark, between Funen and Langeland, 3 miles SE. of Suenberg.

(1.) * THOROUGH. *prepos.* [the word *through* extended into two syllables.] 1. By way of making passage or penetration. 2. By means of.—

Mark Antony will follow

Through the hazards. *Shak.*

(2.) * THOROUGH. *adj.* [The adjective is always written *thorough*, the preposition commonly *through*.] 1. Complete; full; perfect.—The Irish horseboys, in the *thorough* reformation of that

realm, should be cut off. *Spenser.*—He did not desire a *thorough* engagement. *Clarendon.*—A *thorough* translator must be a *thorough* poet. *Dryden.*—A *thorough* practice of subjecting ourselves to the wants of others, would extinguish in us pride. *Swift.*—

—How can I call a general disregard, and a *thorough* neglect of all religious improvements, frailty? *Law.* 2. Passing through.—A *thorough* house, without *thorough* lights on the sides. *Law.*

* THOROUGHFARE. *n. s.* [from *thorough* and *fare*.] 1. A passage through; a passage without any stop or let.—

Th' Hyrcanian deserts are as *thoroughfares*.

Shak.
—His body is a passable carcase, it is a *thoroughfare* for steel. *Shak.*—The ungrateful person is a monster, which is all throat and belly; a kind of *thoroughfare*, or common shore. *South.*—

A *thoroughfare* of news. *Dryden.*

2. Power of passing.—

Hell, and this world, one realm, one continent,

Of easy *thoroughfare*. *Milton.*

* THOROUGHLY. *adv.* [from *thorough*.] Completely; fully.—

Look into this business *thoroughly*. *Shak.*

—We can never be grieved for their miseries who are *thoroughly* wicked. *Dryden.*—One would think, that every member of the community who embraces with vehemence the principles of either party had *thoroughly* sifted and examined them. *Addison.*—They had forgotten their solemn vows as *thoroughly* as if they had never made them. *Atterbury.*

* THOROUGHFACED. *adj.* [from *thorough* and *face*.] Perfect in what is undertaken; complete; thoroughsped. Generally in a bad sense.—When it was proposed to repeal the test clause, the ablest

of those who were reckoned the most staunch and *thoroughpaced* Whigs fell off at the first mention of it. *Swift*.

* **THOROUGHSPED.** *adj.* [*thorough* and *sped.*] Finished in principles; thoroughpaced; commonly, finished in ill.—Our *thoroughspiced* republic of Whigs, are most highly useful to princes. *Swift*.

* **THOROUGHSTITCH.** *adv.* [*thorough* and *stitch.*] Completely; fully. A low word.—Perseverance alone can carry us *thoroughstitch*. *L'Esfrange*.—

THOROUGH-WAX, in botany. See **BUPLEURUM**.

* **THORP.** *n. s.* *Thorp, throp, threp, trep, trop*, are all from the Saxon *thorp*, which signifies a village. *Gibson's Camden*.

THORPE, a town of England, in Surry, near Egham. It is 18 miles WSW. of London.

THORSBERG, a mountain of Norway in Aggersbyg; 18 miles W. of Tonsberg.

THORSTORP, a town of Sweden in W. Gothland; 28 miles SE. of Gotheborg.

* **THOSE.** *pronoun.* 1. The plural of *that*.

Those clam'rous harbingers of blood. *Shak.*

Those made not poets, but the poets those. *Denham.*

—The fibres of this muscle act as *those* of others. *Cbeyne.* 2. *Those* refers to the former; *these* to the latter noun.—

Neither their sighs nor tears are true,

Those idly blow, *these* idly fail. *Cowley.*

THOTCHI, a town of Chinese Tartary.

THOTH, or **THEUT**, (called by the Phœnicians **TAAUT**, by the Greeks **HERMES**, and by the Romans **MERCURY**), was a Phœnician of very superior talents, and one of the civilizers of mankind. He was prime minister to Osiris, whom, after his death, he deified; and he was himself deified by his countrymen the Egyptians, for the benefits that he had rendered to the human race. See **HERMES**, N° 1—3. **MERCURY**, **MYTHOLOGY**, § 10. **POLYTHEISM**, and **TAAUT**.

(1.) **THOU**, James Angustus DE. See **THUANUS**.

(2.) **THOU**, Francis Augustus DE, the son of Thuanus, was chief librarian to Lewis XIV; but having attached himself to Cinq-Mars, was condemned and beheaded at Lyons, in 1642.

(3.) * **THOU**, *n. s.* [*thou*, Saxon; *du*, Dutch; in the oblique cases singular *thee*, *the*, Saxon; in the plural, *ye*, *ge*, Saxon; in the oblique cases plural *you*, *cow*, Saxon.] *You* is now commonly used for the nominative plural. 1. The second pronoun personal.—

Come let me clutch *thee* :

I have *thee* not, and yet I see *thee* still.

Art *thou* not, fatal vision, sensible

To feeling as to sight? *Shak.*

I am as like to call *thee* so again,

To spit on *thee* again, to spurn *thee* too,

If *thou* wilt lend this money. *Shak.*

Thou, if there be a *thou* in this base town.

Dryden.

2. It is used only in very familiar or very solemn language.—When we speak to equals or superiors, we say *you*; but in solemn language, and in addresses of worship, we say *thou*. [Familiar.]—

Here's to *thee*, Dick. *Cowley.*

[Solemn.]—

I know *thou* wert not slow to hear. *Addison,*

* **To THOU.** *v. a.* [from *thou*.] To treat with familiarity.—If *thou thou'st* him some thrice, it shall not be amiss. *Shak.*

THOUARCE, a town of France, in the dep. of Maine and Loire; 7½ miles N. of Vebiers, and 12 S. of Angers.

THOUARE, a town of France, in the dep. of Lower Loire, 5 miles NE. of Nantes.

THOUARS, an ancient and considerable town of France, in the dep. of the Two Sevrans, and late prov. of Poitou, with a castle, the princely residence of its ancient dukes, seated on a rocky hill 120 feet high, on the banks of the Thoue, 32 miles SE. of Angers, and 162 SW. of Paris. Lon. 0. 15. W. of Paris. Lat. 46. 59. N.

THOUE, a river of France which runs past Thouars, and falls into the Loire, below St Florent.

* **THOUGH.** *conjunction.* [*theob*, Sax. *thaub*, Gothic.] 1. Notwithstanding that; although.—

Not that I so affirm, *though* so it seem. *Mil.*

Guard itself, *though* but a child invade. *Waller.*

—I can desire to perceive those things *though* they be such as eye hath not seen. *Locke.*—*Though* the name of abstracted ideas is attributed to universal ideas, yet this abstraction is not great. *Watts.* 2. As **THOUGH**; as if; like as if.—In the vine were three branches; and it was *as though* it budded. *Gen. xl. 10.* 3. It is used in the end of a sentence in a familiar language; however; yet.—

'Tis dangerous *though* to treat me in this sort

And to refuse my offers, *though* in sport. *Dryd.*

A good cause would do well *though*. *Dryden.*

(1.) * **THOUGHT.** *n. s.* [from the preterite of *To think*.] 1. The operation of the mind; the act of thinking.—

And cards are dealt, and chessboards brought,

To ease the pain of coward *thoughts*. *Prior.*

2. Idea; image formed in the mind.—

Things above earthly *thought*. *Milton.*

3. Sentiment; fancy; imagery; conceit.—*Thought*, if translated truly, cannot be lost in another language; but the words that convey it to our apprehension, which are the image and ornament of that *thought*, may be so ill chosen as to make it appear unbandsome. *Dryden.*—One may often find as much *thought* on the reverse of a medal as in a canto of Spenser. *Addison.*—*Thoughts* come crowding in so fast upon me, that my only difficulty is to chuse or to reject. *Dryden.*

The *thoughts* of a foul that perish in thinking,

Locke.

Some unmeaning thing they call a *thought*.

Pope.

4. Reflection; particular consideration.—

Using those *thoughts* which should indeed have died

With them they think on. *Shak.*

5. Conception; preconceived notion.—

Things to their *thought*

So unimaginable as hate in heaven. *Milton.*

6. Opinion; judgment.—Despised in the *thought* of him that is at ease. *Job, xii. 5.*—They communicated their *thoughts* on this subject to each other. *Dryden.*

Thus Bethel spoke, who always speaks his *thought*,

And always thinks the very thing he ought. *Pope.*

7. Me-

7. Meditation; serious consideration.—
Pride, of all others the most dangerous fault,
Proceeds from want of sense or want of thought.
Roscommon.

8. Design; purpose.—The *thoughts* I think to-
wards you are *thoughts* of peace. *Jer. xxix. 11.*—
Nor was godhead from her *thought*. *Milton.*

9. Silent contemplation.—
Bad is the world; and all will come to nought,
When such ill dealings must be seen in *thought*.
Shak.

10. Solitude; care; concern.—Let us return,
left he take *thought* for us. *1 Sam. ix. 5.*—Hawis
was put in trouble, and died with *thought* and
anguish. *Bacon.*

Adam took no *thought*. *Milton.*

11. Expectation.—
The main desiry
Stands on the hourly *thought*. *Shak.*

12. A small degree; a small quantity. It seems a
loose term, but is used by good writers.—His face
was a *thought* longer than the exact symmetrians
would allow. *Sidney.*—If our own be but equal,
the law of common indulgence alloweth us to
think them at the least half a *thought* the better,
because they are our own. *Hooker.*—A needle
pierced through a globe of cork, cut away by
degrees, will swim under water, yet not sink unto
the bottom, if the cork be a *thought* too light to
sink under the surface. *Brown.*—Yet I think I am
a *thought* better. *Swift.*

(1.) * **THOUGHT**, the *preterite* and *part. pass.* of
think.—

I told him what I *thought*. *Shak.*
Can any thing be *thought* of for their service?
Addison.

—No other tax could have been *thought* of. *Addison.*
(3.) **THOUGHT** is a general name for all the
ideas consequent on the operations of the mind,
and even for the operations themselves. See
METAPHYSICS.

(4.) **THOUGHT**, in composition. See **ORATORY**,
Part I. and II.

* **THOUGHTFUL**. *adj.* [*thought* and *full*.]
1. Contemplative; full of reflection; full of me-
ditation.—

On these he mus'd within his *thoughtful* mind.
Dryden.

2. Attentive; careful.—
Thoughtful of thy gain. *Phillips.*

3. Promoting meditation; favourable to musing.—
War, horrid war, your *thoughtful* walks in-
vades. *Pope.*

4. Anxious; solicitous.—
Around her crowd distrust, and doubt, and
fear,
And *thoughtful* foresight, and tormenting care.
Prior.

* **THOUGHTFULLY**. *adv.* [*from thoughtful*.]
With thought or consideration; with solicitude.

* **THOUGHTFULNESS**. *n. f.* [*from thought-
ful*.] 1. Deep meditation.—While the nervous
fibres preserve their due tension and firmness, and
the spirits are transmitted to them from the brain,
without the avocations of *thoughtfulness* and in-
tense contemplation, the concoction of the meats
is well performed. *Blackmore.* 2. Anxiety; soli-
citude.

* **THOUGHTLESS**. *adj.* [*from thought*.] 1.
Airy; gay; dissipated. 2. Negligent; careless.
—It is peculiarly shocking to see grey hairs with-
out remorse for the past, and *thoughtless* of the
future. *Rogers.* 3. Stupid; dull.—

Seems design'd for *thoughtless* majesty:
Thoughtless as monarch oaks that shade the
plain. *Dryden.*

* **THOUGHTLESSLY**. *adv.* [*from thought*.]
Without thought; carelessly; stupidly.—
In reflex hurries *thoughtlessly* they live.

Gartl.
* **THOUGHTLESSNESS**. *n. f.* [*from thought-
less*.] Want of thought; absence of thought.

* **THOUGHTSICK**. *adj.* [*thought* and *sick*.]
Uneasy with reflection.—

Heav'n's face doth glow
With trifling visage; and, as 'gainst the doom,
Is *thoughtsick* at the sight. *Shak.*

THOUINIA, in botany, a genus of plants be-
longing to the class of *diandria* and order of *mono-
gynia*. The corolla is quadripetalous; the calyx
quadripartite, and the antheræ sessile. There is
only one species discovered:

THOUINIA NUTANS.

THOUN, a town of Persia, in Chorasán; 75
miles W. of Herat.

(1.) * **THOUSAND**. *adj.* or *n. f.* [*thusend*, Sax.
duysend, Dutch.] 1. The number of ten hundred.
—About three *thousand* years ago, navigation was
greater than at this day. *Bacon.* 2. Proverbially,
a great number.—

So fair, and *thousand*, *thousand* times more fair
She seem'd. *Spenser.*
For harbour at a *thousand* doors they knock'd,
Not one of all the *thousand* but was lock'd.

Dryden.
Drawn from the root of some old Tuscan tree,
And thou, a *thousand* off, a fool or long degree.

Dryden.
—He finds a *thousand* occasions for generosity and
compassion. *Spektator.*—How many *thousands* pro-
nounce boldly on the affairs of the public. *Watts.*

(2.) **THOUSAND ISLANDS**, a great number of
small islands in the St Lawrence, a little below
Lake Ontario.

(3.) **THOUSAND LAKE**, the broadest part of the
river St Lawrence, so named from the **THOUSAND
ISLANDS**, which are all in it.

(4.) **THOUSAND ROCKS**, a numerous cluster of
very small islands in the St Lawrence, below
THOUSAND LAKE; 72 miles SW. of Montreal.

* **THOUSANDTH**. *adj.* [*from thousand*.] The
hundredth ten times told; the ordinal of a thou-
sand: proverbially, very numerous.—He that will
divide a minute into a thousand parts, and break
but a part of a *thousandth* part in the affairs of
love, it may be said of him, that Cupid hath clapt
him o' th' shoulder; but I'll warrant him heart-
whole. *Shak.*

Their volumes swell beyond the *thousandth*
page. *Dryden.*

—I wish they deserved the *thousandth* part of the
good treatment they have received. *Swift.*

* **THOWL**. *n. f.* A piece of timber by which
oars are kept in their places when rowing. *Ains.*

THRACE, a country very frequently men-
tioned by the Greek and Latin writers, deriving
its

its name, according to Josephus, from **THRAS**, one of the sons of Japhet. It was bounded on the N. by Mount Hæmus; on the S. by the Ægean Sea; on the W. by Macedon and the river Strymon; and on the E. by the Euxine Sea, the Hellespont, and the Propontis.—The **THRACIAN CHERSONESUS** is a peninsula inclosed on the S. by the Ægean Sea, on the W. by the gulf of Melas, and on the E. by the Hellespont; being joined on the N. to the continent by a neck of land about 37 furlongs broad. The inland parts of Thrace are very cold and barren, the snow lying on the mountains the greatest part of the year; but the maritime provinces are productive of all sorts of grain and necessaries of life; and withal so pleasant, that Mela compares them to the most fruitful and agreeable countries of Asia. The ancient **THRACIANS** were deemed a brave and warlike nation, but of a cruel and savage temper; being, according to the Greek writers, strangers to all humanity and good nature. It was to the Thracians, however, that the Greeks were chiefly indebted for the polite arts that flourished among them; for Orpheus, Linus, Musæus, Thamyris, and Eumolpus, all Thracians, were the first, as Eustathius informs us, who charmed the inhabitants of Greece with their eloquence and melody, and persuaded them to exchange their fierceness for a sociable life and peaceful manners; nay, great part of Greece was anciently peopled by Thracians. Tereus, a Thracian, governed at Daulis in Phocis. (See **PHILOMELA**, N° 2.) From thence a body of Thracians passed over to Eubœa, and possessed themselves of that island. Of the same nation were the Aones, Tembices, and Hyanthians, who made themselves masters of Bœotia; and great part of Attica itself was inhabited by Thracians, under the command of the celebrated **EUMOLPUS**. Thrace was anciently divided into a number of petty states, which were first subdued by Philip II. of Macedon. On the decline of the Macedonian empire, the country fell under the power of the Romans. It continued under subjection to them till the irruption of the Turks, in whose hands it still remains.

THRACES, the **THRACIANS**.

THRACIAN, *adj.* Of or from **THRACE**.

THRACIANS, *n. f. plur.* The natives of ancient Thrace. See **THRACE**.

THRACIS, an ancient town of Phocis.

THRAEVE, or **THRIVE**, an island of Kirkcudbrightshire, in the Dee; famous for its ancient castle, the residence of the lords of Galloway.

* **THRALDOM**. *n. f.* [from *thrall*.] Slavery; servitude.—All the heavens cannot bring me to such *threldom*. *Sidney*.—

From this earth's *threldom* to the joys of heav'n. *Shak.*

—This country groaneth under the Turkish *threldom*. *Sandys*.—

He shall rule, and she in *threldom* live. *Dryd.*

—Life and *threldom* we entered into together. *Locke*.

* **THRALL**. *n. f.* [*thral*, Saxon.] 1. A slave; one who is in the power of another. Not much in use.—

No *thralls* like them that inward bondage have. *Sidney*.

Let her accept me as her faithful *thrall*. *Spenser*.

Look gracious on thy prostrate *thrall*. *Shak.*

The two delinquents,

Slaves of drink, and *thralls* of sleep. *Shak.*

To the least and vilest things am *thrall*. *Davies*.

Do him mightier service, as his *thralls*. *Mil.*

2. Bondage; state of slavery or confinement.—

Brought forth Ulysses, bed, and all

That richly furnish it; he still in *thrall*

Of all-subduing sleep. *Chapman*.

His nose

From *thrall* of ring and cord broke loose.

Hudibras.

* To **THRALL**. *v. a.* *Spenser*. [from the noun.]

To enslave; to bring into the power of another. Out of use.—

Let me be a slave t' achieve the maid

Whose ludden fight hath *thrall'd* my wounded eye. *Shak.*

So ill *thralls* not them, but they tame ill,

And make her do much good against her will. *Dan.*

—The author of nature is not *thrall'd* to the laws of nature. *Drummond*.

* **THRAPPLE**. *n. f.* The windpipe of any animal. They still retain it in the Scottish dialect; we say rather *throatle*.

THRAPSTON, a town of England, in Northamptonshire, with a market on Thursday; seated on the Nen, over which it has a good bridge; 7 miles N. of Higham-Ferrers, and 75 NNW. of London. Lon. 0. 15. W. Lat. 52. 36. N.

(1.) * To **THRASH**. *v. a.* [*tharshan*, Saxon; *derfchen*, Dutch.] 1. To beat corn to free it from the chaff. This is written variously *thras* or *thres*, but *thras* is agreeable to etymology.—

First *thras* the corn. *Shak.*

—Gideon *thres*ed wheat. *Judges* viii. 11.—Here be oxen for burnt sacrifice, and *thresing* instruments for wood. 2 *Sam.* xxiv. 22.—

Thras it out. *Dryden*.

—To preserve the ends of the bones from an incalcescency, which they, being hard bodies, would contract from a swift motion; such as that of running or *thresing*. *Ray*.—After the first *thresing*, get what feed you can. *Mortimer*. 2. To beat; to drub.—Thou art here but to *thras* Trojans. *Shak.*

(2.) * To **THRASH**. *v. n.* To labour; to drudge. I rather would be Mevius, *thras* for rhymes. *Dryden*.

* **THRASHER**. *n. f.* [from *thras*.] One who thrashes corn.—

Our soldiers, like a lazy *thrasher* with a flail, Fell gently down. *Shak.*

—Not barely the plowman's pains, the reaper's and *thresher's* toil, and the baker's sweat, is to be counted into the bread we eat. *Locke*.

(1.) **THRASHING**, *part. n. f.* in agriculture, the operation by which corn is separated from the straw. It is performed in various ways, sometimes by the feet of animals, sometimes by a flail, sometimes by a machine.

(2.) **THRASHING**, ANCIENT AND MODERN METHODS OF. The most ancient method of separating the corn from the straw was by the hoofs of cattle. This was practised by the Israelites, as we find from the books of Moses: it was also common

common among the Greeks and Romans. Flails and thrashing machines were also not uncommon among these nations. The flail which was used by the Romans, called *baculus, fustis, or pertica*, was probably nothing more than a cudgel or pole. The thrashing machine, which was called *tribula* or *tribulum*, and sometimes *traba*, was a kind of sledge made of boards joined together, and loaded with stone or iron. Horses were yoked to this machine, and a man was seated upon it to drive them over the sheaves of corn. Different methods are employed in different countries for separating the corn from the stalk. In the greatest part of France the flail is used; but in the southern districts it is generally performed by the feet of animals: animals are also used for the same purpose in Spain, Italy, the Morea, the Canaries, China, and the vicinity of Canton, where the flail is also sometimes used. In hot climates the grains do not adhere so firmly to the stalk as in cold countries, and therefore animals are so frequently employed. The operation is performed in this manner: The sheaves, after being opened, are spread in such a manner that the ears of the corn are laid as much uppermost as possible, and a man standing in the centre, holds the balsters of the cattle, which are made to trot round as in a manege; whilst other men with forks shake the straw up from time to time, and the cattle are trotted over it again and again till they have beaten out all the grain.

(3.) **THRASHING MACHINES, ATTEMPTS TO MAKE.** The first of these attempted in modern times, was invented in Edinburgh by Michael Menzies about 1732. It consisted of a number of instruments like flails, fixed in a moveable beam, and inclined to it at an angle of ten degrees. On each side of the beam in which the flails were fixed, floors or benches were placed for spreading the sheaves on. The flails were moved backwards and forwards upon the benches by means of a crank fixed on the end of an axle, which made about 30 revolutions in a minute. The 2d thrashing machine was invented by Mr Michael Stirling, a farmer in the parish of Dumblane, Perthshire. In 1753, under the pretence of amusing his children, he formed in miniature a water mill, in which two iron springs, made to rise and fall alternately, represented the motion of two flails, by which a few stalks of corn put under them might be speedily thrashed. This plan he executed on a scale sufficiently large within two years after, making the springs about ten feet long, each of which had one end firmly screwed into a solid plank, and the other terminated in a round baton of solid iron, two feet long and above an inch in diameter. Under these the sheaves were conveyed gradually forward in a narrow channel or trough, by passing between two indented horizontal cylinders, similar to those now used in most of the thrashing mills in that part of the country, and called *feeders*. In this manner the thrashing was executed completely, and with considerable rapidity; but as the operation was performed on a low floor, and no method contrived for carrying off the straw, the accumulation of it produced such confusion, and the removal of it was attended with such dan-

ger, that this scheme was very soon entirely abandoned.

(4.) **THRASHING MILL COMPLETED.** Mr Stirling, therefore, laying aside the iron springs with the feeders, and all the apparatus adapted to them, he retained only an outer or *water wheel*, with an inner or *cog wheel* moving on the same axle; to this inner wheel, which had 48 teeth or cogs, he applied a vertical trundle or pinion, with notches, the axle of which passed through a floor above the wheel, and having its upper pivot secured in a beam 6 feet above that floor: At the distance of 3 feet 3 inches above the floor, two straight pieces of squared wood, each 4 feet long, passed through the axle of the trundle at right angles, forming 4 arms, to be moved round horizontally. To these extremities of the arms were fixed 4 iron plates, each 10 inches long, and 8 broad at the end next the arms, but tapering towards a point at the other end. This large horizontal fly, constituting 4 thrashers, was inclosed within a wooden cylindrical box $3\frac{1}{2}$ feet high and 8 in diameter. On the top of the box was an opening or port (2 or 3 ports were made at first, but one was found sufficient) 8 inches wide, and extending from the circumference a foot and an half towards its centre, through which the corn sheaves descended, being first opened and laid one by one on a board with two ledges gently declining towards the port; on which board they were moderately pressed down with a boy's hand, to prevent them from being too hastily drawn in by the repeated strokes of the thrashers. Within the box was an inclined plane, along which the straw and grain fell down into a wide wire riddle two feet square, placed immediately under a hole of nearly the same size. The riddle received a jerk at every revolution of the spindle from a knob placed on the side of it, and was instantly thrust backward by a small spring, pressing it in the opposite direction. The short straw, with the grain and chaff which passed through the wide riddle, fell immediately into an oblong strait riddle, which hung with one end raised and the other depressed, and was moved by a contrivance equally simple as the other; and having no ledge at the lower end, the long chaff which could not pass through the riddle dropped from thence to the ground; while the grain and most of the chaff falling through the riddle into a pair of common barn-fanners that stood under it on the ground floor, the strong grain, the weak, and the chaff, were all separated with great exactness. The fanners were moved by a rope or band running circuitously in a shallow niche cut on the circumference of the cog-wheel. The straw collected gradually in the bottom of the box over the wide riddle, and through an opening $2\frac{1}{2}$ feet wide, and as much in height, left in that side of the box nearest the brink of the upper floor, was drawn down to the ground with a rake by the person or persons employed to form it into sheaves or rolls.

(5.) **THRASHING MILL, FRUITLESS ATTEMPTS TO IMPROVE THE.** A 3d thrashing mill was invented in 1772, by two persons nearly about the same time, and upon the same principles. Mr Alderton who lived near Alnwick, and Mr Smart at

Work in Northumberland. The operation was performed by rubbing. The sheaves were carried round between an indented drum of about six feet diameter, and a number of indented rollers arranged round the circumference of the drum, and attached to it by means of springs; so that while the drum revolved, the fluted rollers rubbed the corn off from the straw by rubbing against the flutings of the drum. But as a considerable quantity of the grain was bruised in passing between the rollers, the machine was soon laid aside. In 1776 an attempt was made by Mr Andrew Meikle, an ingenious millwright in the parish of Tynningham, East Lothian, to construct a new machine upon the principles which had been adopted by Mr Menzies already mentioned. This consisted in making joints in the flails, which Mr Menzies had formed without any. But this machine, after much labour and expence, was soon laid aside, on account of the difficulty of keeping it in repair, and the small quantity of work performed, which did not exceed one boll or six Winchester bushels of barley per hour. Some time after this, Mr Francis Kinloch, junior of Gilmerton, having visited the machine invented in Northumberland, attempted an improvement upon it. He inclosed the drum in a fluted cover; and instead of making the drum itself fluted, he fixed upon the outside of it four fluted pieces of wood, which by means of springs could be raised a little above the circumference of the drum, so as to press against the fluted covering, and thus rub off the ears of corn as the sheaves passed round between the drum and the fluted covering. But not finding this machine to answer his expectation (for it bruised the grain in the same manner as the Northumberland machine did), he sent it to Mr Meikle, that he might, if possible, rectify its errors. Mr Meikle, who had long directed his thoughts to this subject, applied himself with much ardour and perseverance to the improvement and correction of this machine; and after spending a good deal of time upon it, found it was constructed upon principles so erroneous, that to improve it was impracticable.

(6.) THRESHING MILL PERFECTED, AND DESCRIBED. At length, Mr Meikle's own genius invented a model, different in principle from the machines which had already been constructed. This model was made in 1783; and in 1786 the first threshing machine on the same principles was erected near Alloa, in Stirlingshire, by Mr George Meikle the son of the inventor. This machine, in its most improved state, is so simple, that from the figures on *Plate CCCXXVI.* exhibiting the plan of elevation, n^o 1. the ground plan, n^o 2, and the 3d *fig.* on *Plate CCCXXVII.* showing its essential parts in a distinct manner, it will be easily understood by all our readers who have not had an opportunity of seeing it. The power employed for turning that part of the machine which separates the corn from the straw is produced by 4 wheels (when moved by horses), the teeth of which move in one another and turn the drum, on which 4 scutchers are fixed. The sheaves are introduced between two fluted rollers, which hold them firm, and draw them in gradually, while the scutchers strike off the grain from the straw as it passes through. This will suffice for a

general idea of this machine. The large spur-wheel A, n^o 1. and 2. which has 276 cogs, is horizontal, and moves the pinion B, which has 11 teeth. The pinion B moves the crown-wheel C, which has 84 teeth, the wheel C moves a second pinion D, which has 16 teeth; and the pinion D moves the drum HIKL. The drum is a hollow cylinder three feet and an half in diameter, and placed horizontally; on the outside of which the scutchers are fixed by strong screw bolts. The scutchers consist of four pieces of wood, faced on one side with a thin plate of iron, placed at an equal distance from each other, and at right angles to the axis of the drum. The sheaves are spread on an inclined board F, n^o 3. from which they are introduced between two fluted rollers GG made of cast iron, about three inches and an half in diameter, and making about 35 revolutions in a minute. As these rollers are only about three quarters of an inch distant from the scutchers or leaves of the drum HIKL, they serve to hold the sheaves fast, while the scutchers *a, b, c, d,* moving with prodigious velocity, separate the grain completely from the straw, and at the same time throw out both grain and straw upon the concave rack M, lying horizontally with slender parallel ribs, so that the corn passes through them into a hopper N placed below. From the hopper it passes through a harp or riddle O into a pair of fanners P, from which, in the most improved machine, it comes out clean and fit for the market. The straw, after being thrown by the scutchers *a, b, c, d,* into the rack, is removed from it by a rake QRST into a place contiguous V. The rake consists of four thin pieces of wood or leaves; on the end of each of these leaves is ranged a row of teeth, *e, f, g, h,* five inches long. The rake moves in a circular manner in the concave rack, while the teeth catch hold of the straw, and throw it out of the rack. These are all the essential parts of the machine; the rest may be easily understood by the references to the Plate. W is the horse-course, n^o 1, which is 27 feet diameter. X is the pillar for supporting the beams on which the axle of the spur wheel is fixed. YYY are three spindles for moving the two fluted rollers, the rake, and fanners. To the description now given we have only to add, that the drum has a covering of wood Z at a small distance above it, for the purpose of keeping the sheaves close to the scutchers. The advantages of this machine are many. As the drum makes 300 revolutions in a minute, the four scutchers together make 1200 strokes in the same space of time. From such power and velocity, it is evident that much work must be performed. When the horses go at the rate of 2½ miles per hour, from 3 to 6 bolls will be thrashed; but as the quantity thrashed will be less when the straw is long than when it is short, we shall take the average at 4 bolls. The number of persons requisite for attending the mill when working is 6. One person drives the horses; a 2d hands the sheaves to a 3d who unties them, while a 4th spreads them on the inclined boards and presses them gently between the rollers; a 5th person is necessary to riddle the corn as it falls from the fanners, and a 6th to remove the straw. We add, on the authority of an experienced farmer, that

that of the six persons necessary to attend the thrashing machine, only two can in justice be charged to the account of the machine; namely, the person who manages the horses, and the one who feeds the machine: For in the usual mode of thrashing by the flail, it requires the same number of persons as the thrashing machine does to clear an equal quantity of corn from the chaff in the same time.

* **THRASHINGFLOOR.** *n. f.* An area on which corn is beaten.—

In vain the hinds the *thrashing-floor* prepare.

Dryden.

Delve of convenient depth your *thrashing-floor*.

Dryden.

THRASIDEUS, tyrant of AGRIGENTUM; the son and successor of **THERON**.

THRASIMENUS. See **THARSYMENUS**.

THRASO, an ancient Greek comedian.

* **THRASONICAL.** *adj.* [from **THRASO**, a boaster in old comedy.] Boastful; bragging.—His humour is lofty, his general behaviour vain, ridiculous, and *thrasonical*. *Shak.*

THRASYBULUS, a renowned Athenian general, and patriot, the deliverer of his country from the yoke of the 30 tyrants. He flourished about 294 B. C. See **ATTICA**, § 13, 15.

THRASYMACHUS, a Carthaginian, who was the pupil of **ISOCRATES** and **PLATO**, and became a public teacher at Athens, but, failing of the success he had expected, he hanged himself. *Juv.* vii. 204.

THRASYMEDES, a son of **NESTOR**, king of **PHYLOS**, by **ANAXIBIA**, daughter of **BIAS**; one of the Grecian chiefs who went against **TROY**. *Hggin.* *Pauf.* ii. c. 26.

THRASYMENUS, in ancient geography, a lake of Etruria, near **PERUSIUM**, and not far from the **Tiber**. A bloody battle was fought near its banks, between the Carthaginians under **HANNIBAL**, and the Romans under **FLAMINIUS**, A. U. C. 217, wherein **Hannibal** was completely victorious, 15,000 Romans being killed, and 15,000 taken prisoners, while 10,000 fled mostly wounded. *Liv. Polyb. Strabo*, §. This lake is now called the lake of **LAKE RUGIA**.

(1.) * **THRAVE.** *n. f.* [*thrafi*, Saxon.] 1. A herd; a drove. Out of use. 2. The number of two dozen. I know not how derived.

(2.) A **THRAVE OF CORN** contains 24 sheaves, or four shocks of six sheaves to the shock; though in some countries they only reckon 12 sheaves to the thrave.

(3.) * **THREAD.** *n. f.* [*thrad*, Saxon; *draed*, Dutch.] 1. A small line; a small twist; the rudiment of cloth.—

Let not **Bardolph's** vital *thread* be cut. *Shak.*—Though the slender *thread* of dyed silk single seem devoid of redness, yet when numbers of these *threads* are brought together, their colour becomes notorious. *Boyle.*—

He'll not receive a *thread*, but naked go.

Chopman.

—He who sat at a table but with a sword hanging over his head by one single *thread* or hair, surely had enough to check his appetite. *South.*—The art of pleasing is the skill of cutting to a *thread*, betwixt flattery and ill-manners. *L'Esrange.* 2. Any thing continued in a course; uniform tenor.

The fancy doth not always regularly follow the same even *thread* of discourse. *Burnet.*—Diseased are as they are more remote in the *thread* of the motion of the fluids. *Arbutnot.*

(2.) A **THREAD** is a small line made up of a number of fine fibres of any vegetable or animal substance, such as flax, cotton, or silk; from which it takes its name of linen, cotton, or silk thread.

(3.) **THREAD, BLEACHING OF.** Thread may be easily bleached by the *oxygenated muriatic acid* discovered by **SCHÉELE**, now more properly called **OXYMURIATIC ACID**. (See that article, § 1—3.) This acid whitens cloth remarkably well, and it is equally useful for bleaching thread. **M. Welter** formed at **Lille** an establishment for bleaching thread with great success. He found that 10 or 12 leys and as many immersions are required for some sorts of thread; and that the thread may be surrounded with the liquor, it is necessary to place it, quite loosely, in a basket, which permits the acid to penetrate to all its surfaces: when the liquor is much weakened, it is still fit to be used for the bleaching of cotton. See a Paper by **Berthollet**, in the *Annales de Chimie*, or a translation of it in the *Repert. of Arts*, vol. 1.

(4.) **THREAD, METHOD OF DYEING BLACK.** Linen and cotton thread may be dyed of a durable and deep black by solution of iron in beer, in which the linen is to be steeped for some time, and afterwards boiled in madder. See **DYEING**, Part II. *Scß.* II. and Part III. *Scß.* I.

* **TO THREAD.** *v. a.* [from the noun.] 1. To pass through with a thread.—The largest crooked needle, with a ligature of the size of that I have threaded it with. *Sharp.* 2. To pass through; to pierce through.—

Thus out of season *threading* dark-ey'd night.

Shak.

They would not *thread* the gates. *Shak.*

* **THREADBARE.** *adj.* [*thread* and *bare*.] 1. Deprived of the nap; wore to the naked threads.—

Threadbare coat, and cobbled shoes he wore.

Spenser.

—The clothier means to dress the commonwealth's so he had need; for 'tis *threadbare*. *Shak.*—

Will any freedom here from you be borne,

Whose clothes are *threadbare*? *Juv.*

He walk'd the streets, and wore a *threadbare* cloak.

Swift.

A Thracian slave the porter's place maintain'd,

Sworn foe to *threadbare* suppliants. *Harte.*

2. Worn out; trite.—

A *threadbare* juggler. *Shak.*

—Many writers of moral discourses run into *threadbare* quotations. *Swift.*—If he understood trade, he would not have mentioned this *threadbare* project. *Child.*

* **THREADEN.** *adj.* [from *thread*.] Made of thread.—

Behold the *threaden* sails. *Shak.*

* **TO THREAP.** *v. a.* A country word denoting to argue much or contend. *Ainsworth.*

* **THREAT.** *n. f.* [from the verb.] Menace; denunciation of ill.—

There is no terror, **Cassius**, in your threats.

Shak.

—The emperor perceiving that his threats were

U u a

little

little regarded, regarded little to threaten any more. *Hayward.*—

Do not believe

Those rigid threats of death. *Milton.*

* To THREAT. } *v. a. threaten, Saxon:*

* To THREATEN. } *threat is seldom used but in poetry.* 1. To menace; to denounce evil.—

Death to be with'd

Though threaten'd, which no worse than this can bring. *Milton.*

2. To menace; to terrify, or attempt to terrify, by shewing or denouncing evil. It has with before the thing threatened, if a noun; to, if a verb.

What threat you me with telling of the king?

Shak.

—Straitly threaten them. *As, iv. 18.*—

Wide gaping, and with utter loss of being

Threatens him. *Milton.*

This day black omens threat the brightest fair. *Pope.*

3. To menace by action.—

He threaten'd with his long protended spear.

Dryd.

Rowling from afar they threat the shore. *Dryd.*

* THREATENER. *n. f.* [from threaten.] Menacer; one that threatens —

Threaten the threatener. *Shakespeare.*

The fruit, it gives you life

To knowledge by the threat'ner. *Milton.*

(1.) * THREATENING. *n. f.* [from threaten.]

A menace; a denunciation of evil.—

To Lausus, loud with friendly threat'ning cry'd. *Dryden.*

—How impossible would it be for a master, that thus interceded with God for his servants, to use any unkind threatenings towards them. *Law.*

(2.) THREATENING LETTERS. Knowingly to send any letter without a name, or with a fictitious name, demanding money, or any other valuable thing, or threatening (without any demand) to kill or fire the house of any person, is made felony without benefit of clergy. And sending letters, threatening to accuse any person of a crime punishable with death, transportation, pillory, or other infamous punishment, with a view to extort from him any money or other valuable chattels, is punishable by statute 30 Geo. II. c. 24. at the discretion of the court, with fine, imprisonment, pillory, whipping, or transportation for seven years.

* THREATENINGLY. *adv.* [from threaten.]

With menace; in a threatening manner.—

The honour that thus flames in your fair eyes,

Before I speak, too threat'ningly replies. *Shak.*

* THREATFUL. *adj.* [threat and full.] Full of threats; menacing.—

Like a warlike brigandine applied

To fight, lays forth her threatful pikes afore.

Spenser.

(1.) * THREE. *adj.* [three, Saxon; dry, Dutch; tri, Welsh and Erle; tres, Lat.] 1 Two and one.—

Prove this a prosp'rous day, the three-nook'd world

Shall bear the olive freely. *Shak.*

—If you speak three words, it will three times report you the whole three words. *Bacon.*—

Great Atreus' sons, Tydides fixt above,
With three ag'd Nestor. *Creech's Manilius.*

Jove hurls the three fork'd thunder. *Addison.*
These three and three with other bands we ty'd. *Pope.*

Down to these worlds I trod the dismal way,
And dragg'd the three mouth'd dog to upper day. *Pope.*

—A frail needle, such as glovers use, with a three edged point, useful in sewing up dead bodies. *Sharp.* 2. Proverbially a small number.—

Away, thou three inch'd fool. *Shak.*

—A base, proud, shallow, beggarly, three suited, filthy, worsted stocking knave. *Shak.*

(2.) THREE BRETHREN, in geography, a triple-headed hill of Scotland, in Selkirkshire; 19½ feet above the sea level, 3 miles NW. of Selkirk.

(3.) THREE-BROTHERS, 3 islands in the Indian Ocean. Lon. 62. 25. E. Lat. 3. 44. S.

(4.) THREE BROTHERS, 3 other islands, in the E. Indian Sea. Lon. 108. 0. E. Lat. 10. 42. N.

(5.) THREE CASTLE HEAD, a Cape of Ireland, on the Coast of Cork, Munster, near Mizen Head.

(6.) THREE FACES UNDER A HOOD, in botany, a species of VIOLA.

(7.) THREE HILLS ISLAND, one of the New Hebrides, in the S. Pacific Ocean, remarkable for its three hills, on the S. of Malicollo.

(8.) THREE KINGS, an island in the S. Pacific Ocean, on the N. coast of New Zealand, discovered by Taiman. Lon. 172. 12. E. Lat. 34. 15. S.

(9.) THREE LORDS, a town of S. Wales, in Caermarthenshire; with two fairs on Holy Thursday, and Nov. 12.

(10.) THREE MILE WATER, a river of Ireland, in Down county, Ulster; which runs into Carrick-Fergus Bay.

(11.) THREE RIVERS HARBOUR, a bay and port, on the E. coast of the island of St John, in the Gulf of St Laurence, where the mouths of three rivers meet. Lon. 62. 10. W. Lat. 46. 8. N.

(12.) THREE, RULE OF. See ARITHMETIC, Index.

(13.) THREE SISTERS, 3 remarkable hills of Ireland, on the isthmus between Smerewick and Ferritor's Creek, in Kerry, Munster.

* THREEFOLD. *adj.* [threefold, Saxon.] Thrice repeated; consisting of three.—A threefold cord is not easily broken. *Ecclesi. iv. 12.*—By a threefold justice the world hath been governed from the beginning. *Raleigh.*—

A threefold offering to his altar bring. *Pope.*

* THREEPENCE. *n. f.* [three and pence.] A small silver coin valued at thrice a penny.—

A threepence bow'd would hire me. *Shak.*

—I made an elear the compass of a threepence. *Wifeman.*

* THREEPENNY. *adj.* [triobolaris, Lat.] Vulgar; mean.

* THREEPILE. *n. f.* [three and pile.] An old name for good velvet.—I, in my time, wore threepile. *Shak.*

* THREEPILED. *adj.* Set with a thick pile; in another place it seems to mean piled on another.—Thou art good velvet; thou'rt a threepiled price. *Shak.*—

Threepiled hyperboles. *Shak.*

* THREESCORE. *adj.* [three and score.] Thrice twenty; sixty.—

Threescore and ten I can remember well. *Shak.*
—Ther

—Their lives before the flood were abbreviated after it, and contracted into hundreds and *three-scores*. *Brown*.—

We their sons, a pamper'd race of men,
Are dwindled down to *three-score* years and ten. *Dryden*.

THREICIA, an ancient name of **THRACE**; whence

THREICIUS, and **THREICIUS SACERDOS**, epithets of **ORPHEUS**. *Virg. Æn. vi. 645*.

THREISSA, an epithet of **HARPALYCE**. *Æn. i.*

(1.) * **THRENODY**. *n. f.* [*Threnodia*.] A song of lamentation.

(2.) **THRENODY**, or the *Muses Threnodie*, an ancient Poem by Mr *James Adamson*, containing many historical notices of Perth; and other places in Scotland. It was republished with learned historical Notes, by the late Mr *James Cant*, in 1775.

THREPSIPPAS, a son of **Hercules** by **Panope**. *Apollod.*

To **THRESH**. See **To THRASH**.

* **THRESHER**. *n. f.* [properly *thrasher*.]

Here too the *thresher* brandishing his flail. *Doddsley*.

(1.) * **THRESHING**. See **To THRASH**.—

On the *threshing*-floor his sheaves prove chaff. *Milton*.

—Gideon was taken from *threshing*, as well as *Cincinnatus* from the plough, to command armies. *Locke*.

(2.) **THRESHING**. See **THRASHING**.

* **THRESHOLD**. *n. f.* [*threswold*, Saxon.]

The ground or step under the door; entrance; gate; door.—

Fair marching forth in honourable wife,
Him at the *threshold* met. *Spenser*.

Many men, that stumble at the *threshold*. *Shakefp.*

At hell's dark *threshold* 'have sat watch. *Milt.*
Before the starry *threshold* of Jove's court. *Milton*.

There fought the queen's apartment, stood before

The peaceful *threshold*. *Dryden*.

* **THREW**, preterite of *throw*.—

A broken rock the force of *Pyrrhus threw*. *Pope*.

THRIAMBUS, a surname of **Bacchus**.

* **THRICE**. *adv.* [from *three*.] 1. Three times.

Thrice he assayed it from his foot to draw,
And *thrice* in vain to draw it did assay. *Spenser*.

Thrice within this hour

I saw him down; *thrice* up again. *Shak.*

Thrice did he knock his iron teeth; *thrice* howl. *Cowley*.

2. A word of amplification.—

Thrice noble lord, let me intreat of you. *Shakefp.*

Thrice and four times happy those. *Dryden*.

* **To THRID**. *v. a.* [this is corrupted from *thrad*; in French *enfiler*.] To slide through a narrow passage.—

Some *thrid* the mazy ringlets of her hair. *Pope*.

(1.) * **THRIFT**. *n. f.* [from *thrive*.] 1. Profit;

gain; riches gotten; state of prospering.—He came out with all his clowns, so furnished, as I thought with myself if that were *thrifty*, I wist

none of my friends or subjects ever to thrive. *Sidney*.—

Make them dreaded to the deer's *thrift*. *Shak.*

I have a mind prefaces me such *thrift*; *Shak.*

That I should be fortunate. *Shak.*

Thrift may follow fawning. *Shak.*

2. Parsimony; frugality; good husbandry.—The

rest willing to fall to *thrift*, prove very good hus-

bands. *Spenser*.—Out of the present sparing and

untimely *thrift*, there grow many future incon-

veniences. *Raleigh*.—

Heaven, though all-sufficient, shows a *thrift*

In his oeconomy, and bounds his gift. *Dryden*.

3. A plant.—

(2.) **THRIFT**, in botany. See **STATICE**.

* **THRIFTILY**. *adv.* [from *thrifty*.] Frugally;

parsimoniously.—Cromartie after fourscore went

to his country-house to live *thriftily*, and save up

money. *Swift*.

* **THRIFTINESS**. *n. f.* [from *thrifty*.] Fru-

gality; husbandry.—

Small pains but *thriftness* to save. *Spenser*.

—Such need no great *thriftness* in preserving their own, who assume more liberty in exacting from others. *Wotton*.

* **THRIFTLESS**. *adj.* [from *thrift*.] Profuse; extravagant.—

They in idle pomp and wanton play

Consumed had their goods and *thrifless* hours. *Spenser*.

He shall spend mine honour with his shame,

As *thrifless* sons their scraping fathers' gold. *Shak.*

* **THRIFTY**. *adj.* [from *thrift*.] 1. Frugal;

sparing; not profuse; not lavish.—

Let *thrifty* do, as do they should. *Tusser*.

Like a *thrifty* goddess she determines

Herself the glory of a creditor. *Shak.*

The *thrifty* goddess,

For fear young master should be spoil'd,

Would use him like a younger child. *Swift*.

—I am glad he has so much youth and vigour left,

of which he hath not been *thrifty*. *Swift*. 2. Well-

husbanded.—

I have five hundred crowns,

The *thrifty* hire I sav'd under your father. *Shak.*

(1.) * **To THRILL**. *v. a.* [*thyrlian*, Saxon; *drilla*, Swedish.] To pierce; to bore; to penetrate;

to drill.—

The cruel word her tender heart to *thrill'd*.

Spenser.

He pierced through his chafed chest

With *thrilling* point of deadly iron. *Spenser*.

A servant *thrill'd* with remorse. *Shak.*

The airy region *thrilling*. *Milton*.

(2.) * **To THRILL**. *v. n.* 1. To have the quali-

ty of piercing.—

The knight his *thrillant* spear again assay'd,

In his brass-plated body to emboss. *Spenser*.

With that, one of his *thrillant* darts he threw. *Spenser*.

2. To pierce or wound the ear with a sharp sound.

The piteous maiden, careful, comfortless,

Does throw out *thrilling* shrieks. *Spenser*.

3. To feel a sharp tingling sensation.—

'To *thrill* and shake,

Ev'n at the crying of our nation's crow. *Shak.*

—Doth not thy blood *thrill* at it? *Shak.* 4. To

pass with a tingling sensation.—

A faint cold fear *thrills* through my veins.

Shak.

A sudden horror chill

Ran through each nerve, and *thrill'd* in every vein.

Addison.

THRILLANT. *part. act.* Thrilling. *Spenser.*
Obsolete.

THRIN, a river of England, in Norfolkshire, which runs into the Yare, at Yarmouth.

THRINAX, SMALL JAMAICA FAN-PALM, in botany; a genus of plants belonging to the natural class of *palme*, and order of *flabellifoliz*. The calyx is sexdentate; there is no corolla; there are six stamina; the stigma is emarginate, and the berry monospermous. This plant was brought from Jamaica to Kew garden by Dr William Wright.

THRIPS, in entomology, a genus of insects belonging to the order of *hemiptera*. The rostrum is obscure, or so small as to be scarce perceptible. The antennæ are filiform, and as long as the thorax. The body is slender, and of equal thickness in its whole length. The abdomen is reflexible, or bent upwards. The four wings are extended, incumbent upon the back of the insect, narrow in proportion to their length, and cross one another at the same distance from their base. The tarsi of the feet are composed of only two articulations. There are eleven species mentioned by Gmelin; of which three are natives of Britain; viz.

1.—3. **THRIPS PASCIAȚA**, **JUNIPERANA**, and **PHYSAPUS**.

THRIVE. See **THRAIVE**.

* To **THRIVE**. *v. n. pret. throve*, and some times less properly *thrived*, *part. thriven*. [Of this word there is found no satisfactory etymology: in the northern dialect they use *throdde*, to make grow; perhaps *throve* was the original word, from *thraa*, *Islandic*, to increase.] To prosper; to grow rich; to advance in any thing desired.—

The better thou *thrivest*, the gladder am I.

Tupper.

If lord Percy *thrive* not, ere the king

Dismiss his power, he means to visit us. *Shak.*

—It grew amongst bushes, where commonly plants do not *thrive*. *Bacon.*

They by vices *thrive*.

Sandys.

Satan, our great author *thrives*

In other worlds.

Milton's Par. Lost.

—Those who have resolved upon the *thriving* sort of piety, seldom embark all their hopes in one bottom, *Decay of Piety*.—A careful shepherd observes the *thriving* of every one. *Decay of Piety*.

—To be and to *thrive* is all one with them. *South.*

To see the rebel *thrive*, the loyal crost. *Dryd.*
—Seldom a *thriving* man turns his land into money. *Locke.*

The *thriving* calves in meads. *Dryden's Virg.*

On air the poor camcleons *thrive*,

Denied ev'n that my love can live. *Granville.*

—The city charities have *thriven* and prospered. *Atterbury.*

The rank weed *thrive'd* with large increase.

Pope.

—Diligence and humility is the way to *thrive* in the riches of the understanding. *Watts.*—They can no more *thrive* together than health and sickness. *Lowe.*

* **THRIVER.** *n. f.* [from *thrive*.] One that prospers; one that grows rich.—He was like to prove a *thriver* in the end. *Hayward.*

* **THRIVINGLY.** *adv.* [from *thriving*.] In a prosperous way.

* **'THRO'**, contracted by barbarians from *through*.—

Scatter'd *thro'* the world.

Dryden.

(1.) * **THROAT.** [*throate*, *throta*, Sax.] 1. The fore part of the neck; the passages of nutriment and breath.—

The gold, I give thee, will I melt and pour
Down thy ill-uttering *throat*. *Shak.*

I had most need of blessing, and amen

Stuck in my *throat*.

Shak. Macbeth.

Lariffa's gutturals convuls'd his *throat*. *Harte.*

2. The main road of any place.—

Calm and intrepid in the very *throat*

Of sulphurous war.

Thomson.

3. To cut the **THROAT.** To murder; to kill by violence.—These bred up amongst the Englishmen, when they become kern, are made more fit to cut their *throats*. *Spenser.*—A trumpeter was made prisoner, when the soldiers were about to cut his *throat*. *L'Estrange.*

(2.) **THROAT.** See **ANATOMY**, *Index*, at **NECK** and **THORAX**.

* **THROATPIPE.** *n. f.* [*throat* and *pipe*.] The weasel; the windpipe.

(1.) * **THROATWORT.** *n. f.* [*throat* and wort; *digitalis*.] A plant.

(2.) **THROAT-WORT.** See **CAMPANULA**.

* **THROB.** *n. f.* [from the verb.] Heave; beat; stroke of palpitation.—

She sigh'd from bottom of her wounded
breast,

And after many bitter *throbs* did throw. *Spenser.*

Th' impatient *throbs* and longings of a soul,
That pants and reaches after distant good. *Cate.*

* To **THROB.** *v. n.* [from *throbus*, *Minshew* and *Junius*; formed in imitation of the sound, *Skinner*; perhaps contracted from *throb up*.] 1. To heave; to beat; to rise as the breast with sorrow or distress.

Here may his head live on my *throbbing*
breast. *Shak.*

My heart *throbs* to know one thing. *Shak.*

It *throbs* with fear.

Addison.

How my *throbbing* heart

Leapt to the image of my father's joy! *Smilh.*

2. To beat; to palpitate.—In the depending office there was a *throbbing* of the arterial blood, as in an aneurism. *Wileman.*

* **THROE.** *n. f.* [from *throwian*, to suffer, Sax.]

1. The pain of travail; the anguish of bringing children: it is likewise written *throu*.—

Lucina lent not me her bed,

But took me in my *throes*. *Shak. Cymbeline.*

—His persuasive and practical tract cost him most *throes*. *Fell.*

Prodigious motion felt and rueful *throes*. *Milt.*

My *throes* come thicker, and my cries. *Dryd.*

—Reflect on that day, when earth shall be again in travail with her sons, and at one fruitful *throe* bring forth all generations. *Rogers.* 2. Any extreme agony; the final and mortal struggle.—

Have mind of that most bitter *throe*. *Spenser.*

Their pangs of love, with other incident *throes*

In life's uncertain voyage. *Shak. Timon.*

* To

* *To THRONE*. *v. n.* [from the noun.] To put in agonies.—

The setting of thine eye and cheek proclaim a birth,

Which throes thee much to yield. *Shak. Temp.*
THROGGY, a river of England, in Monmouthshire, which runs into the Severn, 4 miles SW. of Chepstow.

(1.) * **THRONE**. *n. f.* [*thronus*, Latin; *tronos*.] 1. A royal seat; the seat of a king.—

Th' utimely emptying of the happy throne,
 And fall of many kings. *Shak. Macbeth.*

Th' eternal Father from his throne beheld
 Their multitude. *Milton.*

A throne where kings were crown'd. *Dryden.*
 —We have now upon the throne a king willing
 and able to correct abuses. *Davenant.* 2. The

seat of a bishop.—Bishops preached on the steps
 of the altar standing, having not as yet assumed
 the state of a throne. *Ayliffe.*

(2.) A **THRONE** is a chair of state, enriched
 with ornaments of architecture and sculpture,
 raised on one or more steps, and covered with a
 canopy. Such are the thrones in the rooms of
 audience of kings and other sovereigns.

* *To THRONE*. *v. a.* [from the noun.] To en-
 throne; to set on a royal seat.—

They have, whom their great stars
Thron'd and set high. *Shak.*

True image of the father, whether *thron'd*
 In the bosom of bliss and light of light. *Milton.*
 He *thron'd* in glass and nam'd it Caroline.

Pope.
THRONES, *n. f. plur.* in angelology and the-
 ology, a class, rank, or order of angels. See
ANGEL, § 7.

* **THRONG**. *n. f.* [*throng*, Saxon, from *thringan*,
to press.] A crowd; a multitude pressing against
 each other.—

Smother up the English in our throngs. *Shak.*
 A throng

Of thick short fobs. *Crashaw.*
 I with the throng of great and good. *Waller.*

Observ'd th' illustrious throng. *Dryden's Æn.*

(1.) * *To THRONG*. *v. a.* To oppress or incom-
 mode with crowds or tumults.—

Thou wilt be *throng'd* too shortly. *Shak.*

—The multitude *throng* thee. *Luke viii. 45.*
 All access was *throng'd*. *Milton.*

(2.) * *To THRONG*. *v. n.* [from the noun.] To
 crowd; to come in tumultuous multitudes.—

The dumb men *throng* to see him. *Shak.*

—His mother could not longer bear the agitations
 of so many passions as *throng'd* upon her. *Taller.*

(1.) **THRONIUM**, an ancient town of Phocis,
 seated at the mouth of the Boagrus, where that
 river falls into the Sinus Maliacus. *Liv. 36. c. 20.*
Strabo, ix. Plin. iv. c. 7.

(2.) **THRONIUM**, a town of Thesprotia.

(1.) * **THROSTLE**. *n. f.* [*throffle*, Saxon.]
 The thrush; a small singing bird.—

The *throffle* with his note so true. *Shak.*

—The blackbird and *throffle*. *Walton.*

(2.) **THROSTLE**, in ornithology. See **TURDUS**.

* **THROTTLE**. *n. f.* [from *throat*.] The
 windpipe.—At the upper extreme it hath no
 larynx or *throffle* to qualify the sound. *Brown.*

* *To THROTTLE*. *v. a.* [from the sound.] To

choak; to suffocate; to kill' by stopping the
 breath.—

I have seen them shiver and look pale,
Throttle their practis'd accents. *Shak.*

As when Antæus in Ircassa rove
 With Jove's Alcides, and oft foil'd still rose,
Throttled at length in th' air, expir'd and fell.

Milton.
 His throat half *throttled*. *Dryden.*

The *throttling* quinsiey 'tis my star appoints. *Dryden.*

Throttle thyself with an ell of strong tape. *Swift.*

* **THROVE**, the preterite of *thrive*.—England
 never *throve* so well, nor was there ever brought
 into England so great an increase of wealth since.
Locke.

(1.) * **THROUGH**. *prep.* [*thurh*, Saxon; *door*,
 Dutch; *durch*, German.] 1. From end to end
 of; along the whole mass or compass.—He hath
 led their belief *through* all the works of nature.
Brown.

A simplicity shines *through* all he writes. *Dryden.*

Fame of th' asserted sea *through* Europe blown. *Dryden.*

2. Noting passage.—
Through the gate of iv'ry. *Dryden.*

—I removed the prism out of the sun's light, and
 looking *through* it upon the hole. *Newton.* 3.

By transmission.—*Through* these hands this science
 has passed with great applause. *Temple.*—Material
 things are presented only *through* their senses:

they have a real influx on these, and all real know-
 ledge of material things conveyed into the under-
 standing *through* these senses. *Cicero.* 4. By means
 of; by agency of; in consequence of.—

The strong *through* pleasure soonest falls, the
 weak *through* smart. *Spenser.*

Something you may deserve of him *through*
 me. *Shak.*

—*Through* idleness of the hands the house drop-
 peth *through*. *Eccles. x.*—You will not debar such
 from preaching the gospel, as have *through* infir-
 mity fallen. *Whitgift.*

Some *through* ambition; or *through* thirst of
 gold,

Have slain their brothers. *Dryden.*
Through him soft peace and plenitude of joy.

(2.) * **THROUGH**. *adv.* 1. From one end or
 side to the other.—

You'd be so lean, that blasts of January
 Would blow you *through* and *through*. *Shak.*

—Metal may be tinged *through* and *through*. *Bacon.*

Satire runs him *through* and *through*. *Oldham.*

—Read the whole letter *through*, from one end to
 the other. *Locke.* 2. To the end of any thing;

to the ultimate purpose; to the final conclusion,
 —He shall meet with another light, which shall
 carry him quite *through*. *South.*

* **THROUGHBRED**. *adj.* [*through* and *bred*,
 commonly *thoroughbred*.] Completely educated;

completely taught.—A *throughbred* soldier weighs
 all possible contingents. *Green.*

* **THROUGHTLIGHTED**. *adj.* [*through* and
light.] Lighted on both sides.—Rooms windowed
 on both ends, called *throughlighted*. *Watson.*

* **THROUGHLY**.

*** THROUGHLY.** *adv.* [from *through*. It is commonly written *thoroughly*, as coming from *thorough*.] 1. Completely; fully; entirely; wholly. 2. The fight so *thoroughly* him dismay'd. *Spenser*. All *thoroughly* satisfied with compleat cheare.

Chapman.

—Rice must be *thoroughly* boiled. *Bacon*.—No less wisdom than what made the world can *thoroughly* understand so vast a design. *Tillotson*. 2. Without reserve; sincerely.—It be somewhat singular for men truly and *thoroughly* to live up to the principles of their religion. *Tillotson*.

(1.) *** THROUGHOUT.** *prep.* [*through* and *out*.] Quite *through*; in every part of.—Thus it fareth even clean *throughout* the whole controversy. *Hooker*.—Avoiding of all Spanish forces *throughout* Ireland. *Bacon*.—

O for a clap of thunder, as loud
As to be heard *throughout* the universe.

Ben Jonson.

—Inquire how we have behaved ourselves *throughout* this long war. *Atterbury*.

(2.) *** THROUGHOUT.** *adv.* Everywhere; in every part.—

Subdue it, and *throughout* dominion hold.

Milton.

All of a piece *throughout*.
*** THROUGHPACED.** *adj.* [*through* and *pace*.] Perfect; complete.—*Througpaced* speculators in those great theories. *More*.

*** THROW.** *n. f.* [from the verb.] 1. A cast; the act of casting or throwing.—

A huge rocke, and so right a *throw*
Made at our ship, that just before the prow
It overflow and fell. *Chapman*.

He heav'd a stone, and rising to the *throw*.
Addison.

2. A cast of dice; the manner in which the dice fall, when they are cast.—

The greater *throw*
May turn by fortune from the weaker hand. *Shak*.

—All is involved in the error of one *throw*. *South*.
—It is many million of millions odds to one against any single *throw*. *Bentley*.—

The world, where lucky *throws* to blockheads fall,

Knaves know the game, and honest men pay all. *Young*.

3. The space to which any thing is thrown.—

I've tumbled past the *throw*. *Shak*.

—Sharp rocks that stand about a stone's *throw* from the south side of the island. *Addison*.

4. Stroke; blow.—

Neither mail could hold,
Ne shield defend the thunder of his *throws*. *Spenser*.

5. Effort; violent fall.—

The *throws* and swellings of a Roman soul;
Cato's bold flights. *Addison*.

6. The agony of child-birth; in this sense it is written *throce*. See **THROE**.—The most pregnant wit in the world never brings forth any thing great without some pain and travail, pangs and *throws*, before the delivery. *South*.—

The mother's *throws* begin to come. *Dryden*.

To the wond'ring world I shall disclose;

Or, if he fail me, perish in my *throws*. *Dryden*.

(1.) *** To THROW**, preterite *throw*, part. pass. *thrown*. *v. a.* [*throwan*, Sax.] To fling; to cast; to send to a distant place by any projectile force. —Prelanes *throw* down upon the Turks fire and scalding oil. *Knolles*.—Shimei *throw* stones at him. 2 Sam. xvi. 23.—A poor widow *throw* in two mites. *Mark* xii. 42.—

Thrown by angry Jove. *Milton*.

—Though we wipe away the dirt *thrown* at us, there will be left some sullage. *Decay of Piety*.—Time had *thrown* the writings of many poets into the river of oblivion. *Dryden*.—

When Ajax strives some rock's vast weight
to *throw*,

The line too labours, and the words move slow. *Pope*.

—The air-pump, barometer, and quadrant, were *thrown* out to those busy spirits. *Speil*. 2. To toss; to put with any violence or tumult. It always comprises the idea of haste, force, or negligence.—

He melts, and *throws* his cumbrous cloak
away. *Dryden*.

—The only means for bringing France to our conditions, is to *throw* in multitudes upon them. *Addison*.—Labour *throws* off redundancies. *Speil*.

—Make room for merit, by *throwing* down the worthless. *Speil*.—The island Inarime contains, within 18 miles, a variety of hills, vales, rocks, fruitful plains, and barren mountains, all *thrown* together in a most romantick confusion. *Berkely*. 3. To lay carelessly, or in haste.—His majesty *throw* himself upon his bed. *Clarendon*.—

On the first friendly bank he *throws* him
down,

Or rests his head upon a rock till morn. *Cato*.

4. To venture at dice.—

Set less than thou *throwest*. *Shak*.

5. To cast; to strip; to put off.—

The snake *throws* the enamell'd skin. *Shak*.

6. To emit in any careless or vehement manner.—

To arms; for I have *thrown*

A brave defiance in king Henry's teeth. *Shak*.
—How much more they would have been alarmed if they had heard him actually *throwing* out such a storm of eloquence? *Addison*.—There is no need to *throw* words of contempt on such a practice. *Watts*.

7. To spread in haste.—

O'er his fair limbs a flow'ry vest he *throws*. *Pope*.

8. To overturn in wrestling.—The finner shall not only wrestle with this angel, but *throw* him too. *South*.

9. To drive; to send by force.—

Debar'd from Europe, and from Asia *thrown*. *Dryden's Æs*.

—When seamen are *thrown* upon any unknown coast in America, they never venture upon the fruit of any tree. *Addison*.—

How canst thou *throw* him from thee? *Addison*.

10. To make to act at a distance.—

Throw out your eyes for brave Othello. *Shak*.

11. To repose.—In time of temptation, *throw* yourself on God. *Taylor*.

12. To change by any kind of violence.—An unsuspected success *throws* us out of ourselves. *Addison*.—To *throw* his language more out of prose, Homer affects the compound epithets. *Pope*.

13. To turn. [*turnere*, Latin.] As balls *thrown* in a lathe. *Disfworth*.

14. *To Throw away.* To lose; to spend in vain.
To throw herself away on fools and knaves.
Osway.
In vain on study time *away* we *throw.* *Denh.*
—A man had better *throw away* his care upon
 any thing than upon a garden on wet ground.
Temple.

Had we but lasting youth and time to spare,
 Some might be *thrown away* on fame and war.
Dryden.

Was too fierce to *throw away* the time. *Dryd.*
 The next in place and punishment are they
 Who prodigiously *throw* their souls *away.* *Dryd.*

—In poetry the expression beautifies the design;
 if it be vicious or displeasing, the cost of colouring
 is *thrown away* upon it. *Dryden.*—The well-mean-
 ing man should rather consider what opportunities
 he has of doing good to his country, than *throw*
away his time. *Addison.*—She *threw away* her
 money upon roaring bullies. *John Bull.* 15. *To*
Throw away. To reject.—He that will *throw*
away a good book because not gilded, is more cu-
 rious to please his eye than understanding. *Taylor.*
 16. *To Throw by.* To reject; to lay aside as of
 no use.—

When things succeed, *throw by.* *B. Jonf.*
—He that begins to have any doubt of his tenets,
 ought to *throw wholly by* all his former notions.
Locke. 17. *To Throw down.* To subvert; to
 overturn.—

Must one rash word, th' infirmity of age,
Throw down the merit of my better years? *Add.*
 18. *To Throw off.* To expel.—The salts and
 oils in the animal body, as soon as they putrefy,
 are *thrown off.* *Arbuth.* 19. *To Throw off.* To
 reject; to discard; as, *to throw off an acquaintance.*
'T would be better

Then to *throw* him off. *Dryden.*
—Can there be any reason why the household of
 God alone should *throw off* all that orderly de-
 pendence and duty? *Spratt.* 20. *To Throw out.*
 To exert; to bring forth into act.—

She *throw out* thrilling flirts. *Spenser.*
Throw out into practice
 Virtues which shun the day. *Addison.*

21. *To Throw out.* To distance; to leave behind.
 Whene'er did Juba, or did Porteus, show
 A virtue that has cast me at a distance,
 And *thrown me out* in the pursuit of honour.
Addison.

22. *To Throw out.* To reject; to expel.—The
 other two whom they had *thrown out.* *Swift.*
 23. *To Throw out.* To reject; to exclude.—The
 bill was *thrown out.* *Swift.* 24. *To Throw up.*
 To resign angrily.—

Bad games are *thrown up* too soon. *Hudibras.*
—Experienced gamblers *throw up* their cards
 when the game is in the enemy's hand. *Addison.*
—Life must not be *thrown up* in a pet. *Collier.*
 25. *To Throw up.* To enlist; to reject; to bring
 up.—Judge of the cause by the substances the pa-
 tient *throws up.* *Arbuthnot.* 26. This is one of
 the words which is used with great latitude; but
 in all its uses, whether literal or figurative, it re-
 tains from its primitive meaning some notion of
 haste or violence.

(1.) * *To Throw.* v. z. To perform the act
 Vol. XXII. Part II.

of casting. 2. To cast dice. 3. *To Throw*
about. To cast about; to try expedients.—
 For better wind *about* to *throw.* *Spenser.*

* *THROWER.* n. f. [from *throw.*] One that
 throws.—

Thy person for the *thrower* out
 Of my poor babe. *Shak.*
 * *THRUM.* n. f. [*thrum*, Islandick, the end of
 any thing.] 1. The ends of weavers threads. 2.
 Any coarse yarn.—

There's her *thrum* hat, and her muffler too.
Shak.

O fates, come, come,
 Cut thread and *thrum.* *Shak.*

—Moss hath little stalks, besides low *thrum.* *Bac.*
 Would our *thrum-cap'd* ancestors find fault
 For want of sugar-tongs, or spoons for salt?

King.
 * *To THRUM.* v. a. To grate; to play coar-
 sely.—Blunderbusses planted in every loop hole, go
 off constantly at the *thrumming* of a guitar. *Dryd.*
THRUMBEAP, a small circular island, in the
 S. Pacific Ocean, a mile in circuit. Lon. 130. 48.
 W. Lat. 18. 35. S.

(1.) * *THRUSH.* n. f. [*thrife*, Sax. *turdus*, Lat.]
 1. A small singing-bird.—Of singing-birds they
 have linnets, goldfinches, and *thrushes.* *Carew.*—
 Pain, and a fine *thrush*, have been endeavouring
 to call off my attention. *Pope.* 2. [From *thruff*:
 as we say, a *puff*; a *breaking out*.] By this name
 are called small, round, superficial ulcerations,
 which appear first in the mouth; the nearer they
 approach to a white colour the less dangerous.
Arbuthnot.

(2.) *THRUSH*, in ornithology. See *TURDUS*.

(3.) *THRUSH*, or *APHTHA.* See *APHTHÆ*, and
MEDICINE, Index.

THRUSHEL, a river of England, in Devon-
 shire, which runs into the Tamer, opposite Laun-
 ceston.

THRUSK, or *THIRSK.* See *THIRSK.*

* *THIRUST.* n. f. [from the verb.] 1. Hostile
 attack with any pointed weapon.—Zelmane bo-
 gan with witty fury to pursue him with blows
 and *thrusts.* *Sidney.*—

That *thrust* had been mine enemy. *Shak.*
 Pyrrhus, with his lance, pursues,
 And often reaches, and his *thrusts* renews. *Dryd.*
 2. Assault; attack.—There is one *thrust* at your
 pure, pretended mechanism. *More.*

(1.) * *To THRUST.* v. a. [*trufito*, Lat.] 1. To
 push any thing into matter, or between close
 bodies.—*Thrust* in thy sickle and reap. *Rev. xv.*
 35. 2. To push; to move with violence; to
 drive. It is used of persons or things.—They
 should not be *thrust* out. *Spenser.*—

When the king comes, offer him no violence,
 Unless he seek to *thrust* you out. *Shak.*
 Lock up my doors; and when you hear the
 drum,

North *thrust* your head into the public streets. *Shak.*
—She thrust herself unto the wall. *Numb. xxii. 12.*
—On this condition, that I may *thrust* out all
 your right eyes, 1 Sam. xi. 2.—Gehazi came near
 to *thrust* her away. 2 Kings, iv. 27.—The prince
 shall not take of the people's inheritance, by op-
 pression, to *thrust* them out. *Isa. xlv. 18.*—Thou
 Capernaum,

Capernaum, shalt be *thrust* down to hell. *Luke*, xi. 15.—Rich, then lord chancellor, a man of quick and lively delivery of speech, but prone to *thrust* forwards the ruin of great persons. *Hayau*—

And *thrust* out Collatine, *Dryden*—

To justify his throat, he *thrusts* aside

The crowd of centaurs. *Dryden*—

3. To stab.—Phineas *thrust* both of them through. *Numb*, xxv. 8. 4. To compress.—He *thrust* the pieces together. *Judg*, vi. 38. 5. To impel; to urge.—As if we were villains on necessity, and all that we are evil in, by a divine *thrusting* on. *Shak*. 6. To obtrude; to intrude.—

How dare you *thrust* yourselves

Into my private meditations? *Shak*.

I go to meet

The noble Brutus, *thrusting* this report
Into his ears. *Shak*. *Julius Cæsar*.

—Should he not do as rationally, who took physic from any one who had taken on himself the name of physician, or *thrust* himself into that employment. *Locke*.

(2.) * *To Thrust*, *v. n.* 1. To make a hostile push; to attack with a pointed weapon. 2. To squeeze in; to put himself into any place by violence.—

When in heaven, I'll stand next Hercules,

And *thrust* between my father and the god. *Dryd*.

3. To intrude.—

Not all,

Who like intruders *thrust* into their service,
Participate their sacred influence. *Rome*.

4. To push forwards; to come violently; to throng; to press.—

Young, old, *thrust* there. *Chapm*. *Ods*.
—The miserable men were again beaten forward, and presently slain, and fresh men still *thrust* on. *Kroll*.

* *THRUSTER*, *n. s.* [from *thrust*.] He that thrusts.

(1.) * *THRUSTLE*, *n. s.* [from *thrust*.] Thrush; thrush.—

No *thrustles* shrill the bramble forsake. *Gay*.

(2.) *THRUSTLE*. See *TURDUS*.

THRYALLIS, in botany; a genus of plants belonging to the class of *decandria*, and order of *monogynia*; and in the natural method ranging under the 38th order, *Tricocca*. The calyx is quinquepartite; there are 5 petals, and the capsule is trilocular. There is only one species known, viz.

* *THRYALLIS BRASILIENSIS*, a native of Brazil.

* *To THRYFALLOW*, *v. a.* [*thrice* and *fallow*.]
To give the third plowing in summer.—

Thryfallow betime for destroying of weeds. *Tus*.

THRYON, an ancient town of Messenia, near the banks of the Alpheus. *Hom*. *Il*. ii. *Strabo* viii.

THRYUS, an ancient town of Peloponnesus, near Elis. *Lempr*.

THUANUS, Jacobus Augustus, or James Augustus Dr Thou, youngest son of the president de Thou, was famous for the depth and erudition of his works. He was born in 1553; and having finished his studies and travels, was made president a-Mortier, and took possession thereof in 1595. He was employed in several important offices of state, and in reforming the university of Paris; which he discharged with so much prudence that he was esteemed the *Cato* of his age,

and the ornament of France. He wrote the *history of his own time*, in Latin, from 1543 to 1603, in 138 books; a work, both for subject and style, worthy of the ancients. He also left *Memoirs of his own life*, besides *poems*; and died at Paris, 1617.

THUCLES, the leader of the first Greek colony who settled in Sicily. See *SICILY*, § 6.

THUCYDIDES, a celebrated Greek historian, born at Athens 471 years B. C. He was the son of Olorus, and grandson of Miltiades, who was descended from MILTIADÆS the famous Athenian general, who married the king of Thrace's daughter. (See *MILTIADES*, N° 1.) He was educated in philosophy and eloquence. His master in the former was ANAXAGORAS, in the latter ANTIPHON; one, by his description in the 8th book of his History, for power of speech almost a miracle, and feared by the people on that account. Suidas and Photius mention, that when Herodotus related his history in public, a custom then common, and many ages after, Thucydides felt such a pang of emulation, that he shed tears; Herodotus himself noticed it, and congratulated his father on having a son who showed so early an affection to the Muses. Herodotus was then 29 years of age, Thucydides about 15. When the Peloponnesian war broke out, Thucydides thinking it would prove a subject worthy of his labour; immediately began to keep a journal. This explains the reason why he has attended more to chronological order than to unity of design. During the war he was sent by his countrymen to relieve AMPHIPS; but the quick march of Brasidas, the Lacedæmonian general, defeated his operations; and Thucydides being thus unsuccessful, was banished from Athens, in the 8th year of this celebrated war; but during his banishment the general began to write an impartial history of the important events which had happened during his administration, and which still continued to agitate the states of Greece. This famous history is continued only to the 21st year of the war, and the remaining part of the time till the demolition of the walls of Athens, was described by Theopompus and Xenophon. Thucydides wrote in the Attic dialect, which has most vigour, purity, elegance, and energy. Thucydides died at Athens, where he had been recalled from his exile about 411 years B. C. The best edition of his works are those of Oxford, in fol. 1696, and of Dürer. Amst. 1731, also fol.

THUEYE, a town of France, in the dept. of Ardeche, 18 miles W. of Privas.

THUJA, in botany, the *ARBOR VITÆ*, or TREE OF LIFE, a genus of plants, belonging to the class of *monodelphia*, and order of *monœcia*; and in the natural system ranging under the 51st order, *Coneifera*. There are four species, viz.

1. *THUJA APYLLA*; } but the most remarkable,
2. *THUJA DOLABRATA*; } able are,
3. *THUJA OCCIDENTALIS*, the common *arbor vitæ*, grows naturally in Canada, Siberia, and other northern countries. In some English gardens a few of these trees grow to a large size. This species has a strong woody trunk, which rises to the height of 40 feet or more. The bark, while young, is smooth, and of a dark brown colour, but afterwards becomes cracked. The branches

are produced irregularly on every side, standing almost horizontal, and the young slender shoots frequently hang downward, thinly garnished with leaves; so that when the trees are grown large they make but an indifferent appearance. The young branches are flat, and their small leaves lie imbricated over each other like the scales of a fish; the flowers are produced from the side of the young branches pretty near to the foot-stalk; the male flowers grow in oblong catkins, and between these the female flowers are collected in form of cones. When the former have shed their farina, they soon after drop off; but the female flowers are succeeded by oblong cones, having obtuse smooth scales, containing only one or two oblong seeds. The leaves have a rank oily scent when bruised.

4. *THUJA-ORIENTALIS*, the *Chinese arbour vite*, grows naturally in the N. parts of China, where it rises to a considerable height. The branches grow closer together, and are much better adorned with leaves, which are of a brighter green colour, so make a much better appearance than the last species, and being very hardy, it is esteemed preferable to most of the evergreen trees with small leaves, for ornaments in gardens. The branches cross each other at right angles; the leaves are flat; but the single divisions of the leaves are slender, and the scales are smaller and lie closer over each other than those of the other. The cones are also much larger, and of a beautiful grey colour; their scales end in acute inflexed points. These trees are propagated by seeds, layers, or cuttings.

THUILLIER, Vincet, a learned French writer, born at Coucy, in 1685. He translated *Polybius*; and wrote *A letter on the Bull Unigenitus*. He died in 1786, aged 101.

THUIN, a town of the French empire, in the dep. of the Oise, and late bishopric of Liege, seated on the Sambre. In the 5th century it was only a fortress of Hainault; but in 972 it was enlarged and made a town by Bp. Notger. In 1053, it was taken and burnt by Baldwin V. earl of Flanders; whose son Baldwin VI. sold it in 1096, to Obert, Bp. of Liege. In 1309, it was besieged by William earl of Hainault, but relieved by Theobald Bp. of Liege. In 1654, it was again besieged in vain by Marili. Lorges. But in 1794, it was over-run with the rest of the Austrian Netherlands by the French under Picbegiu, and annexed to their republic in 1796. It is 8 miles SW. of Charleroy, 15 SE. of Mons, and 48 WSW. of Liege. Lon. 4. 21. E. Lat. 50. 21. N.

THUIR, a town of France, in the dep. of the Eastern Pyrenes; 7½ miles SW. of Perpignan, and 15 E. of Prades.

THUISTO, a hero and deity of the ancient Germans. *Tacit.* Perhaps the same with *Tuisco*.

(1.) **THULE**, or **THYLE**, in ancient geography, an island in the most northern part of the German Ocean. Its situation was never accurately ascertained by the ancients, hence its present name is unknown by modern historians. Some suppose that it is the island now called *ICELAND*, or part of Greenland, and others that it was *Foula*. See *FOULA*.

(4.) **THULE**, a town of Germany, in the ci-de-

vant bishopric of Paderborn; 6 miles WSW. of PADERBORN; allotted to the king of Prussia, in August 1801.

(3.) **THULE**, a river of S. Wales, in Glamorganshire, which runs into the Lloghor, near its mouth.

(4.) **THULE SOUTHERN**, a part of Sandwich Land, in the S. Atlantic Ocean, and the most Southern Land yet discovered. See *SANDWICH*, N° 4. Lon. 27. 45. W. Lat. 59. 34. S.

(1.) * **THUMB**. *n. f.* [*thuma*, Sax.] The short strong finger answering to the other four.—

Here I have a pilot's thumb. *Shak.*

—You will wear him in thumb rings, as the Turks did Scandenberg. *Dryden*.—Sultan Achmet was a maker of ivory rings, which the Turks wear upon their thumbs when they shoot. *Broome*.—The hand is divided into four fingers bending forwards, and one opposite bending backwards, called the thumb, to join with them severally or united, whereby it is fitted to lay hold of objects. *Ray*.

(2.) **THE THUMB**, in anatomy, is the extremity of the hand. See *ANATOMY*, § 154, 214, N° 2—6; and *THENAR*.

(3.) **THUMB**, in geography, a town of Upper Saxony, in Erzgebürg; 6 m. SW. of Wolkenstein.

* **To THUMB**. *v. n.* To handle awkwardly.

(1.) * **THUMB-BAND**. *n. f.* [*thumb and band*] A twist of any materials made as thick as a man's thumb.—*Tie the thumb bands* of hay round them. *Mortimer*.

(2.) **THUMB BAND**, we think, is not so called from its thickness, as Dr Johnson's definition implies; but from the manner of forming it round the thumb. Its thickness is not limited.

THUMB-CAP, an island in the South Sea, about 21 miles NW. of Lagoon island; it is low, woody, of a circular form, and not above a mile in compass.

* **THUMBSTAL**. *n. f.* [*thumb and stall*] A thimble.

THUMERVILLE, a town of France, in the dep. of the Meuse; 6 miles SW. of Briey, and 15 W. of Metz.

THUMMERSTONE. *n. f.* in mineralogy. See *MINERALOGY*, Part II. Chap. IV. Cl. 1. Ord. 1. Gen. XIII. § 4.

THUMMIM. See *URIM*.

* **THUMP**. *n. f.* [*thombo*, Ital.] A hard heavy dead dull blow with something blunt.—

He gave the knight's head such a thump. *Hudibras*.

Hollow sides the rattling thumps resound. *Dryd.*
—Their thumps and bruises might turn. *Addison*.
—The watchman gave so great a thump at my door, that I awaked at the knock. *Tatler*.

(1.) * **To THUMP**. *v. a.* To beat with dull heavy blows.—

Those bastard Britons, whom our fathers

Have in their land beaten, bobb'd, and thump'd. *Shak.*

(2.) * **To THUMP**. *v. n.* To fall or strike with a dull heavy blow.—

It thump'd upon

His manly paunch. *Hudibras*.

—A watchman thumps with his pole. *Swift*.

* **THUMPER**. *n. f.* [from *thump*.] The person or thing that thumps.

(1.) **THUN**, a lake of Switzerland, in the canton

ton of Berne, 12 miles long, and 2½ broad, abounding in various kinds of fish. The AAR runs thro' it, and its banks are beautifully and romantically variegated with trees, plants, pastures, and precipitous rugged rocks.

(2.) THUN, a large and handsome town of Switzerland, in Berne, with a castle, at the W. end of the lake, (Nº 1.) seated partly on a hill, and partly on a peninsula. It contains about 1200 inhabitants; and lies 15 miles SSE. of Berne. Lon. 7. 17. E. Lat. 46. 38. N.

THUNA, a town of Asia, in Cachemir, 45 miles S. of Cachemir.

THUNBERGIA, in botany, a genus of plants belonging to the class of *didynamia*, and order of *angiospermia*. The calyx is double; the exterior one is diphyllous, and the interior one multipartite. The capsule is globose, beaked, and bilocular. There is only one species known, viz.

THUNBERGIA CAPENSIS, a native of the Cape of Good Hope.

(1.) * THUNDER. *n. f.* [*thunder*, *thunor*, Sax. *dunder*, Swedish; *donder*, Dutch; *tonnerre*, French.]

1. *Thunder* is a most bright flame rising on a sudden, moving with great violence, and with a very rapid velocity through the air, according to any determination, upwards from the earth, horizontally, obliquely, downward, in a right line or in several right lines, as it were in serpentine tracts, joined at various angles, and commonly ending with a loud noise or rattling. *Muschenbroek*. 2. In popular and poetick language, *thunder* is commonly the noise, and lightning the flash; though *thunder* is sometimes taken for both.—

I do not bid the *thunder* bearer shoot. *Shak.*

The revenging gods

'Gainst parricides all their *thunder* bend. *Shak.*

The *thunder*

Wing'd with red light'ning and impetuous rage.

Milton.

3. Any loud noise or tumultuous violence.—

No shield defend the *thunder* of his throws.

Spenser.

Nor fear the noisy *thunder*; let it roll. *Romew.*

(2.) THUNDER is the noise occasioned by the explosion of a flash of lightning, echoed back from the inequalities on the surface of the earth, in like manner as the noise of a cannon is echoed, and in particular circumstances forms a rolling lengthened sound.

(3.) THUNDER, CAUSES OF. It is universally allowed, that the elevation of the electricity in different parts of the atmosphere is the cause of thunder. Under the article ELECTRICITY, it has been shown why lightning explodes after the thunder clouds are charged. Under the article LIGHTNING, § 3, 4. it is shown why that meteor puts on the various forms in which we see it; and under the article RAIN, § 3, why the atmosphere in some cases parts with the vapours which at other times it is obstinately retains. It remains therefore only to mention the theory by which some philosophers explain the reason why rains are sometimes attended with thunder and sometimes not. In this part of Great Britain, and for a considerable way along the E. coast, although thunder may happen at any time of the year, yet July is that in which it may almost certainly be

expected. Its duration is of very uncertain continuance; sometimes only a few peals will be heard at any particular place during the whole season; at other times the storm will return at the interval of 3 or 4 days for 5 or 6 weeks, or longer; not that we have violent thunder in this country directly vertical in any one place so frequently in any year, but in many seasons it will be perceptible that thunder clouds are formed in the neighbourhood even at these short intervals. Hence it appears, that during this particular period there must be some natural cause operating for the production of this phenomenon, which does not take place at other times. This cannot be the mere heat of the weather, for we have often a long tract of hot weather without any thunder; and besides, though not common, thunder is sometimes heard in winter. As therefore the heat of the weather is common to the whole summer, whether there be thunder or not, we must look for the causes of it in those phenomena which are peculiar to July, August, and September. Now it is generally observed, in the above mentioned tract of country; that from April an E. or SE. wind generally takes place, and continues with little interruption till towards the end of June. At that time, sometimes sooner and sometimes later, a W. wind takes place; but as the causes producing the E. wind are not removed, the latter opposes the W. wind with its whole force. At the place of meeting there is naturally a most vehement pressure of the atmosphere, and friction of its parts against one another; a calm ensues, and the vapours brought by both winds begin to collect and form dark clouds, which can have little motion either way, because they are pressed almost equally on all sides. For the most part, however, the W. wind prevails, and what little motion the clouds have is towards the E. whence the common remark in this country, that "thunder clouds move against the wind." But this is by no means universally true; for if the W. wind happens to be excited by any temporary cause before its natural period when it should take place, the E. wind will often get the better of it; and the clouds even although thunder is produced, will move westward. Yet in either case the motion is so slow, that the most superficial observers cannot help taking notice of a considerable resistance in the atmosphere. That when two streams of air are thus driven against each other, the space where they meet must become highly electrified, as is plain as that an electric globe must be excited when friction is applied. It is true, as the substances here to be excited are both electrics *per se*, it may be objected, that no electricity could be produced; for we cannot excite one electric by rubbing it with another. Yet it is observed, that glass may be electrified by blowing strongly upon it, or by the explosion of cannon; and even when glass is strongly pressed upon glass, both pieces become electrified as soon as they are separated. When glass is rubbed upon glass, no attraction nor repulsion can be perceived, nor is any sign of electricity observed on bodies brought near to it; yet a very bright electric light always appears on the glasses, and a phosphoreal smell is felt; which shows, that though the electricity does not fly out through the air in the usual way,

yet

yet the fluid within the glass is agitated; and there is little reason to doubt, that any conducting body inclosed within the substance of the glass would be electrified also. The vapours therefore, which are the conducting substances in the atmosphere, become immediately electrified in consequence of the pressure, above-mentioned, and all the phenomena described under the various articles already referred to, take place. In like manner, by the struggle of two other winds as well as those of the E. and W. may a thunder-storm be produced; but it is always necessary that the resistance of the air to the motion of the clouds should be very great, and nearly equal all round. For if the vapour should get off to a side, no thunder would take place; the electricity would then be carried off as fast as it was collected, and rain would only be the consequence, by reason of the electrified vapours parting with their latent heat, as is explained under METEOROLOGY, *See* VI. and RAIN, § 2, 3. In fact, we very often observe, that in the time of rain the clouds evidently move across the wind, and the nearer their motion is to a direct opposition, the heavier will the rain be; while, on the other hand, if they move briskly before the wind, let the direction be what it will, the atmosphere soon clears up.

(4.) THUNDER, CAUSES OF THE RATTLING NOISE OF, AND ESTIMATE OF DANGER FROM. That rattling in the noise of thunder, which makes it seem as if it passed through arches, or were variously broken, is probably owing to the sound being excited among clouds hanging over one another, and the agitated air passing irregularly between them. The explosion, if high in the air, and remote from us, will do no mischief; but when near, it may destroy trees, animals, &c. This proximity or small distance may be estimated nearly by the interval of time between seeing the flash of lightning and hearing the report of the thunder, estimating the distance after the rate of 1142 feet per second, or 3 seconds and 2 thirds to the mile. Dr Wallis observes that commonly the difference between the two is about seven seconds, which, at the rate above-mentioned, gives the distance almost two miles. But sometimes it comes in a second or two, which argues the explosion very near us, or even among us. And in such cases, the Doctor assures us, he has sometimes foretold the mischiefs that happened.

(5.) THUNDER CLOUDS, in physiology, clouds which are in an electrical state, fit for producing lightning, thunder, and other electrical phenomena. *See* § 9, 11—14.

(6.) THUNDER, CONJECTURES RESPECTING THE CAUSE OF. Though the grand phenomena of thunder and lightning had long engaged the attention of philosophers, it is but lately that they have been able to point out the general law of nature of which they are the effects. Inflammable vapours had long furnished them with a sort of explanation. The discovery of gunpowder, and still more that of inflammable air, gave some probability to the existence of extensive strata of inflammable vapours in the upper regions of the atmosphere, which, being set on fire at one end, might burn away in rapid succession, like a train of gunpowder. But there soon appeared such a

dissimilarity in the phenomena, and in the general effects, that this explanation gave no satisfaction to a true naturalist.

(7.) THUNDER, DR FRANKLIN'S DISCOVERY OF THE CAUSE AND NATURE OF. No sooner were the wonderful effects of the charged electrical phial observed, than naturalists began to think of this as exhibiting some resemblance to a thunder stroke: (*see* ELECTRICITY, *Ind.* and LIGHTNING;) but it was not till 1750 that this resemblance was viewed in a proper light by the celebrated Franklin. In a dissertation written that year, he delivers his opinion at large, and notices particularly the following circumstances:

(8.) THUNDER, DR FRANKLIN'S PROOFS OF THE IDENTITY OF, WITH THE ELECTRIC EXPLOSION. 1. The colour and crooked form of lightning, perfectly similar to that of a vivid electrical spark between distant bodies, and unlike every other appearance of light. This angular, desultory, capricious form of an electrical spark, and of forked lightning, is very singular. No two successive sparks have the same form. Their sharp angles are unlike every appearance of motion through unresisting air. Such motions are always curvilinear. The spark is like the simultaneous existence of the light in all its parts; and the fact is, that no person can positively say in which direction it moves. 2. Lightning, like electricity, always strikes the most advanced objects—hills, trees, steeples, &c. 3. Lightning affects to take the best conductors of electricity. Bell wires are very frequently destroyed by it. At Leven house in Fifeshire, in 1733, it ran along a gilded moulding from one end of the house to the other, exploding it all the way, as also the tinfoil on the backs of several mirrors, and the gilding of screens and leather hangings. 4. It burns, explodes, and destroys these conductors precisely as electricity does. It dissolves metals; melts wires; it explodes and tears to pieces bodies which contain moisture. When a person is killed by lightning, his shoes are commonly burst. When it falls on a wet surface, it spreads along it. The Royal William, in Louisburg harbour, in 1758, received a thunder-stroke, which dissipated the maintop-gallant mast in dust, and came down on the wet decks in one spark, which spread over the whole deck as a spout of water would have done. This is quite according to electrical laws. 5. It has sometimes struck a person blind. Electricity has done the same to a chicken which it did not kill. 6. It affects the nervous system in a way resembling some of the known effects of electricity. The following is a most remarkable instance: — Campbell, Esq. of Succoth, in Dumbartonshire, had been blind for several years. The disorder was a gutta serena. He was led one evening along the streets of Glasgow by his servant Alexander Dick, during a terrible thunder storm. The lightning sometimes fluttered along the streets for a quarter of a minute without ceasing. While this fluttering lasted, Mr Campbell saw the street distinctly, and the changes which had been made in that part by taking down of the city gates. When the storm was over, his blindness returned. 7. Lightning kills; and the appearances perfectly resemble those of a mortal stroke of electricity. The muscles are all

all in a state of perfect relaxation, even in those situations where it is usually otherwise. 8. Lightning is well known to destroy and to change the polarity of the mariner's needle. Dr Franklin was not contented with the bare observation of these important resemblances. He availed himself of many curious discoveries which he had made of electrical laws. In particular, having observed that electricity was drawn off at a great distance, and without the least violence of action, by a sharp metallic point, he proposed to philosophers to erect a tall mast or pole on the highest part of a building, and to furnish the top of it with a fine metallic point, properly insulated, with a wire leading to an insulated apparatus for exhibiting the common electrical appearances. To the whole of this contrivance he gave the name of *thunder-rod*, which it still retains. (See *ELECTRICITY, Ind. at Rods.*) He had not a proper opportunity of doing this himself at the time of his writing his dissertation in a letter from Philadelphia to the Royal Society of London; but the contents were so scientific, and so interesting, that in a few weeks they were known over all Europe. His directions were followed in many places. In particular, the French academicians, encouraged by the presence of their monarch, and the great satisfaction which he expressed at the repetition of Dr Franklin's most instructive experiments, which discovered and exposed the theory of positive and negative electricity, as it is still received, were eager to execute his orders, making his grand experiment, which promised so fairly to bring this tremendous operation of nature not only within the pale of science, but within the management of human power. But in the mean time, Dr Franklin, impatient of delay, and perhaps incited by the honourable desire of well-deserved fame, put his own scheme in practice. His inventive mind suggested to him a method of presenting a point to a thunder cloud at a very great distance from the ground. This was by fixing his point on the head of a paper kite, which the wind should raise to the clouds, while the wet string that held it should serve for a conductor of the electricity. With a palpitating heart, Dr Franklin, unknown to the neighbours, and accompanied only by his son, went into the fields, and sent up his messenger that was to bring him such news from the heavens. He obtained only a few sparks from his apparatus that day; but returned to his house in a state of perfect satisfaction with his discovery. We may justly consider this as one of the greatest of philosophical discoveries, and as doing the highest honour to the inventor; for it was not a suggestion from an accidental observation, but arose from a scientific comparison of facts, and a sagacious application of the doctrine of positive and negative electricity; a doctrine wholly Dr FRANKLIN'S, and the result of the most acute and discriminating observation. It was this alone that suggested the whole; and by explaining to his satisfaction the curious property of sharp points, gave him the courage to handle the thunderbolt of the heavens. It is now a point fully ascertained, that thunder and lightning are the electric snap and spark, as much superior to our puny imitations as we can conceive from the immense

extent of the instruments in the hands of Nature. If, says Dr Franklin, a conductor one foot thick and five feet long will produce such snaps as agitate the whole human frame, what may we not expect from a surface of 10,000 acres of electrified clouds? How loud must be the explosion! how terrible the effects!

(9.) *THUNDER, FARTHER DISCOVERIES RESPECTING THE NATURE OF.* This discovery immediately directed the attention of Philosophers to the state of the atmosphere with respect to electricity; and in this also Dr Franklin led the way. He immediately erected his thunder rods; and they have been imitated all over the world, with many alterations and improvements, according to the different views and skill of their authors. They are described in the article *ELECTRICITY*. Dr FRANKLIN took the lead in this examination of the electrical state of the atmosphere. He seldom found it without giving signs of electricity, and this was generally negative. See *Phil. Trans.* vol. xlviii. p. 358, and 785. Mr Canton repeated those experiments, and found the same result. See also our article *ELECTRICITY*, where all these discoveries are fully explained, as well as under the article *LIGHTNING*, § 5, 6. We must here remark, that our acquaintance with the laws of electricity sufficiently informs us, that the electricity of our *THUNDER RODS* may frequently be of a different kind from that of the cloud which excites the appearances at our apparatus. We know that air, like glass, is a non-conductor; and that when it is brought into any state of electricity, either by communication, or by mere induction, it will remain in that state for some time, and that it always changes its electricity *per stratum*. A positive cloud, in the higher regions of the atmosphere, will render the air immediately below it negative, and a stratum below that positive. If the thunder rod be in this positive stratum, it will exhibit positive electricity; but if the cloud be considerably nearer the rod, by being in the adjoining negative stratum, it may show a negative electricity, which will exceed the positive electricity which the distant positive cloud would have induced on its lower end by mere position, had the intervening air been away. This excess of negative electricity must depend on the degree in which the surrounding stratum of air has been rendered negative. It is this has been the almost instantaneous effect of the presence of the positive cloud, it cannot be rendered so negative as to produce negative electricity in the lower end of the thunder rod. But if the stratum of air has for some considerable time accompanied the positive cloud, its negative electricity has been increasing, and some would remain, even if the cloud were removed. We must, at all times, consider the thunder rod as affected by *all* the electricity in its neighbourhood. The distant positive cloud would at any rate render the lower end of the rod positive, without communication, by merely displacing the electricity in the rod itself, just as the north pole of a loadstone would make the remote end of a soft iron rod a north pole. In like manner, the negative stratum of air immediately adjoining to the positive cloud would make the lower end of the rod

rod negative, without communication. A positive stratum of air below this would have the contrary effect. The appearances, then, at the end of the rod, must be the result of the prevalence of one of those above the others; and many intervening circumstances must be understood, before we can infer with certainty the state of a cloud from the appearances at the lower end of the apparatus. It would therefore be a most instructive addition to a thunder rod to have an electroscopie at both ends. If they shew the same kind of electricity, we may be assured that it is by communication, and is the same with that of the surrounding stratum of air: But if they shew opposite electricities (which is generally the case,) then we learn that it is by position or induction. We recommend this to the careful attention of the philosopher. In this way we perfectly explain an appearance which puzzled both of the above-mentioned observers. When a single low cloud approached the rod, the electroscopie would shew positive electricity, but negative when the cloud was in the zenith, and positive again when it had passed by. We also learn from this the cause of Dr Franklin's disappointment in his expectations of very remarkable phenomena by means of his kite. He imagined that it would be vastly superior to the apparatus which he had recommended to the philosophers of Europe. But the string of the kite, traversing several strata in different states of electricity, served as a conductor between them, and he could only obtain the superplus; which might be nothing, even when the clouds were strongly electrified. The most copious and curious observations on the electrical state of the atmosphere are those by Professor BECCARIA of Turin. He had connected the tops of several steeples of the city by insulated wires. He did the same thing at a monastery on a high hill in the neighbourhood. Each of these collected the electricity of a separate stratum of considerable extent. He frequently found these two strata in opposite states of strong electricity. See *ELECTRICITY, Index*, at BECCARIA, and *ATMOSPHERICAL*, &c.

(10.) **THUNDER, GENERAL INFERENCES FROM VARIOUS EXPERIMENTS RESPECTING.** The following general observations are made out from a comparison of a vast variety of more particular ones made in different places: 1. The air is almost always electrical, especially in the day time and dry weather; and the electricity is generally positive. It does not become negative, unless by winds from places where it rains, snows, or is foggy. 2. The moisture of the air is the constant conductor of its electricity in clear weather. 3. When dark or wet weather clears up, the electricity is always negative. If it has been very moist, and dries very fast, the electricity is very intense, and diminishes when the air attains its greatest dryness; and may continue long stationary, by a supply of air in a drying state from distant places. 4. If, while the sky overcasts in the zenith, only a high cloud is formed, without any secondary clouds under it, and if this cloud is not the extension of another which rains in some remote place, the electricity (if any) is always positive. 5. If the clouds, while gathering, are shaped like

locks of wool, and are in a state of motion among each other; or if the general cloud is forming far aloft, and stretches down like descending smoke, frequently a positive electricity prevails, more intense as the changes in the atmosphere are quicker; and its intensity predicts the great quantity of snow or rain which is to follow. 6. When an extensive, thin, level cloud forms, and darkens the sky, we have strong positive electricity. 7. Low thick fogs, rising into dry air, carry up so much electricity as to produce sparks at the apparatus. If the fog continues round the apparatus without rising, the electricity fails. 8. When, in clear weather, a cloud passes over the apparatus, low and tardy in its progress, and far from any other, the positive electricity gradually diminishes, and returns when the cloud has gone over. 9. When many white clouds gather over head, continually uniting with and parting from each other, and thus form a body of great extent, the positive electricity increases. 10. In the morning, when the hygrometer indicates dryness equal to that of the preceding day, positive electricity obtains even before sunrise. 11. As the sun gets up, this electricity increases; more remarkably if the dryness increases. It diminishes in the evening. 12. The mid-day electricity, of days equally dry, is proportioned to the heat. 13. Winds always lessen the electricity of a clear day, especially if damp; therefore they do not electrify the air by friction on solid bodies. 14. In cold seasons, with a clear sky and little wind, a considerable electricity arises after sunset, at dew falling. The same happens in temperate and warm weather. 15. In the same circumstances, the general dryness of the air is less, the electricity is also less. 16. The electricity of dew, like that of rain, depends on its quantity. This electricity of dew may be imitated by electrifying the air of a close room (not too dry,) and filling a bottle with very cold water, and setting it in the upper part of the room. As the damp condenses on its sides, an electrometer will shew very vivid electricity. Such a collection of observations, to be fit for inference, requires very nice discrimination. It is frequently difficult to discover electricity in damp air, though it is then generally strongest; because the insulation of the apparatus is hurt by the dampness. To make the observation with accuracy, requires a portable apparatus, whose insulation can be made good at all times. With such apparatus we shall never miss, observing electricity in fogs, or during snow. There is a very curious phenomenon, which may be frequently observed in Edinburgh, and other towns similarly situated. In a clear day of May, an easterly wind frequently brings a fog with it, which advances from the sea in a dense body: and when it comes up the High-street, it chills the body exceedingly, while it does not greatly affect the thermometer. Immediately before its gaining the street, one feels like a tickling on the face, as if a cob-web had fallen on it, and naturally puts up his hand and rubs his face. We have never found this to fail, and have often been amused with seeing every person rubbing his face in his turn. The same thing was observed at St Petersburg, in a summer's evening when a low fog came on about ten o'clock.

(11.)

(II.) **THUNDER, GENERAL PROGNOSTICS, APPEARANCES, AND PHENOMENA OF A STORM OF &c.** For the most part the wind is gentle, or it is calm. A low dense cloud begins in a part previously clear: this increases fast in size; but this is only upwards, and in an arched form, like great bags of cotton. The lower surface of the cloud is commonly level, as if it rested on a glass plane. Soon after appear numberless small ragged clouds, like flakes of cotton teased out. These are moving about in various uncertain directions, and continually changing their ragged shape. This change, however, is generally by augmentation. Whatever occasions the precipitation of the dissolved water, seems to gain ground. As these clouds move about, they approach each other, and then stretch out their ragged arms toward each other. This is not by an augmentation, but by a real bending of these tatters towards the other cloud. They seldom come into contact; but after coming very near in some parts, they as plainly recede, either in whole, or by bending their arms away from each other. But during this confused motion, the whole mass of small clouds approaches the great one above it; and when near it, the clouds of the lower mass frequently coalesce with each other before they finally coalesce with the upper cloud: But as frequently the upper cloud increases without them. Its lower surface, from being level and smooth, now becomes ragged, and its tatters stretch down towards the others, and long arms are extended towards the ground. The heavens now darken apace, the whole mass sinks down; wind arises, and frequently shifts in squalls; small clouds are now moving swiftly in various directions; lightning now darts from cloud to cloud. A spark is sometimes seen co-existent through a vast horizontal extent, of a crooked shape, and of different brilliancy in its different parts. Lightning strikes between the clouds and the earth—frequently in two places at once. A continuation of these snaps rarifies the cloud; and in time it dissipates. This is accompanied by heavy rain or hail; and then the upper part of the clouds is high and thin. During this progress of the storm, the **THUNDER** is strongly electrified; chiefly when the principal cloud is over head. The state of the electricity frequently changes from positive to negative—almost every flash, however distant, occasions a sudden start of the electroscope, and then a change of the electricity. When the cloud is more uniform, the electricity is so too. The question now is, In what manner does the air acquire this electricity? How come its different parts to be in different states, and to retain this difference for a length of time? and how is the electric equilibrium restored?—But upon these subjects we need add nothing to what is already said under **ELECTRICITY**. The electric equilibrium is indeed restored with surprising rapidity, and to a great extent. Yet we know that air is a very imperfect conductor, and transmits electricity to small distances only, and very slowly. But air is rendered electrical in a great variety of ways. All operations which excite electricity in other bodies have the same effect on air. It is electrified by friction. When blown on any body, such as glass,

&c. that body exhibits electricity by a sensible electroscope. We therefore conclude that the air has acquired the opposite electricity from this rubber. A glass vessel, exhausted of air, and broken in the dark, gives a loud crack, and a very sensible flash of light. An air gun, discharged (without a ball) in the dark, does the same. Blowing on an electric with a pair of bellows never fails to excite it. In short, the facts to this purpose are numberless. Most of these and other phenomena are taken notice of under **ELECTRICITY**. These facts are also to be found among many experiments of **M. SAUSSURE**. We see some of the effects very distinctly in several phenomena of thunder and lightning. Thus, the great eruptions of **Ætna** and **Vesuvius** are always accompanied by forked lightnings, which are seen darting among the volumes of emitted smock and steam. Here is a very copious conversion of water into elastic steam; and here also it is most reasonable to expect a copious decomposition of water, by the iron and coaly matters, which are exposed to the joint action of fire and water. These two electricities will be opposite; or when not opposite, will not be equal; in either of which cases, we have vast masses of steam in states fit for flaking into each other. The simple solution of water in air produces electricity. And this is the chief operation in Nature connected with the state of the atmosphere. It is thus that the watery vapours from all bodies, and particularly the copious exudation of plants, disappear in our atmosphere. There can be no doubt but that the opposite electricity will be produced by the precipitation of this vapour; that is, by the formation of clouds in clear air. Lastly, we know that the tourmaline, and many of the columnar crystals, are rendered electrical by merely heating and cooling. See **ELECTRICITY, Index, at TOURMALIN**. When water is precipitated, and forms a cloud, it is reasonable to expect, that it will have the electricity of the air from which it is precipitated. This may be various, but is in general negative; for the heat by which the air was enabled to dissolve the water made it negative. But if it be cooled so fast as to precipitate it in the form of rain, or snow, or hail, we may expect positive electricity. Accordingly, in summer, **WALL** showers always show strong positive electricity; so does snow when falling dry. Here, then, are copious sources of atmospheric electricity. The masses of air thus differently constituted are evidently disposed in strata. The clouds are seen to be so. When the wind, or stratum in motion, does not push all the quiescent air before it, it generally gets over it, and then flows along its upper side, and, by a partial mixing, produces a fleecy cloud. This is the state of the atmosphere, consisting of strata of clear air many hundred yards thick, separated from each other by thin fleeces of clouds. This is no fancy; for we actually see the sky separated by strata of clouds at a great distance from each other. And we see that these strata maintain their situations, without farther admixture, for a long time, the bounding clouds continuing all the while to move in different directions. In 1783, when a great fleet rendezvoused in Leith Roads, the ships were detained by an easterly wind, which had

blown for six weeks without intermission. The sky was generally clear; sometimes there was a thin fleece of clouds at a great height, moving much more slowly in the same direction with the wind below. During the last eight days, the upper current was from the westward, as appeared by the motion of the upper clouds. High towering clouds came down the river, with a little rain; the strata were jumbled, and the whole atmosphere grew hazy and uniform; then came thunder and heavy rain, and the wind below shifted to the W. Thus it is sufficiently evinced, that the atmosphere frequently consists of such strata, well distinguished from each other: their appearance and progress leave us no room to doubt but that they come from different quarters, and had been taken up or formed at different places, and in different circumstances, and therefore differing in respect of their electrical states. The consequence of their continuing long together would be a gradual but slow progress of their electricity to a state of equilibrium. The air is perhaps never in a perfectly dry state, and its moisture will cause the electricity to diffuse itself gradually. See BECCARIA'S experiments with plates of glass, under ELECTRICITY. But thunder requires a rapid communication, and a restoration of electric equilibrium in an instant, and to a vast extent. The means for this are at hand. The strata of charged air are furnished with a coating of cloud. The lower stratum is coated on the under side by the earth. When a jumble is made in any of the strata, a precipitation of vapour must generally follow. Thus a conductor is brought between the electrical coatings. This will quickly enlarge. In this manner the interposed cloud immediately attracts other clouds, grows ragged by the passage of electricity through clear air, where it causes a precipitation by altering the natural equilibrium of its electricity. Accordingly, we see in a *thunder storm* that small clouds continually and suddenly form in parts formerly clear. Whatever causes thunder, does in fact promote this precipitation. These clouds have the electricity of the surrounding air, and must communicate it to others in an opposite state, and within reach. They must approach them, and must afterwards recede from them, or from any that are in the same state of electricity with themselves. Hence their ragged forms, and the similar form of the under surface of the great cloud; hence their continual and capricious shifting from place to place; they are carriers, which give and take between the other clouds, and they may become stepping stones for the general discharge. If a small cloud form a communication with the ground, and the great cloud be positive or negative, we must have a complete discharge, and all the electrical phenomena, with great violence; for this coating of vapour is abundantly complete for the purpose. The general scene of thunder is the *heavens*; and it is by no means a frequent case that a discharge is made into the earth. The air intervening between the earth and the lowest coating is commonly very much confused in consequence of the eddies and dales, which, by altering the currents of the winds, toss up the inferior parts, and mix them

with those above. This generally keeps the earth pretty much in the same electrical state as the lowest stratum of clouds. There are, however, many melancholy instances of the violent effects of thunder storms on the earth. (See ELECTRICITY, § 129; and LIGHTNING, § 5 and 13.)

(12.) THUNDER HOUSE. See ELECTRICITY, Ind.

(13.) THUNDER, HYPOTHESIS AND PHENOMENA OF THE SOUND AND SMELL, &c. OF. The sound of thunder is not a *snap*, incomparably louder than our loudest snap from coated glass; but a long continued, rumbling, and *very unequal noise*. There is no doubt but that this snap was almost simultaneous through the whole extent of the spark; but its different parts are conveyed to our ear in time, and are therefore heard by us in succession; and it is not an uniform roar, but a rumbling noise, *unequally loud*, according as the different parts of the snap are indeed differently loud. We should hear a noise of the same kind if we stood at one end of a long line of soldiers, who discharged their muskets (differently loaded) in the same instant. When any part of the spark is very near us, and is not very diffuse, the snap begins with great smartness, and continues for some time, not unlike the violent tearing of a piece of strong silk; after which it becomes more and more mellow as it comes from a greater distance. We do not, however, affirm, that the whole extensive spark and snap are co-existent or simultaneous. The cloud is, in all probability, but an indifferent conductor, and even a sensible time may elapse during the propagation of the spark to a great distance. Beccaria observed this in a line of 250 feet of chain, lying loosely on the ground, and consisting of near 6000 links. He thought that it employed a full second; but when the chain was gently stretched, the communication seemed *instantaneous*. All these circumstances concur in explaining the nature of the shaft of FORKED LIGHTNING. It is a series of appearances excited in the intervening medium, and which produce some chemical change in it. (See ELECTRICITY, Index; and LIGHTNING, § 4.) Thunder, when it strikes a house, always leaves a *peculiar smell*. Inflammable air has also a peculiar and very disagreeable smell. The smell produced by electricity greatly resembles the smell produced by striking two pieces of quartz together. M. SAUSSURE assures us, that the particles of a cloud are *vesicles*. Indeed no person who has looked narrowly at a fog, or has observed how large the particles are of the cloud which forms in a receiver when we suddenly diminish the density of the air, and who observes how slowly these particles descend, can doubt of their being hollow vesicles. We can hardly conceive them receiving the commotion which accompanies the snap without collapsing by the agitation, or by the very cessation of their electricity. They will therefore no longer float in the air, but fall and unite, and come to the ground in rain. We may expect this rain to be copious, for it is the produce of two strata of clouds. It greatly contributes to the putting an end to the storm, by passing through the strata, and helping to restore the equilibrium.

Y y (14.) THUNDER,

(14.) THUNDER, HYPOTHESIS OF THE EARL OF STANHOPE RESPECTING. Under the article LIGHTNING, § 10 and 14, we gave a particular account of the E of Stanhope's new theory of lightning and thunder, wherein his lordship accounts for all the most violent phenomena that occur on earth, by what he calls the *electrical returning stroke*. Under the article ELECTRICITY, § 11 and 15, we also stated the objections made by the compilers of the *Monthly Review*, and the *Gen. Mag.* to his lordship's theory, which at that period were thought *plausible*. But in the opinion of the most eminent electricians, the earl's theory is now held to be just, and strictly philosophical; and that the electrical returning stroke completely accounts for all the dreadful phenomena that have ever happened on earth by the whole electric force, which would otherwise have passed off harmlessly in the air and clouds, *returning and striking* upon some terrestrial object. It is now the decided opinion of the most eminent electricians, that the greater part, if not the whole of the most violent thunder storms, thunder-strokes, and other pernicious electrical phenomena, have been of that kind, which the noble earl styles the *returning stroke*. This they illustrate in the following manner: If two clouds A and B are incumbent over the plain *a* and *b*, thus:

$$\begin{array}{c} A + \quad - B \\ a - \quad + b \end{array}$$

and if A be positive, and B negative, the earth will be maintained in a negative state at *a*, and a positive state at *b*. If the discharge be now made between the clouds A and B, the electricity must instantly rush up through a conductor at *a*, and down through one at *b*, and each place will have a *stroke*. The same thing will happen if the negative cloud B is above the positive cloud A, but not in so great a degree; for the negative electricity at *a* will now be much less than in the other case, because it is induced only by the prevalence of the positive cloud A over the remote negative cloud B. In a word, the Earl's *returning stroke* explains much better than can be done by any hypothesis of a *direct stroke*, the capricious effects of lightning and thunder. A gentleman at Vienna received a terrible shock, by having his hand upon a thunder rod during a violent explosion which he was viewing about 3 miles distant. Electric sparks are often observed at thunder rods, even at every the most distant flash of lightning.

(15.) THUNDER, HYPOTHESIS OF THE MARQUIS OF BECCARIA RESPECTING, WITH REMARKS. The Marquis of Beccaria supposes, that the different parts of the earth are in different states of electricity, and that the clouds are the *restoring conductors*. But this hypothesis contradicts the known laws of electricity. The earth is so good a conductor, that Dr Watson could not observe the smallest instant of time lost in communicating the electricity to the distance of four miles. It is now fully ascertained, that the earth is almost always in a state of very *unequal* and even *opposite* electricity, in its different parts; and this arises from the variety of clouds strongly electrified in the opposite way. This induces electricity, or disturbs the natural *uniform diffusion* of electricity; just as the bringing magnets or

loadstones, (see MAGNETISM,) into the neighbourhood of a piece of iron, without touching it, renders it magnetical in its different parts. While they continue in their places, the piece of iron will be magnetical, and differently so in its different parts.

(16.) THUNDER, METHODS OF GUARDING AGAINST DANGER FROM. The justly celebrated Dr FRANKLIN, had no sooner made his discovery as above and elsewhere related, and confirmed the identity of the *electric spark* and report with LIGHTNING and THUNDER; than he began to reflect that knowledge is only valuable in proportion as it can be rendered *useful* to mankind. He then set his inventive genius to work, to consider if it was possible to invent some method to preserve men, beasts, and buildings, from the dreadful effects of thunder storms. Of the Dr's success in this humane endeavour, we have given a concise but pretty complete account, under the article ELECTRICITY, § 142 and 143: as well as of the methods of constructing the CONDUCTORS, or THUNDER RODS, as they have since been generally called, along with the improvements suggested by the E. of Stanhope upon these rods; and of the dispute among electricians respecting the advantages of *blunt pointed* or of *sharp pointed* conductors for that purpose, under the same article from § 144 to § 155; as well as under LIGHTNING, § 7, 14, 15; with the objections of those who reckon conductors of any kind *insufficient* under § 9; though facts have now proved their hypothesis *false*. All that remains, therefore, to be noticed under this section is to state a few particulars since discovered, that were not at that period clearly ascertained.—The genius of Dr FRANKLIN soon made the important discovery, in opposition to BECCARIA, that the EARTH performs the necessary office, which the marquis has searched for in vain in the clouds, of "*restoring the ELECTRIC EQUILIBRIUM OF THE ATMOSPHERE*, when it has been, as it daily is, *disturbed by the incessant action of the various unwearied powers of NATURE*." On this principle he inferred, that "the usual *electrical preference* should be given to the best conductors; and that in this respect a *metal rod* far surpasses the *brick, stone, timber* and other materials, of which our houses and other buildings are composed; especially when they are *dry*, as is usually the case in the thundery seasons." He therefore advised to place metalline conductors in the way of the ATMOSPHERICAL ELECTRICITY, in those places, where it appears most likely to *strike*, and to continue them down to the moist earth, at some depth under the surface. He also advised to raise the metalline conductors to some considerable height *above* the building; the more effectually to attract the electricity to take this *course*, as sometimes lightning has been known to pass the high parts of a building and attack other places low down. Still farther to ensure success, he advised that, as the electrical fluid, by its shocks, not only dissipates water, but even melts metallic conductors, when made too small, therefore the metalline conductor should be made at least *half an inch square*; none of that size having ever been destroyed, although smaller ones have been destroyed.

stroy.

stroyed by the lightning; yet even these *bad conductors* the lightning to the ground, with perfect safety to the building. He also advised, that no part of a conductor should terminate in the building; "for" (added the learned Doctor,) "the electricity accumulates exceedingly at the remote extremities of all long rods, and tends to fly off with great force, especially if another conductor is near. This aids the accumulation, by acquiring at its upper end an electricity opposite to that of the lower end of the other; and this effect produced by the influence of a positive cloud, makes the upper negative end of the lower portion of a divided conductor draw more electricity to the lower end of the upper portion." But this doctrine of the accumulation of electricity is the principal defect in the FRANKLINIAN doctrine, and is now given up as indefensible. (See ELECTRICITY, Index, at ACCUMULATION, and LIGHTNING, § 9.) Dr Franklin, however, supported it, and considered it as proved by such facts as the following: "This redundant electricity," (adds he) "strongly attracted by the negative lower portion, flies off with great violence through the air, or if surrounded with any matter capable of conversion into elastic vapour by heat, bursts with irresistible force. Thus the vane spindle of *St Brid's Steeple* in London, sprung from its lower end to the upper end of an iron window bar, and burst the stone in which it was fixed, by expanding the moisture into steam. In like manner it burst the stove at the lower end of this bar, to make its way to an iron cramp, which connected the opposite sides of the steeple; from this it struck to another cramp; and so from cramp to cramp, till it reached the gutter leads of the church, bursting and throwing off the stonework in many places. All interruptions must therefore be carefully avoided, and the whole must be made as much as possible one continued metal rod. Dr Franklin, observing the singular property which sharp points possess of drawing off the electricity in silence, advised to finish our conductor with a fine point of gilt copper, which cannot be blunted by rust. But as this raising the conductor, and pointing it, are so many invitations to the thunder to take this course; and as we cannot be certain that the quantity thus invited may not be more than what the rod can conduct with safety, it has appeared to Dr WILSON, and other able electricians, that it will be safer to give abundance of conduct to what may unavoidably visit us, without inviting what might otherwise have gone harmlessly by. This was attentively considered by Dr Franklin, Dr Watson, Mr Canton, Dr Wilson, and others, met as a committee of the Royal Society, at the desire of the Board of Ordnance, to contrive a conductor for the powder magazine at Purfleet. (See ELECTRICITY, Part II. § 8. I.) We think that the theory of induced electricity, founded on Dr Franklin's discoveries, and confirmed by all the later inventions of the electrophorus, condenser, &c. will decide this question in the most satisfactory manner. When a cloud positively electrified comes over a building, it renders it negatively electrical in all its parts, if of conducting materials, and even the ground on which it stands.

This effect is more remarkably produced if the structure is of a tall and slender shape, like a steeple or a rod. Therefore the external electrical fluid is attracted by the building with greater force than if it had consisted of materials less conductive. A discharge will therefore be made thro' it in preference to any neighbouring building, because it is more eminently negative. For the same reason, if there are two buildings equal and similar, one of them being a good conductor, and the other being a less perfect one, the perfect conductor, becoming more powerfully negative, the cloud will become more strongly positive over this house than over the other, and the stroke will be made through it. The same thing must obtain in a perfect conductor continued from the top to the foundation of a house, built of worse conducting materials. The conductor becoming more eminently negative than any other part of the building, the electric fluid will be more strongly attracted by it, accumulated in its neighbourhood, and will all be discharged through it, so long as it is able to conduct. If the building be of great extent, the proximity of one part of the building to the thunder cloud may produce an accumulation of electrical fluid in its neighbourhood, in preference to a more perfect, but remote, conductor. But when the distances from the cloud are not very unequal, the accumulation will always be in the neighbourhood of the perfect conductor; and this will determine the discharge that way. The accumulation in the neighbourhood of the rod will be small indeed, when the rod is small; but then it is dense, and the whole electric phenomena shew that it is the density, and not the quantity of accumulation, which produces the violent tendency to fly off; it is this alone which makes it impossible to confine electricity in a body which terminates in a sharp point. For the same reason, bodies of the same materials and shape will increase the accumulation in the adjoining part of the cloud in proportion as they are nearer to it, or more advanced beyond the rest of the building. And bodies of slender shape, and pointed, will produce this accumulation in their neighbourhood in a still more remarkable degree, and determine the course of the discharge with still greater certainty. But it is evident that a metallic rod, no higher than the rest of the building, may occasion an accumulation in the adjoining part of a near thunder cloud sufficient to produce a discharge, when the building itself consisting of imperfect conductors, would not have provoked the discharge at all. It may therefore be doubted whether we have derived any advantage from the conductor. To judge properly of this, we must consider houses, as they really are, consisting of different materials, in very different shapes and situations; and particularly as having many large pieces of metal in their construction, in various positions with regard to the cloud, the ground, and to each other. Suppose all the rest of the building to be of non-conducting materials. When a positive thunder cloud comes overhead, every piece of metal in the building becomes electrical, without having received any thing as yet from the cloud; that end of each

Y y 2 which

which is nearest the cloud becoming negative, and the remote end positive. But, moreover, the electricity of one increases the electricity of its neighbour. Then the most elevated becomes more strongly attractive at its upper end than it would have been had the others been away; and therefore produces a greater accumulation in the nearer part of the thunder cloud than it would otherwise have done, and it will receive a spark. By this its lower end becomes more overcharged, and thus makes the upper end of the next more undercharged, and the spark is communicated to it, and so on to the ground; which would not have happened without this succession of conductors. Thus it is easy to conceive, that the accumulation in the cloud is just insufficient to produce a discharge.—While things are in this state, just ready to snap, should a man chance to pass under a bell wire, or under a lustre hanging by a chain, his body will immediately augment the positive electricity of the lower end of the conductor above him, and thus will augment the negative electricity of its upper end. This again will produce the same effect in the conductor above it; and thus each conductor becomes more overcharged at its lower end, and more undercharged at the upper end. Before this, every thing was just ready to snap. All will now strike at once. The cloud will be discharged through the house, and the man will be the sacrifice, the whole discharge being made through his body. This needs no demonstration for any well-informed electrician. Those who have only such a knowledge of the theory as can be gathered from the writings of Priestley, Cavallo, and other popular authors, may convince themselves of the truth of what is here delivered in the following manner. In dry weather, and the most favourable circumstances for good electrical experiments, let a very large globe, smoothly covered with metal, and well insulated, be as highly electrified as possible, without exposing it to a rapid dissipation. To ensure this circumstance, let it be electrified till it begins to flutter, and note the state of the electrometer. Discharge this electricity, and electrify it to about half of this intensity. Provide 3 or 4 insulated metal conductors, about 2 inches long and an inch diameter, terminated by hemispheres, and all well polished. The globe being electrified, bring one of the insulated conductors slowly up to it, and note its distance when it receives a spark. In doing this, take care that there be no conducting body near the remote end of the insulated conductor. It will be best to push it gradually forward by means of a long glass rod. Withdraw the conductor, discharge its electricity, restore the globe to its former electricity, indicated by an electrometer, and repeat this experiment till the greatest striking distance is exactly discovered. Now set another of the insulated conductors about half an inch behind the first, and push them forward together, by a glass rod, till a spark is obtained. The striking distance will be found greater than before. Then repeat this last experiment, with this difference, that the two conductors are pushed forward by taking hold of the remote one. The striking distance will be found much greater than before. Lastly, push forward

the two conductors, the remote one having a wire communicating with the ground till they are a smaller matter *without* the striking distance; and, leaving them in this situation, take any little conducting body, such as a brass ball, fixed on the end of a glass rod, and pass it briskly through between the globe and the nearest conductor, or through between the two conductors, taking care that it touch neither of them in the passage. It will be seen that, however swift the passage is made, there will be a discharge through all the four bodies. The inference from this is obvious and demonstrative. A very remarkable instance of this fact was seen at the chapel in Tottenham Court Road, London. A man, going into the chapel by the east door, was killed by the thunder, which came down from the little bell-house, along the bell-wire, and the rod of the clock pendulum, from the end of which it leaped to some iron work above the door, and from thence, from nail to nail, till it reached the man's head. This interruption of conduct, which is almost unavoidable in the construction of any building, is the cause of most of the accidents that are recorded; for when the ends of those communicating conductors are inclosed in materials of less conducting power, the electricity, in making its way to the next in a very dense state, never fails to explode every thing which can be converted into elastic vapour by heat. There is always a sufficient quantity of moisture in the stone or brickwork for this purpose; and most vegetable substances contain moisture or other expandible matter. The stone, brick, or timber, is burst, and thrown to a considerable distance; or if kept together by a weight of wall, the wall is shattered. It is worth remarking that although no force whatever seems able to prevent this explosion, the quantity of matter exploded is extremely small; for the flames are never thrown to a greater distance than they would have been by two or three grains of gunpowder properly confined. All these accidents will be prevented by giving a sufficient *uninterrupted conduct*; and it is proper to make use of such a conductor, although it may invite many discharges which would not otherwise happen. So long as the conductor is sufficient for the purpose, there seems to be no doubt of the propriety of this maxim. But the most serious objection remains. As we are certain that these conductors, whether raised above the building or not, will produce discharges through them which otherwise would not have happened, and as we are quite uncertain whether the quantity contained in a thunder cloud may not greatly exceed what the thunder rod can conduct without being dissipated in smoke, it seems very dangerous thus to *invite a stroke* which our conductor may not be able to discharge. In particular, it is reasonable to believe that the strata of electrified clouds which come near the earth lose much of their electricity by passing over the sharp points of trees, &c. while those which are much higher may retain their electricity undiminished, and pass on. May it not therefore happen, that our conductor will invite a fatal stroke, which would have gone harmlessly by? The doubt is natural, and it is important. Let us suppose a very extensive and highly electrified

trified cloud, in a positive state, to come within such a distance from a building as *just not to strike it*, if unprovided with a conductor, but which will most certainly strike the same building furnished with a conductor; and let the electricity be so great that the conductor shall be dissipated in smoke before even a small part of it is discharged, —What will be the fate of the building? We believe that it will be perfectly safe. However rapid we may suppose that motion by which electricity is communicated, it is still motion, and time elapses during the propagation. The cloud is discharged, not in a very instant, but in a very short time. Part of the cloud is therefore discharged, while it explodes the conductor, and the electricity of the remainder is now too weak (by our supposition) to strike the building no longer furnished with a conductor. This must be the case, however large and powerful the cloud may be, and however small the conductor. But suppose that the cloud has come so near as to strike the building unprovided with a conductor. Then as much will be discharged through the building as it can conduct; and if the quantity be too great, the building will be destroyed: but let a conductor (though insufficient) be added. The discharge will be made through it as long as it lasts, and the remainder only will be discharged through the house, surely with much less danger than before. The truth of these conclusions from theory is verified by fact. When the church of Newbury in New England was struck by lightning in 1755, a bell wire, no bigger than a knitting needle, conducted the thunder with perfect safety to the building as far down the steeple as the wire reached, though the stroke was so great that the wire had been exploded, and no part of it remained, but only a mark along the wall occasioned by its smoke. From the termination of the wire to the ground the steeple was exceedingly shattered, and stones of great weight were thrown out from the foundation (where they were probably moister) to the distance of 20 and 30 feet. Another remarkable instance happened in the summer palace at St PETERSBURG. A Heyduk and a soldier of a foot regiment were standing centinels at the door of the jewel-chamber: the Heyduk, with his scimitar resting on his arm, was carelessly leaning on the soldier, who had his musket shouldered. Both were struck down with lightning; and the soldier was killed, his left leg scorched, and his shoes burst. The Heyduk had received no damage, but felt himself tripped up, as if a great dog had run against him. A narrow slip of gold lace, which was sewed along the seam of his jacket and pantaloons breaches, reaching to his shoes, had been exploded on the left side. This seems to have been his protection. In all probability, the stroke came to both along the musket (or perhaps to the Heyduk along the scimitar.) The Heyduk had a complete, though insufficient, conductor, and was safe. The soldier had not, and was killed. The push felt by the former probably arose from the explosion of the lace. It seems therefore plain that *metalline conductors* are always a protection; that advancing them above the building, increases their protection; and that pointing them may sometimes en-

able them to diminish a stroke, by discharging part of the electricity silently. Dr Franklin having formed all his notions of thunder from his pre-established theory, and having seen the principal phenomena so conformable to it, was naturally led to expect this conformity in cases which he could not easily examine precisely by experiment. Accordingly, in his first dissertation, he affirmed that a *fine point* always discharges a thunder cloud silently, and at a great distance. The analogous experiments in artificial electricity are so beautiful and so perspicuous, that this confidence in the protecting power of fine points is not surprising; and this confidence was rendered almost complete by a most singular case which fell under his own observation. He was awakened one night by loud cracks in his stair-case, as if some person had been lashing the wainscoting with a great horse-whip. He thought it so, and got up in an anger to chide the idle fool. On looking out at his chamber door, he saw that the disturbance proceeded from electric explosions at some interruptions of his conductor. He saw the electricity pass, sometimes in bright sparks, producing those loud thwacks, and sometimes in a long continued stream of dense white dazzling light as big as his finger, illuminating the stair-case like sunshine, and making a loud noise like a cutler's wheel. Had the cloud (says he) retained all this till it came within striking distance, the consequences would have been inconceivably dreadful. Yet not long after this he found that he had been in a mistake; for the house of Mr Watt in Philadelphia, furnished with a finely pointed conductor, was struck by a terrible clap of thunder, and the point of the conductor was melted down about two inches. This is perhaps the only instance on record of a finely pointed conductor being struck. The board room at the powder magazine at Purfleet was indeed struck, though provided with a conductor; but the stroke was through another part of the building. St Peter's church, Cornhill, has been 8 times struck between 1772 and 1787; while St Michael's, in its neighbourhood, and much higher, has never had a stroke since 1772, when it was furnished with an excellent pointed conductor by Mr Nairne. Dr Franklin having seen the above exception to his rule, and reflected on it, acknowledges that there are cases where a pointed conductor may be struck, viz. when it serves as a stepping stone, to complete a canal of conveyance already near-completed. A small cloud may sometimes serve as a stepping stone (like the man coming under a lustre) for the electricity to come out of a great cloud, and discharge through the pointed conductor. Whenever it comes to the striking distance from the conductor, it will explode at once; whereas the great cloud itself must have come nearer, and had its force gradually diminished. It is remarkable that a point, employed in this way in artificial electricity, must be brought nearer to another body than a ball need be, before it can receive a stroke. The difference is about one third of the whole. Nairne found, that a ball one and 9 tenths inches in diameter exploded at the distance of 9 inches, and a point at six inches distance. But a pointed conductor can have no advantage over a blunt

a blunt one in the case of a *returning stroke*, which is perhaps the most common of any. This depends on another discharge, which is made perhaps at a great distance. This was most distinctly the case in the instance above mentioned of the person at Vienna who had a shock from a thunder rod by an explosion far distant. This thunder rod was a very fine one, furnished with five gilt points. Still, however, this property of sharp points was greatly over-rated by Dr Franklin, and those who took all their notions of electricity from the simple discoveries of his sagacious mind. Unfortunately Dr Franklin had not cultivated mathematical knowledge; and, ever eager after discovery, and ardent in all his pursuits, his wonderful penetration carried him through, and seldom allowed him to rest long on false conclusions. He was certainly one of the greatest *philosophers*; and a little erudition would perhaps have brought him equal to Newton. It was reserved, however, for Lord C. Cavendish and for Æpinus, to subject the investigations of Franklin to number and measure. By studying what they have written on the subject, the reader will be fully convinced, that a point has little or no advantage over a ball, with respect to a thunder cloud which is brought to the thunder rod by a brisk wind; although, when it comes slowly up during an almost perfect calm, it may discharge all that can be discharged without a snap. The conspiration in a point is indeed very great, but the quantity conspired is moderate; and therefore its action, at any considerable distance, is but trifling. All this is fully verified by Dr Wilson's judicious experiments in the Pantheon. He had a prodigious quantity of electrified surface suspended there, and made a pointed apparatus come to its striking distance with a motion which he could regulate and measure. And he found that with the very moderate velocity of 12 feet in a second, he never failed of procuring a very smart stroke. The experiments made in the usual way by the partisans of sharp points were numberless, and decidedly in their favour. The great and just authority of Dr Franklin, who was one of the committee, procured them still more consideration, or at least hindered people from seeing the force of Dr Wilson's reasoning. It is somewhat surprising, that Dr WILSON, a lover of mathematical learning, and a good judge, as appears from his publication of the papers of Mr Robins, did not himself see the full force of his own experiments. He indeed frequently says, that the state of the electricity in a thunder cloud, and in coated glass, is exceedingly different: and that the first extends its sensible influence much farther than the last, when both have the same quantity of electricity. But he seems not to have formed to himself any adequate notion of the difference. Reasoning from the true theory of coated glass, we shall learn that, when the glass is exceedingly thin, the *accumulation of electricity*, or the charge, will be exceedingly great; while the external appearance, or apparent energy, of the electricity may be hardly sensible, and will extend to a very small distance. Thus, a circular plate of coated glass, six inches in diameter and one 20th thick, when electrified so as to make an elec-

trometer diverge 50 degrees, contains about 60 times as much electricity as a brass plate, of the same diameter, electrified to the same degree; and these two will have the same influence on an electrometer placed at a distance from them, and will give a spark nearly at the same distance. The spark from the coated glass will be bright, and will give a shock; while that from the brass plate will be trifling. The cause of the inequality of influence is, that the positive electricity of the one side of the coated glass is almost balanced by the negative electricity of the other side, and the unbalanced part is about one fifty-ninth of the whole. If we now take a brass plate of 46½ inches in diameter, and electrify it to the same degree with the coated glass, we shall find that it will require the same number of turns of the machine to bring it to this state, or to charge the coated glass. They contain the same quantity of electricity, and the spark of both will give the same shock. But this large plate will have a much wider influence; a person coming within ten feet of it will feel his hair bend towards it, and feel like a cobweb on his face. It may be farther demonstrated that the power of a point to abstract the electricity to a given degree from the large plate, is vastly smaller than its power to abstract it to the same degree from the coated plate. This is different in the different degrees of the abstraction, and cannot be expressed by any one number. All these considerations taken together, show us that the pointed conductor has little advantage over the ball in the circumstance above mentioned. It has, however, an advantage, and therefore should be employed; and in the case of a calm, or very gentle progress of the thunder cloud, the advantage may be very great. The only remaining consideration is the quantity of metallic conduct that should be given. Prudence teaches not to spare, especially in very lofty buildings. The conductor of the dome of St Paul's in London consists of four iron straps, each 4 inches broad and one half inch thick. This conductor was once made red hot by a thunder stroke. No influence has been found of a rod ¼ an inch square being exploded. The accident at Mr Watt's house in Philadelphia is curious. The brass wire which terminated the rod had been ten inches long and one 4th thick at the base, and 2½ inches were melted. It was unable, therefore, to conduct that stroke when its diameter was less than one 16th of an inch. Lead or copper is recommended in preference to iron. Iron wastes by rust, and by exfoliating retains water, which may be dangerous by its expansion. A strap of lead, two inches broad and one 4th thick, stapled down to the roof or wall with brass staples, secures from all risks from neglect. An iron rod, or one fastened with iron cramps, requires frequent inspection, to see that nothing has failed or wasted by rust. The point or points should be copper. It would be very proper to connect all the leads of the ridges, gutters, and spouts, with the conductor, by straps of lead. This will greatly extend its protection. A great extent of building is not sufficiently secured by one conductor. And a powder magazine should have some erected round it at a distance on masts.

(17.) THUNDER, RETURNING STROKE OF. See LIGHTNING, § 10—15; and § 14 of this article.

(18.) THUNDER RODS, metalline conductors, placed along the walls of buildings to preserve them from damage by lightning. See ELECTRICITY, *Index*, at RODS; and § 16 of this article.

(19.) THUNDER, STORMS OF. See LIGHTNING, § 5, 13; and § 16 of this article.

(1.) * To THUNDER. *v. n.* [from the noun.] 1. To make thunder.—

He would not flatter Neptune for his trident,
Nor Jove for's power to thunder. *Shak.*

2. To make a loud or terrible noise.—Some few notable examples had thundered a duty into the subjects. *Sidney.*

His dreadful name thro' all Spain did thunder. *Spenser.*

His dreadful voice no more
Would thunder in my ears. *Milton*

Like a black sheet the whelming billow spread,
Burst o'er the float, and thunder'd on his head. *Pope.*

(2.) * To THUNDER. *v. a.* 1. To emit with noise and terror.—

Oracles severe
Were daily thunder'd in our general's ear. *Dryd.*

2. To publish any denunciation or threat.—An archdeacon may thunder out an ecclesiastical censure. *Ayliffe.*

THUNDER BAY, a bay of N. America, at the NW. corner of Lake Huron, so named from its frequent thunder storms.

(1.) * THUNDERBOLT. *n. f.* [thunder and bolt, as it signifies an arrow.] 1. Lightning; the arrows of heaven.—If I had a thunderbolt in mine eye. *Shak.*—Let the lightning of this thunderbolt be a terror to all. *K. Charles.*

My heart does beat,
As if 'twere forging thunderbolts. *Denham.*

The Scipios, those thunderbolts of war. *Dryd.*
—The most remarkable piece in Antonine's pillar, is Jupiter Pluvius sending down rain on the fainting army of Marcus Aurelius, and thunderbolts on his enemies; which is the greatest confirmation of the story of the Christian legion. *Addison.*
2. Fulmination; denunciation, properly ecclesiastical.—He threatens such with the thunderbolt of excommunication. *Hakewill.*

(2.) THUNDERBOLT. When lightning acts with extraordinary violence, and breaks or shatters any thing, it is called a thunderbolt, which the vulgar, to fit it for such effects, suppose to be a hard body, and even a stone. When we consider the known effects of electrical explosions, and those produced by lightning, we shall be at no loss to account for the extraordinary operations vulgarly ascribed to thunderbolts. As stones and bricks struck by lightning are often found in a vitrified state, we may reasonably suppose, with Beccaria, that some stones in the earth having been struck in this manner, gave occasion to the vulgar opinion of the thunderbolt.

* THUNDERCLAP. *n. f.* [thunder and clap.] Explosion of thunder.—

The kindly bird that bears Jove's thunder-clap. *Spenser.*

When some dreadful thunderclap is nigh,
The winged fire-shoots swiftly fly. *Dryden.*
Suddenly the thunderclap was heard. *Dryden.*
* THUNDERER. *n. f.* [from thunder.] The power that thunders.—

How dare you, ghosts,
Accuse the thunderer, whose bolt you know? *Shak.*

On that small island they had look'd with scorn,
And in Great Britain thought the thunderer born. *Waller.*

The lesser gods that shar'd his prosperous state,
All suffer'd in the exile'd thunderer's state. *Dryd.*

* THUNDEROUS. *adj.* [from thunder.] Producing thunder.—

He before the thunderous throne doth lie. *Milton.*

* THUNDERSHOWER. *n. f.* [thunder and shower.] A rain accompanied with thunder.—The conceit is long in delivering, and at last it comes like a *thundershower*, full of sulphur and darkness, with a terrible crack. *Stillingfleet.*—In *thundershowers* the winds and clouds are oftentimes contrary to one another, especially if hail falls, the sultry weather below directing the wind one way, and the cold above the clouds another. *Derham.*

* THUNDERSTONE. *n. f.* [thunder and stone.] A stone fabulously supposed to be emitted by thunder; thunderbolt.—

Fear no more the light'ning flash,
Nor th' all dreaded thunderstone. *Shak.*

THUNDER-STORM, *n. f.* A storm of lightning and thunder, generally attended with hail, rain, and wind.

* To THUNDERSTRIKE. *v. a.* [thunder and strike.] 1. To blast or hurt with lightning.—I remained as a man *thunderstricken*. *Sidney.*

Drove them before him *thunderstruck*. *Milton.*
Nigh *thunderstruck*, th' exalted man, to whom
Such high attest was giv'n, a while survey'd. *Milton.*

Thunderstruck Enceladus. *Addison.*

2. To astonish with any thing terrible.—
Fears on our hearts took

The very life; to be so *thunderstrooke*. *Chapm.*
THUNDERY. *adj.* [from *thunner*.] Abounding with thunder, lightning, or electricity, applied to the clouds or atmosphere.

THUNOE, an island of Denmark, between Jutland and the isle of Samsoe. Lon. 10. 19. E. Lat. 56. 1. N.

(1.) THUR, a hill of Arabia, near Mecca There is a cave in it, where MAHOMET concealed himself along with ABU BECK, a whole night, when the Korerth were in pursuit of him, and very narrowly escaped being taken.

(2.) THUR, a river of Switzerland, which rises in the S. part of the ci-devant county of Toggenburg, and falls into the Rhine, 7 miles SSW. of Schaffhausen.

THURE, a town of France, in the dep. of the Vienne; 4 miles W. of Chatellerault.

THURGAU, a territory of Switzerland, formerly a landgraviate; bounded on the N. by Suabia and the lake of Constance; E. by that lake; S. by St Gall, and W. by the cantons of Zurich and

and Schaffhausen. (See SWITZERLAND, § 7.) It is so named from the THUR, and comprehends the whole territory on both sides of that river. The flat part of it is fertile in grain, fruits, and most useful plants; the hilly ground affords fine pasture. It contains 6 towns, several burghs, and 170 villages. One third of the people are Roman Catholics, the other two thirds Calvinists.

(1.) THURIE, THURII, or THURIUM, an ancient town of Italy, in Lucania, built by a colony of Athenians near the ruins of SYBARIS, A. C. 444. Among these colonists were HERODOTUS, the historian, and LYSIAS. *Strab. vi. Mela, ii. 4.*

(2.) THURIA, a town of Messenia. *Pauf.*

* THURIFEROUS. *adj.* [*thurifer*, Lat.] Bearing frankincense.

* THURIFICATION. *n. f.* [*thuris* and *facio*, Latin.] The act of fuming with incense; the act of burning incense.—The several acts of worship which were required to be performed to images are processions, genuflections, *thurifications*, deolutions, and oblations. *Stillingfleet.*

THURIL. See THURIA, N^o 1.

THURINGIA, *plur.* The ancient inhabitants of THURINGIA. They were a tribe of the Catti; (See CATTI); or, according to others, of the VANDALS. They are mentioned by Tacitus, and were very numerous.

(1.) THURINGIA, in ancient geography, the country of the ancient THURINGI, was formerly a kingdom, afterwards a county, then a landgrate, and was governed by its own princes for many ages, till 1124, when it devolved to the marquis of Misnia, and with that country, afterwards to the duke of Saxony.

(2.) THURINGIA, in modern geography, a division of the circle of Upper Saxony. It is a fertile tract, abounding in corn, wheat, black cattle, sheep, and horses. It is about 73 miles long, and equally broad. It contains 47 towns, 14 boroughs, betwixt 700 and 800 villages, 300 noble estates, 7 superintendencies, and 5 under-consistories. Modern Thuringia is only a part of the ancient, nay, but a part of the ancient South Thuringia, which comprehends besides, a large share of the modern Franconia, Hesse, &c. On the extinction of the male line of the ancient landgraves in 1247, it came to the margraves of Meissen, ancestors to the present electoral family. The elector has no voice in the diet, on account of his share in the landgrate or circle of Thuringia. **ERFURT** is the capital.

THURINUS, an epithet given to **AUGUSTUS** in his youth, because some of his ancestors came from Thuriu. *Sueton.*

THURIUM. See THURIA, N^o 1.

THURLES, a town of Ireland, in Tipperary; 20 miles W. of Kilkenny, and 10 N. of Cashel.

THURLOE, John, an English statesman under Oliver Cromwell, was born at Abbots Roding in Essex, in 1616, of which parish his father was rector, and was educated to the study of the law. In 1648 he was made receiver of the curiatory fines. When Oliver Cromwell assumed the protectorship, he became secretary of state; in 1653, he had the care and charge both of foreign and inland postage; and was afterwards sworn a member of the privy-council. He was continued in

the same offices under Richard Cromwell, and until measures were taken for the Restoration; when he made an offer of his services to that end, which, however, was not accepted. May 15th, 1660, he was committed to the custody of the serjeant at arms on a charge of high treason; but being soon released, he retired to Great Milton in Oxfordshire; and though he was afterwards often solicited by Charles II. to engage in the administration of public business, he declined the offers. He died in 1668; and was a man of an amiable private character, who in the highest of his power exercised all possible moderation towards persons of every party. The most authentic testimony of his abilities is his vast collection of *state Papers*, in 7 vols. folio.

THURLOW, Thomas, a late learned English prelate, brother of the Lord Chancellor, was born in 1734. After the usual course of education in grammar, languages, &c. he was sent to the university of Oxford, where he was entered a fellow of Magdalene College; where, on the 9th March 1761, he took his degree of M. A. that of B. D. April 13th, 1769; and that of D. D. June 29th, 1773. In 1771 he had been appointed to the valuable benefice of Stanhope in Durham; in 1773 to be Master of the Temple; in 1777 dean of Rochester; and soon after dean of St Paul's. In 1779, he was consecrated Bp. of Lincoln; and in Jan. 1787, bishop of Durham. He died 27th May 1793, aged 59.

(1.) THURN, a town of Germany, in Stiria; 5 miles S. of Windisch Gratz.

(2.) THURN, a town of Carniola, 2 miles S. of Gurkfeld.

(1.) THUROTZ, a river of Hungary, which runs into the Waag; 12 miles N. of St Martin.

(2.) THUROTZ, a county of Hungary, on the banks of the above river.

THURROCK, or GRAYS. See GRAYS.

* THURSDAY. *n. f.* [*thorsday*, Danish; from *thor*. *Thor* was the son of Odin; yet, in some of the northern parts, they worshipped the Supreme Deity under his name, attributing the power over all things, even the inferior deities, to him. *Stillingfleet.*] The fifth day of the week.

(1.) THURSO, a river of Scotland, in Caithness, which rises from LOCHMORE, and falls into the Pentland Frith at THURSO (N^o 2.) into the bay (N^o 4.) It abounds with salmon; and afforded the extraordinary draught of these fish, on the 23d July, 1743.—A. O. S. of no fewer than 2360 of a good size. The river is navigable for 2 miles by vessels of 60 tons.

(2.) THURSO, a parish of Scotland, in the county of Caithness, on the banks of the above river, comprehending the town (N^o 3.) and a considerable part of the adjacent territory, to the extent of 3 miles around it in every direction, except towards the NW. where it is bounded by the sea. Its form is irregular; and it contains about 4000 acres of arable land, besides commonies. The surface is level, interspersed with small eminences, pleasant villas, and fertile and well cultivated fields, watered by the THURSO (N^o 1.) The population, in 1755, was 2963; that of 1797 was 3146; the increase 183; the number of horses in 1797 was 534; of sheep 688; of black cattle,

937; and hogs, 280. There are some relics of Pictish houses; but the chief antiquity is the tomb of Harold, E. of Caithness, who was killed in 1190; lately rebuilt by Sir John Sinclair. Besides whin-stone on the coast, the parish abounds with free-stone quarries. Sulphat of barytes also abounds, as well as coarse slates.

(3.) THURSO, a borough of barony in the above parish (N^o 2.) seated at the head of the bay, (N^o 1.) on the mouth or estuary of the river (N^o 1.) It is irregularly built, but an elegant new town, called *Jane's Town*, is lately erected upon a regular plan. The old church is a strong Gothic building, and is kept in good repair. The old town was anciently a place of considerable trade and importance. It was erected into a borough of barony, in 1633, by a royal charter from King Charles I. with a weekly market, and 5 fairs, &c. It is governed by 2 bailies and 12 counsellors, appointed by Sir J. Sinclair. The chief manufacture is coarse linen, and some woollen cloth. It has also a bleachfield and tannery; a salmon and cod fishery; and a branch of the Bank of Scotland. Thurso is a port of the Custom-house, and has 16 vessels with decks; the harbour admits vessels drawing 10 feet water. Corn and meal are exported from it to the value of 12,000*l.* sterling; and fish to that of 13,824*l.* The patriotic Sir John Sinclair of Ulbster, Bart. is the proprietor. (See RURAL ECONOMY, *Hist.* p. 398: and STATISTICS.) Thurso lies 42 miles NNE. of Dornoch. Lon. 3. 16. W. or 0. W. of Edin. Lat. 58. 36. N.

(4.) THURSO BAY, a small bay on the coast of Thurso, often confounded by geographers with Dunnet Bay. See DUNNET, N^o 5.

(1.) THURY, a town of France, in the dep. of the Oise; 7 miles SE. of Crespy.

(2.) THURY, a town of France, in the dep. of the Yonne; 10 miles SE. of Fargeau.

(1.) THUS, FFANKINCENSE, a solid brittle resin, brought to us in little globes or masses, of a brownish or yellowish colour on the outside, internally whitish or variegated with whitish specks. It is supposed to be the produce of the pine that yields the common turpentine, and to concrete upon the surface of the terebinthinate juice soon after it has issued from the tree. See INCENSE.

(2.) THUS, in geography, a town of Persia, in Chorasán; 200 miles NNW. of Herat.

(3.) * THUS, *adv.* [*thus*, Saxon.] 1. In this manner; in this wise.—It cannot be that they who speak *thus*, should *thus* judge. Hooker.—

The knight him calling, asked who he was?
Who lifting up his head, him answer'd *thus*.
Spenser.

I return'd with similar proof enough,
With tokens *thus*, and *thus*. Shak.

To be *thus* is nothing;
But to be safely *thus*. Shak.

—*Thus* and *thus* have I done. *Jos.* vii. 23.—The Romans used a like wife endeavour, making concord a deity; *thus* seeking peace, not by an oath, but by prayer. *Holyday*.—That the principle that sets on work these organs, is nothing else but the modification of matter *thus* or *thus* posited, is false. *Hale*.—

VOL. XXII, PART II.

I warn thee *thus*, because I know thy temper.
Dryden.

Thus in the triumphs of soft peace I reign.
Dryden.

From his lofty couch he *thus* began. *Dryden*.
2. To this degree; to this quantity.—A counsellor of state in Spain said to his master, I will tell your majesty *thus* much for your comfort, your majesty hath but two enemies; whereof the one is all the world, and the other your own ministers. *Bacon*.—Even *thus* wife, that is, *thus* peaceable were very Heathens; *thus* peaceable among themselves, though without grace; *thus* peaceable by wife nature. *Holyday*.—

Thus far extend, *thus* far thy bounds. *Mil.*
—*Thus* much concerning the first earth. *Burnet*.
—No man reasonably pretends to know *thus* much. *Tilloson*.—If you have come up *thus* far, firmly persevere. *Wake*.

(4.) THUS, in sea language, a word used by the pilot in directing the helmsman or steersman to keep the ship in her present situation when sailing with a scant wind, so that she may not approach too near the direction of the wind, which would shiver her sails, nor fall to leeward, and run farther out of her course.

THUSCIA, an ancient name of ETRURIA, from whence TUSCANY, one of its modern names is derived.

THUYA. See THUJA.

* THWACK. *n. s.* [from the verb.] A heavy hard blow.—

But Talgol first with a hard *thwack*
Twice bruised his head, and twice his back.

Hudibras.
—They place several pots of rice, with cudgels in the neighbourhood of each pot; the monkeys descend from the trees, take up the arms, and belabour one another with a storm of *thwacks*. *Adif.*
* To THWACK. *v. a.* [*thaccian*, Saxon.] To strike with something blunt and heavy; to thresh; to bang; to belabour. A ludicrous word.—

We'll *thwack* him hence with distaffs. *Shak.*
—Nick fell foul upon John Bull, to snatch the cudgel he had in his hand, that he might *thwack* Lewis with it. *Arbuthnot*.—These long fellows, as lightly as they are, should find their jackets well *thwack'd*. *Arbuthnot*.

* THWART. *adj.* [*thawyr*, Saxon; *dwaris*, Dutch.] 1. Transverse; cross to something else.—

Mov'd contrary with *thwart* obliquities.
Milton.

2. Perverse; inconvenient; mischievous.

(1.) * To THWART. *v. a.* 1. To cross; to lie or come cross any thing.—

Swift as a shooting star
In Autumn *thwarts* the night. *Milton*.

Yon stream of light a thousand ways
Upward and downward *thwarting*. *Thomson*.

2. To cross; to oppose; to traverse; to contravene.—

If crooked fortune had not *thwarted* me.
Shak.

Lesser had been
The *thwartings* of your dispositions. *Shak.*

—The proposals of the one never *thwarted* the inclinations of the other. *South*.—

Z z Each

Each *thwarting* other.

The more I begg'd, they *thwarted* me the more.

Neptune aton'd, his wrath shall now refrain,
Or *thwart* the synd of the gods in vain. Pope.

By *thwarting* passions tost. Young.

(1.) * *To THWART. v. n.* To be in opposition to.—It is easy to be imagined what reception any proposition shall find, that shall at all *thwart* with these internal oracles. Locke.

* *THWARTING. n. f.* [from *thwart.*] The act of crossing, &c. as the verb.

* *THWARTINGLY. adv.* [from *thwarting.*] Oppositely; with opposition.

THWART-THE-WAY, an island in the Straits of Sunda. See *SUNDA*, N° 3.

* *THY. pronoun.* [*thin*, Saxon.] Of thee; belonging to thee; relating to thee; the possessive of *thou*. See *THOU*.—

Whatever God did say,

Is all *thy* clear uninterrupted way. Cowley.

Th' example of the heavenly lark,

Thy fellow poet Cowley mark. Cowley.

These are *thy* works, parent of good! Milt.

(1.) *THYA*, a town of Phocis, near Delphi.

(2.) *THYA*, a name of *CYBELE*. See *OPS*.

THYADES, a name of the Bacchantals.

THYAMIS, a river of Epirus. *Pauf.* l. c. 11.

THYANA, an ancient town of Cappadocia.

THYAS, a mistress of Bacchus, the chief of the *THYADES*.

THYATIRA, an ancient city of Asia Minor, in Lydia; originally called *PELOPIA*, formerly very flourishing; (*Liv.* 37. c. 8, and 44.) and famous in the Apostolic age, for its early reception of Christianity; (*Rev.* ii. 18, 19.) It is now called *AKISSAT*, which see.

THYBARNI, an ancient nation of Asia, near Sardis. *Diod.* 17.

THYESTES, the son of *PELOPS*, and brother of *ATREUS*, whose wife he debauched; which was followed by a series of horrid crimes. See *ÆGISTHUS*, *ATREUS*, *CLYTEMNESTRA*, *PELOPIA*, &c.

* *THYINE WOOD. n. f.* A precious wood.—The merchandize of gold and all *thyine wood* are departed from thee. *Rev.* xviii. 12.

THYLÆ. See *THULE*.

(1.) *THYMBRA*, an ancient town of Lydia, near Sardis; famous for a battle fought between Cyrus king of Persia, and Croesus, king of Lydia, in which the latter was defeated. See *CROESUS*, and *CYRUS*.

(2.) *THYMBRA*, in botany, *MOUNTAIN HYSOP*, a genus of plants of the class *Didynamia*, and order *gymnospermia*; and in the natural method ranking in the order of *Verticillate*.

(3.) *THYMBRA*, a district of Troas, where there was a temple of Apollo: whence

THYMBRÆUS, a surname of Apollo.

THYMBRIS, a nymph, the mother of *PAN*.

THYMBRIUS, a river of Troas, running into the Scamander, through *Thymbra*.

(1.) * *THYME. n. f.* [*thym*, Fr. *thymus*, Latin.] A plant.—The *thyme* hath a labiate flower, consisting of one leaf, whose upper-lip is erect, and generally split in two, and the under lip is divided into three parts; out of the flower-cup arises

the pointal, accompanied by four embryos, which afterward become so many seeds, inclosed in a husk, which before was the flower cup; to these marks must be added hard ligneous stalks, and the flowers gathered into heads. *Miller*.

No more, my goats, shall I behold you climb
The steepy cliffs, or crop the flow'ry *thyme*.

Dryden.

(2.) *THYME*, in botany. See *THYMUS*, N° II.

THYMELE, in the Greek theatre. See *THI-*

ATRE, § 8.

THYMIATHIS, a river of Epirus. *Strab.* 7.

THYMOCHARES, an Athenian general, who was defeated by the Spartans.

(1.) *THYMETES*, a Trojan prince, the son of Laomedon, king of Troy, whose wife and son having been killed by order of king Priam, he, in revenge, advised the Trojans to admit the wooden horse of the Greeks, by which Troy was destroyed. *Virg. Æn.* ii. 32.

(2.) *THYMETES*, another Trojan prince, son of Hicetaon, and grandson of Laomedon, who accompanied Æneas into Italy, where he was killed by Turnus. *Æn.* x. 123.

(3.) *THYMETES*, king of Attica, the son of Oxyntus, the last king of the family of *THYSEUS*. He was deposed, because he refused to fight Xanthus, king of Beotia, about A. A. C. 1128.

(1.) *THYMUS*, in Anatomy. See *ANATOMY, Index*. Morgagni observed a milky fluid in the thymus; which Bourgelot also observed in colts. Pozzius the anatomist supposed the use of the thymus was to fill up the space occupied after birth, by the increase and inflation of the lungs. This opinion has been also adopted by Senec, Lieutaud, and some later anatomists.

(II.) *THYMUS, THYME*, in botany; A genus of plants belonging to the class of *didynamia*, and order of *gymnospermia*; and in the natural system ranging under the 42d order, *Verticillate*. The calyx is bilabiate, and its throat closed with soft hairs. There are 11 species; of which two only are natives of Britain; viz.

1. *THYMUS ACINAS, wild basil*, has flowers growing in whirls on single footstalks; the stalks are erect and branched; the leaves acute and serrated.

2. *THYMUS SERPYLLUM, or mother of thyme*, has pale red flowers growing on round heads, terminal: the stalks are procumbent, and the leaves plane, obtuse, and ciliated at the base.

3. *THYMUS VULGARIS, common garden thyme*, is a native of France, Spain, and Italy.

THYNI, or *Bithyni*, an ancient people of Bithynia.

THYODAMAS, or *Theodamas*, a king of Myfia, killed by Hercules.

THYONE, a name of *SEMLE*, after her deification: whence

THYONEUS, a surname of Bacchus.

THYOTH, or *THOTH*. See *HERMES, MERCURY, MYTHOLOGY*, § 10; *POLYTHEISM, TAAUT*, and *THOTH*.

THYRE, a town of Messenia, famous for a battle fought between the Argives and Spartans.

THYREA, an island on the coast of Peloponnesus, near Hermione. *Hered.* vi. 76.

THYREUM, a town of Acarnania.

THYRIDES,

THYRIDES, 3 islands near **TÆNARUS**. *Plin.*

THYRIENSES, the people of **THYREUM**.

THYRSAGETÆ, an ancient nation of **Sarmatia**, who lived chiefly by hunting. *Plin. iv. c. 12.*

(1.) **THYRSUS**, in antiquity, the sceptre of **BACCHUS**, and wherewith they furnished the **Menades** in their **BACCHANALIA**. The **Thyrri** were spears made wholly of wood, entwined with leaves and twigs of the vine and ivy.

(2.) **THYRSUS**, in botany, a mode of flowering resembling the cone of a pine. It is, says *Linnaeus*, a panicle contracted into an oval or egg-shaped form. The lower footstalks, which are longer, extend horizontally, whilst the upper ones are shorter and mount vertically. Lilac and butter-bur furnish examples.

(3.) **THYRSUS**, in geography, a river of **Sardinia**, now called **ORISTAGNI**.

* **THYSELF**, *pronoun reciprocal*. [*thy* and *self*.]
It is commonly used in the oblique cases, or following the verb.—

Thyself and office desitly show. *Shak.*

It shall be so; content *thyself*. *Shak.*

It is poetical or solemn language it is sometimes used in the nominative.—

These goods *thyself* can on *thyself* bestow. *Dryden.*

THYSIUS, Anthony, a celebrated Philologist, born at **Harderwick**, in **Holland**, in 1603. He became professor of poetry and rhetoric, and librarian to the university of **Leyden**. He published, 1. *Compendium Historiæ Bataviæ*; 2. *Exercitationes Miscellaneæ*; and several accurate editions of the *Classici cum notis variorum*.

THYSSOS, an ancient town of **Macedon**, near mount **Athos**.

THYUS, a satrap of **Paphlagonia**, who revolted from **Artaxerxes II.** and was seized by **Datanes**. *Corn. Nep. in Dat.*

TIAGAR, a town of **Hindooostan**, in the **Carnatic**, 50 miles **WSW.** of **Pondicherry**, and 75 **S.** of **Arco**.

TIAGUANACO, or } a town of **S. America**,
TIAGUANCO, } in **Buenos Ayres**, and
jurisdiction of **Omasuio**, where there are said to be some relics of **Antediluvian** buildings. See **DELUGE**, § 7.

TIAMPAN, a cape of **Scotland**, in **Ross-shire**, on the coast of **Stornoway**.

TIANGPOTAO, an island of **Asia**, in **Corea**, in the **Huanghi**, 30 miles in Circum. *Lon.* 142. 19. *E. Ferro.* *Lat.* 37. 20. *N.*

TIANO. See **THEANO**.

TIANTEGNIES, a town of the **French empire**, in the dep. of the **Scheldt**, and ci-devant prov. of **Austrian Flanders**, 6 miles **SW.** of **Tournay**.

(1.) * **TIAR** } *n. f.* [*tiare*, *Fr. tiara*, *Latin.*]
(1.) * **TIARA** } A dress for the head; a diadem.

Of beaming sunny rays a golden *tiar*
Circled his head. *Milton.*

This royal robe, and this *tiara* wore
Old **Priam**. *Dryden.*

A *tiar* wreath'd her head with many a fold.

A bright *tiara* round her forehead ty'd. *Pope.*

(2.) The **TIARA** was an ornament or habit wherewith the ancient **Persians** covered their head; and with which the **Armenians** and kings of **Pontus** are represented on medals; these last, because they were descended from the **Persians**. *Latin* authors call it indifferently *tiara* and *cidaris*. *Strabo* says, the *tiara* was in form of a tower; and the scholiast on *Aristophanes's comedy*, *ΑΧΕΡΩ*, act 1. scene 2. affirms, that it was adorned with peacock's feathers.

(3.) **TIARA** is also the name of the pope's triple crown. The *tiara* and *keys* are the badges of the papal dignity; the *tiara* of his civil rank, and the *keys* of his jurisdiction; for as soon as the pope is dead, his arms are represented with the *tiara* alone, without the *keys*. The ancient *tiara* was a round high cap. *John XXIII.* first encompassed it with a crown. *Boniface VIII.* added a second crown; and *Benedict XII.* a third.

TIARELLA, in botany, a genus of plants belonging to the class of *decandria*, and order of *di-gynia*; and in the natural system ranging under the 13th order, *Succulente*. The calyx is quinque-partite; the corolla pentapetalous, and inserted into the calyx; the petals are entire; the capsule is unilocular and bivalve, the one valve being less than the other. There are two species, viz.

1. **TIARELLA CORDIFOLIA**, with heart-shaped leaves; and

2. **TIARELLA TRIFOLIA**, the three-leaved *tiarella*.

TIARINI, Alexander, a celebrated painter, born at **Bologna**, in 1577; he painted historical pieces and portraits in a fine style. He died in 1668.

TIARP, a town of **Sweden**, in **Westmanland**; 25 miles **N.** of **Upfal**.

TIASA, a river of **Laconia**; so named from a nymph, the daughter of **Eurotus**. *Paus. iii. c. 18.*

TIB, a town of **Persia**, in **Chusistan**, 60 miles **NW.** of **Sufter**.

TIBARENI, 2 ancient nations of **Asia**; 1. in **Cappadocia**, on the banks of the **Thermoodoon**; 2. in **Pontus**. *Mela. i. c. 20.*

TIBARNA, a town of the island of **Cuba**, 25 miles **WSW.** of **Bayamo**.

TIBBERMUIR, **TYBERMORE**, or **TIPPERMUIR**, a parish of **Perthshire**, 8 miles long, and from 1 to 3 broad; **W.** from **Perth**. It comprehends 4,670 Scottish acres; of which 186 are under wood; 196 moss and moor; and the rest arable. The soil is various, dry, and wet, but on the whole fertile; the fields are mostly inclosed with hedges and ditches. But the parish is chiefly famous and important from its various bleach-fields and printworks, particularly those at **HUNTINGTOWER** and **RUTHVEN**. (See these articles.) All these are supplied with water by a canal, which is of great antiquity, having been first dug by the Romans under **AGRICOLA**, in the 2d century, and afterwards improved, and distinctly mentioned in old charters, dated 1244. The population in 1796 was 1280; the increase 292, since 1755.

TIBENDEI, a town of **Russia**, in **Tobolskoi**, 92 miles **SE.** of **Tobolsk**.

TIBER, a great river of **Italy**, much celebrated

Z z 2 by

by the poets, and to which the Romans under Agricola likened our TAY. It runs through the pope's territories, passing by Perugia and Orvieto; and having visited Rome, falls into the Tuscany sea at Ostia, 15 miles below that city.

TIBERIADES, in Roman mythology, the nymphs of the Tiber.

(1.) **TIBERIAS**, in ancient geography, the last town of Galilee, situated on the S. side of the lake Tiberias; built by Herod the Tetrarch, and named in honour of the emperor Tiberius; 30 stadia from Hippus. Jerome says its ancient name was *Chennereth*. It is now called **TABARIA**, which see.

(2.) **TIBERIAS, LAKE, OR SEA OF**. See **GENESARETH**. N° 1.

TIBERINUS, a king of Alba, who was drowned in the *Albula*; on which its name was changed to **TIBER**. See **ROME**, § 2.

TIBERIS. [Lat.] See **TIBER**.

(1.) **TIBERIUS I.** Claudius Nero, the third emperor of Rome, and one of the greatest monsters that ever reigned in it. He was the step-son, colleague, and successor of Augustus. See **ROME**, § 42—43.

(2.) **TIBERIUS II.** was a Thracian by birth, and rose by his merit to the highest offices in the state; and at last **JUSTIN II.** associated him as his colleague in the eastern empire, A. D. 574. On the death of Justin in 578, he became sole emperor; and reigned with great justice and moderation. He defeated the Persians, and died in 582.

(3.) **TIBERIUS, Claudius**, was also the name of the emperors **CLAUDIUS** and **NERO**.

TIBESIS, a river of ancient Scythia, rising from mount *Hæmus*, and falling into the *Ister*. *Herod.* iv. 49.

TIBESTI, a mountainous country of Arabia, inhabited by wild Arabs; 150 miles SSE. of Mourzouk.

(1.) **TIBET**, or **THIBET**, a country of Asia, a part of Independent Tartary. (See **TARTARY**.) N° II.) It extends from the source of the Indus to the borders of China, and from Hindoostan to the deserts of *Cobi*, or *Kobi*, being 1500 miles long from E. to W. but of unequal breadth, the extent of which is not exactly known.

(2.) **TIBET, BOUNDARIES, EXTENT, AND NAMES OF**. Others say Thibet is bounded on the N. by the country of the **MOGULS**, or **MONGULS**; on the E. by China: on the S. and W. by *Ava* and *Hindoostan*, and that it is about 2000 miles broad from N. to S. being bounded on the N. and W. by the deserts of *Kobi*, E. by China, S. by *Affam* and *Burmah*, W. by *Hindoostan* and *Bootan*; while others make *Bootan* a part of Thibet. (See **BOOTAN**.) It is called by the Tartars *Barantala* and *Tangeot*, and by the Chinese *Tsang*. It lies between 81° and 102° Lon. E. and between 26° and 40° Lat. N.

(3.) **TIBET, CLIMATE OF**. The climate is extremely cold and severe. Even in the middle of April, the rivers and lakes are all frozen, and great storms of snow are frequent. *Bootan* is a country of steep mountains, crowned with eternal snow; they are intersected with deep valleys, through which run many torrents. These mountains are

covered with stately trees of various sorts. The valleys and sides of the hills produce crops of wheat, barley, and rice.

(4.) **TIBET, DISEASES OF**. The same disease prevails at the foot of the mountains of Tibet as in Switzerland at the foot of the Alps, a glandular swelling in the throat commonly called *goutte*. The venereal disease is not uncommon in Tibet; and the inhabitants are acquainted with the effects of mercury, and with a method of preparing it, so as to render it a safe and efficacious remedy. They know how to deprive it of its metallic form by mixing it with alum, nitre, and vermilion, and exposing it to a certain degree of heat, which they judge of by weighing the fuel.

(5.) **TIBET, DIVISIONS OF**. Tibet is divided by geographers into 3 extensive parts or districts, but these are not very distinctly marked, viz. the *Upper, Middle, and Lower Tibet*.

i. **TIBET, LOWER**, is that part which borders upon China; but as Mr Cruttwell observes, "the subject is *obscure*, and likely to remain so." But the people are much improved by their vicinity to the Chinese.

ii. **TIBET, MIDDLE**, is that extensive country in the *centre* of Tibet, in which the city and district of *Lassa* are situated. *Lassa* is the capital of it, and of all Tibet. See **LASSA**. This is the principal part of Tibet, and the natives are in a high state of civilization, abating for their absurd religion.

iii. **TIBET, UPPER**, comprehends those extensive territories which lie about the sources of the **GANGES** and **SANPOO**; and is pretty populous between Upper Tibet and Cashgar. There is a district called *Little Tibet*; but Major Rennel, tho' he visited this country, could not learn with certainty, whether this district belongs to Upper Tibet or to Cashgar. See **CASHGAR**.

(6.) **TIBET, INHABITANTS OF**. The inhabitants are stout and warlike, of a copper complexion, in size rather above the middle European stature, quarrelsome, and fond of spirits, but honest. The common people, both in *Bootan* and *Thibet*, are clothed in coarse woollen stuffs of their own manufacture, lined with such skins as they can procure; but the better orders are dressed in European cloth, or China silk, lined with Siberian furs. The use of linen is unknown. The chief food of the inhabitants consists of cheese and butter, mixed with the flour of coarse barley or peas, the only grain which their soil produces; but they are furnished with rice and wheat from abroad. They have plenty of animal food, fish, and game. They have a singular method of preparing their mutton, by exposing the carcass entire, after the bowels are taken out, to the sun and bleak northern winds which blow in Aug. and Sept. without frost, and so dry up the juices and parch the skin, that the meat will keep uncorrupted for the whole year. This meat will generally eat without any other preparation.

(7.) **TIBET, LANGUAGE AND SCIENCE OF**. The language spoken in Tibet is different from that of the Tartars. The astronomers are acquainted with the motions of the heavenly bodies, and able to calculate eclipses; but the lamas are generally ignorant;

ignorant; few of them can read, much less understand their ancient books.

(8.) **TIBET, PLANTS AND MINERALS OF.** The plants are almost all European, great numbers being natives of Britain. The appearance of the hills gives promise of many ores of metal and pyrites. There are inexhaustible quantities of **TINICAL**, (see that article,) and rock salt is plentiful; gold-dust is found in great quantities in the beds of rivers, and sometimes in large masses, lumps, and irregular veins; lead, cinnabar containing a large proportion of quicksilver, copper, and iron, might easily be procured. But they have no better fuel than the dung of animals. A coal mine would be a valuable discovery. We are told, that in some parts of China bordering on Tibet, coal is found and used as fuel.

(9.) **TIBET, RELIGION AND GOVERNMENT OF.** The religion and political constitution of this country are intimately blended together. For since the expulsion of the Eluth Tartars, the kingdom of Tibet has depended on the empire of China, which they call *Cathay*; and there reside two mandarines, with a garrison of 1000 Chinese, at **LASSA**, the capital, to support the government; but their power does not extend far: for in fact the lama, whose empire is founded on personal attachment and religious reverence, governs every thing internally with unbounded authority. As the grand lama must never concern himself about temporal affairs; he appoints a deputy vicegerent or minister under him, called **TIPA**, to whom he entrusts the entire management of all civil and secular affairs. This tipa wears the habit of a lama; but is dispensed with from observing the strict and severe rules of the order. The adoration and worship paid to the grand lama, is beyond all conception degrading, and disgraceful to human nature. They even think his very excrements a divine favour! See **LAMA**, N^o 1.

(10.) **TIBET, SINGULAR CUSTOMS IN.** Polygamy exists in a manner shockingly repugnant to European ideas; for there is a plurality of *husbands*, which is firmly established and even respected there, similar to that of the *Nayres*. (See **NAYRES**.) They expose their dead on the pinnacle of some mountain, to be devoured by wild beasts and birds of prey, or walked away by time and the weather.

TIBETIANS, the inhabitants of Tibet. See **TIBET**, § 6.

TIBIA, in anatomy, the principal bone of the leg. See **ANATOMY**, § 157.

(1.) **TIBISCUS**, an ancient town of Dacia, now called **TEMESWAR**.

(2.) **TIBISCUS**, a river of Dacia, running into the Danube, at the above town.

TIBRIS. [Lat.] See **TIBER**.

TIBULA, an ancient town of Sardinia, now called **Lango**.

TIBULLUS, Aulus Albius, a Roman knight, and a celebrated Latin poet, was born at Rome, 43 B. C. He was the friend of Horace, Ovid, Macer, and other great men in the reign of Augustus. He accompanied Messala Corvinus in his expedition against Corcyra: but falling sick, he quitted the profession of arms, and returned to Rome, where he died before the year 17; when

Ovid expressed his grief in a fine elegy. Tibullus wrote 4 books of elegies, which are still extant. The best edition of Tibullus is that *Notis Variorum* et *Vulpii*, 4to, Patavii, 1749. Grainger published an English version.

TIBUR, an ancient town of Latium, pleasantly situated on the Anio. Here Horace had his villa; and here Adrian built a villa called **Tibur-tina**, inscribed with the names of the provinces; near which Zenobia had a house. (*Treb. Pollio*.) Hither Augustus often retreated. (*Suet.*) Anciently it was the utmost place of banishment. (*Ovid*.) It had a temple of Hercules; with a library. (*A. Gell.*) Now called **TIVOLI**.

TIBUROON, a town and cape of Hispaniola, at the W. extremity of the island, opposite Port Antonio in Jamaica, with a spacious open road between them.

TIBURTINA, a villa of Latium, built by Adrian, near Tibur. See **TIBUR**.

TIBURTUS, a son of Amphiarus, who founded **TIBUR**. *Virg. En. 7.*

(1.) **TICHFIELD**, a small town of England, in Hampshire, seated on a rivulet that runs into the Southampton. In this town there was an ancient abbey, in which the marriage of K. Henry VI. with the princess Margaret of Anjou was celebrated. It was also the place of retreat to which K. Charles I. fled from Hampton-court, in 1647, to the seat of the Earl of Southampton.

(2, 3.) **TICHFIELD**, a river of Hampshire, which falls into a *bay* so named, at the above town.

(4.) **TICHFIELD**, a river of Jamaica, on the N. coast, 12 miles N.E. of Kingston. Lon. 76. 10. W. Lat. 18. 12. N.

TICHIS, a river of ancient Spain, running into the Mediterranean, now called **TACH**.

TICHIUS, the top of mount *Æta*. *Liv. 36. c. 16.*

TICIDA, a poet of the Augustan age, who wrote Epigrams; mentioned by *Ovid. Trist. ii. 433.*

TICINUM, an ancient name of **PAVIA**.

TICINUS, a river of Italy, in Insurbria, rising in mount Adula, traversing the lake Verbanus to the S. and falling into the Po near **TICINUM**. Between this river and the Po Hannibal gained his first victory over the Romans under P. Scipio. It is now called **TEFINO**, which see.

(1.) * **TICK**. *vi. f.* (This word seems contracted from *ticated*, a tally on which debts are scored.) 1. Score; trust.—

Fight upon *tick*. *Hudibras*.—Whoever needs any thing else must go on *tick*, or barter for it. *Locke*.—Paying ready money, that the maids might not run a *tick* at the market. *J. Bull.* 2. [*Tique, Fr. tcke, Dutch.*] The louse of dogs or sheep.—I had rather be a *tick* in a sheep, than such a valiant ignorant. *Shak.* 3. The case which holds the feathers of a bed.

(2.) **TICK**, in entomology. See **ACARUS**.

* **To TICK**. *vi. n.* [from the *Latin*]. 1. To run on score. 2. To trust; to score.—The money went to the lawyers; council wo'n't *tick*. *Arb.*

(1.) **TICKELL**, Thomas, an excellent English poet, son of the Rev. Richard Tickell, born in 1686, at Bridekirk in Cumberland. He was fellow of Queen's college, Oxford, and addressed

to Mr Addison verses on his Opera of *Rafomond*. Addison being made secretary of state, appointed him his under secretary; and Mr Craggs continued him in his post. In 1724, Mr Tickell was appointed secretary to the lords justices in Ireland, which he held for life. He wrote some poems, which met with a favourable reception. He died in 1740.

(2.) TICKELL, Richard, an English poet, and political writer. He published two very popular poems, entitled, 1. *The Project*; and, 2. *The Wreath of Fashion*. But his most admired piece was a pamphlet, entitled *Anticipation*, which came out just two days before the meeting of parliament, in 1779; and in which he imitated the style and sentiments of the leading members of both houses with wonderful precision. He also adapted *The Gentle Shepherd* to the English stage; and wrote *The Carnival of Venice, a comic Opera*. He died in 1793.

(3.) TICKELL, in geography, a town of Yorkshire, in the W. Riding, with a market on Friday, 5 miles S. of Doncaster, and 155 N. by W. of London. It has ruins of a castle and fortifications, which were destroyed during the civil wars. Lon. 1. 11. W. Lat. 53. 27. N.

* TICKEN. TICKING. *n. f.* The fame with tick. A sort of strong linen for bedding. *Bailey.*

TICKERA, *n. f.* a considerable article of merchandize in Fezzan in Africa. It is a preparation of pounded dates, and the meal of Indian corn, formed into a paste, and highly dried in an oven, and is a palatable and salubrious food.

TICKELY, a town of Hindoostan, in the circle of Cicacole; 30 miles NE. of Cicacole, and 70 SW. of Ganjam.

* TICKET. *n. f.* [*etiquet*, Fr.] A token of any right or debt, upon the delivery of which admission is granted, or a claim acknowledged.—There should be a paymaster appointed, which should pay every man according to his captain's ticket. *Spenser.*—In a lottery with one prize, a single ticket is only enriched. *Collier.*—

Disdains all loss of tickets or codille. *Pope.*

TICKILL, or TICKELL. See TICKELL, N^o 3.

* TICKING. See TICKEN.

* TICKLE. *adj.* [I know not whence to deduce the sense of this word.] Tottering; unfixed; unstable; easily overthrown.—The last O'Neal began to stand upon some tickle terms. *Spenser.*—Thy head stands fo tickle on thy shoulders, that a milk-maid, if she be in love, may sigh it off. *Shak.*

The state of Normandy

Stands on a tickle point. *Shak.*

(1.) * To TICKLE. *v. a.* [*stillo*; Lat.] 1. To affect with a prurient sensation by slight touches. How fine this tyrant

Can tickle where she wounds. *Shak.*

—The mind is moved only by tickling some parts of the body. *Bacon.*—There is a sweetness in good verse, which tickles even while it hurts. *Dryden.*—If a straw can tickle a man, it is an instrument of happiness. *Dryden.* 2. To please by slight gratifications.—Dametas, being withal tickled by Mufidorus's praises, had his brain turned. *Sidney.*

Expectation tickling skittish spirits. *Shak.*

Such a nature,

Tickled with good success. *Shak.*

My scorn rebels, and tickles me within. *Dryd.*
To tickle on thy straw, the stupid crowd.

Dryden.

—Such a good as he confesses, is far greater than the tickling of his palate with a glass of wine. *Locke.*

(2.) * To TICKLE. *v. n.* To feel titillation.—

He with secret joy therefore

Did tickle inwardly in every vein. *Spenser.*

* TICKLISH. *adj.* [from tickle.] 1. Sensible to titillation; easily tickled.—The palm of the hand is not ticklish, because it is accustomed to be touched. *Bacon.* 2. Tottering; uncertain; unfixed.—Ireland was a ticklish and unsettled state. *Bacon.*—Did it stand upon to ticklish and tottering a foundation as some men's fancy hath placed it. *Woodward.* 3. Difficult; nice.—

It had been civil in these ticklish times,

To fetch his fools and knaves from foreign climes. *Swift.*

* TICKLISHNESS. *n. f.* [from ticklish.] The state of being ticklish.

TICKSEED, SUNFLOWER. See COREOPSIS.

* TICKTACK. *n. f.* [*tridac*, Fr.] A game at tables. *Bailey.*

TICOLOOSA, a town of Tannassée, 38 miles S. of Knoxville.

TICONDERAGO, a town and fort of New York, built by the French in 1756, on the narrow passage or isthmus between lake George and lake Champlain. It had every advantage of nature and art; being surrounded on three sides by water and formidable rocks; and on the 4th by a swamp and a breast-work erected by the French, 9 feet high. It was famous during the French war of 1756-8. Gen. Abercromby besieged it in 1759, but was defeated; but in 1759, it was taken by Gen. Amherst. During the American war, it was taken by the British troops under Gen. Burgoyne in 1779; but evacuated after the surrender at SARATOGA. It lies 110 miles S. of Montreal, and 185 N. of New York. Lon. 73. 25. W. Lat. 43. 45. N.

TICOUL, a town of Corea, 450 miles NE. of Peking.

TICOUR, a town of France, in the dep. of Moselle, 4 miles S. of Fauquemont, and 6 NW. of Moarhange.

TICSAN, a town of Peru, in Quito.

TICUNAS, an American poison, of which the Abbe Fontana has given a particular account. It is supposed to be the same with that used in Africa and the East Indies. It dissolves very readily even in cold water, and likewise in the vegetable and mineral acids. With sulphuric acid it becomes as black as ink, but not with the rest of the acids. In this acid it also dissolves more slowly than in any of the rest. It does not effervesce with acids or alkalis; neither does it alter milk, nor tinge it, except with the natural colour of the poison: nor does it tinge the vegetable juices either red or green. When examined by the microscope, there is no appearance of regularity or crystallization; but it for the most part appears made up of very small, irregular, roundish bodies, like vegetable juices. It dries without any noise, and has an extremely bitter taste applied to the tongue. The ticunas poison

it

is harmless when put into the eyes; nor is it fatal when taken by the mouth, unless the quantity is considerable. Six grains of the solid poison, dissolved in water, killed a young pigeon which drank it in less than 20 minutes; 5 grains killed a Guinea pig in 25 minutes; 8 grains killed a rabbit in an hour and 8 minutes, &c. In those experiments it was observed that much less poison was required to kill an animal whose stomach was empty, than one that had a full stomach. Three rabbits and two pigeons were killed in less than 35 minutes by taking a dose of 3 grains, each on an empty stomach; but when the experiment was repeated on 5 animals with full stomachs, only one of them died. The most fatal operation of this poison is when mixed with the blood. The smallest quantity, injected into the jugular vein, killed the animal as if by a stroke of lightning. When applied to wounds in such a manner that the flowing of the blood could not wash it away, the animal fell into convulsions and a train of fatal nervous symptoms, which put an end to its life in a few minutes. Yet, notwithstanding these seeming affections of the nerves, the poison proved harmless when applied to the naked nerves themselves, or even to the medullary substance of them slit open. The strength of this poison seems to be diminished, and even destroyed, by mineral acids, but not at all by alkalis or ardent spirits; but if the fresh poison was applied to a wound, the application of mineral acids immediately after could not remove the pernicious effects. So far, indeed, was this from being the case, that the application of nitrous acid to the wounded muscle of a pigeon killed the animal in a short time without any poison at all.

* **TID.** *adj.* [*tidder*, Sax.] Tender; soft; nice.

* **TIDBIT.** *n. f.* [from *tid* and *bit*.] A dainty.

TIDDENHAM, a small town of Gloucestershire, near Chepstow, 7 miles S. of Colford, and 25 SW. of Gloucester. It gives name to a parish, 15 miles in circumference, bounded on 3 sides by the Wye and the Severn. At their junction ruins of an ancient chapel are still visible at low water on the rocks, which was dedicated to *St Thecla* the martyr, who suffered A. D. 47.

* **To TIDDER.** } *v. a.* [from *tid*.] To use ten-

* **To TIDDLE.** } *derly*; to fondle.

(*x.*) * **TIDE.** *n. f.* [*tyd*, Saxon; *tijd*, Dutch and *IOandick*.] 1. Time; season; while.—

Rest their weary limbs a *tide*. *Spenser.*

At the appointed *tide*,

Each one did make his bride.

Spenser.

It in golden letter should be set

Among the high *tides* in the kalendar. *Shak.*

—*New-year's tide* following. *Watson.* 2. Alternate ebb and flow of the sea.—That motion of the water called *tides*, is a rising and falling of the sea; the cause of this is the attraction of the moon, whereby the part of the water in the great ocean which is nearest the moon, being most strongly attracted, is raised higher than the rest; and the part opposite to it being least attracted, is also higher than the rest; and these two opposite rises of the surface of the water in the great ocean following the motion of the moon from East to West, and striking against the large coasts of the continents, from thence rebounds back again, and so

makes floods and ebbs in narrow seas and rivers. *Locke.* 3. Commotion; violent confluence.—In the *tides* of people once up, there want not stirring winds to make them more rough. *Bacon.* 4. Stream; course.—

Thou art the ruins of the noblest man,

That ever lived in the *tide* of times.

Shak.

The rapid currents drive

Towards the retreating sea their furious *tide*.

Milton.

All the gold which Tagus hides,

And pays the sea in tributary *tides*.

Dryden.

Continual *tide*

Flows from th' exhilarating fount.

Philips.

(1.) **TIDE**, or the rising and falling of the waters, is observed on all maritime coasts. There is a certain depth of the waters of the ocean which would obtain if all were at rest: but observation shows that they are continually varying from this level, and that some of these variations are regular and periodical.

(3.) **TIDE**, FACTS OBSERVED RESPECTING THE RISE AND FALL OF THE. 1st, On the shores of the ocean, and in bays, creeks, and harbours, which communicate freely with the ocean, the waters rise up above this mean height twice a-day, and as often sink below it, forming what is called a FLOOD and an EBB, a HIGH and a LOW WATER. The whole interval between high and low water is called a **TIDE**; the water is said to FLOW and to EBB, and the rising is called the FLOOD **TIDE**, and the falling is called the EBB **TIDE**. 2^d, This rise and fall of the waters is variable in quantity. At Plymouth, for instance, it is sometimes 21 feet between the greatest and least depth of the water in one day, and sometimes only 12 feet. These different heights of tide succeed each other in a regular series, diminishing from the greatest to the least, and then increasing from the least to the greatest. The greatest is called a **SPRING TIDE**, and the least is called a **NEAP TIDE**. 3^d, This series is completed in about 15 days. More careful observation shows that two series are completed in the exact time of a lunation. For the spring tide in any place is observed to happen precisely at a certain interval of time (generally between 2 and 3 days) after new or full moon, and the neap tide at a certain interval after half moon; or, to be more accurate, the spring tide always happens when the moon has got a certain number of degrees E. of the line of conjunction and opposition, and the neap tide happens when she is a certain number of degrees from her first or last quadrature. Thus the whole series of tides appear to be regulated by the moon. 4th, **HIGH WATER** happens at *new* and *full moon* when the moon has a certain determined position with respect to the meridian of the place of observation, preceding or following the moon's southing a certain interval of time; which is constant with respect to that place, but very different in different places. 5th, The time of high water in any place appears to be regulated by the moon; for the interval between the time of high water and the moon's southing never changes above three quarters of an hour, whereas the interval between the time of high water and noon changes six hours in the course of a fortnight. 6th, The interval between

tween

tween two succeeding high waters is variable. It is least of all about new and full moon, and greatest when the moon is in her quadratures. As two high waters happen every day, we may call the double of their interval a TIDE DAY, as we call the diurnal revolution of the moon a *lunar day*. The tide day is shortest about new and full moon being then about 24h. 37'; about the time of the moon's quadratures it is 25h. 27'. These values are taken from a mean of many observations made at Barbadoes by Dr Maskelyne. 7th. The tides in similar circumstances are greatest when the moon is at her smallest distance from the earth, or in her perigee, and, gradually diminishing, are smallest when she is in her apogee. 8th. The same remark is made with respect to the sun's distance; and the greatest tides are observed during the winter months of Europe. 9th. The tides in any part of the ocean increase as the moon, by changing her declination, approaches the zenith of that place. 10th. The tides which happen while the moon is above the horizon are greater than the tides of the same day when the moon is below the horizon." There is also a kind of rest or cessation of about half an hour between the FLUX and REFLEX; during which time the water is at its greatest height, called *high water*. The flux is made by the motion of the water of the sea from the equator towards the poles; which, in its progress, striking against the coasts in its way, and meeting with opposition from them, swells, and where it can find passage, as in flats, rivers, &c. rises up and runs into the land. This motion follows, in some measure, the course of the moon; as it loses or comes later every day by about three quarters of an hour, or more precisely, by 48 minutes; and by so much is the motion of the moon slower than that of the sun. It is always highest and greatest in full moons, particularly those of the equinoxes. In some parts, as at Mount St Michael, it rises 80 or 90 feet, though in the open sea it never rises above a foot or two; and in some places, as about the Morea, there is no flux at all. It runs up some rivers above 120 miles. Up the river THAMES it it only goes 80, viz. near to Kingston in Surry. Above London bridge the water flows four hours and ebbs eight; and below the bridge, flows five hours and ebbs seven.

(4.) TIDES, HARDLY KNOWN TO THE EARLIEST AUTHORS OF GREECE. Homer is the earliest profane author who speaks of the tides; but (in the XIIth book of the *Odyssey*) only takes notice of the tides of CHARYBDIS, which rises and retires thrice in every day. Herodotus and Diodorus Siculus speak more distinctly of the tides in the Red Sea. PYTHEAS of Marseilles is the first who says any thing of their cause. According to Strabo he had been in Britain, where he must have observed the tides of the ocean. Plutarch says expressly that Pytheas ascribed them to the moon. It is surprising that Aristotle says so little about the tides. The army of Alexander, his pupil, were startled at their first appearance to them near the Persian Gulph; and we should have thought that Aristotle would be well informed of all that had been observed there. But there are only three passages concerning them in all

Aristotle's writings, and they are very trivial. In one place he speaks of great tides observed in the north of Europe: in another, he mentions their having been ascribed by some to the moon; and in a third, he says that the tide in a great sea exceeds that in a small one.

(5.) TIDES, LITTLE UNDERSTOOD BY THE ROMANS, OR EVEN BY MANY LEARNED MODERNS. The conquest and the commerce of the Romans gave them more acquaintance with tides; Cæsar speaks of them in the 4th book of his *Gallie War*. Strabo, after Posidonius, classes the phenomena into *daily, monthly, and annual*. He observes, that the sea rises as the moon gets near the meridian, whether above or below the horizon, and falls again as the rises or falls; also, that the tides increase at the time of new and full moon, and are greatest at the summer solstice. Pliny explains the phenomena at some length; and says, that both the sun and moon are their cause, dragging the waters along with them (B. II. c. 97). Seneca (*Nat. Quest.* III. 28.) speaks of the tides with correctness; and Macrobius (*Sonn. Scip.* I. 6.) gives a very accurate description of their motions. Such phenomena however could not but exercise human curiosity as to their cause. Plutarch (*Plaut. Phil.* III. 17), Galileo (*Syst. Mund.* Dial. 4.), Riccioli in his *Almagest*, ii. p. 374, and Gassendi, ii. p. 27, have collected most of the notions of their predecessors on the subject; but they are of so little importance, that they do not deserve our notice. Kepler speaks more like a philosopher (*De Stella Martis*, and *Epit. Astron.* p. 555.) He says that all bodies attract each other, and that the waters of the ocean would all go to the moon were they not retained by the attraction of the earth; and then goes on to explain their elevation under the moon and on the opposite side, because the earth is less attracted by the moon than the nearer waters, but more than the waters which are more remote.

(6.) TIDES, NEWTON'S DISCOVERY OF THE CAUSE OF THE. The honour of a complete explanation of the tides was reserved to Sir Isaac Newton. He laid hold of this class of phenomena as the most incontestible proof of universal gravitation, and has given a most beautiful and synoptical view of the whole subject; contenting himself, however, with merely exhibiting the chief consequences of the general principle, and applying it to the phenomena with singular address. But the wide steps taken by this great philosopher in his investigation, leave ordinary readers frequently at fault: many of his assumptions require the greatest mathematical knowledge to satisfy us of their truth. The academy of Paris therefore proposed to illustrate this among other parts of the principles of natural philosophy, and published the theory of the tides as a prize problem. This produced three excellent dissertations, by M^r Laurin, Dan. Bernoulli, and Euler. Aided by these, and chiefly by the second, we shall here give a physical theory, and accommodate it to the purposes of navigation, by giving the rules of calculation. We have demonstrated in our dissertations on the physical principles of the celestial motions, that it is an unexcepted fact, that every particle of matter in the solar system is actually

actually deflected toward every other particle; and that the deflection of a particle of matter toward any distant sphere is proportional to the quantity of matter in that sphere directly, and to the square of the distance of the particle from the centre of that sphere inversely; and having found that the heaviness of a piece of terrestrial matter is nothing but the supposed opponent to the force which we exert in carrying this piece of matter, we conceive it as possessing a property, or distinguishing quality, manifested by its being *gravis* or heavy. This is heaviness, or GRAVITY; and the manifestation of this quality, or the event in which it is seen, whether it be directly falling, or deflected in a parabolic curve, or stretching a coiled spring, or breaking a rope, or simply pressing on its support, is *gravitatio*, GRAVITATION; and the body is said to gravitate. When all obstacles are removed from the body, as when we cut the string by which a stone is hung, it moves directly downwards, *tendit ad terram*. By some metaphysical process, this *nixus ad motum* has been called a TENDENCY in our language, and is used to signify the energy of any active quality in those cases where its simplest and most immediate manifestation is prevented by some obstacle. The stretching the string in a direction perpendicular to the horizon, is a full manifestation of this tendency. This tendency, this energy of its heaviness, is therefore named by the word which distinguishes the quality called *gravitation*. But Sir Isaac Newton discovered that this deflection of a heavy body differs in no respect from that general deflection observed in all the bodies of the solar system. - For 16 feet; which is the deflection of a stone in one second, has the very same proportion to $\frac{1}{4}$ th of an inch, which is the simultaneous deflection of the moon, that the square of the moon's distance from the centre of the earth has to the square of the stone's distance from it, namely, that of 3600 to 1. Thus we are enabled to compare all the effects of the mutual tendencies of the heavenly bodies with the tendency of *gravity*, whose effects and measures are familiar to us. If the earth were a sphere covered to a great depth with water, the water would form a concentric spherical shell; for the gravitation of every particle of its surface would then be directed to the centre, and would be equal. The curvature of its surface therefore would be every where the same, that is, it would be the uniform curvature of a sphere. See *ASTRONOMY, Index, at TIDES; ATTRACTION, GRAVITATION, § 2, 3; GRAVITY, § 2; NEWTONIAN PHILOSOPHY, Sect. III—VI; PROCESSION OF THE EQUINOXES, &c.*

(7.) *TIDES, REMARKS ON THE IRREGULARITY OF THE.* The waters of the ocean have their equilibrium disturbed by the unequal gravitation of their different particles to the sun or to the moon; and this equilibrium cannot be restored till the waters come in from all parts, and rise up around the line joining the centres of the earth and of the luminary. The spherical ocean must acquire the form of a prolate spheroid generated by the revolution of an ellipse round its transverse axis. The waters will be highest in that place which has the

VOL. XXII. PART II.

luminary in its zenith, and in the antipodes to that place; and they will be most depressed in all those places which have the luminary in their horizon. Mr Ferguson, in his *Astronomy*, assigns another cause of this arrangement, *viz.* the difference of the centrifugal forces of the different particles of water, while the earth is turning round the common centre of gravity of the earth and moon. This, however, is a *mistake*. It would be just if the earth and moon were attached to the ends of a rod, and the earth kept always the same face toward the moon. It is evident that its absolute quantity may be discovered by our knowledge of the proportion of the disturbing force to the force of gravity. Now this proportion is known; for the proportion of the gravitation of the earth's centre to the sun or moon, to the force of gravity at the earth's surface, is known; and the proportion of the gravitation of the earth's centre to the luminary, to the difference of the gravitations of the centre and of the surface, is also known, being very nearly in the proportion of the distance of the luminary to twice the radius of the earth. We must therefore take the subject more generally, and show the proportion and directions of gravity in every point of the spheroid. We need not, however, again demonstrate that the gravitation of a particle placed any where without a perfect spherical shell, or a sphere consisting of concentric spherical shells, either of uniform density, or of densities varying according to some function of the radius, is the same as if the whole matter of the shell or sphere were collected in the centre. This has been demonstrated in the article *ASTRONOMY*. We need only remind the reader of some consequences of this theorem which are of continual use in the present investigation. 1st, The gravitation to a sphere is proportional to its quantity of matter directly, and to the square of the distance of its centre from the gravitating particle inversely. 2^d, If the spheres be homogeneous and of the same density, the gravitations of particles placed on their surfaces, or at distances which are proportional to their diameters, are as the radii; for the quantities of matter are as the cubes of the radii, and the attractions are inversely as the squares of the radii; and therefore the whole

gravitations are as $\frac{r^3}{r^2}$, or as r . 3^d, A particle placed within a sphere has no tendency to the matter of the shell which lies without it, because its tendency to any part is balanced by an opposite tendency to the opposite part. Therefore, 4th, A particle placed any where *within* a homogeneous sphere gravitates to its centre with a force proportional to its distance from it. It is a much more difficult problem to determine the gravitation of particles to a spheroid. To do this in general terms, and for every situation of the particle, would require a train of propositions which our limits will by no means admit. The ratio of the axes may be obtained and ascertained by knowing the ratio of the gravitation at the pole to that of the equator. See *SPHERE, SPHEROID, and PROJECTION OF THE SPHERE*. The gravitation of the moon to the earth is to the disturbing force of the sun as 178,725 to 1 very nearly. The lunar

A a a

gravitation

gravitation is increased as the approaches the earth in the reciprocal duplicate ratio of the distances. The disturbing force of the sun diminishes in the simple ratio of the distances; therefore the weight of a body on the surface of the earth is to the disturbing force of the sun on the same body, in a ratio compounded of the ratio of 178,725 to 1; the ratio of 3600 to 1, and the ratio of 60 to 1; that is, in the ratio of 38,604,600 to 1. If the mean radius of the earth be 209,34500 feet, the difference of the axis, or the elevation of the pole of the watery spheroid produced by the gravitation to the sun, will be $\frac{1}{2} \times \frac{38604600}{178725} \times \frac{60}{3600}$ feet, or very nearly 244 inches. This is the tide produced by the sun on a homogeneous fluid sphere. It needs no proof that if the earth consists of a solid nucleus of the same density with the water, the form of the solar tide will be the same. But if the density of the nucleus be different, the form of the tide will be different, and will depend both on the density and on the figure of the nucleus. If the nucleus be of the same form as the surrounding fluid, the whole will still maintain its form with the same proportion of the axis. If the nucleus be spherical, its action on the surrounding fluid will be the same as if all the matter of the nucleus by which it exceeds an equal bulk of the fluid were collected at the centre. In this case, the ocean cannot maintain the same form; for the action of this central body being proportional to the square of the distance inversely, will augment the gravity of the equatorial fluid more than it augments that of the circumpolar fluid; and the ocean, which was in equilibrio (by supposition), must now become more protuberant at the poles. It may, however, be again balanced in an elliptical form, when it has acquired a just proportion of the axes. The process for determining this is tedious, but precisely similar to the preceding. In the dissertations by Clairault and Boscovich on the Figure of the Earth, this curious problem is treated in the most complete manner. The earth is not a SPHERE, but swelled out at the equator by the diurnal rotation. But the change of form is so very small in proportion to the whole bulk, that it cannot sensibly affect the change of form afterwards induced by the sun on the waters of the ocean. For the disturbing force of the sun would produce a certain protuberance on a fluid sphere; and this protuberance depends on the ratio of the disturbing force to the force of gravity at the surface of this sphere. If the gravity be changed in any proportion, the protuberance will change in the same proportion. Therefore if the body be a spheroid, the protuberance produced at any point by the sun will increase or diminish in the same proportion that the gravity at this point has been changed by the change of form. Now the change of gravity, even at the pole of the terrestrial spheroid, is extremely small in comparison with the whole gravity. Therefore the change produced on the spheroid will not sensibly differ from that

produced on the sphere; and the elevations of the waters above the surface, which they would have assumed independent of the sun's action, will be the same on the spheroid as on the sphere. For the same reason, the moon will change the surface already changed by the sun, in the same manner as the world have changed the surface of the undisturbed ocean. Therefore the change produced by both these luminaries in any place, will be the same when acting together as when acting separately; and it will be equal to the sum, or the difference of their separate changes, according as these would have been in the same or in opposite directions. The difference between a *lunar day* and a *sidereal day* is called the *PRIMUM* or the *RETARDATION* of the tides. This is evidently equal to the time of the earth's describing in its rotation an angle equal to the motion of the high water in a day from the sun. The smallest of these retardations is to the greatest as the difference of the disturbing forces to their sum. Of all the phenomena of the tides, this seems liable to the fewest and most inconsiderable derangements from local and accidental circumstances. It therefore affords the best means for determining the proportion of the disturbing forces. By a comparison of a great number of observations made by Dr MASKELYNE at St Helena and at Barbadoes (places situated in the open sea), it appears that the shortest tide-day is 24h. 37', and the longest is 25h. 27'. This gives $M-S: M+S=37: 89$, and $S: M=1: 4.96$; which differs only 1 part in 124 from the proportion of 2 to 5, which Daniel Bernoulli collected from a variety of different observations. We shall therefore adopt the proportion of 2 to 5 as abundantly exact. It also agrees exactly with the phenomena of the nutation of the earth's axis and the precession of the equinoxes. It follows, that while the moon moves uniformly from $56^{\circ} 47'$ W. elongation to $56^{\circ} 47'$ E. or from $123^{\circ} 13'$ E. to $123^{\circ} 13'$ W. the tide-day is shorter than the lunar day; and while the moves from $56^{\circ} 47'$ E. to $123^{\circ} 13'$, or from $123^{\circ} 13'$ W. to $56^{\circ} 47'$, the tide day is longer than the lunar-day. The time of high water, when the sun and moon are in the equator, is never more than 47 minutes different from that of the moon's southing (+ or - a certain fixed quantity, to be determined once for all by observation.) There is now no difficulty in determining the hour of high water corresponding to any position of the sun and moon in the equator. The following table of Bernoulli's exhibits these times for every 10th degree of the moon's elongation from the sun. The first or leading column is the moon's elongation from the sun or from the point of opposition, at the time of high water. The 2d is the minutes of time between the moon's southing and the place of high water. The marks + and - distinguish whether the high water is before or after the moon's southing. The 3d is the hour and minute of high water. The two remaining columns express the heights of the tides and their daily variations.

The tide is the height of high water above low water. This is the interesting circumstance in practice. Many circumstances render it almost impossible to say what is the elevation of high water above the natural surface of the ocean. In many places the surface at low water is above the natural surface of the ocean. This is the case in rivers at a great distance from their mouths. This may appear absurd, and is certainly very paradoxical; but a little attention to the motion of running waters will explain this completely. Whatever checks the motion of water in a canal must raise its surface. Water in a canal runs only in consequence of the declivity of this surface: Therefore a flood tide coming to the mouth of a river checks the current of its waters, and they accumulate at the mouth. This checks the current farther up, and therefore the waters accumulate there also; and this checking of the stream, and consequent rising of the waters, is gradually communicated up the river to a great distance. The water rises everywhere, though its surface still has a slope. In the mean time, the flood tide at the mouth passes by, and an ebb succeeds. This must accelerate even the ordinary course of the river. It will more remarkably accelerate the river now raised above its ordinary level, because the declivity at the mouth will be so much greater. Therefore the waters near the mouth, by accelerating, will sink in their channel, and increase the declivity of the canal beyond them. This will accelerate the waters beyond them; and thus a stream more rapid than ordinary will be produced along the whole river, and the waters will sink below their ordinary level. Thus there will be an ebb below the ordinary surface as well as a flood above it, however sloping that surface may be. Hence we cannot tell what is the natural surface of the ocean by any observations made in a river, even though near its mouth. Yet even in rivers we have regular tides, subjected to all the varieties deduced from this theory. But the geometrical construction of this problem not only explains all the interesting circumstances of the

tides, but also points them out, almost without employing the judgment, and exhibits to the eye the gradual progress of each phenomenon. But on these we cannot enlarge. On the whole, the solar force does not vary much, and may be retained as constant without any great error. But the change of the moon's force has great effects on the tides both as to their time and their quantity. I. As to their time. 1. The tide day following a spring tide is 24h. 27' when the moon is in perigee, but 24h. 33' when she is in apogee. (See APOGEE and PERIGEE.) 2. The tide day following neap tide is 25h. 15', and 25h. 40' in these two situations of the moon. 3. The greatest interval of time between high water and the moon's southing is 35' and 61'; the angle γ being $9^{\circ} 45'$ in the first case, and $15^{\circ} 15'$ in the second. II. As to their heights. 1. If the moon is in perigee when new or full, the spring tide will be 8 feet instead of 7, which corresponds to her mean distance. The very next spring tide happens when she is near her apogee, and will be 6 feet instead of 7. The neap tides happen when she is at her mean distance, and will therefore be 3 feet. But if the moon be at her mean distance when new or full, the two succeeding spring tides will be regular or 7 feet, and one of the neap tides will be 4 feet and the other only 2 feet.

(8.) TIDES, TABLES OF THE, WITH FARTHER REMARKS. Mr BERNOLLI gives the following table of the time of high water for the chief situations of the moon, viz. her perigee, mean distance, and apogee. It may be had by interpolation for all intermediate positions with as great accuracy as can be hoped for in phenomena which are subject to such a complication of disturbances. The first column contains the moon's elongation from the sun. The columns P, M, A, contain the minutes of time which elapse between the moon's southing and high water, according as she is in perigee, at her mean distance, or in apogee. The sign—indicates the priority, and + the posteriority, of high water to the moon's southing.

The reader will probably be making some comparison

parison in his own mind of the deductions from this theory with the actual state of things. He will find some considerable resemblances; but he will also find such great differences as will make him very doubtful of its justness. In very few places does the high water happen within $\frac{1}{4}$ th of an hour of the moon's southing, as the theory leads him to expect; and in no place whatever does the spring-tide fall on the day of new and full moon, nor the neap tide on the day of her quadrature. These always happens 2 or 3 days later. By comparing the difference of high water and the moon's southing in different places, he will hardly find any connecting principle. This shows evidently that the cause of this irregularity is local, and that the justness of the theory is not affected by it. By considering the phenomena in a navigable river, he will learn the real cause of the deviation. A flood tide arrives at the mouth of a river. The true theoretical tide differs in no respect from a wave. Suppose a spring tide actually formed on a fluid sphere, and the sun and moon then annihilated. The elevation must sink, pressing the under waters aside, and causing them to rise where they were depressed. The motion will not stop when the surface comes to a level; for the waters arrived at that position with a motion continually accelerated. They will therefore pass this position as a pendulum passes the perpendicular, and will rise as far on the other side, forming a high water where it was low water, and a low water where it was high water; and this would go on for ever, oscillating in a time which mathematicians can determine, if it were not for the viscosity, or something like friction, of the waters. If the sphere is not fluid to the centre, the motion of this wave will be different. The elevated waters cannot sink without diffusing themselves likewise, and occasioning a great horizontal motion, in order to fill up the hollow at the place of low water. This motion will be greatest about half way between the places of high and low water. The shallower we suppose the ocean the greater must this horizontal motion be. The resistance of the bottom (though perfectly smooth and even) will greatly retard all the way to the surface. Still, however, it will move till all be level, and will even move a little farther, and produce a small flood and ebb where the ebb and flood had been. Then a contrary motion will obtain; and after a few oscillations, which can be calculated, it will be insensible. If the bottom of the ocean (which we still suppose to cover the whole earth) be uneven, with long extended valleys running in various directions, and with elevations reaching near the surface, it is evident that this must occasion great irregularities in the motion of the undermost waters, both in respect of velocity and direction, and even occasion small inequalities on the surface, as we see in a river with a rugged bottom and rapid current. The deviations of the under currents will drag with them the contiguous incumbent waters, and thus occasion great superficial irregularities. Now a flood arriving at the mouth of a river, must act precisely as this great wave does. It must be propagated up the river (or along it, even though perfectly level) in a certain time, and we shall have high water at all the different places

in succession. This is distinctly seen in all rivers. It is high water at the mouth of the Thames at three o'clock, and later as we go up the river, till at London bridge we have not high water till three o'clock in the morning, at which time it is again high water at the Nore. But, in the mean time, there has been low water at the Nore, and high water about half way to London; and while the high water is proceeding to London, it is ebbing at this intermediate place, and is low water there when it is high water at London and at the Nore. Did the tide extend as far beyond London as London is from the Nore, we should have three high waters with two low waters interposed. The most remarkable instance of this kind is the Maragnon or Amazon river in S. America. It appears by the observations of Condamine and others, that between Para, at the mouth of the river, and the conflux of the Madera and Maragnon, there are 7 coexistent high waters, with six low waters between them. Nothing can more evidently show that the tides in these places are nothing but the propagation of a wave. The velocity of its superficial motion, and the distance to which it will insensibly go, must depend on many circumstances. A deep channel and gentle acclivity will allow it to proceed much farther up the river, and the distance between the successive summits will be greater than when the channel is shallow and steep. If we apply the ingenious theory of Chev. Buat, we may tell both the velocity of the motion and the interval of the successive high waters. It may be imitated in artificial canal, and experiments of this kind would be very instructive. We have said enough at present for our purpose of explaining the irregularity of the times of high water in different places, with respect to the moon's southing. But we now see clearly, that something of the same kind must happen in all great arms of the sea which are of an oblong shape, and communicate by one end with the open ocean. The general tide in this ocean must proceed along this channel, and the high water will happen on its shores in succession. This also is distinctly seen. The tide in the Atlantic ocean produces high water at new and full moon at a later and later hour along the S. coast of Great Britain, in proportion as we proceed from Scilly islands to Dover. In the same manner it is later and later as we come along the east coast from Orkney to Dover. Yet even in this progress there are considerable irregularities, owing to the sinuosities of the shores, deep indented bays, prominent capes, and extensive ridges and valleys in the channel. A similar progress is observed along the coasts of Spain and France, the tide advancing gradually from the south, turning round Cape Finisierre, running along the N. coast of Spain, and along the W. and N. coasts of France. The attentive consideration of these facts will not only satisfy us with respect to this difficulty, but will enable us to trace a principle of connection amidst all the irregularities that we observe. And if we note the difference between the time of high water of spring tide, as given by theory, for any place, and the *observed time* of high water, we shall find this interval to be very nearly constant through the whole series of tides during a lunation. Suppose

Suppose this interval to be 40 hours. We shall find every other phenomenon succeed after the same interval. And if we suppose the moon to be in the place where she was 40 hours before, the observation will agree pretty well with the theory, as to the succession of tides, the length of tide day, the retardations of the tides, and their gradual diminution from spring to neap tide. We say *pretty well*; for their still remain several small irregularities, different in different places, and not following any observable law. These are therefore local, and owing to local causes, as we shall point out. There is also a general deviation of the theory from the real series of tides. The neap tides, and those adjoining, happen a little earlier than the corrected theory points out. Thus at Brest (where more numerous and accurate observations have been made than at any other place in Europe), when the moon changes precisely at noon, it is high water at 3h. 28'. When the moon enters her 2d quarter at noon, it is high water at 8h. 40', instead of 9h. 48', which theory assigns. Something similar, and within a very few minutes equal to this, is observed in *every* place on the seacoast. This is therefore something general, and indicates a real defect in the theory. But this arises from the same cause with the other general deviation, viz. that the greatest and least tides do not happen on the days of full and half moon, but a certain time after. We shall attempt to explain this. We set out with the supposition, that the water acquired in an instant the elevation competent to its equilibrium. But this is not *true*. No motion is instantaneous, however great the force; and every motion and change of motion produced by a sensible or finite force increases from nothing to a sensible quantity by infinitely small degrees. Time elapses before the body can acquire any sensible velocity; and in order to acquire the same sensible velocity by the action of different forces acting similarly, a time must elapse inversely proportional to the force. An infinitely small force requires a finite time for communicating even an infinitely small velocity; and a finite force, in an infinitely small time, communicates only an infinitely small velocity; and if there be any kind of motion which changes by insensible degrees, it requires a finite force to prevent this change. Thus a bucket of water, hanging by a cord lapped round a light and easily moveable cylinder, will run down with a motion uniformly accelerated; but this motion will be prevented by hanging an equal bucket on the other side, so as to act with a finite force. This force prevents only infinitely small accelerations. It is therefore an *INFINITESIMAL* of the first order, and may be restored in an instant, or the continuation of the depression prevented by a certain finite force. The weight of the rope makes it hang in an oblong curve just as the force of the moon raises the waters of the ocean. Turn the rollers slowly, and the rope unwinding at one side, and winding up on the other side of the roller, will continue to form the same curve; but turn the roller the other way very briskly, and the rope will now hang in a curve considerably from the perpendicular; so that the force of gravity may in an instant undo the infinitely small elevation

produced by the turning. This phenomenon has puzzled many persons not unaccustomed to such discussions. But another view of this matter leads to the same conclusion. There can be no doubt that the interval between high and low water is not sufficient for producing all the accumulation necessary for equilibrium in an ocean so very shallow. The horizontal motion necessary for gathering together so much water along a shallow sea would be prodigious. Therefore it never attains its full height; and when the waters, already raised to a certain degree, have passed the situation immediately under the moon, they are still under the action of accumulating forces, although these forces are now diminished. They will continue rising, till they have so far passed the moon that their situation subjects them to depressing forces. If they have acquired this situation with an accelerated motion, they will rise still farther by their inherent motion, till the depressing forces have destroyed all their acceleration, and then they will begin to sink again. It is in this way that the nutation of the earth's axis produces the greatest inclination, not when the inclining forces are greatest, but three months after. (See *NUTATION*.) It is thus that the warmest time of the day is a considerable while after noon, and that the warmest season is considerably after midsummer. The warmth increases till the momentary waste of heat exceeds the momentary supply. Hence we conclude, that it may be demonstrated, that, in a sphere fluid to the centre, the time of high water cannot be less, and may be more, than three lunar hours after the moon's southing. As the depth of the ocean diminishes, this interval also diminishes. It is perhaps impossible to assign the distance at which the summit of the ocean may be kept while the earth turns round its axis. We can only see, that it must be less when the accumulating force is greater, and therefore less in spring tides than in neap tides; but the difference may be insensible. All this depends on circumstances which we are little acquainted with; many of these circumstances are local; and the situation of the summit of the ocean, with respect to the moon, may be different in different places. Nor have we been able to determine theoretically what will be the height of the summit. It will certainly be less than the height necessary for perfect equilibrium. The result of all this reasoning is, that we must always suppose the summit of the tide is at a certain distance *E.* of the place assigned by the theory. Mr Bernoulli concludes, from a very copious comparison of observations at different places, that the place of high water is about 20° to the eastward of the place assigned by the theory. Therefore the table formerly given will correspond with observation, if the leading column of the moon's elongation from the sun be altered accordingly. We insert it again in this place, with this alteration, and add three columns for the times of high water. Thus changed it will be of great use. We have now an explanation of the acceleration of the neap tides, which should happen 6 hours later than the spring tides. They are in fact tides corresponding to positions of the moon, which are 20° more, and not the real spring and neap tides.

These

There do not happen till two days after; and if the really greatest and least tides be observed, the least will be found 6 hours later than the first.

This table is general; and exhibits the times of high water, and their difference from those of the moon's south'g. in the open sea, free from all local obstructions. If therefore the time of high water in any place on the earth's equator (for we have hitherto considered no other) be different from this table (supposed correct), we must attribute the difference to the distinguishing circumstances of the situation. Thus every place on the equator should have high water on the day that the moon, situated at her mean distance, changes precisely at noon, at 2½ p. m. because the moon passes the meridian along with the sun by supposition. Therefore, to make use of this table, we must take the difference between the first number of the column, entitled time of high water, from the time of high water at full and change peculiar to any place, and add this to all the other numbers of that column. This adapts the table to the given place. Thus, to know the time of high water at *Leith* when the moon is 50° E. of the sun, at her mean distance from the earth, take 2½ from 4h. 30', there remains 4'08. Add this to 2h. 48', and we have 6h. 56' for the hour of high water. (The hour of high water at new and full moon for Edinburgh is marked 4h. 30' in Maskelyne's tables, but we do not pretend to give it as the exact determination. This would require a series of accurate observations.) It is by no means an easy matter to ascertain the time of high water with precision. It changes so very slowly, that we may easily mistake the exact minute. The best method is to have a pipe with a small hole near its bottom, and a float with a long graduated rod. The water gets in by the small hole, and raises the float, and the smallness of the hole prevents the sudden and irregular starts which waves would occasion. Instead of observing the moment of high water, observe the height of the rod a-

bout half an hour before, and wait after high water till the rod comes again to that height: take the middle between them. The water rises sensibly half an hour before the top of the tide, and quickly changes the height of the rod, so that we cannot make a great mistake in the time. Bernoulli has made a very careful comparison of the theory thus corrected, with the great collection of observations preserved in the *Depot de la Marine*, at Brest and Rochefort; (See *Cassini Mem. Acad. Paris*, 1734), and finds the coincidence very great, and far exceeded any rule which he had ever seen. Indeed we have no rules but what are purely empirical, or which suppose a uniform progression of the tides. The heights of the tides are much more affected by local circumstances than the regular series of their times. The regular spring tide should be to the neap tide in the same proportion in all places; but nothing is more different than this proportion. In some places the spring tide is not double the neap tide, and in other places it is more than quadruple. This prevented Bernoulli from attempting to fix the proportion by means of the height of the tides. Newton had, however, done it by the tides at Bristol, and made the lunar force almost five times greater than the solar force. But this was very ill-founded, for the reason now given. Yet Bernoulli saw, that in all places the tides gradually decreased by a similar law with the theoretical tides, and has given a very ingenious method of accommodating the theory to any tides which may be observed. The result cannot be far from the truth. The following table is calculated for the three chief distances of the moon from the earth.

Elong. of Moon.	Height of the Tide.		
	Moon in Perig.	Moon in M. D.	Moon in Apog.
0	0'99A + 0'15B	0'88A + 0'12B	0'79A + 0'08B
10	1'10A + 0'04B	0'97A + 0'03B	0'87A + 0'01B
20	1'14A + 0'00B	0'90A + 0'00B	0'90A + 0'00B
30	1'10A + 0'04B	0'97A + 0'03B	0'87A + 0'01B
40	0'99A + 0'15B	0'88A + 0'12B	0'79A + 0'08B
50	0'85A + 0'32B	0'75A + 0'25B	0'68A + 0'18B
60	0'67A + 0'53B	0'59A + 0'41B	0'53A + 0'29B
70	0'46A + 0'75B	0'41A + 0'59B	0'37A + 0'41B
80	0'28A + 0'96B	0'25A + 0'75B	0'23A + 0'53B
90	0'13A + 1'13B	0'12A + 0'88B	0'11A + 0'62B
100	0'03A + 1'24B	0'03A + 0'97B	0'03A + 0'87B
110	0'00A + 1'28B	0'00A + 1'00B	0'00A + 0'90B
120	0'03A + 1'24B	0'03A + 0'97B	0'03A + 0'87B
130	0'13A + 1'13B	0'12A + 0'88B	0'11A + 0'62B
140	0'28A + 0'96B	0'25A + 0'75B	0'23A + 0'53B
150	0'46A + 0'75B	0'41A + 0'59B	0'37A + 0'41B
160	0'67A + 0'53B	0'59A + 0'41B	0'53A + 0'29B
170	0'85A + 0'32B	0'75A + 0'25B	0'68A + 0'18B
180	0'99A + 0'15B	0'88A + 0'12B	0'79A + 0'08B

This table is corrected from the retardation arising from the inertia of the waters. Thus when the moon is 20° from the sun, the mean distance tide is 1'00A + 0'00B, which is the theoretical tide corresponding to conjunction or opposition.

(9.) TIDES, THEORY OF THE. We have now given

ven in sufficient detail the phenomena of the tides along the equator, when the sun and moon are both in the equator, shewing both their times and their magnitude. When we recollect that all the sections of an oblong spheroid by a plane passing through an equatorial diameter are ellipses, and that the compound tide is a combination of two such spheroids, we perceive that every section of it through the centre, and perpendicular to the plane in which the sun and moon are situated, is also an ellipse, whose shorter axis is the equatorial diameter of a spring tide. This is the greatest depression in all situations of the luminaries; and the points of greatest depression are the lower poles of every compound tide. When the luminaries are in the equator, these lower poles coincide with the poles of the earth. The equator, therefore, of every compound tide is also an ellipse; the whole circumference of which is lower than any other section of this tide, and gives the place of low water in every part of the earth. In like manner, the section through the 4 poles, upper and lower, gives the place of high water. These two sections are terrestrial meridians or hour circles, when the luminaries are in the equator. Hence it follows, that all that we have already said as to the times of high and low water may be applied to every place on the surface of the earth, when the sun and moon are in the equator. But the heights of tide will diminish as we recede from the equator. The heights must be reduced in the proportion of radius to the cosine of the latitude of the place. But in every other situation of the sun and moon all the circumstances vary exceedingly. It is true, that the determination of the elevation of the waters in any place whatever is equally easy. The difficulty is, to exhibit for that place a connected view of the whole tide, with the hours of flood and ebb, and the difference between high and low water. This is not indeed difficult; but the process by the ordinary rules of spherical trigonometry is tedious. When the sun and moon are not near conjunction or opposition, the shape of the ocean resembles a *turnip*, which is flat and not round in its broadest part. Before we can determine with precision the different phenomena in connection, we must ascertain the position or attitude of this turnip; making on the surface of the earth both its elliptical equators. One of these is the plane passing through the sun and moon, and the other is perpendicular to it, and marks the place of low water. And we must mark in like manner its first meridian, which passes through all the four poles, and marks on the surface of the earth the place of high water. The position of the greatest section of this compound spheroid is often much inclined to the earth's equator; nay, sometimes is at right angles to it when the moon has the same right ascension with the sun, but a different declination. In these cases the ebb tide on the equator is the greatest possible; for the lower poles of the compound spheroid are in the equator. Such situations occasion a very complicated calculus. We must therefore content ourselves with a good approximation. And first, with respect to the times of high water. It will be sufficient to conceive the sun and moon as always in one plane, viz. the ecliptic. The ex-

bits of the sun and moon are never more inclined than $5\frac{1}{2}$ degrees. This will make very little difference; for when the luminaries are so situated that the great circle through them is much inclined to the equator, they are then very near to each other, and the form of the spheroid is little different from what it would be if they were really in conjunction or opposition. It will therefore be sufficient to consider the moon in three different situations. 1. In the equator. The point of highest water is never farther from the moon than 15° , when she is in apogee and the sun in perigee. Therefore, to have the time of high water, multiply the numbers of the columns which express the difference of high water and the moon's southing by $28\frac{1}{2}$, and the products give the real difference. It is more difficult to find the time of low water; and we must either go through the whole trigonometrical process or content ourselves with a less perfect approximation. The trigonometrical process is not indeed difficult. But it will be abundantly exact to consider the tide as accompanying the moon only. Hence the two tides of one lunar day may be considerably different and it is proper to distinguish them by different names, as a *superior tide* which happens when the moon is above the horizon during high water, and the *inferior tide*. From this construction we may learn in general, 1. When the moon has no declination, the durations and also the heights of the superior and inferior tides are equal in all parts of the world. 2. When the moon has declination, the duration and also the height of a superior tide at any place is greater than that of the inferior; or is less than it, according as the moon's declination and the latitude of the place are of the same or opposite names. This is a very important circumstance. It frequently happens that the inferior tide is found the greatest when it should be the least; which is particularly the case at the Nore. This shows, without further reasoning that the tide at the Nore is only a branch of the regular tide. The regular tide comes in between Scotland and the continent; and after travelling along the coast, reaches the Thames, while the regular tide is just coming in again between Scotland and the continent. 3. If the moon's declination is equal to the colatitude of the place, or exceeds it, there will be only one tide in a lunar day. It will be a superior or an inferior tide, according as the declination of the moon and the latitude of the place are of the same or opposite kinds. Thus the difference of the durations of the superior and inferior tides of the same day increase both with the moon's declination and with the latitude of the place. The heights of the tides are affected no less remarkably by the different situations of the moon, and of the place of observation. Therefore at high water, which by the theory is in the place directly under the moon, the height of the tide is as the square of the cosine of the moon's zenith or nadir distance. Hence we derive a construction which solves all questions relating to the height of the tides with great facility, free from all the intricacy and ambiguities of the algebraic analysis employed by Bernoulli. 1. The greatest tides happen when the moon is in the zenith or nadir of the place of observation. 2. When the

MOON

moon is in the equator, the superior and inferior tides have equal height. 3. If the place of observation is in the equator, the inferior and superior tides are again equal, whatever is the moon's declination. 4. The superior tides are greater or less than the inferior tides according as the latitude and declination are of the same or of opposite names. 5. If the colatitude be equal to the declination, or less than it, there will be no inferior tide, or no superior tide, according as the latitude of the place, and declination of the moon, are of the same or opposite names; and the low water of its only tide is the summit of the inferior tide. 6. At the pole there is no daily tide; but there are two monthly tides, and it is low water when the moon is in the equator. *N. B.* The moon's declination never exceeds 30° . Therefore $\cos. 2 MQ$ is always a positive quantity, and never less than $\frac{1}{2}$, which is the cosine of 60° . While the latitude is less than 45° , $\cos. 2 \text{ lat.}$ is also a positive quantity. When it is precisely 45° the cosine of its double is 0; and when it is greater than 45° , the cosine of its double is negative. Hence we see, 1. That the medium tides are equally affected by the northern and southern declinations of the moon. 2. If the latitude of the place is 45° , the medium tide is always $\frac{1}{2} M$. This is the reason why the tides along the coasts of France and Spain are so little affected by the declination of the moon. 3. If the latitude is less than 45° , the mean tides increase as the moon's declination diminishes. All that we have now said may be said of the solar tide. Also the same things hold true of spring tides. But to ascertain the effects of declination and latitude on other tides, we must make a much more complicated construction, even though we suppose both luminaries in the ecliptic. For in this case the two depressed poles of the watery spheroid are not in the poles of the earth; and therefore the sections of the ocean, made by meridians, are by no means ellipses. The inaccuracies are not so great in intermediate tides, and respect chiefly the time of high water and the height of low water. The exact computation is very tedious and peculiar, so that it is hardly possible to give any account of a regular progress of phenomena; and all we can do is, to ascertain the precise heights of detached points. For which reasons, we must content ourselves with the construction already given. It is the exact geometrical expression of Bernoulli's analysis, and its consequences now related contain all that he has investigated. Thus have we obtained a general, though not very accurate view of the phenomena which must take place in different latitudes and in different declinations of the sun and moon, provided that the physical theory which determines the form and position of the watery spheroid be just. We have only to compute, by a very simple process of spherical trigonometry, the place of the pole of this spheroid. If we were to compare this theory with observation, without farther consideration, we should still find it unfavourable, partly in respect of the heights of the tides, and more remarkably in respect of the time of low water. We must again consider the effects of the inertia of the waters, and recollect, that a regular theoretical tide dif-

fers very little in its progress from the motion of a wave. Even along the free ocean, its motion much resembles that of any other wave. All waves are propagated by an oscillatory motion of the waters, precisely similar to that of a pendulum. It is well known, that if a pendulum receive a small impulse in the time of every descent, its vibrations may be increased to infinity. Did the successive actions of the sun or moon just keep time with the natural propagation of the tides, or the natural oscillations of the waters, the tides would also augment to infinity; but there is an infinite odds against this exact adjustment. It is much more probable that the action of to-day interrupts or checks the oscillation produced by yesterday's action, and that the motion which we perceive in this day's tide is what remains and is compounded with the action of to-day. This being the case, we should expect that the nature of any tide will depend much on the nature of the preceding tide. Therefore we should expect that the superior and inferior tides of the same day will be more nearly equal than the theory determines. The whole course of observation confirms this. In latitude 45° , the superior and inferior tides of one day may differ in the proportion of $2\frac{1}{2}$ to 1, and the tides corresponding to the greatest and least declinations of the moon may differ nearly as much. But the difference of superior and inferior tides, as they occur in the list of Observations at Rochefort, is not the third part of this, and the changes made by the moon's declination is not above one half. Therefore we shall come much nearer the true measure of a spring tide, by taking the arithmetical mean, than by taking either the superior or inferior. We should expect less deviation from the theory in the gradual diminution of the tides from spring tide to neap tide, and in the gradual changes of the medium tide by the declination of the moon; because the successive changes are very small; and when they change in time, that is, diminish after having for some time augmented, the change is by insensible degrees. This is most accurately confirmed by observation. The vast collection made by Cassini of the observations at Brest being examined by Bernoulli, and the medium of the two tides in one day being taken for the tide of that day, he found a considerable agreement between them. He found no less agreement in the changes of the medium tides by the moon's declination. In like manner, the changes produced by the different distances of the moon from the earth, were found abundantly conformable to the theory, although not so exact as the other. This difference or inferiority is easily accounted for: When the moon changes in her mean distance, one of the neap tides is uncommonly small, and therefore the successive diminutions are very great, and one tide sensibly affects another. The same circumstance operates when the changes in apogee, by reason of a very large spring tide. And the changes corresponding both to the sun's distance from the earth and his declination agreed almost exactly. All these things considered together, we have abundant reason to conclude, that not only the theory itself is just in principle (which no intelligent naturalist can doubt), but also that

on the data which are assumed in the application are properly chosen; that is, that the proportion of 2 to 5 is very nearly the true proportion of the mean solar and lunar forces. If we now compute the medium tide for any place in succession, from spring tide to neap tide, and still more, if we compute the series of times of their occurrence, we shall find as great an agreement as can be desired. Not but that there are many irregularities; but these are evidently so anomalous, that we can ascribe them to nothing but circumstances which are purely local. We have been considering the tides of an ocean completely to cover the earth. How may these be determined which happen in a small and confined sea, such as the CASPIAN or the BLACK SEA? The determination in this case is very simple. As no supply of water is supposed to come into the basin, it is susceptible of a tide only by sinking at one end and rising at the other. It is evident that there will be high water, or the greatest possible rise when the basin comes to that position where the tangent is most of all inclined to the diameter, and therefore three lunar hours after the moon's southing; at the same time it will be low water at the other end. It is plain that the rise and fall must be exceedingly small, and that there will be no change in the middle. The tides of this kind in the Caspian Sea, in latitude 45° , whose extent in longitude does not exceed 8° , are not above 7 inches; a quantity so small, that a slight breeze of wind is sufficient to check it, and even to produce a rise of the waters in the opposite direction. We have not learnt that tides have been observed in this sea.

(10.) **TIDES, VARIETY OF, IN DIFFERENT SEAS.** The tide should be much greater, though still very small, in the MEDITERRANEAN SEA. Accordingly, tides are observed there, but still more remarkably in the ADRIATIC. We do not know that tides have been observed in the great lakes of North America. These tides, though small, should be very regular. It would be low water on one side of the shore x when it is high water on the other side of this partition. If the tides in the EUXINE and CASPIAN Seas, or in the AMERICAN LAKES which are near each other, could be observed, this phenomenon should appear, and would be one of the prettiest examples of universal gravitation that can be conceived. Something like it is to be seen at GIBRALTAR. It is high water on the E. side of the rock about 10 o'clock at full and change, and it is high water on the W. side, not a mile distant, at 12. This difference is perhaps the chief cause of the singular current which is observed in the mouth of the Straits. There are 3 currents observed at the same time, which change their directions every 12 hours. The small tide of the Mediterranean proceeds along the Barbary shore, which is very uniform all the way from Egypt, with tolerable regularity. But along the N. side, where it is greatly obstructed by Italy, the islands, and the E. coast of Spain, it sets very irregularly; and the perceptible high water on the Spanish coast differs 4 hours from that on the S. coast. Thus one tide ranges round EUROPA POINT, and another along the shore near Ceuta, and there is a third current

in the middle, different from both. Its general direction is from the Atlantic Ocean into the Mediterranean Sea, but it sometimes comes out when the ebb tide in the ATLANTIC is considerable. Suppose the moon over the middle of the Mediterranean. The surface of the sea will be level, and it will be half tides at both ends, and therefore within the Straits of Gibraltar. But without the Straits it is within half an hour of high water. Therefore there will be a current setting in from the Atlantic. About 3 and an half hours after, it is high water within, and half ebb without. The current now sets out from the Mediterranean: 3 hours later, it is low water without the Straits and half ebb within; therefore the current has been setting out all this time: 3 hours later, it is half flood without the Straits and low water within, and the current is again setting in, &c. Were the earth fluid to the centre, the only sensible motion of the waters would be up and down, like the waves on the open ocean, which are not brushed along by strong gales. But the shallowness of the channel makes a horizontal motion necessary, that water may be supplied to form the accumulation of the tide. When this is formed on a flat shelving coast, the water must flow in and out, on the flat and sands, while it rises and falls. These horizontal motions must be greatly modified by the channel or bed along which they move. When the channel contracts along the line of flowing water, the wave, as it moves up the channel, and is checked by the narrowing shores, must be reflected back, and keep a top of the waters still flowing in underneath. Thus it may rise higher in these narrow seas than in the open ocean. This may serve to explain a little the great tides which happen on some coasts, such as the coast of Normandy. At ST MALO the flood frequently rises 50 feet. But we cannot give any thing like a full or satisfactory account of these singularities. In the Bay of FUNDY, and particularly at ANNAPOLIS ROYAL, the water sometimes rises above 100 feet. This seems quite inexplicable by any force of the sun and moon, which cannot raise the waters of the free ocean more than eight feet. These great floods are unquestionably owing to the proper timing of certain oscillations or currents adjoining, by which they unite, and form one of great force. Such violent motions of water are often seen on a small scale in the motions of brooks and rivers; but we are too little acquainted with hydraulics to explain them with any precision. We have seen that there is an oscillation of waters formed under the sun and moon, (See OSCILLATION); and that in consequence of the rotation of the earth, (See ROTATION), the inertia and the want of perfect fluidity of the waters, and obstructions in the channel, this accumulation never reaches the place where it would finally settle if the earth did not turn round its axis. The consequence of this must be a general current of the waters from E. to W. This may be seen in another way. The moon in her orbit round the earth has her gravity to the earth diminished by the sun's disturbing force, and therefore moves in an orbit less incurvated than she should describe independent of the

sun's action. She therefore employs a longer time. If the moon were so near the earth as almost to touch it, the same thing would happen. Therefore, suppose the moon turning round the earth, almost in contact with the equator, with her natural undisturbed periodic time, and that the earth is revolving round its axis in the same time, the moon would remain continually above the same spot of the earth's surface (suppose the city of Quito), and a spectator in another planet would see the moon always covering the same spot. Now let the sun act. This will not affect the rotation of the earth, because the action on one part is exactly balanced by the action on another. But it will affect the moon. It will move slower round the earth's centre, and at a greater distance. It will be left behind by the city of Quito, which it formerly covered. And as the earth moves round from W. to E. the moon, moving more slowly, will have a motion to the W. with respect to Quito. In like manner, every particle of water has its gravity diminished, and its diurnal motion retarded; and hence arises a general motion or current from E. to W. This is very distinctly perceived in the ATLANTIC and PACIFIC OCEANS. It comes round the Cape of Good Hope, ranges along the coast of Africa, and then sets directly over to America, where it meets a similar stream which comes in by the N. of Europe. Meeting the shores of America, it is deflected both to the S. along the coast of Brazil, and to the N. along the N. American shores, where it forms what is called the GULF STREAM, (See AMERICA, § 6, and MEXICO, § IV.) because it comes from the Gulf of Mexico. This motion is indeed very slow, this being sufficient for the accumulation of 7 or 8 feet on the deep ocean; but it is not altogether insensible. We may expect differences in the appearances on the W. shores of Europe and Africa, and on the W. coast of America, from the appearances on the E. coasts of America and of Asia; for the general current obstructs the waters from the W. shores, and sends them to the E. shores. Also when we compare the wide opening of the N. extremity of the Atlantic Ocean with the narrow opening between Kamtschatka and America, we should expect differences between the appearances on the W. coasts of Europe and of America. The observations made during the circumnavigations of Captain Cook and others show a remarkable difference. (See COOK, N° III.) All along the W. coast of N. America the inferior tide is very trifling, and often is not perceived. In the very same manner, the disturbing forces of the sun and moon form a tide in the fluid air which surrounds this globe, consisting of an elevation and depression, which move gradually from E. to W. Neither does this tide ever attain that position with respect to the disturbing planets which it would do were the earth at rest on its axis. Hence arises a motion of the whole air from E. to W. and this is the principal cause of the TRADE WINDS. They are a little accelerated by being heated, and therefore expanding. They expand more to the W. than to the E. because the air expands on that side into air which is now cooling and contracting. These winds very evidently follow the sun's motion, tend-

ing more to the S. or N. as he goes S. or N. Were this motion considerably affected by the expansion of heated air, we should find the air rather coming northward and southward from the torrid zone, in consequence of its expansion in that climate. We repeat it, it is almost solely produced by the aerial tide, and is necessary for the very formation of this tide. We cannot perceive the accumulation. It cannot affect the barometer, as many think, because, though the air becomes deeper, it becomes deeper only because it is made lighter by the gravitation of the sun. Instead of pressing more on the cistern of the barometer, we imagine, that it presses less; because like the ocean, it never attains the height to which it tends. It remains always too low for *equilibrium*, and therefore it should press with less force on the cistern of a barometer. There is an appearance precisely similar to this in the planet JUPITER. He is surrounded by an atmosphere which is arranged in zones or belts, probably owing to climate differences of the different latitudes, by which each seems to have a different kind of sky. Something like this will appear to a spectator in the moon looking at this earth. The general weather and appearance of the sky is considerably different in the torrid and temperate zones. Jupiter's belts are not of a constant shape and colour; but there often appear large spots and tracts of clouds, which retain their shape during several revolutions of Jupiter round his axis. To judge of his rotation by one of these, we should say that he turns round to 955. There is also a brighter spot which is frequently seen, occupying one certain situation on the body of Jupiter. This is surely adherent to his body, and is either a bright coloured country, or perhaps a tract of clouds hovering over some volcano. This spot turns round in 951½. And thus there is a general current in his atmosphere from E. to W. Both the motion of the air and of the water tend to diminish the rotation of the earth round its axis; for they move slower than the earth, because they are retarded by the luminaries. They must communicate this retardation to the earth, and must take from it a quantity of motion precisely equal to what they want, in order to make up the equilibrated tide. In all probability this retardation is compensated by other causes; for no retardation can be observed. This would have altered the length of the year since the time of Hipparchus, giving it a smaller number of days. We see causes of compensation. The continual washing down of soil from the elevated parts of the earth must produce this effect, by communicating to the valley on which it is brought to rest the excess of diurnal velocity which it had on the mountain top.

(II.) TIDES, WHIMSICAL AND ABSURD THEORY OF. Mr *Saint Pierre*, in his *Studies of Nature* scorns the Newtonian theory of the tides, as erroneous in principle, and as quite insufficient for explaining the phenomena; and he ascribes all phenomena of the tides to the liquefaction of the ices and snows of the circumpolar regions, and the greater length of the polar than of the equatorial axis of the earth. The argument which he employs to prove that the earth is a *prolate spheroid*

spheroid, is a direct demonstration of the truth of the *contrary opinion*; and the melting of the ice and snows at the poles cannot produce the smallest motion in the waters. Were there even 10 times more ice and snow floating on the northern sea than there is, and were it all to melt in one minute, there would be no *flux* from it; for it would only fill up the space which it formerly occupied in the water. Of this any person may be convinced, who shall put a handful of snow squeezed hard into a jar of water, and note the exact height of the water. Let the snow melt, and he will find the water of the same height as before.

(1.) * *To TIDE*. *v. a.* [from the noun.] To drive with the stream.—

Their images, the relics of the wreck,
Torn from the naked pap, are *tided* back.

Dryden.

(2.) * *To TIDE*. *v. n.* To pour a flood; to be agitated by the tide.—

Sent them, rolling, to the *tiding* Humber.

Philips.

* *TIDEGATE*. *n. s.* [*tide* and *gate*.] A gate thro' which the tide passes into a basin. *Bailey.*

TIDEMAN, Philip, an eminent painter born at Hamburg, in 1657. He studied under Laireff, and painted subjects of allegory and fabulous history with great propriety. He died in 1705.

* *TIDESMAN*. *n. s.* [*tide* and *man*.] A tide-waiter or custom-house officer, who watches on board of merchant ships till the duty of goods be paid, and the ships unloaded. *Bailey.*

TIDESWALL, or } a town of England, in Der-
TIDESWELL, } byshire, so named from a well that ebbs and flows like the *tide*. It has a handsome church and a free school, with a market on Wednesday. It lies 22 or 23 miles NNW. of Derby, and 158 N. of London. Lon. 1. 46. W. Lat. 53. 15. N.

TIDEWA, a town of Sweden, in W. Gothland, 62 miles NE. of Uddevalla.

(1.) * *TIDE-WAITER*. *n. s.* [*tide* and *wait*.] An officer who watches the landing of goods at the customhouse.—Nothing left for Irishmen but vicarages and *tide-waiters* places. *Swift.*

(2.) * *TIDE-WAITERS*, or *TIDESMEN*, are inferior officers of the customhouse, who attend upon ships until the customs be paid; so named from their returning with the *tide*.

TIDEY, or } a river of England, in Cornwall,
TIDI, } which runs past St Germans, and falls into the Hamoaze, near Saltaft.

* *TIDILY*. *adv.* [from *tidy*.] Neatly; readily.

* *TIDINESS*. *n. s.* [from *tidy*.] Neatness; cleanliness.

* *TIDINGS*. *n. s.* [*tidan*, Saxon, to happen, to beise; *tidende*, Islandick.] News; an account of something that has happened; incidents related.—

Saw the signs that deadly *tidings* spake.

Spenser.

—I shall make my master glad with these *tidings*.
Shak.

The *tidings* brought from heav'n. *Milton.*

What *tidings* dost thou bring? *Addison.*

—The messenger of these glad *tidings* was the eternal Son of his bosom. *Rogers.*

TIDLA, a river of Sweden, in W. Gothland, which runs into Lake Wenner, near Marlefstadt.

TIDORE, or } an island of Asia, in the Indian
TIDORE, } Ocean, one of the *MOLUCCAS*: E. of Gilola, and S. of Ternate. It is 17 miles in circumference, and the air is salubrious. It is strong by nature, being surrounded with rocks and thick woods. It is 30 miles in circumference, and abounds in cloves and other spices. *TADURA* is the capital. Lon. 126. 2. E. Lat. 1. 6. N.

* *TIDY*. *adj.* [*tidt*, Islandick.] 1. Seasonable.—
If weather be laire and *tidie*. *Tusser.*

2. Neat; ready.—

Before my eyes will trip the *tidy* lads. *Gay.*

3. It seems to be here put by mistake or irony for *untidy*.—Thou whorefon *tidy* Bartholomew bear-pig. *Shak.*

* *TIE*. *n. s.* [from the verb.] 1. Knot; fastening. 2. Bond; obligation.—The rebels cast away the lesser *tie* of respect. *Bacon.*

Vows, oaths, and contracts, they devise,
And tell us they are sacred *ties*. *Waller.*

3. A knot of hair.—

The well swoln *ties* an equal homage claim.

Tourg.

* *To TIE*. *v. a.* [*tian*, *tigan*, Sax.] 1. To bind; to fasten with a knot.—*Tie* the line to the cart. 1 Sam. vi. 7.—Thousands of men and women, *tied* together in chains. *Knolles*. 2. To knit; to complicate.—We do not tie this knot with an intention to puzzle the argument; but the harder it is *tied*, we shall feel the pleasure more sensibly when we come to loose it. *Burnet*. 3. To hold; to fasten; to join so as not easily to be parted.—

In bond of virtuous love together *tied* *Fairf*.
—The intermediate ideas *tie* the extremes firmly together. *Locke*.—The whole chain that *ties* them to first self-evident principles. *Locke*. 4. To hinder; to obstruct: with *up* intensive.—

Death that hath ta'en her hence to make me
wait,

Ties up my tongue. *Shak.*

You have my promise, and my hasty word
Refrains my tongue, but *ties* not up my sword.

Waller.

—Honour and good-nature may *tie up* his hands.

Addison. 5. To oblige; to constrain; to refrain; to confine.—It shall not be preferred as a thing wherunto they will *tie* their masters. *Hocker*.—

He'll not feel wrongs

Which *tie* him to an answer. *Shak.*

—Cannot he *tie* us to perform them to him? *Stillingfleet*.—They *tie* themselves strictly to unity of place. *Dryden*.—

Not *tied* to rules of policy. *Dryden.*

—No one seems less *tied up* to a form of words. *Locke*.—The mind should, by several rules, be *tied* down to this. *Locke*.—They are ever *tied* down to the present moment. *Atterbury*.—A healthy man ought not to *tie* himself up to strict rules. *Arbutnot*. 6. It may be observed of *tie*, that it has often the particles *up* and *down* joined to it, which are, for the most part, little more than emphatical, and which, when united with this word, have, at least consequentially, the same meaning.

TIEBAS, a town of Spain, in Navarre, 5 miles SE. of Pampeluna.

TIEL, a strong town of Holland, in the department

B b b 2

partment of the Rhine, and ci-devant province of Dutch Guelderland, and late district of Lower Betau. It is seated on the Wahal, which descends it on one side, and the other is surrounded by a marsh; 17 miles W. of Nimeguen, and 38 NE. of Bois-le-duc. Lon. 5. 16. E. Lat. 51. 36. N.

TIELERWERT, an island of Holland, in the Wahal, and in the dep. of the Rhine.

(1.) **TIELLEN**, a sea port town and harbour of Ireland, on the N. side of Donegal Bay, 7 miles ESE. of Tiellen head.

(2.) **TIELLEN HEAD**, a cape of Ireland, on the N. side of the entrance into Donegal Bay, and on the SW. extremity of that county, 25 miles W. of Donegal. Lon. 8. 25. W. Lat. 54. 40. N.

TIEM, a town of Asia, in the kingdom of Laos, on the Mecon, 90 miles SSE. of Lantchan.

(1.) **TIEN**, a town of Ana, in Corea.

(2, 3.) **TIEN**, 2 towns of China, of the 2d rank: 1. in Quang-fi, on the N. bank of the Pofoi, 120 miles SSW. of Pekin: 2. in Quang-tong, 960 miles S. of Pekin. Lon. 129. 35. E. Ferro. Lat. 24. 50. N.

TIEN-CHIN, a large and handsome town of China, in Pekin, seated on the Chang, with a strong fort and good harbour.

TIEND. *n. s.* in Scots law. See **TEIND**.

TIENGEN, a town of Germany, in Suabia, late capital of a ci-devant lordship so named, 29 miles E. of Bafil, and 36 W. of Constance. In 1499, it was burnt by the Swifs. Lon. 25. 54. E. Ferro. Lat. 47. 40. N.

TIENHO, a town of China, of the 3d rank, in Quang-fi.

TIENHOVEN, 2 towns of Holland: 1. in the department of Delft, and late province of S. Holland, 6 miles E. of Schoonhoven: 2. in the department of the Rhine, and late province of Utrecht, $\frac{7}{8}$ miles N. of Utrecht.

TIEN-KIONG, a town of China, in Se-tchuen.

TIEN-KOU, a town of China, of the 3d rank, in the prov. of Quang fi, 20 miles N. of King-yuen.

TIEN-PE, a town of China, in Canton, of the 3d rank.

TIEN-SUNG, a mountain of China, in the prov. of Yun-nan, famous for its beautiful marble. See **TALI**.

TIEN TONG, a town of Asia, in Siam, 350 miles SSW. of Juthia.

TIEN-TSANG, a town of Thibet, 268 miles SSE. of Hami.

TIEN-TSIN-OUEI, a city of China, of the 2d rank, in Pe-tcheli, 63 miles SE. of Pekin.

(1.) * **TIER**. *n. s.* [*tiere, teirie*, old Fr. *tuyer*. Dutch.] A row; a rank.—Fornovius discharged a tier of great ordnance amongst the thickest of them. *Knolles*.

(2.) **TIER**. See **COILING**.

TIERACHE, a ci-devant province of France, the most western division of PICARDY.

(1.) * **TIERCE**. *n. s.* [*tiers, tiercier*, Fr.] A vessel holding the third part of a pipe.—

Go now deny his tierce.

Ben Jonson.

Wit, like tierce claret.

Dorset.

(2.) **TIERCE**, or **TEIRCE**, is a measure of liquid things, as wine, oil, &c. containing 42 gallons.

(3.) **TIERCE**, in geography, a town of France, in the dep. of Maine and Loire; 4 miles S. of Chateaufort, and 9 NNW. of Angers.

TIERCED. *adj.* in heraldry, denotes the shield to be divided by any part of the partition lines: as party, coupé, tranchy, or tally, into three equal parts of different colours or metals.

* **TIERCET**. *n. s.* [from *tiers*, Fr.] A triplet; three lines.

TIERKELLY, a town of Ireland, in Down, Ulster; 2 miles NE. of Rathfriland; with a mineral well.

TIERPIED, a town of France, in the dep. of the Channel; 3 miles E. of Avranches, and 12 WNW. of Mortain.

(1.) **TIERRA**. [Span. from *terra*, Lat.] EARTH. See **TERRA** and **TERRE**, &c.

(2.) **TIERRA DEL ESPIRITU SANTO**, the largest and most western of the NEW HEBRIDES Islands, in the S. Pacific Ocean. (See **ESPIRITU**, N° 3; and **HEBRIDES**, N° 2.) It is 120 miles in circumference; is very high and mountainous; yet it is fertile, and, except the cliffs and rocks, abounds with plantations of trees, fruits, &c. Lon. 165. 0. E. Lat. 16. 0. S.

(3.) **TIERRA DEL FUEGO**, one or several islands at the S. extremity of America; so named from a volcano on the largest of them. (See **FUEGO**, N° 2.) They are barren and mountainous.

TIESSA, a river of Laconia, running into the Eurotus. *Paus.* iii. c. 18.

TIESSERBACH, a river of Suabia, which runs into the Neckar, near Nuttingen, in Wirtemberg.

TIETAR, a river of Spain, which runs into the Tajo, near Talavan, in Estremadura.

TIETCHOU, a town of Asia, in Kokonor, 688 miles SE. of Hami.

TIFATA, a mountain of Italy, in Campania, near Capua. *Stat. Sylv.* 4.

TIFER, a town of Süria, 3 miles S. of Cilley.

TIFERNUM, 3 ancient towns of Italy: 1. called also *Metaurense*, near the Metaurus, in Umbria: 2. called *Samniticum*, in the country of the Samnites: and 3. called *Tiberinum*, seated on the Tiber. *Liv.* x. c. 14. *Plin.* iii. 14.

TIFERNUS, a mountain and river of Italy, in the country of the ancient Samnites. *Liv.* x. c. 30. *Mela*, ii. c. 4.

TIFESULT, a town of Fez, 12 miles NE. of Saltee.

* **TIFF**. *n. s.* [A low word, I suppose without etymology.] 1. Liquor; drink.—

With icanty offals, and small acid tiff. *Poet.*

2. A fit of peevishness or fullness; a pet.

* **To TIFF**. *v. n.* To be in a pet; to quarrel. A low word.

* **TIFFANY**. *n. s.* [*tiffet*, to dress up, old Fr. *Skinner*.] Very thin silk.—The smock of sulphur will not black a paper, and is commonly used by women to whiten *tiffanies*. *Brown*.

TIFFAUGES, a town of France, in the dep. of the Vendée; 6 miles W. of Mortagne, and 9 E. of Montaigu.

TIFESH, a town of Algiers, 40 miles S. of Bona; anciently called *Theweste*.

TIFFLIS. See **TEFFLIS**.

TIGA, and } two islands in the E. Indian Sea,
TIGAON, } near the NNW. coast of Borneo: the

the first in Lon. 130. E. Ferro. Lat. 6. 25. N. the latter in Lon. 128. 42. E. Lon. Lat. 6. 10. N.

* **TIGE**. *n. f.* [in architecture.] The shaft of a column from the atragal to the capital. *Bailey.*

TIGELLINUS, a Roman courtier, infamous for his intrigues at the court of Nero, who promoted him to the highest honours; but being at last detected in a conspiracy against Nero, he was ordered to kill himself, A. D. 68. *Tac. Hist. i. 72.*

TIGELLIUS, a Sardinian, who became a favourite of J. Cæsar, Anthony, and Cleopatra, by his buffoonery, mimicry, and fine voice; but Horace represents him as a despicable character. *1 Sat. ii. 3, &c.*

(1.) * **TIGER**. *n. f.* [*tigre*, Fr. *tigris*, Latin.] A fierce beast of the leonine kind.—

Then imitate the action of the *tiger*. *Shak.*

The arm'd rhinoceros, or Hyrcanian *tiger*. *Shak.*

The steer,

At whose strong chest the deadly *tiger* hangs.

Thomson.

(2.) **TIGER**, in zoology. See **FELIS**, N° XXVII.

(3.) **TIGER**, AMERICAN. See **FELIS**, N° XXII.

(4.—6.) **TIGER CAT**. See **FELIS**, N° I, II, and XXI.

(7.) **TIGER WOLF**, the name by which the hyæna is called at the Cape of Good Hope. See **HYÆNA**.

* **TIGHT**. *adj.* [*dicht*, Dutch.] 1. Tenise; close; not loose.—If the pikes fill them not very *tight*. *Moxon*.—This running knot holds too *tight*. *John Bull*.—Every joint was well grooved; which kept my closet too *tight* that very little water came in. *Swift*. 2. Free from fluttering rags; less than neat.—

A *tight* maid.

Dryden.

—The girl was a *tight* clever wench. *Arbutnot*.—

I'll spin and card, and keep our children *tight*.

Gay.

Rather *tight* than great:

Swift.

* **TO TIGHTEN**. *v. a.* [from *tight*.] To straiten; to make close.

* **TIGHTER**. *n. f.* [from *tighten*.] A ribband or string by which women straiten their clothes.

* **TIGHTLY**. *adv.* [from *tight*.] 1. Closely; not loosely. 2. Neatly; not idly.—

Sirrah, bear you these letters *tightly*. *Shak.*

—*Tightly*, I say, go *tightly* to your business. *Dryd.*

* **TIGHTNESS**. *n. f.* [from *tight*.] 1. Closeness; not looseness.—The firmness and *tightness* of their union. *Woodward*. 2. Neatness.

TIGILSKOI, a town of Russia, in Kamtschatka; 80 miles W. of Ukinskoi. Lon. 175. 30. E. Ferro. Lat. 57. 20. N.

TIGLATH-PILESER, king of Assyria. See **ASSYRIA**, § 2.

TIGNALE, a town of Corsica; 30 miles SE. of Corte.

TIGNES, a town of the French empire, in the dep. of Mont Blanc, and ci-devant duchy of Savoy, and late prov. of Tarentaise; 3 miles SE. of St Maurice.

TIGRAMMANES, an ancient name of the Phrygians. See **PHYRGIA**, N° I.

(1.) **TIGRANES**, I. a famous king of Armenia, who conquered CAPPADOCIA and SYRIA; and

reigned for some years in prosperity; but having afterwards married Cleopatra, a daughter of MITHRIDATES VII. king of Pontus, he joined him against the Romans, and beheaded a Roman ambassador; but was soon after obliged to fly from his dominions, by Lucullus, who pursued and defeated him near Mount Taurus. He was afterwards defeated by Pompey, who, however, allowed him to retain Armenia, Syria, and some other parts of his dominions, for a bribe of 60,000 talents. He died in Armenia.

(2.) **TIGRANES II.** a son of the preceding, revolted against his father, and fled to the Romans, who made him king of Sophene; but having afterwards insulted Pompey, he was sent in chains to Rome where he died.

(3.—6.) **TIGRANES** was the name of other four kings of the same family: 1. Of Armenia, put to death by Tiberius: 2. Another made by king Tiberius: 3. Another promoted by Nero: and, 4. The last flourished in the reign of Theodosius the Great.

TIGRANOCERTA, the capital of ancient Armenia, built by Tigranes I. during the Mithridatic war, on a hill between the sources of the TIGRIS and mount Taurus. Lucullus took it, not without difficulty; but found immense riches in it; particularly 8000 talents in money. *Tac. Ann. v. 15. c. 4.* It is now called *Sered* by the Arabs, but *Sultania* by the Turks and other Europeans. See **SULTANIA**.

TIGRE, a kingdom of Africa, the largest and most populous province of Abyssinia. It was, during many ages, the seat of the court. Tigre is bounded on the E. by the territories of the Baharnagash, of which the river Mareb is the boundary on the E. and the Tacazze on the W. It is about 200 miles long from N. to S. and 120 broad from W. to E. All the merchandise sent across the Red Sea to Abyssinia, or from Abyssinia across the Red Sea, must pass through this province, as the governor has his choice of it as it goes along. Thus the province itself is very wealthy.

TIGRES, a river of Peloponnesus.

* **TIGRESS**. *n. f.* [from *tiger*.] The female of the tiger.—It is reported of the tigress, that several spots rise in her skin when she is angry. *Addison.*

TIGRINA, the *Margay* of Buffon. See **FELIS**, N° XXVI.

(1.) **TIGRIS**, a river of Asia, which rises near the Euphrates, in the mountains of Armenia; separates Diarbeck from Erzerum, and Chusistan from Irac Arabic; passes by Diarbekir, Gezira, Mouful, Bagdad, Gorno, and Bassorah; and joining the EUPHRATES, falls into the Persian Gulf, below Bassorah.

(2.) **TIGRIS**, in zoology. See **FELIS**, N° XXVII.

TIGUILLACA, a town of Buenos Ayres.

TIGURINI, an ancient warlike nation of Helvetia, who inhabited the countries or cantons now called SWITZ, ZURICH, SCHAUFFHAUSEN, and ST GALL. (*Ges. de B. Gal.*) Their capital was **TIGURUM**.

TIGURUM, the capital of the **TIGURINI**.

TIGY, a town of France, in the dep. of the Loiret; and ci-devant duchy of Orleans.

TIHAN,

TIHAN, a town of Hungary, 20 miles SW. of Stulweiffenburg.

TIJOLA, a town of Spain, in Grenada, 5 miles SW. of Purchena.

(1.) * **TIKE**. *n. f.* [*tik*, Swedish; *teke*, Dutch; *tique*, Fr.] 1. The house of dogs or sheep. See **TICK**.—Lice and *tikes* are bred by the sweat. *Bacon*. 2. It is in *Shakespeare* the name of a dog, in which sense it is used in Scotland. [from *tijk*, Runic, a little dog].—

Hound or spaniel, brache or hym,

Or bobtail *tike*, or trundle tail. *Shak.*

(2.) **TIKE** or **DOG**. See **CANIS**, N^o I. § vi.

TIKIOB, a town of Denmark, in the isle of Zealand, 4 miles SW. of Helsingør.

TIKITHOCK, a town and settlement on the E. coast of Labrador. Lon. 60. 5. W. Lat. 56. 15. N.

TIL, a town of Persia, in Adirbeitzan, 60 miles W. of Tauris.

TILA, or **TILA NAIR**, one of the **LIPARI** islands, 6 miles SSW. of Stromboli.

TILATZEL, an ancient nation of Thrace.

TILAVEMPTUS, a river of Italy, running into the Adriatic, W. of Aquileia.

TILBORG, a town of Holland, in the dep. of the Dommel and Scheidt, and ci-devant prov. of Dutch Brabant; 10 miles S. of Bois-le-duc: famous for its cloth manufactures.

(1, 2.) **TILBURY, EAST**, a small town and parish of England, in Essex, seated near the mouth of the Thames, E. of the **FORT** (N^o 3.) It is the place where the emperor Cladius crossed the Thames, in pursuit of the Britons. Near this town, or within its parish, is a field, called *Cave Field*, in which is a horizontal subterraneous passage to one of the spacious ancient caves in the adjoining parish of **CHADWELL**.

(3.) **TILBURY FORT**, a fort of Essex on the Thames, in the parish of West Tilbury, (N^o 4.) opposite Gravend. It is a regular fortification, and is reckoned the *key* to London. It was planned by Sir Martin Beckman, chief engineer to K. Charles II. It has 2 moats, the innermost of which is 180 feet broad, with a good counterscarp, a covered way, ravelins, and terrils. Its chief strength on the land side consists in this, that upon an emergency, it can lay the whole level ground under water. On the side next the river there is a strong curtain, with a fine gate, called the *Water gate*, in the middle; and the ditch is palisaded. Before this curtain is a platform, instead of a counterscarp: on which are planted 26 guns, from 14 to 40 pounders; with smaller ones between them. The bastions and curtains are also planted with guns. This fort lies 28 miles E. by S. of London.

(4, 5.) **TILBURY, WEST**, a town and parish of Essex, seated on the Thames, N. of the **FORT**, (N^o 3.) at the spot, where 4 Roman roads meet. About A. D. 530, it was the see of bishop *Ceddæ*, or *St Chad*, who converted the E. Saxons. It has a famous mineral spring, discovered in 1717.

* **TILE**. *n. f.* [*tile*, Saxon; *tegel*, Dutch; *tuile*, Fr. *tegola*, Italian.] Thin plates of baked clay used to cover houses.—The roof is all *tile*, or lead, or stone. *Bacon*.—Earth turned into brick serveth

for buildings as stone doth; and the like of *tile*. *Bacon*.—

In at the window he climbs, or o'er the *tiles*. *Milton*.

Worse than all the clatt'ring *tiles*. *Dryden*.

—*Tile* pins, made of oak or fir, they drive into holes made in the plain *tiles*, to hang them upon their lathing. *Moxon*.

* To **TILE**. *v. a.* [from the noun.] 1. To cover with tiles.—Mosa groweth upon ridges of houses *tiled*. *Bacon*.—

A lyric ode wou'd slate, a catch

Wou'd *tile*, an epigram would thatch. *Swift*.

2. To cover as tiles.—

The muscle, finew, and vein,

Which *tile* this house, will come again. *Dodd*.

* **TILER**. *n. f.* [*tuiler*, Fr. from *tile*.] One whose trade is to cover houses with tiles.—A Flemish *tiler*, falling from the top of a house upon a Spaniard, killed him; the next of the blood prosecuted his death; nothing would serve him but *lex talionis*: whereupon the judge said to him, he should go up to the top of the house, and then fall down upon the *tiler*. *Bacon*.

TILFOSSIUS, 1. a mountain of Borotia; 2. a fountain at the tomb of Terebas. *Paus. Bæot. 33*.

TILGHMAN'S ISLAND, an island of Maryland, in the Chesapeake; 25 miles SE. of Annapolis.

TILIA, **LIME** or **LINDEN TREE**, in botany, a genus of plants belonging to the class of *polyandria*, and order of *monogynia*; and in the natural system ranging under the *Columniferae*. The calyx is quinquepartite; the corolla pentapetalous; the berry is dry, globose, quinquelocular, quinquevalve, and opening at the base. There are 4 species, viz.

1. **TILIA ALBA**, the *aubite lime tree*.

2. **TILIA AMERICANA**, the *American Linden tree*; grows plentifully in America.

3. **TILIA EUROPÆA**, the *European*, or common *Lime tree*, is generally supposed to be a native of Britain; but Mr Coxse says, that Mr Pennant told him, that it was imported into England before 1652. The leaves are heart shaped, with the apex produced, and serrated on the edges; the flowers grow in a thin umbel, from three to nine together, of a whitish colour and a fragrant smell; very grateful to bees. The wood is light, smooth, and of a spongy texture, used for making lasts and tables for shoemakers, &c. Ropes and bandages are made of the bark, and mats and rustic garments of the inner rind, in Carniola and some other countries.—The lime tree contains a gummy juice, which being repeatedly boiled and clarified, produces a substance like sugar.

4. **TILIA PUBESCENS**.

(1.) * **TILING**. *n. f.* [from *tile*.] The roof covered with tiles.—They let him down through the *tiling* with his couch before Jesus. *Luke v. 19*.

(2.) **TILING**, *part. n. f.* A new method has been invented, by which one half of the quantity generally used for that purpose is sufficient. The tiles are made square, with the hook at one of the angles, so that when fastened to the lath, they hang down diagonally, and every tile is covered 1-5th part on two sides by the superior row.

TILINGUS.

TILINGIUS, Matthias, a learned German physician, born in Westphalia. He became professor of medicine at Rinteln, and physician to the court of Hesse-Cassel. He wrote, 1. *Curiosa Rhabbari Disquisitio*, 4to. 2. *Lilii Albi descriptio*, 8vo. 3. *De Laudano opiato*, 8vo. 4. *Opio-Cinnabaris Mineralis*, 8vo. He died in 1615.

TILIUM, an ancient town of Sardinia, now called ARGENTERA.

(1.) * **TILL**. *n. f.* A money box in a shop.—They break up counters, doors, and *tills*.

Swift.

(2.) * **TILL**. *conjunction*. 1. To the time when. Woods and rocks had ears

To rapture, *till* the savage clamour drown'd
Both harp and voice. *Milton.*

—The unity of place we neither find in Aristotle, Horace, or any who have written of it, *till* in our age the French poets first made it a precept of the stage *Dryden*. 2. To the degree that.—Meditate so long *till* you make some act of prayer. *Taylor*.—

To this strange pitch their high assertions flew.
Till Nature's self scarce look'd on them as two.

Cowley.

Goddeffs, spread thy reign *till* Iſis elders reel.

Pope.

(3.) * **TILL**. *prep.* [*till*, Saxon.] To the time of.—

Unhappy *till* the last.

Cowley.

(4.) **TILL**, in geography, a river of England, in Northumberland, which runs into the Tweed; 2 miles NE. of Coldstream.

(5.) **TILL**. *n. f.* in agriculture and mineralogy, a peculiar species of soil, commonly distinguished by the epithets of *cold* and *wet*. See **MINERALOGY**, Part II. Cl. I. Chap. IV. Order III. Gen. IV. Sp. 4: and **RURAL ECONOMY**, Part I. Sect. III.

(6.) * **TILL** NOW. To the present time.—Pleasure not known *till* now. *Milton.*

(7.) * **TILL** THEN. To that time.—

The earth *till* then was desert.

Milton.

* To **TILL**. *v. a.* [*tylian*, Saxon; *tenlen*, Dutch.] To cultivate; to husband; commonly used of the husbandry of the plow.—

This paradise I give thee, count it thine,

To *till*, and keep, and of the fruit to eat. *Milt.*

Send him from the garden forth, to *till*. *Milt.*

—The husbandman *tilleth* the ground. *Law.*

* **TILLABLE**. *adj.* [from *till*.] Arable; fit for the plow.—The *tillable* fields are hilly. *Carew.*

TILLÆA, in botany, a genus of plant belonging to the class of *tetrandria*, the order of *tetragynia*, and in the natural system ranging under the 13th order, *Succulente*. The calyx has 3 or 4 divisions; the petals are 3 or 4, and equal; the capsules 3 or 4, and polyspermous. There are 4 species; of which one only,

TILLÆA MUSCOSA, or *procumbent tillæa*, is a native of England, and is not mentioned among the Scottish plants. It has prostrate stems, almost erect, generally red, and grow longer after flowering. The parts of fructification are always three. The leaves grow in pairs, and are fleshy. It is found on dry heaths in Norfolk and Suffolk, and flowers in May and June.

(1.) * **TILLAGE**. *n. f.* [from *till*.] Husbandry; the act or practice of plowing or culture.—*Tillage*

will enable the kingdom for corn for the natives, and to spare for exportation. *Bacon.*

A sweaty reaper from his *tillage* brought.

Milton.

—Incite them to improve the *tillage* of their country. *Milton*.—

Whose harden'd hands did long in *tillage* toil.

Dryden.

—That there was *tillage* Moses intimates. *Woodw.*

(2.) **TILLAGE**. See **PLOUGH**; and **RURAL ECONOMY**, Part II. Sect. I. II. and VIII. &c.

TILLANDSIA, the large barren wild pine of the West Indies; a genus of the monogynia order, belonging to the hexandria class of plants. It is called *Caragatua* by Father Plumier, and is a parasitic plant, and ought perhaps, in strict propriety, to be denominated an *aquatic*: for although it is suspended in the air among the branches of lofty trees, to whose boughs it is fastened by its numerous roots; yet it is not indebted to those boughs, like the mistletoe and other parasitic plants, for nourishment, but merely for support; being supplied with other means to preserve its existence: For the leaves, which much resemble those of the pine apple, but are larger, surround this plant in a circular manner; each leaf being terminated near the stalk with a hollow bucket, which contains about half a pint of water. It is by these numerous small reservoirs of water that the roots, as well as every other part of this plant, are supplied with nourishment, without the help of any earth.

TILLANJONG, one of the NICOBAR islands, in the Indian Sea. Lon. 94. 9. E. Lat. 8. 40. N.

(1.) **TILLE**, a river of France, which runs into the Saone; 3 miles below Auxonne.

(2.) **TILLE**, a town of France, in the dep. of the Oise; 3 miles N. of Beauvais.

* **TILLEMANS**, Peter, a celebrated landscape painter, born at Antwerp. He came to England in 1708, and was much employed by the nobility and gentry. He died in 1734.

(1.) **TILLEMONT**, Lewis Sebastian Nain DE. See **NAIN**.

(2.) **TILLEMONT**. See **TIRLEMONT**.

TILLENENSEE, a lake of Prussia; 8 miles W. of Lick.

(1.) * **TILLER**. *n. f.* [from *till*.] 1. Husbandman; ploughman.—The good husbandry of the *tiller*. *Carew*—Cain was a *tiller* of the ground. *Gen.* iv. 2.—

While husks elude the *tiller's* care. *Prior.*

2. The rudder of a boat. 3. The horse that goes in the thill. Properly **THILLER**. 4. A till; a small drawer.—

Each *tiller* there with love epistles lin'd.

Dryden.

(2.) **TILLER OF A SHIP**, a strong piece of wood fastened in the head of the rudder, and in small ships and boats called the *helm*.

To **TILLER**. *v. a.* in agriculture. See **RURAL ECONOMY**, Part II. Sect. III.

(1.) **TILLI**, John Count of, an illustrious general, born at Bussels, and educated under the Jesuits. He displayed great courage in Hungary, in a battle with the Turks: and in 1620, commanded the troops under duke Maximilian, at the battle of Prague. He showed equal skill and humanity

dity in the various German wars that followed: but was at last defeated by Gustavus Adolphus, and mortally wounded in defending the passage of the Lech. He died at Ingoldstadt, in 1652.

(2.) **TILLI**, Michael Angelo, F. R. S. a learned physician, and botanist; born at Florence in 1655, and educated at Pisa. He was made physician to the grand duke; professor of medicine in the university of Pisa; superintendent of the botanic garden, and F. R. S. of London. His chief work is *Catalogus Horti Pisani*: in fol. 1723. He died at Florence in 1740, aged 85.

TILLICOUNTRY, a parish of Scotland, in Clackmannanshire, of an oblong form, 6 miles long, and from one to two broad, containing about 6000 Scots acres, of which 4000 are among the Ochil Hills, and the remaining 2000 form the low arable ground at the foot of the mountains. The soil is generally dry and fertile, though stony and full of quartz; and produces excellent crops of all the usual grain and roots. On the banks of the DOVAN, which bounds it on the N. the soil is clayey, the surface beautiful, and the climate mild. Large flocks of sheep are pastured on the Ochils. In the DOVAN are sometimes found the pearl mussels; and various minerals and metals are found in the parish; as granite, basalt, shorl, flint, sulphur, mica, silver, lead, copper, cobalt, antimony, and arsenic. Iron stone abounds, and is wrought by the *Dodian Iron Company*; and the low grounds abound with coal. This parish has been famous for several centuries for its manufacture of *serge*. The population, in 1793, was 909; the increase since 1755. The villages of *Coal-naughton*, *Earlstown*, and *Westertown*, contains above 210 each. *Tillicoultry*, the seat of James Bruce, Esq. of Kinross, and *Harviefton*, the seat of Jo. Taitt, Esq. are the only feats.

TILLIERES, a town of France, in the dep. of the Eure; 6 miles NE. of Verneuil, and 12 W. of Dreux.

(1.) **TILLING**, *part. n. f.* [from *To till*.] in agriculture. See **TILLAGE**, and **RURAL ECONOMY**, Part II. &c.

(2.) **TILLING**, in geography, a town of Sweden, in Upland; 23 miles SE. of Upfal.

(3.) **TILLING HILLS**, hills of Scotland, in Lanarkshire, which bound the parish of **SHORTS** on the E.

TILLOT, a town of France, in the dep. of the Vosges; 12 miles SE. of Plombieres, and 10½ of Remiremont.

TILLOTSON, John, a celebrated Abp. of Canterbury, the son of Robert Tillotson of Sowerby, in Halifax, Yorkshire, clothier; was born there in 1630. He studied in Clare-hall, Cambridge; and in 1656 became tutor to the son of Edmund Prideaux, Esq. of Ford abbey. He was next curate to Dr Hacket, vicar of Cheshunt, Hertfordshire. In 1663, he was appointed rector of Ketton, in Suffolk; in 1664, preacher to Lincoln's Inn. He was greatly admired in London, by all the divines of the city. In 1666, he took the degree of D. D. at Cambridge; in 1669, was made prebendary of Canterbury; in 1672, was admitted dean of that cathedral; and three years after, was made a prebendary of St Paul's, London. In 1679, he converted Charles earl of

Shrewsbury, from Popery; yet in 1670, he refused to sign the clergy's address to Charles II. on the bill of exclusion. In 1689, he was initiated dean of St Paul's; made clerk of the closet to William and Mary; and appointed a commissioner to prepare matters to be laid before the convocation, for a comprehension of all Protestants; but this attempt was frustrated by the bigotry of some members. In 1691, he was consecrated Abp. of Canterbury. In 1694, he was seized with a palsy, of which he died in his 65th year. One folio volume of his sermons was published in his life-time. Those which came abroad after his death, from his chaplain Dr Barker, made two volumes in folio, the copy of which was sold for 2500l. and this was the only legacy he left to his family, his extensive charity having consumed his yearly revenues as constantly as they came in. But K. William gave two grants to his widow; amounting to 600l. a-year. He wrote some other works; and also published Dr Barrow's works, and Dr Wilkin's Treatise of the principles and Duties of Natural Religion, with a vol. of Sermons.

TILLURIUM, or **TELLURIUM**, *n. f.* [from *tel-lus*, Lat. *earth*.] one of the ten *new* metals, lately discovered by the industry of modern chemists. See **METALLURGY**, Part I. Sect. I. For a particular account of the ores, alloys, analysis, properties, and phenomena of this new metal, see **MINERALOGY**, Part II. Chap. VII. Ord. XIII. Gen. I. Sp. 1—3. Part III. Chap. IV. § XIII. Chap. V. § 12.

(1.) **TILLY**, Count. See **TILLI**, N° 1.

(2.) **TILLY**, in geography, a town of France, in the dep. of the Eure; 6 miles SE. of Grand Andelys.

(3.) **TILLY**, a town of France, in the dep. of the Meuse; 9 miles S. of Verdun, and 17½ N. of St Michiel.

(4.) **TILLY**, a town of the French empire, in the dep. of the Dyle, and ci-devant prov. of Austrian Brabant; 6 miles W. of Gemblours.

(5.) **TILLY LA CAMPAGNE**, a town of France, in the dep. of Calvados; 4½ miles SSE. of Caen, and 13 N. of Falaise.

(6.) **TILLY LOCH**, a lake of Scotland, in Fifeshire, between the parishes of Beath and Dunfermline, one mile long, and half a mile broad.

(7.) **TILLY VEROLLE**, a town of France, in the dep. of Calvados, 6 miles S. of Bayeux, and 9 W. of Caen.

* **TILLYFALLY**. } *adj.* A word used formerly when any thing said was rejected as trifling or impertinent.—Am not I of her blood? *tillyvalley* lady. *Shak.*—*Tillyfally*, Sir John, never tell me. *Shak.*

* **TILMAN**. *n. f.* [from *till* and *man*.] One who tills, an husbandman.—

Good shepherd, good *tilman*, good Jack and good Gil. *Tusser.*

TILOX, a cape of Corsica, on the NW. coast.

TILPUSSUS, a mountain of Bœotia.

TILSIT, a large and rich city of Prussia, in Lithuania, with a castle built in 1289. It has a good trade in provisions, butter, lint-seed, &c. and contains about 7000 inhabitants. It is seated on the S. bank of the Memel, 50 miles NE. of Königsberg.

Sberg, and 95 SSW. of Mittau. Lon. 22. 8. E. Lat. 55. 8. N.

(1.) * *TILT. n. f.* [*tyld*, Saxon.] 1. A tent; any support of covering over head.—

The roof of linen

Intended for a shelter!

But the rain made an afs

Of *tilt* and canvas. *Denham.*

2. The cover of a boat.—

—It is a small vessel, like in proportion to a Gravelend *tilt*-boat. *Sandys.*—

The rowing crew,

To tempt a fare, clothe all their *tilts* in blue. *Gay.*

3. A military game at which the combatants run against each other with lances on horseback.—

His study is his *tilt* yard. *Shak.*

—He never saw him but once in the *tilt*-yard. *Shak.*—He placed images in the *tilt* yard at Constantinople. *Knolles.*—

What *tilts* and tourneys at the feast were seen. *Dryden.*

In *tilts* and tournaments the valiant frowe. *Prior.*

4. A thrust.—Dexterously put to death with the *tilt* of his lance. *Addison.* 5. Inclination forward; as, *the vessel is a tilt*, when it is inclined that the liquor may run out.

(2.) *TILT*, a small but rapid river of Perthshire in Athol; which rises on the borders of Mar, and runs into the *Garry*, near Blair castle, where it forms several romantic cataracts, particularly one called the *Yorkshire Cascade*, which is surrounded with the most beautiful scenery.

(1.) * *To TILT. v. a.* [from the noun.] 1. To cover like a tilt of a boat. 2. To carry as in tilts or tournaments.—

Ajax

Screen'd Laertes' son,

When the insulting Trojans urg'd him fore

With *tilted* spears. *Philips.*

3. To point as in tilts.—

Sons against fathers *tilt* the fatal lance. *Pbilips.*

4. [*Tillen*, Dutch.] To turn up so as to run out; as, the barrel is *tilted*; that is, lean'd forward.

(2.) * *To TILT. v. n.* 1. To run in tilts, or tournaments.—

To describe races and games,

Or *tilting* furniture, emblazon'd shields. *Milton.*

2. To fight with rapiers.—

Swords out and *tilting* one at other's breaks: *Shak.*

Now we set up for *tilting* in the pit. *Dryden.*

—It is not yet the fashion for women of quality to *tilt*. *Collier.*—

Satire's my weapon, but I'm too discreet

To run a muck, and *tilt* at all I meet. *Pope.*

3. To rush as in combat.—Some say the spirits *tilt* violently. *Collier.* 4. To play unsteadily.—

Rode *tilting* o'er the waves. *Milton.*

The fleet swift *tilting* o'er the surges flew. *Pope.*

5. To fall on one side.—The trunk of the body is kept from *tilting* forward by the muscles of the back. *Grew.*

* *TILT. n. f.* [from *tilt*.] One who tilts; VOL. XXII. PART II.

one who fights.—A puiſny *tilter*, that ſpurs his horſe on one ſide, breaks his ſtaff like a noble gooſe. *Shak.*—

He uſ'd the only antique philters,

Deriv'd from old heroick *tilters*. *Hudibras:*

Let me alone to match your *tilters*. *Granville.*

(1.) * *TILTH. adj.* [from *till*.] Arable; tilled. I know not how this word can be ſo uſed.—

He beheld a field,

Part arable and *tilth*. *Milton.*

(2.) * *TILTH. n. f.* [from *till*.] Huſbandry; culture.—

Bourn, bound of land, *tilth*, vineyard, none

No uſe of metal, corn, or wine, or oil. *Shak:*

—Give the fallow lands their ſeaſons and their *tilth*. *Drayton.*—

Her plenteous womb

Expreſſeth its full *tilth* and huſbandry. *Shak:*

TILTING. part. n. f. [*tilt*.] See *TOURNAMENT*.

TILURUS, a river of Dalmatia, now called *Cettina*.

TIM, a town of Ruſſia, in Kuſſkoi; 44 miles E. of Kuſſk. Lon. 55. 20. E. Ferro. Lat. 1. 25. N.

TIMÆA, the wife of AGIS I. king of Sparta, who was debauched by Alcibiades, by whom ſhe had a ſon; who was rejected from the ſucceſſion to the throne, although Agis declared him legitimate on his death-bed. *Plut. in Ag.*

(1.) *TIMÆUS*, the ſon of Andromachus, an ancient hiſtorian of Sicily, born at Taurominium; who flouriſhed about A. A. C. 262, in the time of Agathocles. He wrote a hiſtory of Sicily, and of the wars of Pyrrhus, and other works, which were much eſteemed, but his works are loſt. He was baniſhed by Agathocles; and died aged 96.

(2.) *TIMÆUS*, a famous Pythagorean philoſopher, was born at Locris in Italy, and lived before Plato. There is ſtill extant a ſmall treatiſe of his on *Nature and the Soul of the World*, written in the Doric dialect.

(3.) *TIMÆUS*, a Greek ſophiſt and lexicographer, who wrote *Lexicon vocum Platoniarum*.

TIMAGENES, a Greek hiſtorian of Alexandria, who flouriſhed about A. A. C. 54. He was brought to Rome by Gabinus, and ſold as a ſlave to Sylla's ſon. His abilities procured him his liberty, and gained the favour of Auguſtus, which he returned by impertinence; on which the emperor diſmiſſed him; and he in revenge burnt the admired hiſtory he had written of his reign. *Plut.*

TIMAHOE, a town of Ireland, in Queen's County, Leinſter.

TIMAN, or } a town of Terra Firma, in Po-
TIMANA, } payan, capital of a territory ſo named, abounding in fruits and paſtures; ſeated on a river, 130 miles ESE. of Popayan. Lon. 73. 55. W. Lat. 1. 35. N.

TIMANTHES, a famous painter of Sicyon, who lived in the reign of Philip II. of Macedon. His painting of the ſacrifice of IPHIGENIA was much and juſtly admired, wherein he repreſented all the ſpectators in extreme grief, but covered the face of Agamemnon, as eſcuming the father's grief impoſſible to be expreſſed by the pencil. This painting carried off the prize from PARRHASIUS.

C c c

S I U A.

sius. His *AXES* *enraged* for the loss of Achilles's arms was also much admired.

TIMAVO, a river of Carniola, running into the gulf of Triest.

TIMAVUS, a river of Italy, falling into the Adriatic by 7 months. *Mela*, ii. 4.

(1) * **TIMBER**. *n. f.* [*tymbrion*, Sax. *to build*.]

1. Wood fit for building.—
I learn'd of lighter *timber* cotes to frame.

Spenser.

—For ships no nation doth equal England for the oaken *timber* wherewith to build them. *Bacon*.—

The third of greens, and *timber* newly fell'd.

Dryden.

—Hardly any countries are destitute of *timber*. *Woodward*.—They plant quick and *timber* trees. *Mortimer*.—

Who set the twigs, shall he remember,

That is in haste to sell the *timber*? *Prior*.

2. The main trunk of a tree.—

We take

From every tree, lop, bark, and part o' th' *timber*. *Shak.*

3. The main beams of a fabric. 4. Materials, ironically.—Such dispositions are the fittest *timber* to make polticks of. *Bacon*.

(2.) **TIMBER**. See **STRENGTH OF MATERIALS**, and **TREE**.

(3, 4.) **TIMBER**, in geography, a town and river of Prussian Lithuania; 6 miles W. of Insterburg.

(1.) * **To TIMBER**. *v. n.* [from the noun.] **To** light on a tree. A cant word.—The one took up in a thicket, the other *timbered* upon a tree hard by. *L'Estrange*.

(2.) * **To TIMBER**. *v. a.* **To** furnish with beams or *timber*.

* **TIMBERED**. *adj.* [from *timber*; *timbré*, Fr.] Built; formed; contrived.—He left the succession to his second son; not because he thought him the best *timbered* to support it. *Wotton*.—Many heads that undertake learning, were never squared nor *timbered* for it. *Brown*.

TIMBERS. *n. f. plur.* the ribs of a ship, or the incurved pieces of wood, branching outward from the keel in a vertical direction, so as to give strength, figure, and solidity, to the whole fabric. See **SHIP-BUILDING**.

* **TIMBERSOW**. *n. f.* A worm in wood; perhaps the wood louse.—Divers creatures, are of this kind; as earth-worms, *timbersows*, snails. *Bacon*.

TIMBER-YARD. *n. f.* A yard or area, where *timber* is laid up to be prepared for building.

* **TIMBRE**. *n. f.* [*timbre*, Fr. *tympanum*, Lat.] A kind of musical instrument played by pulsation.—

The damsels they delight,

When they their *timbrels* smite. *Spenser.*

In their hands sweet *timbrels* all upheld on high. *Spenser.*

Prattle with *timbrels*, organs, flutes. *Sandys.*

Let weeping Nilus hear the *timbral* sound. *Pope.*

(1.) * **TIME**. *n. f.* [*tima*, Saxon; *tym*, Erse.]

1. The measure of duration.—This consideration of duration, as set out by certain periods, and

marked by certain measures or epochs, is that which most properly we call *time*. *Locke*.—

Time is like a fashionable host. *Shak.*

Come what come may

Time the hour runs through the roughest day. *Shak.*

—Nor will polished amber, although it send forth a gross exhalation, be found a long time defective upon the exactest scale. *Brown*.—*Time*, which consisteth of parts, can be no part of infinite duration, or of eternity; for then there would be infinite *time* past to-day, which to-morrow will be more than infinite.—*Time* is one thing, and infinite duration is another. *Grew*. 2. Space of time.—Daniel desired that he would give him *time*. *Dan*. ii. 16.—If a law be enacted to continue for a certain time, when that *time* is elapsed, the law ceaseth without any farther abrogation. *White*.—

He for the *time* remain'd stupidly good. *Miln.*

—No time is allowed for digressions. *Swift*. 3. Interval.—Perfumes you can take but at *times*. *Bacon*.

4. Life considered as employed, or destined to employment.—A great devourer of his *time*. *Fell*.—Those who are masters of themselves, their *time*, and their fortune. *Law*.

5. Season; proper time.—There is a *time* to every purpose. *Ecclus*. iii. 1.—They were cut down out of *time*. *Job* xxii. 16.—The *time* of figs was not yet. *Mar*. xi. 13.—Knowing the *time*, that it is high *time* to awake out of sleep. *Rom*. xiii. 11.—

Her lord expir'd before his *time*. *Dryden.*

I hope I come in *time*. *Dryden.*

—The *time* will come when we shall be forced to bring our evil ways to remembrance. *Calamy's Sermons*. 6. A considerable space of duration; continuance; process of time.—

In *time* you may command a regiment. *Dryd.*

—In *time* the mind reflects on its own operations. *Locke*.—One imagines, that the terrestrial matter which is showered down along with rain will in *time* bury all things under ground. *Woodward*.—I have resolved to take *time*. *Swift*. 7. Age; part of duration distinct from other parts.—They shall be given into his hand until a *time* and *times*. *Dan*. vii. 25.—It seems more favourable for our *times* to ascribe the same unto the constellation of Leo. *Brown*.—The poets and painters, in ancient *times*, have studied nature. *Dryden*. 8. Past time.—I was the man in th' moon when *time* was. *Shak*. 9. Early time.—Stanley at Bosworth field, though he came *time* enough to save his life, yet he staid long enough to endanger it. *Bacon*.—It is *time* enough yet to set about these duties. *Rogers*. 10. Time considered as affording opportunity.—The earl lost no *time*, but marched day and night. *Clarend*.—He continued his delights till all the enemy's horse were passed; nor did them pursue in any *time*. *Clarendon*.—I would ask any man that means to repent at his death, how he knows he shall have an hour's *time* for it? *Duty of Man*.

Time is lost, which never will renew. *Dryd.*

11. Particular quality of some part of duration.—Comets, importing change of *times* and states. *Shak.*

All the prophets in their age, the *times*

Of great Messiah sing. *Milton*

—If any reply, that the *times* and manners of men

will

will not bear such a practice, that is an answer from the mouth of a professed *time-server*. *South.* 23. Particular time.—

Give order, that no sort of person

Have, any *time*, recourse unto the princes. *Shak.*

—What *time* the fire devoured two hundred and fifty men. *Num.* xxvi. 10.—

The work on me must light, when *time* shall be.

A *time* will come.

—These reservoirs of snow from *time* to *time* supply Naples. *Addison.* 13. Hour of childbirth.—

She was within one month of her *time*. *Clarendon.*

—I blamed her for walking abroad when she was so near her *time*. *Addison.* 14. Repetition of any thing, or mention with reference to repetition.—

Four *times* he crosses the car of night. *Milt.*

—Many *times* I have read of the like. *Heylyn.*

Many hundred thousand million million *times* bigger. *Bentley.*—Lord Oxford, I have now the third *time* mentioned in this letter, expects you. *Swift.*

15. Musical measure.—

Ha, ha! keep *time*. How four sweet musick is

When *time* is broke and no proportion kept.

You by the help of tune and *time*

Can make that song which was but rhyme. *Waller.*

They with th' harmonious spheres keep *time*.

Keep *time* with their own trumpet's measure, And yield them most excessive pleasure. *Prior.*

(2.) **TIME**, a succession of phenomena in the universe, or a mode of duration marked by certain periods or measures, chiefly by the motion and revolution of the sun. The general idea which *time* gives in every thing to which it is applied, is that of limited duration. Thus we cannot say of the Deity, that he exists in *time*; because eternity, which he inhabits, is absolutely uniform, neither admitting limitation nor succession. See METAPHYSICS, *Self.* XIII. XV. and XXXV.; and NEWTONIAN PHILOSOPHY, *Self.* III. *Schol.* I.

(3.) **TIME**, in music, is an affection of sound, by which it is said to be long or short, with regard to its continuance in the same tone or degree of tune. Musical *time* is distinguished into common or *duple* *time*, and *triple* *time*.

i. **TIME**, COMMON, } or *Duple*, is when the

i. **TIME**, DOUBLE, } notes are in a *duple* duration of each other, viz. a semibreve equal to two minims, a minim to two crotchets, a crotchet to two quavers, &c. It is of two kinds. The first when every bar or measure is equal to a semibreve, or its value in any combination of notes of a less quantity. The *2d* is where every bar is equal to a minim, or its value in less notes. The movements of this kind of measure are various, but there are 3 common distinctions: the first *slow*, denoted at the beginning of the line by the mark

C; the *2d* *brisk*, marked thus C; and the *3d* *very brisk*, thus marked D.

ii. **TIME** TRIPLE is when the durations of the notes are triple of each other; that is, when the semibreve is equal to three minims, the minim to three crotchets, &c. and it is marked T.

* **TO TIME**. *v. a.* [from the noun.] 1. To adapt to the *time*; to bring or do at a proper *time*. *Time* all the beginnings and onsets of things. *Bacon.*—Congruous *timings* give them due weight. *Hammond.*—The *timing* of things is a main point. *L'Estrange.*

Mercy is good, but kings mistake its *timing*.

—Conviction should be strong, and well *timed*.

Addison. 2. To regulate as to *time*.—

Who overlook'd the oars, and *tim'd* the stroke.

3. To measure harmonically.—

He was a thing of blood, whose every motion Was *tim'd* with dying cries.

* **TIMEFUL**. *adj.* [*time* and *full*.] Seasonable;

timely; early.—He interrupts all offer of *timeful* return towards God. *Raleigh.*

(1.) **TIME-KEEPER**. *n. f.* [*time* and *keeper*.] See CLOCK, DIAL, HOROLOGIUM, WATCH, &c.

(2.) **TIME-KEEPER**, HARRISON'S. See HARRISON and LONGITUDE.

(3.) **TIME-KEEPER**, RITTENHOUSE'S IMPROVEMENT OF **THE**. The following remarks on the improvement of *time-keepers*, by David Rittenhouse, LL.D. late President of the American Philosophical Society, are extracted from their *Transactions*. "The invention and construction of *time-keepers*, may be reckoned among the most successful exertions of human genius. Pendulum clocks especially have been made to measure *time* with astonishing accuracy. The least and least of the causes of inequality, worthy of notice, is that arising from *unequal density* of the air, which by varying the actual weight of the pendulum, will accelerate or retard its motion. The effects arising from this cause will be found very small: for if we suppose the greatest range of the barometer to be three inches, which indicates a change of density in the air of above one-10th of the whole; and supposing lead, of which pendulums are generally made, to be 8,200 times heavier than air, the variations of the actual weight of a pendulum may be one 88,000th part of its whole weight, and consequently the change of its rate of going one 176,000th part. And, as there are 86,400 seconds in a day, the clock may vary in its rate of going, from this cause, about $\frac{1}{2}$ a second in 24 hours. The barometer seems to point out a remedy for this cause of irregularity by means of that instrument. But my design is to describe a very different and extremely simple method, which, though only a matter of curiosity at present, may at some future *time* be found useful; especially as the variation above mentioned is governed solely by the actual density of the surrounding air, and the barometer can only give the weight of any entire column, which does not strictly correspond with the density of its base; whereas the method I propose depends on the *real density* of the air surrounding the pendulum, and nothing else. Let AB (*Plate CCCXXXIX.*) be a pendulum vibrating on the point A, and removed from the perpendicular line DE. Let the inflexible rod be continued from BA to C, and let a body C, of equal dimensions with the pendulum B, but as hollow and light as possible, be fixed on the rod, making AC equal to AB. Now it is evident that B will be pressed up-

wards by a force equal to the weight of its bulk in air, and its descent retarded. But the body C will be equally pressed upwards, and consequently the motion of the pendulum towards the perpendicular will be as much accelerated. These two forces therefore will destroy each other, and the pendulum will perform its vibrations in equal times, whether the air be light or heavy, dense or rare. I have for greater perspicuity described the most simple case, but perhaps not the most eligible; for if we can enlarge the vessel or body C in any proportion, the distance of its centre from A may be diminished at the same rate. However plausible the above may appear in theory, no doubt difficulties will occur when we attempt to reduce it into practice. But I am persuaded they will not be found insuperable. The only experiment I have hitherto made on this subject has been merely to shew that a pendulum can be made in this manner which shall vibrate quicker in a dense medium than in one more rare, contrary to what takes place with common pendulums. I made a compound pendulum on the principles above mentioned, of about one foot in its whole length. This pendulum on many trials, made in the air 37 vibrations in a minute. On immersing the whole in water, it made 59 vibrations in the same time, showing evidently that its motion was quicker in so dense a medium as water than in the air. When the lower bob, or pendulum only was plunged in water, it made no more than 44 vibrations in a minute; the remaining 15 being solely the effect of the pressure of the water against the upper vessel C."

* **TIMELESS.** *adj.* [from *time*.] 1. Unseasonable; done at an improper time.—

Nor fits it to prolong the heav'nly feast

Timeless, indecent, but retire to rest. *Pope.*

2. Untimely; immature; done before the proper time.—

A pack of sorrows, which would press you down,

If unprevented, to your *timeless* grave. *Shak.*

The bloody office of his *timeless* end. *Shak.*

TIMELFIOERD, a bay of the North Sea, on the coast of Norway, 32 miles W. of Romsdal.

(1.) * **TIMELY.** *adj.* [from *time*.] Seasonable; sufficiently early.—

Now spur the lated traveller apace

To gain the *timely* inn. *Shak.*

Happy were I in my *timely* death. *Shak.*

His *timely* care

Hath unbefought provided. *Milton.*

Ill show my duty by my *timely* care. *Dryden.*

(2.) * **TIMELY.** *adv.* [from *time*.] Early; soon.

The beds i' th' east are soft, and thanks to you,

That call'd me *timelier* than my purpose hither. *Shak.*

Sent to forewarn

Us *timely* of what else might be our loss. *Milt.*

Timely advis'd, the coming evil shun. *Prior.*

TIMENS, a town of Norway, in the prov. of Christianland, 15 miles S. of Stavenger.

* **TIMEPLEASER.** *n.s.* [time and please.] One who complies with prevailing opinions whatever they be.—

Timepleasers, flatterers, foes to nobleness. *Sbat.*

TIMERYCOTTA, a town and fortress in the Decan of Hindoostan, in the province of Golconda, 64 miles SE. of Hyderabad, 95 W. of Masulipatam. Lon. 79. 26. E. Lat. 15. 20. N.

* **TIMESERVING.** *n.s.* [time and serve.] Mean compliance with present power.—Trimming and *timeserving* are but two words for the same thing. *South.*

TIMESIUS, a native of Clazomenæ, who founded ABDERA. *Herodot.* i. 168.

TIMESQUE, a town of Africa, in the kingdom of Darah, 30 miles S. of Taflet.

TIME-TABLE. See *MUSIC*, § 45.

TIM-HAM, a town of China, in Petcheli.

TIMI, a town of Nepal. See *NEPAL*.

* **TIMID.** *adj.* [timide, French; timidus, Lat.] Fearful; timorous; wanting courage; wanting boldness.—

Poor is the triumph o'er the *timid* hare. *Thomson.*

* **TIMIDITY.** *n.s.* [timidité, Fr. timiditas, Lat. from *timid*.] Fearfulness; timorousness; habitual cowardice.—The hare figured *timidity* from his temper. *Brown.*

TIMMISHAMAIN, a lake of Canada.

TIMOAN, an island in the E. Indian Sea, inhabited by Malays, where European ships obtain wood and water. The anchorage is good all round it. Lon. 104. 25. E. Lat. 1. 58. N.

TIMOCHARES, a celebrated astronomer of Alexandria, who flourished about A. A. C. 294. He and Aristillus attempted to determine the places of the stars, and to trace the course of the planets.

TIMOCLEA, a Theban lady, sister of Theagenes, who was killed at Cheronea. One of Alexander's soldiers attempting to ravish her, when under pretence of showing him a treasure hid in a draw well, she tumbled him into it. Alexander commended her virtue, and prohibited his soldiers from hurting the Theban ladies. *Plut.*

TIMOCREON, a comic poet of Rhodes, who gained prizes at Olympia; about 476 B. C.

TIMOK, a river of Servia, which rises in mount Hæmus, and runs into the Danube.

TIMOLEON, a celebrated Corinthian general, who restored the Syracusans to their liberty, and drove the Carthaginians out of Sicily. See *SYRACUSE*, § 11, 12.

(1.) **TIMON**, the *Misanthrope*, or the *Man-hater*, a famous Athenian, who lived about 420 B. C. We have many sayings of his spleen recorded, but no facts of his life.

(2.) **TIMON** the *Septic*, was a Phliasian, a disciple of Pyrrho, and lived in the time of Ptolemy Philadelphus. He took little pains to invite disciples to his school. He was fond of rural retirement; and was much addicted to wine. The fragments of his satirical poem *Silli*, are in the *Pœsis Philosophica* of Stephens. Timon lived to the age of 90.

TIMONCHIO, a river of Maritime Austria, in Vicenza, which runs into the Baglione.

TIMONEERS. *n.s. plur.* See *STEERING*.

TIMONVILLE, a town of France, in the dep.

of the Mofelle; 9 miles W. of Morhange, and 12 SE. of Metz.

TIMOO, a district of Savu. See SAVU.

TIMOPHEEVA, a town of Russia, in Irkutskoi, on the Ilim; 32 miles NW. of Verchomanik.

(1.) **TIMOR**, the god of Fear. See FEAR and FAVOR.

(2.) **TIMOR**, in geography, an island of Asia, in the E. Indian sea, S. of the Moluccas, and E. of Java, 150 miles long, and 37 broad. It abounds in sandal wood, wax, and honey; and the Dutch have a fort in it.

(3.) **TIMOR**, one of the **MOIUCCA** isles.

TIMORLAND, an island in the Indian Ocean, between Timor and New Guinea. Lon. of the S. point 135. 54. E. Lat. 8. 15. S.

* **TIMOROUS**. *adj.* [*timor*, Latin.] Fearful; full of fear and scruple.—*Timorous* beliefs will never try it. *Brown*.—

The infant flames, whilst yet they were concealed

In *tim'rous* doubts, with pity I beheld. *Prior*.

* **TIMOROUSLY**. *adv.* [from *timorous*.] Fearfully; with such fear.

We would have had you heard

The traitor speak, and *tim'rously* confess. *Shak*.

—They but *timorously* ventured on term. *Locke*.—

Let dastard souls be *timorously* wise. *A. Phil*.

* **TIMOROUSNESS**. *n. f.* [from *timorous*.] Fearfulness.—The clergy, through the *timorousness* of many among them, were refused to be heard. *Swift*.

TIMOTHEUS, one of the most celebrated poet-musicians of antiquity, was born at Miletus, an Ionian city of Caria, 346 years B. C. He was contemporary with Philip II. of Macedon and Euripides; and not only excelled in lyric and dithyrambic poetry, but in his performance upon the cithara. Pausanias says, he perfected that instrument by the addition of 4 new strings to the 7 it had before; but Suidas says it had 9 before, and that Timotheus only added two. See LYRE, § 3. A *senatus consultum* is preserved at full length in Boethius, whereby the kings and the ephori of Sparta passed censure on Timotheus for adding these strings; and obliged him to cut them all, leaving only 7 tones; and banished him from the city. Suidas attributes to him 19 nomes, or canticles, in hexameters; 36 proems, or preludes; 18 dithyrambics; 21 hymns; the poem in praise of Diana; one panegyric; three tragedies, the Persians, Phinidas, and Laertes; to which must be added, *Niobe*, and a poem on the birth of Bacchus. Stephen of Byzantium makes him author of 18 books of nomes, or airs, for the cithara, to 3000 verses, and of 1000 *Προίμια*, or preludes, for the nomes of the flutes. Timotheus died in Macedonia, according to Suidas, aged 97; though the Marbles say at 90; and Stephen of Byzantium fixes his death in the 4th year of the 105th Olympiad, two years before the birth of Alexander the Great; whence it appears, that this Timotheus was not the famous player on the flute so much esteemed by that prince, and of whom we have no authentic account.

(2.) **TIMOTHEUS**, or } an eminent evangelist of

(1.) **TIMOTHY**, } the apostolic age, born at Lystra, in Asia. His father was a Greek, but

his mother *Eunice* and his grand-mother *Lois*, were Jewesses, and educated him in the true religion. He became an early convert, and a great favourite of St Paul; whom he accompanied to Philippi, Thessalonica, and Berea. The Episcopalian and Papists say he was the first *bishop* of Ephesus; but this is contested by the Presbyterians. See SCOTLAND, § 96. He was stoned to death A. D. 97.

(2, 3.) **TIMOTHY**, FIRST and SECOND EPISTLES TO, 2 canonical books of the New Testament, written by St Paul. See SCRIPTURE, Sec. X.

(4.) **TIMOTHY**, or } in botany. See RURAL
TIMOTHY GRASS, } ECONOMY, Part I. Sec. VI.

TIMOU, a town of Tibet, 25 m. SE. of Lassa.

* **TIMOUS**. *adj.* [from *time*.] Early; timely; not innate. Obsolete.—By a wife and *timous* inquisition. *Bacon*.

TIMOXENA, the wife of Plutarch.

TIMUR REG. See TAMERLANE.

(1.) * **TIN**. *n. f.* [*ten*, Dutch.] 1. One of the primitive metals called by the chemists *Jupiter*.—Quicksilver, lead, iron, and *tin*, have opacity or blackness. *Peacocks* on *blazoning*.—*Tin* ore sometimes holds about one sixth of *ith*. *Woodward*. 2. Thin plates of iron covered with tin.

(2.) **TIN**, one of the 12 METALS. See METALLURGY, Part I. Sec. I. Part II. Sec. VII. Part III. Sec. VIII.; and MINERALOGY, Part II. Chap. VII. Ord. VII. Gen. I. and II. Part III. Chap. IV. § VII. and Chap. V. § 7.

(3.) **TIN**, CHEMICAL PROPERTIES OF. See CHEMISTRY, Index.

(4.) **TIN**, MEDICAL PROPERTIES OF. See MEDICINE, Index.

(5.) **TIN**, ORES OF. See METALLURGY, and MINERALOGY, as above.

(6.) **TIN**, POISONOUS QUALITY OF. See POISON, § 7.

(7.) **TIN**, TRADE IN. An advantageous commerce has been lately opened between Cornwall and the East Indies and China. In 1791 about 3000 tons of tin were raised in Cornwall; of which 2200 tons were sold in the European market for L. 72 each, and 800 tons carried to India and China at L. 62 per ton. See CORNWALL.

* *To TIN*. *v. a.* [from the noun.] To cover with tin.—A plate of iron *tinned* over. *Boyle*.—It may be *tinned* by nailing single plates of tin over it. *Mortimer*.—New *tinning* a saucepan is chargeable. *Swift*.

(1.) **TINA**, a town of European Turkey, in Bosnia, seated on the Tis; 37 miles NW of Spalatro. Lon. 17. 9. E. Lat. 44. 28. N.

(2.) **TINA**, an island in the Grecian Archipelago, anciently called **TINOS**: one of the CYCLADES, on the W. of Nicaria; 17 miles long, and 8 broad. It is defended by a fort seated on a rock. It is a bishop's see of the Roman church, though there are also 200 Greek priests. It has about 5000 troops. The chief commodity is silk: about 16,000 lb. are produced annually; and they make silk stockings and gloves, which are universally admired. St NICOLÒ is the capital. Lon. 25. 24. E. Lat. 37. 30. N.

TIN-BEATER, *n. f.* one who beats tin into thin plates. See BEATER, § 2.

(1.)

(1.) * **TINCAL.** *n. f.* A mineral.—The *tincal* of the Persians seems to be the chrysocholla of the ancients, and what our borax is made of. *Woodw.*

(2.) **TINCAL**, the name by which crude or impure borax is called. See **BORAX** and **CHEMISTRY**, *Index*.

TINCHEBRAY, a town of France, in the dep. of Orme, memorable for the defeat of Robert, D. of Normandy, in 1103, by his brother Henry I. of England, who put out his eyes, and kept him prisoner for life thereafter. (See **ENGLAND**, § 21.) It is 10½ miles N. of Domfront, and 22 W. of Falaise.

TINCO, a town of Spain, in Asturia; 20 miles NW. of Oviedo.

* **TINCT.** *n. f.* [from the verb:] Colour; stain; spot.—

That great med'cine hath

With his *tint* bedd' thee. *Shak.*

—The first scent of a vessel last, and the *tint* the wool first appears of. *Ben Jonson*.—

Of ev'ning *tint*

The purple streaming amethyst is thine. *Thomf.*

* To **TINCT**, *v. a.* [*tinctus*, Latin; *teint*, Fr.]

1. To stain; to colour; to spot; to die.—A small quantity of saffron will *tint* *Bacon*.—Some were *tinted* blue. *Brown*.—I distilled some of the *tinted* liquor. *Boyle*.—They would not suffer the whiter parts of the soul to be *tinted* by the reflection of one sin. *Decay of Piety*. 2. To imbue with a taste.—We have artificial wells made in imitation of the natural, as *tinted* upon vitriol, sulphur, and steel. *Bacon*.

(1.) * **TINCTURE.** *n. f.* [*teinture*, Fr. *tinctura*, from *tinctus*, Lat.] 1. Colour or taste superadded by something.—An insensible passage from bright colours to dimmer. Italian artisans call the middle *tinctures*. *Wotton*.

By *tincture* or reflection they augment. *Milt.*

It takes a *tincture*

From every channel. *Denham*.

—Like a coloured glass casts its own colour and *tincture* upon all images. *South*.—To begin the practice of an art with a light *tincture* of the rules, is to expose ourselves to the scorn of those who are judges. *Dryden*.—Malignant tempers will discover their natural *tincture* of mind. *Addison*.—Few have an early *tincture* of religion. *Addison*.—

O! give each future morn a *tincture* of thy white. *Prior*.

All manners take a *tincture* from our own. *Pope*.

—It will give a sovereign *tincture* to all your studies. *Watts*. 2. Extract of some drug made in spirits.—In *tinctures* drawn from vegetables, the superfluous spirit of wine distilled off leaves the extract of the vegetable. *Boyle*.

(2.) **TINCTURES**, in pharmacy. See **PHARMACY**, *Index*.

* To **TINCTURE.** *v. a.* [from the noun.] 1. To imbue or impregnate with some colour or taste.

He *tinctures* rubies with their rosy hue. *Blackm.*—A little black paint will *tincture* twenty gay colours. *Watts*. 2. To imbue the mind.—Early were our minds *tinctured* with a sense of good and evil. *Atterbury*.

* To **TIND.** *v. a.* [*tendgan*, Gothic; *tendan*, Saxon.] To kindle; to set on fire.

TINDA, a town of Africa, in the kingdom of Woolly.

TINDAL, Dr Matthew, a famous English writer, the son of the rev. John Tindal of Beer-Ferres in Devonshire, born about 1657. He studied at Lincoln college, Oxford, and was afterwards elected fellow of All-Souls. In 1683, he took the degree of LL.D. and in the reign of James II. declared himself a Roman Catholic; but soon renounced that religion. After the revolution he published several pamphlets in favour of government, the liberty of the press, &c. His *Rights of the Christian Church asserted*, occasioned his having a violent contest with the high-church clergy; and his treatise *Christianity as old as the Creation*, published in 1730, made much noise, and was answered by several writers, particularly by Dr Conybeare, Mr Forster, and Dr Leland. Dr Tindal died at London in August 1733. He left in MS. a second volume of his *Christianity as old as the Creation*; the preface to which has been published.

TINDALE, William. See **TYNDALE**.

* **TINDER.** *n. f.* [*tyndra*, *tendre*, Saxon.] Any thing eminently inflammable placed to catch fire.

Strike on the *tinder*, ho! *Shak.*

—Adding, as it were, fire to *tinder*. *Hakewill*.—

Where sparks and fire do meet with *tinder*.

Suckling.

Because Irish linen will soon turn to *tinder*.

Swift.

* **TINDERBOX.** *n. f.* [*tinder* and *box*.] The box for holding *tinder*.—

The *tinderbox* of all his fellows. *Hudibras*.

—Making lanterns and *tinderboxes*. *Atterbury*.

(1.) * **TINE.** *n. f.* [*tinne*, Islandick.] 1. The tooth of a harrow; the spike of a fork.—They destroy moles by traps that fall on them, and strike sharp *tines* or teeth through them. *Mort*. 2. Trouble; distress.—

In funeral complaints and wailful *tine*. *Spens.*

(2.) **TINE**, in geography. See **TYNE**.

(1.) * To **TINE.** *v. a.* [*tynan*, Saxon.] 1. To kindle; to light; to set on fire.—

Coals of contention and hot vengeance *tind*.

Spenser.

Tine the flant lightning.

Milton.

The priest with holy hands was seen to *tine*

The cloven wood, and pour the ruddy wine.

Dryden.

(2.) * To **TINE.** *v. n.* 1. To rage; to smart.

Spenser. 2. To fight.—

Eden stain'd with blood of many a band

Of Scots and English both, that *tined* on his

strand.

Spenser.

TINEA, a river of the French empire, in the dep. of the Po, and late Piedmontese; which rises in the Alps, and runs into the Var, 12 miles N. of Nice.

TINEH, a town of Egypt, 65 miles N. of Suez, and 85 NNE. of Cairo.

TINELLI, Tiberius, an eminent historical and portrait painter, born at Venice in 1586. Lewis XII. conferred on him the order of St Michael. He died in 1638.

TINEMOUTH, or rather **TYNEMOUTH**, a seaport town of England, in Northumberland, seated at the mouth of the **TYNE**, 9 miles E. of Newcastle. It has a castle on a very high rock, which

which is inaccessible on the sea side, and is well mounted with cannon. There is a bar across the mouth of the Tyne, which is not above 7 feet deep at low water. There are also dangerous rocks about it, called the *Black Middins*. But to guide ships into the harbour by night, there are light-houses erected, and maintained by the Trinity House at Newcastle. Here ships take in their loadings of coals and other articles from Newcastle. It has also salt works. It lies 280 miles N. of London. Lon. $0. 16. W.$ Lat. $55. 6. N.$

TINENTO, an island near the coast of Genoa, at the entrance of the Gulf of Spezia; 8 miles S. of Spezia.

TINEVELLY. See **PALAMCOTTA**.

TINFEDA, a town of Africa, in Biledulgerid.

TING, a city of China, of the 1st rank, in the prov. of Pe-tcheli, on the Tam, 107 miles SW. of Peking.

TINGAU, a town of Suabia; 7 miles NE. of Kempten.

TING-CHAN, a town of Aña, in Corea.

* **To TINGE**. *v. a.* [*tingo*, Lat.] To impregnate or imbue with a colour or taste.—His virtues are *tinged* by a certain extravagance. *Addison*.—Capable of being *tinged* with any colour whatever. *Newton*.—If the eye be *tinged* with any colour, as in the jaundice, so as to *tinge* pictures in the bottom of the eye with that colour, all objects appear *tinged* with the same colour. *Newton*.—

To tinge the chyle's insipid tide. *Prior*.
—The infusions of rhubarb and saffron *tinge* the urine with a high yellow. *Arbutnot*.

* **TINGENT**. *adj.* [*tingens*, Lat.] Having the power to tinge.—It has less the *tingent* property. *Boyle*.

TINGIANI, or **TINGLIANOS**, a people of Manilla, who live a very savage life, yet they are very brave, humane, and courteous. See **MANILLA**, N^o 1.

TINGIS, an ancient sea-port town of Mauritania Tingitana, said to have been built by the giant ANTEUS. Sertorius the Roman general took it, and Plutarch says he opened the tomb of the founder, and found in it a skeleton 60 cubits long. It is now called **TANGIER**.

TINGITANA, in ancient geography, a district of MAURITANIA, which comprehended a considerable part of Fez and Morocco. It was so named from TINGIS its capital.

(1.) * **TINGLASS**. *n. f.* [*tin* and *glass*]. Bismuth.
(2.) **TINGLASS**, and all such names for metals as convey a false idea are now obsolete. See **BISMUTH**; **CHEMISTRY**, *Index*, at **BISMUTH**; and **MINERALOGY**, Part II. Chap. VII. Cl. IV. Ord. XII. Gen. I.—III. Part III. Chap. IV. § 12. and Ch. V. § 12.

* **To TINGLE**. *v. n.* [*tingelen*, Dutch.] 1. To feel a sound, or the continuance of a sound, in the ears. This is perhaps rather *tinkle*.—The ears of them that hear it shall *tingle*. *Bible*.—When our ear *tingleth*. *Brown*. 2. To feel a sharp quick pain with a sensation of motion.—

The pale boy senator yet *tingling* stands. *Pope*.
3. To feel either pain or pleasure with a sensation of motion.—The sense of this word is not very well ascertained.—

They suck pollution through their *tingling* veins. *Tichel*.

—In a palsy, sometimes the sensation or feeling is either totally abolished, or dull with a sense of *tingling*. *Arbutnot*.

TINGLIANOS. See **MANILLA**, N^o 1; and **TINGIANI**.

TINGO, a river of Italy, in the duchy of Ancona; which runs into the Adriatic, 3 miles N. of Fermo.

TINGRI, a town of Tibet, 114 miles S. of Zuetrye.

TINGTCHEOU, a city of China, of the 1st rank, in Fo-kien; 870 miles S. of Peking.

TINGWALL, **WEISDALE**, and **WHITENESS**, 3 united parishes of Shetland, in Mainland; 20 miles long and 7 broad, but much intersected by small friths; so that no part is above 3 miles from the sea. The soil is fertile, but poorly manured. The chief harbours are **SCALLOWAY** and **Laxforth**. The islands of **HAVERA**, **Oxna**, and **TRONDRAY**, &c. belong to this parish. The population, in 1797, was 1745; increase 329, since 1755. There are relics of Pictish houses and Romish chapels; and **Scalloway Castle**, built by Patrick Earl of Orkney, in 1601, is a fine ruin. Mr Scott of Scalloway has an elegant modern seat.

TINGWALLA, an island of Sweden, in Lake Wenner; on which the town of **CARLSTADT** is built.

TING-YUEN, 4 towns of China, of the 3d rank, in Kiang-nan, Kiang-si, Se-tchuen, and Yun-nan.

TINIA, a river of Italy, in Umbria, running into Clitumnus. *Strab.* 5. *Sil. Ital.* 8. 454.

TINIAN, one of the **MARIANA ISLANDS**; 12 miles long, 6 broad, and 40 in circumference. When visited by Lord Anson, in 1724, it had about 30,000 inhabitants, but has now none, the Spaniards having carried them all off to people their other islands. Lon. 146. 0. E. Lat. 15. 0. N.

TINIMA, a town of Cuba; 23 miles W. of Bahamo.

TININGBURG, a town of Hungary; 15 miles N. of Presburg.

TINISK, a town of Bohemia, in Koniggratz; 10 miles SE. of Koniggratz.

TINJULEEN, a town of Morocco, 103 miles SE. of Morocco.

* **To TINK**. *v. n.* [*tinnio*, Lat. *tincian*, Welsh.] To make a sharp shrill noise.

(1.) * **TINKER**. *n. f.* [from *tinke*, because their way of proclaiming their trade is to beat a kettle, or because in their work they make a tinkling noise.] A mender of old bras.—Am not I by profession a *tinker*. *Shak*.—

The coin may mend a *tinker's* kettle. *Prior*.
(2.) **TINKERS**, or **GYPSIES**. See **GYPSIES**.

* **To TINKLE**. *v. n.* [*tinter*, Fr. *tinnio*, Latin.] 1. To make a sharp quick noise; to clink.—They make a *tinkling* with their feet. *Isa*.—

A javelin faintly *tinkl'd* on the brazen shield. *Dryden*.

The sprightly horse
Moves to the musick of his *tinkling* bells. *Dodley*.
2. It seems to have been improperly used by *Pope*.—

The

- The grots that echo to the *sinkling* tills. *Pope*.
 3. To hear a low quick noise.—
 And his ears *tinkled*, and the colour fled.

Dryden.

* **TINMAN**. *n. f.* [*tin* and *man*.] A manufacturer of tin, or iron tinned over.—

Did'st thou never pop

Thy head into a *tinman's* shop.

Prior.

TINMOUTH, or **TYNEMOUTH**. See **TINMOUTH**.

* **TINNER**. *n. f.* [from *tin*; *tin*, Saxon.] One who works in the tin mines.—The Cornish men, many of them could for a need live under-ground that were *tinner*s. *Bacon*.

(1.) **TINNING**. *part. n. f.* the covering or lining of any thing with melted tin, or with tin reduced to very fine leaf. Looking-glasses are foliated or *tinned* with thin plates of beaten tin, by a process described under **FOLIATING**. Kettles, sauce-pans, and other kitchen utensils, which are usually made of copper, are tinned, if of new copper, should first be cleaned or scoured with salt and sulphuric acid diluted with water. This, however, is not always done; some workmen contenting themselves with scouring it with sand perfectly dry, or with scales of iron. Powdered rosin is then strewed over it; and when the vessel or utensil is considerably heated, melted tin is poured into it, and rubbed with flax coiled hard over the surface to be coated. This tin may be either pure, such as that known by the name of *grain tin*; or a composition consisting of two parts of tin and one of lead. For very obvious reasons, we should certainly prefer the pure tin; but the generality of workmen give the preference to the composition, because the surface coated with it appears more brilliant. The tin is not always put into the vessel in a liquid state; for some workmen drew it in small pieces over the surface to be coated, and then heat the vessel till the tin melt, when they rub it as formerly. In tinning old vessels which have been tinned before, the process is somewhat different. In these cases, the surface is first scraped with an instrument proper for the purpose, or scoured with the scales of iron, from a blacksmith's shop; it is then strewed over with sal ammoniac in powder, instead of rosin, or an infusion of sal ammoniac in stale urine is boiled in it till the urine be evaporated, and it is then tinned with pure tin; the composition of tin and lead being in this case never used. The tin, while liquid, is rubbed into the surface with a piece of sal ammoniac, instead of a bundle of flax. When iron vessels are to be tinned, they are first cleaned with muriatic acid, after which the process is the same as in the tinning of old copper.

(2.) **TINNING OF COPPER**. To prevent the poisonous effects of copper, culinary vessels made of that metal are usually covered with tin on the inside. In preparing them for this operation, the vessels are first scraped clean and bright. They are next rubbed with sal ammoniac, to clean them more completely. They are then heated and sprinkled with powdered rosin, which prevents the surface of the copper from being oxydized or calcined. The melted tin is then poured on, and spread about. It is however, justly complained,

that one *single* tinning of copper vessels is not sufficient to preserve them from the action of the air, moisture, and saline substances; because these vessels, even when well tinned, are observed to be liable to rust. This may be remedied by a thicker covering of tin. A manufacture of this kind was some years ago established at Edinburgh. The method is to make the surface of the copper very rough, upon a rough faced anvil, or by a machine contrived on purpose, and the tin put upon it in this state; after which the copper, with the tin on it, is hammered quite smooth. It was objected to this invention and *real improvement*, even by the celebrated Fourcroy himself, that the degree of heat, often superior to that of boiling water, to which such vessels are exposed, would melt the tin, and leave the copper uncovered. But this objection is void of foundation, for tin will not melt with any degree of heat while it is covered by water. To prevent every such consequence, some propose an alloy of silver or platinum; but the proposal is not necessary, and besides would prove too expensive for culinary vessels.—Vessels that are only lined with a *single* covering of tin require a *very small* quantity of that metal, a vessel of 9 inches diameter, and $3\frac{1}{2}$ inches deep, requiring no more than the surprising small quantity of 21 grains of tin to cover it perfectly. Only in using these vessels, care should be taken to allow no corrosive or solvent liquid to remain long in them after using; and when any particle of the tin begins to wear off, the vessel should be tinned all over *anew*, which will cost a mere trifle.

(1.) **TINNIS**, a very high mountain of Scotland, in Roxburghshire, in the parish of **CASTLE-TOWN**.

(2.) **TINNIS**, a river of Roxburghshire, which rises in the above mountain, and runs into the Liddel.

TINNITUS AURIUM, a noise in the ears like the continued sound of bells, very common in many disorders, particularly in nervous fevers.

* **TINNY**. *adj.* [from *tin*.] Abounding with tin.—Those arms of sea that thrust into the *tinny* strand. *Drayton*.

TINO, an island on the coast of Genoa, at the entrance of the Gulf of Spezia.

(1.) **TINOS**. See **TINA**, N° 2: This island, besides **ST NICOLO** and **TINOS** contains above 30 villages.

(2.) **TINOS**, a town in the island of Tina, reckoned its 2d capital.

* **TINPENNY**. *n. f.* A certain customary duty anciently paid to the tithingmen. *Bailey*.

TIN-PLATE. *n. f.* [*tin* and *plate*.] called in Scotland **WHITE-IRON**, is a thin plate of iron covered with tin, to which it is united by chemical affinity. See **CHEMISTRY**, *Index*.

TINSEDA, a town of Africa, in Dara.

* **TINSEL**. *n. f.* [*étincelle*, French.] 1. A kind of shining cloth.—

A *tinzel* vail her amber locks did shroud.

Fairfax.

—Cloth of gold and cuts, underborne with a bluish *tinzel*. *Shak.*—

By *Thetis'* *tinzel* slipper'd feet.

Milton.

2. Any thing shining with false lustre; any thing showy and of little value.—

* **TO TIN**—

Who can discern the *tinſel* from the gold?

Dryden.

—If the man will too curiouſly examine the ſuperficial *tinſel* good, he undeceives himſelf to his own coaſt. *Norris.*

No glittering *tinſel* of May fair. *Swift.*
Ye *tinſel* infects, whom a court maintains.

Pope.

* To *TINSEL*. *v. a.* [from the noun.] To decorate with cheap ornaments; to adorn with luſtre that has no value.—

Scorns all her *tinſel'd* metaphors of pelf.

Cleaveland.

She, *tinſel'd* o'er in robes of varying hues.

Pope.

TINSHALY, a town of Ireland, in the county of Wicklow and province of Leinſter, 38 miles from Dublin.

* **TINT**. *n. f.* [*teinte*, Fr. *tinta*, Ital.] A dye; a colour.—

Or blend inauteous *tint* the colour'd maſs.

Pope.

Their vigour ſickens, and their *tints* decline.

Harte.

—Brilliancy of *tints*. *Reynolds.*

TINTA, a town of Peru, in Cuſco.

TINTENIAC, a town of France, in the dep. of the Ille and Vilaine, 10½ miles SSE. of Dinan; and 20 S. of St Malo.

(1.) **TINTO**, [*Gaelic*, *i. e.* the hill of fire,] a high hill or rather ridge of hills, in Lanarkſhire, between the pariſhes of Carmichael and Symington, extending above two miles from E. to SW. Near the E. end of the ridge, there is a circular cairn, the top of which is 2351½ feet above the ſea level; and 1740 feet above that of the Clyde, which runs about a mile from its baſe. From its *Gaelic* name, the top had been uſed as a telegraphic watch tower.

(2.) **TINTO**, a river of Spain, in Seville, ſo named from its waters being *tinged* with a yellow colour. They have a petrifying quality. No fiſh live in it: nor will any quadrupeds drink except goats, whoſe fleſh acquires a better flavour. It retains theſe qualities till it paſſes Niebia, when by the influx of many rivulets, they are annihilated. It falls into the Atlantic at Huelva, and is navigable by large veſſels 9 miles above it.

TINTORETTO, James Robuſti, a celebrated painter, born at Venice, in 1512. He was the diſciple of Titian, who, fearing he would become a powerful rival, diſmiſſed him. His ſon and daughter were alſo good artiſts. He died in 1594.

TINWALD, a pariſh of Scotland, in Dumfriſſhire, united to that of **TRAILFLAT**, in 1650: the two forming a rectangular figure, 6 miles long, and 4 broad, lying on the E. bank of **LOCHER MOSS**, which ſeparates it from Dumfriſſhire, and watered by the river *Ar*. The greater part of the ſoil is arable; that on the S. is a rich dry loam, producing great crops of all kinds. A part of a great Roman road paſſes through it, from Brunſwick to Dunſcore. The population, in 1790, was 850; increaſe 55 ſince 1755.

* **TINWORM**. *n. f.* An infect. *Bailey.*

* **TINY**. *adj.* [*tint*, *tynd*, Daniſh.] Little; ſmall;

VOL. XXII. PART II.

puny, A burleſque word.—Any pretty little *tiny* kickſhaws. *Shak.*

When that I was a little *tiny* boy. *Shak.*

Thy pigmy children, and thy *tiny* ſpouſe.

Swift.

TINZEDA, a town of Africa, in Biledulgerid, ſeated on a river ſo named, in a country fertile in dates, corn, barley, indigo, &c. Lon. 6. 13. W. Lat. 27. 30. N.

TINZUELA, a large and ſtrong town of Biledulgerid, ſeated on the Dras. Lon. 5. 43. W. Lat. 28. 15. N.

TION, a river of the French empire, in the dep. of Mont. Blanc, and ci-devant duchy of Savoy; which runs from the lake of Annecy to the Siera.

TIOOKEA, the name given by the natives to **KING GEORGE'S ISLANDS**.

TIORN, an iſland in the North Sea, near the W. coaſt of Sweden; 27 miles in circuit, containing 3 pariſhes, and abounding with good paſture.

* **TIP**. *n. f.* [*tip*, *tipken*, Dutch.] Top; end; point; extremity.—

The *tip* no jewel needs to wear,

The *tip* is jewel of the ear.

Sidney.

—They touch the beard with the *tip* of their tongue, and wet it. *Bacon.*

Thrice upon thy fingers *tip*.

Milton.

—All the pleaſure dwells upon the *tip* of his tongue. *South.*—Thirty clandestine marriages that have not been touched by the *tip* of the tongue.

Addiſon.—Fine *tip* of an ear and pretty elbow.

Pope.
* To **TIP**. *v. a.* [from the noun.] 1. To top; to end; to cover on the end.—

In his hand a reed

Stood waving, *tipp'd* with fire.

Milton.

With truncheon *tipp'd* with iron head. *Hudib.*

Weigh the paws, when *tipp'd* with gold. *Add.*

Quartos, octavos ſhape the leſſ'ning pyre, And laſt a little Ajax *tips* the ſpire. *Pope.*

Tell how the moon-beam trembling falls,

And *tips* with ſilver all the walls. *Pope.*

Tips with jet.

Thomſon.

2. To ſtrike ſlightly; to tap.—

—She

Tips the wink before the cuckold's face.

Dryden.

—The jackanapes *tipped* me the wink. *Tatler.*
A third rogue *tips* me by the elbow. *Swift.*

Then *tips* their forehead in a jeer,

As who ſhould ſay, ſhe wants it here. *Swift.*

Tipping him with half a crown. *Swift.*

TIPA. *n. f.* the viceroy, deputy, or prime miniſter of the Grand Lama of Tartary, who manages all his ſecular buſineſs. See **LAMA**, N^o 1; and **TIBET**, § 9.

TIPERA. See **TIPRA**.

TIPHA, an ancient town of Boeotia, now called Teſſ. See **TEFF**.

(1.) **TIPHSAH**, a city of Iſrael, in the W. of Ephraim, near Tirzah, and 6 miles from Samaria. It was deſtroyed by Menahem, and the people maſſacred.

(2.) **TIPHSAH**, a city of Syria, on the Euphrates; E. of Syria, and 600 miles NW. of Babylon. It was the NE. border of Solomon's dominions.

D d d

TIPING,

TIPING, a town of Asia, in Corea; 25 miles SE. of Kingkitao.

(1.) **TIPPERARY**, a county of Ireland in the prov. of Munster, bounded on the W. by those of Fimerick and Clare, on the E. by Kilkenny and Queen's County, S. by Waterford, and NNE. by King's county and the territory of the ancient O'Carols. It extends about 42 miles in length, and 27 in breadth, containing 599,500 acres, divided into 12 baronies, in which are several market-towns and boroughs. It sends 2 members to parliament. The N. part of it is mountainous and cold; but in the south the air is milder, and the soil much more fertile, producing plenty of corn, and good pasture for the numerous herds of cattle and flocks of sheep with which it abounds. The N. part is called **ORMOND**. A district in this county was anciently called the *County of the Holy Cross of Tipperary*, from a famous abbey in it styled *Holy Cross*, on account of a piece of Christ's cross that was said to be preserved there. This abbey and district enjoyed also special privileges in former times. The remains of the abbey, or rather the spot where it stood, are still held in great veneration, and much resorted to by the Roman Catholics.

(2.) **TIPERARY**, the capital of the above county, lies 20 miles SE. of Limerick, and 9. W. of Cahel.

* **TIPPET**. *n. f.* [*tappet*; Sax.] Something worn about the neck.—He had a *tippet* of fine linen. *Bacon*.

* **TIPPLE**. *n. f.* [from the verb.] Drink; liquor.—While the *tipple* was paid for, all went merrily on. *L'Estrange*.

(1.) * **TIPPLE**. *v. a.* To drink in luxury or excess.—

He *tipples* palmestry, and dines
On all her fortune telling lines. *Cleveland.*
A peel'd sic'd onion eats, and *tipples* verjuice. *Dryden*.

Thoughtful of drink, and eager in a dream,
Tipples imaginary pots of ale. *Philips*.

(2.) * **To TIPPLE**. *v. n.* [*tepl*. a dug, old Teutonic.] To drink luxuriously; to waste life over the cup.—

Let us grant it is not amiss to sit,
And keep the turn of *tippling* with a slave. *Shak.*

* **TIPPLED**. *adj.* [from *tipple*.] Tipsy; drunk. *Half tipped* at a rainbow feast. *Dryden*.

* **TIPPLER**. *n. f.* [from *tipple*.] A sottish drunkard; an idle drunken fellow.

TIPPOO, or **TIPPOO SAIB**, a celebrated Indian prince, the son of Hyder Ali, and like his father, a great opponent of the British interest in Hindoostan, was born about 1749. He was taught several of the European languages, and was very fond of writing. During the life of his father, he was universally esteemed, but after his accession to the throne, is said to have become capricious and even cruel. Of his death, and the partition of his dominions, an account is given under the article **INDIA**, § 29.

(1.) **TIPRA**, or **TIPERA**, a kingdom consisting of a mountainous district of Hindoostan, seated on the E. of Bengal, on the borders of Meckley. The people were formerly independent, but afterwards became subject to Aracan. They are

afflicted with the *gaitre*. They are of very singular manners, but most horribly savage and barbarous.

(2, 3.) **TIPRA**, a town and river in the above kingdom. Lon. 110. 0 E. Ferro. Lat. 24. 20. N.

TIPSA, a town of Africa, in Algiers; 75 miles SE. of Constantina.

(1.) * **TIPSTAFF**. *n. f.* [*tip* and *staff*.] 1. An officer with a staff tipped with metal. 2. The staff itself so tipped.—One held in his hand a *tipstaff* of a yellow cane, tipped at both ends with blue. *Bacon*.

(2.) The **TIPSTAFF** is an officer who attends the judges with a kind of staff *tipped* with silver, and takes into his charge all prisoners who are committed or turned over at the judge's chambers.

* **TIPSY**. *adj.* [from *tipple*.] Drunk; overpowered with excess of drink.—

The riot of the *tipsy* bacchanals. *Shak.*
Tipsy dance and jollity. *Milton*.

* **TIP-TOE**. *n. f.* [*tip* and *toe*.] The end of the toe.—

Upon his *tiptoes* stalketh stately by. *Spenser*.
He that outlives this day, and comes safe home,
Will stand a-*tiptoe* when this day is nam'd. *Shak.*

Night's candles are burnt out, and jocund day
Stands *tiptoe* on the misty mountains tops. *Shak.*

Religion stands on *tiptoe* in our land. *Herbert*.
Ten ruddy wildings in the wood I found,
And stood on *tiptoes* from the ground. *Dryden*.

TIPULA, the CRANE-FLY; a genus of insects belonging to the order of *diptera*. The mouth is a prolongation of the head; the upper jaw is arched. They have two palpi, which are curved, and longer than the head. The proboscis is short, and bends inwards. Gmelin enumerates 123 species, of which 14 are British. They are divided into two families. 1. Those with wings displayed. 2. Those with wings incumbent, and which in form resemble a gnat. This two-winged insect is often taken for the gnat, which it resembles, but has not its mischievous instinct, nor its murderous proboscis. The larger *tipulæ* go by the name of *sempstresses*, the small ones by that of *culiciform*; the latter, in fine summer evenings flutter about the water side in legions. The grubs of the larger *tipulæ* dwell in holes of decayed willows, where they change into chrysalids, and in that state have the faculty of breathing through two small curve horns; besides which they are endowed with progressive motion, but not retrogressive, being impeded by little spines placed on every ring of the abdomen. The larvæ and chrysalids of the little *tipulæ* are found in water. They are various in colour, form, and carriage; some being grey, others brown, and others red; some, like the polypus, furnished with a pair of arms; several with cylindrical tubes that perform the office of vent holes. These swim with nimbleness; those never leave the holes they have dug for themselves in the banks of rivulets. Lastly, others make a silken cocoon that receives part of their body; but all of them, after a period, renounce their reptile and aquatic life, and get wings; their frame is then so weak, that a touch is enough to crush them. They are sometimes of a beautiful green, sometimes coal-black; and the most remarkable are those whose fore-legs, extra-ordinarily

ordinarily long, do not touch the ground, and are moveable like antennæ.

TIR, 2 towns of Persia: 1. in Chorasan, 21 miles NW. of Herat: 2. in Farfistan, 60 miles NE. of Schiras.

TIRABOSCHI, Jerome, a celebrated Italian writer, born at Bergamo, in 1731. He was a Jesuit, and became professor of Oratory at Milan, and librarian to the D. of Modena, who ennobled him. He wrote, 1. *Memoirs of the order of Hermilies*: 2. *History of the Writers of Modena*, in 6 vols. 4to. 3. *History of Italian Literature, from the age of Augustus*, 13 vols. 4to. He died in 1794.

TIRAGHT, an island in the Atlantic, near the W. coast of Ireland; 8 miles SW. of Dunmore Head.

TIRAMANYNUTOO, a river of Hindoostan, which runs into the Canvery, 8 m. N. of Carroor.

TIRAN, an island in the Red Sea. Lat. 27. 40. N.

TIRANO, a town of Italy on the Adda, in the ci-devant territory of the Valteline. It was wall'd by Lewis Sforza, as a defence against the Grisons, who however destroyed the fortifications and took it. Its chief trade is in silk and wine. It is 4 miles ENE. of Morbegno, and 18 W. of Bormio.

TIRAQUEAU, or ? Andrew, a French lawyer, **TIRAQUELLUS**, } of the 16th century. He was a counsellor in the parliament of Paris, and laboured much to banish chicanery from the law. He was much employed by Francis I. and Henry II. in important affairs, and approved himself a man of integrity. His works make 7 vols. folio. He died in 1574.

TIRAS, a son of Japhet, the founder of **THRACE**.

TIRBIA, a town of Spain in Catalonia; 14 miles NW. of Urgel.

(1.) * **TIRE**. *n. f.* [*tyr*, Dutch.] 1. Rank; row. Sometimes written *tire*.—Your lowest *tire* of ordnance must lie four foot clear above water, when all loading is in. *Raleigh*.

Stood rank'd of seraphim another row,
In posture to displode their second *tire*
Of thunder. *Milton*.

—In all those wars there were few triremes, most of them being of one *tire* of oars of fifty banks. *Arbutnot*. 2. Corrupted from *tiar* or *tiara*, or from *attire*.] A head-dress.—

On her head she wrote a *tire* of gold. *Spenser*.
If I had such a *tire*, this face of mine
Were full as lovely as this of hers. *Shak*.
A gloomy mantle of dark flame, the *tire*
That crowns his hated head on high, appears. *Craqueo*.

A hiss from all the snake *tire* went round. *Pope*.

3. Furniture; apparatus.—
Immediate sieges, and the *tire* of war
Rowl in thy eager mind. *Philips*.
—When they first peep forth of the ground, they shew their whole *tire* of leaves, then flowers, next seeds. *Woodward*.

(1.) **TIRE**, in the sea language, is a row of cannon placed along a ship's side, either above upon deck, or below, distinguished by the epithets of upper and lower *tires*.

(1.) * **To TIRE**. *v. a.* [*tirian*, Saxon.] 1. To fatigue; to make weary; to harass; to wear out with labour or tediousness.—

Tir'd with toil, all hopes of safety pass. *Dryd*.
To tell thee what a hundred tongues would *tire*. *Dryden*.

2. It has often *out* added to intend the signification.—Often a few *do tire out* a greater number. *Bacon*.—

Tir'd out, at length a spreading stream he spy'd. *Tickel*.

3. [From *attire* or *tire*, from *tiara*.] To dress the head.—Jezebel *tired* her head. 2 *Kings*, ix. 30.

(2.) * **To TIRE**. *v. n.* [*teorian*, Saxon.] To fail with weariness.

* **TIREDDNESS**. *n. f.* [from *tired*.] State of being tired; weariness.—It is not through the *tiredness* of the age of the earth, but through our own negligence that it hath not satisfied us bountifully. *Hakewill*.

TIREE. See **TIRY**.

TIREH, a town of Asiatic Turkey, in Natolia, on the Meander; 25 miles NE. of Scala Nova, and 31 SSE. of Smyrna.

TIRESIAS, a soothsayer of antiquity, was the son of Everes and Chariclo. Minerva, being accidentally seen by him as she was bathing, deprived him of his sight; but gave him afterwards superior endowments. Others say, that Juno struck him stone-blind for deciding a case between Jupiter and her, to her dissatisfaction; for which Jupiter gave him the faculty of divination: He was the most celebrated prophet in the Grecian annals. Ulysses was ordered by Circe to consult him in the shades.

* **TIREDSOME**. *adj.* [from *tire*.] Wearisome; fatiguing; tedious.—Inculcating precept upon precept proves *tiresome* to the reader. *Addison*.—Nothing is *so tiresome* as the works of dogmatick critics. *Addison*.

* **TIREDSOMENESS**. *n. f.* [from *tiresome*.] Affect or quality of being tiresome.

* **TIREWOMAN**. *n. f.* [*tire* and *woman*.] A woman whose business is to make dresses for the head.—Why should they not value themselves for this outside fashionableness of the *tirewoman's* making? *Locke*.

TIREYMEG, a lake of N. America. Lon. 107. o. W. Lat. 61. 51. N.

(1.) **TIRGUL**, a town of European Turkey, in Moldavia; 62 miles W. of Jassy.

(2.) **TIRGUL FORMA**, another town of Turkish Moldavia; 20 miles W. of Jassy.

TIRHAKAH, a monarch of Ethiopia, an ally of Hezekiah king of Judah, who, to assist him, march'd against Sennacherib king of Assyria, but was defeated by him. 2 *Kings*, xix. 19.

TIRI. See **TIRY**.

TIRIDA, an ancient town of Thrace.

* **TIRINGHOUSE**. } *n. f.* [*tire* and *house*, or *room*.]
* **TIRINGROOM**. } The room in which players dress for the stage.—This green plot shall be our stage, this hawthorn brake our *tiringhouse*. *Shak*.

Man's life's a tragedy; his mother's womb,
From which he enters, is the *tiringroom*. *Wotton*.
TIRIPIN, a town of S. America, in Terra Firma; and province of Cumana.

TIRLEMONT, or **TILLEMONT**, a city of the French empire, in the dep. of the Dyle, and late prov. of Austrian Brabant, seated on the Geete. In 1635 it was taken and sacked by the French and Dutch; in 1701 it was burnt. In 1792 the Austrians were defeated near it, and in 1793 the French. It lies 9 miles SE. of Louvain, and 24 WNW. of Liege.

TIRNAU, a town of Hungary, built in the 13th century, containing 9 churches, and 9 convents. In 1682, it was burnt by Count Tekely. It is 20 miles ENE. of Presburg, and 50 E. of Vienna.

TIRO, Tullius, a freed man of Cicero, highly esteemed by his master for his learning and other good qualities. He invented **STENOGRAPHY**, or that species of it used among the Romans called *Note*. (See *NOTÆ*.) He wrote *The Life of Cicero*. and other tracts now lost.

TIROL, or the } a county of Germany in the
TIROLESE, } empire of Austria, under which may be included the territories belonging to the bishops of Brizen, Trent, and Chur, Teutonic Order, and the prince of Dietrichstein, the Austrian feignories before the Arlberg, and the Austrian district in Suabia. It is 150 miles long, and 120 broad, and contains 28 large towns. The face of the country is very mountainous. Of these mountains, some have their tops always buried in snow; others are covered with woods, abounding with a variety of game; and others are rich in metals, and marble of all colours. Of the lower, some yield plenty of corn, others wine, and woods of chestnut trees. The valleys are also exceedingly fertile and pleasant. In some places considerable quantities of flax are raised, in others there is a good breed of horses and horned cattle; and, among the mountains, great numbers of chamois and wild goats. In this country are also found granates, rubies, amethysts, emeralds, a species of diamonds, agates, cornelians, chalcodones, malachites, &c. It has also hotbaths, acid waters, salt-pits, mines of silver, copper, and lead, mineral colours, alum, and vitriol. The principal river of Tirol is the Inn. (See *INN*, N° 2.) Tirol is divided into six quarters, namely, those of the Lower and Upper Innthal, Vintsgow, Etch, Eisack, and Pustertal.

TIRONIANÆ. See *NOTÆ*.

TIRSCHENRIED, a town of Bavaria, 12 miles E. of Kemnat, and 28 NNE. of Amberg.

TIRSHATHA, a title given to Zerubbabel, and Nehemiah. Some think it means *cup bearer*, but others, with more propriety say, it signifies *governor*. (Ezr. ii. 65. Neh. x. 1.) See *NEMUSIAH*.

TIRSNUM, a town of Sweden, in E. Gothland; 3 miles S. of Linköping.

* **TIRWIT**. *n. f.* [*vanellus*, Latin.] A bird, *Linseforth*.

(1.) **TIRY**, **TIRI**, or **TIR-EE**, an island of Scotland, one of the Hebrides, belonging to Argyllshire; about 12 miles long, and near 2½ broad. The coast is intersected with many fine bays or harbours of considerable extent. About half of the surface is arable and interspersed with small rocks and rising grounds; none of which are more than 150 feet above the sea level; but the surface in general is quite level. There are 24

small lakes in the island, which cover about 600 acres. The soil of Tiry is various; black moor, sand, &c. but sand is most prevalent: the usual crops are barley, black oats, potatoes, and flint. The people are chiefly employed in the manufacture of kelp, to the extent of 245 tons a-year, and in the fisheries. The total population, in 1791, was 2416: the number of horses, 1400; sheep, 600; and black cattle, 1800. There is a regular ferry to Coll, 3 miles distant. Iron-stone, granite, lime-stone, whin-stone, and tuingin, have been found in it, also very fine marble. The D. of Argyll is proprietor.

(2.) **TIRY**, a parish of Scotland in Argyllshire, comprehending the islands of **TIRY**, **COLL**, and **GUNNA**, besides several uninhabited islands, containing in all about 25,000 acres. In 1791, the population was 3457; the increase 755, since 1755.

TIRYNTHUS, a town of Peloponnesus, in Argos, founded by **TIRYNX**. Hercules resided much in it. *Pauf.* ii. 16.

TIRYNX, a son of Argus, who founded **Tirynthus**.

TIRZAH, a city of Israel, in the country of Ephraim, remarkable for its beauty and elegance. It was destroyed by Menahem.

* **TIS**, contracted for *it is*.—

Tis destiny unshunnable. *Shak.*

TISÆUM, a mountain of Thessaly. *Pol.*

(1.) **TISAMENES**, a son of **ORISTES** and **Hermione** who succeeded to the thrones of Argos and Sparta, but was expelled by the Heraclidae, in the 3d year of his reign. He retired to Achaia, and was killed in a battle with the Ionians. *Pauf.* 3.

(2.) **TISAMENES**, K. of Thebes, the son of **Therfandes**, grandson of **Polynices**, and great-grandson of **Oedipus**.

TISDRA, a town of Africa. *Cæf. Afr.* 76.

TISHEEH, a city of Israel, in Gilead, the birth place of **Eljah**.

TISHBITES, the natives of **TISHBEH**.

TISHOLTZ, a town of Hungary; 10 miles ENE. of **Libeten**.

TISIARUS, an ancient town of Africa.

TISIAS, an ancient philosopher of Sicily, said to have been the inventor of rhetoric. *Cic. de Inv.* and *de Orat.* i. 18.

* **TISICAL**. *adj.* [for *pathifical*.] Consumptive.

* **TISICK**. *n. f.* [corrupted from *pathifick*.] Consumption; morbid waste.

TISIPHONE, in the mythology, daughter of **Acheron** and **Nox**, one of the 3 **FURIES**, who executed divine vengeance on the wicked in Tartarus. She was represented with a whip in her hand, and serpents instead of hair on her head.

TISQUIM, a lake of N. America. *Lon.* 95. 45. W. *Lat.* 56. 10. N.

TISRI, or **TIZRI**, in chronology, the first Hebrew month of the civil year, and the 7th of the ecclesiastical or sacred year. It answered to part of our September and October.

TISSA, an ancient town of Sicily, now called **RANDAZZO**. *Sil. Ital. Cic.*

TISSAPHERNES, a satrap of Persia. See *PERSIA*, § 12.

TISSOT, Dr, an eminent Swiss physician, the author of many useful works. He distinguished himself

himself early by writing in favour of *Inoculation*. He died in 1797.

* **TISSUE**. *n. f.* [*tissue*, Fr. *tisan*, to weave, Norman Saxon.] Cloth interwoven with gold and silver, or figured colours.—

In their glittering *tissues* emblaz'd
Holy memorials. Milton.

A robe of *tissue*, stiff with gold wire. Dryden.

* **To TISSUE**. *v. a.* [from the noun.] To interweave; to variegate.—The chariot was covered with cloth of gold *tissued* upon blue. *Bacon*.—They have been always frank of their blessings to countenance any great action; and then, according as it should prosper, to *tissue* upon it some pretence or other. Wotton.

With radiant feet the *tissued* clouds down
steering. Milton.

TISTE, a town of Germany in Verden; 20 m. NE. of Rottenburg.

* **TIT**. *n. f.* 1. A small horse: generally in contempt.—

No stabling of pasture with baggagely *tit*. Tupper.
Being as worthy to sit

On an ambling *tit*. Denham.

2. A woman: in contempt.—What does this envious *tit*. *L'Estrange*.—A willing *tit* that will venture her corps with you. Dryden.—

Short pains for thee, for me a son and heir.
Girls cost as many throes in bringing forth:

Beside, when born, the *tit*s are little worth. Dryd.

3. A *titmouse* or *tomtit*. [*parus*, Latin.] A bird.

TITÆA, in the mythology, the mother of the **TITANS**. Some confound her with **TERRA**, or **CYBELE**.

(1.) **TITAN**, in fabulous history, the son of **Cælus** and **Terra**, and the eldest brother of **Saturn**, suffered the latter to enjoy the crown, on condition that he should bring up none of his male issue, by which means the crown would at length revert to him; but Jupiter being spared by the address of **Rhea**, **Saturn's** wife, **Titan** and his children were so enraged at seeing their hopes frustrated, that they took up arms to revenge the injury; and not only defeated **Saturn**, but kept him and his wife prisoners till he was delivered by **Jupiter**, who defeated the **Titans**; when from the blood of these **Titans** slain in the battle, proceeded serpents, scorpions, and all venomous reptiles. See **SATURN**, and **MYTHOLOGY**, § 11.

(2.) **TITAN**, in modern geography, or **CABAROS**, an island of France, in the Mediterranean, one of the most eastern of the **HERES** Islands.

TITANIA, a title of **Pyrrha**, as grand-daughter of **Titan**; also of **Diana**. *Ovid*.

TITANIDES, the sons of **Titan**; the giants, who warred against the gods.

TITANIUM, *n. f.* one of the 22 metals, and one of the ten new ones lately discovered. See **METALLURGY**, Part I. Sect. I. For an account of the phenomena and properties of this new metal, with its ores, oxides, &c. and the method of analyzing them. See **MINERALOGY**, Part II. Chap. VII. Ord. XX. Gen. I. Sp. 1—3. Part III. Chap. IV. § XX. and Chap. V. § 20.

* **TITBIT**. *n. f.* [properly *tidbit*; *tid*, tender, and *bit*.] Nice bit; nice food.—John pampered equire South with *titbits* till he grew wanton
Arbuthnot.

TITCHFIELD. See **TICHFIELD**.

TITCHIUM, a town of Russia, in Novgorodskoi on the Sias; 80 miles NNE. of Novgorod. Lon. 51. 0. E. Ferro. Lat. 59. 32. N.

TITEROD, a town of Norway, in Aggerhuus 38 miles N. of Christiania.

(1) * **TITHE**. *n. f.* [*teotha*, Saxon, tenth.] 1. The tenth part; the part assigned to the maintenance of the ministry.—They say, that it is pity the devil should have God's part, which is the *tithe*. *Bacon*.—

Sometimes comes she with a *tithe* pigs tail.

2. The tenth part of any thing.—The *tithe* of a hair was never lost in my house before. *Shak*.—

Since the first sword was drawn about this question,

Ev'ry *tithe* soul 'mongst many thousand dimes
Hath been as dear as Helen. Shakespeare.

3. Small part; small portion, unless it be misprinted for *titles*.—Wars for religion are seldom to be approved, unless they have some mixture of civil *tithe*s. *Bacon*.

(2.) **TITHES**, in ecclesiastical law, are defined to be the 10th part of the increase, yearly arising and renewing from the profits of lands, the stock upon lands, and the personal industry of the inhabitants: the first species being usually called *predial*, as of corn, grass, hops, and wood; the 2d *mixed*, as of wool, milk, pigs, &c. consisting of natural products, but nurtured and preserved in part by the care of man; and of these the 10th must be paid in gross; the 3d *personal*, as of manual occupations, trades, fisheries, and the like; and of these only the tenth-part of the clear gains and profits is due.

(3.) **TITHES**, HISTORY OF. We cannot ascertain the time when tithes were first introduced. The first mention of them in any written English law, is a constitutional decree, made in a synod held A. D. 786, wherein the payment of tithes in general is strongly enjoined. This decree, which at first bound not the laity, was effectually confirmed by two kingdoms of the heptarchy, in their parliamentary conventions of estates, respectively consisting of the kings of Mercia and Northumberland, the bishops, dukes, senators, and people. The next authentic mention of them is in the *saedus Edwardi et Guthruni*; or the laws agreed upon between king Guthrun the Dane, and Alfred and his son Edward the Elder, kings of England, about A. D. 900. There we find the payment of tithes enjoined, and a penalty added upon non-ob servance: which law is seconded by the laws of Athelstan, about A. D. 930. Upon their first introduction, though every man was obliged to pay tithes in general, yet he might give them to *what priests* he pleased; which were called *arbitrary consecrations of tithes*; or he might pay them into the hands of the bishop, who distributed among his diocesan clergy the revenues of the church, which were then in common. But when dioceses were divided into parishes, the tithes of each parish were allotted to its own particular minister; first by common consent or the appointments of lords of manors, and afterwards by the written law of the land. Arbitrary consecrations of tithes took place again afterwards, and were
in

in general use till the time of King John. But they were prohibited by Pope Innocent III. about A. D. 1209, in a decretal epistle sent to the Abp. This epistle, says Sir Edward Coke, bound not the lay subjects of this realm; but being reasonable and just, it was allowed of, and so became *lex terræ*.

(4.) **TITHES, LAWS RESPECTING.** Lands and their occupiers may be exempted from the payment of tithes, either in part or totally; first, by a real composition; or, 2d, by custom or prescription. 1. A real composition is when an agreement is made between the owner of the lands and the parson or vicar, with the consent of the ordinary and the patron, that such lands shall for the future be discharged from payment of tithes, by reason of some land or other real recompense given to the parson in lieu and satisfaction thereof. This was permitted by law, because it was supposed that the clergy would be no losers by such composition; since the consent of the ordinary, whose duty it is to take care of the church in general, and of the patron, whose interest it is to protect that particular church, were both made necessary to render the composition effectual: and hence have arisen all such compositions as exist at this day by force of the common law. But experience showing that even this caution was ineffectual, and the possessions of the church being by this and other means every day diminished, the disabling statute 13 Eliz. c. 10. was made; which prevents, among other spiritual persons, all parsons and vicars from making any conveyances of the estates of their churches, other than for three lives of 21 years. So that now, by this statute, no real composition made since the 13 Eliz. is good for any longer term than three lives of 21 years, though made by consent of the patron and ordinary: which has indeed effectually demolished this kind of traffic; such compositions being now rarely heard of, unless by authority of parliament. 11. A discharge by custom or prescription, is where time out of mind such persons or such lands have been either partially or totally discharged from the payment of tithes. And this immemorial usage is binding upon all parties; as it is in its nature an evidence of universal consent and acquiescence, and with reason supposes a real composition to have been formerly made. This custom or prescription is either *de modo decimandi*, or *de non decimando*. A *modus decimandi*, commonly called by the simple name of a *modus* only, is where there is by custom a particular manner of tithing allowed, different from the general law of taking tithes in kind, which are the actual tenth part of the annual increase. This is sometimes a pecuniary compensation, as twopence an acre for the tithe of land; sometimes it is a compensation in work and labour, as that the parson shall have only the twelfth cock of bay, and not the tenth, in consideration of the owner's making it for him: sometimes, in lieu of a large quantity of crude or imperfect tithe the parson shall have a less quantity when arrived at greater maturity, as a couple of fowls in lieu of tithe-eggs, and the like. Any means, in short, whereby the general law of tithing is altered, and a new method of taking them is introduced, is called a *modus deciman-*

di, or special manner of tithing. A prescription *de non decimando* is a claim to be entirely discharged of tithes, and to pay no compensation in lieu of them. Thus the king by his prerogative is discharged from all tithes. So a vicar shall pay no tithes to the elector, nor the rector to the vicar for *ecclesia decimas non solvit ecclesie*. But these personal privileges (not arising from or being annexed to the land) are personally confined to both the king and the clergy; for their tenant or lessee shall pay tithes, though in their own occupation their lands are not generally tithable. And, generally speaking, it is an established rule, that in lay hands, *modus de non decimando non valet*. But spiritual persons or corporations, as monasteries, abbots, bishops, and the like, were always capable of having their lands totally discharged of tithes by various ways: as, 1. By real composition. 2. By the pope's bull of exemption. 3. By unity of possession; as when the rectory of a parish, and lands in the same parish, both belonged to a religious house, those lands are discharged of tithes by this unity of possession. 4. By prescription; having never been liable to tithes, by being always in spiritual hands. 5. By virtue of their order; as the Knights Templars, Cistercians, and others, whose lands were privileged by the pope with a discharge of tithes. Though, upon the dissolution of abbey by Henry VIII. most of these exemptions from tithes would have fallen with them, and the lands become tithable again, had they not been supported and upheld by the statute 31 Henry VIII. c. 13. which enacts, that all persons who should come to the possession of the lands of any abbey then dissolved, should hold them free and discharged of tithes, in as large and ample a manner as the abbey themselves formerly held them. And from this original have sprung all the lands which being in lay hands, do at present claim to be tithe-free; for if a man can show his lands to have been such abbey-lands, and also immemorially discharged of tithes by any of the means before-mentioned, this is now a good prescription *de non decimando*. But he must show both these requisites; for abbey-lands, without a special ground of discharge, are not discharged of course; neither will any prescription *de non decimando* avail in total discharge of tithes, unless it relates to such abbey-lands.

(1.) * **To TITHE.** *v. a.* [teotbian, Saxon.] To tax; to levy the tenth part.—I will *tithe* them one with another. *Spenser.*

By declamation and a *tithe* death,
If thy revenges hunger for that food
Which nature loaths, take thou the destin'd
tenth. *Shak.*

—When thou hast made an end of *tithing* all the tithes of thine increase, the third year, the year of *tithing*, give unto the Levite, stranger, fatherless, and widow. *Deut. xxvi. 12.*

(2.) * **To TITHE.** *v. n.* To pay tithe.—

For lambe, pig, and calf, and for other the like,

Tithe so as thy cattle the lord do not strike.

Tusser.

* **TITHEABLE.** *adj.* [from *tithe*.] Subject to the payment of the tithes; that to which tithes may be taken,—The popish priest shall, on taking
the

the oath of allegiance to his majesty, be entitled to a tenth part or tithe of all things *titheable* in Ireland belonging to the papists, within their respective parishes. *Swift*.

* **TITHER.** *n. s.* [from *tithe*.] One who gathers tithes.

(*r.*) * **TITHING.** *n. s.* [*titbinga*, law Latin, from *tithe*.] 1. *Tithing* is the number or company of ten men with their families knit together in a society, all of them being bound to the king for the peaceable and good behaviour of each of their society: of these companies there was one chief person, who, from his office, was called (toothingman) tithingman; but now he is nothing but a constable. *Coxvel*.—Poor Tom, who is whipt from *tithing* to *tithing*. *Shak*. 2. Tithe; tenth part due to the priest.

Go not for thy *tithing* thyself to the devil.

Tusser.

(*a.*) **TITHING.** Anciently no man was suffered to abide in England above 40 days, unless he were enrolled in some tithing.—One of the principal inhabitants of the tithing was annually appointed to preside over the rest, being called the *tithing-man*, the head-borough, and in some countries the *borseholder*, or *borough's valder*, being supposed the discreetest man in the borough town, or tithing. The distribution of England into tithings and hundreds is owing to king Alfred. See *BORSEHOLDER*.

(*i.*) * **TITHINGMAN.** *n. s.* [*tithing* and *man*.] A petty peace-officer; an under constable.—Every *tithingman* may controul him. *Spenser*.

(*a.*) **TITHING-MEN** are a kind of petty constables, elected by parishes, and sworn into their offices in the court-leet, and sometimes by justices of the peace, &c.

TITHONUS, in fabulous history, the son of Lamedon king of Troy, was beloved by Aurora, who carried him to Delos, thence to Ethiopia, and at last to heaven, where she prevailed on the Destinies to bestow upon him the gift of immortality; but forgot to add that of *youth*. At last Tithonus grew so old that he was obliged to be rocked to sleep like an infant; when Aurora transformed him into a grasshopper; which renews its youth by casting its skin, and in its chirping retains the loquacity of old age.

* **TITHYMAL.** *n. s.* [*tithymalle*, French; *tythymallus*, Lat.] An herb. *Ainsworth*.

TITI, a lake of Suabia, in Stuhlingen, 14 miles NNW. of Stuhlingen.

TITIAN, or Vecelli, the most universal genius **TITIANO**, } for painting of all the Lombard school, the best colourist of all the moderns, and the most eminent for histories, portraits, and landscapes, was born at Cadore, in Friuli, in the late state of Venice, in 1477, or in 1480 according to Vafari and Sandrart. His parents sent him at ten years of age to one of his uncles at Venice, who finding that he had an inclination to painting, put him to the school of John Bellino. But as soon as Titian had seen the works of Giorgione, he preferred his manner and became his disciple; and he followed him in his practice so successfully, that several of the paintings of Titian were taken for the performances of Giorgione; and this success inspired that artist with such invincible jea-

lousy, that he broke off their connection for ever. The reputation of Titian rose rapidly; every new work contributed to extend his fame through all Europe; and he was considered as the principal ornament of the age. Charles V. enriched him by repeated bounties, conferred on him the honour of knighthood, and sat for his portrait several times. The excellence of Titian was not so remarkably apparent in the historical compositions which he painted, as in his portraits and landscapes, which seem to be superior to all competition; and even to this day, many of them preserve their original beauty, being as much the admiration of the present age, as they have deservedly been of the ages past. It would prove almost an endless task to enumerate the variety of works executed by this illustrious artist, at Rome, Venice, Bologna, and Florence, in other cities of Italy, in England, Spain, Germany, and France. He was of so happy a constitution, that he was never ill till 1576, when he died of the plague, at 99 years of age. His disciples were Paul Veronese, James Tintoret, James de Ponte Bassano, and his sons.

TITICACO, a large lake of S. America, in Buenos Ayres, above 180 miles in circumference, and 400 feet deep. (See *DELUGE*, § 7.) Its water, though neither salt nor brackish, is muddy; and its taste so nauseous as not to be potable.

TITHI, priests of Apollo. *Tempr*.

* **To TITILLATE.** *v. n.* [*titillo*, Lat.] To tickle.—

Just where the breath of life his nostrils drew,
A charge of snuff the wily virgin threw;
The gnomes direct to ev'ry atom just,
The pungent grains of titillating dust. *Pope*.

* **TITILLATION.** *n. s.* [*titillation*, French; *titillatio*, Lat. from *titillare*.] 1. The act of tickling.—Tickling causeth laughter; the cause may be the emission of the spirits, and so of the breath, by a slight from *titillation*. *Bacon*. 2. The state of being tickled.—In sweets, the acid particles seem so attenuated in the oil as only to produce a small and grateful *titillation*. *Arbutnot*. 3. Any slight or petty pleasure.—The delights which result from these noble entertainments, are dogged by no such sad sequels as are the products of those *titillations* that reach no higher than the senses. *Glanville*.

TITIN-ARA, a mountain of Russia, in Uphea, Lon. 79. c. E. Ferro. Lat. 52. 25. N.

TITIUS, Septimius, a poet of the Augustan age, famous for his lyric and tragic poems, which are celebrated by Horace; (i. ep. 3. v. 9.) but now lost.

(*1.*) * **TITLARK.** *n. s.* A bird.—The leverock, *titlark*, and linnet. *Walton*.

(*2.*) **TITLARK**, in ornithology. See *ALAUDA*.

(*1.*) * **TITLE.** *n. s.* [*titelle*, old Fr. *titulus*, Lat.] 2. A general head comprising particulars.—Three draw the experiments of the former four into *titles* and tables. *Bacon*.—I shall single out two particular *titles*, which give a handsome specimen of the excellencies of the English above other laws in other parts or *titles* of the same. *Hale*. 2. An appellation of honour.—

To leave his wife,
His mansion, and his *titles*.

Shak.
Such

Such *title* to himself

Reserving.

Milton.

3. A name; an appellation.—

—The devil himself could not pronounce a *title*

More hateful to mine ear.

Shak.

Ill worthy I such *title* should belong

To me transgressor.

Milton.

4. The first page of a book, telling its name, and generally its subject; an inscription.—

This man's brow, like to a *title* leaf,

Foretels the nature of a tragick volume. Shak.

—Our adversaries encourage a writer who cannot furnish out so much as a *title* page with propriety. Swift.

A pompous *title*, like a gaudy sign

Mean to betray dull sots to wretched wine.

Young.

5. A claim of right.—Let the *title* of a man's right be called in question; are we not bold to rely on the judgment of such as are famous for their skill in the laws? Hooker.—He paid his money for a *lye*, and took a bad *title* for a good. South.—

'Tis our duty

Such monuments, as we can build, to raise;

Left all the world prevent what we should do,

And claim a *title* in him by their praise. Dryden.

—If there were no laws to protect them, there were no living in this world for good men; and in effect there would be no laws, if it were a sin in them to try a *title*, or right themselves by them. Kettleworth.—Though you had an undoubted *title* by your birth, you had a greater by your courage. Dryden.—Conti would have kept his *title* to Orange. Addison.—She will be a slave to any thing that has not a *title* to make her one. Southern.

(2.) *TITLE*, in law, denotes any right which a person has to the possession of a thing, or an authentic instrument whereby he can prove his right. See the articles RIGHT, PROPERTY, &c.

(3.) *TITLES*, HISTORY, AND VARIETY OF. *Titles* were not so common among the ancient Greeks or Romans as they are in modern times. Till the reign of Constantine, the title of *Illustrissimus* was never given except to those who were distinguished in arms or letters: But at length it became hereditary in the families of princes, and every son of a prince was illustrious. The title of *Highness* was formerly given only to kings. The kings of England before the reign of Henry VIII. were addressed by the title of *your Grace*. That monarch first assumed the title of *Highness*, and afterwards that of *Majesty*. The title of *majesty* was first given him by Francis I. in their interview in 1520. Charles V. was the first king of Spain who assumed the same title. Princes, nobles, and clergy, generally have one title derived from their territories and estates, and another derived from their rank or from some other remarkable circumstance. The Pope has the title of *Holiness*. A cardinal is entitled *Eminent*, or *Most Eminent*. An archbishop is addressed *his Grace*, and *most Reverend*: a bishop has the title of *his Lordship*, and *right Reverend*. Inferior clergymen are *Reverend*. To an emperor is given the title of *Imperial Majesty*; to kings, that of *Majesty*; to the princes of Great Britain, *Royal Highness*; to those of Spain and Portugal, *Infant*; to electors, *Elec-*

toral Highness; to the princes of Italy and Germany, *Highness*; to the ci-devant Doge of Venice, *Most Serene Prince*; to the grand-master of Malta, *Eminence*; to nuncios and ambassadors of crowned heads, *Excellency*; to dukes, *Grace*; to marquises, earls, and barons, *Lordship*. The emperor of China, among his titles, takes that of *Tien Su*, "Son of Heaven." The Orientals, it is observed, are exceedingly fond of titles: the simple governor of Schiras, for instance, after a pompous enumeration of qualities, lordships, &c. adds the titles of *Flower of Courtesy*, *Nutmeg of Consolation*, and *Rose of Delight*.

(4.) *TITLE* TO THE CROWN, in the British Constitution. See SUCCESSION.

* *To TITLE*. *v. a.* [from the noun.] To entitle; to name; to call—

To these, that sober race of men, whose lives Religious, *titled* them the sons of God. Milton.

* *TITLELESS*. *adj.* [from *title*.] Wanting a name or appellation. Not in use.—

He was a kind of nothing, *titleless*. Shak.

* *TITLEPAGE*. *n. f.* [*title* and *page*.] The page containing the title of a book.—We should have been pleased to have seen our own names at the bottom of the *title-page*. Dryden.

TITLEY, Walter, Esq. born about 1700, was educated at Westminster, where he was patronised by Bp. Atterbury, who made him tutor to his son, and kept him in his family, till the time of the reported plot in 1722. He afterwards studied at Trinity College, Cambridge. He was sent envoy to Copenhagen, where he died after a long residence, much esteemed for his amiable qualities. He published several pieces, rather elegant than scientific.

TITLIS, a mountain of Switzerland, in the canton of Uri; one of the highest in Switzerland; 6 miles SW. of Potenza.

TITMONING, a town of Germany, in Saltzburg, near Bavaria, on the Salza. (See *SALTZBURG*.) It was almost desolated by the plague, in 1301, and was burnt by lightning in 1571, but since rebuilt.

(1.) * *TITMOUSE*, or *tit*. *n. f.* [*tit*, Dutch, a chick, or small bird; *titlingier*, Islandick, a little bird: *tit* signifies *little* in the Teutonic dialects.] A small species of birds.—

Before him sits the *titmouse* silent by. Spenser.

The *titmouse* and the peckers hungry brood. Dryden.

(2.) *TITMOUSE*, in ornithology. See *PARUS*.

TITOLO, a town of Naples, in the prov. of Basilicata; 6 miles SW. of Potenza.

TITORMUS, a shepherd of Ætolia, famous for his prodigious strength. He was contemporary with Milo of Crotona, whom he excelled, as he lifted on his shoulders a large rock which Milo could with difficulty move. *Ælian*. 12, 22. *Herod.* vi. 127.

TITSCHEN, a town of Moravia, in Prerau; 8 miles W. of Freyburg.

* *TITTER*. *n. f.* [from the verb.] 1. A restrained laugh. 2. I know not what it signifies in *Tusser*.—

From wheat go and rake out the *titters* of time,

If care be not forth, it will rise again fine. *Tusser*.

* *To TITTER.* *v. n.* [formed, I suppose, from the sound.] To laugh with restraint; to laugh without much noise.—

In flow'd at once a gay embroider'd race,
and *titt'ring* push'd the pedants off the place.

Pope.

TITTERI, a lake of Algiers, near mountains so named; 60 miles S. of Algiers.

TITTING, a town of Germany, in Franconia, 3 miles N. of Aichstätt.

* **TITTLE.** *n. f.* [I suppose from *tir.*] A small particle; a point; a dot.—In the particular which concerned the church, the Scots would never depart from a *tittle*. *Clarendon.*—

What to the smallest *tittle* thou shalt say.

Milton.

—They thought, although they never performed their part, God was bound to make good every *tittle* of his. *South.*—Ned Fashion understands to a *tittle* all the punctilios of a drawing-room. *Swift.*—You are not advanced one *tittle* towards proof.

Waterland.

* **TITLETATTLE.** *n. f.* [A word formed from *tittle* by a ludicrous reduplication.] Idle talk; prattle; empty gabble.—

As the foe drew near

With love, and joy, and life and dear,

Our don, who knew this *tittletattle*,

Did, sure as trumpet, call to battle.

Prior.

—Of every idle *tittletattle*, Jack was suspected the author. *Arbutnot.*

* *To TITLETATTLE.* *v. n.* [from *tattle.*] To prate idly.—You are full in your *tittletattlings* of Cupid. *Sidney.*

TITTMANING. See **TITMONING.** *Tittmaning* is the proper spelling.

* **TITUBATION.** *n. f.* [*titubo*, Lat.] The act of stumbling.

TITUL, a town of Hungary, in the county of Bodrog, on the Theysse; 24 miles ESE. of Peterwaradin, and 24 NW. of Belgrade. Lon. 40. 34. E. Lat. 45. 30. N.

* **TITULAR.** *adj.* [*titulaire*, Fr. from *titulus*, Lat.] Nominal; having or conferring only the title.—They would deliver up the kingdom to be *titular* and painted head of those arms. *Bacon.*—

Thrones, virtues, powers,

Milton.

Not merely *titular*.

—Valerius and Ausin were *titular* bishops. *Ayliffe.*

* **TITULARITY.** *n. f.* [from *titular*] The state of being *titular*.—Julius, Augustus, and Tiberius, with great humility received the name of Imperator; but their successors retain the same even in its *titularity*. *Brown.*

(1.) * **TITULARY.** *adj.* [*titulaire*, Fr. from *titulus*, Latin.] 1. Consisting in a title.—The malecontents have not been base nor *titular* impostors, but of an higher nature. *Bacon.* 2. Relating to a title.—William the Conqueror, howsoever he used the power of a conqueror, yet mixed it with a *titular* pretence, grounded upon the Confessor's will. *Bacon.*

(2.) * **TITULARY.** *n. f.* [from the *adj.*] One that has a title or right.—The persons deputed were neither *titularies* nor perpetual curates, but persons entirely conductions. *Ayliffe.*

TITURIUS, a lieutenant of Julius Cæsar, in

VOL. XXII. PART II.

Gaul, who was killed by Ambiorix. *Cæf. de B. G.* v. 29, &c.

TITUS, a prænomen in very general use among the ancient Romans, which seems to have been first introduced among them by king

(1.) **TITUS TATIUS**, the colleague of Romulus. See **ROME**, § 6; and **TATVUS**, N° 2.

(2.) **TITUS**, in church-history, a celebrated evangelist, a Greek by birth, and a convert of St Paul, who wrote a letter to him, which is still extant. After going to Corinth, and preaching the gospel there, he settled the affairs of the church in Crete; and then went by the apostle's order to Dalmatia, whence, after spreading the gospel there, he returned to Crete, and propagated it in the adjacent islands. Of the time or manner of his death, nothing certain is recorded.

(3.) **TITUS**, EPISTLE TO, a canonical book of the New Testament. See **SCRIPTURE**, Sect. X.

(4.) **TITUS VESPASIANUS**, the Roman emperor, the son of Vespasian; of whom it is related, that not being able to recollect any remarkable good action he had done on a certain day, he exclaimed, "I have lost a day." Though Rome laboured under various public calamities during his reign, such was his equitable and mild administration, that he constantly preserved his popularity. He was a great lover of learning, and composed several poems. He reigned but two years, and it is thought Domitian his brother poisoned him, A. D. 81, aged 41. See **ROME**, § 51.

TITYRUS, a large mountain of Crete.

TITYUS, in the mythology, a famous giant, the son of Jupiter by Elara, the daughter of Orichomenos, who died in travail of him, from his vast size. Tityus attempted to ravish LATONA, but she called to her aid her children, Apollo and Diana, who with their arrows killed the monster. His corpse covered 9 acres; and in Tartarus he was condemned to have his liver continually gnawed by serpents and vultures. *Apollod. Hom. &c.*

TITZ, a town of the French empire, in the dep. of the Roer, and ci-devant duchy of Juliers, 4 miles NNE. of Juliers.

TIVA, a town of Asiatic Turkey, in the Arabian Irac; 250 miles W. of Bassora.

(1.) **TIVERTON**, a neat borough of England, in Devonshire, with a market on Tuesday, seated on the EX, over which it has an elegant stone bridge, and a fine new church. It has often suffered by fire; particularly in 1598, 1612, and in June 1713. It has a great woollen manufacture, and lies 14 miles NNE. of Exeter, and 161 W. by S. of London. Lon. 3. 38. W. Lat. 50. 54. N.

(2.) **TIVERTON**, a town of Rhode Island, in Newport county, on the E. side of Narraganset Bay, opposite the N. end of Rhode Island, to which it is joined by a bridge. It has a good trade; and lies 20 miles SE. by S. of Providence, 10 NE. by N. of Newport, and 310 from Philadelphia.

TIUHOLM, an island of Denmark, in the Scaggerac, 4 miles NE. of Fladstrand.

(1.) **TIVIOT**, a river of Roxburghshire. See **TEVIOT**.

(2.) **TIVIOT HILLS.** See **CHAVIOT**, and **TS-VIOT**.

Ecc

TIVIOF

TIVOT DALE. See ROXBURGH, N° 1.
TUKU-KARAGAN, a cape on the E. coast of the Caspian Sea; 156 miles SE. of Astracan. Lon. 68. o. E. Ferro. Lat. 44. 20. N.

TULIT, a town of Fez, 12 miles SW of Fez.
TIUM, an ancient sea port town of Paphlagonia, built by the Milesians. *Mela* i. 9.

TIUMEN, a town of Russia, in Tobolskoi, at the junction of the Pichma and the Tura. See TARTARY, § 2.

TIVOLI, a celebrated town of Italy, in the Pope's dominions, in the Campania of Rome, anciently called **TIBUR**, and the favourite residence of several of the greatest men of the Augustan age. It has a celebrated cascade, ruins of Adrian's villa, a Sibyl's temple, and many other relics of antiquity. Horace wrote many of his poems in it. Q. Zenobia had a palace in it. It is seated on the Tevere, near the remarkable lake of Solfatara: (See SOLFATARA, N° 1; and TEVERONE.) 10 miles NE. of Fiesoli, and 17 NE. of Rome. Lon. 12. 41. E. Lat. 41. 59. N.

TIUTERS, an island of Russia, in the Gulf of Finland; 80 miles ENE. of Revel. Lon. 45. o. E. Ferro. Lat. 59. 40. N.

TIXALL, a small town of England, in Staffordshire, in a heathy plain, called *Tixball Heath*; a mile E. of Stafford.

TIXIER, John, or *Ravifus Textor*, as he styled himself, in his Latin works, was lord of *Ravifly*, in Nivernois. He taught the belles lettres in the college of Navarre at Paris, with great success. He wrote *Officina Epistolarum*; also letters, dialogues, epigrams, &c. He died in 1522.

TIXOVER, a town of England, in Ketton parish, Rutlandshire.

(1.) **TIVY**, a river of S. Wales, in Cardigan-shire, which rises 5 miles N. of Tregaron, and runs into the sea, 3 miles below Cardigan.

(2.) * **TIVY**, *adj.* [A word expressing speed, from *tantivy*, the note of a hunting-horn.]

In a bright moon-shine while winds whistle loud,

Tivy, tivy, tivy, we mount and we fly. *Dryden*.

TIZZANO, a town of Italy, in Parma; 13 miles S. of Parma.

TLACOPAN, a division of Mexico. See MEXICO, § 2.

(1.) **TLASCALA**, a province of Mexico, bounded on the N. by Guasaca, E. by the Gulf of Mexico, and the prov. of Guaxaca; and W. by that of Mexico Proper. It is 320 miles long, and from 40 to 120 broad. The climate and soil are various. The only tax they pay to the Spanish government, is a *handful of maize* for each individual. This tax, trifling as it appears, has, in some years, amounted to 13,000 bushels! Tlascala was anciently a kingdom: afterwards it fell under an aristocracy of many princes, who divided most of it into various districts, and maintained long wars against the royal family, till the arrival of the Spaniards. At their arrival, Tlascala contained 300,000 inhabitants. And Acosta says, that at this period, they had a large market place, in which were annually convened 30,000 merchants and purchasers; with 2000 oxen, 2000 hogs, and 15,000 sheep. In the parish church, they preserve

a picture of the ship in which CORTES arrived at Vera Cruz.

(2.) **TLASCALA**, a populous city of Mexico, the capital of the above province, on the banks of a river that runs into the Pacific Ocean; 30 miles N. of Puebla de los Angeles, 62 SE. of Mexico, and 140 NW. of Vera Cruz.

(3.) **TLASCALA**, a mountain or range of mountains in the above province, 12 miles in circumference, very populous and well cultivated, containing several towns and villages on its sides and towards the top, which is always covered with snow. Its woods are frequented by tigers and monkeys.

(4.) **TLASCALA**, a river in the above province, which runs through a great part of it, and falls into the Pacific Ocean.

TLASCALANS, the natives of Tlascala. They were always a brave and warlike people, and at first endeavoured to oppose the Spaniards on their invasion, but being at war with the emperor of Mexico, they soon after joined them in the conquest of their country. See MEXICO, § 6, p.

TLATELOLCO, an ancient kingdom of Mexico, which was conquered, and annexed to the Mexican empire, by Montezuma I. See MEXICO, § 5.

TLASCALLAN, a name of TLASCALA. See MEXICO, § 2.

TLEMSAM, or **TREMEZEN**. See TREMEZEN.
TLEPOLEMIA, games at Rhodes, in honour of

TLEPOLEMUS, the son of Hercules, by Attychia, born at Argos. Having accidentally killed Lycimnius, he fled from Argos to Rhodes, where, by order of the oracle, he was chosen king of the island. He afterwards went to the Trojan war with nine ships; but was killed by Sarpedon. Games were instituted at Rhodes in honour of him.

TLETSCII, a town of Russia, in Tobolskoi, on the Irtsch; 72 miles ESE. of Tobolsk.

TMAIE, a town of Egypt, 12 miles NE. of Mansura.

TIMARUS, a mountain of Epirus, in Thesprotia. *Strab. Plin.*

TMESCHEDE, a town of the French empire, in the dep. of the Roer, and late county of Arensberg; seated on the left bank of the Roer, 3 miles NW. of Arensberg.

TMESIS, in Latin grammar, a figure, whereby a compound word is divided, and one or more words thrown in between the first and last parts of it: as, *Septem subjella trioni gens*, (*Virg.*) for *septentrioni*. *Quæ meo cunque animo*, &c. (*Cic.*) for *Quæcunque*.

(1.) **TMOLUS**, a king of Lydia, the first husband of Queen Omphale, the son of Sipyrius, and Chthonia.

(2.) **TMOLUS**, a mountain of Lydia, so named from the above king, who was buried on it.

(3.) **TMOLUS**, a town of Asia Minor.

(1.) * **TO**, *adv.* [*to*, Savon; *te*, Dutch.] 1. A particle coming between two verbs, and noting the second as the object of the first.—Teach us to mortify our desires. *Smallridge*. 2. It notes the intention.—

Ambition

Ambitious fool! with horny hoofs to pass
O'er hollow arches of resounding brass,
To rival thunder.

Dryden.

She rais'd a war

In Italy, to call me back.

Dryden.

Resolv'd in fight to die.

Dryden.

3. It notes the consequence.—I have done my utmost to lead my life to pleasantly as to forget all misfortunes. *Pope.* 4. After an adjective it notes its object.—

We ready are to try our fortunes.

Shak.

Born to beg their bread.

Sandys.

5. Noting futurity.—We are still to seek for something else. *Bentley.* 6. To and again. To and fro. Backward and forward.

He sends the devils on errands to and fro.

Fairfax.

The spirits perverse,

With easy intercourse pass to and fro. *Milton.*

—On the 7th day, move the joint to and fro. *Wifeman.*—Masses of marble, rolled to and again till they were rounded to the form of pebbles. *Woodward.*—

Moving the world of waters to and fro.

Addison.

Fancy and passion toss it to and fro. *Young.*

(2.) * To. *preposition.* 1. Noting motion towards: opposed to from.—With that she to him afresh. *Sidney.*

Tybalt fled;

But by and by comes back to Romeo,

And to't they go like light'ning. *Shak.*

Give not over so; to him again.

Shak.

—I'll to him again in the name of Brook. *Shak.*—

I'll to the woods among the happier brutes.

Smith.

2. Noting accord or adaptation.—

Mov'd on in silence to soft pipes.

Milton.

3. Noting address or compellation.—

To you, my noble lord of Westmoreland.

Shak.

—Here's to you all, gentlemen. *Denham.*—

Now, to you, Raymond.

Dryden.

4. Noting attention or application.—

Go buckle to the law.

Dryden.

—It extends to their children's children.

Addison.

5. Noting addition or accumulation.—

Wisdom he has, and to his wisdom courage;

Temper to that, and unto all success. *Denham.*

6. Noting a state or place whither any one goes.

Take you some company and away to horse.

Shak.

—He sent his coachman's grandchild to prentice.

Addison. 7. Noting opposition.—

Shall dare thee foot to foot.

Dryden.

8. Noting amount.—There were to the number of 300 horse. *Bacon.* 9. Noting proportion.—Enoch's days were scarce as three to nine, in comparison of theirs with whom he lived. *Hooker.*—

All the world to nothing.

Shak.

—Twenty to one offend more in writing too much than too little. *Afham.*—The burial must be by the smallness of the proportion as fifty to one. *Bacon.*—Two women patients to one man. *Graunt.*—

Allowed to the value of a shilling a day. *Addison.*

—The weight of oil was to that of wine as nine to ten. *Arbushnot.*—The odds will be three to one on

their side. *Swift.* 10. Noting possession or appropriation.—The peculiarities every language hath to itself. *Felton.* 11. Noting perception.—

Sharp to the taste.

Dryden.

12. Noting the subject of an affirmation.—

I have a king's oath to the contrary.

Shak.

13. In comparison of.—

All that they did was piety to this.

Ben Jonson.

—There is no fool to the sinner. *Tillotson.* 14. As far as.—Some Americans, otherwise of quick parts, could not count to one thousand. *Locke.*—Coffee exhales in roasting to the abatement of near one-fourth of its weight. *Arbushnot.* 15. Noting intention.—

He doth point out each man of us to slaughter.

Ben Jonson.

16. After an adjective it notes the object.—

Draw thy sword in right.

I'll draw it as apparent to the crown.

Shak.

Fate and the dooming gods are deaf to tears.

Dryden.

All were attentive to the godlike man. *Dryden.*

17. Noting obligation.—The Rabbins subtly distinguish between our duty to God, and to our parents. *Holyday.*—Almanzor is taxed with changing sides, and what tie has he on him to the contrary? *Dryden.* 18. Respecting.—

To our purposes he lives no more.

Shak.

—The effects of such a division are pernicious to the last degree. *Addison.* 19. Noting extent.—All is due to supernatural grace. *Hammond.* 20. Towards.—

She stretch'd her arms to heav'n.

Dryden.

21. Noting presence.—She revileth him to his face. *Swift.* 22. Noting effect; noting consequence.—Factions are much to the prejudice of princes. *Bacon.*—He was bleeding almost to death. *Wifeman.*—Great numbers were crowded to death. *Clarendon.*—

Ingenious to their ruin.

Waller.

Under how hard a fate are women born,

Priz'd to their ruin, or expos'd to scorn! *Waller.*

—The offender was whipt to death. *Dryden.*—

Thus, to their shame, when finish'd was the fight,

The victors from their lusty steeds alight. *Dryden.*

Now to our cost your emptiness we know.

Dryden.

—A British king obliges himself by oath to execute justice in mercy, and not to exercise either to the total exclusion of the other. *Addison.*—The abuse reigns chiefly in the country, as I found to my vexation. *Swift.*

Praise me to my ruin?

Smith.

—It must be confessed to the reproach of human nature. *Broome.* 23. After a verb to notes the object.—

I drink to th' general joy of the whole table.

Shak.

—Had the methods of education been directed to their right end. *Locke.*—This lawfulness of judicial process appears from these legal courts erected to minister to it in the apostle's days. *Kettleworth.*—Exposed to the world the private misfortunes of families. *Pope.* 24. Noting the degree.—Only the slender part of the pipe, to the height

of four inches, remained exposed to the open air.

Boyle.

Tell her thy brother languishes to death.

Addison.

—A crow, though hatched under a hen, and who never has seen any of the works of its kind, makes its nest the same, to the laying of a stick, with all the nests of that species. *Addison.*—If he employs his abilities to the best advantage. *Addison.* 25. Before day, to notes the present day; before morrow, the day next coming; before night, either the present night, or night next coming.

Banquo, thy soul's flight,

If it find heav'n must find it out to night. *Shak.*

To-day they chas'd the boar.

Otway.

—This ought rather to be called a full purpose of committing sin to-day, than a resolution of leaving it to-morrow. *Calamy.* 26. To-day, to-night, to-morrow, are used, not very properly, as substantives in the nominative and other cases.

To-morrow, and to-morrow, and to-morrow,

Creeps in this petty pace from day to day. *Shak.*

—The father of Solomon's house will have private conference with one of you the next day after to-morrow. *Bacon.*

To-day is ours; why do we fear?

To-day is ours, we have it here;

Let's banish bus'ness, banish sorrow,

To the gods belongs to-morrow. *Cowley.*

To-morrow will deliver all her charms

Into my arms, and make her mine for ever.

ryden.

For what to-morrow shall disclose,

May spoil what you to night propose;

England may change, or Cloe stray;

Love and life are for to-day. *Prior.*

TOA, a river of Porto Rico, which runs into the sea at Porto Rico.

(1.) * TOAD. *n. f.* [*tade*, Saxon.] A paddock; an animal resembling a frog; but the frog leaps, the toad crawls; the toad is accounted venomous, perhaps without reason.

A most toad-spotted traitor.

Shak.

I had rather be a toad.

Shak.

—In the great plague there were seen, in divers ditches about London, many toads that had tails three inches long, whereas toads usually have no tails. *Bacon.*

The hissing serpent, and the swelling toad.

Dryden.

(2.) TOAD, in zoology. See RANA, § IV. N^o 3.

(1.) * TOADFISH. *n. f.* A kind of sea-fish.

(2.) TOAD-FISH. See LOPHIUS.

(1.) * TOADFLAX. *n. f.* A plant.

(2.) TOAD-FLAX, in botany. See ANTIERHINUM.

(1.) * TOADSTONE. *n. f.* [*toad* and *stone*.] A concretion supposed to be found in the head of a toad.—The toadstone presumed to be found in the head of that animal, is not a thing impossible. *Brown.*

(2.) TOAD-STONES, in the old mineralogy, a genus of argillaceous earths examined by Dr Withering. He describes it as of a dark brownish grey colour; its texture granular; neither effervescing with acids, nor striking fire with steel. The cavities of it are filled with crystallized spar, and in a strong heat it is fusible per se; 100 parts of it con-

tain from 36 to 63.5 of siliceous earth, near 15 of argillaceous earth, 7.5 of calcareous earth, and 16 of oxidated iron. Dr Kirwan observes, that the toad-stone is not much different from basalt, only that it is softer; it contains also a smaller proportion of iron, and a larger one of siliceous earth.

(1.) * TOADSTOOL. *n. f.* [*toad* and *stool*.] A plant like a mushroom.

The grilly toadstool grown there mought I see.

Spenser.

—The toadstool is not esculent. *Bacon.*

(2.) TOADSTOOL is a species of AGARICUS.

TOALLOOR, a town of Hindoostan, in Mysore, 3 miles SE. of Wombinselore.

* TOAST. *n. f.* [from the verb.] 1. Bread dried before the fire.—You are both as rheumatick as two dry toasts. *Shak.*—Every third day take a small toast of manchet. *Bacon.* 2. Bread dried and put into liquor.

Where's then the saucy boat

Co-ri-val'd greatness? or to harbour fled,

Or made a toast for Neptune?

Shak.

Whose game is whist, whose treat a toast is sack.

Pope.

3. A celebrated woman whose health is often drunk.—I shall likewise mark out every toast. *Addison.*

Say, why are beauties prais'd and honoured most,

The wiser man's passion, and the vain man's toast?

Pope.

* To TOAST. *v. a.* [*torreo*, *tostum*, Lat.] 1. To dry or heat at the fire.—The earth whereof the toasts is sown parched with the sun, and toasted, is commonly forced earth. *Bacon.*—To allure mice I find no other magic, than to draw out a piece of toasted cheese. *Brown.* 2. To name when a health is drunk. To toast is used commonly when women are named.—Several popish gentlemen toasted many loyal healths. *Addison.*

If we are not prais'd, we'll not be toasted.

Prior.

* TOASTER. *n. f.* [from *toast*.] He who toasts.

We simple toasters take delight

To see our women's teeth look white.

Prior.

TOB, a small district in the SE. of Syria, to which JEPHTHAH retired, when expelled from his native country by his brethren. Jud. xi. 3.

(1.) * TOBACCO. *n. f.* [from *Tobaco* or *Tobago* in America.]—The flower of the tobacco consists of one leaf, is funnel-shaped, and divided at the top into five deep segments, which expand like a star; the ovary becomes an oblong roundish membranaceous fruit, which is divided into two cells by an intermediate partition, and is filled with small roundish seeds. *Miller.*

His figure's like a tobacco stopper. *Hudibras.*

—Bread or tobacco may be neglected. *Locke.*—Sils are to be drained out of the clay by water, before it be fit for the making tobacco pipes or bricks. *Woodward.*

(2.) TOBACCO, in botany. See NICOTIANA and SNUFF.

(3.) TOBACCO, MANNER OF CULTIVATING, IN JAMAICA. The following directions are given by Dr Barham, for raising, and cultivating, and curing

ing tobacco in Jamaica. Let the ground or woodland for planting tobacco be well burned, as the greater the quantity of wood ashes the better. The spot must be well strewed with ashes, laid smooth and light; then blow the seed from the palm of the hand gently on the bed, and cover it with palm or plantain leaves. When the plants are about 4 inches high, draw them and plant them out about 3 feet asunder; and when they become as high as one's knee, cut or pluck off the top; and if there are more than 12 leaves on the plant, take off the overplus, and leave the rest entire. The plant should now be daily attended to, to destroy the caterpillars that infest it; as also to take off every sprout or sucker that puts out at the joints, in order to throw the whole vegetable nourishment into the large leaves. When the edges and points of the leaves begin to turn yellow, cut down the stalks about 10 A. M. on a fine day, and see that the dew is fully off the plant, and do not continue this work after 2 P. M. As fast as it is cut let it be carried into the tobacco-house, which must be so close as to shut out all air, (on this much depends), and hung up on lines tied across, for the purpose of drying. When the stalks begin to turn brownish, take them off the lines, and put them in a large binn, and lay on them heavy weights for 12 days; then take them out, and strip off the leaves, and put them again into the binn, and let them be well pressed, and so as no air gains admission for a month. Take them out; tie them in bundles about 60 leaves in each, which are called *moncoes*, and are ready for sale. But let them always be kept close till they are to be disposed of. Let the curing-house be well built, and very close and warm; if a boarded building, it will not be amiss, in a wet situation, to cover the whole outside with thatch and plantain trash, to keep off the damp; for this will preserve the fine volatile oil in the leaves. No smoke is to be made use of or admitted into the curing-house.

(4.) TOBACCO, MEDICAL PROPERTIES OF. Since the introduction of tobacco into Europe, 1560, various medical properties have been ascribed to it by Stahl and other German physicians; but the manner in which of late years it has been spoken of by the generality of writers on materia medica, has occasioned it to be almost wholly dismissed from modern practice, at least from internal use: but Dr Fowler made a series of experiments, whence he infers that tobacco, under proper regulations, may be administered internally, not only as a safe but as an efficacious remedy, especially as a diuretic in cases of dropsy and dysuria. He speaks also of the use of tobacco in injections; an ounce of the infusion in a pint of water-gruel at a time, and repeated in cases of obstinate constipation, as the case may require. In the *dry belly-ach*, in the West Indies, injections of the smoke of tobacco have long been employed with the happiest effects. After all, the internal use of tobacco should be very limited, and can only be safe in the hands of a skilful and attentive practitioner.

(5.) TOBACCO, OTHER USES OF, AND TRADE IN. Tobacco is sometimes used externally in unguents for destroying cutaneous insects, cleansing

old ulcers, &c. Beaten into a mash with vinegar or brandy, it has sometimes proved serviceable for removing hard tumours of the hypochondres: an account is given in the Edinburgh Essays of two cases of this kind cured by it. The most common uses of this plant, however, are either as a sternutatory when taken by way of snuff, as a masticatory by chewing it in the mouth, or as effluvia by smoking it. Before pipes were invented, it was usually smoked in segars, and they are still in use among some of the southern nations. The method of preparing these is at once simple and expeditious. A leaf of tobacco being formed into a small twisted roll, somewhat larger than the stem of a pipe, and about eight inches long, the smoke is conveyed through the winding folds which prevent it from expanding, as through a tube; so that one end of it being lighted, and the other applied to the mouth, it is in this form used without much inconvenience. But, in process of time, pipes being invented, they were found more commodious vehicles for the smoke, and are now in general use. In the countries of which tobacco is a native, it is considered by the Indians as the most valuable offering that can be made to the beings they worship. They use it in all their civil and religious ceremonies. When once the spiral wreathes of its smoke ascend from the feathered pipe of peace, the compact that has been just made is considered as sacred and inviolable. Tobacco is made up into rolls by the inhabitants of the interior parts of America, by means of a machine called a *tobacco-wheel*. With this machine they spin the leaves after they are cured, into a twist of any size they think fit; and having folded it into rolls of about 20 pounds each, they lay it by for use. In this state it will keep for several years, and be continually improving, as it always grows milder. The Illinois usually form it into carrots; which is done by laying a number of leaves, when cured, on each other after the ribs have been taken out, and rolling them round with packthread, till they become cemented together. These rolls commonly measure about 18 or 20 inches in length, and nine round in the middle part. Tobacco forms a very considerable article in commerce; for an account of which see the articles GLASGOW and VIRGINIA.

(6.) TOBACCO WINE. See PHARMACY, Index.

(7.) TOBACCO WORM, in entomology, an insect which often proves destructive to that plant. This animal is of the horned species. In what manner it is produced, and propagated, is unknown: but it is not discernible till the plants have attained about half their height; and then appears to be nearly as large as a gnat. Soon after this it lengthens into a worm; and by degrees increases in magnitude to the bigness of a man's finger. In shape it is regular from its head to its tail, without any diminution at either extremity. It is indented or ribbed round at equal distances, nearly a quarter of an inch from each other; and having at every one of these divisions a pair of feet or claws, by which it fastens itself to the plant. Its mouth, like that of the caterpillar, is placed under the fore-part of the head. On the top of the head, between the eyes, grows a horn

a horn about half an inch long, and greatly resembling a thorn; the extreme part of which is of brown colour, a firm texture, and the extremity sharp-pointed. It is easily crushed; being only, to appearance, a collection of green juice inclosed in a membranous covering, without the internal parts of an animated being. The colour of its skin is in general green, interspersed with several spots of a yellowish white; and the whole covered with a short hair scarcely to be discerned. These worms are found the most predominant during the end of July and beginning of August, when the plant must be particularly attended to, and every leaf carefully searched. As soon as a wound is discovered, and it will be soon perceptible, care must be taken to destroy the worm which will be found near it, and from its unsubstantial texture may easily be crushed; but the best method is to pull it away by the horn, and then crush it.

TOBACCO-BOX, *n. f.* a box for holding tobacco.

* TOBACCONIST. *n. f.* [from *tobacco*.] A preparer and vender of tobacco.

(1.) TOBACCO-PIPE, *n. f.* a pipe for smoking tobacco.

(2.) TOBACCO-PIPE FISH. See *FISTULARIA*.

(1.) TOBAGO, one of the Caribbee islands, ceded to Great Britain by the treaty of Paris in 1763, taken by the French in 1781, and retaken by the British in 1793. According to the latest accounts, it is 30 miles long from NE. to SW. between 8 and 9 broad, and from 99 to 75 in circumference. The English visited this island very early, Sir Robert Dudley being there in the reign of Queen Elizabeth. In that of Charles I. William earl of Pembroke procured a grant of this, with two other small islands; but died before he was able to carry into execution his design of settling them. In A. D. 1632 some merchants of Zealand sent over a small colony thither, and gave it the name of *New Walcheren*; but before they were able thoroughly to establish themselves, they were destroyed by the Indians assisted by the Spaniards. Ten years after, James Duke of Courland sent a colony thither, who settled themselves upon Great Courland bay, and made a considerable progress in planting. A. D. 1654, Messieurs Adrian and Cornelius Lampius, two opulent merchants of Flushing, sent a considerable number of people thither, who settled on the other side of the island, and lived in amity with the Courlanders, until they learned that the king of Sweden had seized the person of their duke and dispossessed him of his dominions, when they attacked and forced his subjects to submit. The duke being afterwards restored, he obtained from Charles II. a grant of this island, dated the 17th Nov. 1664. In the 2d Dutch war the count d'Estrees totally ruined it at the close of 1677; and from that time it continued waste till Britain took possession of it after the treaty of Paris. The climate, notwithstanding its vicinity to the line, is so tempered by the breezes from the sea, as to be very supportable to Europeans; and hath the same advantages with that of Grenada, in having regular seasons, and also in being exempt from the hurricanes. There are throughout the island

many rising grounds, though, except at the NE. extremity, there is no part of it that can be styled mountainous; and even there the country is far from being rugged or impassable. The soil is fertile, luxuriant, and very finely diversified. Provisions of all sorts have been raised in great plenty, a vast variety of vegetables, excellent in their kind, for food and physic. Almost every species of useful trees is to be found here, and some of an enormous size; among others the true cinnamon and nutmeg tree; whole groves of cassias, and of trees that bear the true gum copal, with other odoriferous plants that render the air wholesome and pleasant. It is well watered by rivers that fall into the sea on both sides, many small streams, and fine fresh springs in almost every part of the island. The coast is indented by 10 or 12 spacious bays, and there are one or two ports capable of receiving as large ships as ever visited those seas. There are wild hogs in plenty, numbers of fowls of different kinds, and a vast variety of sea and river fish. In the beginning of 1791, Tobago was taken by the French, but recovered by the British a few weeks after. It was again taken by the French, but was finally surrendered to Britain, according to the treaty of Amiens, on the 30th June, 1803. It lies 36 miles NE. of Trinidad, 105 SE. of St Vincent, 120 S. by W. of Barbadoes, and 240 SE. of Grenada. Lon. 59. 0. W. Lat. 11. 10. N.

(2.) TOBAGO. See *TABAGO*, N^o 1.

(3.) TOBAGO, LITTLE, an island at the NE. extremity of Tobago; 2 miles long, and half a mile broad.

TOBAK, a town of European Turkey, in Bessarabia; 34 miles NNW. of Ismael.

TOBAN, a town of Cuba; 16 miles NE. of Trinidad.

TOBAR, a town of Spain, in Old Castile; 12 miles from Burgos.

(1.) TOBERMOREY, a fishing town of Argyllshire, in the isle of Mull, built by the British Society for the Encouragement of Fisheries, in 1788, seated on the Bay, (N^o 2.) in the tract of the ships which sail from the W. parts of Britain to the N. of Europe. In 1793 it contained 600 souls, and has since much increased. Coopers and boat-builders carry on a great trade. It has also a large warehouse for salt for the fisheries. The town covers above a mile square.

(2.) TOBERMOREY BAY, a fine spacious bay of Argyllshire, on the coast of the isle of Mull. It is capable of containing ships of the largest size; and 200 sail may ride at anchor in it at once. The general depth is from 12 to 15 fathoms, but some parts are 22 fathoms deep.

TOBIAS. See *TOBIT*.

TOBISCHAH, a town of Moravia, in Olmutz; 8 miles SE. of Prosnitz.

TOBIT, one of the books of the *APOCRYPHA*. It is ruffled with superstition. One *TOBIAS*, or *Tobit*, whose story it contains, is supposed to have been the author.

TOBLER-BACH, a river of Suabia, running into the Glart.

TOBLPAD, a town of Stiria, 8 miles SSW. of Graz.

TOBOL, a river of Russia, which rises in mountain

Mount Titanaia, on the E. border of the government of Upha, and falls into the Irtisch at Tobolsk.

TOBOLOVO, a town of Russia, in Tobolskoi, on the Enisei. Lon. 103. 28. E. Ferro. Lat. 69. 40. N.

TOBOLSK, the capital of Siberia, is situated at the confluence of the Tobol and Irtisch, on a high hill, the lower part of which is inhabited by Mahometan Tartars, who carry on a considerable traffic upon the Irtisch, and convey their merchandise quite across Great Tartary, as far as China. (See *IRTISCH*.) All sorts of provisions are plentiful and cheap; and the adjacent country abounds with game. The supreme court of judicature for Siberia is held in this city, which is also the seat of a metropolitan, sent hither from Moscow. Tobolsk is well fortified, and defended by a strong garrison, under the command of the waiwode, who resides in the place, and takes charge of the fur tribute, which is here deposited in proper magazines. This governor enjoys a very extensive command. A sufficient number of Russians, called *Jemboiks*, are kept in pay by the government, on the banks of the Irtisch, to supply travellers on the emperor's account with men, boats, or carriages, to convey them as far as Surgut on the Oby, a voyage of 600 miles by water. This is the common method of travelling in summer; but in winter the journey is performed in sleds over the ice and snow, drawn by a pair of dogs. Tobolsk contains 15,000 inhabitants. It is 800 miles E. of Moscow, and 1000 from Petersburg. Lon. 68. 18. E. Lat. 58. 12. N.

TOBOLSKOI, an extensive government of Russia, comprehending a considerable part of Siberia. (See *SIBERIA*.) Tobolsk is the capital. It extends from Lon. 76. 30. to 125. 30. E. and from Lat. 55° to 78° N.

TOBOKON, a town of Thibet; 53 miles N. of Tourfan Hotun.

TOBOSO, a town of Spain in New Castile; 7 miles S. of Huete.

TOBRONA, a town of the island of Cuba; 148 miles SW. of Havannah.

TOCANTINS, a river of Brasil; which rises in Lat. 18° S. and falls into the Atlantic in Lat. 1° S. It is called **PARA** for 100 miles before it reaches the ocean.

(1.) **TOCAT**, or **TOKAT**, a province of Asiatic Turkey, in Natolia, and in Caramania, and in the pachalic of Sivas. It is populous, and is estimated to contain 40,000 families of Turks, 4000 Armenian families, and 400 of Greeks. This country abounds with mountains, which are covered with vines and other fruit-trees; and afford quarries of excellent marble. The whole of it is extremely fertile, abounding in mulberry trees, silk, &c.

(2.) **TOCAT**, or **TOKAT**, a city of Natolia, capital of the above province, seated in a valley, almost surrounded by mountains. The streets are well paved, and the houses well built, and each has a fountain. There are several manufactures, particularly silk and silk thread, Turkey leather, and various hardwares, as candlesticks, lanterns, copper kettles, cups, &c. Tocat is the centre of commerce in Natolia, and exports besides the above manufactures, excellent wine, fruits, &c. to

Constantinople. The caravans from Diarbeck arrive in 18 days; from Sinop in 6 days; from Bursa in 20; from Smyrna in 27, &c. Tocat lies 150 or 180 miles W. of Erzerum, 283 N. of Aleppo, and 250 E. of Constantinople, or 355 as Cruttwell says. Lon. 35. 55. E. Lat. 19. 55. N.

TOCAYMA, a town of Terra Firma, in Grenada, seated on the Para, in a territory abounding with sugar canes and fruit trees. It has hot baths between cold springs, and there is a volcano near it, which often throws out fire and ashes. Lon. 73. 50. W. Lat. 4. 3. N.

TOCAYO, a town of Terra Firma, in the province of Venezuela.

TOCHEN, a town of Germany, in Anhalt-Zerbst; 5 miles W. of Zerbst.

TOCHU, a town of Africa, in QUOJA.

TOCKAY. See *TOKAY*.

TOCKENBURG, a town and district of Switzerland; seated among mountains, and fertile in corn and fruits. See *SWITZERLAND*, § 7.

TOCORT, or **TUGGURT**, a town of Algiers; 240 miles SSE. of Algiers.

TOCRUR, a town of Negroland, on the Niger; 220 miles ENE. of Tombuctoo.

TOSIN, *n. f.* an adopted French word, signifying an alarm bell.

TOSON HOTUN, a town of Thibet, 20 miles SW. of Tourfan.

(1.) * **TOD**. *n. f.* [*totte haar*, a lock of hair, German. *Skinner*. I believe rightly.] 1. A blush; a thick shrub. Obsolete.—

Within the ivie *tod*,

There shrouded was the little god. *Spenser*.
2. A certain weight of wool, 12 pounds.—Every eleven weather *tods*, every *tod* yields a pound and odd shillings. *Shak*.

(2.) **TOD HEAD**, a cape of Scotland, on the E. coast of Kincardineshire; 5 miles S. of Stonehaven.

TODD, Hugh, an English historian and divine, born in Cumberland about 1660, and educated at Queen's college, Oxford. He published, 1. *The Description of Sweden*; 2. *The Life of Phocion*. He left in MS. 1. *Notitia Ecclesie Cathedralis Carlislensis*. 2. *Notitia Prioratus de Wedderhall*, &c. 3. *A History of the Diocese of Carlisle*, &c. He died after 1708.

* **TODDA PANNA**. See *CYCAS*.

(1.) **TODDY**, a name given to the juice of the cocoa nut tree. See *ARAK*.—Toddy is also a name given to a mixture of spirits, water, and sugar.

(2.) **TODDY BIRD**. See *LOXIA*; N° 12.

TODENDORP, a town of Germany, in Holstein; 6 miles NE. of Hamburg.

TODENHAUSEN, a small town of Germany, in Westphalia, on the W. bank of the Weser; 3 miles N. of Minden.

TODI, a town of Italy, in the duchy of Spoleto, with a bishop's see, under the Pope; containing several churches and convents; 18 miles W. of Spoleto, and 53 N. of Rome. Lon. 30. 2. E. of Ferro. Lat. 42. 47. N.

TODIALOOR, a town of Hindoostan, in Coimbatore; 5 miles N. of Coimbatore.

TODIVESTI, a town of European Turkey, in Moldavia; 6 miles NE. of Succava.

TODOROVA, a town of Croatia; 18 miles WNW. of Novi.

TODS,

TODS, a town of Virginia; 9 miles ENE. of Hanover.

TODUS, the } in ornithology, a genus belong-

TODY, } ing to the order of *pica*. The beak is slender, depressed, broad, and the base beset with bristles. The nostrils are small and oval. The toes are placed three before, and one behind; the middle are greatly connected to the outer. There are 15 species according to Dr Latham. "Birds of this genus, he says, inhabit the warmer parts of America. They vary considerably in their bills as to breadth, but all of them have a certain flatness, or depression, which is peculiar."

(1.) * **TOE**. *n. f.* [*ta*, Sax. *teem*, Dutch.] The divided extremities of the feet; the fingers of the feet.—

Fill me from the crown to th' toe, topful
Of direct cruelty. *Shak.*

Come and trip it as you go,
On the light fantastic toe. *Milton.*

A thousand little nerves she sends
Quite to our toes, and fingers ends. *Prior.*

(2.) **TOES**, BONES OF THE. See **ANATOMY**, *Index*.

(3.) **TOES**, MUSCLES OF THE. See **ANATOMY**, § 218, N° 1—9.

(1.) **TOE HEAD**, a cape of Ireland, on the S. coast of Cork. Lon. 9. 9. W. Lat. 51. 29. N.

(2.) **TOE HEAD**, a cape of Scotland, on the SW. coast of Harris, in the isle of Lewis; 42 miles SW. of Stornoway. Lon. 3. 59. W. Edin. Lat. 37. 59. N.

(1.) **TOELCHUS DE APIE**, and } two districts
(2.) **TOELCHUS DE CABALLO**; } of S. America, in Patagonia.

TOELING HORUN, a town of Chinese Tartary, 375 miles ENE. of Pekin. Lon. 141. 15. E. Ferro. Lat. 42. 22. N.

TOENION, tyrant of Syracuse. See **SYRACUSE**, § 13.

* **TOFORE**. *adv.* [*teforan*, Saxon.] Before. Obsolete.—

It is an epilogue to make plain
Some obscure precedence that hath tofore been
lain. *Shak.*

—So shall they depart the manor with the corn
and the bacon tofore him that hath won it. *Spe?*

* **TOFT**. *n. f.* [*toftum*, law Latin.] A place where a messuage has rood. *Coovel and Ainsf.*

TOFTINGALL LOCH, a lake of Caithness, in the parish of Wattin.

(1.) **TOGA**, in Roman Antiquity, a wide woollen gown or mantle, which seems to have been of a semicircular form, without sleeves; differing both in richness and largeness, according to the circumstances of the wearer, and used only in public. It was the distinguishing mark of a Roman; hence, the *jus toga*, or privilege of a Roman citizen; *i. e.* the right of wearing a Roman habit, and of taking fire and water through the Roman empire.

(2.) **TOGA PRÆTEXTA**. See **PRÆTEXTA**.

TOGARMAH, the son of Gomer; the founder of Phrygia. See **PHRYGIA**, N° 1.

TOGATA GALLIA, a name given to **CISALPINE GAUL** by the Romans, or that part of Gaul,

which lay in Italy on this side of the Alps, as to Rome; because the people wore *toge* or gowns, like the Romans. See **GALLIA**, N° 4.

TOGDA, a town and district of Africa, in Sngilmessa.

* **TOGED**. *adj.* [*tegetus*, Latin.] Gowned; dressed in gowns.—

The bookish theorick,
Wherein the toged consuls can propose
As masterly as he. *Shak.*

TOGEHAUT, a town of Persia, in Irac; 80 miles N. of Ispahan.

* **TOGETHER**. *adv.* [*together*, Saxon.] 1. In company.—We turn'd o'er many books together. *Shak.*

Both together went into the wood. *Milton.*
2. Not apart; not in separation.—He joined humanity and policy together. *Bacon.* 3. In the same place.—

She lodgeth peace and war together. *Davies.*

4. In the same time.—Whilst he and I live together, I shall not be thought the worst poet. *Dryd.*

5. Without intermission.—They expected his return for almost an age together. *Dryden.*—They had a great debate which lasted a month together. *Addison.* 6. In concert.—Wars they made together upon France. *Addison.* 7. In continuity.—

Some trees broad leaves together few'd. *Mil.*
7. **TOGETHER WITH**. In union with; in a state of mixture with.—

Take the bad together with the good. *Dryd.*

TOGGENBURG, or **TOCKENBURG**, a district and ci-devant county of Switzerland. It was bounded on the N. by St Gall, E. by the canton of Appenzel; S. by Sargans and Gaster; and W. by the canton of Zurich.

TOGOSAHATCHEE, a river of Georgia, which runs into the Oakmulgee.

TOHOTCHIE, a town of Chinese Tartary, in Hami; 30 miles NW. of Hami.

TOI, king of Hamath. See **HAMATH**.

* **TOIL**. *n. f.* [from the verb.] 1. Labour; fatigue.—They live to their great, both toil and grief, where the blasphemies of Ariens are renewed. *Hooker.*—

Not to irk some toil, but to delight. *Milton.*

The love of praise,
The proud to gain it toils and toils endure. *Young.*

2. [*Toile*, *toiles*, Fr. *tela*, Lat.] Any net or snare woven or meshed.—

She looks like sleep,
As she would catch another Anthony
In her strong toil of grace. *Shak.*

—He shut up the Christians as it were in a tail
Knives.—

Impatient
As a Numidian lion, when first caught,
Endures the toil that holds him. *Denham.*

—A fly falls into the toil of a spider. *L'Estrange.*

Fantastic honour, thou hast fram'd a toil. *Dryden.*

(1.) * **To TOIL**. *v. a.* 1. To labour; to work at.—

Toil'd out my uncouth passage. *Milton.*

2. To weary; to overlabour.—

He, toil'd with works of war, retir'd. *Shak.*
(2.)

(2.) * **To TOIL.** *v. n.* [*tilian*, Saxon; *tuylen*, Dutch.] To labour; perhaps originally, to labour in tillage.—

He, like a brother, *toil'd* in my affairs. *Shak.*
Others ill-fated are condemn'd to *toil*. *Prior.*
He views the main that ever *toils* below.

Thomson.

* **TOILET.** *n. f.* [*toilette*, Fr.] A dressing-table.
Now the long labours of the *toilet* cease. *Pope.*

* **TOILSOME.** *adj.* [from *toil*.] Laborious;
weary.—

This were it *toilsome*, yet with thee were
sweet. *Milton.*

—In the state of innocence there was no *toilsome*
labour for man or beast. *White.*—

What can be *toilsome* in these pleasant walks?

Milton.

Recall those nights that clos'd thy *toilsome* days.

Pope.

* **TOILSOMENESS.** *n. f.* [from *toilsome*.]
Wearisomeness; laboriousness.

TOISE. *n. f.* a French measure containing 6
French feet, or a fathom. See **MEASURE**.

TOISSEY, a town of France, in the dep. of
the Ain, about half a mile above the junction of
the Chalarogne and Saone, 18 miles W. of Bourg
en Bresse, and 24 N. of Lyons.

TOKAT. See **TOCAT**.

(1.) **TOKAY**, or **TOCKAY**, a town of Upper
Hungary, in the county of Zimplin, with a castle,
situated at the conflux of the Theysse and the
Brodog. It has suffered much in various wars.
It lies 75 miles NW. of Great Waradin, 90 NE.
of Buda; 98 NW. of Colofvar, and 150 E. of
Vienna. Lon. 21. 25. E. Lat. 48. 10. N.

(2.) **TOKAY WINE**, wine produced in the above
country. There are 4 sorts of wine made
from the same grapes, distinguished at Tokay by
the names of *essence*, *auspruch*, *maßlach*, and the
common wine. The *essence* is made by picking
out the half-dried and shrivelled grapes, and putting
them into a perforated vessel, where they
remain as long as any juice runs off, by the mere
pressure of their own weight. This is put into
small casks. The *auspruch* is made by pouring
the expressed juice of the grapes from which the
former had been picked out on those that yielded
the *essence*, and treading them with the feet. The
liquor thus obtained stands for a day or two to
ferment, and then is poured into small casks,
which are kept in the air for about a month, and
afterwards put into casks. The same process is
repeated on the addition of more juice to the
grapes which have already undergone the two former
pressures, and they are now wrung with the
hands; and thus is had the *maßlach*. The 4th
kind is made by taking all the grapes together at
first, and submitting them to the greatest pressure;
this is chiefly prepared by the peasants. The *essence*
is thick, and very sweet and luscious; it is
chiefly used to mix with the other kinds. The
auspruch is the wine commonly exported, and
which in foreign countries is called *Tokay*. The
goodness of it is determined by the following rules.
The colour should neither be reddish nor very
ale, but a light silver; in trying it, the palate
and tip of the tongue should be wetted without
swallowing it, and if it manifest any acrimony to

the tongue, it is not good; but the taste ought to
be soft and mild; when poured out, it should
form globules in the glass, and have an oily appearance:
when genuine, the strongest is always
of the best quality; when swallowed, it should
have an earthy astrigent taste in the mouth,
which is called the taste of the root. All tokay
wine has an aromatic taste, which distinguishes it
from every other species of wine. It keeps to any
age, and improves by time; but is never good till
about three years old. It is the best way to transport
it in casks; for when it is on the seas, it ferments
three times every season, and thus refines
itself. When in bottles, there must be an empty
space left between the wine and the cork, otherwise
it would burst the bottle. A little oil is put
upon the surface, and a piece of bladder tied over
the cork. The bottles are always laid on their
sides in sand. *Phil. Transf.* vol. lxiil. part ii. p.
292, &c.

(1.) * **TOKEN.** *n. f.* [*talken*, Gothick; *sacn*,
Saxon; *teyken*, Dutch.] 1. A sign.—Shew me a
token for good. *Psalms* lxxxvi. 17. 2. A mark.—
They have not the least *token* or shew of the arts
of China. *Heylyn*.—You may know that man to
have the plague upon whom you see the *tokens*.
South. 3. A memorial of friendship; an evidence
of remembrance.—

Here is a letter from queen Hecuba,

A *token* from her daughter, my fair love. *Shak.*

This is some *token* from a newer friend. *Shak.*

Pigwigin gladly would commend

Some *token* to queen Mab to send. *Drayton.*

(2.) **TOKENS.** See **TRADESMEN'S TOKENS**.

* **To TOKEN.** *v. a.* [from the noun.] To make
known. Not in use.—

What in time proceeds,

May *token* to the future our past deeds. *Shak.*

TOKENBURG. See **TÖGGENBURG**.

TOKI-TAO, an island in the E. Indian Ocean,
near the coast of China. Lon. 138. 25. E. Ferro.
Lat. 38. 7. N.

TOKKORADO, or } a commercial town and
TOKORARI } district of Africa, on the
Gold Coast, in the kingdom of Anta. See **ANTA**.
TOL, or **TOL PEDEN PENWITH**, a cape of
England, on the W. extremity of Cornwall; 3
miles SE. of Land's End. Lon. 5. 43. W. Lat.
50. 4. N.

TOLA, the son of Puah, of the tribe of Issa-
char, the 10th judge of Israel. He succeeded the
usurper ABIMELECH, and judged the republic 23
years. He died about A. M. 2811. See **ISRAEL**,
Nº 1, § 3.

TOLAGO BAY, a bay on the NE. coast of the
N. Island of New Zealand, in the S. Pacific Ocean;
with a good road when the wind is W.
11 to 5 fathoms. Lon. 178. 34. E. Lat. 38. 22. S.

TOLAND, John was born near Londonderry
in Ireland, 1670, and educated in the Popish religion;
but at 16 years of age he turned Protestant.
He studied three years at the university of Glas-
gow; was created M. A. in that of Edinburgh;
and completed his studies at Leyden, where he
resided two years. He then went to Oxford,
where he published A Dissertation to prove the
received history of the tragical death of Attilius
Regulus to be a fable. (See **REGULUS**.) He next
undertook

F f f

undertook to show that there are no mysteries in the Christian religion. He published it in 1696 at London, under the title of *Christianity not mysterious*. This book gave great offence, and was attacked by several writers. He afterwards wrote in favour of the Hanoverian succession, and many other pieces. In 1707 he went into Germany, visited several courts; and in 1710 was introduced to Prince Eugene, who gave him several marks of his generosity. Upon his return to England he was for some time supported by the liberality of the earl of Oxford, and kept a country-house at Epsom; but soon losing his lordship's favour, he published several pamphlets against that minister's measures. During the 4 last years of his life he lived at Putney, but spent most of the winter in London. He died at London in 1722. His private character was not amiable. His posthumous works, 2 vols 8vo, were published in 1726, with an account of his life and writings, by M. Des Maizeaux.

TOLEMACUM, an ancient town of Gallia Belgica, afterwards included in the duchy of Juliers, now in the dep. of the Roer.

* **TOLD**. pret. and part. pass. of *tell*. Mentioned & related.—

The acts of God to human ears

Cannot, without process of speech, be *told*. *Milt.*

* **To TOLE**. *v. a.* [This seems to be some barbarous provincial word.] To train; to draw by degrees.—Whatever you observe him to be more frightened at than he should, *tole* him on to it by insensible degrees. *Locke.*

TOLEDO, an ancient trading city of Spain in New Castile, of which it was formerly the capital. About two centuries ago, it contained more than 200,000 inhabitants; but they are now reduced to 20,000 or 30,000. It is advantageously situated on the Tajo, which surrounds it on two sides; and on the land-side it has an ancient wall built by a Gothic king, and flanked with 100 towers. It is seated on a mountain, hence the streets are uneven and narrow; but the houses are fine, and there are many superb structures, besides 17 public squares, where the markets are held. Several of the gates are very large, and of bronze. There is also a high superb steeple, whence there is a very distant prospect. The Sagrario, or principal chapel, is a real treasury, in which are 15 large cabinets set into the wall, full of prodigious quantities of gold and silver vessels, &c. There are two mires of silver gilt, and 3 collars of massy gold set all over with pearls and precious stones. There are two bracelets and an imperial crown of the Virgin Mary, consisting of large diamonds and other jewels. The weight of the gold in the crown is 15 lb. The vessel which contains the consecrated wafer is of silver gilt, as high as a man, and so heavy, that it requires 30 men to carry it; within it is another of pure gold enriched with jewels. Here are 38 religious houses, many churches belonging to 27 parishes, and some hospitals. In the suburbs are relics of an amphitheatre, and other antiquities. Toledo is an archbishop's see, and the seat of the primate of Spain. His revenue is estimated at 400,000 ducats, but it pays 13,000 ducats to the monks of the Elscorial, besides other pensions. Toledo

has also a university. It was formerly celebrated for the exquisite temper of its sword blades. It is 37 miles S. of Madrid.

(1.) **TOLEN**, a town of Norway, 40 miles W. of Berga.

(2.) **TOLEN**, an island of Holland, in the dep. of the Meuse, and of the prov. of Zealand, in the E. branch of the Scheldt; separated from the main land by a canal, 10 miles long and 4 broad. It contains 2 towns, **TOLEN**, (N^o 3.) and *St Martin's Dyck*.

(3.) **TOLEN**, the capital of the above island, is a handsome town; and is fortified with 7 bastions. It is 4 miles NW. of Bergen-op-Zoom. Lon. 21. 40. E. Ferro. Lat. 51. 30. N.

TOLENTINO, a town of Italy, in Ascona, and a bishop's see. It is seated on the Chiaveto; 8 miles SE. of St Severino, 10 SW. of Macerata, and 88 NE. of Rome. Lon. 13. 11. E. Lat. 43. 14. N.

TOLENUS, a river of ancient Latium, running into the Velinus; now called *Salto*. *Ovid. Fast. vi.*

* **TOLERABLE**. *adj.* [tolerable, Fr. *tolérable*, Lat.] 1. Supportable; that may be endured or supported.—Ye judge them not allowable, but *tolerable* only. *Hooker*.—It shall be more *tolerable* for Sodom than for that city. *Matth. x. 15*.—

Cold and heat scarce *tolerable*. *Milton.*

—Hypocrisy can make *tolerable* to itself. *Tillotson.*

2. Not excellent; not contemptible; passible.—

A *tolerable* translation. *Dryden*.—Princes can keep a majority on their side by any *tolerable* administration. *Swift*.

* **TOLERABLENESS**. *n. f.* [from *tolerable*.] The state of being tolerable.

* **TOLERABLY**. *adv.* [from *tolerable*.] 1. Supportably; in a manner that may be endured. 2. Passably; neither well nor ill; moderately well.—Sometimes are found in laxer strata bodies that are *tolerably* firm. *Woodward*.—He acquitted himself *tolerably* at a ball. *Addison*.

* **TOLERANCE**. *n. f.* [tolerantia, Lat. *tolerance*, Fr.] Power of enduring; act of enduring. Not used, though a good word.—Diogenes one frosty morning came into the market-place shaking, to shew his *tolerance*. *Bacon*.—A *tolerance* or endurance of being made happy here, and blessed eternally. *Hammond*.

TOLERANT. *adj.* enduring.

* **To TOLERATE**. *v. a.* [*tolero*, Lat. *tolerare*, Fr.] To allow so as not to hinder; to suffer; to pass uncancelled.—Such things might be *tolerated* for a while. *Hooker*.—We shall *tolerate* flying horses, harpies, and satyrs. *Brown*.—Men should not *tolerate* themselves one minute in any known sin. *Decay of Piety*.—Crying should not be *tolerated* in children. *Locke*.—We shall always *tolerate* them. *Swift*.

(1.) * **TOLERATION**. *n. f.* [*tolero*, Latin.] Allowance given to that which is not approved.—I shall not speak against the indulgence and *toleration* granted to these men. *South*.

(2.) **TOLERATION**, in religion, is either civil or ecclesiastical. Civil toleration is an impunity and safety granted by the state to every sect that does not maintain doctrines inconsistent with the public peace; and ecclesiastical toleration is the allowance which the church grants to its members.

bers to differ in certain opinions, not reputed fundamental.

TOLESBURG, a sea-port town of Russia, in Riga; seated on the Gulf of Finland; 60 miles W. of Narva. Lon. 26. 4. E. Lat. 59. 38. N.

TOLETUM, an ancient town of Spain, now called **TOLEDO**.

TOLFA, a town of Italy, in the prov. of Patumonia; near mines of alum, iron, lapis lazuli, and slabaſter, and warm baths. It lies 4 miles from the ſea-coaſt, and 25 NW. of Rome.

TOLHUYS, a town of Holland, in the department of the Rhine, and ci-devant province of Guelderland; ſeated on the Rhine, 8 miles E. of Nimegueu. Lon. 6. 0. E. Lat. 51. 56. N.

TOLISTOBOLI, an ancient people of Galatia, in Aſia, deſcended from the Boii of Gaul. *Plin. v. 32. Liv. v. 58. 1516.*

TOLITZIN, a town of Ruſſia, in the province of Moguev, 70 miles N. of Mogilev.

TOLKEMIT, a town of Pruſſia, in Ermeland, 28 miles NE. of Marienburg.

(1.) * **TOLL**. *n. s.* [This word ſeems derived from *tollo*, Latin; *toll*, Saxon; *tol*, Dutch; *told*, Daniſh; *toll*, Weiſh; *tallie*, Fr.] An exciſe of goods; a ſeizure of ſome part for permiſſion of the reſt.—*Toll*, in law, has two ſignifications; firſt, a liberty to buy and ſell within the precincts of a manor, which ſeems to import as much as a fair or market; ſecondly, a tribute or cuſtom paid for paſſage. *Cowel*.—Epſom and Dudley took *toll* of their matter's grift. *Bacon*.—Stopped them from levying the *toll* upon their trade into the Euxine. *Arbutnot*.

(2.) A **TOLL** is a tax or cuſtom paid for liberty to vend goods in a market or fair, or for keeping roads in proper repair. The firſt appointment of a toll on highways of which we read, took place in 1346. See **ROAD**.

(1.) * **To TOLL**. *v. n.* [from the noun.] 1. To pay toll or tallage.—I will buy me a ſon-in law in a fair, and *toll* for him. *Shak*.—

In the open market *toll'd* for? *Hudibras*.

2. To take toll or tallage.—

The miller that *tolleth* takes none but his due. *Tuſſer*.

3. [I know not whence derived.] To ſound as a lingie bell.—

His tongue Remember'd *tolling* a departed friend. *Shak*.—

Going to church at the *tolling* of a bell. *Still- ingfleet*.—

Toll, toll, gentle bell. *Denham*.
The bell that *toll'd* alone. *Dryden*.
Toll them to their cells. *Dryden*.

Now ſink in ſorrows with a *tolling* bell. *Pope*.

(2.) * **To TOLL**. *v. a.* [*tollo*, Latin.] 1. To ring a bell.—When any one dies, then by *tolling* or ringing of a bell, the fame is known to the ſearchers. *Graunt*. 2. To take away; to vacate; to annul. A term only uſed in the civil law: in this ſenſe the *o* is ſhort, in the former long.—An appeal from ſentence of excommunication does not ſuſpend it, but then involves it to a ſuperior judge, and *tolls* the preſumption in favour of a ſentence. *Ayliffe*. 3. To take away, or perhaps to invite. Obſolete.—The adventitious moiſture which hangeth looſe in a body, betrayeth and *tolleth* forth

the innate and radical moiſture along with it. *Bacon*.

TOLLAN, the country from which the people of Mexico firſt emigrated to N. America. See **MEXICO**, N° 1, § 4.

(1.) **TOLLAND**, a hilly and rocky county of Connecticut; bounded on the N. by Maſſachuſetts; E. and SE. by Windham county; S. by New London, and W. by Hartford counties. It is 29 miles long from N. to S. and 21 broad from E. to W. It is divided into 9 townſhips; viz. Somers, Stafford, Union, Ellington, **TOLLAND**, Wilmington, Bolton, Coventry, and Hebron. It contained 13,055 citizens in 1795, and 47 ſlaves. The chief town is

(2.) **TOLLAND**, the capital of the above county, is ſeated on the E. bank of the Willomantic, and contains many good houſes. It lies 18 miles NE. by E. of Hartford, and 242 from Philadelphia. Lon. 2. 31. E. of that city. Lat. 41. 51. N.

TOLLANTZINCO, a city of Mexico. See **MEXICO**, § 4.

TOLL-BAR. *n. s.* [*toll* and *bar*.] A large gate, ſet up at proper ſtages, for the collection of the toll on the turnpike roads.

* **TOLLBOOTH**. *n. s.* [*toll* and *booth*.] A priſon. *Ainsworth*.

* **To TOLLBOOTH**. *v. a.* To impriſon in a toll-booth.—

To theſe what did he give why a hen,
That they might *tollbooth* Oxford men. *Eiſop Corbet*.

TOLLEIT, a town of Auſtria, 6 miles SW. of Efferdency.

TOLLENTINUM, an ancient town of Italy in Picenum, (*Plin. iii. c. 13.*) now called **TOLLENTINO**.

TOLLERSHAM, a town of Germany, in Auſtria, 4 miles NE. of Zwetle.

TOLLEſIO, a town of Sweden in W. Gothland, 23 miles ENE. of Gottenburg.

TOLLET, Elizabeth, an ingenious and learned Engliſh lady, born in 1694. She was well ſkilled in Latin, French, and Italian, as well as in hiſtory and mathematics. She wrote ſeveral poems; and a dramatic piece entitled *Susana*, or *Innocence Preserved*.

* **TOLLGATHERER**. *n. s.* [*toll* and *gatherer*.] The officer that takes toll.

(1.) **TOLLIIUS**, Alexander, a learned Dutch critic, born at Ingra, in the province of Utrecht. He publiſhed an elegant edition of *Appian*.

(2.) **TOLLIUS**, Cornelius, brother of the preceding, was alſo a learned critic; and became ſecretary to Iſaac Voſſius; and afterwards profeſſor of Greek and Rhetoric, at Harderwyck. He publiſhed an edition of *Palephatus*; and a work entitled, *De Infelicitate Litteratorum*.

(3.) **TOLLIUS**, James, M. D. brother to Cornelius and Alexander, was born at Ingra in Utrecht, and ſtudied phyſic. He became a phyſician and profeſſor of rhetoric and Greek at Brandenburg. He publiſhed elegant editions of 1. *Anonius, cum notis variorum*; 1671: 2. *Longinus de Sublimitate*; 1694. He died in 1696.

TOLMEZO, or } a town in Friuli, 25 miles
TOLMEZZO, } NW. of Friuli, and 30 NE. of Belluno. Lon. 12. 50. E. Lat. 46. 30. N.

TOLMIDES, an Athenian general, who was defeated and killed in a battle with the Thebans in Boeotia, A. A. C. 447. *Polyen.* 7.

TOLMINO, a town of Austria, and capital of a district so named, in Carniola; 9 miles SSW. of Feldsee, and 12 N. of Goritz.

TOLNA, or **TOLNIA**, a town of Hungary, and capital of a county so named, which produces good wine, on the Danube; 30 miles NE. of Ziget, 50 S. of Buda, and 8 SW. of Colocza. Lon. 19. 28. E. Lat. 46. 33. N.

TOLNANI, a town of Hindoostan, in Bagiana; 70 miles W. of Burhanpour, and 124 E. of Surat. Lon. 75. 3. E. Lat. 21. 15. N.

TOLNIA. See **TOLNA**.

TOLO, a town of Spain, in Catalonia, 21 miles N. of Balaguer.

TOLOMETO, a sea-port town of Africa, in Tripoli, anciently called **PROLEMAIS**.

TOLON, an island in the Grecian Archipelago. Lon. 40. 45. E. Ferro. Lat. 37. 35. N.

(1.) **TOLOSA**, in ancient geography, a town of Gallia Narbonensis, which became a Roman colony under Augustus. There was in it a rich temple of Minerva, which Cæpio the Roman consul plundered; but being ever afterwards unfortunate, *aurum Tolosanum* became proverbial. *Cæs. de B. G.* It is now called **TOULOUSE**.

(2.) **TOLOSA**, or } in modern geography, a city
TOLOZA, } of Spain, the capital of the province of Guipulcoa. It is famous for its manufactures, particularly in cutlery ware. It is seated in a pleasant valley, between the Araxes and Oria; over which rivers it has two handsome bridges, and near these are several grand cataracts. It lies 7 miles S. of St Sebastian, 37 SW. of Bayonne, 45 NW. of Pampeluna, and 60 ESE. of Bilbao. Lon. 2. 5. W. Lat. 43. 10. N.

TOLPAS, a river of Russia, in the province of Iustig, which runs into the Schugor, in Lon. 76. 8. E. Ferro. Lat. 63. 40. N.

* **TOLSEY**, *n. s.* The fæmæ with *tollbooth*. *DiB.*

TOLSTA, a town of Sweden, in W. Gothland, 30 miles WSW. of Linköping.

TOLTONOSKOI, a town of Russia, in Tobolskoi, on the Enisei; 280 miles NNW. of Turchansk. Lon. 103. 0. E. Ferro. Lat. 70. 16. N.

TOLTECA, the original country of the

TOLTECANS, the progenitors of the Mexicans. See **MEXICO**, N° I. § 4. The Toltecans, who first inhabited Mexico, were accounted much more polished than those who came after them. They always lived in society, collected into cities, under the government of kings, and had regular laws. They understood the art of casting gold and silver, and melting them in what ever forms they pleased, acquiring also great reputation from their skill in cutting gems of all kinds; and they were besides well versed in the sciences of astronomy and chronology. So early as 100 years before the Christian æra, these people had observed how far the solar year exceeded the civil one; and had supplied that defect by the addition of one day every 4th year, as we do. They were also much skilled in agriculture, and were not deficient in the fine art of painting.

TOLTITLAN, a city of Mexico.

TOLU, a town of Terra Firma in Carthagenæ, famous for the fine balsam. See **TOLUIFERA**. It is seated on a bay of the North Sea, 60 miles S. of Carthagenæ. Lon. 72. 55. W. Lat. 9. 40. N.

TOLVA, a town of Naples, in the province of Basilicata, 9 miles SSE. of Acerenza.

TOLUCO, a town of Mexico, 24 miles SW. of Mexico.

TOLUIFERA, the **BALSAM OF TOLU TREE**; a genus of plants belonging to the class of *decandria*, and order of *monogynia*. There is only one species; viz.

TOLUIFERA BALSAMUM. This tree grows to a considerable height; it sends off numerous large branches, and is covered with rough, thick, greyish bark; the leaves are elliptical or ovate, entire, pointed, alternate, of a light green colour, and stand upon short strong footstalks; the flowers are numerous, and produced in lateral racemi: the calyx is bell-shaped, divided at the brim into 5 teeth, which are nearly equal, but one is projected to a greater distance than the others; the petals are inserted into the receptacle; of which 4 are equal, linear, and a little longer than the calyx; the 5th is much the largest, inversely heart-shaped, and its unguis is of the length of the calyx; the 10 filaments are very short, and furnished with long antheræ; the germen is oblong; there is no style; the stigma is pointed; the fruit is a round berry. The balsam is obtained by making incisions in the bark of the tree, and is collected into spoons, which are made of black wax, from which it is poured into proper vessels. This balsam is of a reddish yellow colour, transparent, in consistence thick and tenacious; by age it grows so hard and brittle, that it may be rubbed into a powder between the finger and thumb. Its smell is extremely fragrant, somewhat resembling that of lemons; its taste is warm and sweetish, and on being chewed it adheres to the teeth. Thrown into the fire it immediately liquifies, takes flame, and disperses its agreeable odour. Though it does not dissolve in water, yet if boiled in it for two or three hours in a covered vessel, the water receives its odorous smell; water also suffers a similar impregnation from the balsam by distillation. With the assistance of mucilage it unites with water, so as to form a milky solution. It dissolves entirely in spirit of wine, and easily mixes with distilled oils, but less easily with expressed oils. Distilled without addition, it produces not only an empyreumatic oil, of a pale dark colour, but sometimes a small portion of a saline matter, similar to that of the flowers of benzoin. This balsam possesses the same general virtues with the balsam of Gilead, and that of Peru; it is, however, less heating and stimulating, and may therefore be employed with more safety. It has been chiefly used as a pectoral, and is said to be an efficacious corroborant in gleets and femoral weaknesses. It is directed by the Pharmacopœians in the syrupus tolutanus, tinctura tolutana, and syrupus balsamicus. See **PHARMACY**, *Index*.

* **TOLUTATION**, *n. s.* [*toluto*, Latin.] The act of pacing or ambling.—They move *per latera*, that is, two legs of one side together, which is *tolutation* or ambling. *Brown.*—

They

They rode; but authors having not
Determin'd whether pace or trot,
That is to say, whether *tulation*,
As they do term't, or succussion,
We leave it.

Hudibras.

TOLZ, a town of Germany, in Upper Bavaria; 24 miles S. of Munich, and 18 W. of Weilhaim.

(1.) **TOM**, a river of Russia, which rises in the government of Kolivan, 80 miles SE. of Kaznetz; and falls into the Oby, 32 m. WNW. of Tomsk: in Lon. 102. o. E. Ferro. Lat. 56. 40. N.

(2.) **TOM**, a river of China, which runs into the Heng, 5 miles S. of Heng-chan.

(3.) **TOM**, a town of China, of the 3d rank, in the prov. of Set-chuen: 32 miles ENE. of Kiating.

TOMA, one of the chief cities of Sus, in Morocco. See **SUS**, N° I.

TOMACO, a large river of S. America in Poyayan and Terra Firma.

(1.) **TOMAHAWK**. *n. f.* a weapon much used by the N. American Indians in their savage wars with each other, and with which they do a great deal of bloody execution; but we have met with no description of it.

(2.) **TOMAHAWK ISLAND**, an island on the E. coast of Patagonia; 24 miles NE. of Seals Bay.

TOMANI, a kingdom of Africa, seated on the W. of Kantor; extending about 72 miles along the banks of the Gambia.

TOMAR, a town of Portugal in Estremadura, on the Nabeon, on a pleasant plain at the foot of a mountain, 65 miles NE. of Lisbon. Lon. 7. 35. W. Lat. 39. 3. N.

TOMARUS. See **TMARUS**.

TOMATOES. See **SOLANUM**.

(1.) * **TOMB**. *n. f.* [*tombe, tombeau, Fr. tumba, low Latin.*] A monument in which the dead are enclosed.—

Dead in the bottom of a tomb.

Shak.

—Time is drawn upon tombs. *Peacbam.*—

Poor heart! she slumbers in her silent tomb.

Dryden.

On my tomb-stone thou shalt read

My answer to thy dubious verse.

Prior.

(2.) **TOMB** includes both the grave or sepulchre wherein a defunct is interred, and the monument erected to preserve his memory. The word is formed from the Greek *τομος*, *tumulus*, a sepulchre; or according to Menage, from the Latin *tumba*, which signifies the same.

(3.) **TOMBS, ANCIENT**. In many nations it has been customary to burn the bodies of the dead; and to collect the ashes with pious care into an urn, which was deposited in a tomb or sepulchre. See **BURIAL**, § 2; and **BURNING**, § 5. Among many nations it has also been the practice to lay the dead body in a tomb, without consuming it, after having wrapped it up decently, and sometimes placing it in a coffin. See **COFFIN**, § 2. The tombs of the Jews were generally hollow places hewn out of a rock. The Egyptians also buried their dead in caves, called *catacombs*. See **CATACOMBS**. The pyramids, as some think, were also employed for the same purpose. Sometimes also, after embalming their dead, they placed them in niches in some magnificent apartment in their houses.

(4.) **TOMBS, PERSIAN**. A tomb of the Persians is a circular building, open at top, about 55 feet diameter, and 25 feet in height, filled to within 5 feet of the top, excepting a well of 15 feet diameter in the centre. The part so filled is terraced, with a slight declivity toward the well. Two circular grooves three inches deep are raised round the well; the first at the distance of four, the second at ten, feet from the well. Grooves of the like depth or height, and four feet distant from each other at the outer part of the outer circle, are carried straight from the wall to the well, communicating with the circular ones, for the purpose of carrying off the water, &c. The tomb is thus divided into 3 circles of partitions: the outer, about 7 feet by 4; the middle, 6 by 3; the inner, 4 by 2; the outer for the men, the middle for the women, the inner for the children; in which the bodies are respectively placed, wrapped loosely in a piece of cloth, and left to be devoured by the vultures; which is very soon done. The friends of the deceased come at the proper time, and throw the bones into the well. The entrance is closed by an iron door, four feet square, on the eastern side, as high up as the terrace, to which a road is raised. Upon the wall, above the door, an additional wall is raised, to prevent people from looking into the tomb which the Persians are particularly careful to prevent. A Persian inscription is on a stone inserted over the door. From the bottom of the wall subterraneous passages lead to receive the bones, &c. and prevent the well from filling.

(5.) **TOMBS, RUSSIAN**. Of the ancient sepulchres found in Russia and Siberia, some are perfect tumuli, raised to an enormous height, while others are almost level with the ground. Some of them are encompassed with a square wall of large quarry stones placed in an erect position; others are covered only with a small heap of stones, or they are tumuli adorned with stones at top. Some are mured with brick within, and vaulted over; others are no more than pits or common graves. In some the earth is excavated several fathoms deep; others, and especially those which are topped by a lofty tumulus, are only dug of a sufficient depth for covering the carcase. Urns are never met with here. But sometimes what remained of the bodies after the combustion, and even whole carcases, are found wrapped up in thin plates of gold.

(6.) **TOMBS, TURKISH, MOORISH, &c.** The Moors hold it an irreverent thing to bury their dead in mosques. The burial grounds of all Mahometans are mostly without the city, and they inter the dead at the hour set apart for prayer. Their tombs are exceedingly simple, and have no pretensions to architectural elegance. Among the northern nations it was customary to bury their dead under heaps of stones called *cairns*, or under barrows: (See the articles **CAIRNS** and **BARROW**). The inhabitants of Tibet, it is said, neither bury nor burn their dead, but expose them on the tops of the mountains. See **TIBET**, § 10.

* **To TOMB**. *v. a.* [from the noun.] To bury; to entomb.—

Youths, that tomb'd before their parents were.

May.

TOMBAC,

TOMBAC, } or **TOMBEC**. See **TOMBEC**.

TOMBECQUE, a town of France, in the dep. of Lot and Garonne; 9 miles NNE. of Tonnecins, and 12 NW. of Villeneuve d'Agenois.

TOMBEC, a town of the French empire, in the department of the Dyle, and ci-devant province of Aultrian Brabant; 8 miles S. of Louvain, and 10 E. of Brussels. Lon. 4. 49. E. Lat. 50. 45. N.

TOMBECKBEE, a large river of the United States, in Georgia, which rises in the country of the Chickasaw Indians; and thence running a long course E. and by S. at last unites with the Alabama, and forms the great river **MOBILE**.

(1.) **TOMBERLAINE**, an island of France, on the coast of the dep. of the Calvados, or ci-devant province of Normandy; seated in a gulf between Avranches and St. Malo. This island is every day joined to the continent at low water.

(2.) **TOMBERLAINE**, a town of France on the above island.

* **TOMBLESS**, *adj.* [from *tomb*.] Wanting a tomb; wanting a sepulchral monument.—

Lay these bones in an unworthy urn,

Tombless, with no remembrance over them. *Shak.*

* **TOMBOY**, *n. f.* [*Tom* a diminutive of *Thomas* and *boy*.] A mean fellow; sometimes a wild coarse girl.—

A lady.—Partner'd—With *tombboys*. *Shak.*

TOMBUCTOO, or } a large city in N. Africa,

TOMBUCTOU, } and capital of a kingdom

so named, of which very little is known with accuracy, as it has never been visited by any European. It is the largest on the Niger, Houssa only excepted; and contains from 60,000 to 80,000 inhabitants. Lon. 1. 33. E. Lat. 16. 30. N.

TOMBU, a kingdom of Africa, in Negroland, with its capital of the same name.

* **TOME**, *n. f.* [French; *tom*,] 1. One volume of many. 2. A book.—All those sacred *tom*es and volumes of holy writ. *Hooker.*

TOMEBAMBA, a town of Peru, in the prov. of Quilo; which had anciently an elegant temple of the Sun; the roof and walls of which, when the Spaniards arrived there, were covered with gold. It lies 120 miles S. of Quito. Lon. 77. 50. E. Lat. 4. 16. S.

TOMERIT, a mountain of European Turkey, in Albania; 12 miles E. of Dulcigno.

TOMEX, in botany, a genus of plants, of the class *Tetrandria*, and in the order of *Monogynia*; and in the natural method ranking under the 43d order, *Dumose*. They have flowers tetrapetalous and complete, having both calyx and corolla.

TOMGAN, a town of China, of the 3d rank, in Fokien; 25 miles NE. of Pa.

TOMHAL, a town of China, of the 3d rank, in the prov. of Yun-nan; 20 miles SW. of Ning.

TOMJANA, a province of Buenos Ayres; about 200 miles in extent, abounding with sheep and black cattle, fruits and vineyards. It is very fertile, and the climate is hot. Sugar is a principal article of commerce.

TOMINI, a town in the island of Celebes, on a bay to which it gives name. Lat. 0. 45. S.

TOMIS. See **TOMOS**.

TOMIS, a country between Cappadocia and Mount Taurus. *Strabo.*

TOMOS, or **TOMIS**, the capital of Lower Mysia, seated on the Euxine Sea; 36 miles from the mouth of the Danube. It was founded by a colony of Milesians, A. A. C. 633; and is famous for having been the place to which OVID was banished by Augustus. *Strabo*, 7.

TOMOTHEL, or } a town of the State of
TOMOTHLE, } Tennessee; 20 miles S. of
Tellico.

TOMPEQUE, a town of Mexico, in the province of Guaslec.

(1.) **TOMPION**, *n. f.* a sort of bung or cork used to stop the mouth of a cannon. At sea this is carefully encircled with tallow or putty, to prevent the penetration of the water into the bore, whereby the powder contained in the chamber might be damaged or rendered unfit for service.

(2.) **TOMPION**, Thomas, an English watch-maker of extraordinary merit, who flourished at London in the 17th century.

TOMPSONSTOWN, a town of Pennsylvania, in Mifflin county; 22 miles from Lewistown.

TOMQUAM, a town of Asia, in Corea, on the Tumen; 633 miles ENE. of Pekin. Lon. 147. 21. E. Ferro. Lat. 42. 52. N.

TOMSK, a city of Siberia, or Russian Tartary, in Tobolskoi, on the Tom. It was founded in the reign of Czar Theodor, the son of John, who erected first an *ostrog*, or village, on the spot, about 20 years before the building of Kufnetik, and afterwards built a fortress; so that in process of time, by the increase of population, it became a town; and it is now the 2d city in Siberia. On the highest part of it stands a strong wooden castle, mounted with 14 pieces of cannon. And it has a large cathedral, built also of wood; likewise the waywode's house, the governor's chancery, and a good arsenal. The lower part of the city is the most populous. The inhabitants carry on a considerable trade, for which the city is peculiarly well situated, as it lies on the high road from Eniseisk, and from the various towns in the E. and N. parts of Siberia. In this city are all kinds of artificers and tradesmen; and manufactures of various kinds are carried on in it. It is 168 miles NNE. of Kolivan, and 540 E. of Tobolsk, as Cruttwell has it; but Brookes and Walker make it only 105 ESE. of Tobolsk. Lon. 84. 59. E. Lat. 55. 45. N. or 56. 30. N.

TOMSKOIZOV, a town of Russia in the province of Kolivan; 80 miles ESE. of Kolivan.

TOMSOOK, *n. f.* in the language of Bengal, bond.

(1.) * **TOMTIT**, *n. f.* [See **TITMOUSE**.] A titmouse; a small bird.—You would fancy him a giant when you looked upon him, and a *tomtit* when you shut your eyes. *Spe&ator*.

(2.) **TOM-TIT**, in ornithology. See **PARUS**.

TOMYRIS. See **CYRUS**, N° 1.

(1.) **TON**, in geography, a city of China, of the 2d rank, in the province of Yunnan; 1150 miles SW. of Pekin. Lon. 118. 9. E. Ferro. Lat. 26. 39. N.

(2.) * **TON**, *n. f.* [*tonne*, Fr. See **TUN**.] A measure or weight.—Ten thousand *ton*, of great shipping. *Bacon*.

(3.) **TON**. See **TUN**.

(4.) * **TON-TUN**. In the names of places, are derived

derived from the Saxon *tan*, a hedge or wall; and this seems to be from *dun*, a hill, the towns being anciently built on hills for the sake of defence and protection in times of war. *Gibson*.

(5.) **Ton**, in fashionable language, the fashion, the etiquette. It is used both as an adjective and as a substantive noun.

TONAL, a mountain of Germany, in Tirol; 28 miles NW. of Trent.

TONAWALD, a town of Bohemia, in Boleſlan. 10 miles NE. of Turnau.

TONCAT, **TUNKAT**, or **TUNGUT**, a town of Affia, in Turkeſtan, on the Sir; 50 miles NE. of Samarcand. Lon. 88. 45. E. of Ferro. Lat. 43. 10. N.

TONC-CHONG, a town of Tibet, 192 miles SE. of Laſſa.

TONDERGARTH, or **TUNDERGARTH**, a parish of Scotland, in Dumfries-shire, about 14 miles long, and 1½ broad; comprehending the fides of a range of hills, which lie along the banks of the river MILK. The surface is generally level, but with ſufficient gentle riſings to render it romantically pictureſque. A great part of it is well cultivated. About 4000 ſheep are annually reared on the paſtures. The population, in 1796, was 510; the decrease 115, ſince 1755. The only antiquity is the ruinous old caſtle of Tondergarth, a chief feat of the lords of Annandale.

TONDEREN, or } an ancient town of Den-
TONDERN, } mark, in the duchy of Sleſ-
wick. The inhabitants have a great trade in corn, cattle, and laces. It is 22 miles S. of Ripen, and 37 NW. of Sleſwick. Lon. 9. 40. E. Lat. 54. 58. N.

TONDIVANUM, a town of Hindooſtan, in the Carnatic, 15 miles S. of Wandiwash.

TONDORF, a town of Bohemia, in Konigin-gratz, 9 miles W. of Branau.

TONDRAY, an iſland of Scotland, one of the Shetland iſlands, about 6 miles in circuit, near the W. coaſt. Lon. 1. 41. E. of Edin. Lat. 60. 9. N.

TONDY, a town of Hindooſtan, in the Carnatic; 45 miles SSE. of Trumian, and 65 S. of Tanjore.

(1.) * **TONE**. *n. f.* [*ton*, Fr. *tonus*, Latin.] 1. Note; ſound.—Sounds called *tones* are ever equal. *Bacon*.—Strength of voice makes no difference in the *tone*. *Bacon*.—

Smooths her charming *tones*. *Milton*.

2. Accent; ſound of the voice.—

Eager his *tone*, and ardent were his eyes.

Dryden.

Each enunciates with a human *tone*. *Harte*.

3. A whine; a mournful cry.—

Made children, with your *tones*, to run for't.

Hudibras.

4. A particular or affected ſound in ſpeaking.

5. Elasticity; power of extenſion and contraction.—It may weaken the *tone* of the ſtomach. *Arbutb.*

(2.) **TONE**, or **TUNE**, in muſic, is a property of ſound, whereby it comes under the relation of *grave* and *acute*; or the degree of elevation any ſound has, from the degree of ſwiftness of the vibrations of the parts of the ſonorous body. The variety of tones in human voices ariſes partly from the dimensions of the windpipe, which, like a flute, the longer and narrower it is, the ſharper

the tone it gives; but principally from the head of the larynx or knot of the throat: the tone of the voice being more or leſs grave as the *rima* or cleft thereof is more or leſs open.

(3.) **TONE** is taken in four different ſenſes among the ancients: 1. For any ſound; 2. For a certain interval, as when it is ſaid the difference between the diapente and diateſſaron is a tone; 3. For a certain locus or compaſs of the voice, in which ſenſe they uſed the Dorian, Phrygian, Lydian tones; 4. For tenſion, as when they ſpeak of an acute, grave, or middle tone.

(4.) **TONE** is particularly uſed, in muſic, for a certain degree or interval of tune, whereby a ſound may be either raiſed or lowered from one extreme of a concord to the other, ſo as ſtill to produce true melody.

(5.) **TONE**, in geography, a river of England, in Somerſetſhire, which riſes 6 miles from Wivelſcomb, paſſes Taunton, and runs into the PARRET, between Langford and Bridgewater.

TONEDO, a town of Italy, in the dep. of the Panaro, and ci-devant duchy of Modena; anciently called TANETUM.

TONEWONTO, a town of New York, on a river ſo named; 15 miles E. of Niagara Falls.

(1.) **TONG**, 4 cities of China, of the 2d rank, in the provinces of Chenſi, Ho-nan, Kiang-nan, and Pe-tche-li.

(2.) * **TONG**. *n. f.* [See **TONGS**.] The catch of a buckle. This word is uſually written *tongue*, but, as its office is to hold, it has probably the ſame original with *tongs*, and ſhould therefore have the ſame orthography.—

Buckled with a golden *tong*.

Spenser.

TONGA, or } one of the FRIENDLY
TONGATABOO, } ISLANDS, in the S. Pa-
cific Ocean. It was firſt diſcovered by Taſman, who called it *Amſterdam*. See AMSTERDAM, N^o 11.

TONGE, **NEW** and **OLD**, 2 towns of Holland, in the iſland of Overſlakee, and dep. of the Delſt, 1½ miles S. of Sommerdyck.

TONGELREP, a river of Holland, in the dep. of the Dommel and Scheldt, which runs into the Dommel, near Eyndhoven.

TONGEREN, or } French empire, in the dep.
TONGERES, } of the Ourte, and ci-devant

TONGEREST, } biſhopric of Liege, ſeated on the Jeckar, 12 miles SW. of Mæſtricht, and 15 W. of Liege. Lon. 22. 56. E. Ferro. Lat. 50. 48. N.

TONGERLOO, a town of the French empire, in the dep. of Ourte, and late biſhopric of Liege; 4 miles NW. of Stockem.

TONGLAND, or **TONGUELAND**, a pariſh of Scotland, in Kirkcudbrightſhire, of a triangular form, 8 miles long, and 4 broad at the N. extremity, where the Tarff and Dee join, theſe rivers bounding it on the E. and W. ſides. The middle part is a ridge of mountains extending from N. to S. On the river banks, the ſurface is level, and the ſoil fertile; towards the N. ſtony, but arable. The population, in 1792, was 520; decrease 17, ſince 1755; the number of ſheep was 790; of black cattle about 1200. There are relics of an ancient priory of Præmonſtratenſians.

* **TONGS**. *n. f.* [*tang*, Saxon; *tang*, Dutch.]

An

An instrument by which hold is taken of any thing ; as of coals in the fire.—

Another did the dying brands repair

With iron *tongs*.

Spenser.

They turn with crooked *tongs*.

Dryden.

—Get a pair of *tongs* strong and toothed. *Mort.*

TONG-TCHOUEN, a city of China, of the first rank, in the prov. of Se-tchuen. It is strongly fortified, and is indeed a military city, the whole male inhabitants being bred soldiers from their infancy. These troops, in times of peace, are distributed in the different garrisons on the frontiers. It lies 1000 miles SW. of Pekin. Lon. 120. 48. E. Ferro. Lat. 26. 20. N.

(1.) * **TONGUE**. *n. f.* [*tung*, Saxon; *tongue*, Dutch.] 1. The instrument of speech in human beings.—

My conscience hath a thousand several *tongues*,
And every *tongue* brings in a several tale. *Shak.*

Who with the *tongue* of angels can relate?

Milton.

—They are *tongue*-valiant. *L'Esrange.*—

Tongue-kill'd.

Dryden.

Tongue valiant hero.

Dryden.

—Hold her *tongue* five years together. *Addison.*
—Ready at their *tongue*'s end. *Locke.*—My *tongue* could pronounce. *Watts.* 2. The organ by which animals lick.

They hiss with forked *tongue*.

Milton.

3. Speech; fluency of words.—Silence all their *tongues* contain'd. *Chapman.*—Much *tongue* and much judgment seldom go together. *L'Esrange.*

Ever foremost in a *tongue* debate.

Dryden.

4. Power of articulate utterance.—

Parrots, imitating human *tongue*.

Dryden.

5. Speech, as well or ill used.—Keep a good *tongue* in thy head. *Shak.*—Inferiour farre in martiall deeds, though higher in his *tongue*. *Chapman.*

—On evil days though fallen and evil *tongues*. *Milton.* 6. A language.—Their *tongue* thou shalt not understand. *Deut.*

To speak at *tongues*.

Milton.

So well he understood the most and best

Of *tongue* that Babel sent into the West. *Cowley.*

—Acquaintance with the various *tongues*. *Watts.*

7. Speech, as opposed to thoughts or actions.—Let us not love in word, neither in *tongue*, but in deed and in truth. 1 *John.* 8. A nation distinguished by their language. A scriptural term.—

The Lord shall destroy the *tongue* of the Egyptian sea. *Isa.* 9. A small point; as, the *tongue* of a balance. 10. To hold the **TONGUE**. To be silent.—

'Tis seldom seen that senators so young

Know when to speak, and when to hold their *tongue*.

Dryden.

Whilst I live I must not hold my *tongue*. *Addison.*

(2.) **TONGUE**. See **ANATOMY**, *Index*.

(3.) **TONGUE**, in geography, a parish of Scotland, in Sutherlandshire, on the N. coast; about 11 miles long, and as many broad; of which only 714 acres are arable. The surface is hilly, a ridge of high mountains extending through the middle of it. **LOCH LAOCHAL** is the chief lake. The population, in 1791, was 1439, the increase 346, since 1755; the number of horses was 538; sheep 2846; that of black cattle 2142; and of goats 714. There are some relics of antiquity, par-

cularly one in memory of **DORNADILLA**, king of Scots.

(4.) **TONGUE**, a town in the above parish. Lon. 1. 0. W. of Edin. Lat. 58. 27. N.

(5.) **TONGUE BAY**, a spacious bay of Scotland, on the coast of the above parish.

(1.) * To **TONGUE**. *v. a.* [from the noun.] To chide; to scold.—

How might she *tongue* me.

Shak.

(2.) * To **TONGUE**. *v. n.* To talk; to prate.

'Tis still a dream; or else such stuff, as madmen

Tongue, and brain not.

Shak.

* **TONGUED**. *adj.* [from *tongue*.]—

Tongue'd like the night-crow.

Donne.

* **TONGUELESS**. *adj.* [from *tongue*.] 1.

Wanting a *tongue*; speechless.—

What *tongueless* blocks, would they not speak?

Shak.

Our grave shall have a *tongueless* mouth. *Shak.*

Even from the *tongueless* caverns of the earth.

Shak.

2. Unnamed; not spoken of.—

One good deed, dying *tongueless*.

Shak.

* **TONGUEPAD**. *n. f.* [*tongue* and *pad*.] A great talker.—She is called a *tonguepad*. *Tatler.*

* **TONGUETIED**. *adj.* [*tongue* and *tied*.] 1. Having an impediment of speech.—They who have short *tongues*, or are *tonguetied* are apt to fall short of the appulse of the *tongue* to the teeth. *Holder.* 2. Unable to speak freely from whatever cause.—

Love, and *tongue*'ty'd simplicity.

Shak.

He spar'd the blushes of the *tongue*'ty'd dame.

Tickel.

TONG-VOAN, a town of China, of the 3d rank, in the prov. of Quang-tong; 37 miles W. of Hoi-tcheou.

TONGUSIANS, a people of Russian Tartary, who inhabit the E. part of Siberia. They are pagans, and subsist chiefly by hunting of fables, grazing cattle, &c. They live in moveable huts, erected of poles, and covered with skins, which they take down, when they change their place of residence. They are very strong, from their wandering life. Both sexes are very broad faced, and dress alike. The women also ride on horseback like the men, and wear boots of skins.

TONG-YANG, 3 towns of China, of the 3d rank, viz. 1. in the prov. of Kiang-si, 23 miles NE. of Touthcheou; 2. in that of Se-tchuen, 15 miles NE. of Ta; and 3. in that of Tche-kiang, 47 miles NW. of Hoi-tcheou.

TONHOFF, a lake of Norway, in Aggerhuus, 25 miles NW. of Christiania.

(1.) **TONIC**, *adj.* in medicine, tending to strengthen the part, or to restore its tone and functions.

(2.) **TONIC**, *n. f.* in music, signifies a certain degree of tension, or the sound produced by a vocal string in a given degree of tension, or by any sonorous body when put in vibration.

(3.) **TONIC**, says Rousseau, is likewise the name given by Aristoxenus to one of the three kinds of chromatic music, whose divisions he explains, and which was the ordinary chromatic of the Greeks, proceeding by two semitones in succession, and afterwards a third minor.

(4.) **TONIC**

(4.) **TONIC DOMINANT.** See **DOMINANT**, **FUGUE**, and **MUSIC**.

* **TONICAL.** } *adj.* [*tonique*, Fr. *tono*.] 1.

* **TONICK.** } Being extended; being elastic.—Station is no rest, but one kind of motion, relating unto that which physicians do name extensive or *tonical*. *Brown*. 2. Relating to tones or sounds.

TONISKA, a town of Russia, in the province of Irkutskoi; 40 miles ESE. of Stretensk.

TONKER. See **LASSA**.

TONNA, a town of Saxony, in Saxe-Gotha, 6 miles N. of Gotha.

(1.) * **TONNAGE.** *n. s.* [from *ton*.] A custom or impost due for merchandise carried from or to other nations, after a certain rate in every ton. *Coovel.*—*Tonnage* and poundage upon merchandizes. *Clarendon*.

(2.) **TONNAGE** and **POUNDAGE**, an ancient duty on wine and other goods, the origin of which seems to have been this: About the 21st of Edward III. complaint was made that merchants were robbed and murdered on the seas. The king thereupon, with the consent of the peers, levied a duty of 2s. on every ton of wine, and 12d. in the pound on all goods imported; which was treated as illegal by the commons. About 25 years after, the king, when the knights of shires were returned home, obtained a like grant from the citizens and burgesses, and the year after it was regularly granted in parliament. These duties were diminished sometimes, and sometimes increased; at length they seem to have been fixed at 3s. tonnage, and 12s. poundage. They were at first usually granted only for a stated term of years, as for two years in 5 Richard II.; but in Henry VI.'s time they were granted him for life by a statute in the 1st year of his reign; and again to Edward IV. for the term of his life also; since which time they were regularly granted to all his successors for life, sometimes at the first, sometimes at other subsequent parliaments, till the reign of Charles I.; when these imposts were imprudently and unconstitutionally levied without consent of parliament, for 15 years, which was one of the causes of the unhappy discontents. At the restoration this duty was granted to King Charles II. for life, and so it was to his two immediate successors; but now, by three several statutes, 9 Ann. c. 6. 1 Geo. I. c. 12. and 3 Geo. I. c. 7. it is made perpetual, and mortgaged for the debt of the public.

(1.) **TONNAY BOUTONNE**, a town of France, in the dep. of Lower Charente, and late prov. of Saintonge, 10½ miles W. of Rochfort, and 7½ W. of St Jean d'Angely. Lon. o. 34 W. Lat. 45; 58. N.

(2.) **TONNAY CHARENTE**, a town of France, in the dep. of Lower Charente; 3 miles E. of Rochfort, and 15 NW. of Saintes. Lon. o. 36 W. Lat. 45. 56. N.

TONNEINS, a town of France, in the dep. of Lot and Garonne, and late prov. of Guienne; seated on the Garonne; 7 miles E. of Marmande.

(1.) **TONNERE**, an ancient town of France, in the dep. of the Yonne, and late prov. of Burgundy, famous for its excellent wines. It is seat-

ed on the Armançon, 27 miles E. of Troyes, and 102 E. of Paris. Lon. 4. 4. E. Lat. 47. 51. N.

(2.) **TONNERE, MONT.** See **MONT-TONNERE**. **TONNINGEN**, a town of Denmark, capital of Eiderstadt, on the Eider, 2 miles from Hufum. The proper name is **TONNING**, and it is only foreigners who lengthen it into **TONNINGEN**. It boasts of neither artificial nor natural beauties, and the atmosphere is humid, cold, and uncomfortable. In February 1803, when the last census was taken, the population amounted to 1934, but it has since increased to 4000 at least, in consequence of the blockade of the Elbe, (1804) which occasioned the whole of the British trade to pass through it, and very much enriched the place.

TONON. See **THONON**.

TONQUIN, a kingdom of Asia, in the East Indies, beyond the Ganges; bounded on the N. by the province of Yunnan in China, on the E. by that of Canton and the bay of Tonquin, on the S. by Cochinchina, and on the W. by Laos. It is about 1200 miles long, and 500 broad; and is one of the most considerable kingdoms of the East, as well on account of the number of its inhabitants, as its riches, and trade. The country abounds with villages; and the natives are of a middle stature, with a tawny complexion. They are generally dexterous, nimble, active, and ingenious in mechanic arts. They weave fine silks, and make curious lacker-works. They are much addicted to gaming. The garments of the Tonquinese are made either of silk or cotton. Their houses are small and low. In the capital city called *Cacho*, there are about 20,000 houses with mud-walls, and covered with thatch; a few are built with brick, and roofed with pan-tiles. The principal streets are, very wide, and paved with small stones. The king of Tonquin has 3 palaces in it. The house of the English factory is the best in the city. The people are civil to strangers; but the great men are proud, haughty, and ambitious; the soldiers insolent, and the poor thievish. They buy all their wives, of which the great men have several. Even the great men will offer their daughters to the merchants and officers who are likely to stay six months in the country. They are not afraid of being with child; for if they are girls, they can sell them well when they are young, because they are fairer than the other inhabitants. These women are said to be very faithful; and are trusted with money and goods by the Europeans during their absence, and will make great advantage with them. The first new moon in the year that happens after the middle of January, is a great festival; when they rejoice for 10 or 12 days together, and spend their time in all manner of sports. Their common drink is tea, but they make themselves merry with arrack. The language is spoken very much in the throat; and some of the words are pronounced through the teeth, and has a great resemblance to the Chinese. Their commodities are gold, musk, silks, calicoes, drugs of many sorts, woods for dyeing, lacquered wares, earthen wares, salt, aniseeds, and worm-seeds. The goods imported, besides silver, are saltpetre, sulphur, English broad cloth, pepper, spices, and great guns.

TONSA, a river of European Turkey, which runs into the Mariza, near Adrianople; in Rumania.

TONSBERG, a sea port town of Norway, in the prov. of Aggerhuus, seated on a bay of the Baltic, built in the 10th century. It had once 9 churches, but has now only two. In 1536, it was burnt by the Swedes. The people carry on a great trade in furs, and in butter. It lies 42 miles S. of Christiania. Lon. 10. 34. E. Lat. 59. 14. N.

TONSET, a town of Norway, in Aggerhuus, 145 miles N. of Christiania.

(1.) * **TONSIL**. *n. f.* [*tonfille*, Fr. *tonfille*, Lat.] — *Tonfils* or almonds are two round glands placed on the sides of the basis of the tongue, under the common membrane of the fauces, with which they are covered; each of them hath a large oval sinus, which opens into the fauces, and in it there are a great number of lesser ones, which discharge themselves, through the great sinus, of a mucous and slippery matter, into the fauces, larynx, and œsophagus, for the moistening and lubricating these parts. *Quincy*.

(2.) **TONSILS**. See *ANATOMY*, 535—541.

TONSTALL, Cuthbert, a learned English prelate, born in 1476. He studied at Oxford, Cambridge, and Padua; and was the best mathematician of his age. He was made Bp. of London in 1523; lord privy seal; and in 1530, Bp. of Durham. But in 1559, he was ejected by Q. Elizabeth, and died in prison that year. He published some tracts on religion; and a treatise *De Arte Subputandi*. Lond. 1523, 4to.

(1.) * **TONSURE**. *n. f.* [*tonsure*, Fr. *tonsure*, Lat.] The act of clipping the hair; the state of being shorn.—The vestals, after having received the *tonsure*. *Addison*.

(2.) **TONSURE**, in ecclesiastical history, a particular manner of shaving or clipping the hair of ecclesiastics or monks. The ancient tonsure was only cutting the hair to a moderate degree, for the sake of decency and gravity; but the Romans make the candidate kneel before the bishop, who cuts the hair in five different parts of the head, viz. before, behind, on each side, and on the crown.

TONTINE. *n. f.* a loan given for life annuities with benefit of survivorship; so called from the inventor Laurence Tonti, a Neapolitan. He proposed his scheme in 1653 to reconcile the people to cardinal Mazarine's government, by amusing them with the hope of becoming suddenly rich. He obtained the consent of the court, but the parliament would not register the edict. He made attempts afterwards, but without success. It was not till Lewis XIV. was distressed by the league of Augsbourg, and by his own immense expences, that he had recourse to the plans of Tonti. By an edict in 1689, he created a Tontine royale of 3,400,000 livres annual-rent, divided into 14 classes. The actions were 300 livres a-piece, and the proprietors were to receive 10l. per cent. with benefit of survivorship in every class. This scheme was executed but very imperfectly. A few years after, another tontine was erected upon nearly the same terms; but this was never above half full.

They both subsided in 1746, when the French king united the 13th class of the first tontine with the 14th of the second; all the actions of which were possessed by Charlotte Bonnemay, widow of Lewis Barbier, a surgeon of Paris, who died at the age of 96. This gentlewoman had ventured 300 livres in each tontine; and in the last year of her life she had for her annuity 73,500 livres, or about 3600l. a year, for about 30l. The nature of the tontine is this; there is an annuity, after a certain rate of interest, granted to a number of people, divided into classes, according to their respective ages; so that annually the whole fund of each class is divided among the survivors of that class; till at last it falls to one, and upon the extinction of that life, reverts to the power by which the tontine was erected, and which becomes thereby security for the due payment of the annuities.

TON TING, a large lake of China, in the prov. of Houquang; 60 miles long, and from 17 to 25 broad. Lon. 125. 8. to 130. 15. E. Ferro Lat. 28. 44. to 29. 30. N.

TONVORE, a cape of Scotland, on the NW. coast of the isle of Illey. Lon. 3. 24. W. of Edin. Lat. 55. 51. N.

* **TOO**, *adv.* [*to*, Saxon.] 1. Over and above; overmuch; more than enough. It is used to augment the signification of an adjective or adverb to a vicious degree.—

Too strong to bend, *too* proud to learn. Cow.—Groundless prejudices mislead *too* many, otherwise good men. *Spratt*.—It is *too* much to build a doctrine of so mighty consequence upon so obscure a place of scripture. *Locke*.—These ridiculous stories abide with us *too* long. *Watts*. 2. It is sometimes doubled to encrease its emphasis; but this reduplication always seems harsh, and is therefore laid aside.—

Oh, that this *too too* solid flesh would melt. *Shak.*

Sometimes it would be full, and then Oh! *too too* soon decrease again. *Suckling*.
3. Likewise; also.—

I, for winking at your discords *too*
Have lost a brace of kinsmen. *Shak.*
Let those incite to quarrels *too*. *Oldham*.
—It is evident from experience *too*. *South*.—It is better *too* than borrowing money. *Locke*.—

A courtier and a patriot *too*. *Pope*.
Behold the vengeance *too*. *Pope*.
TOOBOOO!, one of the SOCIETY ISLANDS. It is about 6 miles in extent.

* **TOOK**, the preterite, and sometimes the participle passive of *take*.—

Thy soldiers *took* their discharge. *Shak.*
—We are not *took* upon advantages. *South*.—
The thunder clap *took* us unprepared. *Dryd.*
—When the thought *took*. *Addison*.—This *took* up some hours every day. *Spectator*.—One of the hunters *took* my foot, shoe and all. *Swift*.
Leaving Polybius, I *took* my way. *Pope*.

(1.) **TOOKE**, Andrew, M. A. a learned divine and teacher, born at London, in 1673. He was educated at the Charter-House, whence he removed to Clare-Hall, Cambridge. He became master of the Charter-house, and professor of geometry.

metry at Gresham collègè. He published *Pomey's Pantheon* in English, but without acknowledging the author. He died in 1731.

(2.) **TOOKE**, George, an English poet, born in 1595. He served as captain of volunteers in the expedition against Cadiz, in 1625, and published the particulars in a poem. He also wrote *Canzonets* to the memory of his wife. He died in 1675.

(3.) **TOOKE**, the Rev. John Horne. A life of this singular character was published in the course of the present year by William Hamilton Reid; but it supplies very little of that important information which we expected; nor have we it in our power to lay such an account of Mr Tooke's remarkable life before our readers as we wish. He was educated at the Eton school, and the freedom of his remarks is said to have rendered him obnoxious, even at that early period, to his superiors. He afterwards removed to St John's college, Cambridge, where he also created himself enemies, by similar liberality (perhaps licentiousness) of opinion. At the usual period he appears to have taken orders in the established church; but whether he ever served any cure we cannot clearly ascertain. He espoused with zeal and success the cause of Mr Wilkes at Brentford. Soon after he set on foot a subscription for the relief of the widows, orphans, and aged parents of the Americans, whom he described as *murdered at Lexington* by the king's troops. He was prosecuted for his advertisement on this subject, found guilty of a libel, and committed to prison. He is said to have been the chief cause of obtaining the regular publication of the speeches in parliament, which, whether on the whole it has been an advantage or disadvantage to the state, we will not venture to decide. We are very certain, that in the peculiarly difficult and distressing period, as it has been almost uninterruptedly, which followed the publication, it has been often advantageous to the enemy, and in so far disadvantageous to the country. The question is too complicated for discussion within our narrow limits. Mr Tooke appears to have sided, in his political views, neither with the opposition nor the ministry. He treated both parties occasionally with almost equal keenness of satire. In the year 1794, he was brought to trial for high treason, and acquitted. He was afterwards returned to parliament by the city of Westminster. His right to sit was challenged by Lord Temple, on account of his being in holy orders. It was not found easy to decide the question. Mr Tooke was therefore allowed to keep his seat during that parliament, and a declaratory act was passed to prevent the clergy from sitting in the House of Commons in future. He lived for many years at Wimbledon, and died at an advanced age. Sir Francis Burdett, the wildest of all our modern politicians, was his latest friend and pupil, and is understood to have acted by Mr Tooke's advice in every extravagant act of his public life, particularly in resisting the warrant of the speaker of the House of Commons to commit him to the tower—a resistance which cost several lives; on account of which, in a court of conscience, we should certainly deem Sir Francis and his adviser morally guilty of something very nearly approaching to murder. Mr Tooke

was a man of neat talents and profound literature. His *diversions of Purley* have deservedly raised his fame very high as a philosophical grammarian; though it will probably now be generally allowed, that he certainly carried his etymological inquiries to an extravagant length. We cannot consider Mr Tooke as having been either a useful citizen or a respectable member of Society. He renounced and ridiculed his sacred profession, and probably retained no principle of religion of any kind. In his political principles and conduct he was wild and extravagant, though generally artful and plausible. In his moral conduct he was sufficiently incorrect; and in his conversation he was shamefully licentious on the subject of women, even in the last period of his life, when such corruption admits of no excuse. We have heard this humiliating fact confirmed by men who witnessed it, and who mentioned, not because they blamed it, but because they were amused by it and thought it curious. Mr Tooke was a man of great acuteness and learning; but, without moral and religious principle, we can never esteem a man truly great, either as a patriot or an individual. Yet he has his partisans, especially among the angry retailers of periodical criticism under the form of political opposition. By one of these *suffe* men of words, we are gravely told, that "while the select of the nation are shedding crocodile tears over departed venality (Mr Perceval we presume!), and decreeing sculptured honours to the despoilers of provinces (we know not whom the wiseacre means), the nation itself (*i. e.* a few discontented individuals) has accepted into the treasure of its best affection a patriot, to whom it is indebted for its firmest stronghold against the inroads of corruption and oppression!!!"

(1.) * **TOOL**. *n. f.* [*tol*, *tool*, Saxon.] 1. Any instrument of manual operation.—Pierce it deeper with a *tool*. *Bacon*.—Knives, axes, and the like *tools* of iron. *Heylyn*.—

Arm'd with such gard'ning *tools*. *Milton*.—The ancients had some secret to harden the edges of their *tools*. *Addison*. 2. A hireling; a wretch who acts at the command of another.—

And scorn the *tools* with stars and garters.

Swift.

(2.) A **TOOL**, among mechanics, denotes in general any small instrument used for making other complex instruments and machines, or in other operations in the mechanic arts.

TOOLIAPOUR, a town of Hindoostan, in Dowlatabad; 45 miles ESE. of Perinda, and 144 NW. of Hydrabad.

TOOMHEWADY, a town of Hindoostan, in the Carnatic; 8 miles SW. of Caroor.

TOOMISH, a mountain of Ireland, in Kerry; W. of Lough Lane, and 14 miles S. of Tralee.

TOONE, a river of Ireland, which runs into the Lee, 15 miles W. of Cork.

TOORAMBADDY, a town of Hindoostan, in Mylore; 13 miles WNW. of Aravacourchy.

TOORGUL, a territory of Hindoostan, in the country of the MAHRATTAS.

TOOSHOOH, a town of Hindoostan, in Mylore; 5 miles ESE. of Nameul.

* To **TOOT**. *v. n.* [O! this word, in this sense, G g g 2 I know

I know not the derivation: perhaps *totan*, Saxon, contracted from *topetan*, to know or examine.] 1. To pry; to peep; to search narrowly and sily. It is still used in the provinces; otherwise obsolete.

For birds and bulhes *tooting*. Spenser.

2. It was used in a contemptuous sense, which I do not fully understand.—

This writer should wear a *tooting* horn. Howel.

(1.) * **TOOTH**. *n. f.* plural *teeth*. [*toth*, Saxon; *tand*, Dutch.] The *teeth* are the hardest and smoothest bones of the body; about the seventh or eighth month they begin to pierce the edge of the jaw; the *dentes incisivi*, or *fore teeth* of the upper jaw, appear first, and then those of the lower jaw: after them come out the *canini* or *eye teeth*, and last of all the *molars* or *grinders*; about the seventh year they are thrust out by new *teeth*, and if these *teeth* be lost they never grow again; but some have shed their *teeth* twice; about the one-and-twentieth year, the two last of the *molars* spring up, and they are called *dentes sapientie*. Quincy.—

Tooth that poisons if it bites. Shak.

A forced residence against the *tooth* of time. Shak.

—The *teeth* alone among the bones continue to grow in length during a man's whole life. Ray. 2. Taste; palate.

These are not dishes for thy dainty *tooth*. Dryden.

3. A tine, prong, or blade, of any multifid instrument.—A flesh hook of three *teeth*. 1 Sam.—I made an instrument in fashion of a comb, with two *teeth*. Newton. 4. The prominent part of wheels, by which they catch upon correspondent parts of other bodies.—The edge whereon the *teeth* are is always made thicker than the back. Moxon.—In clocks, though the screws and *teeth* be never so smooth. Ray. 5. **TOOTH** and *nail*. With one's utmost violence; with every means of attack or defence.—A lion and bear were at *tooth* and *nail*. L'Estrange. 6. To the **TEETH**. In open opposition.—

That I shall live and tell him to his *teeth*, Thus diddest thou. Shak.

Ev'n to the *teeth* and forehead of our faults. Shak.

—We shall meet 'em full in the *teeth*. Dryden. 7. To cast in the **TEETH**. To insult by open exprobration.—Might cast him therewith in the *teeth*. Hooker. 8. In spite of the **TEETH**. Notwithstanding threats expressed by shewing teeth; notwithstanding any power of injury or defence.—In despite of the *teeth* of all rhyme and reason. Shak.—This lot they must bear in spite of their *teeth*. L'Estrange. 9. To shew the **TEETH**. To threaten.

When the law shews her *teeth*. Young.

(2.) **TOOTH**. See ANATOMY, Index; at **TEETH**. * To **TOOTH**. *v. a.* [*from tooth*.] 1. To furnish with teeth; to indent.—

Then saws were *tooth'd*. Dryden.

—Both the edges *toothed*. Grev.—Get a pair of tongs *toothed* at the end. Mortimer. 2. To lock in each other.—It is common to *tooth* in the stretching course two inches with the stretcher only. Moxon.

(1.) * **TOOTHACH**. *n. f.* [*tooth* and *ach*.] Pain in the teeth.—

There never yet was a philosopher

That could endure the *toothach* patiently. Shak.

He that sleeps feels not the *toothach*. Shak.

I have the *toothach*.

—What, sigh for the *toothach*? Shak.

—One was gone desperate with the *toothach*. Temple.

(2.) **TOOTHACH**. See MEDICINE, and SURGERY, Indexes; **TEETH**, and ELECTRICITY, Index.

TOOTHACH TREE. See ZANTHOXYLUM.

* **TOOTHDRAWER**. *n. f.* [*tooth* and *draw*.] One whose business it is to extract painful teeth.—

Native with Scots, as *toothdrawers*, hath dealt. Cleaveland.

—When the teeth are to be dislocated, a *tooth-drawer* is consulted. Wifeman.

* **TOOTHED**. *adj.* [*from tooth*.] Having teeth.

* **TOOTHLESS**. *adj.* [*from tooth*.] Wanting teeth; deprived of teeth.—

Sunk are her eyes, and *toothless* are her jaws. Dryden.

—A narrow and *toothless* snout. Ray.

* **TOOTH PICK**. } *n. f.* [*tooth* and *pick*.] An

* **TOOTH PICKER**, } instrument by which the teeth are cleaned from any thing sticking between them.—I will fetch you a *toothpicker*. Shak.

He and his *toothpick* at my worship's mess. Shak.

—There will hardly be found enough wood to make a *toothpick*. Howel.—If *toothpicks* of the lentick be wanting, of a quill then make a *toothpick*. Sandys. Lentick is a beautiful ever green, and makes the best *toothpickers*. Mortimer.

* **TOOTH SOME**. *adj.* [*from tooth*.] Palatable; pleasing to the taste.—Some are good to be eaten while young, but nothing *toothsome* as they grow old. Carew.

* **TOOTH SOMEMENESS**. *n. f.* [*from toothsome*.] Pleasantness to the taste.

(1.) * **TOOTHWORT**. *n. f.* [*dentaria*, Latin.] A plant. Miller.

(2.) **TOOTHWORT**. See PLUMBAGO.

TOOTOONAH, or **ERRONAN**, an island in the S. Pacific ocean, and one of the most eastern of the New Hebrides, about 15 miles in circumference.

(1.) * **TOP**. *n. f.* [*topp*, Welsh; *top*, Saxon; *top*, Dutch and Danish; *topper*, a crest, Islandick.] 1. The highest part of any thing.—

Vailing her high *top* lower than her ribs. Shak.

He wears upon his baby brow the round

And *top* of sovereignty. Shak.

Here is a mount, whose *toppe* seems to despise The farre inferior vale. Brown.

—Here Sodom's tow'rs raise their proud *tops* on high. Cowley.—Thou nor on the *top* of old Olympus dwell't. Milton.—One poor roof, made of poles meeting at the *top*. Heylyn.—It has the narrowest *top*. Temple.—Which having touch'd the *top* recoils. Clavel.—Marine bodies are found upon hills, and at the bottom only such as have fallen down from their *tops*. Woodw. 2. The surface; the superficies.—Such trees spread their roots near the *top* of the ground. Bacon.

Shallow

Shallow brooks that flow'd to clear,

The bottom did the top appear. *Dryden.*

3. The highest place.—He that will not let himself proudly at the top of all things. *Locke*.—Turn him off when he is at the top? *Swift*. 4. The highest person.—He, which is the top of judgment. *Shak.* 5. The utmost degree.—Zeal is the top and perfection of many religious affections. *Spratt*.—The top of your desires in fame. *Pope*.—The top of my ambition. *Pope*. 6. The highest rank.—A boy from the top of a grammar school. *Locke*. 7. The crown of the head.—Vengeance fall—on her ungrateful top! *Shak.*—From the top to toe. *Shak.* 8. The hair on the crown of the head; the forelock.—Take the infant by the forward top. *Shak.* 9. The head of a plant.—The buds are called heads or tops. *Watts*. 10. [Top, Danish.] An inverted conoid which children set to turn on the point, continuing its motion with a whip.—Since I whipt top. *Shak.*—For as whipt top. *Hudibras*.—Young striplings whip the top for sport. *Dryden*.—Like tops, are lashed asleep. *Pope*.—A top may be used with propriety in a similitude by a Virgil. *Broom*. 11. Top is sometimes used as an adjective to express lying on the top, or being at the top.—The top stones laid in clay are kept together. *Mortimer*.

(2.) TOP, in ship-building, a sort of platform, surrounding the lower mast-head, from which it projects on all sides like a scaffold. The principal intention of the top is to extend the top-mast shrouds, so as to form a greater angle with the mast, and thereby give an additional support to the latter. It is sustained by certain timbers fixed across the hounds or shoulders of the mast, and called the *RESTLE-TREES* and *cross-trees*.—Besides the use above-mentioned, the top is otherwise extremely convenient to contain the materials necessary for extending the small sails, and for fixing or repairing the rigging and machinery with more facility and expedition. In ships of war it is used as a kind of redoubt, and is accordingly fortified for attack or defence; being furnished with swivels, musketry, and other fire-arms, and guarded by a thick fence of corded hammocks. Finally it is employed as a place for looking out, either in the day or night.

(3.) TOP, in geography, a lake of Russian Olenetz; 48 miles long and 4 broad; 256 miles WNW. of Petrovadtik.

(1.) * To TOP, v. a. 1. To cover on the top; to tip; to defend or decorate with something extrinsic on the upper part.—The temple topped with golden spires. *Milton*.—Moving mountains top with snow. *Waller*.—Topped with a cupola. *Addison*.—Top the bank with the bottom of the ditch. *Morr*. 2. To rise above.—A gourd topped and covered the tree. *L'Estr*. 3. To outgo; to surpass.—Topping all others in boasting. *Shak.*—So far he topped my thought. *Shak.*—Why should such a man top me? *Collier*. 4. To crop.—Top your rose-trees a little. *Evelyn*. 5. To rise to the top of.—Wind about till thou hast topped the hill. *Denham*. 6. To perform eminently; as, be tops his part. This word, in this sense, is seldom used but on light or ludicrous occasions.

(2.) * To TOP, v. n. [from the noun.] 1. To

rise aloft; to be eminent.—Lofty and topping mountains. *Derham*.—Some letters top it over their fellows. *Addis*. 2. To predominate.—The thoughts of the mind are influenced by that topping uneasiness. *Locke*. 3. To excel.—But write thy best and top. *Dryden*.

* TOPARCH, n. f. [from *topos* and *arche*.] The principal man in a place.—They are not potent monarchs, but toparchs, or kings of narrow territories. *Brown's Vulgar Errors*.

* TOPARCHY, n. f. [from *toparch*.] Command in a small district.

TOPAYAS, a river of America, in Brasil, which runs into the Amazon.

(1.) * TOPAZ, n. f. [topaze, Fr. *topazius*, low Latin.] A yellow gem.—The golden stone is the yellow topaz. *Bacon*.—The topbas sent from scorched Meroc? *Sandys*.—With light's own smile the yellow topaz burns. *Thomson*.

(2.) TOPAZ, in mineralogy, a gem called by the ancients CHRYSOLITE, as being of a gold colour; but now ranked as only a variety of the SAPPHIRE. See MINERALOGY, Part II. Chap. IV. Class I. Ord. I. Gen. I. The finest topazes in the world are found in the East Indies; but they are very rare there of any great size: the Great Mogul, however, possesses one which is said to weigh 157 carats, and to be worth more than 20,000l. The topazes of Peru are next in beauty and in value. The European are principally found in Silesia and Bohemia, and are generally full of cracks and flaws, and of a brownish yellow. Very beautiful stones of this kind are found in ARRAN and CAIRNGORM, in Scotland.

(3.) TOPAZ, in geography, an island in the Red Sea, so named, according to Pliny, from *topazos*, to seek, being often surrounded with fog, and difficult to find. It was famous for topazes. See *Plin.* lib. xxxvii. c. 8.

TOPDALS, a town of Norway, in Christianland; 32 miles N. of Christianland.

TOPE, in ichthyology, a species of SQUALUS.

* To TOPE, v. n. [topff, German, an earthen pot; *toppen*, Dutch, to be mad. *Skinner* prefers the latter etymology; *tope*, French.] To drink hard; to drink to excess.—If you *tope* in form and treat. *Dryden*.

TOPEL, or TOPL, a town of Bohemia, in Pilsen; 24 m. NW. of Pilsen, and 56 W. of Prague.

* TOPER, n. f. [from *tope*.] A drunkard.

* TOPEFUL, adj. [top and full.] Full to the top; full to the brim.—Their souls are topeful of offence. *Shak.*—The tube continued topeful of water. *Boyle*.—Topeful of himself. *Watts*.—Fill the tankard-cup topeful. *Swift*.

* TOPGALLANT, n. f. [top and gallant.] 1. The highest sail. 2. It is proverbially applied to any thing elevated, or splendid.—A rose grew out of another, like honeyuckles, called top and top-gallants. *Bacon*.—Topgallant sparks. *L'Estrange*.

* TOPHACEOUS, adj. [from *tophus*, Latin.] Gritty; stony.—They precipitate a tephaceous chalky matter. *Arbuthnot*.

* TOPHEAVY, adj. [top and heavy.] Having the upper part too weighty for the lower.—A roof should not be too heavy nor too light; but of the two a house topeheavy is the worst. *Watson*.—Top-heavy

heavy drones. *Dryden*.—*Topheavy* buildings. *Daven.*—As to stiff gales *topheavy* pines how low. *Pope*.

(1.) * **TOPHET**. *n. s.* [from Heb. *a drum*.] Hell; a scriptural name.—*Tophet* thence—the type of hell. *Milt.*—Fire and darkneſs are here mingled with all other ingredients that make that *tophet* prepared of old. *Burnet*.

(2.) **TOPHET**. See BEN-HINNOM, GEHENNA, and MOLOCH. Also SACRIFICE, § 6.

TOPHUS, in medicine, a chalky or ſtony concretion in any part of the body; as the bladder, kidney, &c. but eſpecially the joints.

TOPIC, *n. s.* See **TOPICK**.

* **TOPICAL**. *adj.* [from *topos*.] 1. Relating to ſome general head. 2. Local; confined to ſome particular place.—*Topical* arguments. *White*.—An argument from authority is but a weaker kind of proof; it being but a *topical* probation. *Brown*.—Evidences of fact can be no more than *topical* and probable. *Hale*.—What then ſhall be rebellion? ſhall it be more than a *topical* ſin? *Holyday*. 3. Applied medically to a particular part.—Only to be cured by *topical* remedies. *Ar ſuhot*.

* **TOPICALLY**. *adv.* [from *topical*.] With application to ſome particular part.—This *topically* applied becomes a phænigmus. *Brown*.

(1.) * **TOPICK**. *n. s.* [*topique*, Fr. *topos*.] 1. Principle of perſuaſion.—No *topicks* can work upon them. *Wilkins*.—Thoſe are invidious *topicks*. *Dryd*.—Let them argue over all the *topicks* of divine goodneſs and human weakneſs. *South*.—The *topicks* are brought from Scripture. *Swift*. 2. A general head; ſomething to which other things are referred.—All arts and ſciences have ſome general ſubjects, called *topicks*, or common places. *Watts*. 3. Such things as are externally applied to any particular part.—In the cure of ſtruma, the *topicks* ought to be diſcutient. *Wiſeman*.

(2.) **TOPICS**, in oratory. See **ORATORY**.

(3.) **TOPICS**, or **TOPICAL MEDICINES**, are the ſame with the external ones, or thoſe applied outwardly to ſome diſeaſed and painful parts; ſuch are plaſters, cataplaſms, unguents, &c.

* **TOPKNOT**. *n. s.* [*top* and *knot*.] A knot worn by women on the top of the head.—Take away his *topknot*, and make an aſs of him again. *L'Eſtr*.

TOPL. See **TOPEL**.

TOPLADY, Auguſtus Montague, M. A. a late celebrated Engliſh divine, born at Farnham in Surry, in 1735; and educated at Weſtminſter and Dublin. He became vicar of Broadhembury, Devonſhire; but removed to London for his health, where he died in 1778. He wrote *Hiſtoric Proof of the Doctrinal Calvinism of the Church of England*; and other works, in 6 vols. 8vo.

* **TOPLESS**. *adv.* [from *top*.] Having no top.—A *topleſs* height. *Chapman's Iliad*.

TOPLITZ, a town of Bohemia, in Leitmeritz, 14 miles WNW. of Leitmeritz. The Auſtrians defeated the Pruſſians near it, in 1762. *Toplitz* is a well frequented watering-place. The water is conſidered as peculiarly uſeful in rheumatic caſes, and the baths are accordingly much frequented by patients of this deſcription,

TOPLIWODA, a town of Sileſia, in Troppau, 7 miles NW. of Munſterberg.

TOPOLOCZA, a town of Hungary, 14 miles S. of St Crot.

TOPLUC, a town of Hungary, 20 miles SSW. of Podolicz.

TOPOLEVA, a town and fort of Ruſſia, in the province of Caucaſus, on the Ural, 40 miles N. of Guriev.

TOPOLITZA, a town of European Turkey, in Moldavia, 12 miles SW. of Niemeetz.

TOPOLTZAN, 2 towns of Hungary: 1. with a fort, 12 miles NW. of Bukans: 2. 48 miles NE. of Preſburg, and 68 E. of Vienna. Lon. 25. 54. E. Ferro. Lat. 48. 34. N.

* **TOPMAN**. *n. s.* [*top* and *man*.] The ſawer at the top.—The pit-ſaw enters the one end of the ſtuff, the *topman* at the top, and the pitman under him, the *topman* obſerving to guide the ſaw exactly in the line. *Moxon's Mech. Exercice*.

TOP MAST, *n. s.* the ſecond diviſion of a maſt, or that part which ſtands between the upper and lower pieces. See **MAST**.

* **TOPMOST**. *adj.* [An irregular ſuperlative formed from *top*.] Uppermoſt; higheſt.—Bees.—Upon the *topmoſt* branch alight. *Dryd. En.*—In hopes the *topmoſt* cliff to gain. *Addis*.—A ſprightly youth above the *topmoſt* row. *Addison*.

* **TOPOGRAPHER**. *n. s.* *topos* and *γραφω*.] One who writes deſcriptions of particular places.

* **TOPOGRAPHY**. *n. s.* [*topographie*, Fr. *topos* and *γραφω*.] Deſcription of particular places.—*Topography* of the extramundane ſpaces. *Glanv.*—The *topography* of Suimo in the Latin makes but an awkward figure. *Cromwell*.

* **TOPPING**. *adv.* [from *top*.] Fine; noble; gallant. A low word.—*Topping* fellow. *Tatler*.

(1.) * **TOPPINGLY**. *adj.* [from *topping*.] Fine; gay; gallant; thewſy. An obſolete word.—*Toppingly* gheſts in number but ten. *Tuſſer*.

(2.) * **TOPPINGLY**. *adv.* Splendidly; nobly. A low word.

* **TOPPLE**. *v. n.* [from *top*.] To fall forward; to tumble down.—Though caſtles *topple* on their warden's heads. *Shak.*—Down *topples* ſhe. *Shak*.

* **TOPPROUD**. *adj.* [*top* and *proud*.] Proud in the higheſt degree.—This *topproud* fellow. *Shak*.

(1.) * **TOPSAIL**. *n. s.* [*top* and *sail*.] The higheſt ſail.—The Turk's gallies would not vail their *topsails*. *Knolles*.—Strike, ſtrike the *topsail*. *Dryden*.

(2.) **TOPSAILS** are certain large ſails extended acroſs the top-maſts by the topſail-yard above, and by the yard attached to the lower maſt beneath; being faſtened to the former by robands, and to the latter by means of two great blocks fixed on its extremities, through which the topſail ſheets are inſerted, paſſing from thence to two other blocks fixed on the inner part of the yard cloſe by the maſt; and from theſe latter the ſheets lead downwards to the deck, where they may be ſlackened or extended at pleaſure. See **SAIL**.

TOPSHAM, a town of England, in Devonſhire, ſeated on the Exmouth, 5 miles SE. of Exeter, to which place the river was formerly navigable; but in time of war was choaked up deſignedly, ſo that

that ships are now obliged to load and unload at Topsham, where they lie aground on the ooze, at low water. Lon. 3. 36. W. Lat. 50. 39. N.

* **TOPSYTURVY**, *adv.* [This *Skianer* fancies to *top* in *turf*.] With the bottom upward.—All suddenly was turned *topsyturvy*. *Spenser*.—We shall o'erturn it *topsyturvy* down. *Shak*.—And *topsyturvy* so fly tumbling to the shores. *Drayton*.—The devil turned the world *topsyturvy*. *South*.—Man is but a *topsyturvy* creature. *Swift*.

* **TOR**, *n. s.* [*tor*, Saxon.] 1. A tower; a turret. 2. A high pointed rock or hill, whence *tor* in the initial syllable of some local names.

(2.) **TOR**, in geography, a town of Arabia Petrea, on the Red Sea, with a good harbour, defended by a castle. Some think that this town is the ancient Elana. Lon. 31. 25. E. Ferro. Lat. 28. 0. N.

(3, 4.) **TOR ALBA**, 2 towns of Sardinia: 1. 20 miles ENE. of Algeri: 2. 13 S. of Oristagno.

(5.) **TOR DI CANE**, a town of Naples, in the province of Bari, 9 miles E. of Monopoli.

(6.) **TOR POINT**, or *Hope's Nose*, a cape of England, on the coast of Devonshire, forming the N. point of **TORBAY**.

(1.) **TORA**, a town of Egypt, on the Nile, 8 miles S. of Cairo.

(2.) **TORA**, a town of Naples, 9 miles NNE. of Sezza.

TORACA, a town of Africa, in Monomotaka. **TORAITO**, a town of Tibet, 30 miles NE. of Tchontori.

(1.) **TORBAY**, a fine bay of the English channel, on the coast of Devonshire, a little to the E. of Dartmouth, formed by two capes, called *Bury Points*, and *Bob's Nose*.

(2.) **TORBAY**, a bay on the E. coast of Newfoundland. Lon. 52. 20. W. Lat. 47. 48. N.

(3.) **TORBAY**, a bay on the S. coast of Nova Scotia. Lon. 61. 15. W. Lat. 45. 8. N.

TORBIA, a town of the French empire, in the dep. of the Maritime Alps, and ci-devant county of Nice, anciently called ΤΡΟΜΑΙΑ ΑΥΓΟΥΣΤΙ. It has many relics of Roman antiquity, and an ancient Gothic tower. It is 7 m. E. of Nice.

TORBIDO, a river of Naples, in Calabria, which runs into the Crate, near Bisignano.

TORBISCON, a town of Spain, in Grenada, 14 miles NE. of Morbil.

TORBOLE, a town of Tirol, 17 miles W. of Trent. This town was taken by the French republicans in Sept. 1796.

TORC, a mountain of Ireland, in Kerry.

TORCELLO, an island in the Dogado, 3 miles N. of Venice.

* **TORCH**, *n. s.* [*torche*, Fr. *torcia*, Italian; *intortitium*, low Lat.] A wax light, generally supposed to be bigger than a candle.—Basilus knew, by the wafting of the *torches*, that the night also was far wafted. *Sidney*.—Here lies the dusky *torch* of Mortimer. *Shak*.—They light the nuptial *torch*. *Milton*.—*Torches* gliding like meteors. *Dryden*.—My *torch* is out. *Dryden*.—They light a *torch*. *Young*.

* **TORCHBEARER**, *n. s.* [*torch* and *bear*.] One whose office is to carry a torch.—He made them for that night, the *torchbearers*. *Sidney*.

* **TORCHER**, *n. s.* [from *torch*.] One that gives light.—

Ere the horses of the sun shall bring
Their fiery *torches* his diurnal ring. *Shak*.

TORCHIARA, a town of Italy in Parma.

* **TORCHLIGHT**, *n. s.* [*torch* and *light*.] Light kindled to supply the want of the sun.—He was forced to go from Isburg, and by *torchlight* to quit every foot he had gotten. *Bacon*.—Now I have brought the *torchlight*. *Davies*.

TORCY, a town of France, in the department of the Lower Seine, 3 miles S. of Argues.

TORDA, a town of Transylvania, famous for its salt-works, 48 miles NW. of Hermanstadt.

TORDERA, a river of Spain in Catalonia.

TORDESILLAS, a town of Spain, in Leon.

TORDYLUM, **HART-WORT**, in botany: A genus of plants belonging to the class of *pentandria*, and order of *digynia*; and in the natural system arranged under the 45th order, *Umbellase*. The corollets are radiated, and all hermaphrodite; the fruit is roundish, and crenated on the margin; the involucre long and undivided. There are 7 species, of which two are British; viz.

1. **TORDYLUM?NODOSUM**, or knotted parsley, has simple sessile umbels, the external seeds being rough. It grows in the borders of corn-fields, and in dry stony places.

2. **TORDYLUM OFFICINALE**, officinal hartwort, has partial involucre, as long as the flowers; leaflets oval and jagged: the seeds are large and flat, and their edges notched.

(1.) * **TORE**, *preterite*, and sometimes participle passive of *tear*.—A feather all to pieces *tore*. *Spenser*.

(1.) * **TÖRE**, *v. a.* [Of this word I cannot guess the meaning.] Proportion according to rowen or *tore* upon the ground; the more *töre* the less hay will do. *Mortimer*.

TORELLI, Joseph, was born at Verona in 1711. He received the degree of LL.D. Being in possession of a considerable fortune, he was enabled to devote himself entirely to literature. Though he did not practise as a lawyer, he did not relinquish the study of law. He acquired the Hebrew, Greek, Latin, and Italian languages; also French, Spanish, and English. In fact his acquirements in every branch of learning and sciences were only equalled by his virtues. He died in 1781. He was author of 20 different works on various subjects.

(1.) **TORELLO**, a town of Naples in Principato Ultra; 3 miles WNW. of Conza.

(2.) **TORELLO**, a town of Spain, in Catalonia; where the French defeated the Spaniards in 1694. It is 6 miles N. of Vique.

TORFÆUS, Thormodus, a native of Iceland, of considerable learning and abilities, born in 1639. He became historiographer to the king of Denmark. He wrote *the History of Norway*; containing also the *annals of the Northern parts of Scotland*, from the year 850 to 1205. He died in 1720, aged 81.

TORFVE, a town of Sweden in W. Gothia.

TORGAU, a town of Upper Saxony, in Meissen, on the Elbe, famous for being the scene of presenting the 17 Protestant articles to the elector John,

John, in 1530; and of drawing up the formula in 1576. It is 28 miles ENE. of Leipfic, and 30 NW. of Meffen.

TORGEISKOI, a town of Russia, in Irkutskoi; 24 miles NNW. of Nerchinsk.

TORHOUT, a town of the French empire, in the dep. of the Lys, and late prov. of Austrian Flanders; 10 miles S. of Bruges.

TORIES, *n. f.* a political faction in Britain, opposed to the Whigs. This name was first given to a set of banditti in Ireland, whose summons to surrender was expressed by the Irish word *Torree*, i. e. *Give me*. It was thence transferred to the adherents of Charles I. by his enemies, under the pretence that he favoured the rebels in Ireland. His partisans, to be even with the republicans, gave them the name of *Whigs*, from a word which signifies *whey*, in derision of their poor fare. The Tories, or *cavaliers*, as they were also called, had then principally in view the political interests of the king, the crown, and the church of England; and the round-heads, or Whigs, proposed chiefly the maintaining of the rights and interests of the people, and of Protestantism. This is the most popular account; and yet it is certain the name *Whig* and *Tory* were but little known till about the middle of the reign of king Charles II. M. de Cize relates, that it was in the year 1678 that the whole nation was first observed to be divided into Whigs and Tories; and that on occasion of the famous deposition of Titus Oates, who accused the Catholics of having conspired against the king and the state, the appellation of *Whig* was given to such as believed the plot real; and *Tory* to those who held it fictitious.

TORIGNA, a town of France, in the department of the Channel, and ci-devant province of Normandy, with a magnificent castle, seated on a rivulet near St Lo. Lon. o. 42. E. Lat. 49. o. N.

TORINI, an ancient nation of Scythia.

TORLA, a town of Spain, in Arragon; 16 miles E. of Jacca.

TORLEUM, a mountain of Perthshire, in the parish of Monivaird; 2400 feet above the sea level.

TORME, a town of Spain, in Old Castile, 15 miles N. of Frias.

* TORMENT. *n. f.* [*tourment*, Fr.] 1. Any thing that gives pain, as discale.—Divers diseases and torments. *Matt.* 2. Pain; misery; anguish.—I feel—*Torment* within me. *Milton.* 3. Penal anguish; torture.—No prisoners there, inforc'd by torments, cry. *Sandys.*—No fiercer *torment* than a guilty mind. *Dryden.*

* To TORMENT. *v. a.* [*tourmenter*, Fr.] 1. To put to pain; to harass with anguish; to excruciate.—Some *tormenting* dream. *Shak.*—What—*Torments* me to conceal. *Shak.*—Art thou come to torment us. *Mat.* viii. 2. To tease; to vex with importunity. 3. To put into great agitation. [*torment*, Fr. a great storm.]—

They soaring on main wing

Tormented all the air. *Milton.*

* TORMENTIL. *n. f.* [*tormentille*, Fr. *tormentilla*, Lat.] Scitfoil. A plant.—The root of *tormentil* has been used for tanning of leather. *Miller.*—Refresh the spirits externally by some epi-

themat of balm, bugloss, with the powder of the roots of *tormentil*. *Wifeman.*

TORMENTILLA, TORMENTIL, in botany; A genus of plants belonging to the class of *icosandra*, and order of *polygynia*; and in the natural system ranging under the 35th order, *Sciticefe*. The calyx is octoid; the petals are four; the seeds round, naked, and affixed to a juiceless receptacle. There are two species; both indigenous: viz.

1. TORMENTILLA ERECTA, common tormentil, or scitfoil, has a stalk somewhat erect, and sessile leaves. The roots consist of thick tubercles, an inch or more in diameter, replete with a red juice of an astringent quality. They are used in most of the Western Isles, and in the Orkneys, for tanning. A decoction of these roots in milk is also frequently administered by the inhabitants of the same islands in diarrhoeas and dysenteries, with good success; but perhaps it would be most proper not to give it in dysenteries till the morbid matter be first evacuated. A spirituous extract of the plant stands recommended in the sea-scurvy, to strengthen the gums and fasten the teeth. Linnæus informs us, that the Laplanders paint their leather of a red colour with the juice of the roots.

2. TORMENTILLA REPENS, creeping tormentil, has reddish stalks, slender and creeping. The leaves are sharply serrated, grow on short foot-stalks, and are five-lobed. The flowers are numerous and yellow, blossom in July, and are frequent in woods and barren pastures.

* TORMENTOR. *n. f.* [from *torment*.] 1. One who torments; one who gives pain.—He called to me to deliver him from those tormentors. *Sidney.*—They fearless by their old tormentors lie. *Sandys.*—His tormentor, conscience. *Milton.*—What could'st thou, tormentor? *Dryden.*—The sinner is his own tormentor. *South.*—The martyrs tired their tormentors. *Addison.*

TORMES, a river of Spain, which rises in Old Castile, and crossing Leon, passes by Alva, Salamanca, &c. and falls into the Duero below Miranda.

TORMS, a town of Spain in Catalonia.

* TORN, part. pass. of *tear*.—Flesh that is torn of beasts. *Exod.* xxii.

TORNA, a county of Hungary, with its capital so named, which lies 14 m. SW. of Cacschau.

(1.) * TORNADO. *n. f.* [*tornado*, Spanish.] A hurricane; a whirlwind.—Bold *tornados* bluster in the sky. *Garth.*

(2.) TORNADO, a sudden and vehement gust of wind from all points of the compass, frequent on the coast of Guinea.

TORNAREECIO, a town of Naples in Abruzzo Citra; 13 miles NE. of Borello.

TORNE, or } a sea port town of Swe-
(1—3.) TORNEA. } den, in W. Bothoria; on an island and in the mouth of a river so named, near the Gulf of Bothnia, with a good harbour. It has a great trade with Sweden, Russia, and Lapland. In 1694, Charles XI. of Sweden came to this town to view the fun at midnight. To it also came Maupertuis and a committee of the Academy of Paris to determine the figure of the earth. Lon. 24. 17. E. Lat. 65. 51. N.

(4, 5.) TORNEA is also the name of a lake in the

the above island formed by the Tornea, as well as of the Gulf into which it falls, at the above town, after running down from the mountains.

(1.) **TORNOVA**, a town of European Turkey, in Janna, with a Greek bishop's see at the foot of mount Dragoniza, on the Salempria; 12 miles NW. of Latisfa. Lon. 12. 36. E. Lat. 39. 52. N.

(2.) **TORNOVA**, a town of Maritime Austria, in the ci-devant Dogado of Venice, 18 miles S. of Venice.

(1.) **TORO**, an island on the S. coast of Sardinia.

(2.) **TORO**, an island on the E. coast of Sweden.

(3.) **TORO**, a town of Spain, in Leon, on Duero.

TOROM, a river of Russia, that joins the Oby.

TORON, a town of Turkey, in Macedonia; 60 miles SE. of Saloniki.

TOROSAY, a parish of Argyllshire, on the E. side of the isle of Mull; 12 miles square. The coast abounds in small bays and harbours. Of these **AUCHMACRAIG** is the chief, which has a ferry to Oban. (See **OBAN**.) The surface is mountainous, rugged and heathy. The highest mountains are **BENMORE** and **BENTALUIDH**; (which see.) These are well adapted for pasture. The population in 1790 was 1733; the increase 721, since 1755. The only antiquity is *Castle Douart*, the ancient mansion of the Macleans; seated on a cape overhanging the Sound of Mull. It is now used as a barrack for soldiers, to repress smuggling.

TORP, 2 towns of Sweden; 1. in W. Gothland; 11 miles N. of Uddevalla; 2. in Warmland; 11 miles N. of Carlstadt.

TORPEDO, the CRAMP-FISH. See **RAJA**, § II. N° 4. and **ELECTRICITY**, *Index*. From late experiments in **GALVANISM**, it is ascertained, that the shock given by the Torpedo exactly resembles the Galvanic shock. See **VOLTA**'S **GALVANIC PILE**.

TORPEN, a town of Transylvania.

* **TORPENT**. *adj.* [*torpens*, Lat.] Numbened; struck motionless; not active; incapable of motion.—The frail and *torpent* memory. *Evelyn*.

TORPERLEY, a town of England, in Cheshire, 10 miles SE. of Chester, and 171 NE. of London.

TORPETZ, or **TOROPETZ**, a town of Russia, in Pskovskoi, 156 miles SE. of Pskov.

(1.) **TORPHICHEN**, a parish of Scotland, in W. Lothian, 9 miles long and 2½ broad. The surface is hilly at the E. end, where the hill of *Cairn-Naple* measures 1098½ feet above the sea level. But except this hilly district, the rest of the eastern part is most fertile. The greater part of the parish is inclosed. The barren ground, not susceptible of cultivation, has been planted, which not only adds to its beauty, but also affords good shelter to the crops on the rest, as well as to cattle. The population, in 1791, was 1069; the decrease 226, since 1755. There are two valuable coal mines, plenty of excellent free-stone, and several very rich seams of iron-stone.

(2.) **TORPHICHEN**, a village in the above parish, on the high road from Edinburgh to Glasgow, 17 miles from the former; containing about 400 inhabitants. Near it are the ruins of the hospital of Torphichen, anciently the chief residence in Scotland, of the Knights of St John

of Jerusalem; founded in 1120, by K. David I. The choir and a square tower still exhibit specimens of the beauty of its architecture.

* **TORPID**. *adj.* [*torpidus*, Lat.] Numbened; motionless; sluggish; not active.—Without heat all things would be *torpid*. *Ray*.—The sun awakes the *torpid* sap. *Thomson*.

TORPIDITY, *n. f.* See next article. For instances of the torpidity of various animals, see **HIRUNDO**, **MUS**, § III, N° 3. **SUSPENDED ANIMATION**, and **SWALLOW**.

* **TORPIDNESS**. *n. f.* [from *torpid*.] The state of being torpid.—Exercise keeps it from *torpidness*. *Hale*.

* **TORPITUDE**. *n. f.* [from *torpid*.] State of being motionless; numbness; sluggishness.—Some subsist in a kind of *torpitude* or sleeping state, *Derham*.

(1.) * **TORPOR**. *n. f.* [Latin] Dulness; numbness; inability to move; dulness of sensation.—Motion discusses the *torpor* of solid bodies. *Bacon*.

(2.) **TORPOR**, *Galen* says, is a sort of intermediate disorder between palsy and health.

TORQUATUS. See **MANLIUS**, N° 3.

TORQUEMADA, a town of Spain, in Leon.

TORR, a town of Arabia, in Yemen.

TORRALBA, a town of Spain, in New Castile, 7 miles NE. of Ciudad Real.

TORRALVA, a town of Spain, in Navarre, 15 miles from Estella.

TORRANO, a town of Spain, in Navarre; 15 miles W. of Pampeluna.

(1.) **TORRE**, a town of Spain, in Catalonia; 6 miles S. of Lerida.

(2—34.) **TORRE** is also the name of other 4 towns of Spain, in Biscay, Catalonia, Granada, and Valentia; of one each in Ancona, Candia, Mantua, and Sardinia; of 2 in Portugal; of 6 in Corfica; and of 18 in Naples; all distinguished by various additional names, which we have not room to specify.

TORRECILLA, a town of Spain, in Old Castile, 11 miles SE. of Najera.

TORRECILLAS, a town of Spain in Estremadura, 6 miles ENE. of Truxillo.

TORRECUSO, a town of Naples, 5 miles W. of Benevento.

TORREDAL, a river of Norway, which runs into the sea, near Christianfand.

(1.) * **TORREFACTION**. *n. f.* [*torrefaction*, Fr. *torrefacio*, Lat.] The act of drying by the fire.—Why does *torrefaction* make sulphur itself black? *Boyle*.—If it be funned too long, it suffereth *torrefaction*. *Brown*.

(2.) **TORREFACTION**, in chemistry and metallurgy, is the roasting or scorching of a body by fire, to discharge a part either unnecessary or hurtful in another operation. Sulphur and most metals are thus discharged from their ores before they are wrought. See **METALLURGY**, Part III. *Señ. I.*

* To **TORREFY**. *v. a.* [*torrefier*, Fr. *torrefacio*, Lat.] To dry by the fire.—In the sulphur of bodies *torrefied* consist the principles of inflammability. *Brown*.—The Africans are scorched and *torrefied*. *Brown*.—*Torrefied* sulphur makes bodies black. *Boyle*.—Another cluster is composed of two hemiz of white wine, half a hemina of honey, Ægyptian nitre *torrefied* a quadrant. *Arbuthnot*.

H h h TORREJON,

TORREJON, a town of Spain in New Castile, 13 miles S. of Madrid.

TORRELAGUNA, a town of Spain, in New Castile, 17 miles N. of Guadalaxara.

(1.) * **TORRENT**. *adv.* [*torrens*, Lat.] Rolling in a rapid stream.—Waves of *torrent* fire. *Milton*.

(2.) * **TORRENT**. *n. f.* [*torrent*, Fr. *torrens*, Lat.] 1. A sudden stream raised by showers.—Like the *torrent* of a flood. *Sandys*.—No *torrents* swell the low Mohayne. *Prior*. 2. A violent and rapid stream; tumultuous current.—Near Caucasus are certain *torrents*. *Raleigh*.—Those who opposed that *torrent*. *Clar*.—Huge *torrents* flow. *Dryden*.—Stemm'd the wild *torrent* of a barb'rous age. *Pope*.

TORRENTE, a town of Spain in Valentia, 5 miles S. of Valentia.

(1.) **TORRES**, a town of Spain in Grenada, on the coast of the Mediterranean, 10 miles W. of Motril.

(2.) **TORRES**, a river of Sardinia.

(3. 4.) **TORRES**, NEW and OLD, 2 towns of Portugal, in Elremadura, containing about 3000 people.

(5. 6.) **TORRES**, an island and cluster of islands in the Indian Sea, near Siam.

TORREXIMENO, a town of Spain, in Jaen, 8 miles WNW. of Jaen.

TORRICELLA, 2 towns of Naples: 1. in Abruzzo Citra, 6 miles N. of Langiano: 2. in Principato Citra, 4 miles SW. of Amalfi.

TORRICELLI, Evangeliste, an illustrious Italian mathematician and philosopher, born at Faenza in 1608. He studied under father Benedict Castelli, professor of mathematics at Rome. Having read Galileo's dialogues, he composed a treatise on motion, on his principles, which brought him acquainted with Galileo, who took him home as an assistant; but Galileo died in three months after. He became professor of mathematics in Florence, and greatly improved the art of making telescopes and microscopes; but he is best known for finding out a method of ascertaining the weight of the atmosphere by quicksilver; the barometer being called from him, the *Torricellian tube*. He published *Opera Geometrica*, 4to, 1644; and died in 1647.

(1.) **TORRICELLIAN**, *adj.* Of or belonging to, or discovered or invented by TORRICELLI.

(2.) **TORRICELLIAN EXPERIMENT**, a famous experiment made by Torricelli, by which he demonstrated the pressure of the atmosphere in opposition to the doctrines of suction, &c. finding that pressure able to support only a certain length of mercury, or any other fluid, in an inverted glass tube. See **BAROMETER**.

(3.) **TORRICELLIAN TUBE**. See **TORRICELLI**.

(4.) **TORRICELLIAN VACUUM**. See **PNEUMATICS**, *SECT. I.* page 694.

TORRICELLO, a town of Italy, in the Parmelan, on the Po, 12 miles NNW. of Parma.

(1.) * **TORRID**. *adj.* [*torride*, Fr. *torridus*, Lat.] 1. Parched; dried with heat.—Galen's commentators mention a dryness, which they call a *torrid* tabes. *Harvey*. 2. Burning; violently hot.—*Torrid* heat. *Milton*. 3. It is particularly applied to the regions or zone between the tropics.—

ound a temp'rate in a *torrid* zone. *Dryden*.—Those who amidst the *torrid* regions live. *Prior*.

(2.) **THE TORRID ZONE**, in geography, is that part of our **GLOBE OF EARTH**, which lies between the two **TEMPERATE ZONES**, or the **TROPICS OF CANCER** and **CAPRICORN**; and is so called from the *excessive heat* of the climate, the inhabitants having the *sun vertical* to them twice a year; notwithstanding which, there are some high mountains in this zone, whose tops are always covered with snow. The torrid zone extends quite around the globe, and comprehends a space of 47° of Lat. See **GEOGRAPHY**, *SECT. VIII.*

TORRIGIA, or } a town of Genoa, 15 miles
TORRIGLIA, } NNE. of Genoa, or, as
Brookes says, 10 miles N. and 5 W. of Monte Bruno. Lon. 8. 44. E. Lat. 44. 34. N.

TORRIMORIS, a cape of Scotland, on the E. coast of the isle of Sky. Lon. 2. 48. W. of Edinburgh. Lat. 57. 21. N.

(1.) **TORRINGTON**, a populous town of England, in Devonshire, famous for its manufactures of stuff. It is governed by a mayor, and carries on a great trade to Ireland. It has two churches, a market on Satur. and relics of an ancient castle. It formerly sent two members to parliament. It is seated on the *Tourich*, over which it has a fine stone bridge of four arches, 11 miles SW. of Barnstable, and 194 WSW. of London. Lon. 4. 0. W. Lat. 51. 4. N.

(2.) **TORRINGTON**, a town of Connecticut, 11 miles WNW. of Hartford.

(3.) **TORRINGTON BAY**, a bay on the S. coast of Nova Scotia.

(1.) **TORRISDALE**, a river of Scotland in Sutherlandshire, which rises from Langhal, in the parish of Tongue; and falls into the North Sea, at the village, N^o 2.

(2.) **TORRISDALE**, a village of Sutherlandshire, seated on the above river, in which it has a valuable salmon fishery.

TORRO, a river of Africa, which runs into the Scherbio.

TORROLLE, a town of Spain, in Arragon, NW. of Jaca.

TORRONT, a British settlement on the NW. bank of Lake Ontario, 53 miles N. by W. of Fort Nagaria.

TORRUM, a town of Sweden, in the province of Blekingen, 10 miles SE. of Carlskrona.

TORRY, or } a small river of Scotland,
(1.) **TORRY-BURN**, } in Fifeshire, which runs through, and gives name to the parish and village, N^o 2. and 3.

(2.) **TORRY-BURN**, a parish of Scotland, in Fifeshire, formed by the union of the baronies of *Torry* and *Grombie*. It lies in the W. part of the country, extending 4 miles in length, and 2 in breadth, along the coast of the Frith of Forth. The soil is good, well cultivated, and fertile. It abounds with coals, which are wrought extensively. The population, in 1793, was 1600: the decrease 35, since 1755. The mansion-house of *Torry*, the seat of Sir William Erskine, Bart. is near the village.

(3.) **TORRY-BURN**, a village in the above parish, containing about 1200 inhabitants. It has

an excellent harbour, on the Frith of Forth; to which belong 13 vessels, carrying above 1000 tons.

TORSÄKER, a town of Sweden, in Geftricia; 25 miles SW. of Gefle.

TORSANG, a town of Sweden, in Dalecarlia; 10 miles S. Fahlun.

TORSAS, 2 towns of Sweden, in Smaland; 18 miles SW. of Calmar; 2. 16 miles SW. of Wexio.

* **TORSE**. *n. f.* [In heraldry.] A wreath.

* **TORSEL**. *n. f.* [*torfe*, Fr.] Any thing in a twisted form.—When you lay *torfels* for mantle trees to lie on, lay them in loam. *Moxon*.

TORSHELLA, or } a town of Sweden, in Su-
TORSIL, } dermania, on the S. bank
of lake Maelar; 46 miles W. of Stockholm. Lon.
17. 20. E. Lat. 59. 20. N.

* **TORSION**. *n. f.* [*torfio*, Lat.] The act of turning or twisting.

TORSK, or **TUSK**, in ichthyology. See **GADUS**.
TORSKOG, a town of Sweden, in W. Goth-
land; 50 miles N. of Uddevalla.

TORSTASSELLER, a cape of Scotland, on
the coast of Ross-shire, and parish of STORKOWAY.

* **TORT**. *n. f.* [*tort*, Fr. *tortum*, low Lat.]
Mischievous; injury; calamity. Obsolete.—That
had been long oppress'd with *tort*. *Spenser*.—No
beasts should do them any *tort*. *Spenser*.—Sedition,
Riote, oppression, *tort*. *Fairfax*.

(1.) **TORTHORWALD**, a parish of Scotland,
in Dumfriesshire, on the E. side Lochar Moss;
containing 4,400 acres, including 900 acres of the
moss. The inhabited part is 2 miles square. Next
to the moss there are extensive meadows and pas-
tures; farther E. there is a sandy bank, above
which the soil is rich and fertile and mostly in-
closed. The population in 1791, was 660; the
increase 76, since 1755. There are relics of a Drui-
dical temple, of a circular camp, and of *Skrim-
ple Castle*, built in the 12th century.

(2.) **TORTHORWALD**, a village in the above pa-
rish, containing 135 inhabitants. *Roucan*, the other
village contains 243.

* **TORTILE**. *adj.* [*tortilis*, Lat.] Twisted;
wreathed.

(1.) * **TORTION**. *n. f.* [from *tortus*, Latin.]
Torture; pain. Not in use.—All purgers have
a raw spirit or wind, which is the principal cause
of *tortion* in the stomach and belly. *Bacon*.

(2.) **TORTION** is also used synonymously with
TORSION. See **BOTANY**, *Index*.

* **TORTIOUS**. *adj.* [from *tort*.] Injurious;
doing wrong. *Spenser*.

* **TORTIVE**. *adj.* [from *tortus*, Lat.] Twisted;
wreathed.—*Tortive* and errant from his course.
Shak.

TORTO, 1. a river of Spain, which runs into
the Orbeaga, in Leon; 2. a river of Sicily, which
runs into the sea, 5 miles E. of Termini.

(1.) * **TORTOISE**. *n. f.* [*torfue*, French.] 1.
An animal covered with a hard shell; there are
tortoises both of land and water.—In his needy
shop a *tortoise* hung. *Shak*. 2. A form into which
the ancient soldiers used to throw their troops, by
bending down and holding their bucklers above
their heads so that no darts could hurt them.—
Their targets in a *tortoise* cast. *Dryden*.

(2.) **TORTOISE**, in zoology. See **TESTUDO**.

(1.) **TORTOISE-SHELL**, the shell, or rather scales,
of the testaceous animal called a *tortoise*; used in
inlaying, and in various other works, as for snuff-
boxes, combs, &c. It is the under shell alone that
is used; to separate it, they make a little fire be-
neath it, and as soon as ever it is warm, the under
shell becomes easily separable with the point of a
knife, and is taken off in laminæ or leaves; of
which there are 13, eight of them flat, and 5 a
little bent. Of the flat ones, there are 4 large
ones, sometimes a foot long, and 7 inches broad.
The best tortoise-shell is thick, clear, transparent
of the colour of antimony, sprinkled with brown
and white. When used in marquetry, &c. the
workmen give it what colour they please by means
of coloured leaves, which they put underneath
it.

(2.) **TORTOISE-SHELL, WORKING AND JOIN-
ING**. Tortoise-shell and horn become soft in a
moderate heat, as that of boiling water, so as to
be pressed, in a mould, into any form, the shell or
horn being previously cut into plates of a proper
size. Two plates are likewise united into one by
heating and pressing them; the edges being thor-
oughly cleaned, and made to fit close to one an-
other. The tortoise-shell is heated by applying
a hot iron above and beneath the juncture, with
the interposition of a wet cloth to prevent the
shell from being scorched. Both tortoise shells and
horns may be stained of a variety of colours, by
means of the colouring drugs commonly used in
dyeing, and by certain metallic solutions.

(1, 2.) **TORTOLA**, 2 towns of Spain, in New
Castile; 8 miles S. of Cuenca; 2. 5 miles NE. of
Guadalaxara.

(3.) **TORTOLA**, one of the Virgin Islands.

TORTONA, a town of Italy, in the dep. of
Olona, and late Milanese; seated on the Scrivia,
28 miles SE. of Casal and 27 SW. of Milan. Lon.
8. 58. E. Lat. 45. 8. N.

TORTONESE, a ci-devant district of the Mi-
lanese, of which TORTONA was the capital; now
in the dep. of Olona.

TORTOR, a surname of Apollo. *Lemp*.

(1.) **TORTOSA**, a large city of Spain, in Ca-
talonia, with a citadel, a bishop's see, and an uni-
versity. It consists of the Old and New towns,
and is defended by modern fortifications. The
entry to it is over a bridge of boats, on the Ebro.
It has an elegant cathedral, and many churches,
and convents, &c. It is seated in a country fer-
tile in corn and fruits, and abounding with mines
of silver, iron, alabaster, jasper, lapis lazuli, and
stones with veins of gold. The chief manufac-
tures are silk, oil, and fine pottery wares, resem-
bling porcelain. It is seated on a hill and a plain,
55 miles SW. of Taragona, and 180 E. of Ma-
drid. Lon. 0. 35. E. Lat. 40. 53. N.

(2, 3.) **TORTOSA**, a town and river of Tripoli.

(1.) **TORTUGA**, an island on the N. coast of
Hispaniola, about 80 miles in circumference, with
a safe harbour. Lon. 75. 10. W. Lat. 20. 10. N.

(2.) **TORTUGA**, a large uninhabited island of
S. America, near the coast of Terra Firma, 30
miles in circumference. It has a large salt pond,
which begins to crystallize in April. There have
been 20 fall of ships there at once for salt. It is

H h h frequented

frequented by *tortoisés*, whence the name. *Lon.*
64. 50. W. *Lat.* 11. 30. N.

* **TORTUOSITY**. *n. f.* [from *tortuosus*.] Wreath; flexure.—Whence ensueeth that *tortuosity*, or complicated needosity, called the navel *Brown*.

* **TORTUOUS**. *adj.* [*tortueux*, Fr. from *tortuosus*, *tortus*, Latin.] 1. Twisted; wreathed; winding.—

So vary'd he, and of his *tortuous* train

Cur'd many a wanton wreath. *Milton*.

—A long and *tortuous* pipe of lead. *Boyle*. 2. Mischievous. [Thus I explain it, on supposition that it is derived from *tort*, wrong; but it may mean *crooked*; as we say, *crooked* ways for *bad* practices, *crooked* being regularly enough opposite to *right*. This in some copies is *tortious*, and therefore from *tort*.]—

Ne ought he car'd whom he endamaged

By *tortious* wrong. *Spenser*.

(1.) * **TORTURE**. *n. f.* [*torture*, Fr. *tortura*, Lat.] 1. Torments judicially inflicted; pain by which guilt is punished, or confession extorted.—Taught the *tortures* of th' avenging gods. *Dryden*. 2. Pain; anguish; pang.—The *torture* of the mind. *Shak*.—Ghastly spasm or racking *torture*. *Milton*.

(2.) **TORTURE** was never permitted among the Romans except in the examination of slaves. To the disgrace of the professors of Christianity, torture was long practised by those who called themselves *CATHOLICS*, against those whom they termed *heretics*. See **ACT OF FAITH**, and **INQUISITION**. By the law of England, torture was at one period employed to compel those criminals who stood obdimately mute when brought to trial, and refused to plead guilty or not guilty; but it is now abolished. (See **ARRAIGNMENT**, and **RACK**.)

* To **TORTURE**. *v. a.* [from the noun.] 1. To punish with tortures.—He may whip, or hang, or *torture*. *Shak*.—The scourge inexorable and the *torturing* hour. *Milt*. 2. To vex; to excruciate; to torment.—At once to *torture* and to please my soul. *Addison*. 3. To keep on the stretch.—The bow *tortureth* the string continually. *Bacon*.

* **TORTURER**. *n. f.* [from *torture*.] He who tortures; tormentor.—I play the *torturer*. *Shak*.—When king Edward the second was amongst his *torturers*, they shaved him, and washed him with cold water. *Bacon*.

* **TORVITY**. *n. f.* [*torvitas*, Lat.] Sourness; severity of countenance. Not used.

* **TORVOUS**. *adj.* [*torvus*, Lat.] Sour of aspect; stern; severe of countenance. Not used.—That *torvous* four look produced by anger. *Derb*.
TORUP, a town of Sweden, in Halland.

(1.) **TORUS**, in architecture. See **ARCHITECTURE**, and **Plate XX**, fig. 3.

(2.) **TORUS**, in ancient geography, a mountain of Sicily, near Agrigentum.

TORWOOD, a forest of Stirlingshire, in the parish of Laibert, famous for having afforded shelter to Sir William Wallace, after his defeat in the North. Relics of the tree are still visible in the hollow of which that hero secreted himself.

(1.) * **TORY**. *n. f.* [A cant term, derived, I suppose, from an Irish word signifying a savage.] One who adheres to the ancient constitution of

the state, and the apostolical hierarchy of the church of England; opposed to a *whig*.—The knight is more a *tory* in the country than the town. *Addison*.—Grieved that a *tory* should live. *Swift*.—

All parties and religions join,

Whigs, *tories*.

Swift.

(2.) **TORY**. See **TORIES** and **WHIGS**.

(3.) **TORY**, Geoffry, a native of Bourges, who was professor of philosophy at Paris; but afterwards commenced printer, and greatly improved the art. He wrote a book *on the proportion and distance of letters*; which proved very useful. He also published a translation of *Horus Apollo's Hieroglyphics*. He died in 1550.

TORYISM, *n. f.* the principles of the *tories*.

TORYNE, a town of Epirus, near Actium. It was taken by Augustus, after the battle of Actium.

TORZA, a town of Persia, in Irac.

TORZOK, a town of Russia, in Tverkskoï, seated on the Tvertza; 40 miles NW. of Tver.

(1.) **TOSA**, a town of Spain, in Catalonia.

(2.) **TOSA**, a river of Italy, running into Lake Maggiore, 4 miles NE. of Omegna.

TOSARCAN, a town of Persia, in Irac.

TOSCANELLA, Paul, a most celebrated Italian astronomer, of the 15th century, who erected in the cathedral of Florence, the famous *GNOMON*, which is still reckoned the best in Europe, and of which F. Ximenes gave a particular description. He died in 1490.

TOSCARTON, a parish. See **STRONYKIRK**.

* To **TOSE**. *v. n.* [Of the same original with *teize*.] To comb wool.

TOSPIA, a lake of Asia, through which the Tigris runs. See **RIVER**, § 2.

* **TOSS**. *n. f.* [from the verb.] 1. The act of tossing.—The discus has not any thing like a sling fastened to it to add force to the *tofs*. *Addison*. 2. An affected manner of raising the head.—One taught the *tofs*, and one the new French yallow. *Dryden*.—It requires some suitable *tofs* of the head. *Swift*.

(1.) * To **Toss**. *v. a.* *tassen*, Dutch; *tasser*, Fr. to accumulate; *Minzbeu*, *Gusca*, to dance; *Meris*, *Cosauben*. *Töfen*, German, to make a noise; *Skinner*; perhaps from *to us*, a word used by those who would have any thing thrown to them. Pret. *tossed* or *toft*; part. pass. *tossed* or *toft*.] 1. To throw with the hand, as a ball at play.—

With this she seem'd to play, and, as in sport,
Tofs'd to her love in presence of the court.

Dryden.

—A shepherd diverted himself with *tossing* up eggs and catching them again. *Addison*. 2. To throw with violence.—Back do I *tofs* these treasons. *Shak*.—Volcanos discharge huge stones, *tossing* them up to a very great height in the air. *Woodward*. 3. To lift with a sudden and violent motion.—Behold how they *tofs* their torches on high. *Dryden*.—He *toft* his arm aloft. *Addison*.—*Tofs* up their heads. *Prior*. 4. To agitate; to put in violent motion.—Vanity *tossed* to and fro. *Prov.* xxi. 6.—*Tossed* upon the waves of fortune. *Bacon*.—

Cowls, hoods, and habits, with their wearers *toft*,

And flutter'd into rags.

Milton.

—I have often been *tossed* in storms. *Addison*. 5.

To

To make restless; to disquiet.—So many troubles
her did *tofs*. *Spenser*.—Once full of peace, now *toft*
and turbulent. *Milton*. 6. To keep in play; to
tumble over.—They spend four years in *toffing* all
the rules of grammar in common schools. *Afcbam*.

(1.) * To Toss. *v. n.* 1. To fling; to winch;
to be in violent commotion.—Dire was the *toffing*!
deep the groans! *Milton*.—Galen tells us of a wo-
man whom he found in bed, continually *toffing* and
tumbling. *Harvey*.—To *tofs* and fling, and to be
restless, only frets and enrages our pain. *Tillotson*.
—How wilt thou *tofs* and rave. *Addison*.—They
tofs into the chair. *Young*. 2. To be tossed.—
Your mind is *toffing* on the sea. *Shak*. 3. To Toss
up. To throw a coin into the air, and wager on
what side it shall fall.—

I'd try if any pleasure could be found,

In *toffing* up for twenty thousand pound. *Bramph*.

* TOSSEL. *n. f.* See TASSEL.—Tie at each
lower corner a handful of hops with a piece of
packthread to make a *toffel*. *Mortimer's Husb*.

* TOSSEK. *n. f.* [from *tofs*.] One who throws;
one who flings and writhes.

TOSSA, a town of Sweden, in W. Gothland.

* TOSSPOT. *n. f.* [*tofs* and *pot*.] A toper and
drunkard.

* TOST, preterite and part. pass. of *tofs*.—In a
troubled sea of passion *toft*. *Milton*.

TOSTAR, a town of Persia, in Chusistan.

TOSTATUS, Alphonsus, a learned Spanish pre-
late, born in 1414. He was educated at Salaman-
ca, and became bishop of Avila. He wrote *Com-
mentaries on Eusebius*, 5 vols. fol. and on the *Script-
ures*. He died in 1454, aged 40.

TOSTES, a town of France, in the dep. of the
Lower Seine; 12 miles SW. of Arques.

* TOTAL. *adj.* [*totus*, Latin; *total*, French.] 1.
Whole; complete; full.—Left *total* darkness
should by night regain. *Milton*.—And with the
gift reward my *total* care. *Prior*. 2. Whole; not
divided.—

Either to undergo

Myself the *total* crime; or to accuse

My other self, the partner of my life. *Milton*.

* TOTALITY. *n. f.* [*totalité*, Fr.] Complete
sum; whole quantity.

* TOTALLY. *adv.* [from *total*.] Wholly; fully;
completely.—If it be *totally* defaced. *Bacon*.—The
finer provokes God *totally* to withdraw all grace
from him. *Hammond*.—Faith and hope shall then
totally fail. *Atterbury*.

TOTHEA, a river of S. Wales in Cardiganshire.

* T'OTHER, contracted for the other.—As bad
the one as t'other. *Faraby*.

TOTILA, an excellent king of the Ostrogoths.
See ITALY, § II. and 12.

TOTNESS, a borough of Devonshire, which
sends two members to parliament. It was incor-
porated by king John. It is seated on the Dart,
on the side of a hill; is governed by a mayor, 18
aldermen, and recorder; and has a great woollen
manufacture, with markets on Tuesday and Sat.
It is 17 miles SW. of Exeter, and 196 W. by S.
of London. Lon. 3. 44. W. Lat 50. 24. N.

TOTTENHAM HIGH CROSS, a town of Mid-
dlesex, 5 miles N. of London, so named from an
ancient cross in it, which has stood from time im-
memorial.

* To TOTTER. *v. n.* [*tateren*, to stagger,
Dutch.] To shake so as to threaten a fall.—What
news in this our tott'ring state? *Shak*.—As a bow-
ing wall shall ye be, and as a tottering fence. *Pf*.
—Troy totters to her fall. *Dryden*.

TOTTERIDGE, a town of Middlesex, 10 miles
NW. of London.

* TOTTERY. } *adj.* [from *totter*.] Shaking;

* TOTTY. } unsteady; dizzy.—Neither of
those words is used.—

Siker thy head very tottie is,

So on thy corbe shoulder it leans amisse.

Spenser.

TOUARS, or THOUARS, a town of France, in
the dep. of the Two Seves, near the Thoue. It
was taken by the royalists of the Vendee on the
30th April, 1793. It is 32 miles NW. of Poitiers,
and 13 N. of Niort. Lon. 17. 27. E. Ferro. Lat.
46. 68. N.

(1.) TOUCAN, in ornithology. See RHAM-
PHASTOS.

(2.) TOUCAN, or American Goose, is one of
the contellations of the southern hemisphere, con-
sisting of 9 small stars.

(1.) * TOUCH. *n. f.* [from the noun.] 1.
Reach of any thing so that there is no space be-
tween the things reaching and reached.—

No falsehood can endure

Touch of celestial temper.

Milton.

2. The sense of feeling.—Might I but live to see
thee in my touch. *King Lear*.—The spirit of wine,
or chemical oils, are to the first touch cold.
Bacon.

By touch the first pure qualities we learn,

By touch, hard, soft, rough, smooth, we do dis-
cern;

By touch, sweet pleasure, and sharp pain we try.

Davies.

The spider's touch how exquisitely fine! *Pope*.
—The fifth sense is touch. *Locke*. 3. The act of
touching.—The touch of the cold water made a
pretty kind of shugging come over her body.
Sidney.

With one virtuous touch

Th' archchemic sun produces precious things.

Milton.

4. State of being touched.

Never touch was welcome to thy hand,

Unless I touch'd. *Shak*.

5. Examination, as by a stone.—

The fortune of ten thousand men

Must bide the touch. *Shak*.

Ah Buckingham, now do I ply the touch,

To try if thou be current gold indeed. *Shak*.

—The duke being of base gold, feared the touch.
Hayward. 6. Test; that by which any thing is
examined.—Equity, the true touch of all laws.
Carew. 7. Proof tried qualities.—My friends of
noble touch! *Shak*. 8. [*Touche*, Fr.] Single act of
a pencil upon a picture.—

Artificial frise

Lives in those touches, livelier than life.

Shak.

—He has only a relation given him, without the
nice touches which make the graces of the picture.
Dryden.—Never give the least touch with your pen-
cil, till you have well examined your design. *Dry-
den*. 9. Feature; lineament.—

Of

Of many faces, eyes, and hearts,

To have the *touches* dearest priz'd. *Shak.*

—The very fame in ev'ry little *touch*. *Dryden.* 10.

Act of the hand upon a musical instrument.—The

touches of sweet harmony. *Shak.*—With solemn

touches. *Milton.* 11. Power of exciting the affec-

tions.—Urgent *touches*. *Shak.* 12. Something of

passion or affection.—A sensible *touch* of mercy.

Hooker.—He wants the natural *touch*. *Shak.* 13.

Particular relation.—Speech of *touch* should be

sparingly used. *Bacon.* 14. [*Touch*, Fr.] A stroke.

—Nice *touches* of raillery. *Addison.*—Another smart

touch of the author. *Addison.*—

It yet may feel the nicer *touch*

Of Wicherley's or Congreve's wit. *Prior.*

—Satyric *touch*. *Swift.* 15. Animadversion; cen-

sure.—*Touch* of conscience. *King Charles.*—*Touch*

of blame. 16. Exact performance of agreement.

—*Touch* kept is commended. *Tusser.*

Quoth Hudibras, thou offer'st much,

But art not able to keep *touch*. *Hudibras.*

—I keep *touch* with my promise to Philopolis.

More.—Keep *touch* with him. *L'Estrange.* 17. A

small quantity intermingled.—I have a *touch* of

your condition. *Shak.*—A *touch* of aspiration may

perhaps be an ingredient in the rough guttural

pronunciation of the Welsh and Irish. *Holder.* 18.

A hint; slight notice given.—A small *touch* will

put him in mind of them. *Bacon.* 19. A cant word

for a slight essay.—Print my preface in such a form

as will make a sixpenny *touch*. *Swift.*

(2.) The *TOUCH* is improperly used for the sense

of FEELING. See ANATOMY, Index.

(3.) * *TO TOUCH*. *v. a.* [*toucher*, Fr. *tacten*,

Dutch.] 1. To perceive by the sense of feeling.—

Nothing but body can be *touch'd* or *touch*. *Creesh.*

2. To handle slightly, without effort or violence.

—May, by *touching* a certain iron with his foot,

draw up the bridge. *Brown.* 3. To reach with

any thing, so that there be no space between the

thing reached and the thing brought to it.—He

brake the withs as a thread of tow is broken when

it *toucheth* the fire. *Judges* xvi. 9.—

Him thus intent, Ithuriel with his spear

Touch'd lightly. *Milton.*

4. To come to; to attain.—Never more to *touch*

their natal shore. *Pope.* 5. To try as gold with a

stone.—I mean to *touch* your love indeed. *Shak.*—

No stone

Was hard enough to *touch* them on. *Hudibras.*

6. To relate to.—Some things which *touch'd*

the person of our Lord Jesus Christ. *Hooker.*—The

quarrel *toucheth* us alone. *Shak.* 7. To meddle

with; not totally to forbear.—What he *touch'd*

came not to light again. *Spens.* 8. To affect.—

What of sweet

Hath *touch'd* my sense, flat seems to this. *Mil.*

9. To move; to strike mentally; to melt.—I was

sensibly *touch'd* with that kind impression. *Cong-*

reve.—The tender fire was *touch'd* with what he

said. *Addison.* 10. To delineate or mark out.—

The lines, though *touch'd* but faintly, are drawn

right. *Pope.* 11. To censure; to animadvert upon.

Not used.—Doctor Parker *touch'd* them for their

living so near, that they went near to *touch* him

for his life. *Hayward.* 12. To infect; to seize

slightly.—Pestilent diseases are bred in the Sum-

mer; otherwise those *touch'd* are in most danger

in the Winter. *Bacon.* 13. To bite; to wear; to

have an effect on.—A file will not *touch* it, as

smiths say, when a file will not eat, or race it.

Maxon. 14. To strike a musical instrument. They

touch'd their golden harps, and prais'd. *Milton.*

—One dip the pencil, and one *touch* the lyre.

Pope. 15. To influence by impulse; to impel for-

cibly.—

No decree of mine,

To *touch* with slightest moment of impulse

His free will. *Milton.*

16. To treat of perfunctorily.—This thy last

reasoning words *touch'd* only. *Milton.* 17. To *TOUCH*

up. To repair, or improve by slight strokes, or lit-

tle emendations.—Her natural countenance *touch-*

ed up with the usual improvements. *Addison.*

(2.) * *TO TOUCH*. *v. n.* 1. To be in a state of

junction so that no space is between them; as,

two spheres *touch* only at points. 2. To fasten on;

to take effect on.—Strong waters pierce metals,

and that will *touch* upon gold that will not *touch*

upon silver. 3. To *TOUCH* at. To come to without

stay.—The next day we *touch'd* at Sidon. *As.*—

Oh fail not to *touch* at Peru. *Cowley.*—Civil law

and history are studies which a gentleman should

not barely *touch* at, but constantly dwell upon.

Locke.—A fishmonger lately *touch'd* at Hammer-

smith. *Speator.* 4. To *TOUCH* on. To mention

slightly.—The shewing by what steps knowledge

comes into our minds, it may suffice to have only

touch'd on. *Locke.*—If the antiquaries have *touch'd*

upon it, they immediately quitted it. *Addison.* 5.

To *TOUCH* on or upon. To go for a very short

time.—He *touch'd* upon the Moluccoes.—

Left the Trojan's pious host

Should bear, or *touch* upon th' enchanted coast.

Dryden.

—I *touch'd* on the several towns that lie on its coasts.

Addison. 6. To *TOUCH* on or upon. To light upon

in mental enquiries.—It is impossible to make ob-

servations which have not been *touch'd* upon by

others. *Addison.*

* *TOUCHABLE*. *adj.* [from *touch*.] Tangible;

that may be touched.

(1.) *TOU-CHAN*, a town of China, of the 2d

rank, in Koei-tcheou.

(2.) *TOU-CHAN*, a lake of China, in Chan-tong;

53 miles in circumference.

TOUCHE, a town of France in the dep. of the

Saone and Loire; 7½ miles NW. of Chalon.

* *TOUCH-HOLE*. *n. f.* [*touch* and *hole*.] The

hole through which the fire is conveyed to the

powder in the gun.—In a piece of ordnance, if

you speak in the *touch-hole*, and another lay his

ear to the mouth of the piece, the sound is far

better heard than in the open air. *Bacon.*

* *TOUCHINESS*. *n. s.* [from *touchy*.] Pee-

vishness; irascibility.—The *touchiness* of those times

required it. *K. Charles.*

(1.) * *TOUCHING*. *adj.* [from *touch*.] Pathe-

tic; affecting; moving.

(2.) * *TOUCHING*. *prep.* [This word is originally

a participle of *touch*.] With respect, regard, or re-

lation to. It has often the particles *as* before it,

of which there seems to be no use. *Touching* is

now obsolete, though more concise than the mode

of speech now adopted.—*Touching* things which

belong to discipline. *Hooker.*—*Touching* our per-

son seek we no revenge. *Shak.*—The heavens and the earth remain in the same state as *touching* their subsistence. *Raleigh.*—*Touching* the debt, he took himself to be acquitted thereof. *Hayward.*—*Touching* the unity of the Godhead. *South.*

TOUCHINGLY. *adv.* [from *touch*.] With feeling emotion; in a pathetic manner.—How *touchingly* the poet argues. *Garth.*

(1.) * **TOUCHMENOT.** *n. f.* [*cucumis agrefolius*, Lat.] An herb. *Ainsf.*

(2, 3.) **TOUCH-ME-NOT**, in botany. See **IMPA-TIENTS**, N° 2; and **MOMORDICA**, N° 2.

TOUCH-NEEDLE, among assayers, refiners, &c. was little bars of gold, silver, and copper, combined together in all the different proportions and degrees of mixture; the use of which was to discover the degree of purity of any piece of gold or silver, by comparing the mark it leaves on the touch-stone with those of the bars. The metals usually tried by the touch-stone are gold, silver, and copper, either pure, or mixed with one another in different degrees and proportions, by fusion. But it is now quite unnecessary to describe either the *touch-needle* or the *method of using* it; as no dealer in gold and silver will now trust to such an uncertain test, when he can ascertain the value with much more ease, expedition, and accuracy, by taking an assay of the mass; (See **ASSAYING**, **ASSAY-MASTER**, **BLOW-PIPE**, **DOCIMASTIC**, **TEST**, &c.) more especially now, that, in consequence of the duty on gold and silver plate, there are now **ASSAY OFFICES** established by government in all the principal cities in Great Britain; where dealers in these metals can obtain a speedy report of the value of any mass of gold, silver, or any other mixture of these with other metals, which may be offered to them for sale.

(1.) * **TOUCHSTONE.** *n. f.* [*touch and stone*; *pierre de touche*, Fr.] 1. Stone by which metals are examined.—Gold tried with the *touchstone*. *Bacon.*—Why does he make the *touchstone* faulty? *Collier.* 2. Any test or criterion.—Use it as a *touchstone*. *Hooker.*—The *touchstone* of nature. *Darwin.*—Money serves for the *touchstone* of honesty. *L'Estr.*—That *touchstone* will discover. *Dryden.*

(2.) **The TOUCHSTONE** is a black, smooth, glossy stone, formerly much used to examine the purity of metals. The ancients called it **LAPIS LYDIUS**, the Lydian stone, from the name of the country whence it was originally brought. See **LYDIUS**. Any piece of pebble or black flint will answer the purpose of the best lapis lydius of Asia. Even a piece of glass made rough with emery is used with success, to distinguish true gold from such as is counterfeit; both by the metallic colour and the test of aquafortis. The true touchstone is of a black colour, and is met with in several parts of Sweden. See **MINERALOGY**, Part II. Chap. IV. Gen. XXIII. Sp. 1. Var. 2.

(1.) * **TOUCHWOOD.** *n. f.* [*touch and wood*.] Rotten wood used to catch the fire struck from the flint.—They take fire, and become *touchwood*. *Houel.*—To make white powder, the powder of rotten willows is best; spunk, or *touchwood* prepared, might make it rust. *Brown.*

(2.) **TOUCHWOOD.** See **BOLETUS**.

* **TOUCHY.** *adj.* [from *touch*.] Peevish; irritable; traicable; apt to take fire. A low word.—

You are upon a *touchy* point. *Collier.*—You are so *touchy*. *Arbutnot.*

(1.) **TOUCQUES**, a town of France, in the dep. of Calvados; 6 miles SW. of Honfleur, and 4 NNW. of Pont L'Eveque.

(2.) **TOUCQUES**, a river of France, in the dep. of Calvados, which runs into the Sea, 8 miles N. of the above town.

TOUCY, a town of France, in the dep. of the Yonne; 12 miles WSW. of Auxerre, and 12½ NE. of St Fargeau.

TOUDSONG, a town of Tibet, 93 miles SW. of Lassa.

TOUFANS. See **SIFANS**.

(1.) **TOUGH.** *adj.* [*to*, Saxon.] 1. Yielding to flexure or extension without fracture; not brittle.—Of bodies some are fragile, and some are *tough*, and not fragile. *Bacon.* 2. Stiff; not easily flexible.—

The bow he drew,

And almost join'd the horns of the *tough* eugh.

Dryden.

—So *tough* a frame she could not bend. *Dryden.*

3. Not easily injured or broken.—O sides, you are too *tough*! *Shak.*—*Tough* to the last. *Dryden.* 4. Viscous; clammy; ropy; tenacious.

(2.) **TOUGH**, in geography, a parish of Scotland, in Aberdeenshire, 22 miles from Aberdeen, 5 miles long, and 3 broad. The surface is irregular and hilly, but most of the hills are arable. The soil is in general a light loam, interspersed with spots of deep rich loam, and mossy ground. The population, in 1792, was 560; and the decrease 10 since 1755.

(1.) * **To TOUGHEN.** *v. n.* [from *tough*.] To grow tough.—Hops off the kiln lay three weeks to cool, give and *toughen*. *Mortimer.*

(2.) **To TOUGHEN.** *v. a.* To make tough.

* **TOUGHNESS.** *n. f.* [from *tough*.] 1. Not brittleness; flexibility.—To make an induration with *toughness*, and less fragility, decoct bodies in water for three days. *Bacon.*—Keeps the native *toughness* of the steel. *Dryden.* 2. Viscosity; tenacity; claminess; glutinousness.—Viscosity or *toughness* of the fluids. *Arbutnot.* 3. Firmness against injury.—I confess me knit to thy deserving cables of perdurable *toughness*. *Shak.*

TOUING, a town of Croatia, 24 miles SW. of Carlstadt.

TOUL, a city of France, in the dep. of the Meurthe, seated on the Moselle, over which it has a stone bridge, and is regularly fortified. It is 12 miles W. of Nancy, and 28 S. of Metz.

TOULOMBA, a town and fort of Hindoostan, in Moultan, or Lahore, on the Rauvee, 70 miles NE. of Moultan.

(1.) **TOULON**, an ancient city and sea-port of France, capital of the dep. of the Var. Before the revolution it was a bishop's see, and one of the chief cities of Provence. It had a cathedral, many churches, 9 convents, a seminary and a college. It was originally built by the Romans, after their conquest of Gaul. It was destroyed about the end of the 10th century, and was hardly rebuilt, when it was again pillaged by African pirates. In 1544, it was taken by the imperialisists under the constable of Bourbon; and again by Charles V. in 1536. It has been depopulated by the

the plague, particularly in 1418, 1461, 1476, 1587, 1621, 1630, 1647, 1664, and 1720. Yet notwithstanding these depopulations, it contained about 80,000 citizens in 1789. It was highly improved, ornamented, and fortified, by Lewis XIV. who employed the celebrated Vauban to erect the strongest fortifications; and constructed a new haven, with an arsenal containing every thing necessary for ship-building, with a rope-work, an armoury, a foundry for cannons, muskets, and all other warlike apparatus. The harbour of Toulon is very spacious, and surrounded by hills, which give it the appearance of being almost circular. The entrance is defended on both sides by a fort with strong batteries. The great prince Eugene besieged this city in 1707, but without success. In Sept. 1793, however, it was surrendered by a party of French royalists to the British admiral Lord Hood, who accordingly took possession of it, in conjunction with the Spanish troops, in trust for Lewis XVII.; in whose name Lord Hood promised the French a restoration of the constitution of 1789. But the French republicans, disregarding these offers, laid close siege to it, and notwithstanding the most heroic exertions made by the British and their allies, and particularly by Sir Sidney Smith, Gen. O'Hara, and Capt. Hare, the garrison was obliged to evacuate Toulon in Dec. 1793; after having destroyed the arsenal, and burnt or taken several ships of war. The loss on the part of the allies was very great, vast numbers of the royalists being either drowned or falling into the hands of the French, while endeavouring to get on board the British vessels. Toulon is seated on a bay of the Mediterranean, 45 miles SE. of Marseilles, and 51 SE. of Aix. Lon. 5. 37. E. Lat. 43. 7. N.

(1.) TOULON EN CHAROLLOIS, a town of France, in the dep. of the Saone and Loire, near the Arroux, 17 miles NW. of Charolles, and 15 NE. of Bourbonne Lancy.

TOULOUSE, a very ancient city of France, in the department of Upper Garonne, and late province of Languedoc. It is the most considerable city in France next to Paris and Lyons, although its population bears no proportion to its extent. It contains 56,000 inhabitants. The streets are very handsome, and the walls and houses are of bricks. The townhouse, a modern structure, forms a perfect square, 324 feet long and 66 high. The principal front occupies an entire side of the grand square. Before the revolution, it had two colleges, 2 public libraries, and 3 academies. The commerce consists in leather, drapery, blankets, mignonets, oil, iron, mercury, hardware, and books. The bridge over the Garonne is at least equal to those of Tours and Orleans; it forms the communication between the suburb of St Cyprian and the city. The quays extend along the banks of the Garonne. Toulouse is 37 miles E. of Auch, 125 SE. of Bourdeaux, and 350 SW. of Paris. Lon. 1. 27. E. Lat. 43. 36. N.

TOUMANDI, a town of Asiatic Turkey, in Natolia, 32 miles W. of Kutaja.

(1.) TOUMEN, a town of Chinese Tartary, 608 miles ENE. of Pekin.

(2.) TOUMEN, a river of Chinese Tartary, in Corea, which runs into the sea of Japan.

TOUP, Rev. Jonathan, was born at St Ives in Cornwall, in 1713; where he received the rudiments of his education, and was afterwards placed under the care of a Mr Gurney, and thence removed to Exeter College, Oxford, where he took his degree of A. B. He took that of M. A. at Cambridge, in 1756. He became rector of St Martin's in 1750; prebendary of Exeter in 1774; and vicar of St Merry in 1776. In 1760 and 1764 Mr Toop published the 1st and 2d parts of his *Emendationes in Suidam*. These books procured him the notice of Bp. Warburton, who recommended him to Abp. Secker, Lord Shelburne, and Bp. Keppel. The 3d part of the *Emendationes in Suidam* was published in 1766. In 1767 Mr Toop's *Epistola Critica ad virum celeberrimum Gul. Episcop. Glouc.* made its appearance. In 1772 Mr Toop published his *Appendiculum Notarum in Theocritum*. Mr Toop's next work was the *Appendiculum Notarum in Suidam*, published in 1775. In 1778 his *Longinus* was published from the Oxford press in 4to. A 2d edition has since been printed in 8vo. He died on the 19th Jan. 1785, when just entering into his 72d year.

* TOUPET. *n. f.* [Fr.] A curl; an artificial lock of hair.—Second-hand *toupees* and repaired ruffles. *Swift*.

TOUPOUR, a lake in Tibet; 27 miles in circumference; 10 miles N. of Souc.

(1.) TOUR, Henry DE LA VICOULT TURENNE, a celebrated French general, was the 2d son of Henry de la Tour duke of Bouillon, and was born at Sedan in 1611. He made his first campaigns in Holland, under Maurice and Frederic Henry princes of Orange, who were his uncles by the mother's side. In 1634 he marched with his regiment into Lorraine; and having contributed to the taking of La Mothe, was, though very young, made *mareschal de camp*. In 1636 he took Saverne, and in 1637 the castles of Hirion and Sole. He continued to distinguish himself in several sieges and battles, and in 1644 was made marshal of France; but was defeated at the battle of Mariendal, in 1645. However, he gained the battle of Nortlingen 3 months after; restored the elector of Treves to his dominions; and in 1646 made the famous junction of the French army with that of Sweden commanded by general Wrangel, which obliged the duke of Bavaria to demand a peace. But that duke breaking the treaty, he was defeated by Turenne at the battle of Zumarhausen, and in 1648, driven entirely out of his dominions. During the civil wars in France he sided with the princes, and was defeated at the battle of Rhetal in 1650; but soon after was restored to the favour of the king, who in 1652 gave him the command of his army. He acquired great honour at the battles of Jergeau, Gren, and the suburbs of St Anthony, and by the retreat he made before the army commanded by the princes at Ville Neuve St George. In 1654 he made the Spaniards raise the siege of Arras; in 1655 he took Condé, St Guilian, and several other places; gained the famous battle of Dunes; and made himself master of Dunkirk, Oudenarde, and almost all Flanders: this obliged the Spaniards to conclude the peace of the Pyrenees in 1660. These important services occasioned his being made

made marshal-general of the king's armies. The war being renewed with Spain in 1667, Turenne commanded in Flanders; and took so many places, that in 1668 the Spaniards were obliged to sue for peace. He commanded the French army in the war against the Dutch in 1672; took 40 towns in 22 days; pursued the elector of Brandenburg even to Berlin; gained the battles of Sinsheim, Ladenburg, Ensisheim, Molhausen, and Turkeim; and obliged the Imperial army, of 70,000 men, to repossess the Rhine. By this campaign he acquired immortal honour. He passed the Rhine to give battle to Gen. Montecuculi, whom he followed as far as Sasbach; but mounting upon an eminence to discover the enemy's camp, he was killed by a cannon ball in 1675.

(1.) * TOUR. *n. s.* [*tour*, Fr.] 1. Ramble; roving journey.—I made the *tour* of all the king's palaces. *Addis.*—He made the *tour* of the solar system. *Mart. S. i. b. l.* 2. Turn; revolution. In both these senses it is rather French than English.—The *tour*s by heavenly bodies made. *Blackm.* 3. In *Milton* it is probably tower; elevation; high flight.—The bird of Jove stoop'd from his airy *tour*. *Milton*.

(3.) TOUR, in geography, a town of France, in the dep. of Calvados; 3 miles WNW. of Bayeux. and 4½ E. of Trévières.

(4.) TOUR, a town of France, in the dep. of Puy de Dome, 12 miles W. of Besse, and 23 S. of Clermont. TOUR is also the name of other 7 towns and a river of France, besides a Cape in Jersey, and a town in Switzerland, thus distinguished:

(5.) TOUR, a town in the dep. of the Eastern Pyrenees, 12 miles WNW. of Perpignan, and 13½ NE. of Prades.

(6.) TOUR D'AIGUES, a town in the dep. of the Mouths of the Rhone, 12 miles SSE. of Apt.

(7.) TOUR DS ROSEL, a cape of Jersey, 5 miles NNE. of St Helier.

(8.) TOUR DE ROUSSILLON, a town in the dep. of the Eastern Pyrenees, and late prov. of Roussillon; seated on a hill near the Tet, on the spot where formerly stood the city of *Ruscino*, which was destroyed in the 9th century. It is 3 miles E. of Perpignan.

(9.) TOUR DE TREME, a town of Switzerland, in the canton of Friburg, two miles N. of Griyeres.

(10.) TOUR DU PIN, a town of France, in the dep. of the Here, and late prov. of Dauphiny; 25 miles WNW. of Grenoble, 24 S. of Vienne, and 27 SE. of Lyons.

(11.) TOUR DU PIN, a town of France, in the dep. of Here, which runs past the above town, to which it gives name, and falls into the Rhine.

(12.) TOUR LA BLANCH, a town in the dep. of the Dordogne; 9 miles N. of Ribérac, and 13 NW. of Périgueux.

(13.) TOUR LANDRY, a town of France, in the dep. of Maine and Loire; 6 miles W. of Vihiers, and 9 NE. of Chollert.

(14.) TOUR LA VILLE, a town of France, in the dep. of the Channel; adjoining to Cherbourg; famous for its manufacture of glass.

TOURNAINE, a ci-devant province of France.

VOL. XXII. PART II.

It was bounded on the N. by Maine, E. by Orleanois, S. by Berri, and W. by Anjou and Poitou, being 58 miles long and 55 broad. It is watered by 17 rivers, besides many rivulets. The air is temperate, and the soil is so fruitful that it is called the *Garden of France*. It now forms the department of INDRÉ and LOIRE. TOURS was the capital.

TOURANCOURCHY, a town of Hindoostan, in the Carnatic, 35 miles SSW. of Trichinopoly.

TOURBILLON. See SION, N° 3.

TOURETTE, a town of France, in the dep. of the Var, 9 miles NW. of St Paul.

TOURFAN HORUM, a town of Asia, in Little Bukharia, and capital of a province so named, 180 miles WNW. of Hami. Lon. 107. 17. E. Ferro. Lat. 43. 33. N.

TOURICH, or TOWRIDGE, a river of England, in Devonshire. See TOWRIDGE.

TOURIN, a town of the French empire, in the dep. of the Ourte, ci-devant bishopric of Liege, 13 miles NE. of Namur. Lon. 5. 0. E. Lat. 50. 56. N.

TOURMALINE, in mineralogy, a species of stone, found in Ceylon, Brazil, Tyrol, &c. That of Ceylon is of a dark brown or yellowish colour; that of Brazil is green, blue, red, or yellow, and that of Tyrol by reflected light is of a blackish brown, but by refracted light yellowish, or in thin pieces green; mostly crystallized in polygon prisms, but sometimes amorphous. The thickest parts are opaque; the thin more or less transparent. See MINERALOGY, Part II. Chap. IV. Class I. Order I. Gen. VII. Sp. 4. For the electrical qualities of tourmaline, see ELECTRICITY, Ind.

TOURMENTINE, a town of France, in the dep. of the Maine and Loire; 6 miles NNE. of Chollet, and 24 S. of Angers.

(1.) * TOURNAMENT. *TOURNEY. n. s.* [*tour-namentum*, low Lat.] 1. Tilt; joust; military spirit; mock encounter.—Tilts and tournaments. *Daniel.*—Jousts, *tourneys*, and barriers. *Bacon.*—Whence came all those jousts, tiltings, and tournaments. *Temple.*—At tilts and tournaments obtain'd the prize. *Dryd.* 2. *Milton* uses it simply for encounter; shock of battle.—With cruel *tournament* the squadrons join! *Milton*.

(2.) The TOURNAMENT was a martial sport or exercise which the ancient cavaliers used to perform, to show their bravery and address. It is derived from the French word *tourner*, i. e. to turn round, because to be expert in these exercises, much agility both of horse and man was requisite, they riding round a ring in imitation of the ancient Circi. The first tournaments were only courses on horseback, wherein the cavaliers tilted at each other with canes in the manner of lances; and were distinguished from jousts, which were courses or careers, accompanied with attacks and combats, with blunted lances and swords. See JUST, § 3, 4. The prince who published the tournament, used to send a king at arms, with a safe conduct, and a sword, to all the princes, knights, &c. signifying that he intended a tournament and a clashing of swords, in the presence of ladies and damsels; which was the usual formula of invitation. They first engaged man against

against man, then troop against troop; and after the combat, the judges allotted the prize to the best cavalier, and the best striker of swords; who was accordingly conducted in pomp to the lady of the tournament; where, after thanking her very reverently, he saluted her, and likewise her two attendants. These tournaments made the principal diversion of the 13th and 14th century. Munster says, it was Henry the Fowler, duke of Saxony, and afterwards emperor, who died in 936, that first introduced them; but it appears from the *Chronicle of Tours*, that the true inventor of this famous sport, at least in France, was one Geoffrey, lord of Preuilli, about A. D. 1066. Instances of them occur among the English in the reign of king Stephen, about A. D. 1140; but they were not much in use till the time of Richard I. about 1149. After which period these diversions were performed with extraordinary magnificence in the Tilt-yard near St. James's, Smithfield, &c. At last, however, they were found to be productive of bad effects, and the occasions of several fatal misfortunes; as in the instance of Henry II. of France, and of the tilt exhibited at Chalons, which, from the numbers killed on both sides, was called the *little war of Chalons*. These and other inconveniences, resulting from those dangerous pastimes, led the popes to prohibit them; and the princes of Europe gradually concurred in discouraging and suppressing them.

TOURNAN, a town of France, in the dep. of the Seine and Marine; 13½ miles N. of Melun, and 18 ESE. of Paris.

(1.) **TOURNAY**, in geography, a town of the French empire, in the department of the Scheldt, and late province of the Austrian Netherlands, in Flanders, and ci-devant capital of a district called **TOURNAYSIS**. It is divided into two parts by the river Scheldt; and is large, populous, well built, and carries on a great trade in woollen stuffs and stockings. The cathedral is a very handsome structure, and contains many chapels, with rich ornaments, and several magnificent tombs of marble and brass. The town was taken by the allies in 1709; but was ceded to the house of Austria by the treaty of Utrecht, though the Dutch retained a right to put in a garrison. It was taken by the French in June 1745, who demolished the fortifications. In 1781 the emperor Joseph II. obliged the Dutch to withdraw their garrison. It was taken by the French in 1791, abandoned by them in 1793, and again conquered by them in 1794, and annexed to their republic in 1796. It is 14 miles SE. of Lille, 30 SW. of Ghent, and 135 N. by E. of Paris. Lon. 3. 28. E. Lat. 50. 33. N.

(2.) **TOURNAY**, a town of France, in the dep. of the Upper Pyrenees; 9 miles SE. of Turbes, and 9 NE. of Bagneres.

TOURNAYSIS, a ci-devant district of Austrian Flanders, now annexed to the French empire, and included in the department of the Scheldt. **TOURNAY** was the capital.

TOURNEFORT, Joseph Pitton de, a famous French botanist, born at Aix in Provence in 1666. He quitted the study of theology for that of physic, natural history, and botany. His fame as a botanist in 1683, procured him the employ-

ment of botanic professor in the king's garden; and by the king's order, he travelled into Spain, Portugal, Holland, and England, where he made prodigious collections of plants. In 1700, in obedience to another order, he travelled over all the isles of the Archipelago, upon the coasts of the Black Sea, in Bithynia, Pontus, Cappadocia, Armenia, and Georgia; on his return he was made professor of physic in the college royal. He died in 1708. He wrote *Elements of Botany*, both in French and Latin; *A voyage into the Levant*, &c.

TOURNEFORTIA, a genus of plants, in the class *Pentandria*, and order of *Monogynia*; ranking in the natural method, under the 41st order, *Asperifolia*.

TOURNEFEM, a town of France, in the dep. of the Straits of Calais, 9 m. NW. of St. Omer.

* **TOURNEY**. See **TOURNAMENT**.

* **To TOURNEY**. *v. n.* [from the noun.] To tilt in the lists.—Well could he *tourney*, and in lists debate. *Spenser*.

(1.) * **TOURNIQUET**. *n. f.* [French.] A bandage used in amputation, tightened or relaxed by the turn of a handle.—Loosen the *touriquet*. *Sharp*.

(2.) The **TOURNIQUET** is an instrument formed with screws, for compressing any part with rollers, &c. for the stopping of hemorrhages. See **SURGERY**, *Index*.

(1.) **TOURNON**, a town of France, in the dep. of the Ardèche, and late prov. of Dauphiny, seated on the declivity of a mountain, with a fine college, and a castle that commands the whole town. It lies near the Rhone, 40 miles W. of Grenoble, and 180 S. by E. of Paris. Lon. 4. 50. E. Lat. 45. 6. N.

(2.) **TOURNON**, a town of France, seated on the banks of the Creuse, partly in the dep. of the Indre, and partly in that of Indre and Loire; 7 m. S. of Preuilli, and 8 NNW. of Blanc in Berry.

(3.) **TOURNON**, a town of France, in the dep. of the Lot and Garonne, and capital of a castron in the district of Villeneuve; 11 miles E. of Villeneuve, and 20 NE. of Agen.

(4.) **TOURNON**, a town of the French empire, in the dep. of Mount Blanc, and ci-devant duchy of Savoy; 15 miles E. of Chambery, and 14 NW. of Moutier.

TOURNUS, a town of France, in the dep. of the Saone and Loire, seated on the Saone; 11 miles S. of Chalons, and 13 N. of Maçon. Lon. 22. 25. E. Ferro. Lat. 45. 4. N.

TOURO, a town of Portugal, in the prov. of Beira, 14 miles WSW. of Alfayates.

TOUROUVRE, a town of France, in the dep. of the Orne; 6 miles NE. of Mortagne, and 13 SW. of Verneuil.

(1.) **TOURS**, an ancient, large, handsome, and rich city of France; capital of the dep. of the Indre and Loire, as it was formerly of the ci-devant province of **TOURAINE**. It is advantageously seated on the Loire, near the Cher. Over the Loire it has one of the finest bridges in Europe, consisting of 13 arches. This city was formerly famous for its wines, which were much esteemed, and for its silk manufactures, wherein 17,000 persons were employed in Richelieu's time; but at present the total number of inhabitants is not estimated.

estimated by Dr Brooke above 22,000; But Mr Cruttwell states it 33,000. In the year 732, the Saracens were defeated near this city by Charles Martel, with the loss of 100,000 men. Tours lies 52 miles NE. of Poitiers, 60 SW. of Orleans, and 127 SW. of Paris. Lon. 0. 47. E. Lat. 47. 24. N.

(2.) TOURS, a town of France, in the department of Puy de dome; 12 miles ESE. of Billon.

TOUR-LAXIS, a small principality of Germany, the prince of which got a share of the indemnities in 1801-2.

TOURVES, a town of France, in the department of Var, 4½ miles SE. of St Maximin.

TOURVILLE, a town of France, in the dep. of Eure; 10½ miles W. of Louviers, and 10½ SW. of Pont de l'Arche.

TOURY, a town of France, in the dep. of the Loiret; 12 miles W. of Pithiviers.

* To TOUSE. *v. a.* [probably of the same original with *taw*, *teize*, *tofe*.] To pull; to tear; to haul; to drag; whence *touser* or *touser* the name of a maffiff.—A bear whom angry curs have *touz'd*. *Spenser*.—She tosses, tumbles, strikes, turns, *soufes*, spurns, and sprauls. *Drayt*.—We'll *touwe* you—joint by joint. *Shak*.—

To *touwe* such things as flutter,

The honest Bounce is bread and butter. *Swift*.

TOUSER, *n. f.* [from *toufe*.] One who touies.

TOUSERA, a town of Africa, in Biledulgerid, dependent on Tunis, in a country abounding with dates. Lon. 10. 55. E. Lat. 32. 30. N.

TOUCHANG, a town of China, of the 3d rank in the prov. of Kiang-si, on the banks of lake Po-Yang; 17 miles NE. of Nan-kang.

TOUTERON, a town of France, in the dep. of the Ardennes; 9 miles N. of Vouziers, and 13½ S. of Meziens.

TOUTSI-CHAMPIA LING, a town of Tibet; 30 miles NW. of Tankersong.

TOUVRE, a river of France, in the dep. of the Charente; which runs into the Charente, half a mile above Angouleme.

TOU-YANG, a city of China, of the 1st rank, in the prov. of Quang-si, 1127 miles SSW. of Pekin. Lon. 124. 50. E. Ferro. Lat. 23. 18. N.

TOU-YUN, a city of China, of the 1st rank, in the province of Koei-tcheou. Lon. 124. 48. E. Ferro. Lat. 26. 12. N.

* TOW. *n. f.* [*tow*, Saxon.] Flax or hemp beaten and combed into a filamentous substance.—*Tow* twisted round the handle of an instrument makes it easier to be held. *Sharp*.

* To TOW. *v. a.* [*teon*, *teohun*, Saxon, to lead; *teghon*, old Dutch.] To draw by a rope, particularly through the water.—Thou should'st *tow* me after. *Shak*.—The seamen *towed*. *Swift*.

TOWA, a river of S. Wales, in Caermarthen-shire; which runs into the Tawe, at St Clare.

TOWAN HEAD, a promontory of England, on the NW. coast of Cornwall. Lon. 5. 4. W. Lat. 50. 27. N.

(1.) * TOWARD. *adj.* Ready to do or learn; not forward.

(2.) * TOWARD. TOWARDS. *adv.* [It is doubtful whether in this use the word be adverb or adjective.] Near; at hand; in a state of preparation.—

What might be *toward* that this sweaty haist
Doth make the night joint labourer with the
day?

(3.) * TOWARD. TOWARDS. *prep.* [*toward*, Sax.]

1. In a direction to.—*Toward* the wilderness. *Num.* xxiv. 1. 2. With local tendency to.—*Tow'rds* the retreating sea. *Milton*. 3. Near to; as, the danger now comes *towards* him. 4. With respect to; touching; regarding.—Love *towards* us. *Sidney*.—Sorrow's always *tow'rds* ourselves. *Shak*.—His heart relented *towards* her. *Milton*.—By our law, no good is to be left undone *towards* all. *South*. 5. With ideal tendency to.—This was the first alarm England received *towards* any trouble. *Clarendon*. 6. Nearly; little less than.—I am *towards* nine years older. *Swift*.

* TOWARDLINESS. *n. f.* [from *towardly*.] Docility; compliance; readiness to do or to learn.—The beauty and *towardliness* of children. *Kaleidh*.

* TOWARDLY. *adj.* [from *toward*.] Ready to do or to learn; docile; compliant with duty.—*Towards* noblemen or gentlemen. *Bacon*.

* TOWARDNESS. *n. f.* [from *toward*.] Docility.—Parents will not throw away the *towardness* of a child. *South*.

* TOWARDS. See TOWARD, § 2, and 3.

TOWCESTER, an ancient town of England in Northamptonshire, originally a Roman station. It is seated on a rivulet and has an elegant church. Its chief trade is lace-making. It has a market on Tuesday, and is 52 miles SE. of Coventry, and 60 NW. of London. Lon. 1. 15. W. Lat. 52. 4. N.

* TOWEL. *n. f.* [*tauaille*, French; *tuaglio*, Italian.] A cloth on which the hands are wiped.—Soft grassy *towels*. *Drayton*.—A napkin or *towel*. *Wifeman*.—Silken *towels*. *Dryden*.

(1.) * TOWER. *n. f.* [*tor*, Saxon; *tour*, Fr. *torre*, Italian; *turris*, Latin.] 1. A high building; a building raised above the main edifice.—A *tower*, whose top may reach unto heaven.—*Towers* and battlements. *Milton*. 2. A fortress; a citadel.—A strong *tower*. *Psalms*. 3. A high head-dress. *Towers*, and curls, and periwigs. *Hudibras*. 4. High flight; elevation.

(2.) A *Tower* is a tall building consisting of several stories, usually of a round form, though some are square or polygonal. *Towers* are built for fortresses, &c. as the Tower of London. See LONDON, § 28.

(3.) TOWERS, CIRCULAR. See ARCHITECTURE. Index.

* To TOWER. *v. n.* To soar; to fly or rise high.—An high rock *tow'r'd* still. *Spenser*.—The hawks do *tower* so well. *Shak*.—Rising folds that *tower'd*. *Milton*.—*Tow'ring* his height, and ample was his breast. *Dryden*.—The *tow'ring* height—Of waggons. *Dryden*.—Sublime thoughts which *tower* above the clouds. *Locke*.

* TOWERED. *adj.* [from *tower*.] Adorned or defended by towers.—The *tow'r'd* Cybele. *Milton*.

TOWER-HILL, a port town of Rhode Island, in Washington county, near Worden's Pond; 2 m. S. of Providence, and 182 from Philadelphia.

(1.) * TOWER-MUSTARD. *n. f.* [*turritis*, Lat.] A plant. *Miller*.

(2.) TOWER MUSTARD. See TURRITIS.

(3.) TOWER MUSTARD, BASTARD. See ARABIS.

TOWERS, Joseph, LL. D. an English dissenting divine, born in Southwark, in 1737, and bred a printer, under Coadbey; after which he commenced bookseller in London; but soon after engaged in the ministry among the Presbyterian Dissenters; and in 1764 became pastor of a congregation in Highgate. In 1778, he was chosen one of the ministers of Newington Green, along with the celebrated Dr PRICE. In 1779, he received his degree from Edinburgh. He published, 1. an useful work, entitled *British Biography*, in 7 vols. 8vo. 2. *Observations on Hume's History of England*: 3. *The Life and Reign of Frederic III. of Prussia*, in 2 vols 8vo. 4. *A Vindication of Locke*: 5. Several Sermons and Political Tracts. He also assisted Dr Kippis in his edition of the *Biographia Britannica*. He died in 1799.

* **TOWERY**. *adj.* [from *tower*.] Adorned or guarded with towers—There *town'ry* cities and the forests green. *Pope*.—Salem—exalt thy *town'ry* head, and lift thine eyes! *Pope*.

TOWIE, or **TOWIE KINBATTOCH**, a parish of Scotland, in Aberdeenshire, $3\frac{1}{2}$ miles long, and a broad, watered by the Don. The surface is hilly and covered with heath. On the banks of the river the soil is fertile, though not deep. The rest is a cold wet till. The population, in 1791, was 550; and had decreased 106 since 1755. Free stone and granite abound.

(1.) * **TOWN**. *n. f.* [*tun*, Saxon; *tyn*, Dutch; from *tinan*, Saxon, *hut*.] 1. Any walled collection of houses.—Her house was upon the *town* wall. *Jos. ii. 15*.—He storm'd the *town*. *Betterton*. 2. Any collection of houses larger than a village.—I had as liege the *town* crier had spoke the lines. *Shak*.—Into whatsoever city or *town* ye enter. *Mat. x. 11*.—Before him *towns* and rural works between. *Milton*.—Flies from *towns* to woods. *Broome*. 3. In England, any number of houses to which belongs a regular market, and which is not a city or the see of a bishop. 4. The inhabitants of a town.—The whole *towne* for their water sent. *Chapman*. 5. The court end of London.—Drags from the *town* to wholesome country air. *Pope*. 6. The people who live in the capital.—Stuns with his giddy larum half the *town*. *Pope*. 7. It is used by the inhabitants of every town or city; as we say, *a new family is come to town*.—Some new dress just come to *town*. *Law*. 8. It is used emphatically for the capital; as, *he lives six months in town, and six in the country*.

(2.) A **Town** is otherwise defined, a place inhabited by a considerable number of people, being of a middle size between a city and a village.

TOWNAVILLY, a town of Ireland, in Donegal county, Ulster.

* **TOWNCLERK**. *n. f.* [*town* and *clerk*.] An officer who manages the public business of a place.—The *townclerk* appealed the people. *Att. 2x. 25*.

* **TOWNHOUSE**. *n. f.* [*town* and *house*.] The hall where public business is transacted.—A *townhouse* will front the church. *Addison*.

(1.) **TOWNSEND**, a town of Massachusetts 36 miles NW. of Boston.

(2.) **TOWNSEND**, a sea port town of the United States, on the coast of Maine; with a good harbour of 9 fathoms deep, and safe from all winds.

* **TOWNSHIP**. *n. f.* [*town* and *ship*.] The corporation of a town; the district belonging to a town.—I am but a poor petitioner of our whole *township*. *Shak*.—They had erected *townships*. *Raleigh*.

TOWNSON, Thomas, D. D. a learned divine born in Essex, in 1715; and educated at Magdalen college, Oxford, of which he became fellow. After several inferior promotions, he was appointed archdeacon of Richmond. He published, 1. Discourses on the Gospels; 2. Answer to the Confessional; and 3. he wrote a Discourse on the Evangelical History; published since his death, in 1791. His works have very lately been collected and published in two vols 8vo. with a life of the author.

* **TOWNSMAN**. *n. f.* [*town* and *man*.] 1. An inhabitant of a place.—Here come the *townsmen* on procession. *Shak*.—Almost all the *townsmen* of Kilkenny were slain. *Davies*.—Defended only by the *townsmen*. *Clar*.—Admit the *townsmen* at their first appearance. *Dryden*. 2. One of the same town.

* **TOWNTALK**. *n. f.* [*town* and *talk*.] Common prattle of a place.—The secret, in twelve hours, shall be *towntalk*. *L'Estrange*.

TOWRIDGE, or **TOURICH**, a river of England, in Devonshire, which rises near the source of the Tamar, and near Bristol Channel; runs SE. to Hatherley, and then joining the Oke from Oakhampton, turns short to the N. and, passing by Torrington and Biddeford, falls into the sea at Barnstaple Bay.

TOWTON, a village of England, in the W. Riding of Yorkshire, $3\frac{1}{2}$ miles SE. of Tadcaster; memorable for a bloody battle fought between the adherents of the houses of York and Lancaster, on Palm Sunday, 1461, wherein the latter were defeated, with the loss of 36,000 men, and Henry VI. obliged to fly into Scotland. (See ENGLAND, § 33.) Towton is 185 miles N. of London.

TOWY, a river of S. Wales, which rises in Cardiganshire, enters Caermarthenshire at its NE. extremity, and running past Caermarthen, falls into the Bristol Channel, at Caermarthen Bay, 6 miles below Caermarthen.

TOWYNMYN, a river of N. Wales, in the county of Montgomery, which falls into the Towy, 5 miles NE. of Machynlleth.

TOXANDRI, an ancient people of Gallia Belgica. *Plin. v. c. 7*.

TOXARIDIA, a festival held at Athens, in honour of

TOXARIS, a Scythian hero.

* **TOXICAL**. *adj.* [*toxicum*, Lat.] Poisonous; containing poison.

TOXICODENDRON, in botany. See RHUS.

* **TOY**. *n. f.* [*toyen*, *tooghen*, to dress with many ornaments, Dutch.] 1. A petty commodity; a trifle; a thing of no value.—Might I make acceptable unto her that *toy*. *Sidney*.—Knives, glasses, and such *toys*. *Abbot*.—That *toy* a woman! *Dryden*.

Dryden. 1. A plaything; a bauble.—To dally thus with death is no fit *toy*. *Spenser*.—Coaches, trappings, tables, cabinets, and the like precious *toys*! *Addison*.—In Delia's hand this *toy* is fatal found. *Pope*.—Florists enamour'd of a *toy*. *Young*. 3. Matter of no importance.—A knack, a *toy*, a trick, a baby's cap. *Shak*.—No light and idle *toys* my lines may vainly swell. *Drayton*. 4. Folly; trifling practice; silly opinion.—Follies and *toys*. *Hooker*. 5. Play; sport; amorous dalliance.—

Ye sons of Venus, play your sports at will;
For greedy pleasure, carelefs of your *toys*,
Thinks more upon her paradise of joys. *Spenser*.
So said he, and forbore not glance or *toy*
Of amorous intent. *Milton*.

6. Odd story; silly tale.—Antic fables, fairy *toys*. *Shak*. 7. Slight representation.—Shall that be now disguised with a *toy* of novelty? *Hooker*. 8. Wild fancy; irregular imagery; odd conceit.

The very place puts *toys* of desperation,
Without more motive, into every brain. *Shak*.
* To *TOY*. *v. n.* [from the noun.] To trifle;
to dally amorously; to play.

* *TOYISH*. *adj.* [from *toy*.] Trifling; wanton.

* *TOYISHNESS*. *n. f.* [from *toyish*.] Nugacity; wantonness.—*Toyishness* of wanton fancy, that plays tricks with words. *Glanville*.

* *TOYMAN*. *n. f.* [from *toy*.] A seller of toys.—The foremost *toyman* of his time. *Young*.

* *TOYSHOP*. *n. f.* [*toy* and *shop*.] A shop where playthings and little nice manufactures are sold.—The heart was nothing else but a *toyshop*. *Addison*.—They shift the moving *toyshop* of their heart. *Pope*.

* To *TOZE*. *v. a.* [See *TOWSE* and *TEASE*.] To pull by violence or importunity.—I *toze* from thee thy business. *Shak*.

TOZER, a town of Africa, in Biledulgerid.

TOZZETH, John Targioni, botanist, born at Florence in 1712. He studied physic at Pisa, and became keeper of the botanic garden at Florence. He wrote several works in Latin and Italian, on botany; one upon the *Utility of Plants in the practice of Physic*. He died at Florence in 1783.

TOZZIA, in botany, a genus of plants of the class *Didymia*, and order of *Angiospermia*; and ranking in the natural method, under the 40th order, *Perfonate*.

TRAARBACH, a town of the French empire, in the dep. of the Rhine and Moselle, and late county of *Sponheim*; 34 miles SW. of Coblenz, and 20 ENE. of Treves. Lon. 24. 26. E. Ferro. Lat. 50. 2. N.

TRAAS. See *TERRAS*.

TRABAY, a river of Spain, in Grenada, which runs into the sea near Muxarra.

TRABEA, Quintus, a comic poet, who flourished at Rome, in the age of Regulus. Some fragments of his poetry are still extant. *Cic. in Tuf. iv. c. 13*.

TRABENKA, a town of Sweden, in the isle of Aland.

TRABIA, a town of Sicily, in the valley of Mazara, 2 miles W. of Termini.

* *TRACE*. *n. f.* [*trace*, Fr. *traccia*, Italian. 1. Mark left by any thing passing; footsteps.—

These as a line their long dimension drew,
Streaking the ground with sinuous *trace*. *Milt*. 2. Remain; appearance of what has been.—The people lived without any *traces* of orders, laws or religion. *Temple*.—There are not the least *traces* of it to be met. *Addison*.—No *trace* of war. *Pope*. 3. [From *tiraffer*, French; *tiraffes*, traces.] Harness for beasts of draught.—

Her wagon spokes made of long spinner's legs;

The *traces*, of the smallest spider's web. *Shak*.—The labour'd ox in his loose *traces*. *Milton*.—Lab'ring oxen, in their loose *traces*. *Pope*.—Unpractis'd in the *traces*. *Pope*.

* To *TRACE*. *v. a.* [*tracer*, Fr. *tracciare*, Italian.] 1. To follow by the footsteps, or remaining marks.—

I feel thy power to *trace* the ways
Of highest agents. *Milton*.

—You may *trace* the deluge round the globe.

Burnet.—They do but *trace* over the paths beaten by the ancients. *Temple*.—To this haste, a not due *tracing* of the arguments is owing. *Locke*. 2.

To follow with exactness.—*Tracing* word by word, and line by line. *Denham*. 3. To mark out.—He allows the soul power to *trace* images on the brain.

Locke.—His pen can *trace* out a true quotation.

Swift. 4. To walk over.—

Men as they *trace*,
Both feet and face one way are wont to lead.

Spenser.
We do *trace* this alley up and down. *Shak*.

* *TRACER*. *n. f.* [from *trace*.] One that traces.—*Tracers* of a plot. *Howel*.

TRACHAS, a town of Latium. *Ovid*.
TRACHEA. See *ANATOMY*, *Index*.

TRACHELIUM, in botany, *UMBELLIFEROUS THROATWORT*, a genus of plants in the class *pentandria*, and order of *monogynia*; ranking in the natural method under the 29th order, *Campanaceae*.

(1.) *TRACHENBERG*, or } a principality of
(1.) *TRACHENBURG*, } Silicia, bounded on the N. by the late kingdom of Poland, E. and S. by Oels, and W. by Wolaw.

(2.) *TRACHENBURG*, the capital of the above principality, is seated on the Barch, 12 miles NE. of Wolaw, and 26 N. of Breslaw. Lon. 17. 15. E. Lat. 51. 30. N.

TRACHINIA, a country of Thessaly, in Phthiotis. *Trachis* was the capital.

TRACHINUS, in ichthyology, the *weever*, a genus of fishes belonging to the order of *jugulares*. There is but one species, viz.

TRACHINUS DRACO, or common weever. It grows to the length of 12 inches, but is commonly found much less; the irides are yellow; the under jaw is longer than the upper, and slopes very much towards the belly; the teeth are small; the back is straight, the sides are flat, the belly is prominent, the lateral line straight: the covers of the gills are armed with a very strong spine: the first dorsal fin consists of five very strong spines, which, as well as the intervening membranes, are tinged with black; this fin, when quiescent, is lodged in a small hollow: the 2d consists of several soft rays, commences just at the end of the first, and continues

nues

nues almost to the tail: the pectoral fins are broad and angular; the ventral fins small; the vent is placed remarkably forward, very near the throat: the anal fin extends to a small distance from the tail, is a little hollowed in the middle, but not so much as to be called forked: the sides are marked lengthwise with 2 or 3 dirty yellow lines; and transversely by numbers of small ones; the belly silvery. The wounds inflicted by its spines are exceedingly painful, attended with a violent burning and most pungent shooting, and sometimes with an inflammation that will extend from the arm to the shoulder. The remedy used by some fishermen is the sea-land, with which they rub the place affected for a considerable time. At Scarborough, stale urine warmed is used with success. An inflame is mentioned of a person who was reduced to great danger by a wound from this fish, and who was cured by the application of sweet oil, and taking opium and Venice treacle. This fish buries itself in the sands, leaving only its nose out, and if trode on immediately strikes with great force. Notwithstanding this noxious property of the spines, it is exceedingly good meat.

TRACHONITIS. See GILEAD, N^o 4.

* TRACK. *n. f.* [*trac*, *John Fr. traccia*, Italian.] 1. Mark—left upon the way by the foot or otherwise.—Following the *track* of Satan. *Milt.*—With *tracks* of blood inscrib'd the dusty ground. *Dryd.*—*Tracks* or footsteps of wisdom. *Bentley.* 2. A road; a beaten path.—With *track* oblique side-long he works his way. *Milton.*—Behold Torquatus the same *track* pursue. *Dryden.*

* To TRACK. *v. a.* [from the noun.] To follow by the footsteps or marks left in the way.—Hath *tracked* forth some savage beaſt's tread. *Spenser.*—You *track* him every where in their snow. *Dryd.*

* TRACKLESS. *adj.* [from *track*.] Untrodden; marked with no footsteps—

Loſt in *trackless* fields of ſhining day. *Prior.*

TRACOSOZ, a town of Spain, in Leon; 30 miles W. of Zamora.

* TRACT. *n. f.* [*tracſus*, Latin.] 1. Any kind of extended ſubſtance.—The deep *tract* of hell. *Milton.* 2. A region; a quantity of land.—There are ſome *tracts* which are barred from air and freſh wind. *Raleigh.*—Joined to the main land by a narrow *tract* of earth. *Addiſon.* 3. Continuity; any thing protracted, or drawn out to length.—A long *tract* of time. *Milt.*—In *tract* of ſpeech a dubious word is eaſily known by the coherence with the reſt. *Holder.* 4. Courſe; manner of proceſs; unleſs it means, in this place, rather, diſcourſe; explanation.—

The *tract* of every thing

Would, by a good diſcourſer, loſe ſome life

Which action's ſelf was tongue to. *Shak.*

5. It ſeems to be uſed by *Shakſpeare* for *tract*.—

The weary ſun hath made a golden ſet,

And, by the bright *tract* of his fiery car,

Gives ſignal of a goodly day to-morrow. *Shak.*

6. [*Tractatus*, Latin.] A treatiſe; a ſmall book.—Collection of *tracts* againſt popery. *Swift.*

* TRACTABLE. *adj.* [*tractabilis*, Lat. *tractabile*, Fr.] 1. Manageable; docile; compliant; obſequious; practicable; governable.—*Tractable* obedience. *Shak.*—If thou doſt find him *tractable* to

us. *Shak.*—Thoſe who yield themſelves *tractable* to good motions. *Tilloſt.*—Children will be *tractable*. *Locke.* 2. Palpable; ſuch as may be handled.—The other meaſures are of continued quantity, viſible, and for the moſt part *tractable*. *Holder.*

* TRACTABLENESS. *n. f.* [from *tractable*.] The ſtate of being tractable; compliance; obſequiouſneſs.—Children's *tractableneſs*. *Locke.*

* TRACTABLY. *adv.* In a tractable manner; gently.

* TRACTATE. *n. f.* [*tractatus*, Lat.] A treatiſe; a tract; a ſmall book.—Sermons and written *tractates*. *White.*—Philoſophical *tractates*. *Brown.*—No other evidence than Glanville's *tractate*. *Hob.*

* TRACTILE. *adj.* [*tractilis*, Lat.] Capable to be drawn out or extended in length; ductile.—*Tractile*, or to be drawn forth in length. *Bacon.*

* TRACTILITY. *n. f.* [from *tractile*.] The quality of being tractile.—The ductility and *tractility* of ſilver. *Derham.*

* TRACTION. *n. f.* [from *tractus*, Lat.] The act of drawing; the ſtate of being drawn.—The malleus follows the *traction* of the muſcle. *Holder.*

(1.) TRACTOR. *n. f.* A perſon or inſtrument that draws.

(2.) TRACTORS, METALLIC. See PERKINUM.

TRACTRIX. *n. f.* in geometry, a curve line; called alſo CATENARIA: which ſee,

(1.) * TRADE. *n. f.* [*tratta*, Ital.] 1. Traffic; commerce; exchange of goods for other goods, or for money.—Whoſoever commands the ſea, commands the *trade* of the world. *Raleigh.*—*Trade* increaſes in one place and decays in another. *Temple.* 2. Occupation; particular employment, whether manual or mercantile, diſtinguiſhed from the liberal arts or learned profeſſions.—Appoint every one a certain *trade* of life. *Spenser.*—Dreadful *trade*! *Shak.*—All the *trades* in Rome. *Shak.*

Inſtruction, manners, myſteries, and *trades*,

Decline to your confounding contraries. *Shak.*—Plund'ring was their *trade*. *Dryd.*—A captain is a very gainful *trade*. *Dryd.*—All *trades* of death.

Dryd.—Pertinax applied himſelf to a gainful *trade*. *Arbut.* 3. Inſtruments of any occupation.—His houſe and houſhold goods, his *trade* of war. *Dryd.*

4. Any employment not manual; habitual exerciſe.—Train them up in that *trade*. *Bacon.* 5. Cuſtom; habit; ſtanding practice.—Thy ſin's not accidental, but a *trade*. *Shak.* 6. Formerly *trade* was uſed of domeſtic, and *traffic* of foreign commerce.

(2.) TRADE, or COMMERCE, conſiſts in buying, ſelling, and exchanging of commodities, bills, money, &c. See COIN, MONEY, COMPANY, &c.

(3.) TRADE OF PERTH. The communication of this place with foreign countries was perhaps more frequent at an earlier period than it is now. Almoſt all the exports, and a conſiderable part of the imports, are now made through the medium of Dundee, Leith, Glaſgow, and London. Timber, iron, flax, and flax-ſeed, being the principal articles of immediate importation. There is not water in the Tay to admit veſſels drawing more than 10 feet. The tonnage of ſhipping which annually arrives with coals is about 27,000, with merchant goods 16,000, with lime 15,000, and with ſtones 500, in all about 52,000. The out-

with

ward freight consists of grain, salmon, wool, and manufactured goods of various descriptions. The number of quarters of grain exported in 1780 and in 1804 was as follows:

Wheat.	Barley.	Malt.	Pease.	Oats.	Total.
1780,	6440	10349	4920	1480	590, 23779
1804,	24936	35045	1449	857	3498 65785

Increase 42,006 quarters.—The quantity of salmon shipped for the London market is very great.—Paper is made in the neighbourhood to a considerable extent, and chiefly disposed of in London. There are several extensive tan-works established here; and the manufacture of leather into gloves, boots, shoes, &c. is prosecuted to no small amount, for English and foreign consumption. The most recent establishments are a foundry, and a manufactory of ink. The trade in all these branches was, however, insignificant, compared with the commerce in the staple of linen, that was carried on for many years very extensively; but the superior cheapness of German and Irish goods has caused the industry and capital of Perth of late to be directed to the making of cotton articles of all descriptions, from the coarsest calicoe to the finest muslin. For bleaching there are several great establishments in the neighbourhood; and the print-field at KUTHVEN is not inferior in extent to any in the country. The estimate of the trade of Perth in 1794 was £250,000. The amount may now be stated at double that sum at least.—N. B. The population of Perth, as ascertained in 1802, was about 15,000, and is now supposed by the well informed to exceed 17,000,—which number read for 11,000, erroneously printed in the article PERTH.

(4.) TRADES OF SCOTLAND. See INCORPORATION, § 4.

(1.) * TO TRADE. *v. a.* To sell or exchange in commerce.—They traded the persons of men in thy market. *Ezek.* xxvii. 13.

(2.) * TO TRADE. *v. n.* [from the noun.] 1. To traffic; to deal; to hold commerce.—Gained by trading. *Luke* xix. 15.—Nations reformed with their goods, and traded. *Arbutb.*—Maximus traded with the Goths. *Arbutb.* 2. To act merely for money.—To trade and traffic. *Shak.* 3. Having a trading wind.—They on the trading flood ply tow'rd the pole. *Milton.*

* TRADED. *adj.* [from trade.] Verified; practised.—Long traded in it. *Shak.*—Two traded pilots. *Shak.*

* TRADEFUL. *adj.* [trade and full.] Commercial; busy in traffic.—Tradeful merchants. *Spens.*

* TRADER. *n. f.* [from trade.] 1. One engaged in merchandise or commerce.—Traders riding to London. *Shak.*—Fortunate traders. *Dryd.*—Many traders will necessitate merchants to trade for less profit. *Child.*—Traders sum up accounts.—*Swift.* 2. One long used in the method of money getting; a practitioner.

(1.) TRADESCANT, John, an ingenious naturalist, said to have been a native of Flanders, who established the first museum in this country, at South Lambeth, about the end of the reign of Elizabeth. It was sold to Elias Ashmole, and deposited at Oxford.

(2, 3.) TRADESCANT, John, the son and grandson of the preceding, were also eminent botanists, antiquaries, and collectors of antiquities, plants,

fossils, &c. but no particular memoir is preserved of any of the three, except what is recorded on their monument in Lambeth church-yard.

TRADESCANTIA, in botany, VIRGINIAN SPIDER-WORT, a genus of plants, in the class *Hexandria*, and in the order of *monogynia*; ranking in the natural method under the 6th order, *Enfase.*

* TRADESFOLK. *n. f.* [trade and folk.] People employed in trades.—*Tradesfolk* would soon get money. *Swift.*

(1.) * TRADESMAN. *n. f.* [trade and man.] A shopkeeper. A merchant is called a *trader*, but not a tradesman; and it seems distinguished in *Shakspeare* from a man that labours with his hands.—I live by the awl, I meddle with no tradesmen's matters. *Shak.*—*Tradesmen* fingering in their shops. *Shak.*—Merchants and tradesmen. *Bacon.*—*Tradesmen* in their respective dealings. *Graunt.*—He would not be thought a tradesman. *Prior.*—A plain tradesman with a shop. *Arbutb.*—A tradesman, meek and much a liar. *Pope.*—Penitens was a busy notable tradesman. *Law.*

(2.) TRADESMEN'S TOKENS, copper coins which were issued by individuals, in the end of the 18th century, when half-pence were very scarce. The devices they bore were entirely regulated by the taste or fancy of the issuers. On Bolton's coinage of copper in 1799, they retired from circulation. Many hundred different specimens have been preserved from the melting pot, in the cabinets of collectors.

(1.) * TRADE-WIND. *n. f.* [trade and wind.] The monsoon; the periodical wind between the tropics.—

But now, the Cape once doubled, fear no more; A constant trade-wind will securely blow. *Dryd.*—Comfortable is the trade-wind to the equatorial parts. *Cheyne.*

(2.) TRADE-WINDS, certain regular winds at sea, blowing either continually the same way, or alternately this way and that; thus called from their use in navigation, and the Indian commerce. See WIND.

* TRADITION. *n. f.* [tradition, Fr. *traditio*, Lat.] 1. The act or practice of delivering accounts from mouth to mouth without written memorials; communication from age to age.—To learn it we have tradition. *Hooker.* 2. Any thing delivered orally from age to age.—

Superstitions and traditions taint, Left only in those written records pure. *Milton.*—A general tradition. *Wilkins.*—Fond tradition. *Pope.*

* TRADITIONAL. *adj.* [from tradition.] 1. Delivered by tradition; descending by oral communication; transmitted by the foregoing to the following age.—Traditional sense of Scripture. *Til-lotson.* Children born from wealthy parents, have the same traditional sloth and luxury. *Swift.* 2. Observant of tradition, or idle rites. Not used, nor proper.—

God forbid

We should infringe the holy privilege Of sanctuary!

—You are too senseless obstinate, my lord; Too ceremonious and traditional. *Shak.*

* TRADITIONALLY. *adv.* [from traditional.] 1. By

1. By transmission from age to age.—This doctrine is *traditionally* derived from St John. *Burnet.* 2. From tradition without evidence of written memorials.—It is *traditionally* related by Strabo. *Brown.*

* **TRADITIONARY.** *adj.* [from *tradition*] Delivered by traditions; transmissive; handed down from age to age.—

Suppose the same *traditionary* strain

Of rigid manners in the house remain. *Dryden.*
—*Traditionary* sense of scripture. *Tillotson.* *Traditionary* account of our Saviour. *Addison.*

* **TRADITIVE.** *adj.* [traditive, Fr. from *trado*, Lat.] Transmitted or transmissible from age to age.—Suppose we on things *traditive* divide. *Dryd.*

* **TO TRADUCE.** *v. a.* [traduco, Lat. *traduere*, Fr.] 1. To censure; to condemn; to represent as blameable; to calumniate; to decry.—*Traducing* the form and manner of prayer. *Hooker.*—Other things also *traduced* are, together with these, to be touched. *Hooker.*—As long as men are malicious and designing, they will be *traducing*. *Gov. of the Tongue.*—He *traduced* me in libel. *Dryden.* 2. To propagate; to encrease or continue by deriving one from another.—

None are so gross as to contend for this,

That souls from bodies may *traduced* be. *Davies.*
—From these animals were propagated and *traduced* over the earth. *Hale.*—Whether the soul be immediately created or *traduced*, hath been the great ball of contention. *Glanville.*

* **TRADUCEMENT.** *n. f.* [from *traduce*.] Censure; obloquy.—Worse than a *theft*, no less than a *traducement*. *Shak.*

* **TRADUCER.** *n. f.* [from *traduce*.] 1. A false censurer; a calumniator. 2. One who derives.

* **TRADUCIBLE.** *adj.* [from *traduce*.] Such as may be derived.—Not orally *traducible*. *Hale.*

TRADUCTA JULIA, the ancient name of Tariffa in Spain. See *TARIFFA*.

* **TRADUCTION.** *n. f.* [from *traduce*.] 1. Derivation from one of the same kind; propagation.—The patrons of *traduction*, and the asserters of creation. *Glanville.*—If by *traduction* came thy mind. *Dryden.* 2. Tradition; transmission from one to another.—Traditional communication and *traduction* of truth. *Hale.* 3. Conveyance; act of transferring.—The *traduction* of brutes could only be by shipping. *Hale.* 4. Transition.—Figures in rhetoric of repetition and *traduction*. *Bacon.*

(1.) **TRAETH BICHA**, a bay of the Irish Sea, on the W. coast of Merionethshire, in N. Wales.

(2.) **TRAETH COCH**, or REDWHARF BAY, a bay on the N. coast of Anglesey, 14 miles W. of Great Orme's Head.

(3.) **TRAETH MAWER**, a bay of the Irish Sea, on the W. coast of N. Wales, between the counties of Merioneth and Caernarvon, 4 miles N. of Harlech.

TRAFAGNOI, a river of the Tirolese, which runs into the Lavis, 4 miles N. of Castellier.

TRAFALGAR, CAPE. See *TREFALGAR*.

TRAFARIA, a town and fort of Portugal, in Estremadura, on the S. bank of the Tajo, 6 miles SW. of Lisbon.

* **TRAFFICK.** *n. f.* [*trafique*, Fr. *traffico*, Italian.] 1. Commerce; merchandising; large trade; exchange of commodities. *Traffick* was formerly used of foreign commerce in distinction from *trade*.—*Traffick's* thy god. *Shak.*—A merchant of great *traffick* through the world. *Shak.*—Tyre, a town of great wealth and *traffick*. *Heclyn.*—Advanced the *traffick* of his people. *Addis.* 2. Commodities; subject of traffick.—Filthy *traffick*. *Gay.*

* **TO TRAFFICK.** *v. n.* [*trafique*, Fr. *trafficare*, Italian.] 1. To practice commerce; to merchandise; to exchange commodities.—Things to *traffick* withal. *Bacon.* 2. To trade meanly or mercenarily.—

How did you dare

To trade and *traffick* with Baceth. *Shak.*
—I *traffick* with thee for a prince's ruin! *Rowe.*

* **TRAFFICKER.** *n. f.* [*trafique*, Fr. from *traffick*] Trader; merchant.—Your Argosies do overpeer the petty *traffickers*. *Shak.*—In it are many Jews, great *traffickers*. *Addison.*

(1.) * **TRAGACANTH.** *n. f.* [*tragacantha*, Lat.] A gum which proceeds from the incision of the root or trunk of a plant so called. *Trevoux.*

(2.) **TRAGACANTH.** See *ASTRAGALUS*, § 2, N° 2; and *PHARMACY*, Index.

TRAGARTH, a river of S. Wales, in Brecknockshire, which runs into the Neath.

* **TRAGEDIAN.** *n. f.* [from *tragedy*; *tragædius*, Lat.] 1. A writer of tragedy.—Verses out of the ancient *tragedian*. *Stillingfleet.* 2. An actor of tragedy.—I can counterfeit the deep *tragedian*. *Shak.*—The well-lung'd *tragedian's* rage. *Dryden.*

(1.) * **TRAGEDY.** *n. f.* [*tragedie*, Fr. *tragædia*, Lat.] 1. A dramatick representation of a serious action.—Blotted *tragedy*. *Shak.*—All our *tragedies* are of kings and princes. *Taylor.*—Imitate the sister of painting, *tragedy*. *Dryden.*—An anthem was called the goat-song or *tragedy*. *Rymer.*

There to her heart fady *tragedy* address

The dagger.

2. Any mournful or dreadful event.—I live to look upon their *tragedy*. *Shak.*—Another act of the same *tragedy*. *K. Charles.*

(2.) **TRAGEDY.** See *ARTS*, § 1, 8; *DRAMA*, § 2; *ORATORY*, Part III. and IV. and *THEATRE*, § 2—6.

TRAGEIN, a town of Germany, in the empire of Austria, 10 miles ENE. of Stayregg.

TRAGIA, in botany, a genus of plants, in the class of *Monacia*, and order of *Triandria*, ranking according to the natural method, in the 18th order, *Tricocce*.

* **TRAGICAL, TRAGICK.** *adj.* [*tragicus*, Lat. *tragicus*, Fr.] 1. Relating to tragedy.—The *tragick* stage. *Spenser.*—This *tragick* play. *Shak.* 2. Mournful; calamitous; sorrowful; dreadful.—Bitter, black, and *tragical*. *Shak.*—The *tragick* melancholy night. *Shak.*—Why look you still so stern and *tragical*? *Shak.*—So *tragical* a fate. *Sandys.*—I now must change those notes to *tragick*. *Milton.*—A pretty *tragical* story. *Addis.*—*Tragick* pomp. *Rowe.*

* **TRAGICALY.** *adv.* [from *tragical*.] 1. In a tragical manner; in manner besitting tragedy.—He hath revenged them *tragically*. *Dryden.* 2. Mournfully; sorrowfully; calamitously.

* **TRAGICALNESS.** *n. f.* [from *tragical*.] Mournfulness;

Mournfulness; calamitousness.—*Tragicalness* of the event. *Decay of Piety.*

* **TRAGICK.** See **TRAGICAL.**

* **TRAGI-COMEDY.** *n. f.* [*tragi-comédie*, Fr. from *tragedy* and *comedy*.—A drama compounded of merry and serious events.—*Life's tragi-comedy.* *Denham.*—We have often had *tragi-comedies* upon the English theatre with success. *Gay.*

* **TRAGI-COMICAL.** *adj.* [*tragi-comique*, Fr. *tragic* and *comical*.] 1. Relating to *tragi-comedy*.—The art of the *tragi-comical* farce lies in interweaving the several kinds of the drama. *Gay.* 2. Consisting of a mixture of mirth with sorrow.

* **TRAGI-COMICALLY.** *adv.* [from *tragi-comical*.] In a *tragi-comical* manner.—I was *tragi-comically* got. *Brampston.*

TRAGOI, a town of European Turkey, in Bulgaria, 24 miles E. of *Ternova*.

TRAGOLLES, a town of Africa, in *Bambouk*.

TRAGONISI, an island in the Grecian Archipelago, 2 miles W. of *Myconi*; chiefly inhabited by goats.

TRAGOPOGON, **GOAT'S BEARD**, in botany; a genus of plants belonging to the class of *syngenesia*, and to the order of *polygamia equalis*; and in the natural system ranging under the 4th order, *Compositæ*. The receptacle is naked, the calyx simple, and the pappus plumose. There are 14 species; of which two are British:

1. **TRAGOPOGON FORRISOLIUM**, the purple goat's beard, has the calyx longer than the radius of the floret; the flowers are large, purple, single, and terminal; and the leaves long, pointed, and bluish. The root is long, thick, and esculent. It grows in meadows, and is cultivated in gardens under the name of *salsafy*.

2. **TRAGOPOGON PRATENSE**, the yellow goat's beard, has its calyxes equal with the florets, and its leaves entire, long, narrow, sessile, and grassy. In fair weather this plant opens at sun rising, and shuts between nine and ten in the morning. The roots are conical and esculent, and are sometimes boiled and served up at table like asparagus. It grows on meadows.

TUAGURIUM, an ancient town of Dalmatia on the sea coast.

TRAGUS, a river of ancient Arcadia, running into the *Alpheus*. *Paus.* 8. c. 13.

TRAHONA, a town of the Italian kingdom, in the ci-devant Valteline, seated on a rivulet which runs into the *Adda*, 2 miles N. of *Morbeggio*.

(1.) **TRAJAN**, *Marcus Ulpius*, a celebrated Roman emperor, who gained many victories over the Parthians and Germans, pushing the empire to its utmost extent on the east and north sides. He died at *Selinunte*, a city of Cilicia, which from him was called *Trajanopolis*. See **PARTHIA**, § 9, 10; and *ROME*, § 54.

(2.) **TRAJAN**, in geography, a town of European Turkey, in Moldavia, on the *Perth*, 16 miles N. of *Galatz*.

TRAJANOPOLI, a town of European Turkey, in Romania, on the *Maritza*; 40 miles SW. of *Adrianople*, and 115 W. of *Constantinople*. *Lon.* 26. 18. E. *Lat.* 41. 15. N.

VOL. XXII. PART II.

TRAJANOPOLIS, an ancient town of Thrace 2. a name given to *Selinus*, where *Trajan* died.

TRAJAN'S COLUMN, a famous historical column erected in Rome, in honour of the emperor *Trajan*. It is of the Tuscan order, though somewhat irregular: its height is 8 diameters, and its pedestal Corinthian; it was built in a large square called *Forum Romanum*. Its base consists of 12 stones of an enormous size, and is raised on a socle, or foot, of 8 steps; within is a staircase illuminated with 44 windows. It is 140 feet high, which is 35 feet short of the *ANTONINE* column, but the workmanship of the former is much more valued. It is adorned from top to bottom with basso relievo, representing the great actions of the emperor against the *Dacians*.

* **TRAJECT.** *n. f.* [*trajet*, Fr. *trajet*, Latin.] A ferry; a passage for a water-carriage.—Bring to the *traject*, to the common ferry. *Shak.*

* **To TRAJECT.** *v. a.* [*trajec*, Latin.] To cast through; to throw.—The shadow of an horse *trajected*. *Glanville.*—Æther becomes a fit medium for *trajec*ing the light of celestial bodies. *Greav.*—If the sun's light be *trajected* through prisms. *Newton.*

* **TRAJECTION.** *n. f.* [*trajec*, Latin.] 1. The act of darting through.—Comets by a *trajec*tion through the æther, wander through the celestial part of the universe. *Boyle.* 2. Emission.—The *trajec*tions of such an object more sharply pierce the martyred soul of John, than afterwards did the nails the crucified body of Peter. *Brown.*

TRAJECTORIUM LUNARE. See **ASTRONOMY, Index.**

TRAJECTORY, *n. f.* a term often used, generally for the path of any body, moving either in a void, or in a medium that resists its motion; or even for any curve passing through a given number of points.

TRAJECTUS RHENI, the name given by the Romans to the town and province now called *UTRECHT*.

TRAJETTO, a town of Naples, in *Lavora*, built on the ruins of the ancient *MINTURNE*, near the mouth of the *Garigliano*; 6 miles SW. of *Sezza*, 25 NW. of *Capua*, 20 SW. of *Venafro*. *Lon.* 14. 4. E. *Lat.* 41. 20. N.

* **TRAIL.** *n. f.* [from the verb.] 1. Scent left on the ground by the animal pursued; track followed by the hunter.—If I cry out thus upon no *trail*, never trust me when I open again. *Shak.*—False *trail*. *Shak.*—Hunts not the *trail* of policy to sure. *Shak.* 2. Any thing drawn to length.—The *smoking trail* began to spread. *Dryden.*—When lightning shoots in glittering *trails* along. *Rowe.* 3. Any thing drawn behind in long undulations.—An ivy winding *trail*. *Spenser.*—A radiant *trail* of hair. *Pope.*

(1.) * **To TRAIL.** *v. a.* [*trailer*, Fr.] 1. To hunt by the track. 2. To draw along the ground.—*Trail* your steel pikes. *Shak.*—*Trail'd* his legs along. *Dryden.* 3. To draw a long floating or waving body.—He *trails* his pompous robe. *Pope.* 4. [*Treglen*, Dutch.] To draw; to drag.—They shall not *trail* me through the streets. *Milton.*

Thrice happy poet, who may *trail*
Thy house about thee like a snail. *Swift*

K k k (2) * **To**

(2.) * *To TRAIL. v. n.* To be drawn out in length.—

When his brother saw the red blood trail
Adown so fast. *Spenser.*
—*Trailing* hair. *Chapman.*—The flames pursued
the *trailing* smoke. *Dryden.*—

The blaze began to move,
And *trailing* vanished in th' Ideal grove. *Dryd.*
TRAILFLAT, a parish of Damfries-shire, united to that of Tinwald. See *TINWALD*.

(1.) * *TRAIN. n. f.* [*train*, Fr.] 1. Artifice; stratagem of enticement.—

He cast by treaty and by *trains*
Her to persuade. *Spenser.*
—To save his men from ambush and from *trains*.
Fairfax.—

This mov'd the king,
To lay to draw him in by any *train*. *Daniel.*
Swol'n with pride, into the snare I fell
Of fair fallacious looks, venerable *trains*. *Milton.*
Now to my charms

And to my wily *trains*. *Milton.*
—Others lay *trains* and pursue a game. *Temple.*
2. The tail of a bird.—While a man make his
train longer he makes his wings shorter. *Bacon.*—
The hinder grow too weak, and suffer the *train*
to fall. *Brown.*—The bird guideth her body with
her *train*. *Hakewill.*—

'Th' other, whose gay *train*
Adorns him. *Milton.*
The *train* reveals their flights. *Ray.* 3. The part
of a gown that falls behind upon the ground.—

Honour's *train*
Is longer than his fore skirts. *Shak.*
4. A series; a consecution: either local or mental.—Rivers now stream and draw their humid
train. *Milt.*—An easy and orderly *train*. *Locke.*—
Our ideas are always passing in *train*. *Locke.*—
They laboured in the *train* of what he said. *Locke.*—
A *train* of ideas. *Locke.*—*Train* of ill. *Addis.*
—A *train* of heavy sentiments. *Watts.* 5. Process; method; state of procedure.—If things
were once in this *train*. *Swift.* 6. A retinue; a
number of followers or attendants.—My *train* are
men of choice. *Shak.*—

Our fire walks forth, without more *train*
Accompany'd. *Milt.*
—Angels numberless, thy daily *train*. *Milt.*—He
comes not with a *train* to move our fear. *Dryden.*
—A lovely *train* of fellow nymphs. *Addison.*—Sins
which are in the *train* of war. *Smallridge.* 7. An
orderly company; a procession.—Fairest of stars,
last in the *train* of night. *Milton.*—

Who the knights ingreen, and what the *train*
Of ladies dress'd with daisies on the plain? *Dryd.*
8. The line of power reaching to the mine.—
Laying *trains* to fire the rabble. *Hudibras.*—He
that gives fire to the *train*. *L'Estrange.* 9. *TRAIN*
of artillery. Cannons accompanying an army.—
With an army abundantly supplied with a *train*
of artillery. *Clarendon.*

(2.) *TRAIN*, in geography, a river of the French
empire, in the department of the Dyle, and ci-
devant province of Austrian Brabant; which runs
into the Dyle, 3 miles S. of Louvain.

(3.) *TRAIN*, a town of Bavaria, on the Ambs;
5 miles S. of Abensperg, and 20 E. of Ingoldstadt.

(4.) *The TRAIN OF ARTILLERY* (§ 1. def. 10.)
includes the great guns and other pieces of or-
nance belonging to an army in the field.

* *To TRAIN. v. a.* [*trainer*, Fr.] 1. To draw
along.—

In hollow cube he *train'd*
His devilish engineering. *Milton.*
2. To draw; to entice; to invite; to allure.—
if but twelve French

Were there in arms, they would be as a call
To *train* ten thousand English to their side. *Shak.*
3. To draw by artifice or stratagem.—For that
cause I *train'd* thee to my house. *Shak.*—Ob *train*
me not, sweet mermaid, with thy note. *Shak.* 4.
To draw from act to act by persuasion or pro-
mise.—We did *train* him on. *Shak.* 5. To edu-
cate; to bring up; commonly with *up*.—I was
train'd up in the English court. *Shak.*—

His *training* such
That he may furnish and instruct great teachers.
Shak.

—A place for *training up* of youth. 2. *Mac.*—*Train*
them *up* in that trade. *Bacon.*—Spirits *train'd up*
in feast and song. *Milton.*—*Trained up* for glory.
Tillotson.—The young soldier is to be *trained on*
to the warfare of life. *Locke.* 6. To exercise, or
form to any practice by exercise.—Abram armed
his *trained* servants. *Gen.*—The warrior horse here
bred he's taught to *train*. *Dryden.*

TRAINA, a town of Sicily, in the valley of De-
monia, seated on the *TRAINA*, 50 miles SE. of
Cefalu, 22 W. of Mount Etna, and 20 SW. of
Messina. Lon. 14. 30. E. Lat. 37. 46. N.

* *TRAINBANDS. n. f.* [*train and bands*: 1. I op-
pose for *trained band*.] The militia; the part of
a community trained to martial exercise.—The
trainbands consisted of the most substantial house-
holders. *Clarendon.*—Let him raise the *trainbands*
of the city. *Dryden.*—The *trainbands* fled first.
Addison.

* *TRAINEER. n. f.* [from *train* and *bearer*.]
One who holds up a train.

TRAINEL, a town of France in the depart-
ment of the Aube; 6 miles S. of Nugent, and 27
W. of Troyes.

(1.) * *TRAINOIL. n. f.* [*train* and *oil*.] Oil
drawn by coction from the fat of the whale.

(2.) *TRAINOIL*, the oil procured from the blub-
ber of a whale by boiling.

* *TRAINY. adj.* [from *train*.] Belonging to
train oil. A bad word.—The huge hogheads
sweat with *trainy* oil. *Gay.*

* *To TRAIPE. v. a.* A low word. See
TRAPE.] To walk in a careless or fluttish man-
ner.—Two slip shod mules *traipe* alone. *Pope.*

(1.) * *TRAIT. n. f.* [*trait*, Fr.] A stroke; a
touch. Scarce English.—By this single *trait*
Homer marks an essential difference between the
Iliad and Odyssey. *Brown.*

(2.) *TRAIT*, in geography, a town of European
Turkey in Romania, on the Mariza, 12 miles
SW. of Philippopoli.

(1.) * *TRAITOR. n. f.* [*traître*, Fr. *traditor*,
Lat.] One who being trusted betrays.—The law
laid grievous punishment upon *traitors*. *Spenser.*
You are a great *traitor* to him. *Bacon.*—He should
be secured as a *traitor*. *Dryden.*—There is no dis-
tinction

ference whether a man calls me *traitor* in one word, or says I am one hired to betray my religion. *Swift*.

(2.) **TRAITOR'S ISLAND**, one of the Archipelago called **NAVIGATOR'S ISLANDS**, in the South Sea.

* **TRAITORLY**. *adj.* [from *traitor*.] Treacherous; perfidious.—*These traitorly rascals miseries.* *Shak.*

* **TRAITOROUS**. *adj.* [from *traitor*.] Treacherous; perfidious; faithless.—*Trait'rous wight.* *Daniel*.—*Traitorous terms.* *B. Jonf.*—*The traitorous or treacherous have misled others.* *Bacon*.—*Traitorous subjects.* *Addison*.

* **TRAITOROUSLY**. *adv.* [from *traitorous*.] In a manner suiting traitors; perfidiously; treacherously.—*Good duke Humphry traitorously is murder'd.* *Shak.*—*Me traitorously hast betray'd.* *Donne*.—*They had traitorously endeavoured to subvert the laws.* *Clarendon*.

* **TRAITRESS**. *n. f.* [from *traiter*.] A woman who betrays.—*Traitress, restore my beauty and my charms.* *Dryden*.—*By the dire fury of a traitress wife.* *Pope*.

* **TRALATITIOUS**. *adj.* [from *translatius*, *Lat.*] Metaphorical; not literal.

* **TRALATITIOUSLY**. *adv.* [from *tralatitius*.] Metaphorically; not literally; not according to the first intention of the word.—*Language properly is that of the tongue directed to the ear by speaking; written language is tralatitiously so called.* *Holder*.

(1.) **TRALEE**, a town of Ireland, in Kerry county, seated on a rivulet, that runs into the bay (N^o 2.) near a mineral spring; 45 miles NW. of Cork, and 30 SW. of Limerick. Lon. 9. 35. W. Lat. 52. 16. N.

(2.) **TRALEE BAY**, a spacious bay of Ireland, on the coast of Kerry, 9 miles long and 6 broad.

* **To TRALINEATE**. *v. n.* [*trans* and *line*.] To deviate from any direction.—*If you tralineate from your father's mind.* *Dryden*.

TRALLEBORG, a sea-port town of Sweden, in Skone, near the coast of the Baltic, 19 miles S. of Lund. Lon. 13. 5. E. Lat. 55. 20. N.

(1.) **TRALLES**, an ancient town of Lydia. (*Liv.* 37. c. 45. *Juv.* iii. 70.) It is now called **SULTAN-HISER**.

(2.) **TRALLES**, an ancient people of Illyricum.

TRALLIAN, Alexander, a Greek writer on physic, a native of Tralles in Lydia, who lived about the middle of the 6th century. He was the first who opened the jugular vein, and used cantharides as a blister for the gout.

TRA-LOS-MONTES, a province of Portugal, called in Latin **TRANSMONTANA**, because situated on the E. side of a chain of hills that separate it from Entre Duero e Minho. It is bounded on the N. by Galicia; on the S. by Beira and Leon; by the last of which it is bounded also on the E. Its length from N. to S. is upwards of 120 miles, and its breadth about 80. It is full of mountains, and produces little corn, but plenty of vines, fruits of several sorts, and abundance of game.

TRAMACASTREL, a town of Spain, in Aragon; 12 miles SSE. of Albarasin.

TRAMANDY, a town of Brasil, in the province of Rio Janeiro.

TRAMAYE, a town of France, in the dep. of the Saone and Loire; 7½ miles S. of Cluny, and 9. W. of Maçon.

TRAMIN, a town of the Tirolese, seated on a rivulet which runs into the Adige; 8 miles SSW. of Bolzano. It was taken by the French, with 600 prisoners and two cannons, March 22, 1797.

(1.) * **TRAMMEL**. *n. f.* [*tramail*, *Fr.* *trama*, *trugula*, *Lat.*] 1. A net in which birds or fish are caught.—*The trammel differeth not much from the shape of the bunt.* *Carew*. 2. Any kind of net.

Her golden locks the roundly did unty

In braided *trammels*. *Spenser*.

3. A kind of shackles in which horses are taught to pace.—*I was never before walked in trammels.* *Dryden's Spanish Fryar*.

(2.) **TRAMMELS**, in mechanics, are also an instrument used by artificers for drawing ovals upon boards, &c. One part of it consists of a cross with two grooves at right angles; the other is a beam carrying two pins, which slide in those grooves, and also the describing pencil.

* **To TRAMMEL**. *v. a.* [from the noun.] To catch; to intercept.—

If th' assassination
Could *trammel* up the consequence. *Shak.*

TRAMMONEI, a town of the French empire, in the dep. of Mont Blanc, and late duchy of Savoy; 14 miles W. of Chambéry.

(1.) * **To TRAMPLE**. *v. a.* [*trampo*, *Danish*.] To tread under foot with pride, contempt, or elevation.—*Cast not your pearls before swine, lest they trample them under their feet.* *Matt.* vii. 6.—*My strength shall trample thee as mire.*

Milton.

(2.) * **To TRAMPLE**. *v. n.* 1. To tread in contempt.—*Diogenes trampled on Plato's pride.* *Gore of the Tongue*.—*I trample on their ignominious altars.* *Rowe*. 2. To tread quickly and loudly.—*Trampling feet that shake the solid ground.* *Dryd.*

* **TRAMPLER**. *n. f.* [from *trample*.] One that tramples.

TRAMUTULO, a town of Naples, in the prov. of Basilicata; 13 miles SSE. of Potenza.

* **TRANATION**. *n. f.* [*trano*, *Latin*.] The act of swimming over.

TRANCAULT, a town of France, in the dep. of the Aube; 9 miles S. of Nogent.

* **TRANCE**. *n. f.* [*transse*, *Fr.* *transitus*, *Latin*. It might therefore be written *transse*.] An extasy; a state in which the soul is rapt into visions of future or distant things; a temporary absence of the soul from the body. See **TRANCE**.—*In a trance of musing.* *Sidney*.—*My soul was ravish'd quite as in a trance.* *Spenser*.—*Rais'd the mountains from their trance.* *Drayt*.—*Abstract as in a trance.* *Milt.*—*Shook from his tender trance.* *Thomson*.

* **TRANCED**. *adj.* [from *trance*.] Lying in a trance or extasy.—*There I left him tranc'd.* *Shak.*

TRANCHIN, a handsome city of Upper Hungary, the capital of a county so named. It is seated on the Wagg, over which it has a wooden bridge. It has a castle built so high on a rock, that it is seen 30 miles off. It has also two warm baths, and several mineral springs. It is 50 miles NE. of Presburg. Lon. 17. 50. E. Lat. 49. 56. N.

TRANCON, an ancient town of Portugal, in the prov. of Tra-los-montes; with a handsome

castle

Kkkz

castle, seated in a fertile district; 24 miles from Pinnel. Lon. 7. 6. E. Lat. 40. 44. N.

TRANCOSO, a town of Portugal, in the prov. of Tra-os-montes, 9 miles W. of Pinnel. In the 12th century it was besieged by Alboacan, the Moorish king of Badajoz; but without success, he being defeated by king Alphonfus.

TRANE, a town of Sweden, in Skone; 9 miles W. of Christianstadt.

TRANEMO, a town of Sweden, in W. Gothland, 46 miles ESE. of Gottenburg.

(1.) TRANENT, a parish of Scotland, in East Lothian; 6 miles long and 3 broad, along the coast of the Frith of Forth. The surface is level, and except a small extent of sandy links, and 100 acres of common, the rest is all cultivated and produces very fertile crops of all the usual grain. The coast is level and sandy; except a part that is rocky, where the villages of PORT SETON and COCKENZIE are built. The coast abounds with beds of oysters, which, however, have been much exhausted. A manufacture of salt is carried on at the villages to a great extent, and there has been for many years a great distillery of Scottish spirits carried on at St Clement's Wells. The parish abounds with coal mines, which are wrought to a great extent at 3 different coaleries. The population, in 1791, was 2732; and had increased 273 since 1755. The most ancient edifice is *St Germans*, the seat of David Anderson, Esq. where an hospital of the Knights of St John of Jerusalem was founded in 1296.

(2.) TRANENT, a town in the above parish, pleasantly situated on the great E. road from Edinburgh to London; 8 miles from the metropolis. It is neatly built, and in a healthy climate. The church is an ancient Gothic building with a square tower for a steeple.

TRANGARDE, a town of Hindoostan, in Calicut; 8 miles NE. of Paniany.

* TRANGRAM. *n. f.* [A cant word.] An odd intricately contrived thing.—*Trangrams* and ginn-cracks? *Arbutnot.*

TRANI, a handsome and populous town of Naples, with a castle, a harbour, and archbishop's see; seated on the coast of the Adriatic; 10 miles W. of Barri, and 125 NE. of Naples. Lon. 16. 36. E. Lat. 41. 18. N.

* TRANNEL. *n. f.* A sharp pin. Perhaps from *tranel*—A small trannel of iron. *Moxon.*

TRANQUEBAR, a sea port town of Hindoostan, on the coast of Coromandel; with a harbour, fort, and factory; belonging to Denmark. It is seated at the mouth of the Cauvery; 165 miles S. of Madras. Lon. 79. 57. E. Lat. 10. 14. N.

* TRANQUIL. *adj.* [tranquille, Fr. *tranquillus*, Latin.] Quiet; peaceful; undisturbed.—

Farewell the tranquil mind. *Shak.*

* TRANQUILLITY. *n. f.* [tranquillitas, Lat. *tranquillitas*, Fr.] Quiet; peace of mind; peace of condition; freedom from perturbation.—Dying souls *tranquillity*. *Spenser*.—Looking *tranquillity*. *Congr.*—Passing from one stage of life to another with so much *tranquillity*. *Pope.*

TRANQUILLO, a cape at the S. end of the island of Raoué. Lon. 45. 14. E. Ferro. Lat. 36. 2. N.

TRANQUILLUS. See SUTTONIUS.

(1.) TRANS, [Lat.] a Latin preposition, signifying *beyond* or *on the farther side*; makes part of many English words, conveying some idea of that kind, either local or metaphorical. It also made part of the ancient names of many countries, distant from Rome, and opposed *Cis*, on this side; as *Transalpine*, beyond the Alps; *Transpadane*, beyond the Po, &c.

(2.) TRANS, in geography, a town of France, in the dep. of the Ille and Vilaine; 6 miles SE. of Dole, and 4½ NW. of Antrain.

TRANSACEO, a town of Naples, in Abruzzo Ultra; 8 miles S. of Celano.

* To TRANSACT. *v. a.* [*transactus*, Latin.] 1. To manage; to negotiate; to conduct a treaty or affairs. 2. To perform; to do; to carry on.—Particulars which were *transacted* amongst some few only. *Addison.*

(1.) * TRANSACTION. *n. f.* [*transactio*, Fr. from *transact.*] Negotiation; dealing between man and man; management; affairs; things managed.—The particular *transactions* of this treaty. *Clarendon.*

(2.) TRANSACTIONS, a name generally given to a collection of the papers read before literary or philosophical societies. The name of *Philosophical Transactions* was first adopted by the Royal Society of London. See SOCIETY, Part II. *Sec. II. § 1.*

TRANSALPINA GALLIA. See GALLIA, No 7.

TRANSALPINE, *adj.* [*trans* and *Alpes*.] Beyond the Alps.

* TRANSANIMATION. *n. f.* [*trans* and *anima*.] Conveyance of the soul from one body to another.—The *transanimation* of Pythagoras was, that the souls of men transmigrated into species answering their former nature. *Brown.*

TRANSARART, a town of Algiers, near the coast of the Mediterranean; on the Gulf of Immisca; 30 miles SW. of Oran.

TRANSATLANTIC, *adj.* [*trans* and *Atlantic*.] Beyond the Atlantic Ocean; a term applied to America in respect of Europe.

(1.) * To TRANSCEND. *v. a.* [*transcendo*, Lat.] 1. To pass; to overpass.—*Transcend* their limits. *Bacon*.—She must herself *transcend*. *Davies*. 2. To surpass; to outgo; to exceed; to excel.—This glorious piece *transcends* what he could think. *Waller*.—What they act *transcends* what they command. *Dryden*.—Her worth *transcended* all her kind. *Dryd.* 3. To surmount; to rise above.—Meteorological impressions not *transcending* the upper region. *Howell*.

(2.) To TRANSCEND. *v. n.* 1. To climb. Not in use.—They *transcend* from one unto another. *Brown*. 2. To surpass thought.—The confidence of grace and free will is no such *transcending* mystery. *Hammond*.

* TRANSCENDENCE. } *n. f.* [from *transcend.*] 1. Excellence; unusual excellence; supereminence. 2. Exaggeration; elevation beyond truth.—In poetry *transcendencies* are more allowed. *Bacon's Essays*.

* TRANSCENDENT. *adj.* [*transcendens*, Lat. *transcendent*, Fr.] Excellent; supremely excellent; passing others.—The eminent and *transcendent* honour of the day. *White*.—*Transcendens* worth. *Croshaw*.—*Transcendent* nature. *Bp. Sanderson*.—*Trans-*

Transcendent brightness. Milton.—Oh *transcendent* maid! *A. Philips*.—The right of our Creator is of a high and *transcendent* nature. *Rogers*.

(1.) * **TRANSCENDENTAL**. *adj.* [*transcendentalis*, low Lat.] 1. General; pervading many particulars. 2. Supereminent; passing others.—The Deity must have a perfect and *transcendental* perception of all things. *Grew's Cosmol.*

(2.) **TRANSCENDENTAL CURVES**, and } terms
(3.) **TRANSCENDENTAL EQUATIONS**; } used
by *LEIBNITZ* and his followers, for the illustration
of the mechanical cuive. See **MECHANICAL**, § 4.

* **TRANSCENDENTLY**. *adv.* [from *transcendent*.] Excellently; supereminently.—Eminently
and *transcendently*. *South*.

* **To TRANSCULATE**. *v. a.* [*trans* and *colo*, Latin.] To strain through a sieve or colander; to suffer to pass, as through a strainer.—To imbibe and *transculate*. *Harvey*.

* **To TRANSCRIBE**. *v. a.* [*transcribo*, Latin; *transcribere*, Fr.] To copy; to write from an exemplar.—Others did but *transcribe* copies. *Clarend.*—They do but *transcribe* his folly. *Decay of Piety*.—We *transcribe* their faults. *Rogers*.

* **TRANSCRIBER**. *n. s.* [from *transcribe*.] A copier; one who writes from a copy.—Copiers and *transcribers*. *Addison*.—Writings have been corrupted by unskilful *transcribers*. *Waterland*.

(1.) * **TRANSCRIPT**. *n. s.* [*transcript*, French; *transcriptum*, Latin.] A copy; any thing written from an original.—The Grecian learning was but a *transcript* of the Chaldean and Egyptian. *Glanv.*—The decalogue was but a *transcript*. *South*.

(2.) **TRANSCRIPT** denotes particularly a copy of an act or instrument inserted in the body of another.

* **TRANSCRIPTION**. *n. s.* [*transcription*, Fr. from *transcriptus*, Lat.] The act of copying.—The practice of *transcription* in our days was no monster in their's. *Brown*.—Corruptions have crept in by many *transcriptions*. *Brerewood*.

* **TRANSCRIPTIVE**, *adj.* belonging to transcription.

* **TRANSCRIPTIVELY**. *adv.* [from *transcript*.] In manner of a copy.—*Transcriptively* subscribing to other men's endeavours. *Brown*.

* **To TRANSCUR**. *v. n.* [*transcurro*, Lat.] To run or rove to and fro.—The mind doth spaciately and *transcur*. *Bacon*.

* **TRANSCURSION**. *n. s.* [from *transcursum*, Lat.] Ramble; passage through; passage beyond certain limits; extraordinary deviation.—The sense and the affects of any one part of the body instantly make a *transcurSION* through the whole. *Bacon*.—I have briefly run over *transcurSIONS*. *Wotton*.—His philosophy gives them *transcurSIONS* beyond the vortex we breathe in. *Glanville*.—*TranscurSIONS* into the neighbouring forests. *Howel*.—The *transcurSIONS* of comets. *More*.

* **TRANSE**. *n. s.* [*transe*, Fr. See **TRANCE**.] A temporary absence of the soul; an ecstasy.—Abstract as in a *transe*. *Milton*.

* **TRANSELEMENTATION**. *n. s.* [*trans* and *element*.] Change of one element into another.—Rain we allow, but no other *transelementation*. *Burnet*.

TRANSEXION. *n. s.* [*trans* and *sexus*, Latin.]

Change from one sex to another.—It much impeacheth the iterated *transexion* of hares, if it be true, that transmutation of sexes was only so in opinion. *Brown*.

* **TRANSFER**. *n. s.* A change of property; a delivery of property to another.

* **To TRANSFER**. *v. a.* [*transferer*, Fr. *transfere*, Lat.] 1. To convey; to make over from one to another; with *to*, sometimes with *upon*.—He *transfers* the laws of the Lacedemonians to the people of Athens. *Spenser*.—I was well pleased to have *transferred* my right. *Dryd.*—To the Grecian chiefs *transferr'd* the cause. *Dryden*.—They *transferred* all the honour of it upon themselves. *Atterbury*.—*Transfer* the power and set the people free. *Prior*.—By reading we *transfer* to ourselves the knowledge and improvements of the most learned men. *Watts*. 2. To remove; to transport.—He could not with safety *transfer* his own person. *Bacon*.—Then from Lavinium shall the seat *transfer*. *Dryden*.

* **TRANSFERRER**. *n. s.* He that transfers.

* **TRANSFIGURATION**. *n. s.* [*transfiguration*, 1. Change of form.—In caterpillars there is a visible and triple *transfiguration*. *Brown*. 2. The miraculous change of our blessed Saviour's appearance on the mount.—The *transfiguration* and the agony in the garden. *Addison*.—Are Raphael's works *transfigurations* all? *Blackmore*.

* **To TRANSFIGURE**. *v. a.* [*transfigurer*, Fr. *trans* and *figura*, Lat.] To transform; to change with respect to outward appearance.—I am zealous to *transfigure* your love into devotion. *Boyle*.—*Transfigur'd* friends. *Garth*.

* **To TRANSFIX**. *v. a.* [*transfixus*, Lat.] To pierce through.—

The bold Semiramis, whose sides *transfix'd*
With son's own blade. *Spenser*.
Transfix us to the bottom of this gulph. *Milt.*
In an unhappy chace *transfix'd* her heart. *Dryd.*
He *transfix'd* the pigeon in the skies. *Dryden*.
Till Fate *transfix* the pair it cannot part. *Fenton*.

(1.) * **To TRANSFORM**. *v. a.* [*transformer*, French; *trans* and *forma*, Lat.] To metamorphose; to change with regard to external form.—Had the goddess of those woods a power to *transform* every body. *Sidney*.—*Transformed* to a boy. *Shak.*—She saw herself *transform'd* she wist not how. *Davies*.

(2.) * **To TRANSFORM**. *v. n.* To be metamorphosed. His hair *transforms* to down. *Addison*.

(1.) * **TRANSFORMATION**. *n. s.* [from *transform*.] Change of shape; act of changing the form; state of being changed with regard to form; metamorphosis.—

Something you have heard
Of Hamlet's *transformation*; so I call it,
Since not th' exterior, nor the inward man,
Remembers that it was. *Shak.*
What beast could'st thou be, that wert not
subject to a beast?

And what a beast art thou already, and seest
not thy loss in *transformation*! *Shak.*
—The mensuration of all manner of curves, and
their mutual *transformation*. *Watts*.

(2.) **TRANSFORMATION**, in geometry, is the changing or reducing of a figure, or of a body,
into

into another of the same area, or of the same solidity, but of a different form. As, to transform or reduce a triangle to a square, or a pyramid to a parallelopipedon.

(3.) TRANSFORMATION OF EQUATIONS, in algebra, is the changing equations into others of a different form, but of equal value. This operation is often necessary to prepare equations for a more easy solution.

* TRANSFRETATION. *n. s.* [*trans* and *fretum*, Lat.] Passage over the sea.—The last *transfretation* of king Richard II. *Davies.*

* To TRANSFUSE. *v. a.* [*transfusus*, Latin.] To pour out of one into another.—Man hath a natural delight to *transfuse* from himself into others those things wherein the excellency of this kind doth most consist. *Hooker.*—*Transfus'd* on thee his ample spirit rests. *Milton.*

When did his muse from Fletcher scenes purloin,

Transfus'd as oil and waters flow. *Dryden.*
—Were all the unfound juices taken away and found juices *transfus'd*, the found juices would grow morbid. *Arbutnot.*

(1.) * TRANSFUSION. *n. s.* [*transfusio*, Fr. *transfusio*, Lat.] The act of pouring out of one into another.—Poetry is of so subtle a spirit, that in the pouring out of one language into another it will all evaporate, if a new spirit be not added in the *transfusion*. *Denham.*—Something must be lost in all *transfusion*. *Dryden.*—Transplantation of diseases and *transfusion* of blood. *Baker.*

(2.) TRANSFUSION OF BLOOD, an operation by which the blood of one animal was conveyed into the veins of another, and by which it was some time ago imagined the age of animals would be renewed, and *immortality*, or the next thing to it, conferred on those who had undergone it. In the *Philos. Trans.* we have an account of the success of various transfusions practised at London, Paris, Italy, &c. Sir Edmund King transfused 49 oz. of blood out of a calf into a sheep; the sheep, after the operation, appearing as well and as strong as before. M. Denis transfused the blood of 3 calves into 3 dogs, which all continued brisk, and eat as well as before. The same person transfused the blood of 4 weathers into a horse 26 years old, which thence received much strength, and a more than ordinary appetite. Soon after this operation was introduced at Paris, viz. in 1667 and 1668, M. Denis performed it on 5 human subjects, two of whom recovered of disorders under which they laboured; one, being in perfect health suffered no inconvenience from it; and two persons who were ill, and submitted to the operation, died; in consequence of which the magistrates issued a sentence, prohibiting the transfusion of human bodies under pain of imprisonment. Mr John Hunter made many ingenious experiments to determine the effects of transfusing blood, some of which are sufficient to attract attention. But whether such experiments can ever be made with safety on the human body, is a point not easily determined. They might be allowed in desperate cases, proceeding from a corruption of the blood, from poison, &c. as in hydrophobia.

(1.) * To TRANSGRESS. *v. a.* [*transgresser*, Fr. *transgressus*, Lat.] 1. To pass over; to pass be-

yond.—*Transgressing* nature's law. *Dryd.* 2. To violate; to break.—The world is ruled by so good a guide as *transgresseth* not his own law. *Hooker.*—As often as we *transgress* the divine commandments. *Wake.*

(2.) * To TRANSGRESS. *v. n.* To offend by violating a law.—I would not marry her, though she were endowed with all Adam had left him before he *transgressed*. *Shak.*—Achan *transgressed* in the thing accursed. 1 *Chron.* iii. 7.—He objected to our infamy the *transgressings* of our education. *Wisdom.*

* TRANSGRESSION. *n. s.* [*transgression*, Fr. from *transgress*.] 1. Violation of a law; breach of a command.—My great *transgression*. *Milton.*—Where there is no law, there can be no *transgression*. *South.* 2. Offence; crime; fault.—The *transgression* is in the stealer. *Shak.*—Rude *transgression*. *Shak.*

* TRANSGRESSIVE. *adj.* [from *transgress*.] Faulty; culpable; apt to break laws.—*Transgressive* infirmities. *Brown.*

* TRANSGRESSOR. *n. s.* [*transgressor*, Fr. from *transgress*.] Lawbreaker; violator of command; offender.—Discipline should be applied to the most splendid *transgressors*, as well as to meaner offenders. *Glarendon.*

I go to judge

On earth these thy *transgressors*. *Milton.*
—To me *transgressor*. *Milton.*

* TRANSCIENT. *adj.* [*transiens*, Latin.] Soon past; soon passing; short; momentary; not lasting; not durable.—This *transient* world. *Milton.*—A *transient* view. *Locke.*—A *transient* guest. *Swift.*—What is loose love? a *transient* gust. *Pope.*

* TRANSCIENTLY. *adv.* [from *transient*.] In passage; with a short passage; not with continuance.—I touch here but *transiently*. *Dryden.*

* TRANSCIENTNESS. *n. s.* [from *transient*.] Shortness of continuance; speedy passage.—They resemble the wind in *transcieness* and sudden expiration. *Decay of Piety.*

* TRANSILIENCY. *n. s.* [from *transilio*, Lat.] Leap from thing to thing.—By unadvised *transiliency* leaping from the effect to its remotest cause. *Glanville.*

(1.) * TRANSIT. *n. s.* [*transitus*, Latin.] In astronomy, the passing of any planet just by or under any fixed star; or of the moon covering or moving close by any other planet. *Harris.*

(2.) TRANSIT INSTRUMENT. See ASTRONOMY, Index.

(3.) TRANSIT OF MERCURY. On Tuesday the 9th Nov. 1802, astronomers were gratified with the sight of a transit of Mercury over the Sun's disk.

The ingress was at 6 16 o A. M. apparent at Edinburgh.

Geocentric Latitude, 0 1 28 S.
Middle of the transit, 9 1 30
Geocentric Latitude, 0 1 0
Egress, 11 47 0
Geocentric Latitude, 0 3 16 N.
By M. La Lande's computation the apparent time of conjunction at Edinburgh was 8 57 17

the aberration of the Sun and Moon being reckoned.

Geocentric

Transferring.—The *translatory* is a lie that transfers the merits of a man's good action to another. *Arbutnot.*

* **TRANSLLOCATION.** *n. f.* [*trans* and *locus*, Latin.] Removal of things reciprocally to each other's places.—There happened certain *translocations* at the deluge, the matter constituting animal and vegetable substances being dissolved, and mineral matter substituted in its place. *Woodw.*

* **TRANSLUCENCY.** *n. f.* [*from translucent.*] Diaphanous; transparency.—They exchanged their *translucency* for whiteness. *Boyle.*

* **TRANSLUCENT.** } *adj.* [*trans* and *lucens* or

* **TRANSLUCID.** } *lucidus*, Latin.] Transparent; diaphanous; clear; giving a passage to the light.—The eyes are *translucid*. *Bacon.*—The eastern ray, *translucent*, pure. *Milton.*—Replenish'd from the cool *translucent* springs. *Pope.*

* **TRANSMARINE.** *adj.* [*transmarinus*, Latin.] Lying on the other side of the sea; found beyond sea.—Tauraurania, her next *transmarine* neighbour. *Howel.*

* **To TRANSMEW.** *v. a.* [*transmuto*, Latin; *transmuo*, Fr.] To transmute; to transform; to metamorphose; to change. Obsolete.—Men into stones therewith he could *transmew*. *Spenser.*

* **TRANSMIGRANT.** *adj.* [*transmigrans*, Latin.] Passing into another country or state.—Colonies or *transmigrants* towards their mother nation. *Bac.*

* **To TRANSMIGRATE.** *v. n.* [*transmigro*, Latin.] To pass from one place or country into another.—The natives which *transmigrate* omit it not without commixture. *Brown.*—If the souls of men *transmigrate* into species answering their former natures, some men must live over many serpents. *Brown.*—Their souls may *transmigrate* into each other. *Howel.*—His soul within the *transmigrating* roll. *Dryden.*

(1.) * **TRANSMIGRATION.** *n. f.* [*transmigration*, Fr. from *transmigrate*.] Passage from one place or state into another.—There is no transition or *transmigration* out of one substance into another. *Hooker.*—Plants may have a *transmigration* of species. *Bacon.*—The metempsychosis, or *transmigration* of the souls of men into the bodies of beasts. *Brown.*

'Twas taught by wife Pythagoras,

One soul might through more bodies pass:

Seeing such *transmigration* there,

She thought it not a fable here. *Denham.*

In life's next scene, if *transmigration* be,

Some bear or lion is reserv'd for thee. *Dryd.*

(2.) **TRANSMIGRATION**, in a large sense, is the removal or translation of a whole people into another country, by the power of a conqueror.

(3.) **TRANSMIGRATION** is particularly used for the passage of the soul out of one body into another. See **METEMPSYCHOSIS**, **MYTHOLOGY**, § 19. and **PYTHAGORAS**.

* **TRANSMISSION.** *n. s.* [*transmissio*, French; *transmissus*, Latin.] The act of sending from one place to another, or from one person to another.—If there were any *transmission* of a colony hither out of Spain. *Spens.*—Operations of *transmission* of spirits is one of the highest secrets in nature. *Bac.*—In the *transmission* of the water through the vessels, it falteth. *Bacon.*—These move swiftly, but their *transmission* is easily stopped. *Bacon.*—The

transmission of light. *More.*—Languages of countries are lost by *transmission* of colonies of a different language. *Hale.*—The *transmission* of the English laws into Scotland. *Hale.*—Reflexion or *transmission*. *Newton.*

* **TRANSMISSIVE.** *adj.* [*from transmissus*, Latin.] Transmitted; derived from one to another.

And still the fire inculcates to his son

Transmissive lessons of the king's renown. *Prior.*

Itself a fun; it with *transmissive* light

Enlivens worlds deny'd to human sight. *Prior.*

His praise eternal on the faithful stone,

Had with *transmissive* honour grac'd his son.

Pope.

* **To TRANSMIT.** *v. a.* [*transmitto*, Latin. *transmettre*, French.] To send from one person or place to another.—By writing, former ages *transmit* the memorials of ancient times to posterity. *Hale.*—He sent orders to his friend to *transmit* the money. *Addison.*—*Transmitted* safe in Dryden's lofty scenes. *Granville.*—

Shine forth, ye planets, with distinguish'd light;

Again *transmit* your friendly beams to earth.

Prior.

* **TRANSMITTAL.** *n. f.* [*from transmitt.*] The act of transmitting; transmission. I know not that this word has any authority.—The *transmittal* to England of two-thirds of the revenues of Ireland. *Swift.*

* **TRANSMITTER.** *n. f.* [*from transmitt.*] One that transmits.

TRANSMONTANA. See **TRA-LOS-MONTES**.

TRANSMUTABILITY. *n. s.* capability of being changed. See **TRANSMUTATION**, § 3.

* **TRANSMUTABLE.** *adj.* [*transmutabile*, Fr. from *transmute*] Capable of change; possible to be changed into another nature or substance.—It is no easy matter to demonstrate that air is *transmutable* unto flesh. *Brown.*—The fluids and solids are easily *transmutable* into one another. *Arbutn.*

* **TRANSMUTABLY.** *adv.* [*from transmutare*.] With capacity of being changed into another substance or nature.

(1.) * **TRANSMUTATION.** *n. s.* [*transmutatio*, Fr. *transmutatio*, from *transmuto*, Latin.] 1. Change into another nature or substance. The great aim of alchemy is the transmutation of base metals into gold.—Am not I by education a card-maker, by *transmutation* a bear herd. *Shak.*—The *transmutation* of plants one into another. *Bacon.*—The conversion into a body merely new, is called *transmutation*. *Bacon.*—The changing of bodies into light and light into bodies, is very conformable to the course of nature, which seems delighted with *transmutations*. Water which is a very fluid tasteless salt, she changes by heat into vapour, which is a sort of air, and by cold into ice, which is a hard, pellucid, brittle, fusible stone; and this stone returns into water by heat, and water returns into vapour by cold. *Newton.*—The supposed change of worms into flies is no real *transmutation*. *Bentley.* 2. Successive change. Not proper.—The same land suffereth sundry *transmutations* of owners. *Bacon.*

(2.) **TRANSMUTATION OF ACIDS.** See **CHEMISTRY**, **Index**.

(3.) **TRANSMUTATION OF METALS**, in alchemy,

my, denotes the act of changing imperfect metals into gold or silver. This is also called the *grand operation*, and, they say, it is to be effected by the philosopher's stone. Alchemists suppose that all metals are composed of the same principles; and that the imperfect metals do not differ from gold and silver, but because their principles are not so well combined, or because they contain heterogeneous matters. We have then only these two faults to remedy, which, as they say, may be done by proper coction, and by separating the pure from the impure. But we would advise those making such experiments to determine previously, if metals have each a peculiar earth, or only one common to them all. In the second place, if it should be demonstrated that the earthy principle is the same in all metals, and if that be demonstrated as clearly as the identity of the inflammable principle in metals, they must then determine whether these two be the only principles in metals, whether the mercurial principle exists, and whether it be essential to all metals or to some only, and what is the proportion of these two or three principles in the several metallic substances. These facts must be ascertained previous to asserting the possibility of transmutation.

* **TO TRANSMUTE.** *v. n.* [*transmuta*, Latin; *transmu*, French.] To change from one nature or substance to another.—It was taught there how metals might be *transmuted*. *Ral.*—Metals *transmuted* one into another. *Ray*.

* **TRANSMUTER.** *n. f.* [from *transmute*.] One that transmutes.

(1.) * **TRANSOM.** *n. f.* [*transenna*, Lat. 1. Aihwart, beam or lintel over a door. 2. [Among mathematicians.] The vane of an instrument called a cross staff, being a piece of wood fixed across with a square socket upon which it slides. *Bailey*.

(2.) **TRANSOM**, among builders, denotes the piece that is framed across a double light window.

(3.) **TRANSOMS**, in a ship, certain beams or timbers extended across the sternpost of a ship, to fortify her afterpart, and give it the figure most suitable to the service for which she is calculated. See *SHIP-BUILDING*, Part II.

(1.) * **TRANSPARENCY.** *n. f.* [*transparence*, Fr. from *transparent*.] Clearness; diaphaneity; transference; power of transmitting light.—*Transparency* of the stream. *Addison*.—*Transparency* of the vessels occasioned by the thinness of their coats. *Arbutnot*.

(2.) **TRANSPARENCY**, in physics, a quality in certain bodies, whereby they give passage to the rays of light: in contradistinction to opacity, or that quality of bodies which renders them impervious to the rays of light. It has been generally supposed by philosophers, that transparent bodies have their pores disposed in straight lines, by which means the rays of light have an opportunity of penetrating them in all directions; but some experiments in electricity have made it apparent, that by the action of this fluid the most opaque bodies, such as sulphur, pitch, and sealing wax, may be rendered transparent as glass, while yet we cannot suppose the direction of their pores to be any way altered from what it originally was. (See *ELECTRICITY*, *Index*.) A curious instance of an increase of transparency we have in rubbing a

piece of white paper over one that has been written upon or printed; while the white paper is at rest, the writing or print will perhaps scarce appear through it; but when in motion, will be very easily legible, and continue so till the motion is discontinued.

* **TRANSPARENT.** *adj.* [*transparent*, French; *trans* and *appareo*, Latin.] Previous to the light; clear; pellucid; diaphanous; translucent; not opaque.—The *transparent* bosom of the deep. *Shak.*—Secret hearts and *transparent* countenances. *Bacon*.—*Transparent* veil. *Dryden*.—Her bosom appeared so *transparent*, that I saw every thought in her heart. *Addison*.—*Transparent* forms. *Pope*.

* **TRANSPICUOUS.** *adj.* [*trans* and *specio*, Latin.] Transparent; pervious to the sight.—The wide *transpicious* air. *Milton*.—The wine's *transpicious*. *Philips*.

* **TO TRANSPIERCE.** *v. n.* [*transpiercer*, Fr. *trance* and *pierce*.] To penetrate; to make way through; to permeate.—

A mind which wholly doth *transpierce*.

All this great body of the universe. *Raleigh*.—The sides *transpierced* returned a rattling sound. *Dryden*.

* **TRANSPIRATION.** *n. s.* [*transpiration*, Fr.] Emission in vapour.—That a bullet dipped in oil, by preventing the *transpiration* of air, will carry farther, I cannot discern. *Brown*.—*Transpiration* of obstructed fluids. *Sharp*.

(1.) * **TO TRANSPIRE.** *v. a.* [*transpiro*, Lat. *transpirer*, Fr.] To emit in vapour.

(2.) * **TO TRANSPIRE.** *v. n.* [*transpirer*, Fr.] 1. To be emitted by insensible vapour.—The nuts are full of a pulpy matter, which *transpires* and passes through the shell. *Woodward*. 2. To escape from secrecy to notice: a sense lately innovated from France, without necessity.

* **TO TRANSPLEASE.** *v. a.* [*trans* and *place*.] To remove; to put into a new place.—It was *transplaced* from the left side of the Vatican. *Wilkins*.

* **TO TRANSPLANT.** *v. a.* [*trans* and *planto*, Lat. *transplanter*, Fr.] 1. To remove and plant in a new place.—

The noblest fruits *transplanted* in our isle,
With early hope and fragrant blossoms smile.

Roscommon.

—This apple to *transplant*. *Phillips*. 2. To remove and settle.—They *transplant* themselves into plantations abroad. *Bacon*. 3. To remove.—*Transplanted* from her cloudy throne. *Milton*.—*Transplanted* out of his diocese of Saint David's into a warmer climate. *Clarendon*.

* **TRANSPLANTATION.** *n. s.* [*transplantation*, Fr.] 1. The act of transplanting or removing to another soil.—Love needs no *transplantation*, or change of soil, to make it fruitful. *Suchling*. 2. Conveyance from one to another.—*Transplantation* of diseases, and transfusion of blood. *Bulter*. 3. Removal of men from one country to another.—Most kingdoms have felt the calamities of forcible *transplantations*. *Raleigh*.—*Transplantation* of Ulysses to Sparta. *Broomer*.

(1.) * **TRANSPLANTER.** *n. s.* [from *transplant*.] One that transplants.

(2.) **TRANSPLANTER**, an instrument calculated for expeditiously raising plants with their roots,

and confining them to other parts of the field in which they grow. Notwithstanding every precaution, it frequently happens in turnip fields that large spots remain barren. In *Pl. CCCXXXIX.* we have given a representation of a simple instrument invented by Mr Gray of South Reppe, Norfolk, for the purpose of filling up such vacant spaces from the adjoining parts of the same field; and which has also been employed for transplanting other vegetables. The handle A, must be held with the left hand; and the short handle B, drawn up with the right. The transplanter should next be put over the vegetable intended to be taken up, and forced into the ground with the foot: it is then to be twisted round, and carefully drawn up, so that the earth may adhere to the root. A hole should, in the mean time, be made by an assistant, furnished with a similar instrument, for the reception of the turnip; the root may be converted in the first transplanter, and deposited in the cavity; after which, the right hand being kept steady, the left must be gradually raised, when the earth and plant will be left in the hole undisturbed.

* **TRANSPORT.** *n. s.* [*transport*, Fr. from the verb.] 1. Transportation; carriage; conveyance.—Ships for transport and war. *Arbutnot.* 2. A vessel of carriage; particularly a vessel in which soldiers are conveyed.—Nor dares his transport vessel cross the waves. *Dryden.*—Some spoke of the men of war only, and others added the transports. *Arbutnot.* 3. Rapture; ecstacy.—A spiritual mind received a temporal blessing with ecstacy and transport. *South.* 4. A felon sentenced to exile.

* **To TRANSPORT.** *v. a.* [*trans* and *porto*, Latin; *transporter*, French.] 1. To convey by carriage from place to place.—I came hither to transport the tidings. *Shak.*—Transport her purposes by word! *Shak.*—Rivers were made to transport men. *Raleigh.*—A subterranean wind transports a hill. *Milton.*—Cæsar was fain to make ships to transport his army. *Heyl.*—The wife Pomponious transported all the wisdom of his country into the sanctuary of peace. *Dryden.* 2. To carry into banishment, as a felon.—We return after being transported. *Swift.* 3. To sentence as a felon to banishment. 4. To hurry by violence of passion.—You are transported by calamity. *Shak.*—They laugh as if transported with some fit. *Milton.*—Transported by sudden passion. *Dryden.*—If his romantick disposition transport him so far. *Swift.* 5. To put into ecstacy; to ravish with pleasure.—Here transported I behold, transported touch. *Milt.*—Those on whom Christ bestowed miraculous cures were transported with them. *Decay of Piety.*

* **TRANSPORTANCE.** *n. s.* [from *transport*.] Conveyance; carriage; removal.—Oh, give me swift transportance to those fields. *Shak.*

(1.) * **TRANSPORTATION.** *n. s.* [from *transport*.] 1. Conveyance; carriage.—Provide a vessel for the transportation. *Wotton.* 2. Transmission or conveyance.—Some were solicitous to know whether we had the plague, from the malignity of our own air, or by transportation. *Dryden.* 3. Banishment for felony. 4. Ecstacy violence of passion.—All pleasures that affect the body must

needs weary, because they transport, and all transportation is a violence. *South.*

(2) **TRANSPORTATION**, in law. See **BANISHMENT**, and **EXILE**.

* **TRANSPORTER.** *n. s.* [from *transport*.] One that transports.—The pilchard merchant may reap benefit by selling to the transporters. *Carver.*

* **TRANSPOSAL.** *n. s.* [from *transpose*.] The act of putting things in each other's place. *Swift.*

* **To TRANSPOSE.** *v. a.* [*transposer*, French; *transpositum*, Latin.] 1. To put each in the place of other.—The letters of Elizabetha regina may be transposed thus, *Anglia Hera bedisti. Camden.*—Transpose the propositions. *Locke.* 2. To put out of place.—

That which you are my thoughts cannot transpose;

Angels are bright still, though the brightest fell. *Shak.*

(1.) * **TRANSPPOSITION.** *n. s.* [*transposition*, Fr. from *transpose*.] 1. The act of putting one thing in the place of another. 2. The state of being put out of one place into another.—The common centre of gravity is ready, and not liable to any accidental transposition. *Woodward.*

(2.) **TRANSPPOSITION**, in grammar, a disturbing or dislocating the words of a sentence, or a changing their natural order of construction, to please the ear by rendering the contexture more smooth, easy, and harmonious.

* **To TRANS-SHAPE.** *v. a.* [*trans* and *shape*.] To transform; to bring into another shape.—I said thou hadst a fine wit; right, said she, a fine little one; thus did she trans-shape thy particular virtues. *Shak.*

TRANS-TIBERINA, a part of the city of ROME, on the farther side of the TIBER. Mount Vatican was in that part of the city. *Mart.* 1. ep. 109.

* **To TRANSUBSTANTIATE.** *v. a.* [*transubstantier*, Fr.] To change to another substance.—The spider love which transubstantiates all. *Donne.*

(1.) * **TRANSUBSTANTIATION.** *n. s.* [*transubstantiation*, Fr.] A miraculous operation believed in the Romish church, in which the elements of the eucharist are supposed to be changed into the real body and blood of CHRIST.—How is a Romanist prepared easily to swallow the doctrine of transubstantiation? *Locke.*

(2.) **TRANSUBSTANTIATION**, in theology, is the conversion or change of the substance of the bread and wine in the eucharist, into the body and blood of Jesus Christ; which the Romish church suppose to be wrought by the consecration of the priest. It is known to all our readers that this doctrine of transubstantiation was one cause of the breach between the church of Rome and those various societies which call themselves reformed churches. The real and substantial change of the bread and wine into the body and blood of our Lord, is rejected by every reformer as a change contradictory and impossible, and fraught with the most impious consequences; and volumes have been written by protestants to expose the weakness of those arguments which have so often been urged in its support.

* **TRANSUDATION.** *n. s.* [from *transude*.] The

The act of passing in sweat, or perspirable vapour, through any integument.—The drops proceeded not from the *transudation* of the liquors within the glass. *Boyle*.

* *To TRANSUDE*. *v. n.* [*trans* and *sudo*, Lat.] To pass through in vapour.—Purulent fumes cannot *transude* through the bag of an apothem. *Harvey*.

* *TRANSVERSAL*. *adj.* [*transversal*, Fr. *trans* and *versalis*, Lat.] Running crosswise.—An ascending line, direct, as from son to father, is not admitted by the law of England; or in the *transversal* line, as to the uncle or aunt. *Hale*.

TRANSVERSALIS, in anatomy, a name given to several muscles. See *ANATOMY*.

* *TRANSVERSALLY*. *adv.* [from *transversal*.] In a cross direction.—An arrow shot vertically, horizontally, or *transversally*. *Wilkins*.

(1.) * *TRANSVERSE*. *adj.* [*transversus*, Lat.] Being in a cross direction.—

His violent touch

Fled and pursu'd *transverse* the resonant fugue.

Milton.

—Part in strait lines, part in *transverse* are found. *Blackmore*.—A *transverse* side blow. *Bentley*.

(2.) *TRANSVERSE* denotes something that goes across another from corner to corner: thus bends and bars in heraldry are *transverse* pieces or bearings; the diagonals of a parallelogram or a square are *transverse* lines.

* *To TRANSVERSE*. *v. a.* [*transversus*, Latin.] To change; to overturn.—Nothing can be believed to be religion by any people, that is in the power of man to alter or *transverse*. *Lefley*.

* *TRANSVERSELY*. *adv.* [from *transverse*.] In a cross direction.—At Stonebenge the stones lie *transversely* upon each other. *Stillingfleet*.—If a fibre be cut *transversely*. *Arbutnot*.

TRANSUMPT. *n. f.* in Scots law. See *LAW*, Part III. Chap. III. Sect. I. § 24.

* *TRANSUMPTION*. *n. f.* [*trans* and *sumo*, Latin.] The act of taking from one place to another.

TRANSYLVANIA, a province of Europe, annexed to Hungary, and bounded on the north by Upper Hungary and Poland, on the east by Moldavia and Walachia, on the south by Walachia, and on the west by Upper and Lower Hungary. It is surrounded on all parts by high mountains, which, however, are not barren. The inhabitants have as much corn and wine as they want themselves; and there are rich mines of gold, silver, lead, copper, quicksilver, and alum. The inhabitants are of all religions. It is about 162 miles in length, and 150 in breadth. It is divided into several small districts, called *palatines*, and counties; and is inhabited by three different nations, Saxons, Sicilians, and Hungarians. Heranstadt is the capital town.

* *TRANTERS*. *n. f.* Men who carry fish from the sea-coast to sell in the inland countries. *Sailey*.

TRAEON, or *TRAW*. See *TRAW*.

* *TRAP*. *n. f.* [*trappe*, Saxon; *trape*, Fr. *trappola*, Italian.] 1. A snare set for thieves or vermin.—Die not like a fox caught in a *trap*. *Taylor*.—The *trap* springs and catches the ape by the

fingers. *L'Esrange*. 2. An ambush; a stratagem to betray or catch unawares.—

And lurking closely, in await now lay.
How he might any in his *trap* betray. *Spenser*.—The *trap* is laid for me. *Shak*.—They continually laid *traps* to ensnare him. *Calamy*.—He seems a *trap* for charity to lay. *Dryden*. 3. A play at which a ball is driven with a stick.—Unruly boys learn to wrangle at *trap*. *Locke*.—From nine pins, coits, and from *trap*-ball abstaing. *King*.

* *To TRAP*. *v. a.* [*trappen*, Saxon.] 1. To ensnare; to catch by a snare or ambush; to take by stratagem.—Tedious snares to *trap* mine enemies. *Shak*.—I *trapp'd* the foe. *Dryden*. [See *TRAPPINGS*.] To adorn; to decorate.—*Trapp'd* with polish'd steel. *Spenser*.—To deck his hearse and *trap* his tomb black steel. *Spenser*.—Four milk-white horses *trapt* in filver. *Shak*.—Steeds with scarlet *trapp'd*. *Cowley*.

TRAPA, in botany, *WATER CACTOPS*, a genus of plants, in the class *Tetrandria*, and in the order of *Monogynia*; ranking according to the natural method, in the order which Linnæus left doubtful.

TRAPANI, a town of Sicily, in the valley of Mazara, seated on a peninsula, with a good harbour; defended by a fort on the adjacent island of *Columbara*. It has a good pearl fishery, and considerable salt works. The population is about 20,000. It lies 43 miles WSW. of Palermo, and 72 NW. of Girgenti. Lon. 12. 20. E. Lat. 38. 10. N.

TRAPASSI. See *METASTASIO*.

* *TRAPDOOR*. *n. f.* [*trap* and *door*.] A door opening and shutting unexpectedly.—The arteries which carry from the heart to the several parts, have valves which open outward like *trapdoors*. *Ray*.

* *To TRAPE*. *v. a.* [commonly written to *traipse*; probably of the same originally with *drab*.] To run idly and fluttishly about. It is used only of women.

* *TRAPES*. *n. f.* [I suppose from *trape*.] An idle flatteringly woman.—

He found the fullen *trapes*
Possess with th' devil, worms, and claps. *Hudib*.—Marry such a *trapes*! *Gay*.—The greatest *trapes* in town? *Young*.

* *TRAPEZIUM*. *n. f.* [*τετραγωνος*; *trapeze*, Fr.] A quadrilateral figure, whose four sides are not equal, and none of its sides parallel. *Diæ*.—Two of the lateral *trapezia* are as broad. *Woodward*.

TRAPEZIUS, a muscle. See *ANATOMY*, § 209.

* *TRAPEZOID*. *n. f.* [*τεραπεζοειδης* and *ειδος*; *trapezoid*, Fr.] An irregular figure, whose four sides are not parallel. *Diæ*.

TRAPEZUNTIUS, George, a learned author, born in Crete, about 1396. He was one of those learned men, to whom we are indebted for the revival of science in Europe; by introducing the knowledge of the Greek language into the West. He translated many of the Greek authors into Latin; and was also author of several works of his own. He died at Rome in 1485.

TRAPEZUS, a city of Pontus, with a harbour on the Euxine sea, built by the people of Sinope. It became famous under the emperors

of the East, and was for some time their capital. Is now called TREBISOND.

TRAPOLIZZA, a town of European Turkey, in the Morea, 18 miles SW. of Argos.

(1.) TRAPP, Dr Joseph, an English divine born at Cherington in Gloucestershire, where his father was rector in 1579. He was the first person chosen to the professorship of poetry founded at Oxford by Dr Birkhead; and published his lectures under the title of *Prædicationes Poeticae*. He obtained the living of Christ-church in Newgate Street, and St Leonard's, Foster-lane, London; but his very high-church principles obstructed his farther preferment. He published several occasional poems, a tragedy called *Abramule*, translated Milton's *Paradise Lost* into Latin verse, and died in 1747. Also a *Preservative against Unsettled notions* in several sermons.

(2.) TRAPP, in mineralogy, the obsolete name of a species of SILICA. It was the LAPIS LYDIUS, or TOUCHSTONE of the ancients. See MINERALOGY, Part II. Chap. IV. Gen. XXIII. Sp. 1. Var. 2.

TRAPPE, a ci-devant celebrated monastery of France, in the dep. of Orne, and late prov. of Perche, seated in a large valley surrounded by mountains. The monks were famed in the days of superstition, for their austerity; and keeping a perpetual silence!

* TRAPPINGS. *n. s.* [This word *Minshaw* derives from *drap*, French, *cloth*.] 1. Ornaments appendant to the saddle.—Bales and tinzel *trappings*. Milton. 2. Ornaments; drefs; embellishments; external, superficial, and trifling decorations.—These but the *trappings* and the suits of woe. Shak.—Rich *trappings*, and large promises. L'Estrange.—

The points of honour poets may produce, *Trappings* of life, for ornament, not use. Dryd.—Thy horse's *trappings*. Dryden.—So—He needs no *trappings* of fictitious fame. Dryden.—The gay *trappings* of a birth-day night. Swift.

TRAPRAIN, or } LAW, a conical hill of Scotland, in E. Lothian, 1½ miles NW. of Whittingham, and 4 E. of Haddington.

* TRAPSTICK. *n. s.* [*trap* and *stick*.] A stick with which boys drive a wooden ball.—A foolish sloop between a couple of thick bandy legs and two long *trapsticks* that had no calfs. Spectator.

TRAQUAIR, (abbreviated from *Strathquair*.) a parish of Scotland, in the county of Peebles, on the S. bank of the Tweed, watered also by the QUAIR. It is 9 miles long and from 4 to 5 broad; and contains 17,290 acres, of which about 4000 are arable. The surface is mountainous and rocky. The soil in the low grounds is stony and shallow, yet pretty fertile. The old mansion-house of Traquair, the residence of the ancient earls of Traquair, is seated on the banks of the Tweed; and on the side of the hill overlooking the lawn, is "The bonny bush upon Traquair," memorable for virtuous love and poetry; still pointed out by five thorn trees. The population in 1793, was 446, the decrease 205, since 1755. There is a quarry of excellent flates; and considerable quantities of lead ore have been discovered; though

not sufficient to defray the charges of working. A specimen of *galena* was also found in a rivulet that runs into the Quair.

THARBACH. See TRAARBACH.

TRASCALETA, a town of Spain, in Galicia, 16 miles SE. of Lugo.

TRASEN, a river of Austria, which rises on the borders of Silisia; passes by Lilienfeld, Willamburg, St Pölten, &c. and falls into the Danube; 8 miles below Mautern.

* TRASH. *n. f.* [*tros*, Islandick; *drusen*, German.] 1. Any thing worthless; dross; dregs.—Lay hands upon these traitors, and their *trash*. Shak.—A wardrobe—Is but *trash*. Shak.—Who steals my purse, steals *trash*. Shak.—Trivial household *trash*. Donne.—The greater fame a writer is in possession of, the more *trash* he may bear to have tacked to him. Swift.—

Weak foolish man! will heav'n reward us
With the same *trash* mad mortals wish for here?

Pope.

2. A worthless person.—

—I suspect this *trash*

To be a party in this injury.

Shak.

3. Matter improper for food, frequently eaten by girls in the green sickness.—O that instead of *trash* thou'dst taken steel. Garth. 4. I believe that the original signification of *trash* is the loppings of trees, from the verb.

* To TRASH. *v. a.* 1. To lop; to crop.—To *trash* for overtopping. Shak. 2. To rush; to humble.—Not such as to encumber and *trash* them. Hammond.

* TRASHY. *adj.* [from *trash*.] Worthless; vile; useless.—*Trashy* stuff, whose glittering deceived him. Dryden.

(1.) TRAU, TRAW, or TRAO, a county of Dalmatia, east of Sebenico, 22 miles long, 27 broad, and, on the continent, 100 in circumference. The mountains, on the one side, produce corn, figs, vines, almonds, and olives. But the breeding of cattle on these hills is so great that 400,000 lbs. of cheese, and 10,000 lb. of wool are annually produced in this district and its isles; and about 50,000 casks of wine, 13,000 casks of oil, 300,000 lb. of figs, and nearly the same quantity of almonds are produced annually. The population is about 24,000, and the people are very industrious. It contains 42 towns and villages. (Oppen.)

(2.) TRAU, or TRAW, the capital of the above county, anciently called TRAGURUM, contains about 4800 inhabitants. It was formerly joined to the continent by an isthmus, but now forms a small island, which has a bridge over the channel to the continent. It is separated from the isle of Bua by a canal 350 feet broad, over which it has 2 bridges. Bua is 10 miles long, 21 in circuit, and has a good harbour. It is populous and fertile, abounding in wine, oil, and fruits. It has also some asphaltum. It lies 12 miles W. of Spalatro. Lon. 17. 52. E. Lat. 44. 0. N.

(3.) TRAU, OLD, a decayed town, 9 miles from Trau.

* TRAVAIL. *n. f.* [from the verb.] 1. Labour; toil; fatigue.—As every thing of price, so this

this doth require *travail*. *Hooker*.—Such persons as are unable for strong *travail*. *Spenser*. 2. Labour in childbirth.—In the time of her *travail* twins were in her. *Gen.* xxxviii.—Easy *travails* of women. *Bacon*.

(1.) * *To TRAVAIL*. *v. n.* [*travailler*, Fr.] 1. To labour; to toil. 2. To be in labour; to suffer the pains of childbirth.—I *travail* not, nor bring forth children. *Isa.* xxiii. 4.—*Travailing* in birth. *Rev.* xii. 2.—His heart *travails* with the obligation. *South*.

(2.) * *To TRAVAIL*. *v. a.* To harass; to tire.—As if all these troubles had not been sufficient to *travail* the realm. *Hayward*.—

A gleam of light turn'd thitherward in haste
His *travail*'d steps. *Milton*.

(1.) *TRAVANCORE*, a province of Hindoostan, extending along the coast of Malabar, from Cape Comorin to Lat. 10. 15. N. bounded on the N. by Myfore, and on the E. by the Carnatic. It is subject to a rajah, who is in alliance with the English East India Company; and in defence of whom they engaged, in conjunction with the Marattas and the Nizam of the Deccan, in the late successful war with Tippoo. See *INDIA*, § 29.

(2.) *TRAVANCORE*, a city of Hindoostan, capital of the above province; 108 miles SSW. of Madras, and 254 S. of Seringapatam. Lon. 77. 14. E. Lat. 8. 22. N.

TRAVAY BAY, a bay on the S. coast of the island of *TIU*.

(1.) * *TRAVE*, *TRAVEL*, or *TRAVISE*. *n. s.* A wooden frame for shoeing unruly horses. *Ains*.

(2.) *TRAVE*, in geography, a river of Holstein, which runs into the Baltic, 10 miles ENE. of Lubeck.

* *TRAVEL*. *n. s.* [*travail*, Fr. from the noun.] 1. Journey; act of passing from place to place.—His *travels* ended at his country-seat. *Dryden*.—Thy eastern *travel*. *Prior*. 2. Journey of curiosity or instruction.—Having known no *travel* in his youth. *Shak*.—*Travel* is a part of education. *Bacon*.—In my *travels*. *Brown*.—A man not enlightened by *travel* or reflexion. *Addis*. 3. Labour; toil. This should be *travel*; as in *Daniel*.—

He wars with a retiring enemy,
With much more *travel* than with victory.

Daniel.

What think'st thou of our empire now, tho'
earn'd

With *travel* difficult? *Milton*.

4. Labour in childbirth. This sense belongs rather to *travail*.—The nauseous qualms of ten long months and *travel* to requite. *Dryden*. 5.

TRAVELS. Account of occurrences and observations of a journey into foreign parts.—A book of *travels*. *Brown*.—Voyages, *travels*, and accounts of countries. *Watts*.

(1.) * *To TRAVEL*. *v. n.* [This word is generally supposed originally the same with *travail*, and to differ only as particular from general: in some writers the word is written alike in all its senses; but it is more convenient to write *travail* for labour, and *travel* for journey.] 1. To make journeys: it is used for sea as well as land, though sometimes we distinguish it from *voyage*, a word appropriated to the sea.—I've watch'd and *travel*'d hard. *Shak*.—O ye *travelling* companies of

Dedanim. *Isa.* xxi. 13.—Raphael deign'd to *travel* with Tobias. *Milton*.—Fain would I *travel* to some foreign shore. *Dryden*.—It proves that he *travel*'d. *Pope*. 2. To pass; to go; to move.—Dark night strangles the *travelling* lamp. *Shak*.—Time *travels* in divers paces, with divers persons. *Shak*.—News *travel*'d with increase from mouth to mouth. *Pope*. 3. To make journeys of curiosity.—Nothing tends so much to enlarge the minds as *travelling*. *Watts*. 4. To labour; to toil. This should be rather *travail*.—Let not any think that we *travel* about a matter not needful. *Hooker*.

(2.) * *To TRAVEL*. *v. a.* 1. To pass; to journey over.—Thither to arrive I *travel* thus profound. *Milton*. 2. To force to journey.—They shall not be *travel*'d forth of their own franchises. *Spenser*.

* *TRAVELLER*. *n. s.* [*travailleuse*, Fr. from *travel*.] 1. One who goes a journey; a wayfarer.—The weary *traveller*. *Spenser*.—From those dark shores no *travellers* return. *Sandys*.—Strangers and *travellers*. *Bentley*.—A poor *traveller*. *Law*. 2. One who visits foreign countries.—Farewell, monsieur *traveller*; look you up and wear strange suits, and disab all the benefits of your own country. *Shak*.—

These *travellers* for cloths, or for a meal,
At all adventures, any lye will tell. *Chapman*.—The *traveller* into a foreign country. *Bacon*.—*Travellers* newly arrived in a strange country. *Locke*.

TRAVELLER'S JOY. See *CLIMATIS*.
TRAVELLING. See *EDUCATION*, Part II. Sec. XXXIV.

* *TRAVELTAINTED*. *adj.* [*travel* and *tainted*.] Harassed; fatigued with *travel*.—I have foundered nine score and odd posts; and here, *travel*-tainted I am. *Shak*.

TRAVEMUNDE, or ? a sea-port town of Hol-
TRAVEMUNDEN, a stein, at the mouth of the Trave, with a good harbour, capable of containing 60 ships, and deep enough for those of 100 guns. It has a fort with 40 guns, and garrison of 50 men. It is 8 miles NE. of Lubeck. Lon. 10. 55. E. Lat. 54. 1. N.

* *TRAVERS*. *adv.* [French.] Athwart; across. Not used.—He swears brave oaths, and breaks them bravely, quite *travers*, athwart the heart of his lover. *Shak*.

TRAVERSARI, Ambrose, a learned Italian monk, born at Camaldoni, near Florence, in 1386. He acted as interpreter between the Greeks and Italians. His translation of *Diogenes Laertius*, dedicated to that great patron of literature, Cosmo de Medicis, has been often printed.

(1.) * *TRAVERSE*. *adj.* [*transversus*, Lat. *traverse*, Fr.] Lying across; lying athwart.—*Traverse* trenches. *Hayward*.—Cross and *traverse* work. *Wotton*.

(2.) * *TRAVERSE*. *adv.* [*a travers*, French.] Crosswise; athwart.—Bring water from some hanging grounds, in long furrows, and from those drawing it *traverse* to spread. *Bacon*.—The ridges of the fallow field lay *traverse*. *Hayward*.

(3.) * *TRAVERSE*. *prep.* Through crosswise.—He soon *traverse*
The whole battalions views their order due.

Milton.

(4.) * *TRAVERSE*.

(4.) * **TRAVERSE**, *n. f.* 1. Any thing laid or built across.—There is a *traverse* placed in a loft where the fitteth. *Bacon*. 2. Something that thwarts, crosses, or obstructs; cross, accident; thwarting obstacle. This is a sense rather French than English.—Human nature in its actions, passions, and *traverses* of fortune. *Dryd.*—He should have carried on his designs well enough, had it not been for unlucky *traverses*. *Locke*.

(5.) **TRAVERSE**, in navigation, implies a compound course, or an assemblage of various courses, lying at different angles with the meridian. See **NAVIGATION**.

(6.) **TRAVERSE**, in gunnery, is the turning a piece of ordnance about, as upon a centre, to make it point in any particular direction.

(7.) **TRAVERSE**, in fortification, denotes a trench with a little parapet, sometimes two, one on each side, to serve as a cover from the enemy that might come in flank.

(8.) **TRAVERSE**, in a wet foss, is a sort of gallery, made by throwing saucissons, joists, fascines, stones, earth, &c. into the foss, opposite the place where the miner is to be put, in order to fill up the ditch, and make a passage over it.

(9.) **TRAVERSE** also denotes a wall of earth, or stone, raised across a work, to stop the shot from rolling along it.

(10.) **TRAVERSE** also sometimes signifies any retrenchment, or line fortified with fascines, barts, or bags of earth, or gabions.

(11.) **TRAVERSE BAY**, a bay on the E. side of Lake Michigan, in the North-Western Territory.

(12.) **TRAVERSE BOARD**, a thin circular piece of board, marked with all the points of the compass, and having eight holes bored in each, and eight small pegs hanging from the centre of the board. It is used to determine the different courses run by a ship during the period of the watch, and to ascertain the distance of each course.

(13.) **TRAVERSE ISLANDS**, a range of islands in Lake Michigan.

(1.) * **To TRAVERSE**. *v. a.* [*traverse*, French. It was anciently accented on the last syllable.] 1. To cross; to lay thwart.—Our *traverse* arms. *Shak.*—*Traversed* or crossed. *Dryden*. 2. To cross by way of opposition; to thwart with obstacles.—This treatise has been often *traversed* with other thoughts. *Wotton*.—Frog resolved to *traverse* this new project. *Arbuthnot*. 3. To oppose; to cross by an objection. A law term.—Where suits are *traversed*. *Dryden*.—One may lose himself in *traversing* the decree. *Baker*. 4. To wander over; to cross.—He many a walk *traversed*. *Milton*.—He that shall *traverse* over all this habitable earth. *Wilkins*.—In sudden fury *traverses* the plain. *Prior*.—An African that *traverses* our vast Numidian deserts. *Addison*.—What leas you *traverse*, and what fields you sought! *Pope*. 5. To survey; to examine thoroughly.—My purpose is to *traverse* the nature of ingratitude. *South*.

(2.) * **To TRAVERSE**. *v. n.* To use a posture of opposition in fencing.—To see thee fight, to see thee *traverse*. *Shak.*

(1.) * **TRAVESTY**. *adj.* [*travesti*, Fr.] Dressed so as to be made ridiculous; burlesqued.

(2.) **TRAVESTY**, in literature, a name given to an humorous translation of any author.

TRAVIS, George, M.A. a learned English divine, born at Royton, in Lancashire; educated at Manchester, and St John's College, Cambridge. He became vicar of Eastham, rector of Hanley in Cheshire, and archdeacon of Chester. He wrote some acute *Letters to Mr Gibbon*, in which he defended the authenticity of the controverted passage in 1 John v. 7. He died in 1797.

TRAVERSE. See **TRAVER**, N^o 1.

(1.) * **TRAUMATICK**. *adj.* [*τραυματικος*] Vulnery; useful to wounds.—I put the patient into a *traumatick* decoction. *Wifeman*.

(2.) **TRAUMATICK BALSAM**. See **PHARMACY**, *Index*.

(1.) **TRAUN**, a river of Austria, which rises from the *Halfstatter See*, forms a great lake, called **TRAUN SEE**, which it runs through, and falls into the Danube, 3 miles below Steyregg.

(2.) **TRAUN**, a river of Bavaria, which rises from lakes *Foribensee* and *Daubensee*, and falls into the Alza, 4 miles N. of Chiemsee.

TRAUNSTEIN, a town of Upper Bavaria, on the Traun, near some great salt-works, 18 miles W. of Salzburg, and 23 ESE. of Wassenburg. Lon. 30. 24. E. Ferro. Lat. 47. 53. N.

TRAUTENAU, a town of Bohemia, in Koniggratz. In 1647, it was taken by assault by the Swedes. It is 21 miles N. of Koniggratz.

TRAUTMANT, a river of S. Wales, in Cardiganshire.

TRAW. See **TRAU**.

* **TRAY**. *n. f.* [*tray*, Swedisch.] A shallow wooden vessel in which meat or fish is carried.—Sift it into a *tray*, or bole of wood. *Mexen*.—The hollow *tray*. *Gay*.

TRAYAGUERA, or } a town of Spain, in Va-
TRAYGUERA, } lencia, surrounded by a wall, and flanked by towers. It has a manufacture of porcelain, and lies 80 miles NE. of Valencia, and 23 or 30 SW. of Tortosa. Lon. 0. 30. E. Lat. 40. 26. N.

* **TRAYTRIP**. *n. f.* A play, I know not of what kind.—I shall play my freedom at *traytrip*. *Shak.*

TREA. *n. f.* [*trois*, Fr.] The three at dice. *Asb.*

* **TREACHEROUS**. *adj.* [from *treachery*.] Faithless; perfidious; guilty of deserting or betraying.—Those same *treacherous* vile. *Spenser*.—Saw the *treach'rous* goddess smile. *Swift*.

* **TREACHEROUSLY**. *adv.* [from *treacherous*.] Faithlessly; perfidiously; by treason; by dishonest stratagem.—Him Alectus *treacherously* slew. *Spenser*.—*Treacherously* hast thou vanquish'd him. *Shak.*—They *treacherously* poor fish beset. *Donne*.—You *treacherously* practise'd to undo me. *Otway*.—His poor father *treacherously* lost. *Dryd.*

* **TREACHEROUSNESS**. *n. s.* [from *treachery*.] The quality of being treacherous; perfidiousness.

* **TREACHERY**. *n. s.* [*tricherie*, French.] Perfidy; breach of faith.

* **TREACHTOR**. } *n. s.* [from *tricher*, *tricheur*,
* **TREACHOUR**. } Fr.] A traitor; one who betrays; one who violates his faith or allegiance. Not in use.—By a *treachour* disguised slain. *Spens*. Where may that *treachour* then be found. *Spens*.

(1.) * **TREACLE**. *n. s.* [*triacle*, Fr. *triacle*, Dutch;

Dutch; *theriaca*, Lat.] 1. A medicine made up of many ingredients.—Medicinal virtues of *treacle*. Boyle.—*Treacle* water has much of an acid in it. Floyer. 2. Melasses; the spume of sugar.

(2.) *TREACLE*. See *THERIACA*.—Some also give the name *treacle* to melasses. See *PHARMACY*, *Index*.

(3.) *TREACLE BEER*. See *SPRUCE*.

(4.) *TREACLE MUSTARD*. See *CLYPEOLA*.

(5.) *TREACLE MUSTARD*. See *THLAPSI*.

* *TREAD*. *n. s.* [from the verb.] Footing; step with the foot.—

If the streets were pay'd with thine eyes,
Her feet were much too dainty for such *tread*.
Shak.

The quaint mazes in the wanton green,
For want of *tread*, are undistinguishable. *Milt.*

—The passive air upbore their nimble *tread*. *Milt.*

—The dancer on the rope, with doubtful *tread*.
Dryd.—How wert thou wont to walk with cau-

tionous *tread*. *Swift.* 2. Way; track; path.—The gap and *tread* for more piercement. *Shak.* 3. The cock's part in the egg.

(1.) * *To TREAD*. *v. n.* pret. *trod*. part. pass. *trodden*. [*tradan*, Gothic; *tredan*, Saxon; *treden*, Dutch.] 1. To set the foot.—

He ne'er drinks,

But Timon's silver *treads* upon his lip. *Shak.*

—When you walk or *tread*. Bacon.—If we mean

to *tread* with ease. *Milt.*—Where'er you *tread*,

the blushing flow'rs shall rise. *Pope.* 2. To trample;

to set the feet in scorn or malice.—Triumphantly *tread* on thy country's ruin. *Shak.*—Thou

shalt *tread* upon their high places. *Deut.* xxxiii.

29. 3. To walk with form or state.—The ground

shrinks before his *treading*. *Shak.*—Ye that stately

tread or lowly creep. *Milton.* 4. To copulate as

birds.—When turtles *tread*. *Shak.*—*Treading* or

coupling. Bacon.—They bill, they *tread*. *Dryd.*

(2.) * *To TREAD*. *v. a.* 1. To walk on; to

feel under the foot.—Would I had never *trod* this

English earth. *Shak.*—Forbid to *tread* the prom-

is'd land he saw. *Prior.* 2. To press under the

foot.—*Tread* the spuff out on the floor. *Swift.* 3.

To beat; to track.—If we walk not in the *trod-*

den paths. *Shak.* 4. To walk on in a formal or

stately manner.—Methought she *trod* the ground

with greater grace. *Dryd.* 5. To crush under

foot; to trample in contempt or hatred.—We

will *tread* them under that rise against us. *Psal.*

xliv. 5.

Why was I rais'd the meteor of the world,

To be *trod* out by Cæsar? *Dryden.*

6. To put in action by the feet.—They *tread* their

wine-presses. *Job* xxiv. 7. To love as the male

bird the female.—He feather'd her and *trod* her

Dryden.

* *TREADER*. *n. s.* [from *tread*.] He who

treads.—The *treaders* shall tread out no wine. *Isa.*

* *TREADLE*. *n. s.* [from *tread*.] 1. A part of

an engine on which the feet act to put it in mo-

tion.—The greater the sweep of the fore-end of

the *treadle* be, the more revolutions is made at

one *tread*. *Maxon.* 2. The sperm of the cock.—

The gam, or *treadle* of the egg. *Brown.* At each

end of the egg is a *treadle*. *Derham.*

(1.) * *TREASON*. *n. s.* [*trahison*, French.] An

offence committed against the king's majesty, & the dignity and majesty of the commonwealth.—He made the overture of thy *treasons* to us. *Shak.*

—To expiate his *treason* hath nought left. *Milton.*

Treason against God. *Holyday.* Athaliah cried,

Treason, treason. 2 *Kings* xi. 14.

(II.) *TREASON*, a general appellation, made use

of by the law, to denote not only offences against

the king and government, but also that accumu-

lation of guilt which arises whenever a superior re-

poses a confidence in a subject or inferior, be-

tween whom and himself there subsists a natural,

a civil, or even a spiritual relation; and the inferior

so abuses that confidence, so forgets the obligations

of duty, subjection, and allegiance, as to destroy

the life of any such superior or lord.

Hence treason is of two kinds, *high* and *petty*.

i. *TREASON, HIGH*, or *TREASON PARAMOUNT*,

(which is equivalent to the *crimen lese majestatis*

of the Romans), is an offence committed against

the security of the king or kingdom, whether by

imagination, word, or deed. The stat. 25. Edw.

III. c. 2. defines what offences should be held to

be treason; and it comprehends all kinds of high

treason under seven branches. "1. When a man

doth compass or imagine the death of our lord

the king, of our lady his queen, or of their eldest

son and heir," the stat. requires, that the accused

"be thereof upon sufficient proof attained of some open act by men of his own condition."

Thus, to provide weapons or ammunition for the

purpose of killing the king, is held to be a palpable

overt act of treason in imagining his death.

To conspire to imprison the king by force, and

move towards it by assembling company, is an

overt act of compassing the king's death. It seems

clearly to be agreed, that by the common law and

the statute of Edw. III. words spoken amount only

to a high misdemeanour, and not treason. If the

words be set down in writing, it argues more delib-

erate intention; and it has been held, that writing

is an overt act of treason. But even in this

case the bare words are not the treason, but the

deliberate act of writing them. 2. "If a man do

violate the king's companion, or the king's eldest

daughter unmarried, or the wife of the king's

eldest son and heir." By the king's companion is

meant his wife; and by violation is understood

carual knowledge, as well without force as with

it. 3. The third species of treason is, "if a man

do levy war against our lord the king in his realm."

And this may be done by taking arms, not only

to dethrone the king, but under pretence to re-

form religion, or the laws, or to remove evil

counsellors, or other grievances whether real or

pretended. 4. "If a man be adherent to the

king's enemies in his realm, giving to them aid

and comfort in the realm or elsewhere," he is also

declared guilty of high treason. 5. "If a man

counterfeit the king's great or privy seal," this is

also high treason." But if a man takes wax bear-

ing the impression of the great seal off from one

patent and fixes it to another, this is held to be

only an abuse of the seal, and not a counterfeiting

of it. 6. "If a man counterfeit the king's mo-

ney; and if a man bring false money into the

realm counterfeit to the money of England, know-

ing

ing the money to be false, to merchandise and make payment withal." But gold and silver money only are held to be within this statute. It is held that uttering counterfeit money without importing it, is not within the statute. 7. "If a man slay the chancellor, treasurer, or the king's justices of the one bench or the other, justices in eyre, or justices of assize, and all other justices assigned to hear and determine, being in their places doing their offices." But this statute extends only to the actual killing of them; and not to wounding or a bare attempt to kill them. The barons of the exchequer, as such, are not within the protection of this act; but the lord keeper or commissioners of the great seal now seem to be within it, by virtue of the Statutes 5 Eliz. c. 18. and 1 W. and M. c. 21. The new treasons, created since the statute 1 M. c. 1. and not comprehended under the description of Statute 25 Edw. III. may be comprised under three heads. The first species relates to Papists; the second to falsifying the coin or other royal signatures, as falsely forging the sign manual, privy signet, or privy seal, which shall be deemed high treason (1 M. Stat. ii. c. 6.) The third new species of high treason is such as was created for the security of the Protestant succession in the house of Hanover. For this purpose, after the act of settlement was made, it was enacted by statute 13 and 14 W. III. c. 3. that the pretended prince of Wales, assuming the title of king James III. should be attainted of high treason; and it was made high treason for any of the king's subjects to hold correspondence with him or any person employed by him, or to remit money for his use. And by 17 Geo. II. c. 39. it is enacted, that if any of the sons of the pretender shall land or attempt to land in this kingdom, or be found in the kingdom or any of its dominions, he shall be adjudged attainted of high treason; and corresponding with them or remitting money to their use is made high treason. By 1 Ann. Stat. 2. c. 17. the offence of hindering the next in succession from succeeding to the crown is high treason: and by 6 Ann. c. 7. if any person shall maliciously, advisedly, and directly, by writing or printing, maintain, that any other person hath any right to the crown of this realm, otherwise than according to the act of settlement, or that the kings of this realm with the authority of parliament are not able to make laws to bind the crown and its descent; such person shall be guilty of high treason. The punishment of high treason in general is very solemn and terrible. 1. That the offender be drawn to the gallows, and not be carried or walk; though usually (by clemency, at length ripened by humanity into law) a sledge or hurdle is allowed, to preserve the offender from the torment of being dragged on the ground or pavement. 2. That he be hanged by the neck, and then cut down alive. 3. That his entrails be taken out, and burned while he is yet alive. 4. That his head be cut off. 5. That his body be divided into four parts. 6. That his head and quarters be at the king's disposal. The king may, and often doth, discharge all the punishment except beheading, especially where any of noble blood are attainted. But where beheading is no part of the judgment, as in murder or other

felonies, it hath been said that the king cannot change the judgment. In the case of COXWOLD, the punishment is milder for male offenders; being only to be drawn and hanged by the neck till dead. But in treasons of every kind the punishment of women is the same, being different, and perhaps more terrible than that of men. Their sentence is to be drawn to the gallows, and there to be burned alive. This barbarous punishment, to the disgrace of the law of England, was actually inflicted upon a poor woman, at London, so late as the year 1786. The poor woman fainted when led to the place of suffering. This circumstance excited the humanity of — Martin, Esq. M. P. to bring in a bill for its abolition, which passed both houses during the winter Session, 1788, very much to the honour of the British Parliament. For the consequences of this judgment, see ATTAINDER, FORFEITURE, and CORRUPTION OF BLOOD.

ii. TREASON, PETTY, or PETIT, according to the statute 25 Edw. III. c. 2. may happen three ways: by a servant killing his master, a wife her husband, or an ecclesiastical person (either secular or regular) his superior, to whom he owes faith and obedience. Whatever has been said with respect to wilful MURDER, is also applicable to the crime of petit treason, which is no other than murder in its most odious degree; except that the trial shall be as in cases of high treason, before the improvements therein made by the statutes of William III. But a person indicted of petit treason may be acquitted thereof, and found guilty of manslaughter or murder. The punishment of petit treason in a man, is to be drawn and hanged, and in a woman to be drawn and burned: the idea of which latter punishment seems to have been handed down to us from the laws of the ancient Druids, which condemned a woman to be burned for murdering her husband. Persons guilty of petit treason were first debarred the benefit of clergy by statute 12 Henry VII. c. 7. which has since been extended to their aiders, abettors, and counsellors, by statute 13 Henry VIII. c. 1. and 5 and 5 P. and M. c. 4.

(III.) TREASON, HIGH, in Scots law. See LAW, Part III. Chap. III. Sect. IV. § 9—11.

(IV.) TREASON, MISPRISION OF. See LAW, Part III. Chap. III. Sect. IV. § 12.

* TREASONABLE. } adj. [from treason.]

* TREASONOUS. } adj. [from treason.] Having the nature or guilt of treason. Treasonous is out of use.—Corrupt and treasonous. Shak.—Treasonous malice. Shak.—Plots, and treasonable practices. Clarend.—I would not taste thy treasonous offer. Milt.—It is dangerous, illegal, and perhaps treasonable. Swift.

(1.) * TREASURE. n. s. [treasor, Fr. thesauri, Latin.] Wealth hoarded; richness accumulated.—The several parcels of his plate, his treasure. Shak.—Collecting of treasure. Bacon.—Gold is treasure as well as silver. Locke.

(2.) TREASURE, in general, denotes a stock of money.

* To TREASURE. v. a. [from the noun.] To hoard; to reposit; to lay up.—Thou treasurest up unto thyself wrath. Rom. ii. 5.—Practical principles are treasured up in man's mind. South.—No, my remembrance treasures honest thoughts. Rowe.

—All

—All things lost on earth are *treasur'd* there. *Pope*.

* **TREASUREHOUSE.** *n. f.* [*treasure* and *house*.] Place where hoarded riches are kept.—Let there be any grief incident to the soul, for which there is not in this *treasurehouse* a present remedy. *Hooker*.—Thou silver *treasurehouse*. *Shak*.—Your spirit and its *treasurehouse*, the memory. *Taylor*.

(1.) * **TREASURER.** *n. f.* [*from treasurer*; *tresorer*, Fr.] One who has care of money; one who has charge of treasure.—This is my *treasurer*. *Shak*.—Before the invention of laws, private affections in rulers made their own fancies both their *treasurers* and hangmen. *Raleigh*.

(2.) A **TREASURER** is an officer to whom the treasure of a prince or corporation is committed to be kept and duly disposed of, in payment of officers and other expences. See **TREASURY**. Of these there is a great variety. His majesty of Great Britain, in quality of elector of Brunswick, is *arch treasurer* of the Roman empire. In England, the principal officers under this denomination are, the lord high-treasurer, the treasurer of the household, treasurer of the navy, of the king's chamber, &c.

(3.) **TREASURER, LORD HIGH, OF GREAT BRITAIN**, or first commissioner of the treasury, when in commission, has under his charge and government all the king's revenue which is kept in the exchequer. He holds his place during the king's pleasure; being instituted by the delivery of a white staff to him. He has the check of all the officers employed in collecting the customs and royal revenues; and in his gift and disposition are all the offices of the customs in the several ports of the kingdom; and scribes in every county are nominated by him; he also makes leases of the lands belonging to the crown. The office of lord treasurer is *now* in commission. The number of lords commissioners is 5, one of whom is the first lord, whose annual salary was formerly £.282, but is now £.4000; and who, unless he be a peer, is also chancellor of the exchequer, and prime minister in the government of this country; the other lords commissioners have an annual salary of £.1600 each.

(4.) **TREASURER OF THE COUNTY**, he that keeps the county stock. There are two of them in each county in England, chosen by the major part of the justices of the peace, &c. at their general quarter session; under previous security given for the money entrusted with them, and the faithful execution of the trusts reposed in them.

(5.) **TREASURER OF THE HOUSEHOLD**, is an officer who, in the absence of the lord steward, has power, with the comptroller and other officers of the green-cloth and the steward of the Marshalsea, to hear and determine treasons, felonies, and other crimes committed within the king's palace. See **HOUSEHOLD**. There is also a treasurer belonging to the establishment of her majesty's household, &c.

(6.) **TREASURER OF THE NAVY**, is an officer who receives money out of the exchequer, by warrant from the lord high treasurer, or the lords commissioners executing that place; and pays all charges of the navy, by warrant of the principal officers of the navy.

* **TREASURERSHIP.** *n. f.* [*from treasurer*.] Office or dignity of treasurer.—He was a suitor for the *treasurership*. *Habeswill*.

TREASURE-TROVE. *n. f.* in law, derived from the French word *trouver*, to find, called in Latin *thesaurus inventus*, is where any money or coin, gold, silver, plate, or bullion, is found hidden in the earth or other private place, the owner thereof being unknown; in which case the treasure belongs to the king; but if he that hid it be known, or afterwards found out, the owner and not the king is intitled to it.

(1.) * **TREASURY.** *n. f.* [*from treasure*, *tresorerie*, Fr.] 1. A place in which riches are accumulated. *The treasury* of life. *Shak*.—A very *treasury*—Of brags, and gold. *Chapman*.—That famous *treasury* of knowledge at Oxford. *Wotton*.—The state of the *treasury* the king best knows. *Temple*.—*Treasures* of just observations. *Watts*.—2. It is used by *Shakespeare* for *treasure*.—Sunken wreck and sumless *treasuries*. *Shak*.—

The sumptuous buildings

Have cost a mass of public *treasure*. *Shak*.

(2.) *The TREASURY* is the place wherein the revenues of a prince are received, preserved, and disbursed. In England the treasury is a part of the exchequer; by some called the *lower exchequer*. The officers of his majesty's treasury, or the lower exchequer, are the lords commissioners, one of whom is chancellor, two joint secretaries, private secretary to the first lord, two chamberlains, an auditor, four tellers, a clerk of the pells, ushers of the receipt, a tally-cutter, &c. See each officer under his proper article, **CHANCELLOR, TALLY, TELLER, &c.**

(3.) **TREASURY, LORDS OF THE.** See **TREASURER, LORD HIGH, § 3.**

* **TREAT.** *n. s.* [*from the verb*.] 1. An entertainment given.—A parting *treat*. *Dryd*.—Professions, when recommended by a *treat*, dispose an audience to her reason. *Collier*.—

What tender maid but must a victim fall

For one man's *treat*, but for another's ball? *Pope*.

2. Something given at an entertainment.—

Figs and grapes, and wrinkled dates were set,
In canisters t' enlarge the little *treat*. *Dryd*.

Lycaon's guilt and his inhuman *treat*. *Dryd*.

(1.) * **TO TREAT.** *v. a.* [*traiter*, Fr. *tratar*, Lat.] 1. To negotiate; to settle.—A hundred senators to *treat* the peace. *Dryden*. 2. [*Tratō*, Lat.] To discourse on. 3. To use in any manner, good or bad.—He *treated* his prisoner with great harshness. *Speñ*.—The best men are *treated* like the worst. *Pope*. 4. To handle; to manage; to carry on.—They *treated* their subjects in their pictures, as Homer did in his poetry. *Dryd*. 5. To entertain without expence to the guest.

(2.) * **TO TREAT.** *v. n.* [*traiter*, Fr. *trabian*, Saxon.] 1. To discourse; to make discussions.—Of love they *treat* till th' evening star appear'd. *Milt*.—Authors who have *treated* of love in verse. *Addison*. 2. To practice negotiation.—The king *treated* with them. 2 *Mac*. xiii. 22. 3. To come to terms of accommodation.—Inform us, will the emperor *treat*? *Swift*. 4. To make gratuitous entertainments.—If we do not please, at least we *treat*. *Prior*.

* **TREATABLE.** *adj.* [*traitable*, French.] Mode-
M m m rate;

rate; not violent.—A virtuous mind should rather wish to depart with a kind of *treatable* dissolution than be suddenly cut off. *Hooker*.—The heats or the colds of seasons are less *treatable* than with us. *Temple*.

* **TREATISE.** *n. f.* [*tractatus*, Lat.] Discourse; written tractate.—A dismal *treatise*. *Shak*.—Rules are given in this *treatise* to judge of good pictures. *Dryden*.

* **TREATMENT.** *n. f.* [*traitement*, Fr.] Usage; manner of using, good or bad.—Were they to entertain this age, they could not now make such *plenteous treatment*. *Dryden*.

Accept such *treatment* as a swain affords. *Pope*.

(1.) * **TREATY.** *n. f.* [*traité*, Fr.] 1. Negotiation; act of treating.—

She began a *treaty* to procure. *Spenser*.

He calls by *treaty* and by trains

Her to persuade. *Spenser*.

2. A compact of accommodation relating to public affairs.—A peace, rather a bargain than a *treaty*. *Bacon*.—And with the rest a peaceful *treaty* makes. *Addison*. 3. [For *entreaty*.] Supplication; petition; solicitation.—

To the young man send humble *treaties*. *Shak*.

(1.) **TREATY**, § 1, *def.* 1, 2, may be farther illustrated by the following, which are some of the most important treaties that have occurred in the history of Britain and of Europe, within these last centuries.

(3.) **TREATY OF AIX LA CHAPELLE.** See **AIX**, and **ENGLAND**, § 81.

(4.) **TREATY OF AMIENS.** See **REVOLUTION**, N^o VI, § 47.

(5.) **TREATY OF CAMPO FORMIO.** See **CISALPINE**, § 2.

(6.) **TREATY OF COMMERCE WITH FRANCE.** See **ENGLAND**, § 128.

(7.) **TREATY OF PARIS.** See **ENGLAND**, § 83.

(8.) **TREATY OF PASSAU.** See **REFORMATION**, § 6.

(9.) **TREATY OF QUADRUPLE ALLIANCE.** See **ENGLAND**, § 78.

(10.) **TREATY OF RYSWICK.** See **ENGLAND**, § 71.

(11.) **TREATY OF VERSAILLES.** See **ENGLAND**, § 107.

(12.) **TREATY OF UNION WITH IRELAND.** See **IRELAND**, § 24.

(13.) **TREATY OF UNION WITH SCOTLAND.** See **ENGLAND**, § 74.

(14.) **TREATY OF U. RECHT.** See **ENGLAND**, § 75.

(1.) **TREBA**, in ancient geography, a town of Italy, belonging to the *Equi*. *Plin.* iii. 12.

(2.) **TREBA**, in modern geography, a town of Upper Saxony, in Thuringia; 2 m. SW. of Salza.

TREBATIUS TESTAS, Caius, a writer of the Augustan age, who was banished by Cæsar as a partizan of Pompey, but was afterwards reconciled to him. He was eminent for his integrity. He wrote on civil law, and some good poems, and other tracts. *Hor.* 2. *Sat.*

TREBELLIVS POLLIO, a Latin historian, who flourished about A. D. 305. He wrote the *Lives of the Roman Emperors*; the beginning of this work is lost; but part of the life of Valerian, the reigns of the two Gallieni, and the reigns of the 10 tyrants are extant.

TREBENSKA, a river of European Turkey, in Dalmatia; which runs into the Adriatic at Trebigni.

TREBIA, a river of Italy, anciently in Cisalpine Gaul, which rises in Geneva, runs past Bobbio, in the dep. of Olona, in the Italian kingdom; and falls into the Po a little below Placentia. After the defeat of the Romans under Sempronius, on its banks, by Hannibal, great numbers of the Roman soldiers, in flying from the victorious Carthaginians, were drowned in this river. It still retains the name it had in the days of Hannibal.

TREBIGNA, } a town of European Turkey,
TREBIGNI, or } in Dalmatia, with a Greek
TREBIGNO, } bishop's see; seated on the Adriatic, at the mouth of the Trebenska, 14 miles NE. of Ragusa, and 60 S. of Mostar. The inhabitants are partly Turks, partly Greek Christians; and a few are Roman catholics. Lon. 18. 12. E. Lat. 43. 4. N.

TREBILIS, the ancient name of Tripoli. See **TRIPOLI**, N^o 2.

TREBISOND, a large, populous, and strong town of Asiatic Turkey, in the province of Jenich, with a Greek archbishop's see, a harbour, and a castle, seated at the foot of a very steep hill. The walls are square and high, with battlements; and are built with the ruins of ancient structures. The town is not populous. The harbour is at the E. end of the town, and the mole built by the Genoese is almost destroyed. It stands on the Black Sea, 104 miles NW. of Erzerum, and 440 E. of Constantinople. Lon. 40° 25' E. Lat. 40° 45' N.

(1.) **TREBITZ**, a town of Moravia, seated on the Iglaw, 21 miles SE. of Iglaw, and 52 NW. of Budweis. It has considerable manufactures of cloth, iron, glass, &c. Lon. 16. 12. E. Lat. 49. 4. N.

(2.) **TREBITZ**, a town of Upper Saxony; 3 miles NNW. of Schmiedelberg.

(1.) * **TREBLE.** *n. f.* A sharp sound.—The treble cutteth the air sharp. *Bacon*.—The *trebles* squeak for fear. *Dryden*.

(2.) * **TREBLE.** *adj.* [*triple*, Fr. *triplex*, *triplex*, Lat.] 1. Threefold; triple.—They twofold balls and *treble* sceptres carry. *Shak*.—Dreadful teeth in *treble* ranks are set. *Sandys*.—*Treble* confusion, wrath, and vengeance. *Milton*.—A lofty tow'r with *treble* walls. *Dryden*.—Through *treble* plates his jav'lin went. *Dryd.* 2. Sharp of sound. A musical term.—The quicker percussive of air causeth the more *treble* sound. *Bacon*.

(3.) **TREBLE**, in music, the highest or most acute of the four parts in symphony, or that which is heard the clearest and shrillest in a concert.

(1.) * **To TREBLE.** *v. a.* [from the adjective; *triplico*, Latin; *tripler*, Fr.] To multiply by three; to make conceive as much.—

She conceiv'd, and *trebling* the due time,
Brought forth this monstrous mass. *Spens.*

I would not be ambitious in my wish,
To wish myself much better; yet for you,
I would be *trebled* twenty times myself. *Shak.*
—Four years he *trebles*. *Creech*.

(2.) * **To TREBLE.** *v. n.* To become threefold.—Debt doubles and *trebles* upon him. *Swift*.

* **TREBLENESS.** *n. f.* [from *treble*.] The state of being *treble*.—*Trebleness* of tones. *Bacon*.

* **TREBLY.** *adv.* [from *treble*.] Thrice told; in threefold number or quantity.—Linen *trebly* roll'd.

roll'd. *Dryd.*—The seed is doubly and *trebly* defended. *Ray.*

TREBNITZ, a town of Silesia, in the county of Oels, 12 miles N. of Breslaw, and 13 W. of Oels. It has a famous nunnery. Near it is a hill consisting of soft clay, which the people form into vessels of all kinds, and it requires nothing but exposure to the air to become as hard as if baked in an oven. Lon. 17. 15. E. Lat. 51. 15. N.

TREBNIZ, a town of Bohemia, in Leitmeritz, 6 miles SW. of Leitmeritz.

TREBUCHET, } TRIBUCH, (*Trebichetum*), a
TREBUCKET, } tumbrel or cucking stool. Also
a great engine to cast stones to batter walls.

TREBURGET, a town of England, in Cornwall; near Michaelstow.

TRECARROL, a small town of England, in Cornwall; SW. of Launceston.

TRECASTLE, a town of S. Wales in Brecknockshire, 10 miles W. of Brecknock, and 174 of London. It has 6 fairs; on April 3; May 2; August 14; October 14; November 13; and December 14.

TREDACK, a town of England in Cornwall, near Lescard.

TREDDINGTON, a town of England, in Worcestershire, seated on the Stour; N. of Ship-ton.

TREDINGTON a town of England, in Gloucestershire; 2½ miles SE. of Tewksbury.

TREDONOCK, a town of England, in Monmouthshire, 3 miles from Caerleon.

TREDRUSTON, a town of England, in Cornwall; near Bodwin.

(1.) * TREE. *n. f.* [*trie*, Islandick; *tree*, Danish.] 1. A large vegetable, rising with one woody stem, to considerable height.—*Trees* and shrubs, of our native growth in England, are distinguished by Ray. 1. Such as have their flowers disjointed and remote from the fruit; and these are, 1. Nuciferous ones; as, the walnut tree, the hazel-nut tree, the beech, the chestnut, and the common oak. 2. Coniferous ones; of this kind are the Scotch fir, male and female; the pine, the common alder tree, and the birch tree. 3. Bacciferous, as the juniper and yew trees. 4. Lanigerous ones; as, the black, white, and trembling poplar, willows, and others of all kinds. 5. Such as bear their seeds, having an imperfect flower, in leafy membranes; as, the horse-bean. 6. Such as have their fruits and flowers contiguous; of these some are pomiferous; as, apples and pears; and some bacciferous; as, the forb or service tree, the white or hawthorn, the wild rose, sweet brier, currants, the great bilberry bush, honey-suckle, &c. Pruniferous ones, whose fruit is pretty large and soft, with a stone in the middle; as, the blackthorn or sloe tree, the black and white bullace tree, the black cherry, &c. Bacciferous ones; as, the strawberry tree in the west of Ireland, mistletoe, water elder, large laurel, the viburnum or way-faring tree, the dog berry tree, the sea black thorn, the berry-bearing elder, the privet bar-berry, common elder, the holly, the buckthorn, the berry-bearing heath, the bramble, the spindle tree or prickwood. Such as have their fruit dry when ripe; as, the bladder nut tree, the box tree, the common elm and ash,

the maple, the gale or sweet willow, common heath, broom, dyers wood, furze or gorse, the lime tree, &c. *Miller.*—With *trees* that nod. *Shak.*—Who can bid the *tree* unfix his earth-bound root. *Shak.*—It is pleasant to look upon a *tree* covered with green leaves. *Burnet.*—Gooseberries are shrubs, and oaks are *trees*. *Locke.* 2. Any thing branched out.—*Trees* of pedigrees. *Dryden.*

(2.) * TREE GERMANDER. *n. f.* A plant.

(3.) TREE GERMANDER, in botany. See TRICRIUM.

(4.) TREE MOSS, a species of LICHEN.

(5.) * TREE OF LIFE. *n. f.* [*lignum vite*, Latin.] An evergreen; the wood is esteemed by turners. *Miller.*

(6.) TREE OF LIFE, or LIGNUM VITÆ, in botany. See GUAIACUM; § II. N° 2.

(7.) * TREE PRIMROSE. *n. f.* A plant.

(8.) TREE PRIMROSE, in botany. See OENOTHERA.

(9.) TREE TREFOIL. See CYTISUS.

(10.) TREES, ANATOMY AND PHYSIOLOGY OF. See PLANT, § 1, 2, 10—32; and SAP, § 1, 2, 5, 6.

(11.) TREES, BARRINGTON'S RULES FOR ASCERTAINING THE ORIGINAL SOIL OF. Certain trees are natives of particular districts; but many of them have been transplanted from their native soil, and now flourish luxuriantly in distant countries, so that it is a matter of considerable difficulty to ascertain their original soil. The following rules are given by the Hon. Daines Barrington: 1. They must grow in large masses, and cover considerable tracts of ground, the woods not ending abruptly, by a change to other trees, except the situation and strata become totally different. 2. They must grow kindly in copses, and shoot from the stool, so as to continue for ever, if not very carefully grubbed up. 3. The seeds must ripen kindly; nature never plants, but where a succession in the greatest profusion will continue. Lastly, trees that give names to many places are probably indigenous.

(12.) TREES, CLASSES OF. All trees may be divided into two classes, *timber* and *fruit-trees*; the first including all those trees which are used in machinery, ship-building, &c. or, in general, for purposes of utility; and the second comprehending those trees valued only, or chiefly, for their fruit. It is not necessary to form a third class to include trees used for fuel, as all timber is used for this purpose where it is abundant. For the botanical classification of trees and plants in general, see BOTANY, *Index*.

(13.) TREES, DIFFERENT SIZES AND GROWTH OF. Few experiments have been made to determine what the additions are which a tree receives annually in different periods of its age. Mr Barker has drawn up a table to point out the growth of three kinds of trees, *oaks*, *ashes*, and *elms*; which may be seen in the *Philos. Trans.* for 1788. His conclusions are these: "I find the growth of oak and ash to be nearly the same. The common growth of an oak or an ash is about an inch in girth in a year; some thriving ones will grow an inch and a half. Great trees grow more timber in a year than small ones; for if the annual growth be an inch, a coat of one 6th of an inch is laid on

M m m 2

all

all around, and the timber added to the body every year, is its length multiplied into the thickness of the coat and into the girth, and therefore the thicker the tree is the more timber is added." The following table shows the growth of 17 kinds of trees for three years. The trees grew at Caenham in Suffolk.

N ^o	July, 1785.			July, 1786.			July, 1787.

The growth of 11 kinds of trees, in 21 years, is given under RURAL ECONOMY, Part III. *See* §. X. Heat is so essential to the growth of trees, that as we go from the place within the polar circles where vegetation begins, and advance to the equator, we find the trees increase in size remarkably. Greenland, Iceland, and other places in the same latitude, yield no trees at all; and the shrubs which they produce are dwarfish; whereas, in warm climates, they often grow to an immense size. The *largest tree* in Europe, mentioned by travellers, is the chestnut tree on mount Etna. (*See* ETNA. § 13.) It is certain, that trees acquire a very great size in volcanic countries. Besides the multitude of fine groves in the neighbourhood of Albano in Italy, there are many detached oaks 20 feet in circumference, and many elms of the same size, especially in the romantic way to Estello, called the *Galleria*. In travelling by the side of the lake of BOLSENA, the road leads us through an immense number of oaks, spread upon beautiful hills. Some yews have been found in Britain 60 feet round. Palms in Jamaica attain the height of 200 feet; and some of the pines in Norfolk Island are 280 feet high.

(14.) TREES, FELLING OF, FOR TIMBER. The goodness of timber not only depends on the soil and situation in which it stands, but likewise on the season wherein it is felled. In this people disagree very much; some are for having it felled as soon as its fruit is ripe, others in the spring, and many in the autumn. But as the sap and moisture of timber is certainly the cause that it perishes much sooner than it otherwise would do, it seems evident, that timber should be felled when there is the least sap in it, viz. from the time that the leaves begin to fall till the trees begin to bud. This work usually commences about the end of April in England, because the bark then rises most freely; for where a quantity of timber is to be

felled, the statute requires it to be done then, for the advantage of tanning. The ancients chiefly regarded the age of the moon in felling their timber; their rule was to fell it in the wane, or 4 days after the new moon, or sometimes in the last quarter. Pliny advises it to be in the very instant of the change; which happening to be in the last day of the winter solstice, the timber, says he, will be incorruptible. Timber should likewise be cut when of a proper age; for when it is either too young or too old, it will not be so durable as when cut at a proper age. It is said that oak should not be cut under 60 years old, nor above 200. Timber, however, should be cut in its prime, when almost fully grown, and before it begins to decay; and this will be sooner or later according to the dryness or moistness of the soil where the timber grows, as also according to the bigness of the trees; for there are no fixed rules in felling of timber: experience and judgment must direct here as in most other cases.

(15.) TREES, FOUNTAIN. *See* FOUNTAIN, § 5.

(16.) TREES, FRUIT, MR FORSYTH'S METHOD OF MANAGING, CURING, PRUNING, &c. *See* FRUIT-TREES, § IV, 1-3. Mr Forsyth's method of managing, curing, &c. fruit-trees, has not only met with universal approbation; but is now found to answer equally well in the treatment of *forest trees*, as in that of *fruit-trees*.

(17.) TREES, GRAFTING OF. *See* GRAFTING, § I-VIII; 1-8.

(18.) TREES, GROWTH OF. *See* § 5.

(19.) TREES, METHOD OF PRESERVING, FROM FROSTS. The chevalier de Blenheim of Prague, we are told, has discovered a method of effectually preserving trees in blossom from the fatal effects of those frosts which sometimes in the spring destroy the most promising hopes of a plentiful crop of fruit. His method is extremely simple. He surrounds the trunk of the tree in blossom with a wisp of straw or hemp. The end of this he sinks, by means of a stone tied to it, in a vessel of spring water, at a little distance from the tree. One vessel will conveniently serve two trees; or the cord may be lengthened so as to surround several, before its end is plunged into the water. It is necessary that the vessel be placed in an open situation, and by no means shaded by the branches of the neighbouring trees, that the frost may produce all its effect on the water, by means of the cord communicating with it.—This precaution is particularly necessary for those trees the flowers of which appear nearly at the same time as the leaves; which trees are peculiarly exposed to the ravages of the frost. The proofs of its efficacy, which he had an opportunity of observing in the spring of 1787, were remarkably striking. Seven apricot espaliers in his garden began to blossom in March. Fearing that they would suffer from the late frosts, he surrounded them with cords as above directed. In effect, pretty sharp frosts took place 6 or 8 nights; the apricot-trees in the neighbouring gardens were all frozen, and none of them produced any fruit, whilst each of the chevalier's produced fruit in abundance, which came to the greatest perfection.

(20.) TREES, MOST PROPER FOR BUILDING. Of all the different kinds known in Europe, oak is best for building. Fir-timber is the next in degree of goodness. It differs from oak in this, that it requires not much seasoning. Fir is used for flooring, waincotting, and the ornamental parts of building within doors. Elm is the next in use, especially in England and France; it is very tough and pliable, and therefore easily worked; it does not readily split; and it bears driving of bolts and nails better than any other wood; for which reason it is chiefly used by wheel-wrights and coach-makers, for shafts, naves, &c. Beech is also used for many purposes; it is very tough and white when young, and of great strength; but liable to warp very much when exposed to the weather, and to be worm-eaten when used within doors; its greatest use is for planks, bedsteads, chairs, and other household goods. Ash is likewise a very useful wood, but very scarce in most parts of Europe; it serves in buildings, or for any other use, when screened from the weather; hand-spikes and oars are chiefly made of it. Wild chestnut timber was formerly much esteemed, but is now little used. Walnut-tree is excellent for the joiner's use, it being of a more curious brown colour than beech, and not so subject to the worms. The poplar, abel, and aspen trees, which are very little different from each other, are much used instead of fir; they look well, and are tougher and harder. See QUERCUS, OAK, PINUS, PLANTANUS, POPULUS, ULMUS, &c.

(21.) TREES, NATURAL HISTORY OF. See NATURAL HISTORY; *See* III.

(22.) TREES, PLANTING OF. See GARDENING, *See* II. and V.; and ORCHARD, § 2—5.

(23.) TREES, SEASONING OF, AND PRESERVING OF THE TIMBER. After trees are cut down, great attention is necessary in the seasoning of timber. Some advise the planks of timber to be laid for a few days in some pool or running stream, in order to extract the sap, and afterwards to dry them in the sun or air. By this, it is said, they will be prevented from either chopping, casting, or cleaving; but against shrinking there is no remedy. Some again are for burying them in the earth, others in a heat; and some for scorching and seasoning them in fire, especially piles, posts, &c. which are to stand in water or earth. The Venetians first found out the method of seasoning by fire; which is done after this manner. They put the piece to be seasoned into a strong and violent flame; in this they continually turn it round by means of an engine, and take it out when it is everywhere covered with a black coally crust; the internal part of the wood is thereby so hardened, that neither earth nor water can damage it for a long time afterwards. Dr Plott says, it is found by long experience, that the trunk or body of the trees, when barked in the spring, and left standing naked all the summer exposed to the sun and wind, are so dried and hardened, that the sappy part in a manner becomes as firm and durable as the heart itself. This is confirmed by M. Buffon, who, in 1778, presented to the royal academy of sciences at Paris a memoir, entitled, "An easy method of increasing the solidity, strength and duration of timber;" for which purpose he ob-

serves, "nothing more is necessary than to strip the tree entirely of its bark during the season of the rising of the sap, and to leave it to dry completely before it be cut down." By many experiments, particularly described in that essay, it appears, that the tree should not be felled till the 3d year after it has been stripped of the bark; that it is then perfectly dry, and the sap become almost as strong as the rest of the timber, and stronger than the heart of any other oak tree which has not been so stripped; and the whole of the timber stronger, heavier, and harder; from which he thinks it fair to conclude, that it is also more durable. "It would no longer (he adds) be necessary, if this method were practised, to cut off the sap; the whole of the tree might be used as timber; one of 40 years growth would serve all the purposes for which one of 60 years is now required; and this practice would have the double advantage of increasing the quantity, as well as the strength and solidity, of the timber." After the planks of timber have been well seasoned and fixed in their places, care is to be taken to defend or preserve them; to which the smearing them with linseed oil, tar, or the like oleaginous matter, contributes much. The ancients, particularly Hesiod and Virgil, advise the smoke drying of all instruments made of wood, by hanging them up in the chimneys where wood fires are used. The Dutch preserve their gates, portcullises, draw bridges, sluices, &c. by coating them over with a mixture of pitch and tar, whereon they fire small pieces of cockle and other shells, beaten almost to powder, and mixed with sea-sand, which incrusts and arms them wonderfully against all assaults of wind and weather. When timber is felled before the sap is perfectly at rest, it is very subject to worms; but to prevent and cure this, Mr Evelyn recommends the following remedy as the most approved: Put common sulphur into a cucurbit, with as much aquafortis as will cover it three fingers deep; distil it to dryness, which is performed by two or three rectifications. Lay the sulphur that remains at bottom, being of a blackish or sand-red colour, on a marble, or put it in a glass, and it will dissolve into an oil; with this oil anoint the timber which is infected with worms. This, he says, will not only prevent worms, but preserve all kinds of woods, and many other things, as ropes, nets, and masts, from putrefaction, either in water, air, or snow. An experiment to determine the comparative durability of different kinds of timber, when exposed to the weather, was made by a nobleman in Norfolk; of which an account is given by Sir Thomas Beevor. This nobleman, in 1774, ordered three posts, forming two sides of a quadrangle, to be fixed in the earth on a rising ground in his park. Into these posts were mortised planks, an inch and an half thick, cut out of trees from 30 to 45 years growth. These, after standing 10 years, were examined, and found in the following state and condition: The cedar was perfectly sound; larch, the heart sound; but the sap quite decayed; spruce fir, sound; silver fir; in decay; Scots fir, much decayed; pinaster, quite rotten; chestnut, perfectly sound; abel, sound; beech, sound; walnut, in decay; lycamore

more, much decayed; birch, quite rotten. Sir Thomas Beevor justly remarks, that the trees ought to have been of the same age; and Mr Arthur Young adds, they ought to have been cut out of the same plantation.

(24.) TREES, WASTE OF, IN BRITAIN, AND MEANS OF SUPPLYING THAT LOSS. The immense quantity of timber consumed of late years in ship-building and for other purposes, has diminished in a very great degree the quantity produced in this country. On this account, many gentlemen who with well to their country, alarmed with the fear of a scarcity, have strongly recommended it to government to pay some attention to the cultivation and preservation of timber. The price of wood has risen in proportion to the demand and to its diminution. At the conquest woods were valued, not by the quantity of timber which they contained, but the number of swine which the acorns could support. In 1608, oak in the forests was sold at 10s. per load, and fire-wood for 2s. per load. In 1663 or 1665, in navy contracts from L.2 to L.2, 15s. 6d. per load was given. In 1756 it rose to L.4, 5s. per load, and 3s. in addition, because no tops are received. Plank four inch fold in 1796 for L.7 a load, three inch L.4; which prices were the same in 1792. The expenditure of valuable timber is now so very great as to give reason to fear that the forests of this country will soon be entirely dismantled, unless something is done to raise fresh supplies. The building of a 70 gun ship, it is said, would take 40 acres of timber. This calculation appears so excessive, that it is scarcely credible, but it is however no exaggeration. According to the prevailing opinion of experienced surveyors, it will require a good soil and good management to produce 40 trees on an acre, which, in a hundred years, may, at an average, be computed at two loads each. Reckoning, therefore, two loads at L.8, 16s. one acre will be worth L.350, and consequently 40 acres will only be worth L.14,200. Now a 70 gun ship is generally supposed to cost L.70,000; and as ships do not last many years, the navy continually requires new ships, so that the forests must be stripped in a century or two, unless young trees are planted to supply their place. No doubt we depend greatly on Russia, Sweden, Norway, and America, for supplying us with timber; and while these countries take our manufactures in exchange, we have no reason to complain. Still, however, we ought surely not to neglect the cultivation of what is of so much importance to our existence as a nation; for it may often be impossible in time of war to obtain timber from foreign countries.

(1.) * **TREEN**, old plural of *tree*.—He knows his tackle and his *treen*. *Ben Jonson*.

(2.) * **TREEN**, *adj.* Wooden; made of wood. Obsolete.—I had rather drink out of *treen* and pay gold and silver, than drink out of gold and silver and make wooden payments. *Camden*.

TREFALGAR, CAPE, or CAPE TRAFALGAR, a cape, promontory, or head-land, on the coast of Seville, or Andalusia, in Spain; projecting 5 miles beyond the general direction of the coast. It is situated at the entrance of the Straits of Gibraltar, 20 miles SSE. of Cadiz, 26 due N. of Cape

Spartel in Africa, and 36 W. by N. of Gibraltar. This promontory will ever be memorable in history, for the great and decisive naval victory obtained within sight of it, by the British fleet, under the celebrated Admiral Lord Viscount Nelson, on the 21st October, 1805, over the combined French and Spanish fleets. The enemy's fleet consisted of 37 ships of the line, viz. 18 French and 19 Spanish, while the British amounted only to 27. In this battle the British took no less than 19 ships, but the great Nelson lost his life in the action, living only so long as to be assured of his victory. (See NELSON, Lord Viscount.) Lon. 6. 2. W. Lat. 36. 10. N.

(1.) **TREFURT**, or **TREFORT**, a town of Germany, lately in the circle of the Lower Rhine, in Eichfeld, 10 miles WSW. of Mulhausen, and 32 W. of Erfurt. It was allotted by the division of the indemnities to the K. of Prussia. See REVOLUTION, § VIII.

(4.) **TREFFURT**. See **TREFURT**.

* **TREFOIL**, *n. s.* [*trifolium*, Latin.] A plant. *Miller*.—A trefoil, or three-leaved grass. *Peascham*.—Some four trefoil or rye-grass with their clover. *Mortimer*.

(2.) **TREFOIL**, in botany. See **TRIFOLIUM**.

(3.) **TREFOIL**, BEAN, a species of **CYTISUS**.

(4.) **TREFOIL**, BIRD'S FOOT. See **LOTUS**, N° 1.

(5.) **TREFOIL**, MARSH. See **MENYANTHES**.

(6.) **TREFOIL**, MOON, a species of **MEDICAGO**.

(7.) **TREFOIL**, SHRUB. See **PTELEA**.

(8.) **TREFOIL**, SHRUB, OF MONTPELIER. See **LOTUS**, N° 2.

(9.) **TREFOIL**, SNAIL. See **MEDICAGO**.

(10.) **TREFOIL**, STINKING BEAN. See **ANAGYRIS**.

(11.) **TREFOIL**, THORNY, a species of **FAGONIA**.

(12.) **TREFOIL**, TREE. See **CYTISUS**.

TREFORT. See **REVOLUTION**, § VIII; and **TREBURT**, N° 1.

TREFRHIW, a town of N. Wales, in Caernarvonshire. It has fairs on May 12. Sept. 3d and Nov. 3d.

TREGANETHAW, a town of England, in Cornwall, SW. of Truro. It has fairs on May 6th and Aug. 12.

TREGANNON, an incorporated town of S. Wales, in Cardiganshire, with a handsome church. It has a market on Thurs. and a fair on March 5; and is seated on the Tivy, 15 miles SSE. of Aberystwith, and 197 W. of London, or 202 W. by N. *Brookes*. Lon. 3. 56. W. Lat. 52. 15. N.

TREGONY, a borough of England, in Cornwall, which sends 2 members to the imperial parliament, though much decayed. Yet it has still a market on Sat. and fairs on Shrove Tues. May 3, July 25, Sept. 2, and Nov. 6. It is seated on the Falles, which is navigable by boats up to it from Falmouth; 16 miles NE. of Falmouth, 41 W. by S. of Plymouth, and 245 W. by S. of London. Lon. 4. 43. W. Lat. 50. 16. N.

(1.) **TREQUIER**, a sea-port town of France, in the dep. of the North Coasts, and ci-devant prov. of Lower Bretagne; seated in a peninsula, on the banks of the Trequier, near the English Channel. Lon. 14. 26. E. Ferro. Lat. 48. 48. N.

(2.) **TREQUIER**, a river of France, in the dep. of the

the North coasts, and late prov. of Bertagne, which passes by and gives name to the above town, and falls into the English Channel, 6 miles below it.

TREKAN, a town of England, in Cornwall, NE. of Truro.

TREILLAGE. *n. f.* [French.] *Treillage* is a contexture of pales to support espaliers. *Trevoux*.—Bowers, grottos, *treillages*, and cascades. *Speß.*

TREILLEBURG, a sea-port town of Sweden, in the prov. of Schonen, on the coast of the Baltic, 30 miles SE. of Copenhagen. Lon. 13. 26. E. Lat. 55. 26. N.

TREISHNISH, or **TRESHUNISH ISLES**, a cluster of uninhabited islands, of Argyllshire, among the Hebrides, 12 miles W. of the isle of Mull. Two of them, named *Cairnbulg* and *Little Cairnbulg*, have relics of forts on them.

TREISTICK, a town of England, in Cornwall, near Treigny.

TREKEVE, a small town of England, in Cornwall, on the N. of Liskard.

TRELANK, a town of England, in Cornwall, SW. of Launceston.

TRELASE, a town of Cornwall, on the coast, E. of Padflow Haven.

TRELASK, a town of England, in Cornwall, SE. of Camelford.

(1.) **TRELAWNEY**, a town of England, in Cornwall, on the W. side of the Lows or Looas.

(2.) **TRELAWNEY**, a town of Jamaica, 60 miles NW. of Kingston. Lon. 77. 42. W. Lat. 18. 21. N.

* **TRELLIS**. *n. f.* [French.] Is a structure of iron, wood, or other, the parts crossing each other like a lattice. *Trevaux.*

* **To TREMBLE**. *vin.* [*trembler*, Fr. *tremo*, Lat.] 2. To shake as with fear or cold; to shiver; to quake; to shudder.—My heart—*trembles* by surprise. *Shak.*—God's power thou *tremblest* at. *Shak.*—Make your bondmen *tremble*. *Shak.*—He fell into such a *trembling* that he could hardly speak.

Clarend.—Frighted Turnus *trembl'd* as he spoke.

Dryd.—With terror *trembl'd* heav'n's subduing hill.

Dryd. 2. To quiver; to totter.—Sinai's grey top shall *tremble*. *Milt.*—A *trembling* jelly. *Burnet.* 3.

To quaver; to shake as a sound.—Winds when vehement, *tremble* at the height of their blast. *Bac.*

TREMBLEY, Abraham, F. R. S. a learned author, born at Geneva, in 1710. He was admitted F. R. S. of London, and wrote, 1. *Memoirs upon Polyptes*, 4to: 2. *Instructions from a Father to his Children*: 3. *Instructions upon Natural Religion*, &c.

* **TREMBLINGLY**. *adv.* [from *trembling*] So as to shake or quiver.—*Tremblingly* the food. *Shak.*—*Tremblingly* alive all o'er. *Pope.*

TREMECEN. See **TREMESEN**.

TREMELLA, in botany, a genus of plants belonging to the class of *cryptogamia*, and natural order of *algæ*. It is a gelatinous membranous substance; the parts of the fructification scarcely visible. There are 11 species, of which the 5 following are indigenous.

1. **TREMELLA HEMISPHERICA**, the sea *tremella*, is scattered among conservez, fuci, &c.

2. **TREMELLA LICHENOIDES**, the transparent *tremella*, is erect, plane, the margin curled, lacinulated, and brown. It grows on heaths and in woods, &c.

3. **TREMELLA NOSTOC**, the jelly rain *tremella*, is found in pastures and by the sides of gravel walks in gardens after rains; not uncommon in spring, summer, and autumn. It is a membranaceous, pellucid, and gelatinous substance, without any visible root; of a yellowish dull green colour; assuming various forms, either round, angular, plaited or folded together irregularly, like the intestines, an inch or two or more in diameter; soft to the touch when moist; but thin, membranaceous, and brittle, when dry; and of a black fuscous colour. The ancient alchemists called this vegetable the *flowers of heaven*, and imagined that from it they would procure the universal menstruum; but all their researches ended in discovering that by distillation it yielded some phlegm, volatile salt, and empyreumatic oil.

4. **TREMELLA PURPUREA**, the purple *tremella*, is globular, sessile, solitary, and smooth. It grows on ditch banks about London.

5. **TREMELLA VERRUCOSA**, the wart *tremella*, is tubercular, solid, wrinkled, roundish, and resembling a bladder; it is of a blackish yellow. It grows on stones in rivulets.

TREMELLIUS, Emanuel, a Jew born at Ferrara in 1510. He was a great master of the Hebrew tongue; and was converted to Christianity by the celebrated Peter Martyr. After travelling to Germany and England, he was made professor of Hebrew, first at Heidelberg, and then at Sedan, where he died in 1580. He translated the Hebrew Bible and Syriac Testament into Latin; in the former he was assisted by Junius, who also corrected the 2d edition in 1587.

* **TREMENDOUS**. *adj.* [*tremendus*, Latin.] Dreadful; horrible; astonishingly terrible. Mysteries sacred and *tremendous*. *Tatler*. Each hand *tremendous* with a brazen spear. *Pope*.

(1.) **TREMESEN**, **TREMECEN**, **TLEMSAN**, or **TREMEZEN**, a province of Algiers; bounded on the N. by the Mediterranean, E. by the province called *Africa*, S. by the desert of *Zarab*, and W. by the kingdom of *Fez*. It is above 370 miles long, and 125 broad. The soil is dry, barren, and mountainous; except on the N. side, where there are fertile plains abounding in corn, fruits, and pastures. This province comprehends the W. division of Algiers, and is governed by a dey.

(2.) **TREMESEN**, ? **TREMECEN**, or **TLEMSAN**,

(2.) **TREMEZEN**, an ancient and celebrated city of Algiers, capital of the above province. It is seated on an eminence, below some precipitous rocks, from which run many springs into a large basin. It has strong walls. In 1670 Hassan, dey of Algiers, demolished great part of this city, so that it is not so extensive as formerly. In the E. part of the city are many elegant pillars, altars, and other relics of Roman antiquity. The inhabitants are a mixture of Arabs, Moors, and Jews. It is 50 miles SW. of Oran, and 200 SW. of Algiers. Lon. 1. 29. W. Lat. 34. 40. N. (*Brooker*.) Lon. 0. 18. E. of Greenwich. Lat. 35. 1. N. *Cruttwell*.

TREMITI, 3 islands of Italy in the Adriatic, 15 miles from the coast of Naples. Their distinct names are, *Capraria*, *St Nicolo*, and *St Domino*. Lon. 33. 20. E. Ferro. Lat. 42. 10. N.

TREMOILLE. See **TREMOUILLE**.

TREMOLA,

TREMOLA, a valley in the Alps, where the celebrated **SAUSSURE** found a peculiar species of *Shiftus*, which he hence named.

TREMOLITE. *n. f.* See **MINERALOGY**, Part II. Chap. IV. Cl. I. Ord. I. Gen. XXIII. Sp. 2.

TREMOLIERE, Peter Charles, an historical painter, born at Cholet in Poitou, in 1703. He studied under Vanlo Semor; painted several grand altar-pieces at Lyons; and died in 1739.

TREMONT, a town of France, in the dep. of Maine and Loire; 3 miles NE. of Vihiers.

TREMOR. *n. s.* See Johnson's definitions under the obsolete spelling, **TREMOUR**. Tremor is an involuntary shaking, chiefly of the hands and head, sometimes of the feet, and sometimes of the tongue and heart.—Tremors arising from a too free use of spirituous liquors require the same treatment as palfies.

TREMOREL, a town of France, in the dep. of the North coasts, $7\frac{1}{2}$ miles S. of Brooms, and 18 E. of Loudeac.

TREMOUILLE, a town of France in the dep. of the Vienne, and ci-devant prov. of Poitou; seated on the Benaile, 33 miles ESE. of Poitiers, and 6 E. of Montmorillon. Lon. 1. 10. E. Lat. 46. 28. N.

* **TREMOUR**. *n. s.* [*tremor*, Lat.]. 1. The state of trembling.—Universal *tremour* of the joints. *Harvey*.—It affects the nerves, occasioning *tremours*. *Arbutnot*. 2. Quivering or vibratory motion.—Various, and contrary *tremours*. *Newton*.

* **TREMULOUS**. *adj.* [*tremulus*, Lat.]. 1. Trembling; fearful.—The tender *tremulous* Christian. *Decay of Piety*. 2. Quivering; vibratory.—Where there was nothing to determine him, the balance, by hanging even, became *tremulous*. *Fell*.—Breath vocalized, impresses a swift *tremulous* motion in the lips, tongue, or palate. *Holder*.—Th' effulgence *tremulous* I drink. *Thomson*.

* **TREMULOUSNESS**. *n. s.* [from *tremulous*.] The state of quivering.

* **TREN**. *n. s.* A fish spear.

* **TRENCH**. *n. s.* [*tranche*, Fr.]. 1. A pit or ditch.—With a *trench* enclose the fruitful field. *Dryden*.—Make a small *trench* to carry some of the water in. *Mortimer*. 2. Earth thrown up to defend soldiers in their approach to a town, or to guard a camp.—I saw our party to the *trenches* driven. *Shak*.

William carries on the *trench*

Till both the town and castle yield. *Prior*.

* **To TRENCH**. *v. a.* [*trancher*, Fr.]. 1. To cut.—Twenty tremendous gashes on his head. *Shak*.—A figure *trench'd* in ice. *Shak*. 2. To cut or dig into pits or ditches.—*Trench* the ground, and make it ready for the spring. *Evelyn*.—*Trench* the black earth a cubit long and wide. *Pope*.—The *trenching* plough or coulter. *Mortimer*. 3. To fortify by earth thrown up.—

Pioneers with spades and pick-ax arm'd,

Forerun the royal camp to *trench* a field. *Milt*.

* **TRENCHANT**. *adj.* [*trenchant*, Fr.]. Cutting sharp.—He fiercely took his *trenchant* blade in hand. *Spenser*.—

Against a vanquish'd foe, their swords

Were sharp and *trenchant*, not their words. *Hud*.

TRENCHARD, John, a political writer, born in Somersetshire in 1669. He studied the law, but

never practised it. Being elected M. P. for Taunton, in his native county, he wrote several political pamphlets. In conjunction with Mr Gordon, he wrote *Cato's Letters*, and *The Independent Whig*. (See GORDON, N° 4.) He died in 1723; and his friend Gordon married his widow.

* **TRENCHER**. *n. f.* [from *trench*; *trenchoir*, Fr.] 1. A piece of wood on which meat is cut at table.—I'll scrape *trencher*. *Shak*.—One which holds a *trencher*. *Shak*.—Set the dish or *trencher* on the ground. *More*.—

Their homely fare dispatch'd; the hungry band

Inva'de their *trenchers* next. *Dryd*.

—A square *trencher*, or round plate. *Locke*. 2. The table.—

How often hast thou

Fed from my *trencher*. *Shak*.

3. Food; pleasures of the table.—Some men could not place their *sumum bonum* upon their *trenchers*, and their utmost felicity in wine. *South*.

* **TRENCHERFLY**. *n. s.* [*trencher* and *fly*]. One that haunts tables; a parasite.—*Trencherflies* and spongers. *L'Estrange*.

* **TRENCHERMAN**. *n. s.* [*trencher* and *man*]. 1. A cook. Obsolete.—The skillfullest *trenchermen* of Media. *Sidney*. 2. A feeder; an eater.—He's a very valiant *trencherman*; he hath an excellent stomach. *Shak*.

* **TRENCHMATE**. *n. s.* [*trencher* and *mate*]. A table companion; a parasite. These *trenchmates* frame to themselves a way more pleasant. *Hooker*.

TRENCH'S ISLAND, an island of the United States, on the coast of S. Carolina; 25 miles in circumference. Lon. 80. 58. W. Lat. 32. 13. N.

TRENCK, Francis baron, a Prussian nobleman, who, by some trivial piece of imprudence, had given such offence to Frederick the Great, king of Prussia, that he was kept, by the iniquitous power of that despot under a tedious, cruel, and solitary confinement for above 40 years, without ever being brought to trial, or confronted with his accusers. From this cruel imprisonment, he at last effected his escape, and published a very interesting memoir of his life, sufferings, and innocence. But while this narrative interested the feelings of every humane reader in Europe, in favour of the author, he took refuge in France, expecting to enjoy that *liberty and equality* which the French democrates professed to hold out to all mankind. But instead of this, the revolutionary tribunal of the French republic, proved more savage, than the despot of Prussia himself, and condemned to the guillotine a man whose life of protracted misfortune ought to have pled in his favour, even if he had been convicted of something really criminal, of which there never was any shadow of evidence. This unfortunate baron completed his unfortunate career in Aug. 1794.

* **To TREND**. *v. a.* To tend; to lie in any particular direction. It seems a corruption of *tend*. The coasts and *trendings* of the crooked shore. *Dryden*.

* **TRENDLE**. *n. s.* [*trendel*, Saxon.] Any thing turned round. Now improperly written *trundle*.

(1.) **TRENT**, one of the largest rivers in England, which rises in the Moorland of Staffordshire, and

and runs SW. by Newcastle under Line; and afterwards dividing the county in two parts, runs to Burton, below which it receives the water of the Dove, Derwent, Irwast, and Soar; then to Nottingham and Newark; and so continuing its course due N. to Gainfborough, it falls into the Humber. Its name is derived from *Triginta*, Lat. or *Trente*, Fr. *thirty*, because it receives 30 smaller rivers, or has 30 different kinds of fish in it.

(2.) TRENT, a province and ci devant bishopric of Germany, in Austria, near the frontiers of Italy, bounded on the N. by Tirol; on the E. by Feltrino and Bellunese; on the S. by Vicentino, all now included in Maritime Austria, also by the late Veronese, Bresciano, and lake Garda, now included in the department of the Mella and the Mincio, in the Italian kingdom; and on the W. by the said Bresciano, or department of the Mella, and the lake of Garda. The soil is fertile, and abounds in vines and olives.

(3.) TRENT, a city of Germany, capital of the above province is a very ancient place, and stands in a fertile and pleasant plain, in the midst of the high mountains of the Alps. The river Adige washes its walls. Trent has three considerable churches, the principal of which is the cathedral. The church of St Maria Major is all of red and white marble; and is remarkable for being the place where the famous COUNCIL of TRENT was held. On the 5th Sept. 1796 this city was taken by the French republicans; but restored by the treaty of Campo Formio. Lon. 11. 5. E. Lat. 46. 10. N.

(4.) TRENT, a town of Upper Saxony, in the Isle of Rugen; 11 miles NW. of Berg.

(5.) TRENT, a river of Canada, which runs from the Rice Lake into Lake Ontario.

(6.) TRENT, a river of the United States, in N. Carolina; which runs into the Neuse, at Newbern.

(7.) TRENT, a town of England, in Somersetshire, between Elcheffer and Milburn Port.

(8.) TRENT, COUNCIL of, in ecclesiastical history, denotes a council assembled by Paul III. in 1545, and continued by 25 sessions till the year 1563, under Julius III. and Pius IV. in order to correct, illustrate, and fix with perspicuity, the doctrine of the church, to restore the vigour of its discipline, and to reform the lives of its ministers. The decrees of this council, together with the creed of Pope Pius IV. contain a summary of doctrines of the Roman Catholics. These decrees were subscribed by 255 clergymen consisting of 4 legates, 2 other cardinals, 3 patriarchs, 25 archbishops, 168 bishops, besides inferior clergy. Of these 150 came from Italy; of course the council was entirely under the influence of the pope. For a more particular account of the council of Trent, see *Mosheim's Church History*, the *Modern Universal History*, Vol. XXIII. and *Father Paul's History of the Council of Trent*.

* TRENTALS. *n. f.* [*trente*, Fr.] *Trentals* or *trigintals* were a number of masses, to the tale of thirty, said on the same account, according to a certain order instituted by Saint Gregory. *Ayliff.*

TRENTHAM, a town of England in Staffordshire, on the Trent: 3 miles from Newcastle under Line.

VOL. XXII. PART II.

(1.) TRENTON, the capital of New Jersey, is seated in the Hunterdon county, on the NE. bank of the Delaware, opposite the Falls, 30 miles above Philadelphia. It contains about 300 houses; besides a state-house, a handsome court-house, where courts are held quarterly, and 4 churches for Presbyterians, Episcopalians, Quakers, and Methodists. A federal court is also held in it on the 2d April and 2d October. The environs of this city are ornamented and improved by a great number of gentlemen's seats along the banks of the Delaware. The river is navigable only a short way above the town for vessels carrying 500 bushels. At this town the British troops were defeated by the Americans, on the 25th December 1776. (See AMERICA, § 17.) Trenton lies 24 miles NNE. of Philadelphia. Lon. 74. 48. W. Lat. 40. 15. N.

(2.) TRENTON, a town of N. Carolina, capital of Jones county. It is seated on the S. bank of Trent. It has a court-house, and county courts are held in it, the 2d Monday of February, May, August and November.

(3.) TRENTON, a post town of the United States, in Maine, Hancock county: 286 miles from Boston, and 634 from Philadelphia.

TRENTWITH, a town of England, in Cornwall, near Madern.

TREOUEN, a town of England, in Monmouthshire on the SW. of Monmouth.

(1.) * TREPAN. *n. f.* [*trepan*, Fr.] 1. An instrument by which chirurgeons cut out round pieces of the skull. 2. A snare; a stratagem by which any one is ensnared. [Of this signification *Skinner* assigns for the reason, that some English ships in queen Elizabeth's reign being invited, with great shew of friendship, into *Trapani*, a part of Sicily, were there detained.]—How very active in his own *trepan*? *Rescommon*.—Snare, hooks, and *trepan*? *South*.—It deceives the reason and is indeed a real *trepan* upon it. *South*.

(2.) TREPAN. See SURGERY, Index.

* To TREPAN. *v. a.* [from the noun; *trepaner*, Fr.] 1. To perforate with the trepan.—*Trepanning* the bone. *Wifeman*.—Few recovered of those that were *trepanned*. *Arbuthnot*. 2. To catch; to ensnare.—They *trepanned* the state. *Hudibras*.—Those are but *trepanned* who are called to govern. *South*.

TREPANNING. *part. n. f.* See SURGERY, Index.

TREPASSER'S BAY, a bay on the S. coast of Newfoundland. Lon. 53. 0. W. Lat. 46. 40. N.

(1.) * TREPHINE. *n. f.* A small trepan; a smaller instrument of perforation managed by one hand.—I shewed a trepan and *trephine*. *Wifeman*.

(2.) TREPHINE. See SURGERY, Index.

* TREPIDATION. *n. f.* [*trepidatio*, Lat.] 1. The state of trembling, or quivering.—The bow holdeth the string in a continual *trepidation*. *Bacon*. *Nat. Hist.*—*Trepidation* and horror. *Bacon*.—*Trepidation* of the spheres. *Donne*.—

That crystalline sphere whose balance weighs
The *trepidation* talk'd, and that first-mov'd.

Milton.

2. State of terror.—The whole kingdom stood in a zealous *trepidation*. *Wotton*.—The success of

N n n

that

that great day, in such *trepidation* of the state, made every man meritorious. *Wotton*.

TREPORT, a sea-port town of France in the dep. of the Lower Seine; seated on the English Channel, at the mouth of the Bresle. It is the port for the town of Eu; from it, it is $1\frac{1}{2}$ miles distant.

TRERO, a river of Italy, in the Campania of Rome, which runs into the Garigliano, near Isolella on the

TRESUS, a river of Italy in Latium, running into the L

TRESCAU, } or St NICOLAS, one of the Scilly
TRESCAW, } Islands. See SCILLY, N° 1. §

TRESHANISH, or } ISLANDS. See TREISH-
TRESHUNISH, } NISH.

(1.) * **TRESPASS**. *n. f.* [*trespai*, Fr.] 1. Transgression; offence.—Most common *trespas*. *Shak.*—Such a petty *trespas*? *Milton*. 2. Unlawful entrance on another's ground.

(2.) **TRESPASS**, in law, signifies any transgression of the law, under treason, felony, or imprisonment of either; but it is commonly used for any wrong or damage that is done by one private person to another, or to the king in his forest.

* **To TRESPASS**. *v. n.* [*trespasser*, Fr.] 1. To transgress; to offend.—They *trespas*ed against me, *Lev. xxvii. 43.*—They *trespas* against all logic. *Norris*. 2. Unlawful entrance on another's ground.—None *trespas*'d on the other's ground. *Prior*.

* **TRESPASSER**. *n. f.* [from *trespas*.] 1. An offender; a transgressor. 2. One who enters unlawfully on another's ground.—If I come upon another's ground I am a *trespasser*. *Walton*.

* **TRESSED**. *adj.* [from *treffe*, French.] Knotted or curled.—He plunged in pain his *tressed* locks doth tear. *Spenser*.

* **TRESSES**. *n. f.* without a singular. [*treffes*, Fr. *treccia*, Italian.]—A knot or curl of hair.—

Comets, importing change of tides and states
Brandish your crystal *treffes* in the sky. *Shak.*
Under the flowing gold.

Of her loose *treffes* hid. *Milton*.

Adam had wove—A garland to adorn
Her *treffes*. *Milton*.

Fair *treffes* man's imperial race ensnare. *Pope*.
Not all the *treffes* that fair hair can boast. *Pope*.

TRESSURE, in heraldry, a diminutive of an ore, usually held to be half the breadth thereof.

TRES TABERNÆ, in ancient geography, a town of Latium, lying on the Via Appia, on the S. side of the Astura, N. of the Paludes Pomptinæ. Its ruins are now seen near Cisterna, a village in the Campagna of Rome 21 miles from Rome, whence the Christians went out to meet St Paul.

TRESTINA, a town of European Turkey in Moldavia; 24 miles SE. of Jassy.

* **TRESTLE**. *n. f.* [*treseau*, Fr.] 1. The frame of a table. 2. A moveable form by which any thing is supported.

TRESTLE-TREES, in ship-building, two strong bars of timber fixed horizontally on the opposite sides of the lower mast-head, to support the frame of the top and the weight of the top mast. See **MAST**, § 2.

(1.) * **TRET**. *n. f.* [Probably from *tritus*, Lat.] An allowance made by merchants to retailers, which is four pounds in every hundred weight, and four pounds for waste or refuse of a commodity. *Bailey*.

(2.) **TRET**, in commerce, is commonly 4lb. in every 100 lb. weight.

TRETHIMOROU, a town in the ci-devant kingdom of Poland, in Lower Volhynia, seated on the Dniester; 45 miles below Kiow; now annexed to Prussia.

* **TRETHINGS**. *n. f.* [*trethingi*, low Lat. from *trethu*, Welsh, to tax.] Taxes; imposts.

TRETS, a town of France, in the dep. of the Mouths of the Rhone; 12 miles ESE. of Aix, and 20 NE. of Marseilles.

(1.) **TREVANNION'S ISLAND**, an island in the S. Pacific Ocean, near the coast of Egmont Island, or New Guernsey, in the bay N° 2. Lon. 163. 43. E. Lat. 10. 41. S.

(2.) **TREVANNION'S LAGOON**, a bay of the S. Pacific Ocean, on the coast of the above island.

TREUCHLINGEN, a town of Franconia, in Anspach, on the Altmühl; 18 miles SSE. of Anspach.

TREUEN, or *Dreyen*, a town of Upper Saxony, in Vogtland; 9 miles ENE. of Plauen, and 4 WNW. of Auerbach.

TREUENBRIETZEN, a town of Brandenburg.

TREVERI, or **TREVIRI**, an ancient and powerful people of Gallia Belgica, who inhabited the country between the Meuse and the Rhine. Their chief town was **TREVERIS**. *Mela*. iii. c. 2.

TREVERIS, **TREVIRIS**, or *Augusta Trevirorum*, in ancient geography, a town of Gallia Belgica, the capital of the **TREVERI**; now called **TREVES**.

(1.) **TREVES**, or **TRIERS**, a ci-devant archbishopric, electorate, and principality of Germany, now annexed to the French empire, and included in the dep. of the Sarre. See **SARRE**, N° 3. Before the late revolutionary war, it was an independent principality of considerable extent; being bounded on the N. by the late electorate of COLOGNE, now also annexed to the French empire; on the E. by the ci-devant estates of the elector palatine, and of the house of Nassau, now also annexed to the French empire; on the S. by old France; on the W. by the ci-devant duchy of Luxemburg, now likewise included in the French empire, and forming the department of **FORETS**. This electorate and bishopric was 80 miles long; but its exact breadth was never precisely ascertained by geographers. It is in general mountainous and woody, but contains in many places good arable land, as well as excellent pasturage for cattle; but though it produces great quantities of corn, as well as vines, from which excellent wine is made, yet frequent importations of corn are necessary. The woods abound with game, and the mines with iron, lead, tin, copper, silver, and gold, calamy, and coals. This country was anciently inhabited by the **TREVIRI**, a brave Gallo-Belgic nation; from whom both its ancient and modern names are derived. Being reduced with the rest of Gaul under the Roman yoke; they continued

subject to the Romans till the 4th century; when the whole country was over-run by the Franks, A. D. 458. In the divisions of territory, which took place among the sons and posterity of CHARLEMAGNE, this country was added, in 835, to the kingdom of LORRAINE; and in 870, it fell to the share of Lewis king of Germany; ever since which period, it continued to be annexed to the German empire: till 1795, after the subjugation of the Austrian Netherlands, the Belgic territories on the W. or left bank of the Rhine were over-run by the French republicans, to whom they fell the more easy a prey, that the inhabitants were previously disaffected to the German government, and wished for a change. The whole of these territories were accordingly annexed to the then French republic, and divided first into 6 departments in 1796; and afterwards, in 1798, into 4.

(2.) TREVES, or TRIERS, a city of the French empire, the capital of the department of the SARRS, as it formerly was of the above electorate, archbishopric, and principality. The city may vie with most in Europe for antiquity, having been a large and noted town before Augustus settled a colony in it, and called it *Augusta Treverorum*. It was free and imperial till 1560, when it was surprised and subjected by its archbishop James III. It stands on the Moselle, over which it has a good stone bridge. The cathedral is a large building; and near it stands the late elector's palace. Before the revolution, it had three collegiate and five parish churches, 13 monasteries and nunneries, an university founded in 1472, a house of the Teutonic order, and another of that of Malta, with some remains of the ancient Roman theatre. Roman coins and medals are often found in the ruins of the old city. In the cathedral they pretend to have our Saviour's coat and St Peter's staff, to which they ascribe miracles. The private houses here are mean; and the city is neither well fortified nor inhabited. Treves lies 32 miles S. of Cologne, 60 W. of Mentz, 82 N. of Strasburg, 1450 WNW. of Vienna. Lon. 6. 41. E. Lat. 49. 45. N.

(3.) TREVES, a town of France, in the dep. of the Gard; 12 miles E. of Vigan.

* TREVET. *n. f.* [*trieftet*, Saxon; *trepied*, Fr.] Any thing that stands on tree legs: as, a stool.

(1.) TREVI, a town of Italy, in the Campania of Rome; anciently a bishop's see, erected A. D. 1000, but united to Anguini, in 1260. It is 32 miles E. of Rome.

(2.) TREVI, a town of Italy, in the duchy of Spoleto, and dominions of the pope, 3 miles N. of Spoleto.

(3.) TREVI, a town of Italy, in Umbria, also in the pope's dominions; 23 miles SE. of Perugia. Lon. 11. 51. E. Lat. 42. 54. N.

TREVICO, a town of Naples, and a bishop's see, in Principato Ultra; 15 miles of Conza, and 17. E. of Benevento.

TREVIERS, a town of France, in the dept. of the Calvados; 7½ miles W. of Bayeux, and 12 E. of Carentan.

TREVIGI. See TREVISO.

TREVIGIANO. See TREVISANO.

TREVIGIO. See TREVISO.

TREVIGLIO, a town of Italy, in the depart-

ment of the Olona, and ci-devant duchy of Milan 17 miles ENE. of Milan.

TREVIGNO. See TREVINO.

TREVIGO, a town of England, in Cornwall; near Lestwithiel.

TREVILL, } 4 small towns of England,
TREVILLET, } in the county of Cornwall;
TREVILLOCK, } 1. at the Land's End: 2.
TREVINET, } SE. of Tintagel Castle: 3.
near Grampond: 4 on the W. of Truro.

TREVINO, a strong town of Spain, in Biscay, with a castle seated on a hill, near the Aguda; 10 miles SW. of Vittoria. Lon. 3. 4. W. Lat. 42. 48. N.

TREVIRI. See TREVERI.

TREVISAN, } TREVISANO, or TREVIGIA-
TREVISANA, } NO, a province of Italy, formerly in the late Venetian territory. It is 50 miles long and 40 broad, and lies between Friuli and Paduana. A small part of it is mountainous, but the greater part is level, and is very fertile, that it has been styled by some former Italian writers, *the Granary of Venice*. It produces all sorts of grain and fruits in great plenty; vines and mulberry trees also abound, which afford excellent wine and silk. Numerous flocks of sheep also afford fine wool; and black cattle being numerous, butter and cheese are abundant. Hares, fieldfares, partridges, turkeys, quails, snipes, and other game abound. The rivers, lakes and coasts, abound with fish. The chief rivers are the PLAVE, the SILE, and the MUSONE. The woods afford excellent timber; that of *Montella* abounds in oak, and is 7 miles long and 4 broad. Trevisana is divided into 4 districts: viz. *Trevigo*, *Belluno*, *Fertirino*, and *Geneda*. These are subdivided into 10 parishes, and contain about 280,000 inhabitants. Their chief manufactures are cloth, silk, and paper.

TREVISANI, Francis, an eminent Italian painter, born at Trieste, in 1635. He married a noble Venetian lady, and settled at Rome, where he acquired great fame, for history and landscapes. He died in 1746.

TREVISANO. See TREVISANA.

(1.) TREVISI, Jerome, a celebrated Italian painter of history and portraits, born at Treviso, in 1508. He became painter to Henry VIII. king of England; who appointed him engineer at the siege of Boulogne, where he was killed, in 1544.

(2.) TREVISI, } or TREVIGI, an ancient city,
TREVISIUM, } capital of the *Trevusan*, with a
TREVISO, } strong citadel, is seated on an agreeable plain, on the banks of the *Sile*, which runs through it, and is connected by navigable canals, with the lakes of Venice, and is also joined by the *Piavefella*, which runs through this town in three branches. The city is three miles in circumference; and contains 2,500 houses, and 22,000 inhabitants; who are very industrious and flourish by their silk, wines, and woollen manufactures, and their great fair in October, which is well frequented; and has theatrical exhibitions, and every thing else that can attract company. Besides the cathedral, it has 16 churches, 21 monasteries, 4 hospitals, and a *pawn-bank*. The streets are well paved, and surrounded with piazzas. TOTILLA, king of the Goths was a native

tive of this city. It lies 20 miles NW. of Venice, and 70 NE. of Mantua. Lon. 11. 25. E. Lat. 45. 44. N.

TREVITHIC, a town of England, in Cornwall; near Tregony.

TREVOIL, a town of France, in the dep. of Mont Blanc, and ci-devant Savoy; 10 miles NW. of Chambéry.

TREVONA, a town of England, in Cornwall; SW. of Tregony.

TREVOSE, a promontory of England, on the NW. coast of Cornwall; 5 m. SW. of the Alan.

TREVOUR, a sea port town of England, in Cornwall; between Great Cornwall, and Padstow Haven.

TREVOUTH, a town of England, in Cornwall, near Great Columb.

TREVOUX, an ancient town of France, in the dep. of the Ain, and ci-devant province of Bresse. It has an hospital, and a printing office, famous for printing the *Jesuit Literary Journals*, entitled *Memoires de Trevoux*; and the *Dictionnaire Universel*. Trevoux is seated on the Saone, 12 miles N. of Lyons, and 188 S. by E. of Paris. Lon. 4. 51. E. Lat. 45. 57. N.

TREWARDINOCK, a town of England, in Cornwall, near Tregony.

TREWARDRETH BAY, a bay of the English Channel, on the S. coast of Cornwall; 3 miles W. of Povey. Lon. 4. 42. E. Lat. 50. 18. N.

TREWIA, in botany, a genus of plants, of the class polyandria, and order of monogynia.

* TREY. *n. f.* [*tres*, Lat. *trois*, Fr.] A three at cards.—

—Honey, milk, and sugar: there is three.

—Nay then, two *treys*; methlegin, wort, and malmsey. *Shak.*

TREYA, a town of Denmark, in Sleswick; 9 miles W. of Sleswick.

TREYSA, a town of Germany, in Hesse, capital of Ziegenheim, 32 miles SW. of Cassel, and 14 E. or 17 N. of Marburg. Lon. 9. 15. E. Lat. 50. 50. N.

TREZZO, a town in Italy, in the dep. of the Orona, and ci-devant duchy of Milan, seated on the Adda. Lon. 9. 15. E. Lat. 45. 45. N.

* TRIABLE. *adj.* [from *try*.] 1. Possible to be experimented; capable of trial.—Experiments *triable* by our engine. *Boyle*. 2. Such as may be judicially examined. Causes *triable* in the spiritual court. *Ayliffe*.

* TRIAD. *n. f.* [*trias*, Lat. *triade*, Fr.] Three united.

* (1.) TRIAL. *n. f.* [from *try*.] 1. Test; examination.—With *trial* fire touch me his finger end. *Shak.* 2. Experiment; act of examining by experience.—Your *trial* shall better publish his commendation. *Shak.*—Garcemera make *trial* of the seeds. *Bacon*.—Trials of issues and events of actions. *Wilkins*. 3. Experience; experimental knowledge.—Others had *trial* of cruel mocking and scourgings. *Heb.* 4. Judicial examination.—*Trial* is used in law for the examination of all causes, civil or criminal. *Cowel*.—Law shall scorn him further *trial*. *Shak.*—Suits and judicial trials. *Ketleswell*.—They shall come upon their trials. *Nelson*. 5. Temptation; test of virtue.—

Our trials, when least fought, May find us both perhaps far less prepar'd. *Milt.*—Every station is exposed to some trials. *Rogers*. 6. State of being tried.—All purity, all trial, all observance. *Shak.*

(2.) TRIAL, in law, the examination of a cause according to the laws of the land before a proper judge; or it is the manner and order observed in the hearing and determining of causes. Trials are either *civil* or *criminal*.

1. TRIALS, CIVIL. The species of trials in civil cases are seven: By *record*; by *inspection*, or examination; by *certificate*; by *oath*; by *wager of battel*; by *wager of law*; and by *jury*. The first 6 are only had in certain special or eccentric cases, where the trial by jury would not be so proper or effectual. (See *BATTLE*, § 2, and *LAW*.) The nature of the last, that principal criterion in the law of England, we proceed to explain.

TRIAL BY JURY, has by some authors been attempted to be traced as high as the Britons themselves, the first inhabitants of our island; but certain it is, says Blackstone, that they were in use among the earliest Saxon colonies, their institution being ascribed by bishop Nicholson to Woden himself, their great legislator and captain. Hence it is, that we may find traces of juries in the laws of all those nations which adopted the feudal system, as in Germany, France, and Italy; who had all of them a tribunal composed of 12 good men and true, *boni homines*, usually the vassals or tenets of the lord, being the equals or peers of the parties litigant; and, as the lord's vassals judged each other in the lord's courts, so the king's vassals, or the lords themselves, judged each other in the king's court. In England we find actual mention of them so early as the laws of king Ethelred, and that not as a new invention. The truth seems to be, that this tribunal was universally established among all the northern nations, and so interwoven in their very constitution, that the earliest accounts of the one give us also some traces of the other." This opinion has been controverted with much learning and ingenuity by Dr Pettingal in his *Enquiry into the Use and Practice of Juries among the Greeks and Romans*, who deduces the origin of juries from these ancient nations. He begins with determining the meaning of the word *δικασται* in the Greek, and *judices* in the Roman, writers, (says he,) and the idea generally annexed to them, is that of *presidents of courts*, or, as we call them, *judges*; as such they are understood by commentators, and rendered by critics. Dr Middleton, in his life of Cicero, expressly calls the *judices*, *judges of the bench*: and Abp. Potter, and in short all modern writers upon the Greek or Roman orators, or authors in general, express *δικασται* and *judices* by such terms as convey the idea of *presidents in courts of justice*. The propriety of this is doubted of, and hath given occasion for this inquiry; in which is shown, from the best Greek and Roman authorities, that neither the *δικασται* of the Greeks, nor the *judices* of the Romans, ever signified *presidents in courts of judicature*, or *judges of the bench*; but, on the contrary, they were distinguished from each other, and the difference

ference of their duty and function was carefully and clearly pointed out by the orators in their pleadings, who were the best authorities in those cases, where the question related to forms of law, and methods of proceeding in judicial affairs and criminal process. The presidents of the courts in criminal trials at Athens were the nine archons, or chief magistrates, of which whoever presided was called *ἀρχὴν δικαστῆν*, or president of the court. These nine presided in different causes peculiar to each jurisdiction. The archon, properly so called, had belonging to his department all pupillary and heritable cases; the *ἑταῖρος* or *rex sacrorum*, the chief priest, all cases where religion was concerned; the polemarchus, or general, the affairs of the army and all military matters; and the six *ἑταῖροι*, the other ordinary suits. Wherever then the *ἀρχὴν δικαστῆν*, or judicial men, are addressed by the Greek orators in their speeches, they are not to be understood to be the presiding magistrates, but another class of men, who were to inquire into the state of the cause before them, by witnesses and other methods of coming at truth; and, after inquiry made and witnesses heard, to report their opinion and verdict to the president, who was to declare it. The several steps and circumstances attending this judicial proceeding are so similar to the forms observed by our jury, that the learned reader cannot doubt but that the nature, intent, and proceedings of the *δικαστῆν* among the Greeks were the same with the English jury, namely, for the protection of the lower people from the power and oppression of the great, by administering equal law and justice to all ranks; and therefore when the Greek orators directed their speeches to the *ἀρχὴν δικαστῆν*, as we see in Demosthenes, Æschines, and Lysias, we are to understand it in the same sense as when our lawyers at the bar say, *Gentlemen of the jury*. So likewise among the Romans, the *judices*, in their pleadings at the bar, never signified judges of the bench, or presidents of the court, but a body or order of men, whose office in the courts of judicature was distinct from that of the *prætor* or *judex questorius*, which answered to our judge of the bench, and was the same with the archon, or *ἀρχὴν δικαστῆν*, of the Greeks; whereas the duty of the *judices*, consisted in being impannelled, as we call it, challenged, and sworn to try uprightly the case before them; and when they had agreed upon their opinion or verdict, to deliver it to the president who was to pronounce it. This kind of judicial process was first introduced into the Athenian polity by Solon, and thence copied into the Roman republic, as probable means of procuring just judgment, and protecting the lower people from the oppression or arbitrary decisions of their superiors. When the Romans were settled in Britain as a province, they carried with them their *jura* and *instituta*, their laws and customs, which was a practice essential to all colonies; hence the Britons, and several countries of Germany and Gaul, learned from them the Roman laws and customs; and upon the irruption of the northern nations into the southern kingdoms of Europe, the laws and institutions of the Romans remained, when the power that introduced them was

withdrawn; and Montesquieu tells us, that under the first race of kings in France, about the fifth century, the Romans that remained, and the Burgundians their new masters, lived together under the same Roman laws and police, and particularly the same forms of judicature. How reasonable then is it to conclude, that in the Roman courts of judicature continued among the Burgundians, the form of a jury remained in the same state it was used at Rome. It is certain, Montesquieu, speaking of those times, mentions the *paires* or *hommes de fief*, homages or peers, which in the same chapter he calls *juges*, *judges* or *jurymen*: so that we hence see how at that time the *hommes de fief*, or "men of the fief," were called *peers*, and those peers were *juges* or *jurymen*. There were the same as are called in the laws of the confessor *peers de la tenure*, the "peers of the tenure," or *homagers*, "out of whom the jury of peers were chosen, to try a matter in dispute between the lord and his tenant, or any other point of controversy in the manor. So likewise in all other parts of Europe, where the Roman colonies had been, the Goths succeeding them continued to make use of the same laws and institutions, which they found to be established there by the first conquerors. This is a much more natural way of accounting for the origin of a jury in Europe, than having recourse to the fabulous story of Woden and his savage Scythian companions, as the first introducers of so humane and beneficent an institution." Trials by jury in civil causes are of two kinds, *extraordinary* and *ordinary*. 1. The first species of extraordinary trial by jury is that of the grand assize, which was instituted by king Henry II. in parliament, by way of alternative offered to the choice of the tenant or defendant in a writ of right, instead of the barbarous and unchristian custom of duelling. For this purpose a writ *de magna assisa eligenda* is directed to the sheriff, to return 4 knights, who are to elect and choose 12 others to be joined with them; and these altogether form the grand assize, or great jury, which is to try the matter of right, and must now consist of 16 jurors. Another species of extraordinary *jurors*, is the jury to try an attain; which is a process commenced against a former jury for bringing a false verdict. See *ATTAIN*. 2. With regard to the *ordinary* trial by jury in civil cases, the most clear and perspicuous way of treating it will be by following the order and course of the proceedings themselves. When therefore an issue is joined by these words, "And this the said A prays may be inquired of by the country;" or, "And of this he puts himself upon the country, and the said B does the like; the court awards a writ of *venire facias* upon the roll of record, commanding the sheriff "that he cause to come here, on such a day, twelve free and lawful men, *liberos et legales homines*, of the body of his country, by whom the truth of the matter may be better known, and who are neither of kin to the aforesaid A nor the aforesaid B, to recognize the truth of the issue between the said parties." And such writ is accordingly issued to the sheriff. It is made returnable on the last return of the same term wherein issue is joined, *viz.* hilyar or trinity terms; which, from the making up of the issues therein,

therein, are usually called *issuable terms*. And he returns the names of the jurors in a panel (a little pane or oblong piece of parchment) annexed to the writ. This jury is not summoned, and therefore not appearing at the day, must unavoidably shake default. For which reason a compulsive process is now awarded against the jurors, called in the common pleas a writ of *habeas corpora juratorum*, and in the King's Bench *disfringas*, commanding the sheriff to have their bodies, or to detain them by their lands and goods, that they may appear upon the day appointed. The entry therefore on the roll of record is, "That the jury is repleited, through defect of the jurors, till the first day of the next term, then to appear at Westminster, unless before that time, viz. on Wednesday the fourth of March, the justices of our lord the king appointed to take assizes in that county shall have come to Oxford, that is, to the place assigned for holding the assizes. Therefore the sheriff is commanded to have their bodies at Westminster on the said first day of next term, or before the said justices of assize, if before that time they come to Oxford, viz. on the 4th of March aforesaid." And as the judges are sure to come and open the circuit-commissions on the day mentioned in the writ, the sheriff returns and summons this jury to appear at the assizes; and there the trial is had before the justices of assize and *nisi prius*; among whom (see ASSIZE) are usually two of the judges of the courts at Westminster, the whole kingdom being divided into six circuits for this purpose. And thus we may observe, that the trial of common issues at *nisi prius*, was in its original only a collateral incident to the original business of the justices of assize; though now, by the various revolutions of practice, it is become their principal civil employment, hardly any thing remaining in use of the real assizes but the name. If the sheriff be not an indifferent person, as if he be a party in the suit, or be related by either blood or affinity to either of the parties, he is not then trusted to return the jury; but the *venire* shall be directed to the coroners, who in this, as in many other instances, are the substitutes of the sheriff to execute process when he is deemed an improper person. If any exception lies to the coroners, the *venire* shall be directed to two clerks of the court, or two persons of the county named by the court, and sworn. And these two, who are called *elisors*, or electors, shall indifferently name the jury, and their return is final, no challenge being allowed to their array. When the general day of trial is fixed, the plaintiff or his attorney must bring down the record to the assizes, and enter it with the proper officer, in order to its being called on in court. These steps being taken, and the cause called on in court, the record is then handed to the judge, to peruse and observe the pleadings, and what issues the parties are to maintain and prove, while the jury is called and sworn. To this end the sheriff returns his compulsive process, the writ of *habeas corpora*, or *disfringas*, with the panel of jurors annexed, to the judge's officer in court. The jurors contained in the panel are either special or common jurors. Special juries were originally introduced in trials at bar, when

the cause were of too great nicety for the discussion of ordinary freeholders; or where the sheriff was suspected of partiality, though not upon such apparent cause as to warrant an exception to him. He is in such cases, upon motion in court, and a rule granted thereupon, to attend the prothonotary or other proper officer with his freeholder's book; and the officer is to take indifferently 48 of the principal freeholders, in the presence of the attorneys on both sides; who are each of them to strike off 12, and the remaining 36 are returned upon the panel. By the statute 3 Geo. II. c. 25, either party is entitled upon motion to have a special jury struck upon the trial of any issue, as well at the assizes as at bar, by paying the extraordinary expence, unless the judge will certify (in pursuance of the statute 24 Geo. II. c. 18.) that the cause required such special jury. A common jury is one returned by the sheriff according to the directions of the statute 3 Geo. II. c. 25, which appoints, that the sheriff or officer shall not return a separate panel for every separate cause, as formerly; but one and the same panel for every cause to be tried at the same assizes, containing not less than 48, nor more than 72 jurors; and that their names being written on tickets, shall be put into a box of glass; and when each cause is called, 12 of these persons, whose names shall be first drawn out of the box, shall be sworn upon the jury, unless absent, challenged, or excused, or unless a previous view of the messuages, lands, or place in question, shall have been thought necessary by the court; in which case, six or more of the jurors returned, to be agreed on by the parties, or named by a judge or other proper officer of the court, shall be appointed by special writ of *habeas corpora* or *disfringas*, to have the matters in question shown to them by two persons named in the writ; and then such of the jury as have had the view, or so many of them as appear, shall be sworn on the inquest previous to any other jurors. These acts are well calculated to restrain any suspicion of partiality in the sheriff, or any unless challenged by either party. See the article CHALLENGE. If by means of challenges or other cause, a sufficient number of unexceptionable jurors doth not appear at the trial, either party may pray a *tales*. A *tales* is a supply of such men as are summoned upon the first panel, in order to make up the deficiency. For this purpose a writ of *decem tales*, *octo tales*, and the like, was wont to be issued to the sheriff at common law, and must be still so done at a trial at bar, if the jurors make default. But at the assizes, or *nisi prius*, by virtue of the statute 35 Hen. VIII. c. 6. and other subsequent statutes, the judge is empowered at the prayer of either party to award a *tales de circumstantibus* of persons present in court, to be joined to the other jurors to try the cause; who are liable, however, to the same challenges as the principal jurors. This is usually done till the legal number of 12 be completed, in which patriarchal and apostolical number Sir Edward Coke hath discovered abundance of mystery. When a sufficient number of persons impanelled, or talesmen appear, they are then separately sworn, well

and truly to try the issue between the parties, and to give a true verdict according to the evidence; and hence they are denominated "the jury," *jurata*, and "jurors," *sc. juratores*. The jury are now ready to hear the merits; and to fix their attention the closer to the facts which they are impanelled and sworn to try, the pleadings are opened to them by counsel on that side which holds the affirmative of the question in issue. For the issue is said to lie, and proof is always first required upon that side which affirms the matter in question: in which our law agrees with the civil, *ei incumbit probatio qui dicit, non qui negat; even per rerum naturam factum negantis probatio nulla fit*. The opening counsel briefly informs them what has been transacted in the court above; the parties, the nature of the action, the declaration, the plea, replication, and other proceedings; and lastly, upon what point the issue is joined, which is there first down to be determined. Instead of which, formerly the whole record and process of the pleadings were read to them in English by the court, and the matter of issue clearly explained to their capacities. The nature of the case, and the evidence intended to be produced, are next laid before them by counsel also on the same side; and when their evidence is gone through, the advocate on the other side opens the adverse case, and supports it by evidence, and then the party which began is heard by way of reply. See PLEADINGS. Evidence in the trial by jury is of two kinds; either that which is given in proof, or that which the jury may receive by their own private knowledge. The former, or *proofs*, (to which in common speech the name of evidence is usually confined) are either written or parole, that is, by word of mouth. Written proofs, or evidence, are, 1. Records; and 2. Ancient deeds of 30 years standing, which prove themselves; but, 3. Modern deeds; and 4. Other writings, must be attested and verified by parole evidence of witnesses. With regard to parole evidence or witnesses, it must first be remembered, that there is a process to bring them in by writ of *subpoena ad testificandum*; which commands them, laying aside all pretences and excuses, to appear at the trial on pain of fool to be forfeited to the king, to which the statute 5 Eliz. c. 9. has added a penalty of 10*l.* to the party aggrieved, and damages equivalent to the loss sustained by want of his evidence. But no witness, unless his reasonable expences be tendered him, is bound to appear at all; nor, if he appears, is he bound to give evidence till such charges are actually paid him, except he resides within the bills of mortality, and is summoned to give evidence within the same. All witnesses, of whatever religion or country, that have the use of their reason, are to be received and examined, except such as are infamous, or such as are interested in the event of the cause. All others are competent witnesses, though the jury from other circumstances will judge of their credibility. One witness (if credible) is sufficient evidence to a jury of any single fact; though undoubtedly the concurrence of two or more corroborates the proof. Yet our law considers that there are many transactions to which only one person is privy, and therefore does not always

demand the testimony of two. Positive proof is always required, where, from the nature of the case, it appears it might possibly have been had. But, next to positive proof, circumstantial evidence, or the doctrine of presumptions, must take place. The oath administered to the witness is not only that what he deposes shall be true, but that he shall also depose the *subtle* truth. And all this evidence is to be given in open court, in the presence of the parties, their attorneys, the counsel, and all bystanders, and before the judge and jury; each party having liberty to except to its competency, which exceptions are publicly stated, and by the judge are openly and publicly allowed or disallowed, in the face of the country. When the evidence is gone through on both sides, the judge sums up the whole to the jury, stating what evidence has been given to support the charge, with such remarks as he thinks necessary for their direction, and giving them his opinion in matters of law arising upon that evidence. The jury, after the proofs are summed up, unless the case be very clear, withdraw from the bar to consider of their verdict; and in order to avoid intemperance and causeless delay, are to be kept without meat, drink, fire, or candle, unless by permission of the judge, till they are unanimously agreed. If juries eat or drink at all, or have any estates about them, without consent of the court, and before verdict, it is fineable; and if they do so at his charge for whom they afterwards find, it will set aside the verdict. Also, if they speak with either of the parties or their agents after they are gone from the bar, or if they receive any fresh evidence in private, or if, to prevent disputes, they cast lots for whom they shall find, any of these circumstances will entirely vitiate the verdict. And it has been held, that if the jurors do not agree in their verdict before the judges are about to leave the town, though they are not to be threatened or imprisoned, the judges are not bound to wait for them, but may carry them round the circuit from town to town in a cart. When they are all unanimously agreed, the jury return back to the bar; and before they deliver their verdict, the plaintiff is bound to appear in court by himself, attorney, or counsel, in order to answer the amercement to which by the old law he is liable, in case he fails in his suit, as a punishment for his false claim. The amercement is dispensed, but the form still continues; and if the plaintiff does not appear, no verdict can be given; but the plaintiff is said to be nonsuit, *non sequitur clamorem suum*. Therefore it is usual for a plaintiff, when he or his counsel perceives that he has not given evidence sufficient to maintain his issue, to be voluntarily nonsuited, or withdraw himself; whereupon the crier is ordered to call the plaintiff, and if neither he, nor any body for him, appears, he is nonsuited, the jurors are discharged, the action is at an end, and the defendant shall recover his costs. The reason of this practice is, that a nonsuit is more eligible for the plaintiff than a verdict against him: for after a nonsuit, which is only a default, he may commence the same suit again for the same cause of action; but after a verdict had, and judgment consequent thereupon, he is for ever barred from attacking the defendant upon

upon the same ground of complaint. But in case the plaintiff appears, the jury by their foreman deliver in their verdict. A verdict, *vere dictum*, is either privy or public. A privy verdict is when the judge hath left or adjourned the court; and the jury, being agreed, in order to be delivered from their confinement, obtain leave to give their verdict privily to the judge out of court; which privy verdict is of no force, unless afterwards affirmed by a public verdict given openly in court; wherein the jury may, if they please, vary from their privy verdict. So that the privy verdict is indeed a mere nullity; and yet it is a dangerous practice, allowing time for the parties to tamper with the jury, and therefore very seldom indulged. But the only effectual and legal verdict is the public verdict; in which they openly declare to have found the issue for the plaintiff, or for the defendant; and if for the plaintiff, they assess the damages also sustained by the plaintiff, in consequence of the injury upon which the action is brought. When the jury have delivered in their verdict, and it is recorded in court, they are then discharged.

II. TRIALS, CRIMINAL. The regular and ordinary method of proceeding in the courts of criminal jurisdiction may be distributed under 12 general heads, following each other in a progressive order: viz. 1. Arrest; 2. Commitment and bail; 3. Prosecution; 4. Process; 5. Arraignment, and its incidents; 6. Plea, and issue; 7. Trial, and conviction; 8. Clergy; 9. Judgment, and its consequences; 10. Reversal of judgment; 11. Reprieve, or pardon; 12. Execution. See ARREST, COMMITMENT, PRESENTMENT, INDICTMENT, INFORMATION, APPEAL, PROCESS upon an Indictment, ARRAIGNMENT, and PLEA; in which articles all the forms which precede the trials are described, and are here enumerated in the proper order. The several methods of trial and conviction of offenders, established by the laws of England, were formerly more numerous than at present, through the superstition of our Saxon ancestors; who, like other northern nations, were extremely addicted to divination; a character which Tacitus observes of the ancient Germans. They therefore invented a considerable number of methods of purgation or trial, to preserve innocence from the danger of false witnesses, and in consequence of a notion that God would always interpose miraculously to vindicate the guiltless; as, 1. By ORDEAL; 2. By CORNBED; 3. By BATTEL. See these articles. 4. A 4th method is that by the peers of Great Britain, in the Court of PARLIAMENT; or the Court of the LORD HIGH STEWARD, when a peer is capitally indicted; for in case of an appeal, a peer shall be tried by jury. This differs little from the trial *per patriam*, or by jury; except that the peers need not all agree in their verdict; and except also, that special verdict can be given in the trial of a peer; because the lords of parliament, or the lord high steward (if the trial be had in his court), are judges sufficiently competent of the law that may arise from the fact; but the greater number, consisting of 12 at the least, will conclude, and binds the minority. The trial by jury, or the country, *per patriam*, is also that trial by the peers of every Briton, which, as

the great bulwark of his liberties, is secured to him by the great charter; *nallus liber homo capiat, vel imprisonetur, aut exulet, aut aliquo alio modo destruat, nisi per legale iudicium parium suorum, vel per legem terre*. When therefore a prisoner on his ARRAIGNMENT has pleaded not guilty, and for his trial hath put himself upon the country, which country the jury are, the sheriff of the county must return a panel of jurors, *liberos et legales homines, de vicineto*; that is, freeholders without just exception, and of the *visne* or neighbourhood; which is interpreted to be of the country where the fact is committed. If the proceedings are before the court of king's bench, there is time allowed between the arraignment and the trial for a jury to be impanelled by writ of *venire facias* to the sheriff, as in civil causes; and the trial in case of a misdemeanor is had at *nisi prius*, unless it be of such consequence as to merit a trial at bar: which is always invariably had when the prisoner is tried for any capital offence. But, before commissioners of oyer and terminer and goal-delivery, the sheriff, by virtue of a general precept directed to him beforehand, returns to the court a panel of 48 jurors, to try all felons that may be called upon their trial at that session; and therefore it is there usual to try all felons immediately or soon after their arraignment. But it is not customary, nor agreeable to the general course of proceedings, unless by consent of parties, to try persons indicted of smaller misdemeanors at the same court in which they have pleaded not guilty, or traversed the indictment. But they usually give security to the court to appear at the next assizes or session, and then and there to try the traverse, giving notice to the prosecutor of the same. In cases of high treason, whereby corruption of blood may ensue (except treason in counterfeiting the king's coin or seals), or misprision of such treason, it is enacted by statute 7 W. III. c. 3. first, that no person shall be tried for any such treason, except an attempt to assassinate the king; unless the indictment be found within three years after the offence committed; next that the prisoner shall have a copy of the indictment (which includes the caption), but not the names of the witnesses, five days at least before the trial, that is, upon the true construction of the act, before his arraignment; for then is his time to take any exceptions thereto, by way of plea or demurrer; thirdly, that he shall also have a copy of the panel of jurors two days before his trial; and, lastly, that he shall have the same compulsive process to bring in his witnesses for him, as was usual to compel their appearance against him. And by statute 7 Ann. c. 21. (which did not take place till after the decease of the late pretender) all persons indicted for high-treason, or misprisions thereof, shall have not only a copy of the indictment, but list of all the witnesses to be produced, and of the jurors impanelled, with their professions and places of abode, delivered to him ten days before the trial, and in the presence of two witnesses, the better to prepare him to make his challenges and defence. And no person indicted for felony is, or (as the law stands) ever can be, entitled to such copies before the time of his trial. When the trial is called on, the num-

urors are to be sworn as they appear, to the number of 12, unless they are challenged by the party. Challenges may here be made, either on the part of the king, or on that of the prisoner; and either to the whole array, or to the separate polls, for the very same reasons that they may be made in civil causes. But in criminal cases, or at least in capital ones, there is, *in favorem vite*, allowed to the prisoner an arbitrary and capricious species of challenge, to a certain number of jurors, without showing any cause at all; which is called a *peremptory* challenge. The peremptory challenges of the prisoner must, however, have some reasonable boundary; otherwise he might never be tried. This reasonable boundary is settled by the common law to be the number of 35; that is, one under the number of three full juries. By reason of challenges, or the default of the jurors, a sufficient number cannot be had of the original panel, a *tales* may be awarded as in civil causes, till the number of 12 is sworn. When the jury is sworn, if it be a cause of any consequence, the indictment is usually opened, and the evidence marshalled, examined, and enforced by the counsel for the crown or prosecution. But it is a settled rule at common law, that no counsel shall be allowed a prisoner upon his trial upon the general issue, in any capital crime, unless some point of law shall arise proper to be debated; a rule which seems to be not at all of a piece with the rest of the humane treatment of prisoners by the English law. And to say the truth, the judges themselves are so sensible of this defect in our modern practice, that they seldom scruple to allow a prisoner counsel to stand by him at the bar, and to instruct him what questions to ask, or even to ask questions for him; and by the stat. 7 W. III. c. 3. persons indicted for such high-treason as works a corruption of the blood or misprision thereof except treason in counterfeiting the king's coins or seals, may make their full defence by counsel, not exceeding two, to be named by the prisoner, and assigned by the court or judge; and this indulgence, by statute 20 Geo. II. c. 30. is extended to parliamentary impeachments for high-treason, which were excepted in the former act. When the evidence on both sides is closed, the jury cannot be discharged (unless in cases of evident necessity) till they have given in their verdict. If they find the prisoner not guilty, he is then forever quit and discharged of the accusation, except he be appealed of felony within the time limited by law. And upon such his acquittal, or discharge for want of prosecution, he shall be immediately set at large without payment of any fee to be gaoler. But if the jury find him guilty, he is then said to be convicted of the crime whereof he stands indicted. See the article CONVICTION; and, subsequent thereto, the articles JUDGMENT, ATTAINDER, FORFEITURE, EXECUTION, also CLERGY, BENEFIT OF; REPRIEVE, and PARDON.

(3.) TRIAL, in Scottish law. See LAW, Part II. *SECT. V. § 2—17.*

TRIALLIS, in botany, a genus of plants, of the class *decandria*, and order of *monogynia*, ranking in the natural method, under the 38th order, *Tricocceæ*.

TRIANDRIA, (from *τρεῖς*, three, and *ἀνδρ*, a man or

husband;) the name of the third class in Linnæus's sexual system, consisting of plants with hermaphrodite flowers, which have three stamina or male organs. See BOTANY, Index.

(1.) * TRIANGLE. *n. f.* [*triangle*, Fr. *triangulum*, Lat.] A figure of three angles.—The three angles of a triangle are equal to two right ones. *Locke*.

(2.) TRIANGLE, in geometry, a figure of three sides and three angles.

(3.) TRIANGLE ISLAND, one of the BAHAMA ISLANDS. Lon. 69. 53. W. Lat. 20. 51. N.

(4.) TRIANGLE ISLAND, an island of S. America, in the mouth of the Oronoko. In 1765, the French had a factory on it.

(5.) TRIANGLES, a dangerous shoal in the E. Indian Sea, near the N. coast of the FRIGATE ISLANDS.

(1.) * TRIANGULAR. *adj.* [*triangularis*, Latin.] Having three angles.—Seem'd circular, and part triangular. *Spenser*.—Triangular spaces left void. *Roy*.

(2.) TRIANGULAR COMPASSES are such as have 3 legs or feet, by which any triangle, or 3 points, may be taken off at once.

TRIANTHEMA, in botany, HORSE PURSLANE; a genus of plants, of the class *decandria*, and order of *monogynia*, and in the natural method, ranking in the 13th order, *Jucculentæ*.

TRIARI, the most honourable order of Roman soldiers, who were excused from the ordinary watches; yet when placed opposite to the *equites*, they were obliged to have an eye over them.

TRIAUCOURT, a town of France, in the dep. of the Meuse; 7½ miles S. of Clermont, and 12 N. of Bar.

TRIAZEVA, a town of Russia, in the province of Upa, 38 miles NNW. of Upa.

TRIAZNUCHA, a town of Russia, in the province of Upa, on the Ural; 140 miles E. of Orenburg.

TRIBALE, a town of France, in the dep. of the Tarn, 6 miles NW. of Canne.

TRIBALLI, a people of Thrace, or Lower Mœlia. They were conquered by Philip II. of Macedon, and afterwards warred against the Romans.

TRIBAN, a town of Moravia, in the circle of Olmutz, 10 miles W. of Muglitz.

* TRIBE. *n. f.* [*tribus*, Lat. from *tres*, British; *b* and *v* being labials of promiscuous use in the ancient British words; *tres* from *tir es*, his lands, is supposed by Mr Rowland to be Celtic, and used before the Romans had any thing to do with the British government. This notion will not be much recommended, when it is told, that he derives *centurie* from *tres*, supposing it to be the same with our *centres*, importing a hundred *tres* or *tribes*.] 1. A distinct body of the people as divided by family or fortune, or any other characteristic.—All the tribes and centuries. *B. Jonf.*—The heads of the tribes. *Bacon*.—

Who now shall rear you to the sun, or rank Your tribes? *Milton*.

—To rank in tribes. *Tate*.—Happy tribe of men, Addison. 2. It is often used in contempt.—Scribbling tribe. *Roscommon*.

TRIBEL, or TREBEL, a river of Pomerania.

TRIBENSEE, a town of Austria, 3 miles N. of Tulla, and 9 S. of Sonneberg.

TRIBERG, a town of Suabia, in Brigau; allotted by the division of indemnities in 1801—2, to the late D. of Modena. (See *REVOLUTION*, § VIII.) It lies 15 miles NE. of Friburg, and 15 S. of Freudenstadt. Lon. 25. 53. E. Ferro. Lat. 18. 9. N.

TRIBERT, a town of Bohemia, in Chrudim.

TRIPESERS, an ancient town of Pomerania, on the frontiers of Mecklenburg, with a fort on the Tribel, 25 miles from Rostock. Lon. 13. 8. E. Lat. 54. 1. N.

* **TRIBLET**, or } *n. f.* A goldsmith's tool for

* **TRIBOULET**. } making rings. *Ainsworth.*

TRIBRACHYS, in ancient poetry, a foot consisting of three syllables, and these all short; *an melius.*

TRIBSEES, a town of Anterior Pomerania, 23 miles SW. of Stralsund, and 21 E. of Rostock.

TRIPSTADT. See *TRIPSTADT*.

TRIBULA. See *THRASHING*, § 3.

* **TRIBULATION**. *n. f.* [*tribulation*, Fr.] Persecution; distress; vexation; disturbance of life.—*Tribulation* being present causeth sorrow. *Hock.*—Their *tribulations* long. *Milton.*—Try'd in sharp *tribulation*. *Milton.*—In all time of our *tribulation*. *Atterbury.*

TRIBULUM, in antiquity. See *THRASHING*, § 3.

TRIBULUS, in botany, *CALTROPS*; a genus of plants in the class *decandria*, and order of *monogynia*; and, in the natural method, ranking under the 14th order, *gruinales*.

(1.) * **TRIBUNAL**. *n. f.* [*tribunal*, Latin and French. 1. The seat of a judge.—I' th' market place, on a *tribunal* silver'd. *Shak.*—Judges grave on high *tribunals* frown. *Waller.*—Standing at His *tribunal*, who is infinitely wise and just. *Grew.*—An earthly *tribunal*. *Nelson.* 2. A court of justice.—The dread *tribunal*. *Milton.*

(2.) **TRIBUNAL OF CASSATION**, a court of the French empire, appointed by the Senate, on the presentation of the emperor. (See *REVOLUTION*, N° VI. § 48.)

(3.) **TRIBUNALS**, *REVOLUTIONARY*, bloody courts instituted by Robespierre, during the revolution of France, consisting entirely of his own creatures, who, acting under his influence, cut off many of the greatest men in France. See *REVOLUTION*, N° VI. § 18.

TRIBUNATE, *n. f.* a court of the French empire, established by the last constitution. See *REVOLUTION*, N° VI. § 48.

(1.) * **TRIBUNE**. *n. f.* [*tribun*, *tribunus*, Lat.] 1. An officer of Rome chosen by the people.—These are the *tribunes* of the people. *Shak.* 2. The commander of a Roman legion.

(2.) A **TRIBUNE**, among the ancient Romans, was a magistrate chosen out of the commons, to protect them against the oppressions of the great, and to defend the liberty of the people against the attempts of the senate and consuls. The *tribunes* of the people were first established A. U. C. 259. The first design of their creation was to shelter the people from the cruelty of usurers, and to engage them to quit the Aventine mount, whither they had retired in displeasure. Their

number at first was but two; but the next year, under the consulate of A. Posthumius Aruncius and Cassius Viscellinus, there were three more added; and this number of five was afterwards increased by L. Trebonius to ten.

(3.) **TRIBUNE**, *MILITARY*, an officer in the Roman army, commander in chief over a body of forces, particularly the division of a legion; much the same with our colonel.

* **TRIBUNITIAL**. } *adj.* [*tribunitius*, Latin.]

* **TRIBUNITIUS**. } Suiting a *tribune*; relating to a *tribune*.—Let them not come in multitudes, or in a *tribunitius* manner. *Bacon.*—The kings and *tribunitial* powers. *Dryden.*

TRIBUTARI. See *STIPEND*, § 2.

(1.) * **TRIBUTARY**. *adj.* [*tributaire*, Fr. *tributarius*, Lat.] 1. Paying tribute as an acknowledgment of submission to a master.—Thenceforth this land was *tributary* made. *Spenser.*—*Tributary* brooks. *Dray.*—Some poor *tributary* lord. *Dryd.*—Swell with *tributary* urns his flood. *Pope.* 2. Subject; subordinate.—*Tributary* gods. *Milton.*—Legions of lust, and various powers of ill

Insult the master's *tributary* will. *Prior.*

3. Paid in tribute.—Nor flatt'ry tunes these *tributary* lays. *Concanen.*

(2.) * **TRIBUTARY**. *n. f.* [from *tribute*.] One who pays a stated sum in acknowledgment of subjection.—The people shall be *tributaries* unto thee, and serve thee. *Deut. xx. 11.*—The Irish lords did only promise to become *tributaries* to king Henry the second. *Davies.*

* **TRIBUTE**. *n. f.* [*tribut*, Fr. *tributum*, Latin.] Payment made in acknowledgment; subjection.—Doth not your master pay *tribute*? *Matt. xvii. 2.*

She receives

As *tribute* warmth and light. *Milton.*

To acknowledge this was all he did exact;

Small *tribute*, where the will to pay was afit. *Dryden.*

(1.) **TRICALA**, a town of European Turkey, in Macedonia, 50 miles ENE. of Saloniki.

(2.) **TRICALA**, a town of European Turkey, in Thessaly, 21 miles S. of Larissa.

(3.) **TRICALA**, a fortified town of Sicily.

TRICARICO, a town of Naples, in Basilicata, 13 miles SE. of Acerenza, and 21 SW. of Matera.

TRICASSES, an ancient people of Gaul, who inhabited the country since called Champagne.

TRICASTINI, a nation of Gallia Narbonensis. *Sil. It. 3. v. 466. Liv. 21. c. 31.*

TRICCÆ, an ancient town of Thessaly. *Liv.*

* **TRICE**. *n. f.* [I believe this word comes from *trait*, Fr. corrupted by pronunciation.] A short time; an instant; a stroke.—They waste it in a *trice*. *Spens.*

All the waiters in a *trice*

His summons did obey. *Suckling.*

He could raise scruples dark and nice,

And after solve them in a *trice*. *Hudibras.*

—Leap from the dughill in a *trice*. *Swift.*—It seems incredible at first, that all the blood in our bodies should circulate in a *trice*, in a very few minutes. *Bentley.*—A man shall make his fortune in a *trice*. *Young.*

TRICEPS. See *ANATOMY*, § 212. N° 3.

TRICETO, a town of Naples, in Calabria C'tra, 14 miles ESE. of Scalea.

TRI-

TRICHECUS, the **WALRUS**; a genus of aquatic animals, belonging to the class of *mammalia*, and order of *bruta*. This genus has no fore teeth, when full grown; has two great tusks in the upper jaw, which point downwards; has grinders on each side in both jaws, which are composed of furrowed bones. The body is oblong; the lips are doubled; and the hind legs are stretched backwards, and, as it were, bound together, forming a kind of tail fitted for swimming. There are 3 species; viz.

i. **TRICHECUS DAGON**, the *Indian walrus*, is distinguished by the tusks which extend out of the mouth from the upper jaw, being placed near each other. It inhabits the sea lying between the Cape of Good Hope and the Philippine islands. This animal, so far as can be known, resembles the morse very much; (N^o 3.) the head is, however, more lengthened and narrower; the nostrils large, and placed higher; there are two tusks in the under jaw, but those in the upper jaw are placed near each other, bent outwards, and resemble cutting teeth, only that they are near six inches long; there are 4 grinders on each side in the upper jaw, and 3 in the lower; these last are distant from the tusks, and are broader than those of the morse; the female has two teats on the breast; the chin has a bristly beard; the ears are short; the feet broad; and the legs so short, that the belly trails on the ground. When full grown, the animal is six ells in length; the male being rather larger than the female, which has breasts like a woman. It feeds on a green sea moss or weed, which grows near the shore. The figure, manners, and history, of this animal, are very imperfectly known; but we are informed that its flesh eats like beef.

2. **TRICHECUS MANATUS**, *fin-tailed walrus*, *MANATI*, or *SEA COW*, has no tusks, and no high feet. Of this species there are two varieties; viz.

i. **TRICHECUS MANATUS AUSTRALIS**, or **LAMANTIN**; inhabits the African and American seas, particularly near the mouths of rivers, which they frequently enter, seldom going far from the shore. The lamantin varies in size from 8 to 17 feet long, is 6 or 7 in circumference, and from 500 to 800 lb. weight; the skin is of a dark or black ash colour; there are 9 square-shaped grinders on each side in each jaw, which are covered with a glassy crust of enamel; the back bone has 30 joints or vertebrae; it is a thick clumsy animal, having no properly distinct neck, as the body continues almost of an equal thickness to the head. The female has two teats placed near the arm-pits. These varieties differ considerably in size. This animal is often tamed by the native inhabitants of America; and it delights in music; hence it is probably the **DELPHINUS** or **DOLPHIN** of the ancients; and some believe, that what has been written concerning mermaids and sirens must be referred to this animal. It has a voracious appetite, and is perpetually eating; it is monogamous, or lives in families of one male, one female, a half grown, and a very small young one. It copulates in the spring. When pasturing on the aquatic plants, the back is often above water; and, as the

skin is full of a species of louse, numbers of sea fowls perch on them, to pick out the insects. They bellow like bulls; their sight is very weak, but their hearing extremely acute; the fore feet are palmated and fin-shaped, almost like those of a sea turtle; and instead of hind feet, they have a horizontal tail; they have no external ears; the nostrils are distinct, and at a distance from each other; the females have two teats about the breast; the upper lip is full of sharp, prickly, rigid bristles. This animal has great affinity to the whale and seal tribes. The flesh is very good eating.

ii. **TRICHECUS MANATUS BOREALIS**, the *whale-tailed manati*, inhabits the north-west coast of America, the north-east of Asia, and the islands which lie between these two coasts. This animal very often enters the mouths of the rivers; is sometimes 23 feet long, and weighs 8000 lb.; the skin, while wet, is of a brown colour, but becomes black when dry. Instead of grinders, this species has, on each side of its jaw, a large rugged bone. The back bone has 60 vertebrae or joints; the body is very clumsy, and much deformed; its circumference at the shoulders is 12 feet, at the belly 20, and near the tail only 4; the neck is near 7 feet round, and the head only 31 inches. They live perpetually in the water, and frequent the edges of the shores; and in calm weather swim in droves near the mouths of rivers; in the time of the flood they come so near the land, that a person may stroke them with his hand; if hurt, they swim out to sea, but presently return again. The females oblige the young to swim before them, while the other old ones surround, and as it were, guard them on all sides. The affection between the male and female is very great; for if she is attacked, he will defend her to the utmost; and if she is killed, will follow her corpse to the very shore, and swim for some days near the place it has been landed at. They copulate in the spring, in the same manner as the human kind. Steller thinks they go with young about a year; it is certain that they bring but one young at a time. They are vastly voracious and gluttonous; and feed not only on the fuci that grow in the sea, but such as are flung on the edges of the shore. During their meals, they are so intent on their food, that any one may go among them and choose which he likes best. Peter Martyr gives an instance of one that lived in a lake of Hispaniola for 25 years, and was so tame as to come to the edge of the shore on being called; and would even perform the part of a ferry, and carry several people at a time on its back to the opposite shore.—Their back and their sides are generally above water. They continue in the Kamtschatkan and American seas the whole year; but in winter are very lean, so that one may count their ribs. They are taken by harpoons fastened to a strong cord; and after they are struck, it requires the united force of 30 men to draw them on shore. Sometimes, when they are transfixed, they will lay hold of the rocks with their paws, and stick so fast as to leave the skin behind before they can be forced off. When a manati is struck, its companions swim to its assistance; some will

attempt to overturn the boat by getting under it; others will press down the rope, in order to break it; and others will strike at the harpoons with their tails, with a view of getting it out, in which they often succeed. They have not any voice; but make a noise by hard breathing like the snorting of a horse. The skin is very thick, black, and full of inequalities, like the bark of oak, and so hard as scarce to be cut with an axe, and has no hair on it; beneath is a thick blubber, which tastes like oil of almonds. The flesh is coarser than beef, and will not soon putrify. The young ones taste like veal. The skin is used for shoes, and for covering the sides of boats.

3. *TRICHOCUS ROSMARIUS*, the MORSE, or SEA HORSE, has a round head; small mouth; very thick lips, covered above and below with pellucid bristles as thick as straw; small fiery eyes; two small orifices instead of ears; short neck; body thick in the middle, tapering towards the tail; skin thick, wrinkled, with short brownish hairs thinly dispersed; legs short, five toes on each, all connected by webs, and small nails on each; the hind feet are very broad; each leg loosely articulated; the hind legs generally extended on a line with the body; the tail is very short; penis long; length of the animal from nose to tail sometimes 18 feet, and 10 or 12 round in the thickest part; the teeth have been sometimes found of the weight of 30 lb. each. Teeth of this size are only found on the coast of the icy Sea, where the animals are seldom molested, and have time to attain their full growth. (See Plate CCCXXXVII.) They inhabit the coast of Spitzbergen, Nova Zembla, Hudson's Bay, and the gulf of St Lawrence; and the icy Sea, as far as Cape Tschuktchi. They are gregarious; in some places appearing in herds of hundreds. They are shy, and avoid places which are much haunted by mankind; but are very fierce. If wounded in the water, they attempt to sink the boat, either by rising under it, or by striking their great teeth into the sides; they roar very loud, and will follow the boat till it gets out of sight. Numbers of them are often seen sleeping on an island of ice; if awaked, they fling themselves with great impetuosity into the sea; at which time it is dangerous to approach the ice, lest they should tumble into the boat and upset it. They do not go upon the land till the coast is clear of ice. They are killed for the sake of their oil, one walrus producing about half a tun. The knowledge of this chase is of great antiquity; Otho the Norwegian, about A. D. 890, made a report of it to king Alfred, having, as he says, made the voyage beyond Norway, for the more commodious of fishing of horse-whales, which have in their teeth bones of great price and excellency, whereof he brought some at his return unto the king. In fact, it was in the northern world, in early times, the substitute for ivory, being very white and very hard. Their skins, Otho says, were good to cut into cables. M. de Buffon says, he has seen braces for coaches made of the skin, which were both strong and elastic. They bring one, or at most two, young at a time; they feed on sea herbs and fish; also on shells, which they dig out of the sand with their teeth; they are said also to make use of their teeth to ascend rocks or

pieces of ice, fastening them to the cracks, and drawing their bodies up by that means. Besides mankind, they seem to have no other enemy than the white bear, with whom they have terrible combats; but generally come off victorious, by means of their great teeth.

TRICHILIA, in botany, a genus of plants, in the class *decandria*, and order of *monogynia*; and in the natural method ranking in the 23d order, *tribulate*.

TRICHOMANES, in botany, a genus of plants belonging to the class of *cryptogamia*, and order of *filices*. The parts of fructification are solitary, and terminated by a style like a bristle, on the very edge of the leaf. There are 13 species; of which two are natives of Britain, the *pixidiferum* and *tunbrigense*.

1. *TRICHOMANES PIXIDIFERUM*, the cup *trichomanes*, has sub-bipinnated leaves, the pinnae being alternate, close-lobed, and linear. It is found among stones in wet grounds in England.

2. *TRICHOMANES TUNBRIGENSE*, the *Tunbridge trichomanes*, has pinnated leaves, the pinnae being oblong, dichotomous, decurrent, and dentated. It is found in the fissures of moist rocks in Wales, and in many rocky places in Scotland.

TRICHOSANTHES, in botany, SERPENT CUCUMBER, a genus of plants belonging to the class of *monocia*, and order of *sylvestris*; and in the natural system ranging under the 34th order, *Cucurbitaceae*. There are four species; only one of which is cultivated in the British gardens.

TRICHOSANTHES ANGUINA, the *snake-gourd*, which is a native of China, an annual, and of the cucumber tribe.

TRICHOSTEMA, in botany, a genus of plants, in the class *didynamia*, and in the order of *gymnospermia*; and in the natural method ranking in the 43d order, *verticillate*.

* **TRICHOTOMY**. *n. f.* [τρίχιστος.] Division into three parts.—Some disturb the order of nature by dichotomies, *trichotomies*, sevens, twelves, *Watts*.

* **TRICK**. *n. f.* [treck, Dutch.] 1. A fly fraud.—A *trick* of law. *Ral.*—Put a *trick* upon Apollo. *L'Estrange*.—He comes to me for counsel, and I shew him a *trick*. *South*.—Wise Ardelia knew his *tricks*. *Swift*. 2. A dexterous artifice.—Shall teach thee a *trick* for to double thy crop. *Tuff*.—On one nice *trick* depends the gen'ral fate. *Pope*. 3. A vicious practice.—A wild *trick* of his ancestors. *Shak*.—A stale exploded *trick*. *Dryd*.—The *tricks* of youth too roughly blame. *Dryd*. 4. A juggle; an antic; any thing done to cheat jocosely, or to divert.—To laugh a little at our Andrew's *tricks*. *Prior*. 5. An unexpected effect.—Some *trick* not worth an egg. *Shak*. 6. A practice; a manner; a habit. Not in use.—I spoke it but according to the *trick*. *Shak*.—The *trick* of that voice I well remember. *Shak*.—The *trick* of 's frown, his forehead. *Shak*. 7. A number of cards laid regularly up in play; as, a *trick* of cards.

(1.) * **To TRICK**. *v. a.* [from the noun; *tricker*, Fr.] 1. To cheat; to impose on, to defraud.—It is impossible that the whole world should thus *trick* themselves into belief. *Stephens*. 2. To dress; to decorate; to adorn; properly to knot. *Tricca*, in low Latin, signifies a *knot* of hair; *treccia*, Italian.

an: hence *trace*. *Matt. Westmonasteriensis* says of *Godiva* of Coventry, that she rode *tricas capitis & crines dissolvens*.] And *trick* them up in knotted curls anew. *Drayton*.—He had *tricked* up a boy in the likeness of Edward Plantagenet. *Bacon*.—

Horridly *trickt*

With blood of fathers.

Shak.

—Most richly *tricked*. *Wotton*.—Their heads are *trickt* with tassels and flowers. *Sandys*.—

So sinks the Day-star in the ocean bed,

And yet anon repairs his drooping head,

And *tricks* his beams.

Milton.

—Not *trick'd* and frounc'd as she was wont. *Milt.*

—*Trickt* himself up with all the gay feathers.

L'Estr.—Love *tricks* and dresses up the gaudy

dream. *Dryd.*—*Tricking* up their children in fine

cloaths. *Locke*. 3. To perform with a light touch;

though it may here mean to *dress*.—

Come, the colours and the ground prepare:

Dip in the rainbow, *trick* her off in air,

Chuse a firm cloud before it fall, and in it

Catch e'er she change the *Cynthia* of this minute.

Pope.

(1.) * *To TRICK. v. n.* To live by fraud.—Thus they jog on, still *tricking*, never thriving. *Dryden*.

* *TRICKER. n. f.* [This is often written *trigger*; I know not which is right.] The catch which being pulled disengages the cock of the gun, that it may give fire.—Pulling the *tricker*, the force of the spring was not sensibly abated by the absence of the air. *Boyle*.—The *tricker* of his pistol drew. *Hudibras*.

* *TRICKING. n. f.* [from *trick*.] Dress; ornament.—Get us properties and *tricking* for our fairs. *Shak.*

* *TRICKISH. adj.* [from *trick*.] Knavishly artful; fraudulently cunning; mischievously subtle.—All he says is in a loose, slippery, and *trickish* way of reasoning. *Pope*.

* *To TRICKLE. v. n.* [Of this word I find no etymology that seems well authorized or probable.] To fall in drops; to rill in a slender stream.—

The red blood *trickling*, stain'd the way. *Spens.*

Faith beside there *trickled* softly down

A gentle stream.

Spenser.

—Some noises help sleep; as, the *trickling* of water. *Bac.*—He wakened by the *trickling* of his blood. *Wise-man*.—And from the wound appear'd the *trickling* blood. *Dryden*.—

And ever and anon a silent tear

Stole down, and *trickled* from his hoary beard.

Dryden.

—The emblems of honour mentioned, *trickled* away under the first impressions of the heat. *Addis.*

—How fluent nonsense *trickles* from his tongue!

Pope.—The balm of dulness *trickling* in their ear.

Pope.

* *TRICKSY. adj.* [from *trick*.] Pretty. This is a word of endearment. Obsolete.—

I do know

A many fools that stand in better place,

Garnish'd like him, that for a *tricksy* work

Defy the matter.

Shak.

—My *tricksy* spirit!

Shak.

TRICKUT, one of the *NICOBAR ISLES*.

TRICOCCE, [*tricus*, three, and *coceus*, a grain,]

the name of the 38th order in *Linnæus's* *Eragmments* of a natural method, consisting of plants with a single three-cornered capsule, having three cells, or internal divisions, each containing a single seed. See *BOTANY, Index*.

TRICOLORÉ, a town of *Hindoostan*, in the *Carnatic*, 38 miles N. of *Pondicherry*, and 56 S. of *Arcot*.

TRICORII, an ancient nation of *Gaul*, who inhabited the country since called *DAUPHINE*. *Liv.* 21. c. 31.

* *TRICORPORAL. adj.* [*tricorpus*, Lat.] Having three bodies.

TRICOT, a town of *France*, in the dep. of the *Oise*, 13½ miles NW. of *Champagne*.

TRICUTO, a river of *Naples*, in *Calabria Citra*, which runs into the sea, 10 miles E. of *Rossano*.

TRIDAX, in botany, *Trailing Star wort* of *Vera Cruz*, a genus of plants in the class of *Syn-genesia*, and order of *Polygamia superflua*; and, according to the natural method, ranking in the 32d order, *Papilionaceæ*. It is a native of *Vera Cruz*, and has flowers in the form of butterflies.

* *TRIDE. adj.* [among hunters; *tride*, French.] Short and ready. *Bailey*.

(1.) * *TRIDENT. n. f.* [*trident*, Fr. *tridens*, Lat.] A three forked sceptre of *Neptune*.—He would not flatter *Neptune* for his *trident*. *Shak.*—Or in his skull thy barbed *trident* stick? *Sandys*.—And wield their little *tridents*. *Milton*.—Several find a mystery in every tooth of *Neptune's trident*. *Addison*.

(1.) * *TRIDENT. adj.* Having three teeth.

TRIDENTUM, an ancient town of *Gallia Cisalpinga*, now called *Trent*. See *TRENT*, N° 2 & 3.

* *TRIDING. n. f.* [*trithinga*, Saxon; rather *trithing*.] The third part of a county or shire. This division is only used in *Yorkshire*, where it is corrupted into *riding*.

* *TRIDUAN. adj.* [from *triduum*, Lat.] 1. Lasting three days. 2. Happening every third day.

TRIE, a town of *France*, in the dep. of the *Upper Pyrenees*, 13½ miles ENE. of *Tarbes*.

TRIEL, a town of *France*, in the dep. of the *Seine* and *Oise*, 6 miles N. of *St Germain*.

TRIENACH, a bay on the W. coast of *Donegal*, *Ireland*.

(1.) * *TRIENNIAL. adj.* [*triennis*, Lat. *triennal*, Fr.] 1. Lasting three years.—I passed the bill for *triennial* parliaments. *K. Charles*.—Richard the Third's *triennial* reign. *Howel*. 2. Happening every third year.

(2.) *TRIENNIAL PARLIAMENTS* were established at the revolution, in 1688; but were abolished, and *Septennial Parliaments* enacted, upon the extinction of the rebellion in 1715.

TRIENS, in antiquity, a copper money of the value of one third of an *as*, which on one side bore a *Janus's* head, and on the other a water-rat.

TRIENTALIS, *CHICKWEED WINTER-GREEN*, in botany, a genus of plants belonging to the class of *heptandria*, and order of *monogynia*; and in the natural system ranging under the 20th order, *Rotaceæ*. The calyx is *heptaphyllous*; the corolla is equal and plane, and is divided into seven segments; the berry is *unilocular* and dry. There is only one species; viz.

Tri.

TRIENTALIS EUROPEA, which is indigenous, and the only genus of heptandria that is so. The stalk is single, five or six inches high, terminated with 5, 6, or 7 oval pointed leaves; from the centre of which arise on long footstalks commonly two white starry flowers, each generally consisting of 7 oval and equal petals, succeeded by a globular dry berry, covered with a thin white rind, having one cell, and containing several angular seeds.

* **TRIER**. *n. f.* [from *try*.] 1. One who tries experimentally.—The ingenious *triers* of the German experiments. *Boyle*. 2. One who examines judicially.—Courts of justice are the *triers* of acts of parliament. *Hale*.—There should be certain *triers* or examiners. *SpeB*. 3. Test; one who brings to the test.—Extremity was the *trier* of spirits. *Shak*.

TRIERS, or **TREVES**. See **SARRE**, N° 3; and **TREVES**.

TRIERTY, a lake of Ireland, in Donegal.

TRIESDORF, a town of Franconia, in Anspach, 5 miles SSE. of Anspach.

TRIESTE, a small, but strong and ancient seaport of Istria, on the gulph of Venice, with a bishop's see. It is beautifully situated on the side of a hill, about which the vineyards form a semicircle. The streets are narrow; but there is a large square, where they keep the annual fair. The harbour is spacious, but not good, being open to the W. and SW. winds. The inhabitants have a good trade in salt, oil, almonds, iron, &c. brought from Laubach; and they make good wines. The cathedral, and the late Jesuits church, are the two best buildings. This town was taken by the French in March 1797. It is 3 miles N. of Capo d'Istria, and 80 NE. of Venice. Lon. 14. 4. E. Lat. 45. 56. N.

TRISTY MOUNTAINS, mountains of Ireland, in Mayo, 21 miles NW. of Mayo.

* **To TRIFALLOW**. *v. a.* [*tres*, Latin, and *fealga*, Saxon, a harrow.] To plow land the third time before sowing. *Bailey*.—*Trifallowing*, or last plowing. *Mortimer*.

TRIFEL, a town of the French empire, in the dep. of the Rhine and Moselle, and ci-devant duchy of Deux Ponts. It has an ancient castle, in which Richard I. king of England, was kept prisoner, on his return from the Holy Land. It is one mile SE. of Anweiler.

* **TRIFID**. *adj.* [among botanists.] Cut or divided into three parts. *Bailey*.

* **TRIFISTULARY**. *adj.* [*tres* and *ffistula*, Lat.] Having three pipes. *Triffistulary* bill or crany. *Brown*.

* **TRIFLE**. *n. f.* [from the verb.] A thing of no moment.—

Win us with honest trifles, to betray us

In deep consequences. *Shak*.

—With such poor trifles playing. *Drayton*.—Our desires pursuing trifles. *Locke*.—But scorns on trifles to bestow her care. *Young*.—Think nought a trifle, though it small appear. *Young*.—Your care to trifles give. *Young*.

(1.) * **To TRIFLE**. *v. n.* [*trifelen*, Dutch.] 1. To act or talk without weight or dignity; to act with levity; to talk with folly.—They trifle and bear the air about nothing. *Hooker*. 2. To mock;

to play the fool.—I thus would play and trifle with your reverence. *Shak*. 3. To indulge light amusement; as, he trifled all his time.—A levity of mind, a trifling spirit. *Lasu*. 4. To be of no importance.—Trifling debt. *Spens*.

(2.) * **To TRIFLE**. *v. a.* To make of no importance. Not in use.—This fore-night hath trifled former knowings. *Shak*.

* **TRIFLER**. *n. f.* [*triflaar*, Dutch.] One who acts with levity; one that talks with folly.—A man cannot tell whether Apelles or Albert Durer were the more triflers. *Bacon*.—Shall I be baffled by this trifler, love? *Glanville*.—Vain triflers of the age. *Watts*.—Triflers not even in trifles can excel. *Young*.

* **TRIFLING**. *adj.* [from *trifle*.] Wanting worth; unimportant; wanting weight.—Trifling and contemptible. *Rogers*.

* **TRIFLINGLY**. *adv.* [from *trifling*.] Without weight; without dignity; without importance.—Triflingly busy. *Locke*.

* **TRIFOLIATE**. *adj.* [*tres* and *folium*, Lat.] Having three leaves.—Trifoliate cytisus. *Harte*.

TRIFOLINUS, a mountain of Italy, in Campania, famous for its vines. *Plin*. 14. c. 7.

TRIFOLIUM, **TREFOIL**, or **CLOVER**, in botany. A genus of plants belonging to the class of *diadelphia*, and order of *decandria*, and in the natural system ranging under the 32d order, *Papilionaceae*. The flowers are generally in round heads; the pod is scarcely longer than the calyx, univalve, not opening, deciduous. The leaves are 3 together. According to Murray's edition of *Linnaeus*, there are 46 species; of which 17 are natives of Britain. See *Lightfoot's Flora Scotica*, *Berkenhout's Synopsis*, and *Withering's Botanical Arrangements*. The most remarkable are these:

1. **TRIFOLIUM ALPESTRE**, long-leaved purple trefoil, or mountain clover, is thus characterized by Mr *Afzelius*. The spikes are dense; the corollas somewhat equal; the stipulas are bristly and divergent; the leaflets lanceolated; the stalks stiff, straight, and very simple. It grows in dry, mountainous, woody places, in Hungary, Austria, and Bohemia, &c. but is not said by Mr *Afzelius* to be a native of Britain.

2. **TRIFOLIUM MEDIUM**, according to Mr *Afzelius*, has been confounded with the species *pratense* and *alpestre*; but it is to be distinguished from them by having loose spikes, corollas somewhat equal, stipulas subulate and connivent, and stalks flexuous and branched. It is found in dry elevated situations, especially among shrubs, or in woods where the soil is chalky or clay, in England, Scotland, Sweden, Denmark, &c.

3. **TRIFOLIUM MELILOTI OFFICINALIS**, the *MELILOT*, has naked racemous pods, dispermous, wrinkly, and acute, with an erect stalk. It grows in corn-fields and by the way sides, but not common. The stalk is erect, firm, striated, branched, and two or three feet high; the leaves ternate, smooth, obtusely oval, and serrated; the flowers are small, yellow, pendulous, and grow in long close spikes at the tops of the branches; the pod is very short, turgid, transversely wrinkled, pendulous, and contains either one or two seeds. The plant has a very peculiar strong scent, and disagreeable bitter, acrid taste, but such, however,

ever, as is not disagreeable to cattle. The flowers are sweet-scented. It has generally been esteemed emollient and digestive, and been used in fomentations and cataplasms, particularly in the plaster employed in dressing blisters; but is now laid aside, as its quality is found to be rather acrid and irritating than emollient or resolvent. It communicates a most loathsome flavour to wheat and other grains, so as to render it unfit for making bread.

4. *TRIFOLIUM PRATENSE*, purple or red clover, is distinguished by dense spikes, unequal corollas, by bearded stipulas, ascending stalks, and by the calyx having four equal teeth. This is the botanical description of this species given by Mr Afzelius, who, in the *Linnean Transf.* vol. 1. has been at much pains to remove three species of the trifolium from the confusion in which they have been long involved; namely, the pratense, medium, and alpestre. The red clover is common in meadows and pastures, and is the species which is generally cultivated as food for cattle. It abounds in every part of Europe, in North America, and even in Siberia. It delights most in rich, moist, and sunny places; yet flourishes in dry, barren, and shady places. For an account of the mode of cultivating it, see *RURAL ECONOMY*.

5. *TRIFOLIUM REPENS*, white creeping trefoil, or Dutch clover, has a creeping stalk, its flower gathered into an umbellar head, and its pods tetraspermous. It is very common in fields and pastures. It is well known to be excellent fodder for cattle; and the leaves are a good rustic hygrometer, as they are always relaxed and flaccid in dry weather, but erect in moist or rainy.

* *TRIFORM*. *adj.* [*triformis*, Lat.] Having a triple shape.—

The moon—Her countenance *triform*
Hence fills, and empties, to enlighten th' earth.

Milton.

TRIFURCATED, *adj.* [from *tres*, and *furca*, a fork.] having three prongs. *Ash*.

TRIGA, in antiquity, a kind of car or chariot drawn by three horses; whence the name.

TRIGAMIST. *n. f.* One who has 3 wives. *Ash*.

TRIGAMY. *n. f.* [from *treis*, three, and *γᾰμος*, marriage.] The state of being married thrice, or of having 3 husbands or wives at once. *Ash*.

TRIGEMINOUS. *adj.* [from *tres*, three, and *geminus*, Lat. to double.] Threefold. *Ash*.

* *TRIGGER*. *n. f.* [derived by *Junius* from *trigue*, Fr. from *intricare*, Lat.] See *TRICKER*.

1. A catch to hold the wheel on steep ground. 2. The catch that being pulled looses the cock of the gun.—The *trigger* of the gun. *Locke*.

* *TRIGINTALS*. *n. f.* [from *triginta*, Latin, thirty.] Trentals or trigintals were 30 masses instituted by Saint Gregory. *Ayliffe*.

TRIGLA, in ichthyology, a genus of fishes belonging to the order of thoracici. The head is loricated with rough lines, and there are seven rays in the membranes of the gills. There are 11 species; of which the principal are these:

1. *TRIGLA CUCULUS*; the red Gurnard:

2. *TRIGLA GURNARDUS*, or grey Gurnard:

3. *TRIGLA HIRUNDO*, the sapphire Gurnard:

4. *TRIGLA LYRA*, or the Piper.

TRIGLOCHIN, in botany, a genus of plants

belonging to the class of *hexandria*, and order of *trigynia*; and in the natural system ranging under the 5th order, *Triplatoideæ*. The calyx is triphyllous; the petals are 3; there is no style; the capsule opens at the base. There are 3 species; of which 2 are British, viz.

1. *TRIGLOCHIN MARITIMUM*, or sea-spiked grass, has ovate sexlocular capsules; the stalk is short; the spike long, and flowers purplish. It is frequent on the sea-coasts.

2. *TRIGLOCHIN PALUSTRE*, arrow-headed grass, has an oblong trilocular capsule. The stalk is simple, eight or ten inches high; the leaves long and narrow; the flowers are greenish, and grow at the end of a long spike.—It is frequent in moist ground. Linnaeus says that cattle eat these two species with avidity.

* *TRIGLYPH*. *n. f.* [In architecture.] A member of the frieze of the Dorick order set directly over every pillar, and in certain spaces in the intercolumniations. *Harris*.—The Dorick order has now and then a sober garnishment of lions heads in the cornice, and of *triglyphs* and metopes always in the frieze. *Wotton*.

TRIGNO, a river of Naples, which runs into the Adriatic, 12 miles NW. of Termola.

(1.) * *TRIGON*. *n. f.* [*τρίγωνον*.] A triangle. A term in astrology.—The ordinary height of a man ninety-six digits, the ancient Egyptians estimated to be equal to that mystical cubit among them styled passus Ibdia, or the *trigon* that the Ibis makes at every step, consisting of three latera, each thirty-two digits. *Hale*.

(2.) *TRIGON*, *DIALLING*. See *DIALLING*.

* *TRIGONAL*. *adj.* [from *trigon*.] Triangular; having three corners.—A spar of yellow hue shot into numerous *trigonal* pointed shoots of various sizes, found growing to one side of a perpendicular fissure of a stratum of free-stone. *Woodw*.

TRIGONALIS. See *FOLLIS*, and *PILA*, N° 1.

TRIGONELLA, *FENUGREEK*, in botany: A genus of plants belonging to the class of *diadelphia*, and order of *decandria*; and in the natural system arranged under the 3d order, *Papilionaceæ*. The vexillum and alææ are nearly equal and patent, resembling a tripetalous corolla. There are 12 species; of which the most remarkable is

TRIGONELLA FENUM GRÆCUM, or fenugreek, a native of Montpellier in France. *FENUGREEK* is an annual plant, which rises with a hollow, branching, herbaceous stalk, a foot and a half long, garnished with trifoliate leaves, placed alternately, whose lobes are oblong, oval, indented on their edges, and have broad furrowed foot-stalks. Fenugreek seeds have a strong disagreeable smell, and an unctuous farinaceous taste, accompanied with a slight bitterness. The principal use of these seeds is in cataplasms and fomentations, for softening, maturing, and discussing tumors; and in emollient and carminative glysters.

* *TRIGONOMETRICAL*. *adj.* [from *trigono-metry*.] Pertaining to trigonometry.

TRIGONOMETRICALLY. *adv.* [from *trigonometrical*.] According to the rules of Trigonometry. *Ash*.

* *TRIGONOMETRY*.

DEFINITIONS and DIVISIONS of the SCIENCE.

TRIGONOMETRY. [*τρίγωνον* and *μέτρον*.] *Trigonometry* is the art of measuring triangles, or of calculating the sides of any triangle sought, and this is plain or spherical. *Harris*.—On a discovery of Pythagoras, all *trigonometry* is founded. *Guardian*.

TRIGONOMETRY is more particularly defined the art of measuring the sides and angles of TRIANGLES, either plane or spherical, whence it is accordingly divided into PLANE TRIGONOMETRY, and SPHERICAL TRIGONOMETRY.

By *Trigonometry* we come to know the magnitude of the earth, the planets and stars, their distances, motions, eclipses, and almost all other useful arts and sciences. Accordingly we find this art has been cultivated from the earliest ages of mathematical knowledge.

Trigonometry, or the resolution of triangles, is founded on the mutual proportions which subsist between the sides and angles of triangles; which proportions are known by finding the relations between the radius of a circle and certain other lines drawn in and about the circle, called *cords*, *lines*, *tangents*, and *secants*. The ancients, *Meneleus*, *Hipparchus*, *Ptolemy*, &c. performed their *trigonometry* by means of the cords. As to the *lines*, and the common theorems relating to them, they were introduced into *trigonometry* by the Moors or Arabians, from whom this art passed into Europe, with several other branches of science. The Europeans have introduced, since the 15th century, the tangents and secants, with the theorems relating to them.

The proportion of the *lines*, *tangents*, &c. to their radius, is sometimes expressed in common or natural numbers, which constitute what we call the *tables of natural lines, tangents, and secants*. Sometimes it is expressed in logarithms of the said natural *lines, tangents, &c.*; and these constitute the table of *artificial lines, &c.* Lastly, sometimes the proportion is not expressed in numbers; but the several *lines, tangents, &c.* are actually laid down upon lines of scales; whence the *line of sines, of tangents, &c.*

In *trigonometry*, as angles are measured by arcs of a circle described about the angular point, so the whole circumference of the circle is divided into a great number of parts; as 360 degrees, and each degree into 60 minutes, and each minute into 60 seconds, &c.; and then any angle is said to consist of so many degrees, minutes, and seconds, as are contained in the arc that measures the angle, or that is intercepted between the legs or sides of the angle. Now the *sine*, *tangent*, and *secant*, &c. of every degree and minute, &c. of a quadrant, are calculated to the radius 1, and ranged in tables for use; as also the logarithms of the same; forming the triangular canon. And these numbers, so arranged in tables, form every species of right-angled triangles; so that no such triangle can be proposed, but one similar to it may be there found, by comparison with which the proposed one may be computed by analogy or proportion.

SECT. I. Of PLANE TRIGONOMETRY.

THERE are usually three methods of resolving triangles, or the cases of *trigonometry*; viz. geometrical construction, arithmetical computation, and instrumental operation. In the 1st method, the triangle in question is constructed by drawing and laying down the several parts of their magnitudes given, viz. the sides from a scale of equal parts, and the angles from a scale of cords or other instrument; then the unknown parts are measured by the same scales, and so they become known.

In the 2d method, having stated the terms of the proportion according to rule, which terms consist partly of the numbers of the given sides, and partly of the *lines, &c.* of angles taken from the tables, the proportion is then resolved like all other proportions, in which a 4th term is to be found from three given terms, by multiplying the 2d and 3d together, and dividing the product by the 1st. Or, in working with the logarithms, adding the logarithm of the 2d and 3d terms together, and from the sum subtracting the logarithm of the 1st term; then the number answering to the remainder is the 4th term sought.

To work a case instrumentally, as suppose by the logarithm lines on one side of the two feet scales: Extend the compasses from the 1st term to the 2d or 3d, which happens to be of the same kind with it; then that extent will reach from the other term to the 4th. In this operation, for the sides of triangles, is used the line of numbers (marked Num.); and for the angles, the line of sines or tangents (marked sin. and tan.) according as the proportion respects sines or tangents. See SECTOR.

In every case of plane triangles there must be three parts given, one at least of which must be a side. And then the different circumstances, as to the three parts that may be given, admit of three cases or varieties only; viz. 1st, When two of the three parts given are a side and its opposite angle. 2d, When there are given two sides and their contained angle. 3d, And, thirdly, when the three sides are given.

To each of these cases there is a particular rule or proportion adapted for resolving it by.

1st, *The Rule for the 1st Case*, or that in which, of the three parts that are given, an angle and its opposite side are two of them, is this, viz. that the sides are proportional to the sines of their opposite angles, that is, As one side given: To the sine of its opposite angle :: So is another side given: To the sine of its opposite angle.—Or, As the sine of an angle given: To its opposite side :: So is the sine of another angle given: To its opposite side.—So that, to find an angle, we must begin the proportion with a given side that is opposite to a given angle; and to find a side, we must begin with an angle opposite to a given side.

Example. Suppose in the triangle BDC (Fig. 1. Plate CCCXXXVII.) there be given the side BC = 106, DB = 65, and the angle BCD $31^{\circ} 49'$ given; to find the angle BDC obtuse and the side CD.

I. Geo.

I. GEOMETRICALLY *by CONSTRUCTION.*

Draw the line BC equal to 106, at C make an angle of $31^{\circ} 49'$ by drawing CD, take 65 in your compasses, and with one foot in B lay the other upon the line CD in D; draw the line BD, and it is done; for the angle D will be $120^{\circ} 43'$, the angle B $27^{\circ} 28'$, and the side DC 569 as was required.

II. ARITHMETICALLY *by LOGARITHMS.*

As the side BD 65 - - - log. 1'81291
Is to sine angle C $31^{\circ} 49'$ - - - 9'72198
So is the side BC 106 - - - - - 2'02531

11'74749

1'81291

To sine angle D $120^{\circ} 43'$ - - - 9'93438

To find DC.

As sine ang. C $31^{\circ} 49'$ 9'72198 Sup. $59^{\circ} 17'$ of ang. D.

Is to the side BD 65 1'81291

So is sine ang. B $27^{\circ} 28'$ 9'66392

11'47683

9'72198

To the side DC $56^{\circ} 88'$ 1'75485

180°0

152°32 sum. subt.

27°28 angle B.

Here we may observe, that if the given angle be obtuse, the angle sought will be acute; but when the given angle is acute, and opposite to a lesser given side, then the required angle is doubtful, whether acute or obtuse; it ought therefore to be determined before the operation. For it is plain the above proportion produces $59^{\circ} 17'$ for the required angle; but as it is obtuse, its supplement to 180 degrees must be taken, viz. $120^{\circ} 43'$.

III. *By GUNTER.*

1st, "The extent from 65 to 106 on the line of numbers will reach from $31^{\circ} 49'$ to $59^{\circ} 17'$ on the line of lines."

2dly, "The extent from $31^{\circ} 49'$ to $27^{\circ} 28'$ on the line of lines will reach from 65 to 56.88 on the line of numbers."

CASE II. When there are given two sides and their contained angle, to find the rest, the rule is this: As the sum of the two given sides: Is to the difference of the sides: : So is the tangent of half the sum of the two opposite angles or cotangent of half the given angle: To tang. of half the diff. of those angles. Then the half diff. added to the half sum, gives the greater of the two unknown angles; and subtracted leaves the less of the two angles.

Hence, the angles being now all known, the remaining 3d side will be found by the former case.

Example. The side BC=109, BD=76 (fig. 2.) and the angle CBD $101^{\circ} 30'$ required, to find the angle BDC or BCD, and the side CD.

I. GEOMETRICALLY *by CONSTRUCTION.*

Draw the line BC 109, and BD, so as to make an angle with BC of $101^{\circ} 30'$, and make BD equal to 76; join BC and BD with a right line, and it is done; for the angle D being measured by the

cord of 60° , will be $47^{\circ} 32'$, angle C $30^{\circ} 58'$, and the side DC 144.8, as was required.

II. ARITHMETICALLY *by LOGARITHMS.*

Side BC 109 - - - 109 - - - $180^{\circ} 0'$
BD 76 - - - 76 - - - $101^{\circ} 30'$

Their sum 185 - 33 their diff. $78^{\circ} 30'$ { sum of
theang.
D and C.

Sum $39^{\circ} 15'$ then

To find the angles D and C.

As the sum of the sides BC and BD=185 2'26717

Is to their difference - - - 33 1'51852

So is tang. of $\frac{1}{2}$ the sum of the }
angles C and D $39^{\circ} 15'$ } 9'91224

11'43075

2'26717

To the tang. of $\frac{1}{2}$ the diff. of the }
angles C and D $8^{\circ} 17'$ } 9'16358

To half the sum of the angles D and C $39^{\circ} 15'$
And half the diff. of the angles C and D $8^{\circ} 17'$

Gives the greater angle D

47 32

Subtracted, gives the lesser angle C

30 38

To find DC.

As sine angle D $47^{\circ} 32'$ - - - 9'86786

Is to the side BC 109 - - - 2'03743

So is sine angle B $101^{\circ} 30'$ - - - 9'99119

12'02862

9'86786

To the side DC required 144.8 - 2'16076

III. *By GUNTER.*

1st, "The extent from 185 to 33 on the line of numbers will reach from $39^{\circ} 15'$ to $8^{\circ} 17'$ on the line of tangents. 2dly, The extent from angle D $47^{\circ} 32'$ to $78^{\circ} 30'$ (the supplement of angle B) on the line of lines, will reach from the side BC 109 to 144.8, the side DC required, on the line of numbers."

CASE III. Is when the three sides are given, to find the three angles; and the method of resolving this case is, to let a perpendicular fall from the greatest angle upon the opposite side or base, dividing it into two segments, and the whole triangle into two smaller right angled triangles: then it will be, As the base or sum of the two segments: Is to the sum of the other two sides: : So is the difference of those sides: To the difference of the segments of the base. Then half this difference of the two segments added to the half sum, or half the base, gives the greater segment, and subtracted gives the less. Hence, in each of the two right-angled triangles, there are given the hypothenuse, and the base, besides the right angle, to find the other angles by the first case.

Example. The sides BC (fig. 3.)=105, BD=85, and CD=50, given to find the angles BDC, BCD, or CBD.

I. GEOMETRICALLY *by CONSTRUCTION.*

Draw the line BC equal to 105, take CD 50 in your compasses, and with one foot in C describe an arch; then take BD 85 in your compasses, and

P p p

with

with one foot in B cut the former arch in D, join BD and DC, and it is done; for the angle B, being measured, will be found $18^{\circ} 4'$, angle C $53^{\circ} 7'$, which being added together is $81^{\circ} 11'$, their sum subtracted from 180 , leaves angle D $98^{\circ} 49'$ as was required.

II. ARITHMETICALLY by LOGARITHMS.

The two shortest sides are BD ($=85$) and CD ($=50$), the sum of which is 135 , and their difference 35 . The segments of the base BC are found in this manner:

As the side BC $= 105$ log. 2.02119
 Is to the sum of the sides { $= 135$ 2.13033
 BD and DC }
 So is the difference $= 35$ 1.54407
 To the diff. of the seg. of BC $= 45$ 1.65321
 Thus the sum and difference of the segments of the base BC being known, we have only to add half this sum $= 52\frac{1}{2}$ to half the difference $= 22\frac{1}{2}$, and we shall obtain the greater segment, which is $= 75$; which subtracted from 105 , gives 30 = the smaller segment. Then

To find the angle BDA.

As the hypotenuse BD $= 85$ log. 1.92943
 Is to radius $= 10.00000$
 So is the greater segment $= 75$ 1.87566
 To the sum of the angle BDA $=$
 The angle BDA therefore is equal to $61^{\circ} 56'$
 Let us now find the ang. ADC, which is done thus:
 As the hypotenuse DC $= 50$ log. 1.69897
 Is to radius $= 10.00000$
 So is the smaller segment $= 30$ 1.47712
 To the sine of ADC $= 9.77815$
 The angle ADC therefore is equal to $36^{\circ} 53'$, and the whole angle BDC $= 98^{\circ} 49'$.

To find the angle at B, we have only to subtract the angle BDA ($= 61^{\circ} 56'$) from 90° , and rem. $28^{\circ} 4'$ is the angle sought. The angle at C is equal to $53^{\circ} 7'$.

III. By GUNTER.

1st. 'The extent from 105 to 135 , will reach from 35 to 45 on the line of numbers.' *2dly*, 'The extent from 85 to 75 , on the line of numbers, will reach from radius to $61^{\circ} 56'$, the angle BDA on the line of sines.' *3dly*, 'The extent from 50 to 30 on the line of numbers, will reach from radius to angle ADC $36^{\circ} 53'$ on the line of sines.'

The foregoing three cases include all the varieties of plane triangles that can happen, both of right and oblique angled triangles. But besides these, there are some other theorems that are useful upon many occasions, or suited to some particular forms of triangles, which are often more expeditious in use than the foregoing general ones; one of which, for right-angled triangles, as the case for which it serves so often occurs, may be here inserted, and is as follows.

CASE IV. When, in a right-angled triangle, there are given the angles and one leg, to find the other leg, or the hypotenuse. Then it will, As radius : To given leg AB :: So tang. adjacent the angle A : To the opposite leg BC, and :: So sec. of the same angle A : To hypoth. AC :

Example. In the triangle ABC (fig. 4.) right angled at B,

Given the leg AB $= 162$
 and the angle A $= 53^{\circ} 7' 48''$
 To find BC and AC.

I. GEOMETRICALLY.—Draw the leg AB $= 162$. Erect the indefinite perpendicular BC : Make the angle A $= 53^{\circ} 7'$, and the side AC will cut BC in C, and form the triangle ABC. Then, by measuring, there will be found AC $= 270$, and BC $= 216$.

III. ARITHMETICALLY.

As radius	$= 10$	log. 10.0000000
To AB	$= 162$	2.2095130
So tang. A	$= 53^{\circ} 7' 48''$	10.1249372
To BC	$= 216$	2.3344523
So sec. A	$= 53^{\circ} 7' 48''$	10.2278477
To AO	$= 270$	2.4313627

III. By GUNTER.

Extend the compasses from 45° at the end of the tangents (the radius) to the tangent of $53^{\circ} 7'$; then that extent will reach, on the line of numbers, from 162 to 216 , for BC. Again, extend the compasses from $36^{\circ} 52'$ to 90 on the sines; then that extent will reach, on the line of numbers, from 162 to 270 for AC.

Note. Another method, by making every side radius, is often added by the authors on trigonometry, which is thus: The given right angled triangle being ABC; make first the hypotenuse AC radius, that is, with the extent of AC as a radius, and each of the centres A and C, describe arcs CD and AE (fig. 5.); then it is evident that each leg will represent the sine of its opposite angle, viz. the leg BC the sine of the arc CD or of the angle A, and the leg AB the sine of the arc AE or of the angle C. Again, making either leg radius, the other leg will represent the tangent of its opposite angle, and the hypotenuse the secant of the same angle; thus, with radius AB and centre A describing the arc BF, BC, represents the tangent of that arc, or of the angle A, and the hypotenuse AC the secant of the same; or with the radius BC and centre C describing the arc BG, the other leg AB is the tangent of that arc BG or of the angle C, and the hypotenuse CA the secant of the same.

And then the general rule for all these cases is this, viz. that the sides bear to each other the same proportions as the parts or things which they represent. And this is called making every side radius.

SECT. II. Of SPHERICAL TRIGONOMETRY.

SPHERICAL TRIGONOMETRY is the art whereby, from three given parts of a spherical triangle, we discover the rest; and, like plain trigonometry, is either right-angled or oblique angled. Here it would be of great service to the learner to study PROJECTION OF THE SPHERE before entering upon spherical trigonometry. The figures to any example should be projected stereographically different ways; viz. with the known parts at the centre, circumference, or any other point of the primitive, and the unknown parts measured in all these cases. The coincidence of the solution by projection with that by calculation affords such satisfaction, that the learner becomes interested in the result, and consequently makes greater progress.

grefs. (See STEREOGRAPHIC PROJECTION.) Before we give the analogies for the solution of the several cases we premise the following theorems:

THEOREM I. In all right-angled spherical triangles, the sign of the hypotenuse : radius :: line of a leg : sine of its opposite angle. And the sine of a leg : radius :: tangent of the other leg : tangent of its opposite angle.

Demonstration. Let EDAFG (*ibid.* fig. 6. pl. 337.) represent the eighth part of a sphere, where the quadrantal planes EDFG, EDBC, are both perpendicular to the quadrantal plane ADFB; and the quadrantal plane ADGC is perpendicular to the plane EDFG; and the spherical triangle ABC is right-angled at B, where CA is the hypotenuse, and BA, BC, are the legs.

To the arches GF, CB, draw the tangents HF, OB, and the lines GM, CI, on the radii DF, DB; also draw BL the sine of the arch AB, and CK the sine of AC; and then join IK and OL. Now HF, OB, GM, CI, are all perpendicular to the plane ADFB. And HD, GK, OL, lie all in the same plane ADGC. Also FD, IK, BL, lie all in the same plane ADGC. Therefore the right-angled triangles HFD, CIK, ODL, having the equal angles HDF, CKI, OLB, are similar. And CK : DG :: CI : GM; that is, as the sine of the hypotenuse : radius :: sine of a leg : sine of its opposite angle. For GM is the sine of the arc GF, which measures the angle CAB. Also, LB : DF :: BO : FH; that is, as the sine of a leg : radius :: tangent of the other leg : tangent of its opposite angle. Q. E. D.

Hence it follows, that the sines of the angles of any oblique spherical triangle (ACD fig. 7.) are to one another, directly, as the sines of the opposite sides. Hence it also follows, that, in right-angled spherical triangles, having the same perpendicular, the sines of the bases will be to each other, inversely, as the tangents of the angles at the bases.

THEOREM II. In any right-angled spherical triangle ABC (*fig.* 8.) It will be, As radius is to the co-sine of one leg, so is the co-sine of the other leg to the co-sine of the hypotenuse.

Hence, if two right-angled spherical triangles ABC, CBD (*fig.* 7.) have the same perpendicular BC, the co-sines of their hypotenuses will be to each other, directly, as the co-sines of their bases.

THEOREM III. In any spherical triangle it will be, As radius is to the sine of either angle, so is the co-sine of the adjacent leg to the co-sine of the opposite angle.

Hence, in right-angled spherical triangles, having the same perpendicular, the co-sines of the angles at the base will be to each other, directly, as the sines of vertical angles.

THEOREM IV. In any right-angled spherical triangle it will be, As radius is to the co-sine of the hypotenuse, so is the tangent of either angle to the co-tangent of the other angle.

As the sum of the sines of two unequal arches is to their difference, so is the tangent of half the sum of those arches to the tangent of half their difference: and as the sum of the co-sines is to their difference, so is the co-tangent of half the sum of the arches to the tangent of half the difference of the same arches.

THEOREM V. In any spherical triangle ABC (*fig.* 9 and 10.) it will be, As the co-tangent of half the sum of half their difference, so is the co-tangent of half the base to the tangent of the distance (DE) of the perpendicular from the middle of the base.

Since the last proportion, by permutation, becomes co-tang. $\frac{AC+BC}{2}$: co-tang. AE :: tang.

$\frac{AC-BC}{2}$: tangent DE, and as the tangents of

any two arches are, inversely, as their co-tangents; it follows, therefore, that tangent AE : tang.

$\frac{AC+BC}{2}$: tang. $\frac{AC-BC}{2}$: tang. DE; or, that

the tangent of half the base is to the tangent of half the sum of the sides, as the tangent of half the difference of the sides to the tangent of the distance of the perpendicular from the middle of the base.

THEOREM VI. In any spherical triangle ABC (*fig.* 9.) it will be, As the co-tangent of half the sum of the angles at the base is to the tangent of half their difference, so is the tangent of half the verticle angle to the tangent of the angle which the perpendicular CD makes with the line CF bisecting the verticle angle.

The SOLUTION of the CASES of RIGHT-ANGLED SPHERICAL TRIANGLES, (*fig.* 8.)

Case	Given,	Sought,	Solution.
1	The hyp. AC and one angle A	The opposite leg BC	As radius : sine hyp. AC :: sine A : sine BC (by the former part of theor. 1.)
2	The hyp. AC and one angle A	The adjacent leg AB	As radius : co-sine of A :: tang. AC : tang. AB (by the latter part of theor. 1.)
3	The hyp. AC and one angle A	The other angle C	As radius : co-sine of AC :: tang. A : co-tang. C (by theorem 4.)
4	The hyp. AC and one leg AB	The other leg BC	As co-sine AB : radius :: co-sine AC : co-sine BC (by theorem 2.)
5	The hyp. AC and one leg AB	The opposite angle C	As sine AC : radius :: sine AB : sine C (by the former part of theorem 1.)
6	The hyp. AC and one leg AB	The adjacent angle A	As tang. AC : tang. AB :: radius : co-sine A (by theorem 1.)

Case	Given,	Sought,	Solution.
7	One leg AB and the adjacent angle A	The other leg BC	As radius : sine AB :: tangent A : tangent BC (by theorem 4.)
8	One leg AB and the adjacent angle A	The opposite angle C	As radius : sine A :: co-sine of AB : co-sine of C (by theorem 3.)
9	One leg AB and the adjacent angle A	The hyp. AC	As co-sine of A : radius :: tangent AB : tangent AC (by theorem 1.)
10	One leg BC and the opposite angle A	The other leg AB	As tangent A : tangent BC :: radius : sine AB (by theorem 4.)
11	One leg BC and the opposite angle A	The adjacent angle C	As co-sine BC : radius :: co-sine of A : sine C (by theorem 3.)
12	One leg BC and the opposite angle A	The hyp. AC	As sine A : sine BC :: radius : sine AC (by theorem 1.)
13	Both legs AB and BC	The hyp. AC	As radius : co-sine AB :: co-sine BC : co-sine AC (by theorem 2.)
14	Both legs AB and BC	An angle, suppose A	As sine AB : radius :: tangent BC : tangent A (by theorem 4.)
15	Both angles A and C	A leg, suppose AB	As sine A : co-sine C :: radius : co-sine AB (by theorem 3.)
16	Both angles A and C	The hyp. AC	As tangent A : co-tangent C :: radius : co-sine AC (by theorem 4.)

Note. The 10th, 11th, and 12th cases are ambiguous; since it cannot be determined by the data, whether A, B, C, and AC, be greater or less than 90 degrees each.

THE SOLUTION OF THE CASES OF OBLIQUE SPHERICAL TRIANGLES, (figs. 9 and 10.)

Case	Given,	Sought,	Solution.
1	Two sides AC, BC, and an angle A opposite to one of them.	The angle B opposite to the other	As sine BC : sine A :: sine AC : sine B (by theorem 1.) Note, this case is ambiguous when BC is less than AC; since it cannot be determined from the data whether B be acute or obtuse.
2	Two sides AC, BC, and an angle A opposite to one of them.	The included angle ACB	Upon AB produced (if need be) let fall the perpendicular CD; then (by theorem 4.) rad. : co-sine AC :: tang. A : co-tang. ACD; but (by theorem 1.) as tang. BC : tang. AC :: co-sine ACD : co-sine BCD. Whence ACB = ACD = BCD is known.
3	Two sides AC, BC, and an angle opposite to one of them.	The other side AB	As rad. : co-sine A :: tang. AC : tang. AD (by theor. 1.) and (by theor. 2.) as co-sine AC : co-sine BC :: co-sine AD : co-sine BD. Note, this and the last case are both ambiguous when the first is so.
4	Two sides AC, AB, and the included angle A	The other side BC	As rad. : co-sine A :: tang. AC : tang. AB (by theor. 1.) whence AD is also known; then (by theor. 2.) as co-sine AD : co-sine BD :: co-sine AC : co-sine BC.
5	Two sides AC, AB, and the included angle A	Either of the other angles suppose B	As rad. : co-sine A :: tang. AC : tang. AD (by theorem 1.) whence BD is known; then (by theorem 4.) as sine BD : sine AD :: tang. A : tang. B.
6	Two angles A, ACB, and the side AC betwixt them.	The other angle B	As rad. : co-sine AB :: tang. A : co-tang. ACD (by theorem 4.) whence BCD is also known; then (by theor. 3.) as sine ACD : sine BCD :: co-sine A : co-sine B.

Case	Given,	Sought,	Solution.
7	Two angles A, ACB, and the side AC betwixt them	Either of the other sides, suppose BC.	As rad. : cofine AC : : tang. A : co-tang. ACD (by theorem 4.) whence BCD is also known; then, as co-fine BCD : co-fine ACD : : tang. AC : tang. BC (by theor. 1.)
8	Two angles A, B, and a side AC opposite to one of them	The side BC opposite the other	As sine B : sine AC : : sine A : sine BC (by theorem 1.)
9	Two angles A, B, and a side AC opposite to one of them	The side AB betwixt them	As rad. : co-fine A : : tang. AC : tang. AD (by theor. 1.) and as : tang. B : tang. A : : sine AD : sine BD (by theorem 4.) whence AB is also known.
10	Two angles A, B, and a side AC opposite to one of them	The other angle ACB	As rad. : cofine AC : : tang. A : co-tang. ACD (by theorem 4.) and is co-fine A : co-fine B : : sine ACD : sine BCD by theor. 3.) whence ACB is also known.
11	All the three sides AB, AC, and BC	An angle, suppose A	As tang. $\frac{1}{2}$ AB : tang. $\frac{AC+BC}{2}$: : tang. $\frac{AC-BC}{2}$: tang. DE, the distance of the perpendicular from the middle of the base (by theorem 6.) whence AD is known; then, as tang. AC : tang. AD : : rad. : co-fine A (by theor. 1.)
12	All the three angles A, B, and ACB	A side, suppose AC	As co-tang. $\frac{ABC+A}{2}$: tang. $\frac{ABC-A}{2}$: : tang. $\frac{ACB}{2}$: tang. of the angle included by the perpendicular and a line bisecting the vertical angles; whence ACD is also known; then (by theorem 5.) tang. A : co-tang. ACD : : rad. : co-fine AC.

The following propositions and remarks concerning spherical triangles (communicated to Dr HUTTON by Dr MACKENZIE) will also render the calculation of them perspicuous.

1. A spherical triangle is equilateral, isosceles, or scalene, according as it has its 3 angles all equal, or two of them equal, or all 3 unequal; and *vice versa*.

2. The greatest side is always opposite the greatest angle, and the smallest side opposite the smallest angle.

3. Any two sides taken together are greater than the third.

4. If the 3 angles are all acute, or all right, or all obtuse; the three sides will be, accordingly, all less than 90°, or equal to 90°, or greater than 90°; and *vice versa*.

5. If from the 3 angles A, B, C, of a triangle ABC, (fig. 11.) as poles, there be described, upon the surface of the sphere, 3 arches of a great circle DE, DF, FE, forming by their intersections

a new spherical triangle DEF; each side of the new triangle will be the supplement of the angle at its pole; and each angle of the same triangle will be the supplement of the side opposite to it in the triangle ABC.

6. In any triangle ABC, or Δ BC, (fig. 12.) right-angled in A, *1st*, The angles at the hypotenuse are always of the same kind as their opposite sides; *2^{dly}*, The hypotenuse is less or greater than a quadrant, according as the sides including the right angle are of the same or different kinds; that is to say, according as these same sides are either both acute or both obtuse, or as one is acute and the other obtuse. And *vice versa*, *1st*, The sides including the right angle are always of the same kind as their opposite angles; *2^{dly}*, The sides including the right angle will be of the same or different kinds, according as the hypotenuse is less or more than 90°; but one at least of them will be of 90°, if the hypotenuse is so.

T R I

TRIGUEROS, a town of Spain, in Seville, 8 miles NNE. of Moguer.

TRIGYNIA, [from *trigyn*, three, and *gyn*, a woman,] in botany, an order of plants, under various genera, in the Linnæan system comprehending

T R I

such species as have 3 pistils, or female parts. See BOTANY, Index.

TRIHLATÆ, from *tres*, three, and *hilum*, an external mark on the seed; the 23d class in Linnæus's Fragments of a natural method; consisting of

of plants with three seeds, which are marked with an external cicatrix or scar, where they are fastened within the fruit. See BOTANY, Index.

TRIHLATUM FOLIUM. } See BOTANY, Gloss.
TRIJUGUM FOLIUM. } sary.

* TRILATERAL, *adj.* [*trilateral*, French: *tres*, and *latus*, Lat.] Having three sides.

TRILIX, a genus of plants, belonging to the class *polyandria*, and ranking in the order of *monogynia*.

(1.) * TRILL, *n. f.* [*trillo*, Italian.] Quaver; tremulousness of music.—

In songs and airs express their martial fire,

Combat in *trills*, and in fugue expire. *Addis.*

(2.) TRILL, [from *trillo*, Ital.] in music, an alternate undulation of different sounds, synonymous with *SHAKE*. It is used by Rousseau and several French musicians in this sense. See MUSIC, Part I. Chap. VIII. § 75.

(1.) * To TRILL, *v. a.* [from the noun.] To utter quavering.—The lobsor-suited songstress *trills* her lay. *Thomson.*

(2.) * To TRILL, *v. n.* 1. To trickle; to fall in drops or slender streams.—Now and then an ample tear *trill'd* down. *Shak.* 2. To play in tremulous vibrations of sound.—Judge of *trilling* notes and tripping feet? *Dryden.*

(1.) * TRILLION, *n. f.* [A word invented by *Locke*.] A million of millions of millions; a million twice multiplied by a million.

(2.) TRILLIONS. See ARITHMETIC, Index.

TRILLIUM, in botany, *Herb Paris of America*, or *Herb True-love of Canada*; a genus of plants belonging to the class of *hexandria*, and in the order of *trigynia*; and in the natural method ranking in the 11th order, *Sarmentose*. It has a three-leaved spreading empalement, and 3 oval petals; it has 6 awl-shaped stamina, terminated by oblong summits, and a roundish germen, with 3 recurved styles, crowned by male stigmata; the germen becomes a roundish berry, with 3 cells, filled with roundish seeds. There are 3 species, all natives of America; one of them is called THREE-LEAVED NIGHTSHADE. See PARIS, N° 9.

TRILOBUM, } in botany. See BOTANY.
TRILOCULAR, *adj.* } *NY, Glossary.*

* TRILUMINAR, } *adj.* [*triluminaris*, Latin.]
* TRILUMINOUS, } Having three lights. *DiB.*

(1.) * TRIM, *adj.* [*getrymmeth*, Sax. completed.] Nice; snug; dressed up. It is used with slight contempt.—When t' other *trim* bowers do make. *Tupper.*—A trim exploit, a manly enterprize! *Shak.*—The Dorick order is little trimmer than the Tuscan that went before. *Wotton.*—So trim, so dissolute, so loosely dress? *Dryden.*

(2.) * TRIM, *n. f.* Drefs; gear; ornaments. It is now a word of slight contempt.—They come like sacrifices in their *trim*. *Shak.*—Your labour-some and dainty *trims*. *Shak.*—The goodly London in her gallant *trim*. *Dryden.*

(3.) TRIM, in navigation, implies in general, the state or disposition by which a ship is best calculated for the several purposes of navigation. Thus the trim of the hold denotes the most convenient and proper arrangement of the various materials contained therein relatively to the ship's motion or stability at sea. The trim of the masts and sails is also their most apposite situation with regard

to the construction of the ship and the effort of the wind upon her sails. See SEAMANSHIP.

(2.) TRIM, in geography, a town of Ireland, capital of Meath, seated on the Boyne; 20 miles SW. of Drogheda, and 33 NW. of Dublin. Lon. 6. 48. W. Lat. 53. 32. N.

(1.) * To TRIM, *v. a.* [*trimman*, Saxon, to build.] 1. To fit out.—

As rav'nous fishes do a vessel follow

That is new *trimm'd*. *Shak.*

2. To drefs; to decorate.—And I was *trimm'd* in Julia's gown. *Shak.*—Penny-royal and orpin they use in the country to *trim* their houses. *Bacon.*—Two arts attend architecture, to drefs and *trim* her, picture and sculpture. *Wotton.*—*Trimm'd* with white ribbons and with garlands drest. *Dryden.*

3. To shave; to clip.—Mephiboseth had not *trimm'd* his beard. 2 Sam. xix. 24.—Clip and *trim* those tender strings like a beard. *Brown.*—The barber may *trim* religion as he pleases. *Howell.*—*Trim* off the small superfluous branches. *Mort.*

4. To make neat; to adjust.—I found her *trimming* up the diadem. *Shak.*—*Trimming* all handsomely. *Shak.*—More kemb'd, and bath'd, and rubb'd, and *trimm'd*. *Ben Jonson.*—And wreaths, herself had tainted, *trimm'd* anew. *Fischel.*—When workmen fit a piece into other work, they say they *trim* in a piece. *Moxon.*—Starts from her trance, and *trims* her wither'd bays. *Pope.*—Now *trims* the midnight lamp in college cells. *Young.* 5. To balance a vessel.—Sir Roger put his coachman to *trim* the boat. *Spektator.* 6. It has often up emphatical.—*Trim'm'd* up your praises with a princely tongue. *Shak.*

(2.) * To TRIM, *v. n.* To balance; to fluctuate between two parties.—*Trimming* and time-serving are but two words for the same thing. *South.*—A kind of *trimming* it between God and the devil. *South.*—

He who would hear what ev'ry fool could say,
Would never fix his thoughts, but *trim* his time away. *Dryden.*

TRIMBERG, a town of Franconia, in Wurzburg, 20 miles E. of Schweinfurt.

* TRIMLY, *adv.* [from *trim*.] Nicely; neatly.

Her yellow golden hair
Was *trimly* woven, and in tresses wrought. *Spens.*
—The mother will have her son cunning and bold, in making him to live *trimly*. *Ajcham.*

* TRIMMER, *n. f.* [from *trim*.] 1. One who changes sides to balance parties; a turncoat.—The bat 'scaped in both by playing the trimmer. *L'Esrange.*

All parties and religions join,

Whigs, tories, trimmers. *Swift.*

A piece of wood inserted.—Before they pin up the frame of ground-plates, they must fit in the summer and the girders, and all the joists and the trimmers for the stair-case. *Moxon.*

* TRIMMING, *n. f.* [from *trim*.] 1. Ornamental appendages to a coat or gown.—It is too gay, and but all *trimming*. *Garrb.*

* TRIMNESS, *n. f.* [from *trim*.] Neatness; pretty elegance of drefs.

TRIMONTIUM. See DRYBURGH, N° 2.

TRIMPERG. See TRIMBERG.

TRIMWENTON, a town of England, in the county of Cornwall; N. of Penzance.

TRINA-

TRINACRIA, } ancient names of Sicily from its
 TRINACRIS, } triangular form. See SICILY.

§ 2. * TRINAL. *adj.* [*trinus*, Latin.] Threefold.—

Like many an angel's voice,
 Singing before th' eternal majesty,
 In their *trinal* triplicity on high. *Spenser.*

—To fit the midst of *trinal* unity. *Milton.*

TRINCHINOPOLI. See TRITCHINOPOLI,
 and INDIA, § 17.

TRINCOLI, a town of Ceylon, near the E.
 coast; 84 miles ESE. of Candi.

TRINCOMALE, a city of Ceylon, on the E.
 coast, with a harbour, esteemed the best in the E.
 Indies. It was taken from the Dutch, by the Bri-
 tish, in Jan. 1782, retaken by the French in Aug.
 and restored to the Dutch by the peace in 1783. It
 is seated on a gulf so named, 100 miles NE. of
 Candy. It is now, with the whole island, in pos-
 session of Great Britain. Lon. 81. 52. E. Lat. 8.
 45. N.

TRINCUMBAR. See TRANQUEBAR.

TRINDELEN, an island of Denmark, in the
 Scagerrac, between N. Jutland and Norway; 7
 miles NE. of Lefloe. Lon. 12. 1. E. Lat. 57. 27. N.

* TRINE. *n. f.* [*trine*, Fr. *trinus*, Lat.] An as-
 pect of planets placed in three angles of a trigon,
 in which they are supposed by astrologers to be
 eminently benign.—In sextile, square, and *trine*,
 and opposite. *Milton*.—Now frequent *trines* the
 happier lights among. *Dryden*.—

From Aries right ways draw a line, to end
 In the same round, and let that line subtend
 An equal triangle; now since the lines
 Must three times touch the round, and meet
 three signs,

Where'er they meet in angles those are *trines*.

Craeb.

* To TRINE. *v. a.* [from the noun.] To put in
 a *trine* aspect.—

By fortune he was now to Venus *trin'd*,
 And with stern Mars in Capricorn was join'd.

Dryden.

TRINERVUM FOLIUM. See BOTANY, *Gloss.*

TRINES, *n. f. plur.* 3 children born at one birth.

TRING, an elegant town of England in Hert-
 fordshire; the most Western in the county, next
 to Buckingham; 4 miles from Wendover; and 31
 from London. It has a good market on Friday
 for corn; and a fair Sept. 29.

TRINGA, the SANDPIPER, a genus of birds be-
 longing to the order of *grallæ*. The bill is some-
 what tapering, and of the length of the head; the
 nostrils are small; the toes are 4, and divided, the
 hind toe being frequently raised from the ground.
 According to Dr Latham there are 45 species, of
 which 18 are British. The most remarkable are these:

1. TRINGA ALPINA, the *dunling sandpiper*, is
 distinguished from the others by the singularity of
 its colours. The back, head, and upper part of
 the neck, are ferruginous, marked with large black
 spots; the lower part of the neck white, marked
 with short dusky streaks; the coverts of the wings
 ash-colour; the belly white, marked with large
 black spots, or with a black crescent pointing to-
 wards the thighs; the tail is ash-coloured; legs
 black; toes divided to their origin. In size it is

superior to that of a lark. These birds are found
 on our sea-coasts; but may be reckoned among
 the more rare kinds. They lay four eggs of a dirty
 white colour, blotched with brown round the
 thicker end, and marked with a few small spots
 of the same colour on the smaller end.

2. TRINGA CANUTUS, the *knout*, has the fore-
 head, chin, and lower part of the neck, brown,
 inclining to ash-colour; the back and scapulars
 deep brown, edged with ash-colour; the coverts
 of the wings white, the edges of the lower order
 deeply so, forming a white bar; the breast, sides,
 and belly white, the two first streaked with brown;
 the coverts of the tail marked with white and
 dusky spots alternately; the tail ash-coloured, the
 outmost feather on each side white; the legs of a
 bluish grey; and the toes, as a special mark, di-
 vided to the very bottom; the weight 4½ oz.—
 These birds, when fattened, are preferred by some
 to the ruffs themselves. They are taken in great
 numbers on the coasts of Lincolnshire. Their sea-
 son is from the beginning of August to the com-
 mencement of the frosts. Camden says they derive
 their name from king Canute, Knute, or Knout,
 as he is sometimes called; because they were a
 very favourite dish with that monarch.

3. TRINGA CINCLUS, *purse*, or *flint*, is 7½ inches
 long; the head and hind part of the neck are
 ash-coloured, marked with dusky lines; a white
 stroke divides the bill and eyes; the back is of a
 brownish ash-colour; the breast and belly white;
 the coverts of the wings and tail a dark brown,
 edged with light ash-colour or white; the upper
 part of the quill-feathers dusky, the lower white;
 the legs of a dusky green; the toes divided to their
 origin. The bill an inch and a half long, slender,
 and black; irides dusky.—These birds come in
 prodigious flocks on our sea coasts during the win-
 ter: in their flight they perform their evolutions
 with great regularity; appearing like a white or
 dusky cloud, as they turn their backs or their
 breasts towards us. They leave our shores in
 spring. They were formerly well known.

4. TRINGA HYPOLEUCOS, the *common sandpiper*,
 except in pairing time, is a solitary bird: it is ne-
 ver found near the sea, but frequents rivers, lakes,
 and other fresh waters. Its head is brown, streak-
 ed with downward black lines; the neck an ob-
 scure ash-colour; the back and coverts of the
 wings brown, mixed with a glossy green, elegant-
 ly marked with transverse dusky lines; the breast
 and belly are of a pure white; the quill-feathers
 and the middle feathers of the tail are brown; the
 legs of a dull pale green.

5. TRINGA PUGNAX. The male of this species
 is called *ruff*, and the female *reeve*. The name
ruff is given to the males because they are furnish-
 ed with very long feathers, standing out in a re-
 markable manner, not unlike the ruff worn by our
 ancestors. The ruff is of as many different co-
 lours as there are males; but in general it is bar-
 red with black; the weight is 6 or 7 oz.; the
 length, one foot. The female has no ruff; the
 common colour is brown; the feathers are edged
 with a very pale colour; the breast and belly
 white. Its weight is about 4 oz. These birds ap-
 pear in the fens early in spring, and disappear
 about Michaelmas. The reeves lay 4 eggs in a tuft

of

of grafs, the first week in May, and sit about a month. The eggs are white, marked with large rusty spots. Fowlers avoid in general the taking of the females; not only because they are smaller than the males, but that they may be left to breed. Soon after their arrival, the males begin to *hill*, that is, to collect on some dry bank near a water, in expectation of the females, who resort to them. Each male keeps possession of a small piece of ground, where it runs round till the grafs is worn quite away, and nothing but a naked circle is left. When a female lights, the ruffs fall to fighting. They make use of the same action in fighting as a cock, place their bills to the ground and spread their ruffs. These birds are found in Lincolnshire, the isle of Ely, and in the East riding of York. They visit a lake called *Martin Mere* in Lancashire the latter end of March or beginning of April; but do not continue there above 3 weeks.

6. *TRINGA VANELLUS*, the *lapwing*, or *teswit*, has the bill, crown of the head, crest, and throat, of a black colour; there is a black line under each eye; the back is of a purplish green; the wings and tail are black and white, and the legs red; the weight is 8 oz. and the length 13 inches. It lays 4 eggs, making a slight nest with a few bents. The eggs have an olive cast, and are spotted with black. The young, as soon as hatched, run like chickens: the eggs are held in great esteem for their delicacy, and the London poulterers sell them at an extravagant price. In winter, lapwings join in vast flocks; but at that season are very wild; the flesh is very good, their food being insects and worms. In October and November, they are taken in the fens in nets, like ruffs; but are not preferred for fattening, being killed as soon as caught.

TRINGENSTEIN, a town of Germany, in Nassau-Dillenburg; 6 miles E. of Dillenburg.

(1.) **TRINIDAD**, a town of Buenos Ayres, in the province of Moxes.

(2.) **TRINIDAD**, a town of Cuba, 140 miles SE. of Havannah. Lon. 80. 18. W. Lat. 51. 56. N.

(3—5.) **TRINIDAD**, 3 towns of Mexico: 1. In Guatimala, 115 miles SE. of Guatimala: 2. In Nicaragua, on the E. bank of the lake, so named: 3. In Veragua; 18 miles SE. of Conception.

(6.) **TRINIDAD**, an island in the gulf of Mexico, separated from New Andalusia, in Terra Firma, by a strait, about 3 miles broad. The soil is fruitful, producing sugar, cotton, Indian corn, fine tobacco, and fruits; but the air is unhealthy. It was taken by Sir Walter Raleigh in 1595, and by the French in 1676, who plundered the island and then left it. It is about 62 miles long, and 45 broad; and was discovered by Christopher Columbus in 1498. There is a bituminous lake in it. See *TAR*, N° 51.

(7.) **TRINIDAD**, a town of New Granada; 20 miles NW. of Santa Fe.

(1.) **TRINITARIANS**. *n. f.* those who believe in the Trinity.

(2.) **TRINITARIANS**, ORDER OF, an order instituted at Rome, A. D. 1198. The founders were John de Matha and Felix de Valois. The pope permitted them to establish this order for the deliverance of captives who groaned under the tyranny of the infidels: he gave them as a habit a

white gown, ornamented with a red and blue cross. This order possessed, at one time, about 250 convents in 13 different provinces. There was formerly the province of England, where this order had 43 houses, that of Scotland, where it had 9; and that of Ireland, where it had 52.

(1.) **TRINITE**, a town of France, in the dep. of Morbihan; 9 miles N. of Josselin, and 15 E. of Pontivy.

(2.) **TRINITE**, a town of the French empire, in the dep. of the Po, late Piedmontese; 10 miles SE. of Savigliano.

(3.) **TRINITE**, a sea-port town of Martinico, much frequented by ships. Lon. 61. 8. W. Lat. 14. 53. N.

(1.) * **TRINITY**. *n. f.* [*trinitas*, Lat. *trinité*, Fr.] The incomprehensible union of the Three Persons in the Godhead.—Touching the *trinity*. *Peacham*.—There is not any objection against the *trinity*. *Locke*.—

(2.) **TRINITY**. See *THEOLOGY*, Part II. *Se8*. II.

(3, 4.) **TRINITY BAY**, 1. A bay on the NE. coast of New-Holland: 2. A bay on the E. of Newfoundland. Lon. 53. 10. W. Lat. 48. 0. N.

(5.) **TRINITY GASK**, a parish of Perthshire, in Strathern, composed of the united parishes of KINKEL and WESTER GASK. It extends several miles on both sides of the Earn; the banks rising gradually to the N. and the rest of the surface being level and fertile. The whole is arable, but 1000 acres of moor remain in a state of nature. The soil is often fertilized by the Earn overflowing its banks, though the damage often balances the benefit. The population in 1796 was 795; the decrease 118 since 1755.

(6.) **TRINITY HOSPITAL**. See *EDINBURGH*, § 12.

(7.) **TRINITY INLET**, a bay on the N. Pacific Ocean; on the W. coast of N. America: 30 miles S. of Queen Charlotte's Sound.

(8.) **TRINITY-SUNDAY**, a festival observed on the Sunday next after Whitunday, in honour of the holy Trinity. The observance of this festival was first enjoined in the council of Arles, A. D. 1260.

TRINIUM, a river of Italy, running into the Adriatic.

TRINKAMALY. See *TRINCOMALE*. This city was taken by the British troops, on the 26th of August 1795.

* **TRINKET**. *n. f.* [This *Skinner* derives somewhat harshly from *trinet*, Fr. *trinchetto*, Ital. *a topail*. I rather imagine it corrupted from *tricket*, some petty finery or decoration.] 1. Toys; ornaments of dress; superfluities or decoration.—Of all the *trinkets*, there is not one but serves to some necessary purpose. *Sidon*.—They throng who should buy first, as if my *trinkets* had been hallowed. *Shak*.—Pack up with all your *trinkets*, and away. *Dryd*.—Toys and *trinkets*, tweezer-cafes, pocket glasses. *Arbutnot*.—Till Phyllis all her *trinkets* pawn'd. *Swift*. 2. Things of no great value; tackle; tools.—Have storehouse for *trinkets* and tools. *Tuffer*.—Go with all your servants and *trinkets* about you. *L'Estrange*.

TRINO, a town of the French empire, in the dep. of the Tanaro, and ci devant duchy of Montferrat, seated in a fertile but marshy district, abounding

bounding in corn, rice, fruits, &c. and famous for fine cheese; 8 miles NW. of Casal, and 10 SSW. of Vercelli. Lon. 8. 30. E. Lat. 45. 26. N.

TRINOBANTES, an ancient people of Britain, who inhabited Middlesex and Essex.

TRINOMALY, a town of Hindoostan, in the Carnatic, near which the troops of Hyder Ali were defeated by the British under Col. Smith, in 1763, with the loss of a great part of their artillery. It is 5 miles SW. of Arcot, and 51 WNW. of Pondicherry.

TRIO, in music, a part of a concert wherein 3 persons sing; or, more properly, a musical composition consisting of 3 parts.

* TRIOBOLAR, *adj.* [*triobolaris*, Lat.] Vile; mean; worthless.—It may pass current amongst the ballad-mongers for a triobolar ballad. *Cheyrel*.

TRIOCALA, or } an ancient town in the S. of
TRIOCLA, } Sicily. *Sil. Ital.* 14. v. 271.

TRIGECIA, in botany, the 3d order of plants, in the class *Polygamia*; comprehending those singular plants, which have the polygamy on three distinct plants. It contains 2 genera, the *Ficus* and *CERATONIA*.

TRIOLA, a town of Genoa, 18 miles NE. of Ventimiglia.

TRIOND, a town of European Turkey, in Albania; 12 miles WNW. of Aleffio.

TRIONES, in astronomy, a sort of constellation, or assemblage of seven stars in the Ursa Major, popularly called *Charles's Wain*.—From the *septem triones* the north pole takes the denomination *septentrio*.

(1.) TRIONTO, a river of Naples, which runs into the gulf of Tarento; 10 miles E. of Rossano.

(2.) TRIONTO, a cape of Naples, on the coast of Calabria Citra, on the Gulf of Tarento, at the mouth of the Trionto.

TRIOPAS, 1. A son of Neptune and Canace; father of Erichthon; 2. A son of Phæbus, father of Agænor and Jafus.

TRIOPIUM, an ancient town of Caria.

TRIOPTERIS, a genus of plants, belonging to the class of *decandria*, and the order of *trigynia*; ranking in the natural method in the 23d order, *Tribilata*.

TRIOSTEUM, in botany, FEVER-ROOT, or *Falsæ Ipecacuana*, a genus of plants belonging to the class of *pentandria*, and the order of *monogynia*; ranking in the natural method under the 48th order, *Aggregate*.

* TRIP, *n. f.* [from the verb] 1. A stroke or catch by which the wrestler supplants his antagonist.—Thine own trip shall be thine overthrow. *Shak.*—And watches with a trip his foe to foil. *Dryden.*—Trips and Cornish hugs. *Addison.* 2. A stumble by which the foothold is lost. 3. A failure; a mistake.—They then, who of each trip th' advantage take. *Dryden.*—Each seeming trip, and each digressive start. *Harte.* 4. A short voyage or journey.—I took a trip to London on the death of the queen. *Pope.*

(1.) * To TRIP, *v. a.* [*treper*, Fr. *truppen*, Dut.] 1. To supplant; to throw by striking the feet from the ground by a sudden motion.—Tripp'd me behind. *Shak.*—To trip the course of law. *Shak.* 2. To strike from under the body.—I trips up thy heels and beat thee. *Shak.*—The words of Hobbes's

defence trip up the heels of his cause. *Bramhall.* 3. To catch; to detect.—Trip me, if I err. *Shak.*

(2.) * To TRIP, *v. n.* 1. To fall by losing the hold of the feet. 2. To fail; to err; to be deficient.—If any where they chance to trip. *Hooker.*—Virgil pretends sometimes to trip, but it is to make you think him in danger when most secure. *Dryden.*—Many cannot know where memory will trip and fail them. *South.*—Our club has caught him tripping. *Addison.*—Several writers would expose my ignorance, if they caught me tripping. *Addison.* 3. To stumble; to titubate.—I may have the idea of a man's drinking till his tongue trips. *Locke.* 4. To run lightly.—Trip we after the night's shade. *Shak.*—The triplex, fir, is a good tripping measure. *Shak.*—Distinctly trips from this to that. *Crafb.*—Trip no more in twilight ranks. *Milton.*—She tripp'd to light. *Dryden.*—Thus from the lion trips the trembling doe. *Dryden.*—Tripping from sea on such an errand came. *Dryden.*—He'll serve to trip before the victor's chariot. *Addison.*—In a posture of tripping forward. *Addison.*—The ladies trip in petticoats. *Prior.*—They slide down and trip up the steepest slopes. *Pope.* 5. To take a short voyage.

TRIPALL, or TRIPPALL, a river of Northumberland, which runs into the Tyne, 7 miles W. of Hexham.

TRIPANTY, a town of Hindoostan, in the Carnatic; 68 miles NW. of Madras.

* TRIPARTITE, *adj.* [*tripartite*, Fr. *tripartitus*, Lat.] Divided into three parts; having three correspondent copies; relating to three parties.—Our indentures tripartite are drawn. *Shak.*

TRIPATORE, 2 towns of Indostan: 1. In the Carnatic, 20 miles NE. of Madura, and 48 SW. of Tanjore; 2. In Myfore, 110 miles E. of Seringapatam, and 37 NW. of Trinkomaly.

* TRIPLE, *n. f.* [*tripe*, French; *trippa*, Italian and Spanish.] 1. The intestines; the guts.—How say you to a fat tripe finely broiled? *Shak.*—In private draw your poultry, clean your tripe. *King.* 2. It is used in ludicrous language for the human belly.

* TRIPEDAL, *adj.* [*tres* and *pes*, Latin.] Having three feet.

TRIPLELA, in mineralogy, a peculiar species of TRIPOLI, found by Homberg most proper for making moulds for pastes. See PASTE, § 11.

TRIPETALOIDEÆ, in botany, the 5th order of plants, in Linnaeus's system of a natural method. See BOTANY, Index.

* TRIPETALOUS, *adj.* [*tres* and *petalos*.] Having a flower consisting of three leaves.

TRIPETTY, a town of Hindoostan, in the Carnatic; 49 miles NW. of Nellore, and 68 NW. of Madras.

* TRIPHITHONG, *n. s.* [*triphthongue*, French; *τρίφθογγος*.] A coalition of three vowels to form one sound: as, *eau*; *eye*.

TRIPHYLLIA, a name of *Elis*.

TRIPHYLLOUS, *adj.* See BOTANY, Gloss.

TRIPHI, a town of Sicily, in the valley of Demona; 8 miles S. of Pafi.

TRIPINNATUM FOLIUM. See BOTANY, Gloss.

TRIPLARIS, in botany, a genus of plants, belonging to the class of *triandria*, and in the order of *monogynia*.

(1.) * TRIPLE, *adj.* [*triple*, Fr. *triplex*, *triplex*, Lat.]

Lat.] 1. Threefold; consisting of three conjoined.—The triple pillar of the world. *Shak.*—How are we join'd with hell in triple knot? *hail.*—May none this triple knot undo. *Waller.*—By thy triple shape. *Dryd.*—The triple Geryon drove from conquer'd Spain. *Dryd.*—Out bounce'd the mastiff of the triple head. *Swift.* 2. Treble; three times repeated.—A triple proportion. *Burnet.*—Double or triple as many. *Bentley.*

(2.) TRIPLE in music, a species of measure or time. See MUSIC.

* To TRIPLE. *v. a.* [from the adjective.] 1. To treble; to make thrice as much, or as many.—Doubled and tripled prayers. *Hooker.*—These halpence would be tripled upon us. *Swift.* 2. To make threefold.—Th' alliance of his tripled unity. *Dryden.*

* TRIPLET. *n. f.* [from *triple*.] 1. Three of a kind.—

Such a triplet could you tell
Where to find on this side hell. *Swift.*

2. Three verses rhyming together: as,
Waller was smooth, but Dryden taught to
join

The varying verse, the full resounding line,
The long majestic march and energy divine. *Pope.*

—I frequently make use of triplet rhymes. *Dryd.*

* TRIPPLICATE. *adj.* [from *triplex*, Latin.] Made thrice as much.—Triplicate ratio, in geometry, is the ratio of cubes to each other. *Harris.*—All bear a triplicate proportion one to another. *Grew.*

* TRIPLICATION. *n. f.* [from *triplicate*.] The act of trebling or adding three together.—Triplication of the diameter of 120. *Glanville.*

* TRIPPLICITY. *n. f.* [triplicité, Fr. from *triplex*, Lat.] Trebleness; state of being threefold.—It was a dangerous triplicity to a monarchy; to have the arms of a foreigner, the discontents of subjects, and the title of a pretender to meet. *Bac.*—Affect not duplicities nor triplicities. *Watts.*

TRIPLINERVE FOLIUM. See BOTANY, Gloss.

* TRIPMADAM. *n. f.* An herb.—Tripmadam is used in salads. *Mortimer.*

(1.) * TRIPOD. *n. f.* [tripus, Lat.] A seat with three feet, such as that from which the priests of Apollo delivered oracles.—Two tripods cast in antick mould. *Dryden.*

(2.) The TRIPOD, in antiquity, was a famed sacred seat or stool, supported by three feet, whereon the priests and sibyls were placed to render oracles. It was on the tripod that the gods were said to inspire the Pythia with that divine fury and enthusiasm wherewith she was seized at the delivery of her predictions.

TRIPOLDA, a town of Naples, in Principato Ultra; 16 miles S. of Benevento.

(1.) TRIPOLI, a country of Africa, in Barbary; bounded on the N. by the Mediterranean; on the S. by the country of the Berberies; on the W. by Tunis, Biledulgerid, and a territory of the Gadamis; and on the E. by Egypt. It is about 915 miles along the sea coast; but the breadth is various. Some parts of it are pretty fruitful; but that towards Egypt is a sandy desert. It is governed by a dey, who is not absolute, for a Turkish bashaw resides here, who receives his authority

from the grand seignior, and has a power of controlling the dey, and levying taxes on the people. The dey is elected by the soldiers, who depose him when they please.

(2.) TRIPOLI, the capital of the above republic, anciently called TARABULUS, and TRABILIS. It has a castle and a fort; is pretty large; and the inhabitants are noted pirates. It was taken by Charles V. who settled the knights of Malta there; but they were driven away by the Turks in 1551. It was formerly very flourishing; and has now some trade in stuffs, saffron, corn, oil, wool, dates, ostrich feathers, and skins; but they make more of the Christian slaves which they take at sea; for they either set high ransoms upon them, or make them perform all sorts of work. It is seated on the coast of the Mediterranean, in a sandy soil, and surrounded by a wall, strengthened by other fortifications. Lon. 13. 12. E. Lat. 32. 34. N.

(3.) TRIPOLI, or TRIPOLIS, a town of Syria, anciently called TARABOLUS; received its name from its being anciently formed of three cities at a small distance from each other, one of which belonged to the Aradians, or ancient kingdom of Arad, the 2d to the Sidonians, and the 3d to the Tyrians, as a common mart to those maritime powers. The present town of Tripoli is built a mile and a half from the other, upon the declivity of a hill facing the sea. It is surrounded with walls, fortified with seven strong towers, and a castle, all of Gothic architecture; but the streets are narrow, and the houses low. The city contains about 16,000 inhabitants. The basha, or pacha, who resides in the castle, where there is a garrison of 200 janizaries, governs the adjacent territory, in which there is plenty of fruit, and a great number of mulberry trees. Lon. 35. 50. E. Lat. 34. 20. N.

(4) TRIPOLI, in the old system of mineralogy, was ranked as a genus of argillaceous earth. It is now classed as a species of CHALCEDONY. It is much used in the polishing of metals, and is named from Tripoli in Barbary, whence it was first brought to us, and has the following properties: 1. It does not effervesce with any of the acids. 2. It hardens in the fire; and by a considerable heat, its surface becomes vitrified. 3. Every kind of it, excepting that found in England, becomes red by calcination. 4. It is fusible by mixture with calcareous earth, as well as by borax and microcosmic salt. 5. Generally no salt can be extracted by washing, though sometimes the muriatic and sulphuric acid may be extracted by distillation. 6. When crude it imbibes water, but is not diffusible in it. 7. It tastes like common chalk, and feels sandy between the teeth, though no sand can by any means be extracted from it. Tripoli is found 1. Solid, and of a rough texture; brown, yellowish, and spotted: 2. Friable and compact; granulated, brown, or yellowish; this last is met with in England and Scotland. The yellowish, or Venetian tripoli is the best earth for founding gems. See PASTE, § 11. In the *Memoirs of the Academy at Paris*, for 1769, it is asserted, that tripoli is a volcanic product, but this seems not credible. See MINERALOGY, Part II. Chap. IV. Class I. Ord. I. Gen. VI. Sp. 9.

(5.) TRIPOLI is also a name given by some mineralogists

neralogists to YELLOW CHALK. See MINERALOGY, Part II. Chap. IV. Clafs I. Ord. III. Gen. II. Species 1.

TRIPOLIZZA, a town of European Turkey, in the Morea; 18 m. W. of Napoli di Romania.

(1.) * TRIPOLY. *n. f.* [I suppose from the place whence it is brought.] A sharp cutting sand.—Polishing glass with putty or tripoly. *Newton.*

(2.) TRIPOLI. See TRIPOLI, N° 4.

TRIPONTIO, or } a town of Italy, in the
TRIPONZO, } duchy of Spoleto, on the
Nera; 12 miles W. of Norcia.

TRIPOOR, a town of Indoftan, in Myfore; 25 miles NE. of Coimbatore.

* TRIPOS. *n. f.* A tripod. See TRIPOD.—
Welcome all that lead or follow,
To the oracle of Apollo;

Here he speaks out of his pottle,
Or the tripas, his tower bottle. *Ben Jonson.*
—Come down from off the tripas, and speak plain.

Dryden.

TRIPPALL. See TRIPALL.

* TRIPPER. *n. f.* [from trip.] One who trips.

(1.) * TRIPPING. *adj.* [from trip.] Quick; nimble.—From standing lake, to tripping-ebb. *Milton.*

(2.) * TRIPPING. *n. f.* [from trip.] Light dance.—Other trippings to be trod. *Milton.*

* TRIPPINGLY. *adv.* [from tripping.] With agility; with swift motion.—Sing and dance it trippingly. *Shak.*—Speak the speech trippingly on the tongue. *Shak.*

TRIPSACUM, in botany, a genus of plants belonging to the class *monocæcia*, and order of *triandria*; and ranking, according to the natural system, in the 4th order, *Gramina*.

TRIPSTADT, a town of the French empire, in the dep. of the Rhine and Moselle, and ci-devant duchy of Deux Ponts; 18 miles NW. of Landau, and 16 ENE. of Deux Ponts. It was taken by the French in 1794.

TRIPTIS, a town of Upper Saxony, in Neustadt, 4 m. E. of Neustadt, and 41 SSW. of Leipzig.

TRIPTOLEMUS. See CERES, N° 3; and MYSTERIES, § 30, and 39.

* TRIPTOTE. *n. f.* [triptoton, Latin.] Triptote is a noun used but in three cases. *Clarke.*

* TRIPUDIARY. *adj.* [tripudium, Lat.] Performed by dancing.—Claudius Pulcher continued the tripudiary augurations. *Brown.*

* TRIPUDIATION. *n. f.* [tripudium, Lat.] Act of dancing.

TRIQUETRA, a name of Sicily. See SICILY, § 2.

TRIQUETROUS, *adj.* among botanists, expresses a fruit or leaf that has three sides or faces all flat.

TRIQUETRUM FOLIUM. See BOTANY, Gloss.

TRIQUIER, an ancient city of France, in the dep. of the North Coasts, and ci-devant province of Brittany.

* TRIREME. *n. f.* [triremis, Lat.] A galley with three branches of oars on a side.

(1.) * TRISECTION. *n. f.* [tres and sectio, Lat.] Division into three equal parts; the trisection of an angle is one of the desiderata of geometry.

(2.) TRISECTION is a term chiefly used in geometry, for the division of an angle into three equal

parts. The trisection of an angle, geometrically, is one of those great problems, whose solution has been so much sought for by mathematicians for 2000 years past; being, in this respect, on a footing with the famous QUADRATURE of the circle, and the DUPLICATION of the cube.

TRISMEGISTUS, [τρεῖς μύσται; Gr. thrice great-est] an epithet of HERMES. See HERMES, N° 2.

TRISMUS, the LOCKED JAW. See MEDICINE Index.

TRISPERMOUS, *adj.* in botany, three-seeded. TRISSILD, a town of Norway, in Aggerhuys; 65 miles N. of Kongswinger.

TRISSINO, John George, an Italian poet, born at Vicenza, in 1478. His tragedy of *Sophonissa* was acted at Rome, by order of Pope Leo, and received great applause. His chief work is a poem on *Italy delivered from the Goths*. He died in 1550. His works were printed at Verona, in 2 vols folio, 1719.

* TRISSYLLABICAL. *adj.* [trissyllabe, Fr. from trissyllable.] Consisting of three syllables.

* TRISSYLLABLE. *n. f.* [trissyllaba, Latin.] A word consisting of three syllables.

TRIST, an island near the coast of America, on the S. side of the Bay of Campeachy, W. of Port Royal Island, from which it is divided by a narrow channel. It is 18 miles in circumference.

TRISTAN D'ACUNHA, the largest of three islands in the S. Atlantic Ocean in Lat. 37. 9. S. Lon. 11. 50. W. The other two are named *Inaccessible* and *Nightingale*. They are situated where the Terra Australis Incognita was expected to be found.

TRISTEN, a town of Germany, in the county of Feldkirch; 11 miles SSW. of Feldkirch.

* TRISTFUL. *adj.* [tristis, Latin.] Sad; melancholy; gloomy; sorrowful.—A bad word.—*Tristful visage. Shak.*

* TRISULC. *n. f.* [trifidulus, Latin.] A thing of three points—Consider the threefold effect of Jupiter's trifid, to burn, discons, and terebrate. *Brown.*

TRITCHINGODE, a town of Hindoostan, in Myfore, 6 miles S. of Sankeridurgam.

TRITCHINOPOLY, a town of Hindoostan, in the Carnatic, 67 miles W. of Tranquebar, and 156 SE. of Seringapatam. Lon. 78. 45. E. Lat. 10. 48. N.

* TRITE. *adj.* [tritius, Lat.] Worn out; stale; common; not new.—Trite and obvious. *Rogers.*—In phrases batter'd, stale, and trite. *Swift.*

* TRITENESS. *n. f.* [from trite.] Staleness; commonness.

TRITERNATUM FOLIUM. See BOTANY, Gl. TRITHALL, a town of England, in the county of Cornwall.

* TRITHEISM. *n. f.* [tritheimse, Fr. trois and dieu.] The opinion which holds three distinct gods.

TRITHING. See SHIRE, § 2.

TRITICUM, WHEAT, in botany, a genus of plants belonging to the class of *triandria*, and order of *digynia*; and in the natural system ranging under the 4th order, *Gramina*. The calyx is bivalve, solitary, and generally containing 3 florets; the corolla is bivalve, one valve being bluntish, the other acute. There are 14 species. For the cultivation of Wheat, see RURAL ECONOMY,

Part II. *Scd.* III. Linnæus comprehends the different kinds of wheat cultivated at present under six species; viz. *Æstivum*, *hybernium*, *turgidum*, *Colonicum*, *Spelta*, and *Monococcum*. Other botanists, however, add other eight species to those of Linnæus, and thus enumerate 14 species in all, besides varieties, which the improvements of cultivation have increased very much.

1. *TRITICUM ÆSTIVUM*, *summer or spring wheat*, hath 4 flowers in a calyx, 3 of which mostly bear grain. The calyces stand pretty distant from each other on both sides a flat smooth receptacle. The leaves of the calyx are keel-shaped, smooth, and terminate with a short arista. The glumes of the flowers are smooth and belying, and the outer leaf of 3 of the glumes in every calyx is terminated by a long arista, but the 3 inner ones are beardless. The grain is rather longer and thinner than the common wheat. It is an annual, and is supposed to be a native of Tartary. The farmers call it *Spring Wheat*, because it will come to the sickle with the common wheat, though it be sown in February or March. The varieties of it are; 1. *Triticum æstivum, spica et grana rubente*. Spring wheat, with a red spike and grain. 2. *Triticum æstivum rubrum, spica alba*. Red spring wheat, with a white spike. 3. *Triticum æstivum, spica et grana alba*. Spring wheat, with a white spike and grain.

2. *TRITICUM HYBERNUM*, *winter, Lammas, or common wheat*, has also 4 flowers in a calyx, 3 of which are mostly productive. The calyces stand on each side a smooth flat receptacle, as in the former species, but they are not quite so far asunder. The leaves of the calyx are belying, and so smooth that they appear as if polished, but they have no arista. The glumes of the flowers too are smooth, and the outer ones near the top of the spike are often tipped with short arista. The grain is rather plumper than the former, and is the sort most generally sown in England; whence the name of *common wheat*. Its varieties are: 1. *Triticum hybernium, spica et grana rubente*. Common wheat, with a red spike and grain. 2. *Triticum hybernium rubrum, spica alba*. Common red wheat, with a white spike. 3. *Triticum hybernium, spica et grana alba*. Common wheat, with a white spike and grain.

3. *TRITICUM JUNCUM*, *russ wheat grass*, is a native of Britain, and is an annual plant.

4. *TRITICUM MARITIMUM*, *sea wheat grass*, is a native of Britain, and perennial.

5. *TRITICUM MONOCOCCUM*, *St Peter's corn, or one-grained wheat*, has 3 flowers in each calyx alternately bearded, and the middle one neuter. The spike is shining, and has two rows of grain like barley. It is an annual. Where it grows naturally is not known, but it is cultivated in Germany; and, in conjunction with spelt wheat, is there made into bread, which is coarse, and not so nourishing as that made of common wheat.

6. *TRITICUM POLONICUM*, *Polish wheat*, has some resemblance to the *turgidum*, but both grain and spike are longer. The calyx contains only two flowers, and the glumes are furnished with very long arista; the teeth of the midrib are bearded. It is an annual. This sort is seldom sown in England; so we know not what varieties it produces.

7. *TRITICUM PROSTRATUM*, or *Trailing wheat-grass*, is a native of Siberia, and an annual.

8. *TRITICUM PUMILUM*, or *dwarf wheat-grass*, is a native of Britain, and an annual.

9. *TRITICUM REPENS*, or *couch grass*, is a native of Britain, and is perennial. This is the famous ORCHESTON GRASS, so highly recommended for feeding cattle, and for making excellent hay, some years ago, in *Letters and Papers on Agriculture*, &c. In that work it was said horses would prefer it to corn mixed with chaff. It grows to the length of 18 inches, and then falls and runs in knots to the length of 16 or 18, or even 25 feet. It was first discovered in a meadow of Lord River's, at Orcheston.

10. *TRITICUM SPelta*, *Spelt wheat*, is an annual plant.

11. *TRITICUM TENELLUM*, or *tender wheat-grass*, is a native of Spain, and perennial.

12. *TRITICUM TURGIDUM*, or *compositum, thick spiked or cone-wheat*, is easily distinguished from either of the former; for though it has 4 flowers in a calyx after the manner of them, yet the whole calyx and the edges of the glumes are covered with soft hairs. The calyces too stand thicker on the receptacle, which make the spikes appear more turgid. Some of the outer glumes near the top of the spike are terminated by short arista, like those of the common wheat. The grain is shorter, plumper, and more convex on the back than either of the former species. It is an annual. Its varieties are numerous, and have various appellations in different counties, owing to the great affinity of several of them. Those most easily to be distinguished are: 1. *Triticum turgidum conicum album*. White cone wheat. 2. *Triticum turgidum conicum rubrum*. Red cone wheat. 3. *Triticum turgidum aristiferum*. Bearded cone wheat. 4. *Triticum turgidum, spica multiplici*. Cone wheat, with many ears. 5. The 5th variety is what the farmers call *clog wheat, square wheat, and reverts*. The grain of this is remarkably convex on one side, and when ripe the awns generally break in pieces and fall off. This sort is very productive, but it yields an inferior flour to what the former two species do.

13. *TRITICUM UNILATERALE*, *spiked sea-wheat, or one-sided sea-wheat*, is a native of Britain, and perennial.

14. *TRITICUM UNIOLOIDES*, or *Linear spiked wheat grass*, is a native of Italy, and perennial.

TRITLINGTON, a town of England, in Northumberland, on the N. of Morpeth.

(1.) TRITON, in the mythology, a sea-god, the son of Neptune and Amphitrite. He could calm the ocean in the greatest storms. He is represented as blowing a shell, his body above the waste, like that of a man, but below a dolphin. He was Neptune's trumpeter, and messenger.

(2.) TRITON, in geography; 1. a river of Africa, running into lake Tritons; 2. a river of Æthiopia.

(3.) TRITON, in zoology, a genus belonging to the order of vermes mollusca. The body is oblong; the tongue is spiral; it has tentacula, six on each side, the hindmost ones having claws like a crab. There is but one species, found in holes of rocks about the shore.

TRITONE,

TRITONE. *n. f.* in music, an imperfect concord; an interval of three-tones. See **MUSIC**, Def. § 9.

TRITONES, a numerous tribe of inferior sea deities, who dragged Neptune's chariot. They were half men half fishes.

TRITONIS, a lake of Africa. *Paus.* 9. c. 33.

TRITONON, a town of Doris. *Liv.* 28. c. 7.

TRITTAU, a town of Germany, in Holstein: 20 miles E. of Hamburg, and 21 SW. of Lubeck.

* **TRITURABLE.** *adj.* [*triturable*, Fr. from *trituration*.] Possible to be pounded or comminuted.—*Triturable* and reducible to powder. *Brown.*

To TRITURATE. *v. a.* [*trituro*, Lat.] To pound; to comminute; to reduce to powder.

* **TRITURATION.** *n. f.* [*trituration*, French; *trituro*, Lat.] Reduction of any substances to powder upon a stone with a muller, as colours are ground; it is also called levigation.—Abatement can hardly be avoided in *trituration*. *Brown.*

TRIVADE, a town of Hindoostan, in the Carnatic; 23 miles SW. of Pondicherry, and 72 S. of Arcot.

TRIVALVE PERICARPUM. See **BOTANY**, *Gl.*

TRIVENTO, a town of Naples, with a bishop's see, in Molise, on the Trino, 15 miles N. of Bogano, 11 N. of Molise, and 62 E. of Naples. *Lon.* 15. 37. E. *Lat.* 40. 50. N.

TRIVENTUM, an ancient town of Italy, belonging to the Samnites, now called **TRIVENTO**.

* **TRIVET.** *n. f.* [See **TREVET**.] Any thing supported by three feet.—A *trivet*, that enclos'd—Twenty-two measures. *Chapman.*—The *trivet* table of a foot was lame. *Dryden.*

TRIVIA, a surname of Diana, as she presided over all places where 3 roads met. *Virg.*

TRIVIAE ANTRUM, a place in **ARICIA**, where the goddess Egeria met with **NUMA**.

(1.) * **TRIVIAL.** *adj.* [*trivialis*, Fr. *trivialis*, Lat.] 1. Vile; worthless; vulgar; such as may be picked up in the highway.—For men of sense despise a *trivial* choice. *Roscommon.* 2. Light; trifling; unimportant; incon siderable. This use is more frequent, though less just.—But the respects there of are nice and *trivial*. *Shak.*—It would occur even in the most *trivial* instances. *Fell.*—Some *trivial* right. *Dryden.*—Slight and *trivial* indiscretions. *Rogers.*—Applause, in spite of *trivial* faults is due. *Pope.*—An action *trivial* in itself. *Pope.*

(2.) **TRIVIAL NAME**, in botany, zoology, &c. is that by which the species of a plant or animal is distinguished from every other species.

* **TRIVIALLY.** *adv.* [from *trivial*.] 1. Commonly; vulgarly.—Money is not the sinews of war, as is *trivially* said. *Bacon.* 2. Lightly; incon siderably.

* **TRIVIALNESS.** *n. f.* [from *trivial*.] 1. Commonness; vulgarity. 2. Lightness; unimportance.

TRIVICARY, a town of Hindoostan, in the Carnatic, 20 miles SE. of Gingee.

TRIVICUM, an ancient town of Italy, in the country of the **HIRPINI**. *Hor. i. Sat. 5.*

TRIVIER, a town of the French empire, in the dep. of the Po, and ci-devant prov. of Piedmont, in the late lordship of Biela; 6 miles NE. of **BIELA**.

TRIVIGILLO BAY, a bay of the Gulf of Honduras.

TRIVIUS. See **HERMES**, No 3.

TRIUMFETTA, in botany, a genus of plants, in the class *dodecandria* and order of *monogynia*; and in the natural method, ranking in the 37th order, *Columbifera*.

(1.) * **TRIUMPH.** *n. f.* [*triumphus*, Lat. *trionphe*, Fr.] 1. Pomp with which a victory is publicly celebrated.—It I will bear in *triumph* to the king. *Shak.*—Ancient *triumphs* of generals. *Bacon.* 2. State of being victorious.—In *triumph* issuing forth their glorious chief. *Milton.*—Arriv'd in *triumph*, from Geryon slain. *Dryden.* 3. Victory; conquest.—An enemy's *triumph*. *Shak.*—
Each order bright

Sung triumph.

Milton.

—The vain coquets the trifling *triumphs* boast. *Logie.* 4. Joy for success.—Great *triumph* and rejoicing was in heav'n. *Milton.* 5. A conquering card now called *trump*. See **TRUMP**.

(2.) A **TRIUMPH**, in Roman antiquity, was a public and solemn honour conferred by the Romans on a victorious general by allowing him a magnificent procession through the city.

(3.) **TRIUMPH, THE GREATER**, called also *curulis*, or simply the *triumph*, was decreed by the senate to a general, upon the conquering of a province or gaining a signal victory. The general was clad in a rich purple robe, interwoven with figures of gold, setting forth his great exploits; his buskins were beset with pearl; and he wore a crown, which at first was only laurel, but afterwards gold; in one hand he bore a branch of laurel, and in the other a truncheon. He was carried in a magnificent chariot, adorned with ivory and plates of gold, drawn usually by two white horses; though sometimes by other animals, as that of Pompey, when he triumphed over Africa, by elephants; that of Marc Antony by lions; that of Helioabalus by tygers; that of Aurelian by deer, &c. His children were at his feet, and sometimes on the chariot horses. At the victor's back walked a slave, who railed on him, and threw up to him all his crimes, and vices, with impunity. The procession was led up by the musicians, who played triumphal pieces in praise of the general; these were followed by young men, who led the victims to the sacrifice, with their horns gilded and their heads adorned with ribands and garlands; next came the carts and waggons, loaded with all the spoils taken from the enemy, with their horses, chariots, &c.; these were followed by the kings, princes, and generals, who had been taken captives, loaded with chains; after these appeared the triumphal chariot, before which, as it passed, they all along strewed flowers, and the people with loud acclamations called out *Io triumphe!* The chariot was followed by the senate, by such citizens as had been set at liberty or ransomed; and the procession was closed by the priests and their officers and utensils with a white ox led along for the chief victim. In this order they proceeded through the triumphal gate, along the via sacra, to the Capitol, where the victims were slain. In the mean time all the temples were open, and all the altars loaded with offerings and incense; games and combats were celebrated in the public places, and rejoicings appeared every where.

* **TO TRIUMPH.** *v. n.* [*triumpho*, Lat. *triumpher*, Fr.] This word is always accented in prose on the first syllable, but in poetry sometimes on the last. 1. To celebrate a victory with pomp; to rejoice for victory.—The *triumphing* of the wicked is short. *Job*, xx. 5.—Can you not then *triumph* without my tears? *Dryden*. 2. To obtain victory.—He had sufficiently *triumphed* over the Christians. *Knolles*.—*Triumphing* over death, and chance, and time. *Milton*.—There fix thy faith and *triumph* o'er the world. *Rouse*.—To *triumph* o'er this destin'd breast. *Prior*. 3. To insult upon an advantage gained.—To *triumph*, like an Amazonian trull! *Shak*.—That *triumph* thus upon my misery. *Shak*.—Who now *triumphs*, and in th' excess of joy. *Milton*.

(1.) * **TRIUMPHAL.** *adj.* [*triumphal*, Fr. *triumphalis*, Lat. from *triumph*.] Used in celebrating victory.—He left only *triumphal* garments to the general. *Bacon*.—

Ye to near heav'n's door,

Triumphal with *triumphal* act have met. *Milton*.—And hew *triumphal* arches to the ground. *Pope*.—Or on a proud *triumphal* car. *Swift*.

(2.) * **TRIUMPHAL.** *n. f.* [*triumphalia*, Lat. *triumphal* ornaments.] A token of victory. Not in use.—Joyless *triumphals* of his hop'd success. *Mils*.

* **TRIUMPHANT.** *adj.* [*triumphans*, Lat. *triumphant*, Fr.] 1. Celebrating a victory.—Captives bound to a *triumphant* car. *Shak*.—It was drawn as a *triumphant* chariot. *South*. 2. Rejoicing as for victory.—*Triumphant* as I am? *Shak*.—And now to London with *triumphant* march. *Shak*.—*Triumphant* out of this infernal pit. *Milton*. 3. Victorious; graced with conquest.—The church *triumphant*. *Perkins*.—To pass *triumphant*. *Milton*.—Athens war's *triumphant* maid. *Pope*.

* **TRIUMPHANTLY.** *adv.* [from *triumphant*.] 1. In a *triumphant* manner in token of victory; joyfully as for victory.—At hand *triumphantly* display'd. *Shak*.—From Salem unto Rome *triumphantly* he brought. *Dryden*.—Through armed ranks *triumphantly* the drives. *Glanville*. 2. Victoriously; with success.—*Triumphantly* tread on thy country's ruin. *Shak*. 3. With insolent exultation.—A mighty governing lye reigning *triumphantly*. *South*.

* **TRIUMPHER.** *n. f.* [from *triumph*.] One who triumphs.—And enter in our ears, like great *triumphers*. *Shak*.—In August, Augustus was the first time created consul, and thrice *triumpher* in Rome. *Peasham*.

TRIUMVIR, one of three persons who govern absolutely, and with equal authority in a state. It is chiefly applied to the Roman government: Cæsar, Pompey, and Crassus, were the first *triumvirs* who divided the government among them. There were also other officers so called; as the *triumviri* or *tresviri capitales*, who were the keepers of the public gaol; they punished malefactors; for which purpose they kept 8 lictors under them.

* **TRIUMVIRATE.** } *n. f.* [*triumviratus*, or

* **TRIUMVIRI.** } *triumviri*, Lat.] A coalition or concurrence of three men.—

Lepidus of the *triumvirate*

Should be depos'd.

Shak.

—The *triumviri*, the three corner cap of society.

Shak.—*Triumvirate* of kings. *Bacon*.—Instituting a *triumvirate*. *Daniel*.—An odd *triumvirate* of friends. *Swift*.

TRIUMVIRORUM INSULA, *The island of the Triumvirs*, an island in the Rhine at its junction with the Po; where the *triumvirs*, Antony, Octavius, and Lepidus, met to divide the Roman empire after the death of Cæsar. *Dion*, 46. c. 55.

(1.) * **TRIUNE.** *adj.* [*tres* and *unus*, Lat.] At once three and one.—We read in scripture of a *triune* Deity. *Burnet*.

(2.) **TRIUNE GOD.** See **THEOLOGY**, Part II. *Sci*. II.

TRIZZO. See **TREZZO**.

TROADES, the people of **TROAS**.

TROARN, or **TROUARD**, a town of France, in dep. of Calvados, and late prov. of Normandy, on the Dive; 6 miles E. of Caen, and 15 W. of Lisieux.

TROAS, a country of Phrygia in Asia Minor, of which Troy was the capital. When Troas is taken for the whole kingdom of Priam, it may be said to contain Mysia and Phrygia Minor; but if only applied to that part of the country where Troy was situated, its extent is confined within very narrow limits. Troas was anciently called **DARDANIA**. See **TROJA**.

* **TO TROAT.** *v. a.* [with hunters.] To cry as a buck does at rutting-time. *Di*. *Di*.

(1.) * **TROCAR.** *n. f.* [*trocar*, corrupted from *trois quart*, French.] A surgical instrument.—The handle of the *trocar* is of wood, the canula of silver, and the perforator of steel. *Sharp*.

(2.) **TROCAR.** See **SURGERY**, *Index*.

TROCHÆUS, in prosody, a foot consisting of a long and short syllable.

TROCHAIC VERSE, in Latin prosody, a species of verse, consisting of 8 feet, chiefly *trochæi*, alternating with *tribrachys*, *dactylus*, *spendæus*, *anapestus*, and *proceleusmaticus*.

* **TROCHAICAL.** *adj.* [*trochaïque*, Fr. *trochaicus*, Lat.] Consisting of *trochees*.

(1.) * **TROCHANTERS.** *n. f.* [*τροχαντες*, Gr.] Two processes of the thigh bone, called *rotator major* and *minor*, in which the tendons of many muscles terminate. *Di*. *Di*.

(2.) **TROCHANTERS.** See **ANATOMY**, § 155.

TROCHE, *n. f.* in pharmacy, a sort of medicine made of glutinous substances into little cakes, and afterwards excicated. See **PHARMACY**, *Ind*.

* **TROCHEE.** *n. f.* [*trocheus*, Lat. *trochée*, Fr. *τροχαιος*.] A foot used in Latin poetry, consisting of a long and short syllable.

TROCHI, in petrifications, small fossil stones. See **PLATE CLXVIII**.

(1.) * **TROCHILICKS.** *n. f.* [*τροχίλιον*, *τροχίλος*, a wheel.] The science of rotatory motion.—*Trochilicks*, or the artifice of wheels. *Brown*.—*Trochilicks* or the art of wheel instruments. *Wilkin's Dedalus*.

(2.) **TROCHILICS.** See **MECHANICS**, Part IV. *Sci*. III. and **ROTATION**, § 1, 2.

TROCHILUS, the **HUMMING BIRD**, a genus of birds belonging to the order of *picæ*. The rostrum is subulate, filiform, and longer than the head, the apex being tubular; the upper mandible sheaths the lower. The tongue is filiform and tubulous, the two threads coalescing; the feet are slender and fit for walking; the tail has ten feathers.

feathers. There are 65 species, none of which are natives of Britain. They are all remarkable for the beauty of their colours, and most of them for the smallness of their size, though some are 8 or 9 inches long. They are divided into two families, viz. those with crooked bills, and those with straight bills. The following are the most remarkable.

1. *TROCHILUS COLIBRI*, or *MINIMUS*, the *least humming bird*, is exceeded, both in weight and dimensions, by several species of bees. The total length is one inch one-fourth, and its weight is only 20 grains. The bill is straight and black, three lines and a half in length; the upper parts of the head and body are of a greenish gilded brown, in some lights appearing reddish; the under parts are greyish white; the wings are violet-brown; the tail of a bluish black, with a gloss of polished metal; but the outer feather, except one on each side, is grey from the middle to the tip, and the outer one wholly grey; legs and claws brown. The female is less than the male; the whole upper side of a dirty brown, with a slight gloss of green; the under parts of a dirty white. These birds are found in various parts of South America and the adjacent islands.

2. *TROCHILUS EXILIS*, the *little humming bird*, has a crooked bill, is an inch and half in length; frequently weighing less than 50 grains. The bill is black, and half an inch in length; the body greenish brown, with a red, shining, inimitable gloss; the head is crested with a small tuft, green at bottom, but of a sparkling gold colour at top; quills and tail fine black. It is a native of Guiana; and the velocity of it in flying is so great, that the eye can scarce keep pace with its motion.

3. *TROCHILUS MOSCHITUS*, the *ruby-necked humming bird*, according to Marcgrave is the most beautiful of the whole genus. Its length is three inches 4 lines; the bill straight, 8 lines long, and blackish; the top of the head and hind part of the neck are as bright as a ruby, and of the same colour; the upper parts of the body are brown, with a faint mixture of green and gold; the throat and fore part of the neck are the colour of the most brilliant topaz; the belly, sides, and thighs, are brown; but on the lower part of the belly, on each side, is a spot of white; the tail is rufous purple, inclining to violet at the ends; the two middle feathers are shortest; the legs and claws blackish. The female has only a dash of golden or topaz on the breast and fore part of the neck; the rest of the under parts are greyish white. This species is found in Brazil, Curassoa, Guiana, and Surinam.

4. *TROCHILUS SUPERCILIOSUS*, the *white shaft*, or *supercilious humming bird*, has a bill 20 lines long; the feathers of the tail next the two long shafts are also the longest, and the lateral ones continually decrease to the two outermost, which are the shortest, and this gives the tail a pyramidal shape; its quills have a gold gloss on a grey and blackish ground, with a whitish edge at the point, and the two shafts are white through the whole projecting portions; all the upper side of the back and head gold colour, the wing violet-brown, and the under side of the body white grey. These birds subsist on the nectar or sweet

juice of flowers. They never settle on the flower, but flutter continually, moving their wings very quick, and making a humming noise; whence their name. They most frequently build in trees, and the nest is of course very small, and quite round. They lay two eggs of the size of a pea, which are white, and not bigger at one end than the other.

* *TROCHINGS*. *n.f.* The branches on a deer's head. *Ainsw.*

* *TROCHISCH*. *n.f.* [*τροχίσκος*; *trochisque*, Fr. *trochiscus*, Latin.] A kind of tablet or lozenge.—The *trochisks* of vipers, so much magnified, and the flesh of snakes some ways conditioned and corrected. *Bacon.*

TROCHOIS, a lake of Delos.

TROCHTELLINGEN, an imperial town of Suabia, 16 miles NW. of Bohemia, and 21 S. of Stuttgart.

TROCHYTÆ, in petrification, fossil stones. See *PLATE CLXVIII.*

TROCKENBURG, a town of Germany, in Stiria, 4 miles NNW. of Rezin.

TROCMI, an ancient nation of Galatia. *Liv.* 38. 16.

TROCZENIECZ, a town of the dismembered kingdom of Poland, in the palatinate of Bracław, 20 miles S. of Bracław.

* *TROD*. } participle passive of *tread*.—

* *TRODDEN*. } Jerusalem shall be trodden down of the Gentiles. *Luke xxi.*—Thou shalt fall from heav'n trod down. *Milt.*—And trodden weeds send out a rich perfume. *Addison.*

(1.) * *TRODE*, the preterite of *tread*.—They trode the grapes and made merry. *Judges ix.* 27.

(2.) * *TRODS*. *n.s.* [from *trode*, pret. of *tread*.] Footing.—The *trode* is not so tickle. *Spenser.*—They never set foot on that same *trode*. *Spentey.*

TRODENA, a town of Germany, in the Tirol, 16 miles SSE. of Bolzano.

TROEZEN, a son of Pelops, who built and reigned in

TROEZENE, a town of Peloponnesus, in Argolis, near the Sinus Saronicus.

TROGEN, a town of Switzerland, in the canton of Appenzell, 7 miles SE. of St Gall.

TROGILÆ, three islands near Samos.

TROGILIUM, a cape of mount Mycale, projecting into the sea.

TROGILUS, a sea-port of Sicily.

TROGLODYTÆ. See *TROGLODYTES*.

(1.) * *TROGLODYTE*. *n.s.* [*τρογλοδυτης*.] One who inhabits caves of the earth.—Procure me a troglodyte footman. *Arbutnot and Pope.*

(2.) *TROGLODYTE MYRRH*. See *MYRRH*, N° 4.

(3.) *The TROGLODYTES*, or *TROGLODYTÆ*, were an ancient people of Ethiopia, said to have lived in caves under ground.

(4.) *TROGLODYTES*, in zoology. See *SIMIA*.

TROGLODYTRIA, the country of the *TROGLODYTÆ*, a country of Abyssinia, which produces the best myrrh. See *OPOCALPASM*.

TROGUS POMPEIUS, a Latin universal historian to the time of Augustus Cæsar, of whom we have an abridgement by Justin, flourished about 41 B.C.

(1.) *TROJA*, the capital city of Troas, but some would have it to be a country of which Ilium was the

the capital. It was built on a small eminence near mount Ida. Dardanus the first king of the country built it, and called it *DARDANIA*, and from *Tros*, his grandson, it was called *Troja*, and from *Ilium*. It is supposed to have stood on the site of the modern village *Bounarbacli*, about 12 miles from the sea, on an eminence, at the termination of a spacious plain.

(2.) *TROJA*, or } in modern geography, a town
TROIA, } of Naples, and bishop's see in
Capitanata, on the Chilare, at the foot of the Apennines, 60 miles NW. of Naples. Lon. 15. 15. E. Lat. 51. 21. N.

TROJANI LUDI, games instituted by *Aeneas* in honour of *ANCHISES*, celebrated at Rome.

TROJANS, the people of *TROY*.

TROILINSKAIA, a town of Russia, in the country of the *Cossacs*, on the *Don*, 80 miles E. of *Azoph*.

TROILUS, a son of *Priam* and *Hecuba*, killed by *Achilles* during the *Trojan war*.

TROIS, [Fr. *three*.] Part of several names; as,

(1.) *TROIS MARIES*, a town of France, in the dep. of the Mouths of the *Rhone*, held sacred in the days of credulity, as having been the residence of the *three Marias*, (whence the name), and of *Lazarus* after our Saviour's crucifixion. It is 15 miles S. of *Aries*.

(2.) *TROIS RIVIERES*, a town of *Martinique*.

(3.) *TROIS RIVIERES*, a town of Upper Canada, so called from its situation at the junction of *three rivers*, which there fall into the *St Lawrence*. It was the French capital of Canada. It is the mart of the Indian trade for furs, &c. It is 35 miles SW. of *Quebec*. Lon. 71. 20. W. Lat. 46. 35. N.

(4.) *TROIS RIVIERES*, a bay on the coast of *Nova Scotia*, at the E. end of the island of *St John*.

TROISSEREUX, a town of France, in the department of the *Oise*, $\frac{1}{2}$ miles NW. of *Beauvais*.

TROITZ, or *TROITSKOE MONASTK*, [i.e. the monastery of the *Trinity*], a convent of Russia, as large as a town, and strongly fortified. It withstood a long siege, by *Uladislaus*, king of *Poland*. It had formerly 300 monks, but now has not above 100, and upon its territory were at least 100,000 peasants. It is 40 miles from *Moscow*.

(1.) *TROKI*, a ci-devant palatinate of *Lithuania*, now annexed to *Prussia*.

(2.) *TROKI*, the capital of the above palatinate. It was built in 1523. In 1635, it was demolished by the *Russians*. It is 160 miles E. of *Konigsberg*, and 75 NE. of *Grodno*. Lon. 54. 40. N.

TROLHOETTA, a town of Sweden, in W. Gothland, 15 miles ESE. of *Uddevalla*.

(1.) * *To TROLL*. v. a. [*trollen*, to roll, Dutch; perhaps from *treckles*. Lat. a thing to turn round.] To move circularly; to drive about.—

Troll about the bridal bowl. Ben Jonson.

(2.) * *To TROLL*. v. n. 1. To roll; to run round.—To troll it in a coach and fix. Swift. 2. To fish for a pike with a rod which has a pulley towards the bottom, which I suppose gives occasion to the term.—Nor *trawle* for pikes, dispeopled of the lake. Gay.

TROLLIUS, *GLOBE RANUNCULUS*, or *Lucken Goswan*, in botany, a genus of plants belonging to the class of *polyandria*, and order of *polygania*; and in the natural system ranging under the 26th

order, *Multiflora*. The calyx is wanting; there are about 14 petals; the capsules are very numerous, ovate, and monospermous. There are two species; viz.

1. *TROLLIUS ASIATICUS*.

2. *TROLLIUS EUROPAEUS*, or *European globe Ranunculus*, is a British plant, has its corollae connivent, and from 9 to 16 nectaria, of the length of the stamina, linear, plane, incurved, and perforated at the inflex of the base. The leaves are divided first into five segments down to the base; the segments are again divided, each about half way, into two or three lobes, which are sharply indented on the edges. The stalk is a foot high, and scarcely branched; the flower is yellow, globose, and spacious. It grows at the foot of mountains, and by the sides of rivulets.

* *TROLLOP*. n. s. [A low word, I know not whence derived.] A flatteringly, loose woman.

* *TROLMYDAMES*. n. s. [Of this word I know not the meaning.]—A fellow I have known to go about with *trolmydames*; I knew him once a servant of the prince. Shaks.

TROMMIUS, Abraham, a protestant divine, born at Groningen, in 1633. He published a *Greek Concordance* of the Old Testament, in 2 vols. fol. 1718. He died in 1719.

TROMP, Martin Hapertz VAN, a celebrated Dutch admiral, born at the Beill, in Holland. He raised himself by his merit, after having distinguished himself on many occasions, especially at the famous engagement near Gibraltar in 1607. He was declared admiral of Holland, and defeated a large Spanish fleet in 1630, and gained 32 other victories at sea; but was killed when under deck, in an engagement with the English in 1653.

TRONA. See *Sopa*, § 7.

(1.) * *TRONAGE*. n. s. Money paid for weighing.

(2.) *TRONAGE*, an ancient customary duty or toll, for weighing of wool. According to *Fleta*, *trona* is a beam to weigh with, mentioned in the stat. Westm. 2. cap. 25. And *tronage* was used for the weighing wool in a staple or public mart, by a common *trona* or beam; which, for the *tronage* of wool in London, was fixed at *Leaden-Hall*. The mayor and commonalty of London are ordained keepers of the beams and weights for weighing merchants commodities, with power to assign clerks and porters, &c. of the great beam and balance; which weighing of goods and wares is called *tronage*; and no stranger shall buy any goods in London before they are weighed at the king's beam, on pain of forfeiture.

TRONCHIN, Theodore, M. D. born at Geneva, in 1709; and educated at Cambridge and Leyden, under *BOERHAVE*. He settled at Amsterdam, next at Geneva, finally at Paris, where he died in 1781. He wrote in the *Encyclopedie*, and a treatise de *Nympha*, and *De colica Pilonum*.

TRONDA, or } an island of Scotland, opposite
TRONDRAY, } to *Scalloway*, about $3\frac{1}{2}$ miles long, and a broad. It is in the parish of *TINGWALL*.

TRONECKEN, a town of Germany, in the late county of the Rhingrave; now annexed to the French empire, and in the dep. of the Rhine and Moselle, 16 miles E. of *TREVES*.

TRONE,

TRONE WEIGHT, the most ancient of the different weights used in Scotland; and, though now forbidden by several statutes, is still used by many for home commodities, and that in a very irregular manner; for the pound varies in different places, and for different purposes, from 20 to 24 Dutch ounces. The common allowance is 21½ oz. for wool, 20½ for butter and cheese, 20 for tallow, lint, hemp, and hay. It is divided into 16 of its own ounces, and 16 lb. make a stone.

TRONINGE, a town of Sweden, in the prov. of Halland; 8 miles E. of Halmstadt.

TRONQUIERE, a town of France, in the dep. of Lot; 12 miles N. of Eigeac, and 9 SE. of St Cere.

TRON, St, or **ST TRAUEN**, a town of the French empire, in the dep. of the Ourte, and ci-devant bishopric of Liege; 13 miles from Maestricht, and 20 SE. of Louvain. Before the revolution, it had a famous Benedictine abbey. Lon. 5. 22. E. Lat. 50. 48. N.

TRONTHEIM, or **DRONTHEIM**. See **DRONTHEIM**, N° 1 and 2.

TRONTO, a river of Italy, in the marquise of Ancona, which runs past Ascoli, and falls into the Atlantic; 9 miles ESE. of Monte Brandone.

TRONZAN, a town of the French empire, in the dep. of the Po, and ci-devant Piedmontese; 3 miles S. of St Ja, and 7 NW. of Turin.

(1.) **TROON**, a promontory of Argyllshire, projecting about a mile into the Frith of Clyde. Lon. 1. 42. W. of Edin. Lat. 55. 26. N.

(2.) **TROON BAY**, a bay of the Frith of Clyde, between Cape Troon and Lady Ille, 2 miles broad; which affords safe anchorage at all tides.

(3.) * **TROOP**. *n. f.* [*troupe*, Fr. *troppa*, Italian; *troope*, Dutch; *troop*, Swedish; *troppa*, low Lat.] 1. A company; a number of people collected together.—*Troops* of friends. *Shak*.—Saw you not a blessed troop. *Shak*.—A troop, or an army. *Locke*. 2. A body of soldiers.—And sends his slaughter'd troops to shades below. *Dryden*. 3. A small body of cavalry.

(4.) A **TROOP** is a small body of horse or dragons, commanded by a captain.

* **To TROOP**. *v. n.* [from the noun.] 1. To march in a body.—*Troop* in the throngs of military men. *Shak*.—With hundreds, and with thousands, *trooping* came. *Milton*.—*Troop* to their standard. *Milt*. 2. To march in haste.—*Troop* home to churchyards. *Shak*.—They *troop'd* up to the king's capacious court. *Chap*. 3. To march in company.—That *troop* with majesty. *Shak*.

* **TROOPER**. *n. f.* [from *troop*.] A horse soldier. A trooper fights only on horseback; a dragon marches on horseback, but fights either as a horseman or footman.—*Troopers* and travellers. *Grezo*.

TROPÆA, an ancient town of the Brutii, in Italy.

TROPÆOLUM, in botany, **INDIAN CRESS**, a genus of plants, in the class of *Odandria*, and order of *Monogynia*; ranking, according to the natural method, in the 23d order, *Trihilate*.

(1.) * **TROPE**. *n. f.* [*τροπή*; *trope*, Fr. *tropeus*, Lat.] A change of a word from its original signification; as, the clouds *foretel* rain, for *forebode*.

—Out there flew a *trope*. *Hudibras*.—It admits of *trope*s. *Dryden*.

(2.) **TROPE**. See **FIGURE**, **LANGUAGE**, **METAPHOR**, and **ORATORY**, Part III. &c. III.

TROPEA, a town and bishop's see of Naples, in Calabria Ultra, built on a high rock, near the coast, which affords a fine prospect. It contains 5 churches, and 11 convents, and is 37 or 45 miles NNE. of Reggio, and 10 NW. of Nicotera. It was almost destroyed by an earthquake in 1638. Lon. 16. 24. E. Lat. 38. 42. N.

TROPESES, St, a sea-port town of France, in the dep. of the Var, and ci-devant prov. of Provence, with a castle, seated on the bay of Crimauld, on the Mediterranean; 12 miles SW. of Frejus, and 58 E. of Marseilles. Lon. 6. 44. E. Lat. 43. 16. N.

TROPHEA AUGUSTI. See **TORRIA**.

* **TROPHIED**. *adj.* [from *trophy*.] Adorned with trophies.—The *trophy'd* arches, story'd halls invade. *Pope*.

TROPHIS, in botany, a genus of plants, in the class *dioecia*, and order of *tetrandria*; and in the natural method ranking in the 16th order, *calcifloræ*. This genus, as well as the other genera of the class *dioecia*, afford the most decisive evidences of the truth of the sexual system, by bearing their male and female flowers on distinct plants.

(1.) **TROPHONIUS**, in fabulous history, a celebrated architect, the son of Erginus, king of Orchomenos, in Boeotia. He built the temple of Apollo at DELPHI, with the assistance of his brother *Agamedes*; and when he demanded a reward for his labour from the god, he was told by the priests to wait 8 days, and to spend that interval in cheerfulness and pleasure. But at the end of this period, Trophonius and his brother were found dead in bed. *Lempr*.

(2.) **TROPHONIUS'S CAVE**, or **ORACLE**, a cave near Libadia, in Boeotia, between Helicau and Chæroneia, (*Strabo*): so called from Trophonius, an enthusiastic diviner; who, descending into this cave, pretended to give answers and pronounce oracles; and was hence called *Jupiter Trophonius*. This cave was seated on a mountain above a grove, was formed by art, and surrounded with a wall. The descent was by a moveable ladder. A swarm of bees are said to have first led to it. Such as went down to this cave, were said never after to smile. See **ORACLE**, § 4; and **MYSTERIES**, § 11.

* **TROPHY**. *n. f.* [*tropeum*, *trophaeum*, Latin.] Something shewn or treasured up in proof of victory.—What *trophy* then shall I most fit devise. *Spenser*.—Giving all trophy, signal, and ostent. *Shak*.—Till we with trophies do adorn thy tomb. *Shak*.—Till I have torn that trophy from thy back. *Shak*.—Trophies erected upon the place of victory. *Baron*.—Trophies of their wars. *Dryden*.—The tomb with many arms and trophies grace. *Pope*.—Trophies on a post. *Taung*.

* **TROPICAL**. *adj.* [from *trope*.] 1. Rhetorically changed from the original meaning.—A look and tropical expression. *Brown*.—Tropical or figurative. *South*.—The tropical or allusive part of the parable. *South*. 2. [From *tropic*.] Placed near the tropick; belonging to the tropick.—The pine apple is one of the tropical fruits. *Salmon*.

R I T (1.) **TROPIC**

(1.) TROPIC BIRD. See PHAETON, § III. N^o 1.

(2.) * TROPICK. *n. f.* [*tropique*, Fr. *tropicus*, Lat.] The line at which the sun turns back, of which the North has the tropick of Cancer, and the South the tropick of Capricorn. Under the *tropick* is our language spoke. *Waller*.—Seven times the sun has either *tropick* view'd. *Dryden*.

(3.) TROPICS. See CANCER, § II. 2; CAPRICORN, § 3; and GEOGRAPHY, *Sett.* VI.

TROPINO, a town of Russia, in Tobolskoi on the Piazzida. Lon. 108. 0. E. Fer. Lat. 71. 36. N.

* TROPOLOGICAL. *adj.* [*tropologique*, Fr. *τροπος* and *λογος*.] Varied by tropes; changed from the original import of the words.

(1.) * TROPOLOGY. *n. f.* [*τροπος* and *λογος*.] A rhetorical mode of speech including tropes, or a change of some word from the original meaning.—Superconsequences, coherences, figures, or *tropologies*. *Brown*.

(2.) TROPOLOGY. See COMPARISON, FIGURE, METAPHOR, and ORATORY, *Part* III. *Sett.* III.

(1.) TROPFAU, or TROPFAW, a principality of Upper Silesia, bounded on the N. by that of Oppelin, on the E. by Ratibor and Teschen; on the S. and W. by Moravia. The soil is fertile in corn, fruits, and pasture. It contains 11 towns; and is divided between the king of Prussia and the house of Austria.

(2.) TROPFAU, or } a city of Upper Silesia, be-
(2.) TROPFAW, } longing to the emperor, the capital of the above duchy. It is large, handsome, and strong, and has an ancient castle. It was taken by the Prussians in 1741, and 1756; but restored by subsequent treaties. It is seated in a pleasant plain, on the banks of the Oppa and Mohra, 40 miles N. by E. of Olmutz, and 72 S. by E. of Breslaw. Lon. 17. 40. E. Lat. 51. 19. N.

TROPLOWITZ, a town of Silesia, in Troppau, 17 miles NNW. of Troppau, and 5 NNW. of Ingerndorf.

TROQUEER, or } a parish of Scotland, in
TROQUIRE, } Kirkcudbrightshire, on the banks of the Nith, opposite to Dumfries, to which it is joined by 2 bridges, at the end of which is a considerable village called Bridgend. (See BRIDGEND, N^o 2.) It is 7½ miles long, and 4½ broad, partly hilly, partly flat. It contains 3625 acres, of which 1450 are cultivated, 3625 arable, but laid out in pasture, and 350 under wood. The population, in 1790, was 2600; the increase 1209, since 1755.

TROS, in fabulous history, the 5th king of Troy, the son of Erichthonius, and grandson of Dardanus, and from whom it was named TROYA. He married Callirhoe, the daughter of SCAMANDER, by whom he had Ilus, Affracus, and Ganymedes. See GANYMEDES.

TROSA, a sea-port of Sweden, in Sudermania, on the Baltic, 18 miles SW. of Stockholm.

TROSACHS, a mountainous district of Perthshire, 10 miles W. of Callander, remarkable for its romantic scenery, which is elegantly described by the rev. Dr James Robertson, in his *Stat. Account of Callendar*. The Trosachs and Loch Catherine, have of late been rendered particularly famous, and a great resort of travellers, by Walter

Scott's celebrated poem of the Lady of the Lake; of which the scene is there laid and embellished with all the graces of that fertile muse.

TROSBURG, a town of Upper Bavaria, 13 miles E. of Wafferburg, and 12 SW. of Burkhaußen.

* TROSSERS. *n. f.* [*trousses*, Fr.] Breeches; hose. See TROUSE.—You rode like a kern of Ireland; your French hose off, and in your strait *troussers*. *Shak*.

TROSSULI. See next article.

TROSSULUM, an ancient town of Etruria, which was taken by a body of Roman knights, without the assistance of the soldiers, and who were hence called TROSSULI. *Plin.* 32. 2. *Sen. ep.* 86. 87.

TROSTRIE, a beautiful lake of Kirkcudbrightshire, in Twyneholm parish, abounding with pikes.

* TROT. *n. f.* [*trót*, Fr. from the verb.] 1. The jolting high pace of a horse.—Who rides his sure and even *trot*. *Herbert*.—While he might still jog on and keep his *trot*. *Milton*.—The virtuoso's saddle will amble when the world is upon the hardest *trot*. *Dryden*. 2. An old woman, in contempt. I know not whence derived.—Marry him to an old trot with ne'er a tooth in her head. *Shak*.—How now bold-face, cries an old *trot*. *L'Est*.

* To TROT. *v. n.* [*troter*, Fr. *tróttien*, Dutch.] 1. To move with a high jolting pace.—To ride on a bay trotting horse. *Shak*.—Time *trots* hard with a young maid, between the contract of her marriage and the day it is solemniz'd. *Shak*.—A gentle trotting horse. *Dennis*. 2. To walk fast; or to travel on foot; in a ludicrous or contemptuous sense.

* TROTTH. *n. f.* [*trouth*, old English; *treoth*, Saxon.] 1. Belief; faith; fidelity.—Bid her light and her *trotth* plight. *Shak*.—Th' afflicted state, divided in their *trotth*. *Daniel*. 2. Truth; verity.—In *trotth*, thou'rt able to instruct grey hairs. *Addis*.

* TROTTHLESS. *adj.* [from *trotth*.] Faithless; treacherous.—Thrall to the faithless waves and *trotthless* sky. *Fairfax*.

* TROTTHPLIGHT. *adj.* [*trotth* and *plight*.] Betrothed; affianced.—He's *trotthplight* to your daughter. *Shak*.

TROTTHY, a river of England, in Monmouthshire, which runs into the Wye near Monmouth.

TROTILUM, an ancient town of Sicily. *Thuc.* 6.

(1.) TROTTER, Mrs Catharine, a most accomplished lady and celebrated writer, was the daughter of Captain Trotter, a native of Scotland, and an officer in the navy of Charles II. She was born in London, 1679. In her 17th year she produced a tragedy called *Agnes du Castra*, which was acted in 1695. This was followed by *Fatal Friendship*, a tragedy, 1698; *Love at a Loss*, a comedy, 1701; *The Unhappy Penitent*, a tragedy, *Gustavus Vasa*, a tragedy, 1703; acted at the Hay-market in 1706. She published also a defence of her conversion from popery, and different treatises on moral and metaphysical subjects. She married Mr Cockburne, a clergyman of the church of Scotland, 1708, and died in 1749. Her works were published in 1751, in two vols 8vo.

(2.) * TROTTER.

(2.) * **TROTTER**. *n. f.* [from *trot*.] 1. One that walks a jolting pace. 2. A sheep's foot.

TROTZA, a river of Russia, in Viatka, which runs into the Kama; 16 miles N. of Kofa.

TROUARD. See **TROARN**.

TROUBADOURS. *n. f.* poets who flourished in Provence during the 12th century. They wrote poems on love and gallantry; on the illustrious characters and remarkable events of the times; satires which were chiefly directed against the clergy and monks; and a few didactic pieces. The troubadours were great favourites in different courts, diffused a taste for their language and for poetry over Europe, which was about that time sunk in ignorance and rudeness; they disappeared in the 14th century. A history of the troubadours in 3 volumes 16mo; was begun by M. de Sainte Palaise, and finished by the Abbé Millot. See **MUSIC**, *Hist.* § 46.

* **TROUBLE**. *n. s.* [*trouble*, Fr.] 1. Disturbance; perplexity.—They stood a while in *trouble*. *Milton*. 2. Affliction; calamity.—Double, double, toil and *trouble*. *Shak*. 3. Molestation; obstruction; inconvenience.—Some new *trouble* raise. *Milton*. 4. Uneasiness; vexation.—Much offence and *trouble*. *Milton*.

* **To TROUBLE**. *v. a.* [*troubler*, Fr.] 1. To disturb; to perplex.—A *troubled* mind drew me to walk abroad. *Shak*.—But think not here to *trouble* holy rest. *Milton*.—Never *trouble* yourself about those faults. *Locke*. 2. To afflict; to grieve.—It would not *trouble* me to be slain for thee. *Sidney*.—A wife man ought not to be *troubled* at afflictions. *Tillotson*.—It is vain to be *troubled* for that which I cannot chuse. *Tillotson*. 3. To distress; to make uneasy.—*Troubled* not himself for others. *Clar*.—Be not dismay'd nor *troubled* at these tidings. *Milt*.—He was sore *troubled* in mind. 1 *Mac*. 4. To busy; to engage overmuch.—Martha, thou art *troubled* about many things. *Luke* x. 41. 5. To give occasion of labour to. A word of civility or slight regard.—I will not *trouble* myself to prove. *Locke*. 6. To teize; to vex.—The boy *troubles* me. *Shak*. 7. To disorder; to put into agitation or commotion.—A woman mov'd is like a foundation *troubled*. *Shak*.—An angel *troubled* the water. *John* v. 4.—God looking forth with *trouble* all his host. *Milton*.—Their office is the *troubled* air to take. *Davies*.—The seas are *troubled*. *Davies*.—It *troubles* and defiles the water. *South*.—*Trouble* and pervert the course of justice. *Addison*.—Swell the *troubled* main. *Dryden*. 8. [In low language.] To sue for a debt.

* **TROUBLER**. *n. f.* [from *trouble*.] Disturber; confounder.—The *troubler* of my happy peace. *Spenser*.—Thou *troubler* of the poor world's peace! *Shak*.—Great conquerors and *troublers* of the world. *Bacon*.—The rich *troublers* of the world's repose. *Waller*.—Great *troubler* of our peace. *Atterbury*.

* **TROUBLESOME**. *adj.* [from *trouble*.] 1. Vexatious; uneasy; afflictive.—How *troublesome* 'tis upon my head. *Shak*.—Things very *troublesome*. *Tillotson*. 2. Full of molestation.—Our passage through this world is rough and *troublesome*. *Atterb*. 3. Burdensome; tiresome; wearisome.—My mother will never be *troublesome* to me. *Pope*.

4. Full of teasing business.—So *troublesome* an idleness. *Sidney*. 5. Slightly harassing.—These *troublesome* disguises. *Milton*.—So *troublesome* a bedfellow. *Shak*. 6. Unreasonably engaging; improperly importuning.—

She of late is lightened of her womb,

That her to see should be but *troublesome*. *Spenser*.

7. Importunate; teasing.—*Troublesome* old nurses. *Arbutnot*.

* **TROUBLESOMELY**. *adv.* [from *troublesome*.] Vexatiously; wearisomely; unreasonably; importunately.—*Troublesomely* critical. *Locke*.

* **TROUBLESOMENESS**. *n. f.* [from *troublesome*.] 1. Vexatiousness; uneasiness.—The treasurer complained of the *troublesomeness* of the place. *Bacon*. 2. Importunity; unreasonableness.

* **TROUBLE-STATE**. *n. f.* [*trouble* and *state*.] Disturber of a community; public makebate.—Those fair baits these *trouble-states* still use. *Dan*.

* **TROUBLOUS**. *adj.* [from *trouble*.] Tumultuous; confused; disordered; put into commotion. An elegant word, but disused.—And oft would dare tempt the *troubulous* wind. *Spenser*.—Their *troubulous* strife they stinted by and by. *Spenser*.—People's *troubulous* cries. *Spenser*.—As a tall ship tossed in *troubulous* seas. *Spenser*.—Then, masters, look to see a *troubulous* world. *Shak*.—In four years *troubulous* and expensive reign. *Daniel*.

* **TROVER**. *n. s.* [*trouver*, Fr.] In the common law, is an action which a man hath against one that having found any of his goods refuseth to deliver them upon demand. *Cowell*.

* **TROUGH**. *n. f.* [*trog*, *troh*, Saxon; *troch*, Dutch; *trou*, Danish; *traug*, Icelandic; *truogo*, Ital.] Any thing hollowed and open longitudinally on the upper side.—

The bloody boar

Swills your warm blood like wash, and makes his *trough*

In your embowel'd bosoms. *Shak*.

—They had no ships but big *troughs*, which they call canoes. *Abbot*.—A half *trough* of stone. *Bac*.—And hollow'd, first a floating *trough* became. *Dryd*.—Separated by water, afterwards in a long *trough*. *Brown*.—The water is conveyed by long *troughs* and canals. *Addis*.

* **To TROUL**. *v. n.* [*trollen*, to roll, Dutch.] See **TROLL**. 1. To move volubly.—To drefs, and *troul* the tongue, and roll the eye. *Milt*. 2. To utter volubly.—Will you *troul* the catch. *Shak*.

* **To TROUNCE**. *v. a.* [derived by *Skinner* from *trunc* or *tronfon*, French, a club.] To punish by an indictment or information.—Their plighted contracts have been *troun'd*. *Hudibras*.—I'll *trounce* you for offering to corrupt my honesty. *Dryden*.

TROUP-HEAD, a cape of Scotland, on the N. coast of Banff-shire, 10 m. W. of Kinnaird Point.

* **TROUSE**. *n. f.* [*trouffe*, Fr. *truis*, Erse.]

* **TROUSERS**. Breeches; hose. See **TROUSERS**.—The leather jockey jack cover his *trouse* on horseback. *Spenser*.—Laced *trouse*. *Wifeman*.

(1.) * **TROUT**. *n. f.* [*trub*, Saxon; *trosta*, *truta*, *trutta*, Lat.] 1. A delicate spotted fish inhabiting brooks and quick streams.—The pond will keep *trout*. *Carew*.—

Where ev'ry *trout* can make as high rants

O'er his inferiours as our tyrants.

Swift.

2. A familiar phrase for an honest, or perhaps for a silly fellow.—Here comes the *trout* that must be caught with tickling. *Shak.*

(3—4.) TROUT. See SALMO. N° 4. 7, and 9.

TROUTBECK, a river of England, in Westmoreland, which runs into the Eden, 3 miles below Appleby.

* TROW. *interj.* [for *I trow*, or *trow you*.] An exclamation of inquiry.—What means the fool, *trow*? *Shak.*

* To TROW. *v. n.* [*treotbian*, Saxon; *troe*, Danish.] 1. To think; to imagine; to conceive. A word now disused, and rarely used even in ancient writers but in familiar language.—What hand-someness, *trow* you, can be observed in speech? *Sidney*.—Is there any reasonable man, *trow* you? *Hosker*.—"Tis time, I *trow*. *Shak.*—O rueful day! rueful indeed, I *trow*. *Gay*. 2. To believe.—Learn more than thou *trowest*. *Shak.*

TROWBRIDGE, a town of England, in Wiltshire, on a hill, on the banks of the Were, famous for its manufacture of broad cloth. It had a castle, and has a market on Saturday, 10 miles S.E. of Bath, 98 W. of London. Lon. 2. 6. W. Lat. 51. 19. N.

* TROWEL. *n. f.* [*truella*, Fr. *trulla*, Latin.] 1. A *trowel* is a tool to take up the mortar with. *Maxon*.—This was dextrous at his *trowel*. *Swift*. 2. It is used for any coarse instrument.—Well said, that was laid on with a *trowel*. *Shak.*—They seem done with a mattock, or a *trowel*. *Wilkins*.

TROWERYN, a river of N. Wales, which rises from a lake in Merionethshire, and runs into the Dee.

(1.) TROY, an ancient city of Phrygia, the destruction of which affords the subject of Homer's *Iliad*. (See TROJA, N° 1.) It had 8 kings; though some enumerate only 6: viz. 1. SCAMANDER, the founder; TEUCER, his son; 3. DARDANUS, his son-in-law; 4. ERICHTHONIUS, his son; 5. TROS, 6. ILUS, his son; 7. LAOMEDON, in whose reign, Troy was taken and sacked by Hercules; and 8. PRIAM, under whom it was destroyed. Of all the wars of antiquity that of Troy is the most famous, particularly immortalized in the *Iliad* and the *Æneid*. Much discussion has taken place among the learned as to the reality of the events and the seat of the place. We may refer particularly to Bryant and Chevalier. The latter published a description of the plain of Troy in the 2d volume of the transactions of the Royal Society of Edinburgh. He fixes the site of the place, and the various scenes described by Homer. He describes particularly the tombs of Elyetes, Ilus, Ajax, Hector, Achilles, Patroclus, and Antilochus. The dissertation was translated and enriched with large notes and illustrations by Mr Dalzel, Greek professor in the University of Edinburgh. Various English travellers have more recently visited those interesting scenes of classic times, and several publications of note have appeared, particularly by Mr Gell, occasioning much diversity of opinion, and much learned discussion on questions now only interesting from their classical celebrity. Lon. 26. 30. E. Lat. 39. 40. N.

(2.) TROY, a post town of New York, in Rensselaer county, seated on the E. bank of the Hudson, 6 miles above Albany, W. of Petersburg.

(3.) * TROY.

} *n. f.* [from *Trois*, Fr.] (3.) * TROY-WEIGHT. } A kind of weight by which gold and bread are weighed, consisting of these denominations: a pound = 12 ounces; ounce = 20 pennyweights; pennyweight = 24 grains.—The English physicians make use of *troyweight*, after the following manner: 20 grains = 1 scruple, 3 scruples = 1 drachm, 8 drachms = 1 oz. 12 oz. = 1 lb.—The Romans left their *avordupois* ounce, for our *troy* ounce, we had elsewhere. *Arbutnot*.

(4.) TROY-WEIGHT, one of the most ancient of the different kinds used in Britain. The ounce of this weight was brought from Grand Cairo in Egypt, about the time of the crusades, into Europe, and first adopted in TROYES, a city of France whence the name.

(5.) TROY-WEIGHT, SCOTS, was established pound. The pound contains 7600 grains, and is equal to 17 oz. 6 dr. *avordupois*. The *cwt.* or only one weight should be used in Scotland, viz. the French *Troy* stone of 16 lb. and 16 oz. in the lb. by James VI. in the year 1618, who enacted, that 112 lb. *avordupois*, contains only 103 lb. 2½ oz. of this weight, though generally reckoned equal to 104 lb. This weight is nearly, if not exactly, the same as that of Paris and Amsterdam; and is generally known by the name of *Dutch weight*. Though prohibited by the articles of union, it is still used in weighing iron, hemp, flax, most Dutch and Baltic goods, meal, butcher-meat, unwrought pewter and lead, and some other articles.

TROYES, an ancient, large, and rich city of France, in the dep. of the Aube, and ci-devant capital of the prov. of Champagne. Before the revolution it was a bishop's see, had 14 churches, 4 abbeys, a castle the residence of the ancient Counts, 10 convents, a college, a public library, and an hospital. All the houses are built of wood, though very elegant. It is surrounded with walls and fine meadows. The citizens carry on a great trade in linen, flax, hemp, cottons, fustians; dimities, wax candles, chandlery, and wine. It is seated on the Seine, 30 miles ENE. of Sens, and 90 ESE. of Paris. Lon. 4. 10. E. Lat. 48. 13. N.

(1.) * TRUANT. *adj.* Idle; wandering from business; lazy; loitering.—A *truant* disposition, good my lord. *Shak.*—And chide his *truant* youth. *Shak.*—Lag behind with *truant* pace. *Dryden*.

(2.) * TRUANT. *n. f.* [*truand*, old Fr. *truwant*, Dutch, a *vagabond*.] An idler; one who wanders idly about, neglecting his duty or employment. To play the *truant* is, in schools, to stay from school without leave.—I have a *truant* bent to chivalry. *Shak.*—Though myself have been an idle *truant*. *Shak.*—Idle loiterers and *truants*. *Morr.*—And you like *truants* come too late ashore. *Dryden*.

* To TRUANT. *v. n.* [*truander*, to beg about a country, Fr. *truwanten*, old German.] To idle at a distance from duty; to loiter; to be lazy.—'Tis double wrong to *truant* with your bed. *Shak.*

* TRUANTSHIP. *n. f.* *truante*, old Fr. from *truant*; *truandise* in Chaucer is beggary.] Idleness; negligence; neglect of study or business.—The master should not chide if the child have used no *truantship*. *Afscam*.

* TRUBS. *n. s.* [*tuber*, Lat.] A sort of herb. *Am.*

* TRUBTAIL. *n. s.* A short squat woman. *Am.* TRUBTCHEVSK,

TRUBTCHESK, a town of Russia, in the province of Orel, on the Desna; 80 miles WSW. of Orel. Lon. 51. 20. E. Ferro. Lat. 52. 35. N.

* **TRUCE**. *n. f.* [*truga*, low Lat. *tregua*, Italian; *truce*, old French.] 1. A temporary peace; a cessation of hostilities.—Leagues and *truces*. *Hooker*.—Could not make *truce*. *Shak*.—This token ferveth for a flag of *truce*. *Shak*.—Men without natural affection, *truce* breakers. 2 *Tim*. iii. 3.—Left the *truce* with treason should be mixt. *Dryd*.—Ne'er wou'd have peace with wit, nor *truce* with sense. *Dryden*. 2. Cessation; intermission; short quiet.—*Truce* to his restless thoughts. *Milton*.—Sicknesses, which gave him but short and seldom *truce*. *Fell*.

TRUCHTERSHEIM, a town of France, in the department of the Lower Rhine; 7½ miles W. of Strasburg, and 12 SE. of Haguenau.

* **TRUCIDATION**. *n. f.* [from *trucido*, Latin.] The act of killing.

* **TRUCK**. *n. f.* [from the verb.] 1. Exchange; traffick by exchange.—It is no less requisite to maintain a *truck* in moral offices, than in commerce. *L'Esf*.—I must have heart for heart in equal *truck*. *Dryd*. 2. [*τροχός*]. Wooden wheels for carriage of cannon. *Anst*.

(1.) * **To TRUCK**. *v. a.* To give in exchange; to exchange.—The Indians *truck* gold for glasses. *L'Esf*.—*Truck* wares for wares. *Dryd*.—To *Truck* and barter out goods like the wild Indians. *Swift*.

(2.) * **To TRUCK**. *v. n.* [*troquer*, Fr. *truccare*, Italian; *trocar*, Spanish; deduced by *Salmasius* from *τροχός*, to get money.] To traffick by exchange; to give one commodity for another.

* **To TRUCKLE**. *v. n.* [This word is, I believe, derived from *trucklebed*, which is always under another bed.] To be in a state of subjection or inferiority; to yield; to creep.—A land that *truckles* under us. *Cleaveland*.—Run down in courts and *truckle'd*. *Hudib*.—Men may ply and *truckle* too. *L'Esf*.—Religion itself is forced to *truckle* to worldly policy. *Norris*.—Perhaps he might have *truckled* down. *Swift*.—A small *truckling* state. *Swift*.

* **TRUCKLEBED**, or *trundlebed*. *n. f.* [properly *troclebed*; from *troclea*, Latin, or *τροχός*.] A bed that runs on wheels under a higher bed.—There's his standing bed and *trucklebed*. *Shak*.—Honour's *trucklebed*. *Hudib*.

* **TRUCULENCE**. *n. f.* [*truculentia*, Lat.] 1. Savageness of manners. 2. Terribleness of aspect.

* **TRUCULENT**. *adj.* [*truculentus*, Lat.] 1. Savage; barbarous.—Savage and *truculent* inhabitants. *Ray*. 2. Terrible of aspect. 3. Destructive; cruel.—*Truculent* plagues. *Harvey*.

TRUCULENTLY. *adv.* Savagely, barbarously.

* **To TRUDGE**. *v. n.* [*truggolare*, Italian.] To travel laboriously; to jog on; to march heavily on.—That *trudge* between the king and mistress Shore. *Shak*.—No sooner was he fit to *trudge*. *Hudib*.—Away they *trudged* together. *L'Esf*.—And *trudge'd* to Rome upon my naked feet. *Dryd*.—Servile minds *trudge* continually in the beaten track. *Locke*.

* **TRUE**. *adj.* [*treowa*, *truwa*, Saxon.] 1. Not false; not erroneous; agreeing with fact, or with the nature of things.—And fittest for to forge *true*

seeming lies. *Spens*.—And, if the rest be *true* which I have heard. *Shak*.—Hesperian fables *true*. *Milt*.—What you said had not been *true*. *Cowley*. 2. Not false; agreeing with our own thoughts. 3. Pure from the crime of falsehood; veracious.—A *true* witness delivereth souls. *Prov*. 4. Genuine; real; not counterfeit.—The *true* light now shineth. 1 *John*.—What harmony or *true* delight. *Milt*.—And teach that truth is *trust* poetry. *Cowley*.—Religion, gives the *trust* value to them who promote the practice of it by their example. *Atterb*. 5. Faithful; not perfidious; steady.—Come and be *true*. *Shak*.—So young my lord, and *true*. *Shak*.—And wash him fresh again with *true* love tears. *Shak*.—So *true*, to faithful, love unequal'd. *Milt*.—Yourself may to yourself be *true*. *Roscommon*.—These that are *true* to the party. *Temple*.—Smil'd Venus, to behold her own *true* knight. *Dryd*.—*True* to the king her principles are found. *Dryd*.—The *trust* hearts for Voiture heav'd with sighs. *Pope*.—*True* to his charge. *Pope*. 6. Honest; not fraudulent.—The thieves have bound the *true* man. *Shak*.—If king Edward be as *true* and just. *Shak*. 7. Exactly; truly conformable to a rule.—If great painters had made things more regularly *true* they would have been very unpleasing. *Dryd*.—A circle regularly *true*. *Prior*.—A translation nicely *true* to the original. *Arb*. 8. Rightful.—That the *true* anointed King Messiah. *Milt*.

* **TRUEBORN**. *adj.* [*true* and *born*.] Having a right by birth to any title.—A *trueborn* Englishman. *Shak*.—A *trueborn* gentleman. *Shak*.

* **TRUEBRED**. *adj.* [*true* and *bred*.] Of a right breed.—*Truebred* cowards. *Shak*.—*Truebred* beast. *Dryden*.

* **TRUEHEARTED**. *adj.* [*true* and *heart*.] Honest; faithful.—I have known no *truehearted* man. *Shak*.

(1.) * **TRUELOVE**. *n. f.* An herb.

(2.) **TRUELOVE**, in botany. See **PARIS**, N° 9; and **TRILLIUM**.

* **TRUELOVEKNOT**. } *n. f.* [*true*, love, and
* **TRUELOVERSKNOT**. } *knot*.] Lines drawn through each other with many involutions, considered as the emblem of interwoven affection.—*Trueloveknots*, and flourishes. *Hudib*.

* **TRUENESS**. *n. f.* [from *true*.] Sincerity; faithfulness.—*Trueness* to a man's self. *Bacon*.

(1.) **TRUENTINUM**, or } a river of Italy, in
(1.) **TRUENTUM** } Picenum, running into the Adriatic.

(2.) **TRUENTUM**, a town on the above river.

* **TRUEPENNY**. *n. f.* [*true* and *penny*.] A familiar phrase for an honest fellow.—Art thou there, *truepenny*? *Shak*.

* **TRUFFLE**. *n. f.* [*truffe*, *truffe*, French.] Subterraneous mushrooms. *Ray*.

(2.) **TRUFFLES**. See **LYCOPERDON**.

TRUFTLORN, a town of Lower Bavaria; 13 miles SSW. of Vilshofen, and 22 WSW. of Passau.

* **TRUG**. *n. f.* A hod for mortar.

TRUGILLO, a town of Terra Firma, in Venezuela, 120 miles S. of Lake Maracaybo; Lon. 7. 40. W. Lat. 9. 46. N.

TRUIM, a river of Inverness shire, which runs into the Spey, at the church of Liggan.

* **TRULL**. *n. f.* [*trulla*, Italian.] 1. A low whore; a vagrant stumpet.—I'm sure, I scar'd the

the dauphin and his *trull*. *Shak.*—A *trull* who for her living knits. *Dryd.*—To celebrate some suburb *trull*. *Swift.* 2. It seems to have had first at least a neutral sense: a girl; a lass; a wench.—

Among the rest of all the route,

A passing proper lass,

A white-hair'd *trull*, of twenty years. *Tabern.*

* **TRULY**. *adv.* [from *true*.] 1. According to truth; not falsely; faithfully; honestly.—They thought they might do it, not only willingly, but *truly*. *Sidney.*—Things most *truly* are most behoovefully spoken. *Hooker.* 2. Really; without fallacy.—Wisdom alone is *truly* fair. *Milton.*—Such are *truly* holy. *Pearson.* 3. Exactly; justly.—Right reason is nothing else but judging of things *truly*. *South.* 4. Indeed; a slight affirmation, almost expletive.—I have not undertaken it *truly* without often pondering with myself. *Wett.*

TRUMAU, a town of Austria; 5 miles E. of Baden.

TRUMBULL, Sir William, an English statesman, born in Berkshire in 1636. He went ambassador to France, and was some time secretary of state. He is known in literature chiefly as the early patron and correspondent of Pope. He died in 1710.

TRUMIAN, a town of Hindoostan, in the Carnatic; 40 miles SW. of Tanjore, and 34 S. of Trichinopoly.

* **TRUMP**. *n. f.* [*trompe*, Dutch, and old Fr. *tromba*, Italian.] 1. A trumpet; an instrument of warlike music.—Whilst any *trump* did sound, or drum struck up. *Shak.*—The wakeful *trump* of doom. *Milton.*—And sounding *trumps* that seem'd to tear the sky. *Dryden.*—When the archangel's *trump* shall blow. *Wesley.* 2. [Corrupted from *triumph*. *Latimer*, in a Christmas sermon, exhibiting a game at cards, and made the ace of hearts *triumph*. *Fox.*] A winning card; a card that has particular privileges in a game.—Gain'd but one *trump* and one plebeian card. *Pope.*—She scarce remembers what is *trumps*. *Swift.* 3. To put to or upon the *TRUMPS*. To put to the last expedient.—We are now put upon our last *trump*. *Dryd.*

* To **TRUMP**. *v. a.* [from the noun.] 1. To win with a trump card. 2. To **TRUMP** up. [from *tromper*, Fr. to cheat.] To devise; to forge.

* **TRUMPERY**. *n. f.* [*tromperie*, French, a cheat.] 1. Something fallaciously splendid; something of less value than it seems.—The *trumpery* in my house bring hither. *Shak.* 2. Falsehood; empty talk.—Breaking into parts the story, and mixed it with their own *trumpery*. *Raleigh.* 3. Something of no value; trifles.—White, black, and grey, with all their *trumpery*. *Milton.*—Billeted, pricked dances, and other *trumpery*. *Addis.*

(1.) * **TRUMPET**. *n. f.* [*trompette*, French and Dutch.] 1. An instrument of martial music sounded by the breath.—Such a hideous *trumpet* calls to parley. *Shak.*—Let him appear by the third sound of the *trumpet*. *Shak.*—At the *trumpet's* call. *Cowley.*—He blew his *trumpet*. *Milt.*—The last loud *trumpet's* wondrous sound. *Ross.*—By the loud *trumpet*, which our courage aids. *Haller.*—The *trumpet's* loud clangor. *Dryden.*—Every man must be in some measure the *trumpet*

of his fame. *Tatler.*—Let the loud *trumpet* sound. *Pope.* 2. In military style, a trumpeter.—He desired, that a *trumpet* might be first sent for a pass. *Clarendon.*—The enemy demanded by a *trumpet*. *Addis.* 3. One who celebrates; one who praises.—*Trumpets* of the commendation of those they follow. *Bacon.*—That the great politician was pleased to be the *trumpet* of his praises. *Dryden.*

(2.) The **TRUMPET** is used chiefly in war, among the cavalry, to direct them in the service. Some Greek historians ascribe the invention to the Tyrrhenians; but others, with greater probability, to the Egyptians. The trumpet was not in use among the Greeks at the time of the Trojan war; though it was in common use in the time of Homer. According to Potter, (*Arch. Græc.* vol. ii. cap. 9.) before the invention of trumpets, the first signals of battle in primitive wars were lighted torches; to these succeeded shells of fishes, which were sounded like trumpets.

(3.) **TRUMPET**, ARTICULATE, comprehending both the **SPEAKING** and the **HEARING** trumpet, is by much the most valuable instrument. That the *speaking* trumpet was well known to the ancient Greeks, the trumpet of Alexander, and the *whispering* caverns of Diopylius, will not allow us to doubt. It is also certain, from Beritarius's History of the Jesuits, that this instrument was in use in Peru in the 16th century. About the middle of the last century, Athanasius Kircher, in different works, threw out many useful and scientific hints on the construction of speaking trumpets; (See **ACOUSTICS**, *Sec.* IV. and **KIRCHER**, N° 1.) which for some time did not attract much notice. About the year 1670, Sir Samuel Morland exhibited some instruments which he called *stentorophonic horns*, which conveyed articulate sounds to a surprising distance, and he proposed a question to the Royal Society, respecting the best form for a speaking trumpet, vindicating at the same time that of his own instrument, which was conical, suddenly spreading at the mouth. The subject attracted attention on the continent, and a Mr Gaslegrain proposed a conoid formed by the revolution of a hyperbola round its asymptote as the best form. A Mr Hafe of Wirtemberg, on the other hand, proposed a parabolic conoid, having the mouth of the speaker placed in the focus. Which form is the best, is a question that involves deep mathematical calculations. Mr Lambert of Berlin reasons in the following manner in favour of the conical shape, which is universally adopted. Sound naturally spreads in all directions; but we know that echoes or reflected sounds proceed almost strictly in certain limited directions. If therefore we contrive a trumpet in such a way that the lines of echo shall be confined within a certain space, it is reasonable to suppose that the sound will become more audible in proportion as this diffusion is prevented. Therefore, if we can oblige a sound which, in the open air, would have diffused itself over a hemisphere, to keep within a cone of 120°, we should expect it to be twice as audible within this cone. This will be accomplished, by making the reflections such that the lines of reflected sound shall be confined within this cone. We here suppose that nothing is lost

in the reflection. Let us examine the effect of a cylindrical trumpet. Let the trumpet be a cylinder ABED, (Fig. 1. Plate CCCXXXVII.) and let C be a sounding point in the axis. It is evident that all the sound in the cone BCE will go forward without any reflection. Let CM be any other line of sound, which we may, for brevity's sake, call a *sonorous* or *phonic* line. Being reflected in the points M, N, O, P, it is evident that it will at last escape from the trumpet in a direction PQ, equally diverging from the axis with the line CM. The same must be true of every other sonorous line. Therefore the echoes will all diverge from the mouth of the trumpet in the same manner as they would have proceeded from C without any trumpet. Even supposing, therefore, that the echoes are as strong as the original sound, no advantage is gained by such a trumpet, but that of bringing the sound forward from C to *e*. This is quite trifling when the hearer is at a distance. Yet we see that sounds may be heard at a very great distance, at the end of long, narrow, cylindrical, or prismatic galleries. It is known that a voice may be distinctly heard at the distance of several hundred feet in the Roman aqueducts, whose sides are perfectly straight and smooth, being plastered with stucco. The smooth surface of the still water greatly contributes to this effect. Cylindrical or prismatic trumpets must therefore be rejected. Let the trumpet be a cone BCA (fig. 2.) of which CN is the axis, DK a line perpendicular to the axis, and DFHI the path of a reflected sound in the plane of the axis. The last angle of reflection IHA is equal to the last angle of incidence FHC. The angle BFH, or its equal CFD, is equal to the angles FHD and FCH; that is, the angle of incidence CFD exceeds the next angle of incidence FHC by the angle FCD; that is, by the angle of the cone. In like manner, FDH exceeds CFD by the same angle FCD. Thus every succeeding angle, either of incidence or reflection, exceeds the next by the angle of the cone. Call the angle of the cone a , and let b be the first angle of incidence PDC. The second, or DFC, is $b-a$. The third, or FHC, is $b-2a$, &c.; and the n th angle of incidence or reflection is $b-na$, after n reflections. Since the angle diminishes by equal quantities at each subsequent reflection, it is plain, that whatever be the first angle of incidence, it may be exhausted by this diminution; namely, when n times a exceeds or is equal to b . Therefore, to know how many reflections of a sound, whose first incidence has the inclination b , can be made in an infinitely extended cone, whose angle is a , divide b by a ; the quotient will give the number n of reflections, and the remainder, if any, will be the last angle of incidence or reflection less than a . It is very plain, that when an angle of reflection IHA is equal to or less than the angle BCA of the cone, the reflected line HI will no more meet with the other side CB of the cone. We may here observe, that the greatest angle of incidence is a right angle, or 90° . This sound would be reflected back in the same line, and would be incident on the opposite side in an angle $=90^\circ-a$, &c. Thus we see that a conical trumpet is well suited for confining the sound; for by prolonging it sufficiently, we can keep the lines of

reflected sound wholly within the cone. And when it is not carried to such a length as to do this, when it allows the sounding line GH, for example, to escape without farther reflection, the divergency from the axis is less than the last angle of reflection BGH by half the angle BCA of the cone. If therefore the cone be of such a length, that its diameter at the mouth is equal to the length of the part cut off, every line of sound will have at least as many reflections, save one, as if the cone were infinitely long; and the last reflected line will either be parallel to the opposite side of the cone, or lie nearer the axis than this parallel; consequently, such a cone will confine all the reflected sounds within a cone whose angle is a , and will augment the sound in the proportion of the spherical base of this cone to a complete hemispherical surface. This appears to be the best general rule for constructing the instrument: for, to procure another reflection, the tube must be prodigiously lengthened, and we cannot suppose that one reflection more will add greatly to its power. It appears, too, that the length depends chiefly on the angle of the cone; for the mouth piece may be considered as nearly a fixed quantity. It must be of a size to admit the mouth when speaking with force and without constraint. About an inch and a half may be fixed on for its diameter. The foregoing conclusions are therefore general for all the sounds which come in all directions from every point in the area of the mouth-piece. Thus it appears, that a conical trumpet is well fitted for increasing the force of sounds by diminishing their final divergence. For, had the speaker's mouth been in the open air, the sounds which are now confined within the cone $v W t$ would have been diffused over a hemisphere; and we see that prolonging the trumpet must confine the sounds still more. An inconvenience still attends the trumpet of this construction. Its complete audibility is confined to the cylindrical space in the direction of the axis, and it is more faintly heard on each side of it. This obliges us to direct the trumpet very exactly to the spot where we wish it to be heard. This is confirmed by all the accounts we have of the performance of great speaking trumpets. It is evident, that by lengthening the trumpet, and therefore enlarging its mouth, we make the lines expand, and therefore it will not be so difficult to direct the trumpet. But even this is confined within the limits of a few degrees. Even if the trumpet were continued without end, the sounds cannot be reinforced in a wider space than the cone of the trumpet. But it is always advantageous to increase its length; for this makes the extreme tangents embrace a greater portion of the sonorous sphere, and thus increases the sound in the space where it is all reflected. And the limiting tangents expand still more, and thus the space of full effect is increased. But either of these augmentations is very small in comparison of the augmentation of size. If the trumpet were made 100 times longer, its power would not be increased one half. The construction of a speaking trumpet is a problem of some nicety; and as the trials are always made at some considerable distance, it may frequently happen that a trumpet, which is not

not heard at *one* mile's distance, may be made very audible *two* miles off by cutting off a piece at its wide end. We shall find the *parabolic conoid* the preferable shape for an acoustic trumpet; because the sounds coming into the instrument in a direction parallel to the axis, they are reflected so as to pass through the focus. The parabolic conoid must therefore be cut off through the focus, that the sounds may not go out again by the subsequent reflections; and they must be received into a cylindrical pipe of $\frac{1}{4}$ of an inch in diameter. Therefore the parameter of this parabola is $\frac{1}{2}$ th of an inch, and the focus is $\frac{1}{4}$ th of an inch from the vertex. This determines the whole instrument, for they are all portions of one parabolic conoid. Suppose that the instrument is required to approximate the sound 12 times, as in the example of the conical instrument. The ordinate at the mouth must be 12 times the 6th of an inch, or 2 inches; and the mouth diameter is 4 inches, as in the conical instrument. In trumpets for assisting the hearing, all reverberations of the trumpet must be avoided. It must be made thick, of the least elastic materials, and covered with cloth externally. For all reverberation lasts for a short time, and produces new sounds which mix with those that are coming in. We must also observe, that no acoustic trumpet can separate those sounds to which we listen, from others that are made in the same direction. All are received by it, and magnified in the same proportion. This is frequently a very great inconvenience. There is also another imperfection, which we imagine cannot be removed, namely, an odd confusion, which cannot be called indistinctness, but a feeling as if we were in the midst of an echoing room. The cause seems to be this: Hearing gives us some perception of the direction of the sounding object, not indeed very precise, but sufficiently so for most purposes. In all instruments which we have described for confounding sounds, the last reflections are made in directions very much inclined to the axis, and inclined in many different degrees. Therefore they have the appearance of coming from different quarters; and instead of the perception of a single speaker, we have that of a sounding surface of great extent. We do not know any method of preventing this, and at the same time increasing the sound.

(4.) **TRUMPET, MARINE**, is a musical instrument consisting of three tables, which form its triangular body. It has a very long neck with one single string, very thick, mounted on a bridge, which is firm on one side, but tremulous on the other. It is struck by a bow with one hand, and with the other the string is pressed or stopped on the neck by the thumb. See *Pl.* 334. *Fig. 1.* *Pl.* 337. *Fig. 2.* and *Pl.* 341. *Fig. 3.* It is the trembling of the bridge, when struck, that makes it imitate the sound of a trumpet; which it does to that perfection that it is scarce possible to distinguish the one from the other. And this is what has given it the denomination of *trumpet marine*, though, in propriety, it be a kind of **MONOCHORD**. Of the six divisions marked on the neck of the instrument, the first makes a fifth with the open chord, the second an octave, and so on for the rest, corresponding with the intervals of the military trumpet.

* **To TRUMPET**. *v. a.* [*trumpetter*, Fr. from the noun.] To publish by sound of trumpet; to proclaim.—*Trumpet to the world.* *Shak.*—*To trumpet such good tidings.* *Shak.*—They published and trumpeted reproaches against the Irish. *Bacon.*

(1.) * **TRUMPETER**. *n. s.* [from *trumpet*.] 1. One who sounds a trumpet.—*Trumpeters*, with brazen din. *Shak.*—A herald and *trumpeter* from the Scots overtook them. *Hayw.*—And a *trumpeter* hornet 'o battle sounds loud. *Dryden.*—An army of *trumpeters*. *Addis.* 2. One who proclaims, publishes, or denounces.—Where there is an opinion to be created of virtue, they are good *trumpeters*. *Bacon.*—Spiritual *trumpeters*. *South.* 3. [*Scolopex*.] A fish. *Ainsworth.*

(2.) **TRUMPETER**. See **PSOPHIA**.

(1.) * **TRUMPET-FLOWER**. *n. s.* [*bignonia*.] A tubulous flower. *Miller.*

(2.) **TRUMPET-FLOWER**. See **BIGNONIA**.

* **TRUMPET-TONGUED**. *adj.* [*trumpet* and *tongue*.] Having tongues vociferous as a trumpet.—Will plead, like angels, *trumpet-tongued*. *Shak.*

TRUMPINGTON, a town of Cambridgeshire, 2 miles from Cambridge, where various relics of Roman antiquity have been found. Chaucer's mill is in it.

* **TRUMPLIKE**. *adj.* Resembling a trumpet.—A voice infraet and *trumplike*. *Chapman.*

TRUN, a town of France, in the dep. of the Orne, 10 $\frac{1}{2}$ miles SE. of Falaise, and 7 $\frac{1}{2}$ NNE. of Argentan.

* **To TRUNCATE**. *v. a.* [*trunco*, Latin.] To maim; to lop; to cut short.

* **TRUNCATION**. *n. s.* [from *truncate*.] The act of lopping or maiming.

TRUNCATUM FOLIUM. See **BOTANY**, *Gloss.*

* **TRUNCHEON**. *n. s.* [*trunçon*, French.]

1. A short staff; a club; a cudgel.—With his *truncheon* he so rudely stroke. *Spens.*—Thy leg is a stick compared with this *truncheon*. *Shak.*—Plummets of lead tied to a *truncheon*. *Hayward.*—One with a broken *truncheon* deals his blows. *Dryden.* 2. A staff of command.—Beckon'd with fiery *truncheon*. *Shak.*—The marshal's *truncheon*, and the judge's robe. *Shak.*

* **To TRUNCHEON**. *v. a.* [from the noun.] To beat with a *truncheon*.—If captains were of my mind, they would *truncheon* you out of taking their names. *Shak.*

* **TRUNCHEONEER**. *n. s.* [from *truncheon*.] One armed with a *truncheon*.—Forty *truncheoners* drew to her succour. *Shak.*

(1.) * **TRUNDLE**. *n. s.* [*trendl*, Saxon.] Any round rolling thing.

(2.) A **TRUNDLE** is a carriage with low wheels, whereon heavy and cumbersome burdens are drawn.

* **To TRUNDLE**. *v. n.* [*trondeler*, Picard French; *trendl*, a bowl, Saxon.] To roll; to bowl along.—At last *trundles* down in a continued time of dactyls. *Addison.*

* **TRUNDLE-TAIL**. *n. s.* Roundtail.—Or bobtail like, or *trundle-tail*. *Shak.*

(1.) * **TRUNK**. *n. s.* [*truncus*, Lat. *trunc*, Fr.]

1. The body of a tree.—The ivy, which had hid my princely *trunk*. *Shak.*—About the mossy *trunk* I wound me soon. *Milton.*—Does round their *trunks* her purple clusters twine. *Dryden.*—Every

tree

seed is a perfect plant with a *trunk*, branches, and leaves. *Bentley*. 2. The body without the limbs of an animal.—The senseless *trunk*. *Spens.*—From this bare wither'd *trunk*. *Shak.* 3. The main body of any thing.—The large *trunks* of the veins. *Rap.* 4. [*Tronc*, French.] A chest for cloaths; sometimes a small chest, commonly lined with paper.—Carry in *trunks*, and all my drudgery do. *Dryden*.—There happened to stand an old *trunk* in the room. *Locke*.—And sent in quires to line a *trunk*. *Swift*. 5. The proboscis of an elephant, or other animal.—

Leviathan that at his gills
Draws in, and at his *trunk* spouts out a sea.

Milton.

When elephant 'gainst elephant did rear

His *trunk*. *Dryden.*

6. A long tube through which pellets of clay are blown.—In rolls of parchment *trunks*. *Bacon*.—In a shooting *trunk*, the longer it is to a certain limit, the swifter and more forcibly the air drives the pellet. *Ray*.

(2.) *TRUNK*, in botany, that part of the herb which arises immediately from the root, and is terminated by fructification; the leaves, buds, and auxiliary parts of the herb, not entering in its description. See *BOTANY, Index*.

* *To TRUNK. v. a.* [*trunco*, Latin.] To truncate; to maim; to lop. Obsolete.—

Large streams of blood out of the *trunked* flock

Forth gushed. *Spenser.*

* *TRUNKED. adj.* [from *trunk*.] Having a trunk.—Strong and well *trunked* trees. *Hosvel*.

* *TRUNK-HOSE. n. s.* [*trunk* and *hose*.] Large breeches formerly worn.—The short *trunk-hose* shall show thy foot and knee. *Prior*.

* *TRUNNIONS. n. s.* [*tragnons*, French.] The knobs or bunchings of a gun, that bear it on the cheeks of a carriage. *Bailey*.

TRUNS, a town of Switzerland, in the cede-vant country of the *GRISONS*, memorable for the first erection of the Swiss league. It is seated on the Rhine, 7 miles W. of Kantz.

(1.) *TRURO*, a borough of England, in Cornwall, at the mouth of the Falles. It sends 2 members to parliament. Its chief trade is in tin, and copper ore. The lord warden of the stanneries holds his court in it. It has also a tin coinage. It is memorable for the surrender of Lord Hope-ton's troops to Gen. Fairfax, after the battle of *NASEBY*. (See *ENGLAND*, § 47.) It has markets on Wednesday and Saturday, and lies 11 miles NNE. of Falmouth, 79 W. by S. of Exeter, and 257 W. by S. of London. Lon. 4. 55. W. Lat. 50. 16. N.

(2.) *TRURO*, a town of Massachusetts, on the E. coast of Cape Cod Bay. Lon. 70. 1. W. Lat. 42. 1. N.

(3.) *TRURO*, a town of Nova Scotia, 40 miles N. of Halifax.

TRUSAM, a river of Suabia, which rises near Hohlegraben, in Brisgaw, runs past Friburg, &c. and joins the Eltz, near Riechel.

* *TRUSION. n. s.* [*trudo*, Latin.] The act of thrusting or pushing.—It is really pusion and *trusion*. *Bentley*.

(1.) * *TRUSS. n. s.* [*trouffe*, Fr.] 1. A bandage by which ruptures are restrained from lapsing.—The trouble of wearing a *truss*. *Wifeman*. 2. Bundle; any thing thrust close together.—Bearing a *truss* of trifles at his back. *Spenser*.—Carrying up great *trusses* of hay. *Carew*.—A heartless *truss* of straw. *L'Estr.*—A *truss* of sallet. *Add.* 3. Trousse; breeches. Obsolete.

(2.) *TRUSS*, in a ship, a machine employed to pull a yard home to its respective mast, and retain it firmly in that position.

(4.) A *TRUSS OF HAY* contains 56 pounds, or half an hundred-weight: 56 *trusses* make a load.

* *To TRUSS. v. a.* [*trouffer*, Fr.] To pack up close together.—Strongly *trussed* up together. *Spenser*.—Some of them *truss* up bag and baggage. *Hooker*.—You might have *trussed* him into an celskin. *Shak.*

* *TRUST. n. s.* [*traust*, Runick.] 1. Confidence; reliance on another.—What a fool is how nifty! and *trust*, his sworn brother. *Shak.*—Never put too much *trust* in deceitful men. *Swift*. 2. Charge received in confidence.—Reward them well if they observe their *trust*. *Denham*.—

In my wretched case 'twill be more just

Not to have promis'd, than deceive your *trust*.

Dryden.

—Those who have broken their *trust*. *Davenant*.

3. Confident opinion of any event.—His *trust* was th' Eternal. *Milton*. 4. Credit given with examination.—Most take things upon *trust*. *Locke*. 5. Credit on promise of payment. 6. Something committed to one's faith.—They must commit many great *trusts* to their ministers. *Bacon*.—To violate the sacred *trust* of silence. *Milton*. Our taking of a *trust* doth not engage us to disobey our Lord. *Kettlewell*. 7. Deposit; something committed to charge, of which an account must be given.—The advantages are only a *trust*. *Swift*. 8. Confidence in supposed honesty.—I commit my daughter unto thee of special *trust*. *Tob. x. 12*. 9. State of him to whom something is entrusted.—I serve him truly, that will put me in *trust*. *Shak.* He was left in that great *trust* with the king. *Clarendon*.

(1.) * *To TRUST. v. a.* [from the noun.] 1. To place confidence in; to confide in.—I'd be torn in pieces ere I'd *trust* a woman. *Ben. Jon.* 2. To believe; to credit.—*Trust* me you look well. *Shak.* 3. To admit in confidence to the power over any thing.—When you lie down, *trust* God with yourself. *Taylor*. To commit with confidence.—This much the rogue to public ears will *trust*. *Dryden*.—Whom with your pow'r and fortune, Sir, you *trust*. *Dryden*. 5. To venture confidently.—Fool'd by thee to *trust* thee from my side. *Milton*. 6. To sell upon credit.

(2.) * *To TRUST. v. n.* 1. To be confident of something future.—I *trust* to come unto you. 2. *John*.—My God shall raise me up I *trust*. *Raleigh*.—Whom I *trusted* to be my friend. *Fell.* 2. To have confidence; to rely; to depend without doubt.—On my arm shall they *trust*. *Isa. li. 5*.—The Lord is a buckler to all that *trust* in him. 2 *Sam. xx.*—Sin never shall hurt them more who rightly *trust*. *Milton*. 3. To be credulous; to be won to con-

S s s fidence.

fidence.—Safer than *trust* too far. *Shak.* 4. To expect.—What is an honest man to *trust* to that keeps a knave company? *L'Estrange.*

* **TRUSTEE.** *n. f.* [from *trust*.] 1. One entrusted with any thing.—A confessor that you may *trust* your soul with. *Taylor.* 2. One to whom something is committed for the use and behoof of another.—You are not the *trustees* of the public liberty. *Dryden.*

* **TRUSTER.** *n. f.* [from *trust*.] One who trusts. *Truster* of your own report. *Shak.*

* **TRUSTINESS.** *n. f.* [from *trust*.] Honesty; fidelity; faithfulness.—*Trustiness* in a dog. *Greav.*

* **TRUSTLESS.** *adj.* [from *trust*.] Unfaithful; unconstant; not to be trusted. A word elegant, but out of use.—I behold this fickle *trustless* state. *Spenser.*

* **TRUSTY.** *adj.* [from *trust*.] 1. Honest; faithful; true; fit to be trusted.—A *trusty* 'squire. *Shak.*—This *trusty* servant. *Shak.*—He removeth away the speech of the *trusty*. *Job.* xii. 26.—His *trusty* slave has sent. *Dryden.*—His most *trusty* slaves. *Addison.* 2. Strong; stout; such as will not fail.—His *trusty* sword. *Spenser.*—The *trusty* weapon. *Dryden.*

(1.) * **TRUTH.** *n. f.* [*treowutha*, Saxon.] 1. The contrary to falsehood; conformity of notions to things.—All *truths* are equal. *Wilkins.*—A punctual *truth*. *Brown.*—With reason and with *truth*. *Milton.*—This clue leads to *truth* and certainty. *Locke.* 2. Conformity of words to thoughts.—Shall *truth* fail to keep her word? *Milton.*—*Truth* is the joining or separating of signs, as the things signified agree or disagree. *Locke.* 3. Purity from falsehood.—Thy *truth* then be thy dower. *Shak.* 4. Right opinion.—To life sequester'd, and ascetic *truth*. *Harte.* 5. Fidelity; constancy.—The thoughts of past pleasure and *truth*. *Song.* 6. Honesty; virtue.—Malice bears down *truth*. *Shak.* 7. It is used sometimes by way of concession.—She said, *truth* Lord. *Matt.* xv. 27. 8. Exactness; conformity to rule.—Ploughs to go true depend much upon the *truth* of the iron work. *Mart.* 9. Reality; real state of things.—In *truth*, what should any prayer require, but only so to be read as becometh. *Hooker.*—There are innumerable *truths*. *Beattie.* 10. Of a **TRUTH**, or in **TRUTH**. In reality.—Of a *truth*, Lord, the kings of Assyria have destroyed the nations. *2 Kings* xix. 17.

(2.) **TRUTH**, a term used in opposition to falsehood, and applied to propositions which answer or accord to the nature and reality of the thing whereof something is affirmed or denied. See **METAPHYSICS**, § XXIII.

* **TRUTINATION.** *n. f.* [*trutina*, Latin.] The act of weighing; examination by the scale.—Men may mistake if they distinguish not the sense of levity unto themselves, and in regard of the scale or decision of *trutination*. *Brown.*

TRUWOR, one of the 3 first monarchs of Russia. See **RUSSIA**, § II. 2.

(1.) **TRUXILLO**, a city of Spain, in Estremadura, taken from the Moors, in the 13th century. It is seated among mountains, on the side of a hill, on the top of which there is a strong fortress. It is built on the banks of the Atamont, 117 miles

SE. of Madrid, and 65 SW. of Toledo. Lon. 5. 23. W. Lat. 39. 4. N.

(2.) **TRUXILLO**, a rich trading city of Peru, in Lima, built by Pizarro, in 1535. It is seated in a fertile country, and contains within its jurisdiction above 50,000 native Peruvians. It is seated on the coast of the S. Pacific Ocean, and surrounded with a brick wall; the houses are well built. The climate is moderated by cold in winter. The people export sugar, corn, maize, fruits, wine, olive oil, barley, wheat, &c. It lies 300 miles NW. of Lima. Lon. 85. 50. W. Lat. 8. 1. S.

(3.) **TRUXILLO**, a town of Mexico, in the prov. of Honduras, seated on a hill above a gulf so named, with a good harbour. It was several times ravaged by the English and Dutch. It is seated between two rivers, and surrounded by thick groves. Lon. 89. 50. W. Lat. 15. 30. N.

(4.) **TRUXILLO**, a town of Terra Firma, in the province of Venezuela, 120 miles S. of Lake Maracaybo. Lon. 69. 15. W. Lat. 7. 20. N.

TRUZZA, or } a town of Tunis, with a ful-
TRUZZO, } phureous spring, 14 miles
SSW. of Tunis.

(1.) * **To TRY.** *v. a.* [*trier*, French.] 1. To examine; to make experiment of.—Come try yourselves. *Shak.*—Not being *tried* and tutor'd in the world. *Shak.*—Doth not the ear *try* words. *Job.* 2. To experience; to assay; to have knowledge or experience of.—Thou evil hast not *try'd*. *Milt.*—Or *try* the Libyan heat, or Scythian cold. *Dryd.*—With me the rocks of Scylla you have *try'd*. *Dryd.* 3. To examine as a judge. 4. To bring before a judicial tribunal. 5. To bring to a decision, with out emphatical.—Nicanor durst not *try* the matter by the sword. *2 Mac.*—I'll *try* it out, and give no quarter. *Dryden.* 6. To act on as a test.—The fire sev'n times *try'd* this. *Shak.*—Sure he who first the passage *try'd*. *Dryd.* 7. To bring as to a test.—The *trying* of your faith worketh patience. *James.*—Under long obedience *try'd*. *Milt.* 8. To assay; to attempt.—Let us *try* adventurous work. *Milt.* 9. To purify; to refine.—*Try'd* in sharp tribulation. *Milt.* 10. To use as means.—To ease her cares the force of sleep the *tries*. *Swift.*

(2.) * **To TRY.** *v. n.* To endeavour; to attempt; to make assay.—

He first deceas'd, the for a little *try'd*
To live without him. *Wotton.*
—Up and *try*. *Woodliff.*

TRYGGEVELDE, a town of Denmark, in the isle of Zealand, 4 miles W. of Store Hedingen.

TRYON, a county of New York.

TRYPHIODORUS, an ancient Greek poet, who lived between the reigns of Severus and Anastasius. None of his numerous writings have come down to us, but an epic poem, of which there are several editions, and Italian and English versions.

TSABA, a town of Asiatic Turkey, in Natolia, 10 miles E. of Boli.

TSAKTELU, a town of Asiatic Turkey, in Carmania, 28 miles NNE. of Akshehr.

TSALTSALYA, a venomous insect of Abyssinia. See **ABYSSINIA** and **ZIMB.**

(1.) **TSANG**, the Chinese name of TIBET.

(2.) **TSANG**, a city of China, of the 2d rank,

in Petrell, 102 miles S. of Pekin. Lon. 134. 20. E. Ferro. Lat. 38. 21. N.

TSANPOO. See SANDPU.

TSAN-TSE-AGHISI, a town of Asiatic Turkey, in Natolia, 12 miles NW. of Ergrî.

TSAO, 1. A city of China, of the 2d rank, in Chan-tong; 2, 3. Two towns of the 3d rank, in Chan-tong, and Kiang-nan.

TSCHASCHWITZ, a town of Silesia, in Neisse, 4 miles W. of Neisse.

TSCHENGA, a town of European Turkey, in Bulgaria, near the Daphne, 50 m. WSW. of Varna.

TSCHERNOIYAR, a town of Russia, in Saratovskoi, 200 miles NW. of Astracan, and 296 NE. of Azoph.

TSCHIGRI, a town of Russia, in Kurkoi.

TSCHOPA, or ZSCHOPAU, a town of Saxony, in Erzgebürg, on a river so named, famous for its blue manufactures; 7 miles SE. of Chemnitz.

TSCHUTSKI, a country and people of Independent Tartary, on the E. coast of Asia, opposite to the NW. coast of America, bounded by the Anadir on the S. They are a handsome, courageous, and warlike race, very formidable neighbours to the KORIACS. The Russians endeavoured to subdue them, but hitherto in vain. (See COOK, N^o III, § 7, and TARTARY, § 2.) Their territory lies in Lon. 168. 41. W. Lat. 66. 5. N.

TSECANDER. See SECANDRA.

TSENG-MING, a populous island, near the coast of China, in the East Sea, seated on the Yang-tse, 50 miles long, and 10 broad. It is watered by numerous canals. The climate is healthy and temperate. It has many towns, shops, and warehouses, elegantly furnished. There is a whitish kind of earth, which abounds with salt, and produces a great revenue from it. Lon. 138. 40. E. Ferro. Lat. 31. 38. N.

TSHABRILO, a town of KISTÏ, in the province of Caucasus.

TSHAMIE, the Indian name of a tree which grows in the northern circars of Hindoostan. The pod is the only part used. It is, when ripe, brown, smooth, and contains, besides the seeds, a large quantity of a brown mealy substance, which the natives eat; its taste is sweetish and agreeable.

TSHETSHEN, a country of Asia, with its capital, so named, in the province of Caucasus, inhabited by the KISTÏ.

TSHIM, and- } 2 towns of the KISTÏ,
TSHISHNI-KABUL, } in the province of Caucasus, in Russian Tartary.

TSHLUCHOW. See SLUCHAW.

TSITSIKAR, a district in the country of the Mantchew Tartars, with its capital. See TARTARY, § 1.

TSUR. See SOOR.

TUA, a river of Portugal, in Tra-os-montes, which runs into the Duero, 15 m. NW. of St Joao.

TUABO, a town of Africa, in Galam.

TUESIS, an ancient name of Nairn. See NAIRN, N^o 4.

TUAK, an island in the Red Sea, 12 miles from the coast of Arabia. Lon. 41. 58. E. Lat. 5. 58. N.

TUAM, a town of Ireland, in the province of Connaught, and county of Galway, with an archbishop's see. It was once a famous city, and still retains the title though reduced to a village. It

is 7 miles from Mayo. Lon. 8. 46. W. Lat. 53. 33. N.

TUAPE, the capital of SONORA.

(1.) * TUB. *n. s.* [*tobbe, tubbe*, Dut.] 1. A large open vessel of wood.—A tub of water open. *Buc.*—They fetch their precepts from the Cynick *tub*. *Milton.*—Skillful coopers hoop their *tubs*. *Hudibr.* 2. A state of salivation; so called, because the patient was formerly sweated in a tub. 'To th' *tub*-fast, and the diet. *Shak.*

(2.) TUB, in commerce, denotes an indetermined quantity or measure: thus, a tub of tea contains about 60 lb.; and a tub of camphor from 56 to 86 lb.

TUBA, a river of Russia, in Kolivan, which runs into the Enifei, 16 miles SW. of Abakanik.

TUBAI, one of the Society Islands, 12 miles from Bolabola.

TUBAL-CAIN, an antediluvian metallurgist, the first of whom we have any authentic record; the son of Lamech by Zillah, and the 7th from Adam by Cain.

TUBANSKA, a town of Russia, in the prov. of Irkutskoi, 44 miles NW. of Ilimik.

TUBAQN, a town on the N. coast of Java.

(1.) * TUBE. *n. s.* [*tube*, Fr. *tubus*, Latin.] A pipe; a syphon; a long hollow body.—Fiery *tubes*. *Rose.*—His glaz'd optick *tube*. *Milton.*—The *tubes* and vessels of the vegetables. *Woodward.*

(2.) TUBE, in general, is used for a pipe, conduit, or canal; a cylinder, hollow within-side, either of lead, iron, glass, wood, or other matter, for the air or some other matter to have a free conveyance through it.

(3.) TUBES, AURICULAR, or instruments to facilitate hearing. See TRUMPET, § 3.

TUBERAN, a town of Persia, in Kerman, 171 miles NE. of Schirauz, and 261 ESE. of Isfahan.

(1.) * TUBERCLE. *n. s.* [*tubercule*, Fr. from *tuberculum*, Lat.] A small swelling or excrescence on the body; a pimple.—By what degrades the *tubercles* arile. *Swell.*—A consumption of the lungs arrives through a crude *tubercle*. *Harvey.*

(2.) TUBERCLES, among physicians, denote little tumours which suppurate and discharge pus; and are often found in the lungs, especially of consumptive persons. See MEDICINE, *Index*.

TUBERCULATUS. } See BOTANY, *Gloss*.

TUBERCULUM.

TUBERNOKI, a town of Tunis, 21 miles SE. of Tunis.

TUBEROSA RADIX. See BOTANY, *Gloss*.

(1.) * TUBEROSE. *n. s.* A flower.—The common way of planting *tuberose* is in pots. *Mort.*—The *tuberose* ever breathes and violets blow. *Garth.*

(2.) TUBEROSE, in botany. See POLYANTHES.

* TUBEROUS. *adj.* [*tubereux*, Fr. from *tuber*, Lat.] Having prominent knots or excrescences.—*Tuberous hæmatitæ*. *Woodward.*

TUBESKE, a town of Tunis, 48 miles SW. of Tunis.

TUBINGEN, a city of Wirtemberg, with a castle and university. It is seated on the Neckar, 20 miles SW. of Stuttgart, and 50 E. of Strasburg. Lon. 9. 4. E. Lat. 48. 30. N.

TUBEUF, a town of France, in the dep. of Maine, 4½ miles NNE. of Laffay, 12 NNW. of Vilaine.

TUBUA, a town of Algiers, anciently called *Thubana*, 72 miles SSW. of Constantina.

TUBUHACAN, a town of Sugulmessa, 9 miles from Sugulmessa.

TUBULAR. *adj.* [from *tubus*, Lat.] Resembling a pipe or trunk; consisting of a pipe; long and hollow; fistular. — *A tubular* or pipe-like snout. *Crew.*

* **TUBULATED**. **TUBULOUS**. *adj.* [from *tubulus*, Lat.] Fistular; longitudinally hollow. — The teeth of vipers are *tubulated*. *Derham.*

* **TUBULE**. *n. f.* [*tubulus*, Lat.] A small pipe, or fistular body. — *Testaceous tubules*. *Woodw.*

* **TUBULOUS**. See **TUBULATED**.
TUBULUS MARINUS, a petrification. See *Plate CLXVIII.*

TUBURBO, a town of Tunis, 16 miles WNW. of Tunis.

TUCAPEL, mountains of Peru, in Chili, on the S. of Concepcion.

TUCCA. See **PLIOTUS**, N° 3.

TUCABATCHEE, an Indian town of the United States, in Georgia; 10 miles SW. of Oak-fusker.

TUCHAN, a town of France, in the dep. of the Aude, near the Verdoubie; 12 miles S. of Grasse, and 12 NNW. of Perpignan.

* **TUCK**. *n. f.* [*tucca*, Welsh, a knife; *effoc*, French; *focco*, Italian.] 1. A long narrow sword. — Your venom'd *tuck*, *Shak.* — From rusty durance be bail'd *tuck*. *Hud.* 2. A kind of net. — The *tuck* is narrower meathed. *Carecy.*

(1.) * **To TUCK**. *v. a.* [from *trucken*, German.] To press. *Skinner.* 1. To gather into a narrower compass; to hinder from spreading. She *tucked* up her vestments. *Addis.* — *Tucking* up their petticoats. *Addis.* — *Tucked* up their garments to the elbows. *Addis.* — *Tuck* back thy hair. *Prior.* 2. To inclose, by tucking cloaths round. — *Tuck* him warm into bed. *Locke.*

(2.) * **To TUCK**. *v. n.* To contract. A bad word. — The edges *tuck* in, and growing skinned *and* hard, give it the name of a callous ulcer. *Sharp.*

TUCKAABER, a town of Tunis, on the Medjerdah; 24 miles W. of Tunis.

(1.) **TUCKER**, Abraham, Esq. published 9 vols on metaphysics, under the assumed name of *Scarch*. He died at his estate of Dorking, in Surry, in 1775.

(2.) **TUCKER**, Josiah, D. D. a celebrated English divine, born at Laugharne, in Caermarthen-shire, in 1711; and educated at St John's college, Oxford, where he graduated in 1739. He became rector of St Stephens in Bristol, and prebendary of the cathedral. In 1768, he was made dean. He was an able writer on political, commercial, and theological subjects. His chief work is his *Treatise on Civil Government against Locke*, 8vo, 1781. He died in 1799.

(3.) * **TUCKER**. *n. f.* A small piece of linen that shades the breast of women. — By some called a *tucker*, and by others the neck-piece. *Addison.*

* **TUCKETSONANCE**. *n. f.* The sound of the tucket. An ancient instrument of musick.

Let the trumpets sound
The *tucketsonance* and the note to mount. *Shak.*

TUCRI, a town of Naples, in Molise; 15 miles ESE. of Molise.

TUCUMAN, a province of S. America, in Paraguay, bounded on the N. by those of Chicas and Chaco; on the E. by Chaco and Rio de la Plata, on the S. by the country of Chicutos and Pampes, and on the W. by the bishopric of St Jago.

TUCUYO, a town of Terra Firma, in Venezuela, on a river which runs through it. Lon. 69. 2. W. Lat. 7. 31. N.

TUDDER, a town of the French empire, in the dep. of the Roer, and late duchy of Juliers; 11 miles S. of Ruremond.

TUDDINGTON, a town of England, in Bedfordshire, with a market on Sat. 16 miles S. of Bedford, 35 N. of London, and 5 NW. of Dunstable. Lon. 0. 32. W. Lat. 52. 0. N.

(1.) **TUDELA**, a town of Spain in Navarre, with a castle; inhabited by several of the nobility, and adorned with handsome structures. It is seated on the Ebro. It is 45 miles NW. of Saragossa, and 140 NE. of Madrid. Lon. 1. 10. W. Lat. 42. 9. N.

(2.) **TUDELA**, a town of Spain, in Leon.

(3.) **TUDELA**, a town of New Granada.

(4.) **TUDELA**, Benjamin of, a rabbi of the 12th century, author of *Travels through Europe, Asia, and Africa*; translated from the Hebrew into French by Barratier, in 1734.

TUDER. See **TUDERTIA**.

TUDERGA, a town of Asiatic Turkey, in Nalolia; 32 miles NNE. of Eski-Shehr.

TUDERTES, an ancient people of Italy, in Umbria, who inhabited

TUDERTIA, or **TUDER**, a town of Umbria.

TUDHOPE FELL, a mountain of Roxburghshire, on the English border.

TUDRI, an ancient nation of Germany. *Tac.*

TUECH, a town of France, in the department of the Ardeche; 18 miles NW. of Viviers.

* **TUEL**. *n. f.* [*tuyean*, Fr.] The anus. *Skinner.*

TUELLA, a town of the French empire, in the dep. of the Po, and late duchy of Aosta; 16 miles W. of Aosta.

TVER, a considerable commercial city of Russia, capital of Tverfkoi, seated at the conflux of the Tvertza and Volga. It was burnt in 1763, but rebuilt and much improved by Catherine II. The houses are of wood, and of brick plastered with stucco. It has a seminary endowed by Cath. II. for 600 students. It has also 70 churches. It is an archbishop's see. Tver is 99 miles WNW. of Moscow, and 272 SE. of Petersburg. Lon. 36. 5. E. Lat. 56. 7. N.

TVERSKOI, an extensive province or government of Russia, in Siberia, bounded on the N. by Novogorodskoe, E. by Jaroslavlskoe, and Uladimirskoe; S. by Moscovkaia and Smolenkoe; W. by Pskovskoe; being in all about 180 miles long, and 100 broad. Lon. from 50° 20' to 56° E. Ferro. Lat. 55° 36' to 58° 30' N.

TVERTZA, a river of Russia, which runs into the Volga, at Tver.

TUERYE, a town of the French empire in the dep. of Mont Blanc, 4 miles E. of Chambéry.

(1.) * **TUESDAY**. *n. f.* [*tuesday*, Saxon; *tuy*, Saxon, is Mars.] The third day of the week.

(2.) **TUESDAY**. See **TUSCO**.

TUET, a province of TAFILET.

TUFA,

TUFA, a stone consisting of volcanic ashes concentrated together with various other species of stone. It is of various colours, blackish grey, bluish grey, and yellow; every colour having a different mixture and solidity; but all of them have the bad quality of mouldering down on long exposure to the weather. The yellow kind resists the air less than any other.

TUFANS. See **SIFANS**.

TUFARA, a town of Naples, in Capitanata; 5 miles W. of Volturara.

TUFFE', a town of France, in the dep. of the Sarte; 7 miles SW. of Ferte Bernard.

TUFFENBACH, a town of Stiria; 9 miles S. of Judenburg.

* **TUFT**. *n. f.* [*tuffe*, French.] 1. A number of threads or ribbons, flowery leaves, or any small bodies joined together.—A fine *tuft*, or brush of moss. *Bacon*.—*Tufts* not unlike the beard of a goat. *More*.—A *tuft* of daisies on a flow'ry lea. *Dryd*.—*Tufts* of matted grass. *Dryd*.—A *tuft* of feathers. *Addison*. 2. A cluster; a plump.—A *tuft* of trees. *Sidney*.—The *tuft* of olives. *Shak*.—*Tufts* of trees. *Chapm*.

With high woods the hills were crown'd;

With *tufts* the valleys. *Milt*.

—Under a *tuft* of shade. *Milton*.

* **TO TUFF**. *v. a.* To adorn with a tuft.—Of solemn oaks, that *tuft* the swelling mounts. *Thomf*.

* **TUFTAFFETY**. *n. s.* [from *tufted* and *taffety*.] A villous kind of silk.—

It had been

Velvet: but it was now, so much ground was seen,

Become *tuftaffety*. *Donne*.

* **TUFTED**. *adj.* [from *tuft*.] Growing in tufts or clusters.—*Tufted* grove. *Milton*.—*Tufted* trees. *Milt*. and *Pope*.

TUFTONBOROUGH, a town of New Hampshire in Stafford county; on the E. bank of lake Winnipisogee.

* **TUFFY**. *adj.* [from *tuft*.] Adorned with tufts. A word of no authority.—*Tuffy* coat. *Thomson*.

* **TUG**. *n. f.* [from the verb.] Pull performed with the utmost effort.—At the *tug* he falls. *Dryd*.

(1.) * **TO TUG**. *v. a.* [*tigan*, *teogan*, Sax.] 1. To pull with strength long continued in the utmost exertion; to draw.—No more *tug* one another thus. *Chapm*.—He *tugg'd*, he shook till down they came. *Milt*.—*Tug* the laborious oar. *Roscom*. 2. To pull; to pluck.—I mean to *tug* thy beard. *Shak*.—His *tugg'd* ears suffer'd with a strain. *Hud*.

(2.) * **TO TUG**. *v. n.* 1. To pull; to draw.—*Tug* lustily at one oar. *Sandys*.—*Tugging* and pulling. *More*.—Thus galley slaves *tug* willingly at their oar. *Dryden*.—*Tugging* against the stream. *Addis*. 2. To labour; to contend; to struggle.—Let myself and fortune *tug* for the time to come. *Shak*.—*Tugg'd* for life. *Shak*.—*Tugg'd* for their liberty. *Howe*.

(1.) **TUGELOO**, a river of the United States, in Georgia, which rises in the Appalachian mountains, joins the Keowee, and by their united streams forms the large navigable river, the SAVANNAH.

(2.) **TUGELOO**, a town of Georgia, on the above river. Lon. 83. 22. W. Lat. 34. 36. N.

TUGGEN, a town of Switzerland in Glarus.

* **TUGGER**. *n. f.* [from *tug*.] One that tugs or pulls hard.

TUGGURT. See **TOCORT**.

TUGIA, an ancient town of Spain, now called *Toia*. *Plin*. iii. c. 1.

TUGINI, an ancient people of Germany,

TUGULIAN, a town of Russia, near the Straits, which separate the continents of Asia and America.

TUGUZAK, a river of Russia in Upsha, which runs into the Uvelka, 12 miles E. of Troitz.

TUIS, a town of Maritime Austria, in Friuli, 10 miles W. of Udina.

TUISCO, or } a celebrated hero and god of
TUISTON, } the ancient Germans, the MARS or god of war among the Saxons, from whom our TUESDAY is named. (See **POLYTHEISM**, p. 123.)

* **TUITION**. *n. f.* [*tuition*, from *tueor*, Latin.] Guardianship; superintendent care; care of a guardian or tutor.—A folly for a man of wisdom to put himself under the *tuition* of a beast. *Sidney*.—Under my care and tuition. *King Charles*.—Setting ecclesiastical interests wholly out of the *tuition* of the civil. *South*.—Those under whose *tuition* they are. *Locke*.

TUK, a town of Asia, in Charasin.

TUKAM, a town of Courland.

TULA, a city of Russia, capital of the prov. of TULSKOE, seated on the Upsha, near some iron mines; 112 miles S. of Moscow, and 452 SSE. of Peterburg. It has manufactures of fire arms, and leather; and contains 144 churches and convents. Lon. 55. 25. E. Ferro. Lat. 53. 45. N.

TULBAGIA, in botany, a genus of plants, belonging to the class of *Hexandria*, and the order of *Monogynia*.

TULBING, a town of Austria; 4 miles SSE. of Tulln.

TULCISA, a river of ancient Spain, running into the Mediterranean; now called *Francoli*.

TULCZA, a town of European Turkey, in Bulgaria, on the S. bank of the Danube; opposite Ismael.

TULDEN, Theodore VAN, a celebrated Dutch painter, born at Bois-le-Duc, in 1607. He painted historical and ludicrous subjects. He died in 1676.

TULEBRAS, a town of Spain, in Navarre, on the Queios, 7 miles from Tudela.

TULINGI, an ancient people of Germany, who inhabited the country between the Baltic and the Danube. *Ces. de Bel. Gal.* 1. c. 5.

(1.) * **TULIP**. *n. f.* [*tulipe*, Fr. *tulipa*, Lat.] A flower.—The *tulip* opens with the rising, and shuts with the setting sun. *Hakewill*.—*Tulips* of one colour produce some of another. *Brown*.

(II.) **TULIP**, } in botany; (see **BOTANY**, *Index*;) **TULIPA**, } a genus of plants belonging to

the class of *hexandria*, and order of *monogynia*; and in the natural system ranging under the 10th order, *Coronarie*. The corolla is hexapetalous and campanulated, and there is no style. The species of this genus are four; viz.

1. **TULIPA BIFLORA**, the double flowered tulip.

2. **TULIPA BREYNIANA**, the *Cape Tulip*, a native of the *Cape of Good Hope*.

3. **TULIPA GESNERIANA**, *Gesner's Turkey Tulip* of

of *Cappadocia*, or common garden tulip, hath a large, oblong, tunicated, solid, bulbous root, covered with a brown skin, sending up long oval spear-shaped leaves; an upright round stalk, from half a foot to a yard high, garnished with a few leaves, and its top crowned with a large bell-shaped erect hexapetalous flower, of almost all colours and variegations in the different varieties. It is a native of the Levant. This tulip grows freely in the open ground, in a garden. The principal part should be planted in autumn, and the rest towards Christmas, and in Jan. or Feb. Of this species, the varieties may be divided into two principal classes, viz. 1. Early or dwarf spring tulips, (*præcoxa*.) 2. Late-flowering tall tulips, (*ferolina*.)

1. *Early tulips*, flower early in the spring, a month or more before the others; are much shorter stalked, and the flowers smaller; but are in greater reputation for their early bloom and their gay lively colours, both of self-colours, and broken into flaked variegations; such as reds, crimson, scarlet, carnation, violets, purples, yellow, &c. with flowers of each, edged and flaked with red, yellow, and white, in many diversities.

2. *Late-flowering common tulips*, are all of tall growth, supporting large flowers, and furnish an almost endless variety in the vast diversity of colours, after they break from whole blowers into variegations and stripes, exceeding all others of the tulip kind in beauty and elegance of flower. Both these species of tulips are hardy perennials, durable in root, or at least, although the old bulb decays annually, it perpetuates its species by off-sets, and is annual in leaf and stalk; which rising from the bulb early in the spring, arrives to a flowering state in April and May. All the varieties are succeeded by plenty of ripe seed in July and August, contained in an oblong capsule of three cells, having the seeds placed on each other in double rows. By the seeds many new varieties may be raised, which however will not attain a flowering state till they are 7 or 8 years old; and alter that will require 2 or 3 years, or more, to break into variegations, when the approved varieties may be marked, and increased by off-sets of the root. To obtain the beautiful variegations of colour which florists value so highly, the best method is frequent transplantation, i. e. putting them in a soil this season, as directly the opposite as possible of which they were in the former season. The double tulip is also a variety of the common tulip, and is very beautiful, though not in such estimation among the florists as the common single variegated sorts, not possessing such a profusion of variegations in the colours and regularity of stripes.

4. *TULIPA SYLVESTRIS*, or *wild European tulip*, or *Italian yellow tulip*, a native of the S. of Europe, hath an oblong bulbous root, sending up long narrow spear-shaped leaves; and a slender stalk, supporting at top a small yellow flower, nodding on one side, having acute petals.

(III. i.) * *TULIP TREE*. *n. f.* A tree.

(ii.) *TULIP TREE*. See *LIRIODENDRON*.

TULIPOMANIA, [from *tulipa*, and *mania*, madness;] the name given to a kind of gambling traffic in *tulip roots*, which prevailed in Holland and the Netherlands during part of the 17th century.

It was carried on to such an enormous extent, that one root has been sold for 4600 florins, together with a new carriage, two grey horses, and a complete harness. The tulips, however, were seldom delivered. A nobleman bespoke of a merchant a tulip root, to be delivered in six months, at the price of 1000 florins. During these six months the price of that species of tulip must have risen or fallen, or remained as it was. But instead of demanding his tulip then, he paid or received the difference of price. This singular species of gaming could, from its nature, only go to a limited extent. The value of tulip roots began to fall. The sellers were then anxious to deliver the roots in *natura*, but the buyers would not receive them. The consequence was, that tulips very speedily fell to their intrinsic value, and the gambling was at an end.

TULISCHANA, a river of Russia, which runs into the Podkammennaia Tauguska, in Lon. 15. 30. E. Ferro. Lat. 61. 0. N.

TULISKOWO, a town of the late Poland, and palatinate of Kalisch, 16 miles NNE. of Laudick, now annexed to Prussia.

TULL, Jethro, an Oxfordshire gentleman, who projected a new method of culture, to raise repeated crops of wheat from the same land without the necessity of manure; the principles of which he published in *A Treatise on Horse-hoeing Husbandry*.

TULLA, a town of Arabia, in Yemen, 20 miles WNW. of Sana.

TULLAGAN BAY, a bay of Ireland on the W. coast of Mayo county.

TULLAMORE, a town of Ireland, in King's County; on the Cledagh, near the Grand Canal; 18 miles NE. of Banaghin, and 44 W. of Dublin.

TULLES, a city of France, in the department of Correze, ci-devant capital of the Lower Limosin. Its cathedral has a very high and curious steeple. It is seated at the conflux of the Correze and Solane, in a country surrounded by precipitous mountains; on the side of a hill, 37 miles E. of Limoges, and 62 SW. of Clermont. Lon. 1. 42. W. Lat. 45. 23. N.

TULLIA, a daughter of king Servius Tullius, and wife of TARQUIN II. See *ROME*, § 11.

TULLIALLAN, a parish of Perthshire, 4 miles long and 4 broad, containing 4,760 acres, in high cultivation, bounded by the Forth. Kincardine is the chief town. (See *KINCARDINE*, N° 2.) It abounds with excellent free-stone, which has been exported, even to Amsterdam. There are ruins of the castle of Tulliallan. The population, in 1793, was 2,430; increase 1109, since 1755.

TULLIBOLE, a parish of Aberdeenshire, united with FOSSAWAY, in Perthshire.

TULLINS, a town of France, in the dep. of the Isere, 12 miles NNE. of St Marcelin, and 12 NW. of Grenoble.

TULLIOLA, a daughter of Cicero, who died A. A. C. 44.

(1.) *TULLIUS*, M. See *CICERO*.

(2.) *TULLIUS, SERVIVS*, the 6th and best king of Rome. See *ROME*, § 11.

TULLN, a town of Austria, on a river so named, 15 miles NW. of Vienna. Lon. 16. 6. E. Lat. 48. 14. N.

TULLOCH,

TULLOCH, a parish of Aberdeenshire, united with those of **GLENCAIRN** and **GLENMUICK**. See these articles.

TULLOCH-ARD, a high mountain of Scotland, in Ross-shire, and district of Kintail. Its top, in ancient times was used as a kind of TELEGRAPH; or, in cases of sudden invasion, a barrel of tar was kindled upon it, and in 24 hours all Seaforth's tenants appeared at *St Donan Castle* in arms.

TULLOW, a town of Ireland, in Carlow; 8 miles ESE. of Carlow, and 38 SSW. of Dublin.

TULLUS HOSTILIUS, the 3d king of Rome, see **ROME**, § 8.

(1.) **TULLY**. See **CICERO**.

(2.) **TULLY**, in geography, a military township of New York, in **ONONDAGO** county.

TULLYCLEA, a river of Ireland, in Fermanagh county, which runs into Lough Erne, 4 miles N. of Inniskillen.

TULLYNESSLE, a parish of Aberdeenshire, 4 miles long, and 2½ broad, seated on the banks of the **Don**. The surface is mountainous on the N. and W. The soil is a light loam, pretty fertile. The hills are covered with heath, and abound with deers, hares, and other game. In 1791, the population was 396; increase 127, since 1755.

TULOMA, a river of Russia, which runs into Lake Ladoga; 2 miles NW. of Olonetz.

TULON, a town of Tibet; 45 m. E. of Tankia.

TULSK, a town of Ireland, in Roscommon county; 9 miles N. of Roscommon, and 11 SW. of Carrick.

TULSKOE, a government of Russia; bounded N. by Moscowkaia, E. by Riazanskoe, and Tambovskoe; S. by Orlovskoe, and W. by Kaluskoe; 130 miles long, and from 40 to 100 broad. **TULA** is the capital. Lon. 54° to 55° 36' E. Ferro. Lat. 53° to 55° N.

TULUN, a town of Russia in Irkutskoe, on the Tja, 44 miles E. of Niznei Udinsk.

TUMANSKOI, a triangular island of Russia in the Frozen Ocean, N. of Kiriach ille, 360 miles in circuit. Lon. 137° to 144° E. Ferro. Lat. 71. 50. to 73. 15.

TUMAR, *n. f.* in the language of Bengal, rent-roll or assessment.

TUMBERIDIPAL, a town of Hindoostan, in Myfore, 22 miles N. of Daraporum; now in the British dominions.

(1.) **TUMBEZ**, a navigable river of Peru, which rises in the Cordilleras, and runs into the Bay of GUAYAQUIL, opposite *St Clare* island.

(2.) **TUMBEZ**, a town of Peru, in the jurisdiction of Peira, on the banks of the above river. The houses are built of canes.

TUMBHUDRA, a river of Indooftan, in Myfore.

* **TUMBLE**. *n. f.* [from the verb.] A fall.—An unlucky tumble from a tree. *L'Estrange*.

(1.) * **To TUMBLE**. *v. n.* [*tomber*, Fr. *tommelen*, Dutch; *tombolare*, Italian.] 1. To fall; to come suddenly and violently to the ground.—Nature's germins tumble all together. *Shak*.—To stand or walk, to rise or tumble. *Prior*.—It immediately tumbles to the bottom. *Addison*. 2. To fall in great quantities tumultuously.—Riches come tumbling upon a man. *Bacon*. 3. To roll about.—

Well he might tumble and tofs. *Sidney*.—The tumbling billows of the main. *Shak*. 3. To play tricks by various librations of the body.—They'll leave their tumbling. *Roscoe*.

(2.) * **To TUMBLE**. *v. a.* 1. To turn over; to throw about by way of examination.—Tumbling it over and over in his thoughts. *Bacon*.—By tumbling his thoughts. *Collier*.—They tumbled all their little quivers o'er. *Prior*. 2. To throw by chance or violence.—Ideas are sometimes rouzed and tumbled out of their dark cells. *Locke*. 3. To throw down.—To tumble down thy husband and thyself. *Shak*.—Was tumbled on the plain. *Dryd*.—If a greater force tumbles him down. *Locke*.

TUMBLE-DUNG, in entomology. See **SCARABEUS**, N° 3.

* **TUMBLER**. *n. f.* [from *tumble*.] 1. One who shews postures by various contortions of body, or feats of activity.—Common tumblers and dancers on the rope. *Wilkins*.—The nimblest tumblers or rope-dancers. *Arbutnot*.—Never by tumblers through the hoops was shown. *Pope*. 2. A large drinking glass.

(1.) * **TUMBREL**. *n. f.* [*tombreau*, Fr.] A dung-cart.—Twifallow once ended, get tumbrel and man. *Tusser*.—My crops is in a tumbrel laid. *Dryd*.—What shall I do with this beastly tumbrel? *Congr*.—He sometimes rode in an open tumbrel. *Tatler*.

(2.) **TUMBREL** is also a kind of carriage with two wheels, used in artillery, to carry the tools of the pioneers, &c. or the money of an army.

* **TUMEFACATION**. *n. f.* [*tumefactio*, Latin.] Swelling.—*Tumefactions* in the whole body. *Arb*.

* **To TUMEFY**. *v. a.* [*tumefacio*, Latin.] To swell; to make to swell.—The tumefied joint. *Wifeman*.—The lungs were knotted and tumefied. *Blackmore*.—A fleshy excrescence, exceeding hard and tumefied. *Sharp*.

TUMEN, a town of Persia, in Ghilan; 18 miles W. of Reshd.

* **TUMID**. *adj.* [*tumidus*, Lat.] 1. Swelling; puffed up. 2. Protuberant; raised above the level.—The tumid hills. *Milt*. 3. Pompous; boastful; puffy; falsely sublime.—Such expressions may seem tumid and aspiring. *Boyle*.

TUMMARAH, a town of Africa, in Zaara.

(1.) **TUMMEL**, a large river of Perthshire, which rises from **LOCH RANNOCH**, and after running E. through Athol, falls into the **TAY** at **LOGIE RAIT**.

(2.) **TUMMEL**, **LOCH**, a lake formed by the spreading of the above river about the middle of its course.

(1.) **TUMOR**, or **TUMOUR**, (§ 3.) See **MEDICINE**, Index.

(2.) **TUMOR**, in farriery. See **FARRIERY**.

(3.) * **TUMOUR**. *n. f.* [*tumor*, Lat.] 1. A morbid swelling.—*Tumour* is a disease, in which the parts recede from their natural state by an undue increase of their bigness. *Wifeman*.—Having seen what it is that feeds the tumour. *Gov. of the Tongue*.—Knots and tumours in any part of the body. *Blackmore*. 2. Affected pomp; false magnificence; puffy grandeur; swelling mien; unsubstantial greatness.—His stile was far from the tumour. *Wotton*.—*Tumour* and bold looks. *L'Estr*.

* **TUMOUROUS**. *adj.* [from *tumour*.] 1. Swelling;

ling; protuberant.—A pin small below and above, and tumorous in the middle. *Wotton*. 2. Fastuous; vainly pompous; falsely magnificent.—Vast and tumours, speaking of petty and inferior things. *Ben Jonson*.—Sublime and almost tumorous in his looks and gestures. *Wotton*.

* To TUMP, among gardeners, to fence trees about with earth.

TUMPACH, a town of Bavaria, in the Upper Palatinate; 2 miles ENE. of Nuremberg, and 17 NNW. of Amberg.

* To TUMULATE. *v. n.* [*tumulo*, Lat.] To swell. This seems to be the sense here, but I suspect the word to be wrong.—Urinous spirits, or volatile alkalis, as soon as they are put together, tumble and grow hot. *Boyle*.

* TUMULOSE. *adj.* [*tumulosus*, Lat.] Full of hills. *Bailey*.

* TUMULOSITY. *n. f.* [*tumulosus*, Lat.] Hilliness. *Bailey*.

(1.) * TUMULT. *n. f.* [*tumulte*, Fr. *tumultus*, Latin.] 1. A promiscuous commotion in a multitude.—A tumult is improved into a rebellion. *L'Estrange*.—Till in loud tumult all the Greeks arose. *Pope*. 2. A multitude put into wild commotion. 3. A stir; an irregular violence; a wild commotion.—What tumults in the heavens? *Shak*.—Tumult and confusion, all embroil'd. *Milton*.—A tumult among the elements. *Addison*.

(2.) TUMULT. See MOB.

* TUMULTUARILY. *adv.* [from *tumultuary*.] In a tumultuary manner.

* TUMULTUARINESS. *n. f.* [from *tumultuary*.] Turbulence; inclination or disposition to tumults or commotions.—The tumultuaries of the people. *K. Charles*.

* TUMULTUARY. *adj.* [*tumultuaire*, Fr. from *tumult*.] 1. Disorderly; promiscuous; confused.—Orderly, and not tumultuary arming. *Bacon*.—A tumultuary conflict. *King Charles*.—tumultuary agitations. *Glanv*. 2. Restless; put into irregular commotion.—In a tumultuary and restless state. *Atterbury*.

* To TUMULTUATE. *v. n.* [*tumultuor*, Lat.] To make a tumult.

* TUMULTUATION. *n. f.* [from *tumultuate*.] Irregular and confused agitation.—Sudden and eager tumultuation. *Boyle*.

* TUMULTUOUS. *adj.* [from *tumult*; *tumultueux*, Fr.] 1. Violently carried on by disorderly multitudes.—Civil broils, and tumultuous rebellions. *Spenser*. 2. Put into violent commotion; irregularly and confusedly agitated.—Some tumultuous cloud. *Milton*.—His tumultuous breath. *Milton*.—In such tumultuous tides. *Addison*. 3. Turbulent; violent.—This tumultuous strife. *Shak*.—Tumultuous speech. *Knolles*. 4. Full of tumults.—A tumultuous kingdom. *Sidney*.

* TUMULTUOUSLY. *adv.* [from *tumultuous*.] By act of the multitude; with confusion and violence.—It was done by edict, not tumultuously. *Bacon*.

(1.) * TUN. *n. f.* [*tunne*, Sax. *tonne*, Dut. *tonne*, *tonneau*, Fr.] 1. A large cask.—A heap of powder, laid.—Fit for the tun. *Milt*. 2. A pipe; the measure of two hogheads. 3. Any large quantity proverbially.—Tuns of blood. *Shak*. 4. A drunkard; in burlesque.—A tun of midnight-work.

Dryden. 5. The weight of two thousand pounds. 6. A cubic space in a ship, supposed to contain a tun.—A boat of ten tuns cannot be brought into the haven. *Heylyn*. 7. *Dryden* has used it for a geometrical measure, I believe without precedent or propriety.—A tun about was every pillar there. *Dryden*.

(2.) TUN, a large vessel or cask, of an oblong form, biggest in the middle, and diminishing towards its two ends, girt about with hoops, and used for stowing several kinds of merchandize for convenience of carriage; as brandy, oil, sugar, skins, hats, &c.

(3.) TUN is also the name of a measure. A ton of wine is four hogheads; of timber, a square of 40 solid feet; and of coals, 20 cwt.

(4.) TUN is also a certain weight whereby the burden of ships, &c. are estimated.

* To TUN. *v. a.* [from the noun.] To put into casks; to barrel.—While it worketh, before it be tunned. *Bacon*.—The same fermented juice tunned up, arms itself with tartar. *Boyle*.

(1.) TUNA, a town of Arabia, in Hedsjas.

(2.) TUNA, an island of Egypt, in lake Tennis.

(3.) TUNA, a town in the above island.

(4.) TUNA, a town of Norway, on the Glanmen, 2 miles NE. of Frederickstadt.

(5.) TUNA, a town of Sweden, in Dalecarlia: 13 miles S. of Fahlun.

(6.) TUNA, a town of Sweden, in Smaland; 56 miles N. of Calmar.

* TUNABLE. *adj.* [from *tune*.] Harmonious; musical.—A cry more tunable. *Shak*.—And tunable as sylvan pipe or song. *Milton*.—Tunable sounds. *Holder*.—Not altogether tunable to a modern ear. *Garth*.

* TUNABLENESS. *n. f.* [from *tunable*.] Harmony; melodiousness.

* TUNABLY. *adv.* [from *tunable*.] Harmoniously; melodiously.

TUNBO, a town of Sweden, in Sudermanland; 50 miles W. of Stockholm.

(1.) TUNBRIDGE, a town of Kent, on a branch of the Medway, over which there is a bridge. It is a large well built place, noted for the mineral waters, 4 or 5 miles S. of the town. Lon. o. 20. E. Lat. 51. 14. N.

(2.) TUNBRIDGE WELLS, a town of Kent, 5 miles S. of Tunbridge, but in the same parish. In June, July, and August, it is much frequented for its mineral waters, which were discovered by Dudley lord North, in 1606.

TUNDERGARTH. See TONDERGARTH.

(1.) * TUNE. *n. f.* [*toon*, Dut. *ton*, Swed. *tonne*, Ital. *tone*, Fr. *tonus*, Lat.] 1. Tune is a diversity of notes put together. *Locke*.—Whose difform tune bereft my vital pow'rs? *Shak*.—Tunes and airs have in themselves some affinity with the affections. *Bacon*.—After the heavenly tune. *Milton*.—The tune I still retain. *Dryden*.—The disposition in the fiddle to play tunes. *Arbutnot*. 2. Sound; note.—As loud, and to as many tunes. *Shak*. 3. Harmony; order; concert of parts.—Keep the commonwealth in tune. *King Charles*. 4. State of giving the due sounds; as, the fiddle is in tune, or out of tune.—Proper state for use or application; right disposition; fit temper; proper humour.—A child will learn three times as much when he is in

in *tune*. *Locke*. 6. State of any thing with respect to order.—*Lear*, in his better *tune*. *Shak*.

(1.) *TUNE*. See *MUSIC* and *TONE*.

(1.) * *To TUNE*. *v. a.* [from the noun.] 1. To put into such a state as that the proper sounds may be produced.—*Harp*s ever *tun'd*. *Milton*.—*Tune* your harps. *Dryden*. 2. To sing harmoniously.—*Warbling tune* his praise. *Milton*.—*Tune* your *io* *Poëans*. *Dryden*.—Leave such to *tune* their own dull rhymes. *Pope*. 3. To put into order, so as to produce the proper effect.

(2.) * *To TUNE*. *v. n.* 1. To form one sound to another.—*Whilst tuning* to the waters fall. *Drayton*.—*Temper'd soft tunings*, intermix'd with voice. *Milton*. 2. To utter with the voice inarticulate harmony.

* *TUNEFUL*. *adj.* [tune and full.] Musical; harmonious.—*With chant of tuneful birds*. *Milt*.—*And birds to lay of love their tuneful notes apply*. *Dryden*.—*Thy tuneful sons*. *Prior*.—*Mute the tuneful tongue*. *Pope*.

TUNKA, a town of Russia, in the prov. of Irkutsk, on the *Ilem*; 84 miles N. of Balagenskoi.

* *TUNELESS*. *adj.* [from *tune*.] Unharmonious; unmusical.—*My tuneless harp*. *Spenser*.—*Thy tuneless serenade*? *Cowley*.

* *TUNER*. *n. f.* [from *tuner*.] One who tunes.—*New tuners* of accents. *Shak*.

TUNETTA, an ancient town of Africa, near which *REGULUS*, the celebrated Roman general, was defeated and taken prisoner, by *Xanthippus*. *Liv.* 30. c. 9. It is now called *Tunis*.

TUNGA, a town of Africa, in *Tunis*.

TUNGEHADRA, a river of Hindoostan, in *Golconda*, which runs into the *Kistnah*, 7 miles E. of *Rachore*.

TUNGINSKOI, a town of Russia, on the *Irkut*, 30 miles SW. of *Irkutsk*; and 800 ESE. of *Kolivan*.

TUNGRI, an ancient nation of Germany, who lived on the banks of the *Maëse*, or of the *Spaw*. Their capital was called *Atuatua*, now *TONGREEN*.

TUNGSTAS, } *n. f.* a salt formed by the u-
TUNGSTAT, } nion of the *TUNGSTIC ACID*,
with different bases.

1. *TUNGSTAT OF IRON AND MANGANESE*. See *MINERALOGY*, *Part. II. Chap. VII. Gen. I. Sp. 1*. This species was first called *WOLFRAM*.

2. *TUNGSTAT OF LIME*. See *MINERALOGY*, as above, *Gen. I. Sp. 2*.

3. *TUNGSTAT OF LIME, BROWN*. See *MINERALOGY*, as above, *Sp. 3*.

(1.) *TUNGSTEN*, *n. f.* one of the 22 METALS, discovered and ascertained, as distinct from earths, stones and all other minerals, by the industry of modern Chemists. "There is a mineral," (says *Dr Thomson*) found in Sweden of an opaque white colour, and great weight, from which last circumstance it got the name of *tungsten* or *ponderous stone*. *Scheele* analysed it in 1781, and found it was composed of lime and a peculiar earthy-like substance, which he called from its properties *TUNGSTIC ACID*. *Bergman* conjectured that the basis of this acid is a metal; and this conjecture was soon after confirmed by the experiments of Messrs *D'Elhuyarts*, who obtained the same substance from a mineral of a brownish black colour,

VOL. XXII. PART II.

called by the Germans *WOLFRAM*, which is sometimes found in tin mines. This mineral they found to contain $\frac{1}{3}$ of tungstic acid: the rest of it consisted of manganese, iron and tin. This acid substance they mixed with charcoal powder, and beat violently in a crucible. On opening the crucible, after it had cooled, they found in it a button of metal of a dark brown colour, which crumbled to powder between the fingers. On viewing it with a glass, they found it to consist of a congeries of metallic globules, some of which were as large as a pin's head. The metal thus obtained is called *tungsten*. The manner in which it was produced is evident: tungstic acid is composed of oxygen and tungsten; the oxygen combined with the carbon and left the metal in a state of purity.—*TUNGSTEN*, called by the German chemists *SCHÆLLUM*, is of a greyish white colour, and has a good deal of brilliancy. It is one of the hardest of the metals; for *Vauquelin* and *Hecht* could scarcely make any impression upon it with a file. It seems also to be brittle. Its specific gravity, according to the *D'Elhuyarts*, is 17.6: but this is doubtful, without farther experiments. It requires for fusion a temperature of at least 170° Wedg. It seems to have the property of crystallizing on cooling, like all the other metals: for the imperfect button, procured by *Vauquelin*, contained a great number of small crystals. It is not attracted by the magnet. When heated in an open vessel, it gradually absorbs oxygen, and is converted into an oxide. Tungsten is capable of combining with a different proportions of oxygen, and of forming a different oxides; the black and the yellow." See *TUNGSTIC ACID*; *METALLURGY*, *Part I. Sect. I*; and *MINERALOGY*, *Part III. Chap. IV. § XVII.* and *Sect V. § 17*.

(2.) *TUNGSTEN*, COMBINATIONS OF. "The *Elhuyarts* alone" (says *Dr Thomson*), "attempted to combine tungsten with other metals. They mixed 100 gr. of the metals to be employed, with 50 gr. of the yellow oxide of tungsten, and a quantity of charcoal, and heated the mixture in a crucible. The result of their experiments is as follows: 1. With *GOLD* and *PLATINUM* the tungsten did not combine. 2. With *SILVER* it formed a button of a whitish brown colour, something spongy, which with a few strokes of a hammer extended easily, but on continuing them it split in pieces. The button weighed 144 grains. 3. With *COPPER* it gave a button of a copperish red, which approached to a dark brown, was spongy, and pretty ductile, and weighed 123 gr. 4. With crude or cast *IRON*, of a white quality, it gave a perfect button, the fracture of which was compact, and of a whitish brown colour; it was hard, harsh, and weighed 137 gr. 5. With *LEAD* it formed a button of a dull dark brown, with very little lustre, spongy, very ductile, and splitting into leaves when hammered; it weighed 127 gr. 6. The button formed with *TIN* was of a lighter brown than the last, very spongy, somewhat ductile, and weighed 128 gr. 7. That with *ANTIMONY* was of a dark brown colour, shining, something spongy, harsh, and broke in pieces easily: it weighed 108 gr. 8. That of *BI SMUTH* presented a fracture which, when seen in one light, was

T t t

of

of a dark brown colour, with the lustre of a metal, and in another appeared like earth without any lustre; but in both cases one could discover an infinity of little holes over the whole mass. This button was pretty hard, harsh, and weighed 68 gr. 9. With MANGANESE it gave a button of a dark bluish brown colour and earthy aspect: on examining the internal part of it with a lens, it resembled impure drops of iron: it weighed 107 gr. "PHOSPHORUS is capable of combining with tungsten; but none of the properties of the phosphuret have been ascertained."

(3.) TUNGSTEN, ORES, OXIDES, AND SALT OF. See MINERALOGY, Part II. Ord. XVII. Gen. I. Sp. 1. 2. Part III. Chap. IV. § XVII. Chap. V. § 17.

(4.) TUNGSTEN SULPHURET OF. The sulphuret of tungsten is of a bluish black colour, hard, and capable of crystallizing.

(1.) TUNGSTIC. *adj.* [from tungsten.] Of or belonging to tungsten: containing the essence of that metal.

(2.) TUNGSTIC ACID, in chemistry, a new acid lately supposed to be discovered, extracted from the new metal called TUNGSTEN. Of this acid, the ingenious Dr Thomas Thomson gives the following account, in his *Syst. of Chem.* vol. 2. p. 87, 88. "The substance, called *Tungstic Acid*, by Scheele and Bergman, was discovered by Scheele in 1781. This philosopher obtained it from TUNGSTAT OF LIME, by treating it with nitric acid and with ammonia alternately. The acid dissolves the lime, and the ammonia combines with the tungstic acid. The ammoniacal solution, when saturated with nitric or muriatic acid, deposits a white powder, which is the TUNGSTIC ACID of Scheele. This powder has an acid taste, it reddens vegetable blues, and is soluble in 20 parts of boiling water." But the *D'Eibuyarts* have demonstrated, that this pretended acid is a compound of yellow oxid of tungsten, the alkali employed to dissolve it, and the acid used to precipitate it. Thus when prepared according to the above process, it is a compound of yellow oxide, ammonia, and nitric acid. Their conclusions have been more lately confirmed by the experiments of Vauquelin and Hecht. This substance must therefore be erased from the list of acids, and placed among the salts. The real ACID OF TUNGSTEN is a yellow powder; the method of procuring which and its properties are thus described by Dr Thomson, vol. I. p. 215. "The black oxide of tungsten, (says Dr Thomson) which contains the smallest proportion of oxygen, may be obtained by heating the yellow oxide for some hours in a covered crucible. The yellow oxide, known also by the name of *Tungstic Acid*, is found native in WOLFRAM, and may be obtained from it by boiling 3 parts of muriatic acid in one part of wolfram. The acid is to be decanted in about half an hour, and allowed to settle. A yellow powder gradually precipitates. This powder is to be dissolved in ammonia, the solution, is to be evaporated to dryness, and the mass kept for some time in a red heat. It is then yellow oxide in a state of purity. This oxide has no taste. It is insoluble in water, but remains long suspended in that liquid, forming a kind of

yellow milk, which has no action on vegetable colours. When heated in a platinum spoon it becomes dark green; but before the blow-pipe on charcoal, it acquires a black colour. It is composed of 80 parts of tungsten and 30 of oxygen. Its specific gravity is 6.12."

TUNG-TCHOUEN, a city of China, of the first rank, capital of the prov. of Se-tchuen. Lon. 102. 25. E. Lat. 27. 30. N.

TUNGURAGUA, a mountain of Peru, 21 m. N. of Rio-Bamba.

TUNGUSES. See TARTARY, § 2.

TUNGUSIANS. See TONGUSIANS.

(1.) TUNGUSKA, NIZNEI, a river of Russia, in Irkutskoe, which rises 64 miles W. of Kirensk, and runs into the Enisei, 8 m. S. of Turuchansk.

(2.) TUNGUSKA, PODKANENSKAJA, a river of Russia, which runs into the Enisei, 200 miles below Eniseisk.

TUNGUSTI, a town of Russia, in Tobolskoi, on the Ob: 56 miles S. of Tara.

TUNIA, or, a town of New Grenada, 30 miles TUNJA, § SW. of Truxillo.

(1.) TUNICA, a kind of waistcoat or under garment, in use among the Romans. They wore it within doors by itself, and abroad under the gown. The common people could not afford the toga, and so went in their tunics; whence Horace calls them *populus tunicatus*.

(2.) TUNICA, in anatomy, is applied to the membranes which invest the vessels, and divers others of the less solid parts of the body; thus the intestines are formed of five tunics or coats.

(3.) TUNICA ARACHOIDES. See ANATOMY, Index.

(4.) TUNICA VAGINALIS TESTIS. See SURGERY, § 596.

(1.) * TUNICK. *n. f.* [tunique, Fr. tunica, Lat.] 1. Part of the Roman dress.—The *tunicks* of the Romans, which answer to our waistcoats, were without ornaments, and with very short sleeves. *Arbuth.* 2. Natural covering; integument; tunicle.—The intern *tunic* of the gullet. *Harvey.*—Well fenced with neat and close *tunicks*. *Derham.*

(2.) TUNICK. See TOGA.

* TUNICLE. *n. f.* [from *tunick*.] Natural cover; integument.—The humours and *tunicles* are purely transparent. *Ray.*—Four or five distinct plant. under one common *tunicle*. *Bentley.*

(1.) TUNING, *part. n. f.* See MONOCHORD, § 2.

(2.) TUNING OF KEYED INSTRUMENTS. The method of tuning any instrument by means of the monochord is as follows: First, you must tune the C of the monochord to the concert pitch by means of a tuning fork; next, you are to put the middle C of your instrument in perfect unison with the C of the monochord: Then move the sliding fret to the next division on the scale, and proceed in the same manner with all the several notes and half notes within the compass of an octave. When this is done with accuracy, the other keys are all to be tuned, by comparing them with the octave which is already tempered. The monochord is here supposed to be made to the pitch of C; but this may be varied at the will of the constructor.

TUNICK,

TUNIOK, a town of Hungary, seated on the *Samos*, 6 miles E. of *Etfed*.

(1.) **TUNIS**, a country of Africa, in Barbary, bounded on the N. and E. by the Mediterranean and the kingdom of Tripoli, on the S. by several tribes of the Arabs, and on the W. by Algiers and the country of *Esfab*; being 300 miles long from E. to W. and 250 in breadth from N. to S. This country was formerly a monarchy; but a difference arising between a king and his son, one of whom was for the protection of the Christians, and the other for that of the Turks, in 1574 the inhabitants shook off the yoke of both. From this time it became a republic under the protection of the Turks, and pays a certain tribute to the *bashaw* who resides at *Tunis*. The air in general is healthy; but the soil in the eastern parts is indifferent for want of water. Towards the middle the mountains and valleys abound in fruits; but the western part is the most fertile, because it is watered with rivers. The environs of *Tunis* are very dry, upon which account corn is generally dear. The inroads of the Arabs oblige the inhabitants to sow their barley and rye in the suburbs, and to inclose their gardens with walls. However, there are plenty of citrons, lemons, oranges, dates, grapes, and other fruits. There are also olive-trees, roses, and odoriferous plants. In the woods and mountains there are lions, wild bees, ostriches, monkeys, camels, roebucks, hares, pheasants, partridges, and other sorts of birds and beasts. The most remarkable rivers are the *Guadilcarbar*, *Magrida*, *Magerada*, and *Caps*. The form of government is aristocratic; that is, by a council, whose president is the *dey*, not unlike the *doge* of Venice. The members of the *divan* or council are chosen by the *dey*, and he in his turn is elected by the *divan*; which is composed of soldiers, who have more than once taken off the *dey's* head. The *bashaw* is a Turk, residing at *Tunis*. The inhabitants carry on a great trade in linen and woollen cloth. They also have a trade in horses, olives, oil, soap, ostriches eggs and feathers. The principal religion is *Marometanism*; but the inhabitants consist of Moors, Turks, Arabs, Jews, and Christian slaves.

(2.) **TUNIS**, a large and celebrated city, the capital of a kingdom of the same name. It is seated on the point of the gulph of *Goletta*, about 8 miles from the place where the city of *Carthage* stood. It is in the form of a long square, and is about 4 miles in circumference, with 10 large streets, 5 gates, and 35 mosques. The houses are all built with stone, though but not very high; but the walls are very lofty, andanked with several strong towers. It has a good *adel*, and is said to contain 300,000 inhabitants, of whom 30,000 are Jews. Lon. 10. 16. E. Lat. 6. 42. N.

TUNISIANS. *n. f. plur.* the people of *TUNIS*.
TUNKAT. See *TONCAT*.

TUNKERS, a religious sect of baptists in Pennsylvania, so called from the word *tunker*, to put morfel in fauce. They are also called *tumblers*, because in performing baptism they plunge the person into the water with the head first. As the Germans found the letters *t* and *b* like *d* and *p*, the words *tunkers* and *tumblers*, have been some-

times written *dunkers* and *dumplers*. Their church government and discipline are the same with those of the English baptists, except that every brother is allowed to speak in the congregation, and the best speaker is usually ordained to be their minister. They are a harmless, well meaning people.

(1.) * **TUNNAGE**. *n. f.* [from *tun*.] 1. Content of a vessel measured by the ton.—Bulk and *tunnage* of their shipping. *Arbutb.* 2. Tax laid by a *tun*; as, to levy *tunnage* and poundage.

(2.) **TUNNAGE**. See *TONNAGE*.

* **TUNNEL**. *n. f.* 1. The shaft of a chimney; the passage for the smoke.—And one great chimney, whose long *tunnel* thence. *Spenser*.—The smoke, might linger in the *tunnel*. *Wotton*. 2. A funnel; a pipe by which liquor is poured into vessels.—Make an instrument like a *tunnel*. *Bacon*. 3. A net wide at the mouth, and ending in a point, and so resembling a funnel or tunnel.

* **To TUNNEL**. *v. a.* [from the noun.] 1. To form like a tunnel.—*Tunnelled*, convolved leaves. *Derham*. 2. To catch in a net. 3. This word is used by *Derham* for to make net-work; to reticulate.—Some birds curiously *tunnel* the fibrous parts of vegetables into nests. *Derham*.

(1.) * **TUNNY**. *n. f.* [*tonnen*, Ital. *thynnus*, Lat.] A sea-fish.—*Tunny* and turbot. *Carreau*.

(2.) **TUNNY**, in ichthyology. See *SCOMBER*, N° 2.

(3.) **TUNNY**, FISHING. See *FISHERY*, § 12. and *SCOMBER*, N° 2.

TUNS, in geography, islets or rocks in *St George's Channel*, near the coast of *Wexfordshire*, *Ireland*; 3 miles NE. of the *SALTES* Islands.

TUNSTALL, James, D. D. a learned English divine, born in 1720, and educated at *St John's College*, Cambridge. He became rector of *Stwimmer* in *Essex*, in 1739, and public orator of the university, in 1741. He wrote *Academica*, or *Discourses upon Natural and Revealed Religion*, and several other works: and died in 1772.

(1.) * **TUP**. *n. f.* [I know not of what original.] A ram. This word is yet used in *Staffordshire*, and in other provinces.

(2.) **TUP**, in zoology. See *ARIES*, N° 2; *OVIS*, § II. N° 1. § IV. N° ii. *RAM*. § 1; and *SHEEP*, § 8, and II.

* **To TUP**. *v. n.* To but like a ram.

TUPERSDORF, a town of Upper Saxony, in *Vogtland*; 4 miles NE. of *Oelnitz*.

TUPES, a town of Bohemia, in the circle of *Chrudim*; 8 miles NW. of *Chrudim*.

(1.) **TURA**, a town of Germany in *Tirol*, 34 miles SW. of *Trent*, and 9 SW. of *Riva*.

(2.) **TURA**, an island, in the Grecian archipelago. Lon. 42. 1. E. Ferro. Lat. 39. 34. N.

(3.) **TURA**, a town of Hungary, 24 miles W. of *Topoltzan*.

(4.) **TURA**, a river of Russia, which rises 40 miles NW. of *Verchotura*, in the prov. of *Ekaterinenburg*; and runs into the *Tobol*, opposite *Turchanskoi*, in *Tobolskoi*.

TURAN, or *DURAN*, a country of *Hindoostan*, extending between *India* and *Persia*, and possessed by the *AFGHANS*. It was for many years prosperously governed by their monarch, *Abdalab*, who strengthened himself by forming

an alliance with the celebrated usurper KOU-LI Khan, or NADIR Shah, which was strictly observed till the death of Nadir, which he even attempted to *revenge*. Abdallah was succeeded by *Ahmed*, who was still more successful, and in a few months conquered all the countries which the Mogul had been forced to cede to Nadir. He also conquered the whole province of LAHORE, and laid DELHI under a contribution, in 1755. He also took the famous city of *Matra*, the reputed birth-place of the Hindoo deity, *Krishen*, the APOLLO of the Hindoos, and sacrificed to the *Gobia*, the *Muses* of Indostan. In 1761, his son *Timur* having been defeated by a party of Maharrattas, under the famous *Roganaut Row*, Ahmed became the head of a combination of Indian princes, who united to oppose the over-grown power of the MAHARRATTAS, whom he totally overthrew in a bloody battle, wherein above 50,000 of them were killed on the spot. In 1762, he again crossed the Indus, to exterminate the SEIKS, a tribe of Hindoos, who profess *Deism*, and on that account are hated by the superstitious Mahometans. He accordingly defeated them with great slaughter, and in the true spirit of bigotry, massacred the prisoners and piled up their heads in pyramids. At last this bloody conqueror died of an ulcer in his face on the 15th July 1773; and was succeeded by *Timur*. But since the death of Ahmed, the Afghans of Turan have made no figure in Indian history.

TURANO, a town of Naples, in Calabria Citra: 3 miles W. of Bisignano.

TURATTE, a powerful kingdom, in the island of Celebes; with its capital city, of the same name; 60 miles N. of MACASSAR.

(1.) TURBAN. *n. f.* [from *turban*, the eastern nations. It consists of two parts, a cap and fast of fine linen or taffety, artfully wound in divers plaits about the cap. The cap has no brim, is pretty flat, though roundish at top, and quilted with cotton; but does not cover the ears. The fast of the Turks turban is white linen; that of the Persians red woollen. These are the distinguishing marks of their different religions; Sophi king of Persia, being of the sect of Ali, was the first who assumed the red colour, to distinguish himself from the Turks, who are of the sect of Omar, and whom the Persian esteem heretics.

(2.) *TURBAN. } TURBANT. *n. f.* [A Turkish

(3.) *TURBAND. } word.] The cover worn by the Turks on their heads.—Keep their impious turbans on. *Shak*—His hat was in the form of a *turban*. *Bacon*.—Dusk faces with white silken turbans wreath'd. *Milton*.—I see the Turk nodding with his *turban*. *Howel*.—For folded turbans finest Holland bear. *Dryden*.

*TURBANED. *adj.* [from *turban*.] Wearing a turban.—A *turban'd* Turk. *Shak*.

*TURBANT. *See* TURBAN.

*TURBARY. *n. f.* [*tubaria*, low Latin; from *turf*.] The right of digging turf. *Skinner*.

TURBED, a town of Persia, in the province of Chorasán; 90 miles SSW. of Meshid.

TURBICO, a town of the Italian kingdom, in the department of the Olona, and ci-devant duchy of Milan; 13 miles W. of Milan.

*TURBID. *adj.* [*turbidus*, Lat.] Thick; muddy; not clear.—Lees make the liquid *turbid*. *Bac*.—*Turbid* streaming clouds of smoke. *Phil*.—Springs, before clear, fresh, and limpid, became thick and *turbid*. *Woodward*.

*TURBIDNESS. *n. f.* [from *turbid*.] Muddiness; thickness.

TURBIDO, Francis, an eminent Italian painter, born at Verona, in 1500. He studied under Giorgione and Veronese. He painted in oil and in fresco. His best piece is a *Transfiguration*. He died in 1581.

*TURBINATED. *adj.* [*turbinatus*, Latin.] 1. Twisted; spiral; passing from narrower to wider.—A spiral and *turbinated* motion of the whole moved body. *Bentley*. 2. Among botanists, plants are called *turbinated*, as some parts of them resemble, or are of a conical figure. *Di3*.

*TURBINATION. *n. f.* [from *turbinated*.] The art of spinning like a top.

(1.) *TURBITH. *n. f.* [*turpethus*, Lat.] Yellow mercury precipitate.—Twelve grains of *turbith* mineral. *Wifeman*.

(2.) TURBITH MINERAL. *See* CHEMISTRY, and PHARMACY, *Indexes*; and TURPETH.

TURBO, the WREATH, in zoology, a genus of insects belonging to the order of *vermes testaces*. The animal is of the snail kind; the shell consists of one spiral solid valve, and the aperture is orbicular. There are 116 species; of which the most remarkable are,

1. TURBO CLATHEUS, or *barbed wreath*, has a taper shell of 3 spires, distinguished by elevated divisions running from the aperture to the apex. There is a variety pellucid, with very thin edges. It is analogous to that curious and expensive shell, the *wenle trap*.

2. TURBO LITTOREUS, or *periwinkle*. They are abundant on moist rocks far above low-water mark.

(1.) *TURBOT. *n. f.* [*turbot*, French and Dut. *rhombus*, Latin.] A delicate fish.—*Turbot* preserved fresh in vinegar. *Carew*.—The salmon, the *turbot*. *Peacham*.

(2.) TURBOT, in ichthyology. *See* PLEURO-NECTES.

*TURBULENCE. } *n. f.* [*turbulence*, Fr. *turba-*

*TUREULENCY. } *lentia*, Lat.] 1. Tumult; confusion.—Bloody *turbulence*. *Shak*.—Like *turbulencies* in the affairs of men. *Milton*. 2. Disorder of passions.—I come to calm thy *turbulence* of mind. *Dryden*. 3. Tumultuousness; tendency to confusion.—This *turbulence* of blood. *Swift*.

*TURBULENT. *adj.* [*turbulentus*, Latin.] 1. Raising agitation; producing commotion.—Whole heads that *turbulent* liquor fills with fumes. *Milt*. 2. Exposed to commotion; liable to agitation.—Once full of peace; now tost, and *turbulent*. *Milt*. 3. Tumultuous; violent.—For so untam'd, so *turbulent* a mind. *Dryden*.—The *turbulent* mirth of wine. *Dryden*.—Ambitious and *turbulent* spirits. *Bentley*.

*TURBULENTLY. *adv.* [from *turbulent*.] Tumultuously; violently.

TURCÆ, or } (*Mela*); supposed to be the
TURCI, } TUSCI of Ptolemy; whom he
places between Caucasus and the Montes Cerau-
ni.

nii. The name is said to denote, "to desolate, or lay waste." Herodotus places them among the wild or barbarous nations of the north. There is a very rapid river called *Turk*, running into the Caspian Sea, from which some suppose the Turks to take their name. They made no figure in the world till towards the 7th century; about the beginning of which they fell from the Portæ Caspiæ, laid waste Persia, and joined the Romans against Chosroes king of Persia. In 1042 they subdued the Persians, in whose pay they served, and from whom they derived the Mahometan religion; and afterwards pouring forth, over-ran Syria, Cappadocia, and the other countries of the Hither Asia, under distinct heads or princes, whom Ottoman succeeding, united the whole power in himself, which to this day continues in his family, and who fixed his seat of empire at Prusa in Bithynia. His successors subdued all Greece, and at length took Constantinople in 1453; which put a period to the Roman empire in the East, under Constantine XIII. There is a standing tradition among the Turks, that their empire will at length be overturned by the Franks or Christians.

(1.) **TURCKHEIM**, a town of France, in the dep. of Upper Rhine, and ci-devant prov. of Alsace, near the Colmar, memorable for a victory obtained near it, by Turenne, over the imperialists, in 1675. It is one mile W. of Colmar, and 4 SSW. of Schleusstadt. Lon. 7. 26. E. Lat. 48. 5. N.

(2.) **TURCKHEIM**, a town of Germany, in Suabia, in the lordship of Mindelheim; 6 miles E. of Mindelheim, and 30 SE. of Ulm.

(3.) **TURCKHEIM RHEIN**, a town of the French empire, in the dep. of Mont Tonnerre, and ci-devant bishopric of Worms; 4 miles N. of Worms.

TURCOCARIA, a town of European Turkey, in Livadia, 14 miles N. of Livadia.

TURCOIN, a town of France, in the dep. of the North, and district of Lille. Turcoin lies 6 miles NE. of Lille, and 9 SW. of Courtray.

TURCOISE. See **TURQUOISE**.

TURCOMANIA, a province of Asiatic Turkey, comprehending the ancient kingdom of Armenia, or that part of Armenia which belongs to the Turks.

TURCOMANS. See **TARTARY**, § 2.

TURCZYNKA, a town of the ci-devant republic of Poland, in the late palatinate of Volhynia, 38 miles N. of Zydomiers; now annexed to Russia.

* **TURD**. *n. f.* [*turd*, Saxon.] Excrement.

TURDETANI, an ancient people of Hispania Bætica, who inhabited the country on both sides of the Bætis. *Liv.* 21. c. 6. &c.

TURDETANIA, the country of the **TURDETANI**. See **BORTICA**.

TURDUS, the **THRUSH**; a genus of birds belonging to the order of *passeres*. The bill is straightish, bending towards the point, and slightly notched near the end of the upper mandible. The nostrils are oval, naked, or half covered with a membrane; the corners of the mouth are furnished with a few slender hairs, and the tongue is slightly jagged at the end. There are 136 species: of which 7 are British; viz. all the following, except the **POLYGLOTTUS**.

1. **TURDUS ILIACUS**, the **REDWING**, has a very near resemblance to the thrush, but is less; their colours are much the same; only the sides under the wings and the inner coverts in this are of a reddish orange, in the thrush yellow; above each eye is a line of yellowish white, beginning at the bill, and passing towards the hind part of the head. These birds appear in Great Britain a few days before the fieldfare; they come in vast flocks, and from the same countries as the latter. With us they have only a disagreeable piping note; but in Sweden, during the spring, they sing very finely, perching on the top of some tree among the forests of maples. They build their nests in hedges, and lay six bluish-green eggs spotted with black.

2. **TURDUS MERULA**, the **BLACK BIRD**, when it has attained its full age, is of a fine deep black, and the bill of a bright yellow; the edges of the eyelids yellow. When young, the bill is dusky, and the plumage of a rusty black, so that they are not to be distinguished from the females; but at the age of one year they attain their proper colour. This species is of a very retired and solitary nature; frequents hedges and thickets, in which it builds earlier than any other bird. It lays 4 or 5 eggs of a bluish-green colour, marked with irregular dusky spots. The note of the male is extremely fine, but too loud for any place except the woods; it begins to sing early in the spring, continues its music part of the summer, desists in the moulting season, but resumes it for some time in September and the first winter months.

3. **TURDUS MUSICUS**, the **THRUSTLE**, is in length 9 inches, in breadth 133. In colour, it so nearly resembles the **MISSAL**, (N° 8.) that no other remark need be added, but that it is less, and that the inner coverts of the wings are yellow. The thrush is the finest of our singing birds, not only for the sweetness and variety of its notes, but for the long continuance of its harmony; for it obliges us with its song for near three parts of the year. Like the *missal*, it delivers its music from the top of some high tree; but to form its nest descends to some low bush or thicket: the nest is made of earth, moss, and straw, and the inside is curiously plastered with clay. It lays 5 or 6 eggs, of a pale bluish-green, marked with dusky spots.

4. **TURDUS PILARIS**, the **FIELDFARE**, is in length 10 inches, in breadth 17. The head is ash-coloured, inclining to olive, and spotted with black; the back and greater coverts of the wings of a fine deep chestnut; the tail is black; the lower parts of the two middlemost feathers, and the interior upper sides of the outmost feathers excepted; the first being ash-coloured, the latter white. The legs are black; the talons very strong. This species passes the summer in the northern parts of Europe, also in Lower Austria. They breed in the largest trees; feed on berries of all kinds and are very fond of those of the juniper. Fieldfares visit our islands in great flocks about Michaelmas, and leave us in the end of Feb. or beginning of March. These birds and the redwings were the *turdi* of the Romans, which they fattened with crumbs of figs and bread mixed. Varro says they were birds of passage, coming in autumn

autumn and departing in spring. They must have been taken in great numbers; for, according to Varro (lib. 3. c. 5.), they were kept by thousands together in their fattening aviaries. They do not arrive in France till the beginning of December.

5. **TURDUS POLYGLOTTUS**, or the **MOCKING THRUSH**, is a native of America. It is about the size of a thrush, of a white and grey colour, and a reddish bill. It is possessed, not only of its own natural notes, which are musical and solemn, but it can assume the tone of every other animal in the wood, from the wolf to the raven.

6. **TURDUS ROSEUS**, a native of Great Britain.

7. **TURDUS TORQUATUS**, or **RING-OUZEL**, is superior in size to the black-bird; the length is 11 inches, breadth 17. The bill in some is wholly black, in others the upper half is yellow; on each side the mouth are a few bristles; the head and whole upper part of the body are dusky, edged with pale brown; the quill feathers and the tail are black. The coverts of the wings, the upper part of the breast, and the belly, are dusky, slightly edged with ash-colour. The middle of the breast is adorned with a white crescent, the horns of which point to the hind part of the neck. In some this is of a pure white, in others of a dirty hue. In the females and in young birds this mark is wanting, which gave occasion to some naturalists to form two species of them. The ring-ouzel inhabits the Highland hills, the north of England, and the mountains of Wales. They also breed in Dartmoor, in Devonshire, and on the sides of streams. The places of their retreat are not known. In Scotland and Wales they breed in the hills, but descend to the lower parts to feed on the berries of the mountain ash. They migrate in France at the latter season; and appear in small flocks about Monthard in Burgundy, in the beginning of October, but seldom stay above 2 or 3 weeks.

8. **TURDUS VISCIVORUS**, the **MISSAL**, is the largest of the genus. Its length is 11 inches; its breadth 16½. The bill is shorter and thicker than that of other thrushes; dusky, except the base of the lower mandible, which is yellow. The irides are hazel. Head, back, and lesser coverts of the wings, are of a deep olive brown. The lower part of the back is tinged with yellow. The lowest order of lesser coverts, and the great coverts are brown; the first tipped with white, the last both tipped and edged with the same colour. The inner coverts of the wings white. The tail is brown; the 3 outermost feathers tipped with white. The cheeks and throat are mottled with brown and white; the breast and belly are whitish yellow, marked with large spots of black; the legs are yellow. These birds build their nests in bushes, or on the side of some tree, generally an ash, and lay 4 or 5 eggs; their note of anger or fear is very harsh, between a chatter and shriek, from whence some of its English names. Its song, however, is very fine; which it begins sitting on the summit of a high tree, very early in the spring, often with the new year, in blowing showery weather, which makes the inhabitants of Hampshire call it the *form rock*. It feeds on insects, holly and mistletoe berries, which are the food of

all the thrush kind; in severe snowy weather, when there is a failure of their usual diet, they scratch out of the banks of hedges, the root of arum, or the cuckoo pint; this is remarkably warm and pungent, and a provision suitable to the season.

TURDUTI. See **TURDETANI**.

TURENBERG, a town of Prussia, in Smaland, 16 miles WNW. of Koningberg.

(1.) **TURENNE**, a town of France, in the dep. of the Correze, and ci-devant county of Limoges, with a castle; 42 miles S. of Limoges. Lon. 1. 30 E. Lat. 45. 9. N.

(2.) **TURENNE**, Viscount. See **TOUR**, N° 1.

TUREQUATO, a town of Mexico, in the province of Mechoacan, 33 miles S. of Mechoacan.

TUREVSKOI, a town of Russia, in the prov. of Ustiug, on the Vim, 60 miles NE. of Yarosl.

(1.) * **TURF**. *n. f.* [*tyrf*, Saxon; *torf*, Dutch; *turf*, Swedish.] A clod covered with grass; a part of the surface of the ground.—Ditch'd, and wall'd with *turf*. *Shak.*—*Turf* and peats are cheap fuels. *Bacon.*—They left me weary on a grassy *turf*. *Milton.*—I with green *turfs* would grateful altars raise. *Dryden.*—Their trampling turns the *turf*. *Dryd.*—A *turf* of earth. *Addis.*—The mossy *turf*. *Phil.*—The green *turf*. *Pope.*

(2.) **TURF**, or **PENT**, is a blackish earth used in several parts of Britain, Holland, and Flanders, as fuel. *Turf*, as distinguished from peat, consists of mould interwoven with the roots of vegetables; when those roots are of the bulbous kind, or in a large proportion, they form the looser and worse kind of *turf*; but when mixed with a considerable proportion of peat, they form what is called *stone turf*; it at first hardens, but at last crumbles by long exposure to the air.

* **To TURF**. *v. a.* [from the noun.] To cover with turfs.—The face of the bank is *turfed*. *Mort.*

TURFAN. See **TOURFAN**.

* **TURFINESS**. *n. f.* [from *turf*.] The state of abounding with turfs.

* **TURFY**. *adj.* [from *turf*.] Full of turfs.

* **TURGENT**. *adj.* [*turgens*, Lat.] Swelling; portuberant; tumid.—Where humours are *turgent*. *Gov. Tongue.*—White o'er the *turgent* film the living dew. *Thomson.*

* **TURGESCENT**. } *n. f.* [*turgescens*, Latin.]

* **TURGESCENTY**. } 1. The act of swelling; the state of being swollen.—The infant *turgescens* is not to be taken off. *Brown.* 2. Empty magnificence.

TURGHE, a river of S. Wales, in Caermarthen-shire, which runs into the Cothey.

* **TURGID**. *adj.* [*turgidus*, Lat.] 1. Swelling; bloated; filling more room than before.—A bladder grew *turgid* and hard. *Boyle.*—The blood *turgid* and tumefied by the febrile fermentation. *Harvey.*—*Turgid* fruit. *Philips.*—Those channels, *turgid* with th' obstructed tide. *Black.* 2. Pompous; tumid; fastuous; vainly magnificent.—A violent and *turgid* manner of talking. *Watts.*

* **TURGIDITY**. *n. f.* [from *turgid*.] State of being swollen.—*Turgidity* of the eyes. *Arbuth.*

TURGOT, Anne Robert James, the famous financier, was born at Paris May 10, 1727, of a very ancient Norman family. His father was

long provost of the merchants, M. Turgot, at the age of 23, took his degree, and was elected prior of the Sorbonne, and afterwards master of requests. About this period he wrote some articles for the *Encyclopédie*. In 1761, he was appointed intendant of Limoges; in which office he did much good. At the death of Lewis XV. the public voice called M. Turgot to the first offices of government, as a man who united the experience resulting from habits of business to all the improvement which study can procure. After presiding in the marine department a short time, he was, Aug. 24, 1774, appointed comptroller-general of the finances. During his discharge of this important office, the beneficial objects he accomplished, are almost incredible. In the more immediate department of finances, he found the public borrowing at 5½ per cent, and reduced the rate to 4. He lessened the public engagements 84 millions. He found the revenue 19 millions deficient, and left a surplus of three millions and a half. His merits, however, only served to inflame the envy of courtiers. He was obliged to resign within 20 months. In retirement, his intellectual attainments effectually prevented the intrusion of ennui. He died March 20, 1781.

TURGOW. See **GOUDA**.

TURGUT, or DURGUT. See **DURGUT**.

TURIANO, a river of Sicily, which runs into the sea, 10 miles NE. of Mistrretta.

TURIAS, a river of Hispania Bastica, running into the Mediterranean; now called **GUADALAVIAR**.

TURICUM, an ancient town of Gallia Helvetica; now called **ZURICH**.

TURIGA, a river of Russia, which runs into the Niznei Tunguska; in Lon. 116. 30. E. Lat. 66. 12. N.

(1.) **TURIN**, an ancient, populous, strong, and handsome city of Italy, now annexed to the French empire, and capital of the dep. of the Po, as it formerly was of the late **PIEDMONTESSE**. It has a strong citadel, and had an university. It is seated on a vast plain, at the confluence of the Doria and Po. It is one of the handsomest cities in Italy; but the air is unhealthy in autumn and winter, on account of the thick fogs. One half of it is lately built; and the streets are straight and clean, being washed by an aqueduct. Before the late revolutions, there were above 87,000 inhabitants, and 48 churches and convents. Turin is very well fortified, and extremely strong. The French, in 1706, besieged it a long time in vain. But on the 10th Dec. 1798, it was entered by the French republicans, without opposition. In August 1799, it was retaken by the allies. But in 1800, it was recovered by the French, and annexed, with the rest of the king of Sardinia's dominions, to their republic. It still forms a part of the French empire. (See **REVOLUTION**, N° VI. § 42, 43.) There are also fine gardens on the side of the Po; and the house called *La Charité* is remarkable, as there is room for 3000 people. The college of the academy is very large and well built, and has a great number of ancient inscriptions. It is charmingly seated at the foot of a mountain, 63 miles NE. of Genoa, 72 SW. of Milan, and 280 NW. of Rome. Lon. 7. 45. E. Lat. 44. 50. N.

(2.) **TURIN**, *n. f.* in the porcelain manufacture, a large oval vessel, for holding broth or soup, at table. Turins are also sometimes made of silver.

TURING, a town of Sweden, in Blekingen, 7 miles N. of Carlscrona.

TURINGE, a town of Sweden, in Sudermanland, 24 miles WSW. of Stockholm.

TURINSK, a town of Russia, in Tobolskoi, with a wooden fort, 7 churches, and 350 houses; 144 miles W. of Tobolsk, 620 WNW. of Kollivan, and 1028 E. of Petersburg. Lon. 81. 30. E. Ferro. Lat. 58° N.

TURINSKOL, a town of Russia, in Tobolskoi, on the Niznei Tunguska; 132 miles E. of Turuchansk.

TURIOSA, an ancient town of Spain.

(1.) **TURK**, a son of Japhet, whom the Moguls rank as their first monarch, (See **MOGULS**, § 2.) and from whom the Tartars claim their origin. (See **TARTARS**, § 1.)

(2.) **TURK**, *n. f.* a native of Turkey.

(3.) **TURK**, a rapid river of Asia, which runs into the Caspian Sea.

(4.) **TURK DEAN**, a town of England, in Gloucestershire, 3 miles N. of Leach.

(5.) **TURK ISLANDS**, a cluster of islets, among the Bahama Islands. Lon. 70. 52. W. Lat. 21. 26. N.

(6.) **TURK MOUNTAIN**, a mountain of Ireland, in the county of Kerry, near Killarney lake, which affords one of the most beautiful prospects in Europe.

TURKEIM. See **TURCKHEIM**, N° 1, 2.

(1.) **TURKESTAN**, or **TARAZ**, a country of Asia, in Independent Tartary; (See **TARTARY**, N° II.) bounded on the N. by deserts, which separate it from Russian Tartary; on the E. by Chinese Tartary, and that part of Tartary possessed by the **KALMUCKS**; on the S. by **BUKHARIA**, and on the W. by *Charafm*, or **KARASH**, and the Caspian Sea. It extends 700 miles from E. to W. in length, and about 350 from N. to S. in breadth. It is divided between 2 Tartar khans; of whom the one resides at **TASCHKENT**, and possesses the E. part; the other, who possesses the W. district, resides at **TURKESTAN**, (N° 2.) and has the title of *khon of the Karakalpak*.

(2.) **TURKESTAN**, a city of Asia, capital of the above country. It is seated on a river, which runs into the **SIR**; in Lon. 87. 28. E. Ferro. Lat. 44. 45. N.

(1, i.) **TURKEY**, a very extensive empire, comprehending some of the richest countries in Europe, Asia, and Africa. See **TURCKE**.

(2.) **TURKEY, BOUNDARIES AND DIVISIONS OF**. The Turkish empire comprehends various countries in Europe, Asia, and Africa; and is divided accordingly into,

i. **TURKEY, AFRICAN**. In Africa, the Turkish dominions are **EGYPT**, and some districts of **BARBARY**. See these articles in their order.

ii. **TURKEY, ASIATIC**, is divided into Eastern and Western. The Eastern comprehends Georgia, Turcomania, and Diarbekir; and the Western, Natolia, or Asia Minor, Syria, and Palestine.

iii. **TURKEY, EUROPEAN**, or Turkey in Europe, is bounded on the S. by the Mediterranean; on the N. by Croatia, Slavonia, and Transylvania;

nia; on the E. by Poland, Russia, and Asia; and on the W. by the Adriatic and Dalmatia. The principal countries of European Turkey, are Romania, Bulgaria, Servia, Walachia, Moldavia, Bessarabia, Greece, Macedonia, Albania, Thessaly, Livadia, Morea, and the Archipelago Islands.

(3.) **TURKEY, GOVERNMENT OF.** The grand signior, or emperor of the Turks, is restrained by no laws or compacts, the government being purely despotic; but if he indulges not the humours of the people, and especially of the mutinous janisaries, he is in danger, not only of being deposed, but also of being put to death. Those who have offices under the government, he squeezes, disgraces, and puts to death, upon the least suggestion of their disaffection or misconduct, without giving them an opportunity of answering for themselves, they being looked upon as more immediately his slaves. In the succession to the empire, no regard is paid to age or birth-right, the Turks thinking it sufficient, if, in their elections, they keep to the family. Women are excluded from the throne. The emperor's council is either ordinary or extraordinary. The first, meeting every Sunday and Thursday, consists of the great officers of state, and is called the *divan*. (See *DIVAN*, § 2.) The sultan hears what passes from an adjoining chamber. At the head of the ministry is the grand vizir, who is, as it were, his lieutenant-general, with whom he divides, or rather to whom he leaves, the care of the whole empire: he being entrusted not only with the finances, with foreign affairs, and the administration of justice in civil and criminal matters, but also with the conduct of the war, and the command of the army. His income, without any breach of probity, may amount to 600,000 dollars, exclusive of presents and other perquisites. Notwithstanding his high dignity, his palace is open to every one, and he gives audience to the meanest of the poor. When the sultan names a grand vizir, he puts into his hand the seal of the empire; and when he honours him with the command of an army, he takes out one of the plumes of his own turban at the head of the troops, and delivers it to him to place it in his own. The other great officers of state are the *KAIMAKAN*, or vizir's deputy, not to be confounded with the governor of Constantinople, who is also called *kaimakan*; the vizirs of the bench, or *bailhas* of three horse tails, because three horse tails are carried before them when they march, and who sit in the *divan* or courts of justice with him: the *kadi-lasquiers*, or chief justices of provinces; the *BEGLERBEGS* or viceroys, of which the chief are those of Romania, Natolia, and Damascus; the ordinary *bailhas* or governors of towns and districts under the *beglerbegs*; the *reis effendi*, or lord chancellor and secretary of state; the *tefterder* or high treasurer; the *aga* of the janisaries; the *aga* of the *sphas*; the *aga* of the *huds*, &c.

(4.) **TURKEY, HISTORY OF, FROM THE ORIGIN OF THE EMPIRE, TILL MAHOMET II.'S ACCESSION.** Of the origin of the Turkish empire, and the first Turkish invasion of the Roman empire by their sultan *TANOROLIX*, we have given a full account under the article *CONSTANTINOPLE*, § 10; as well as of their capture and

dreadful pillage of that city, under § 12 and 13, of the same article. It will be expected, however, that under the present article, we should at least give a brief chronological series of the Turkish monarchs, from that period to the present. *Alstedius* and other chronologists, indeed, trace the origin of the Turkish empire from an earlier period, viz. from the rise of *Mahomet's* imposture, A. D. 621. (See *MAHOMET*, N° 1. and *SARACENS*, § 1.) But though their power and their conquests rapidly increased after that period, yet *OTTOMAN* or *OTHMAN*, is generally ranked as their first emperor, and the commencement of his reign placed in A. D. 1297. From him Turkey is often styled the *Ottoman empire*. After conquering Syria, Cappadocia, and the greater part of Asia, he died A. D. 1326, in the 29th year of his reign, and was succeeded by his son *Orchan*; who took *Barla* and made it the seat of his empire. He died in the 31st year of his reign, A. D. 1357, and was succeeded by his son *AMURATH I.* (See that article.) He reigned also 31 years, according to *Alstedius*, and was succeeded, A. D. 1388, by his son *BAJAZET I.* who was taken prisoner by *TAMERLANE*. (See *BAJAZET I.*) After an interregnum of 6 years, he was succeeded by his son *SOLIMAN I.* A. D. 1403; who was murdered in his 7th year, A. D. 1410, by his brother *Moses*; who reigned only 3 years; and was succeeded by his brother *Mohammed I.* A. D. 1413. *Mohammed* or *MAHOMET I.* transferred the seat of empire to *Adrianople*; and, after a glorious reign of 8 years, died in 1421, and was succeeded by his son *AMURATH II.* (see that article;) who, after reigning 31 years, died in 1452, and was succeeded by *MAHOMET II.* furnished the *Great*, of whose reign we now proceed to give the history.

(5.) **TURKEY, HISTORY OF, FROM THE CAPTURE OF CONSTANTINOPLE TILL THE DEATH OF MAHOMET II.** In 1453 the Turks made themselves masters of CONSTANTINOPLE, which from that time became the capital of their empire. *Mohammed II.* then sultan, treated the inhabitants with the greatest cruelty. In 1454, he entered *Servia* at the head of 20,000 men, and obliged the inhabitants to pay him an annual tribute of 40,000 ducats. On his return to *Adrianople*, *Mohammed* repopled the towns and villages about Constantinople with 4000 men and women, whom he had taken; and going to that city, built a palace 8 stadia in compass. Next year a fleet was sent against the islands of *Rhodes* and *Chios*; but the attempt on both proved unsuccessful; however, the island *Cos* was reduced, and some other places; after which the sultan, turning his arms towards *Hungary*, laid siege to *Belgrade*, which the celebrated *John Hunniades* obliged him to raise with considerable loss. He next set about the entire conquest of the *Morea*. The Grecian princes, among whom were two of the emperor's brothers, *Thomas* and *Demetrius*, were so terrified by the taking of Constantinople, and the great progress of the Turks, that they prepared to retire into Italy; upon which the Albanians seized on the country, choosing one *Manuel Cantaczenus*, a Greek, for their prince. Then falling on the Greeks who remained, they made an offer to the sultan of the cities and fortresses, provided

provided he would allow them to keep the open country. At this time, however, the sultan chose rather to support the Greeks than to let the country fall into the hands of such barbarians; and having defeated the Albanians, was content to accept of a tribute from the Greeks. But the danger was no sooner over, than the Grecian princes revolted anew; and in which Mohammed entering the country with a powerful army, prince Thomas, with his family, fled to Italy; while Demetrius thought himself eligible to submit to the sultan, by whom he was carried away, with many of the most considerable persons of Lacedæmon, Achaia, &c. where Turkish governors were appointed. Two thousand families were also carried away from the Morea, in order to be settled at Constantinople, and 2000 young men to be enrolled among the sultan's troops. Many cities at his time fell into the hands of the Turks, among which the principal were Corinth and Athens. The Greeks, however, still made some faint struggles; but all in vain: for by the year 1459 the whole country was subdued, excepting some maritime places held by the Venetians; and prince Thomas was obliged finally to take up his abode at Rome, where he was lodged in the pope's palace, and had a pension of 3000 livres a-year allowed him. Mohammed now pursued his good fortune; and having made war on the emperor of Trebizond, he subdued his dominions, and put him to death. His career, however, was for some time stopped by SCANDERBEG, the Epirote. This prince had already defeated an army of 12,000 Turkish horse, of whom only 5000 escaped the slaughter; and dispersed another, with the loss of their general, and 4120 men killed on the spot. Encouraged by this success, he laid siege to Belgrade, which was now in the hands of the Turks; but through the treachery of his scouts, his army was defeated, and 5000 of his men killed; upon which one of his generals, named *Moses*, went over to the Turks. Scanderbeg, not at all dispirited by this misfortune, prosecuted the war with the utmost vigour. His first enterprise was against his perfidious general Moses, who had been immediately put at the head of an army by the sultan. This army was by Scanderbeg totally destroyed, excepting about 4000 men; upon which Moses fell into such disgrace with the Turks, that he returned to his old master, who forgave his treachery, and restored him to all his former posts. The bad success of Moses did not prevent Amesa, the nephew of Scanderbeg, from following his example. Mohammed received him kindly, and sent him with Ithak bashaw of Constantinople; whom he entrusted with an army of 50,000 men against his uncle. Scanderbeg, with only 1000 men, retired towards Lysia, a maritime city of the Venetians. The Turks pursued, contrary to the advice of Amesa; and being surprised by Scanderbeg, were utterly defeated, with the loss of their camp, 20,000, or, according to others, 30,000 men killed on the spot, and the treacherous Amesa taken prisoner. With the like good fortune Scanderbeg defeated three other Turkish armies, one of 20,000, another of 30,000, and he third of 18,000 men. On this Mohammed sent against him an old experienced commander,

VOL. XXII. PART II.

at the head of 40,000 chosen troops; but as he likewise was able to achieve nothing, the sultan thought proper to conclude a peace with Scanderbeg in 1461. Mohammed being thus freed from such a troublesome enemy, completed the conquest of the Greek islands; subdued Wallachia, Bosnia, and Illyria, extending his empire nearly to the confines of Italy. But as it was easy to see that no conquests would satisfy the Turkish ambition, the Venetians, who found themselves ill-treated by their warlike neighbours, entered into an alliance with the Hungarians, to repress the overgrown power of the Turks, and prevent the western parts of the world from being totally over-run by them; and into this alliance Scanderbeg was soon drawn, notwithstanding his treaty with Mohammed already mentioned. The Hungarians invaded the Turkish dominions on the W. side, defeated some troops, and carried off 20,000 slaves; the Venetians invaded the Morea, where they made some conquests, but were soon obliged to abandon them: however they recovered the island of Lemnos; but being defeated in two engagements at land, they were obliged to solicit assistance from France, Germany, and Spain. Having obtained considerable supplies from those parts, they again entered the Morea; but meeting with still worse success than before, they applied for assistance to Matthias the son of John Hunniades king of Hungary. Matthias willingly made another incursion into the Turkish dominions, ravaged Servia, and carried off a vast number of prisoners with a great booty. In the mean time, Mohammed, fearing lest Scanderbeg should be declared generalissimo of the Christian forces, sent him, desiring a renewal of the league between them. But this being refused, the war was renewed with the utmost vigour. Many Turkish armies were sent against this hero; but they were utterly defeated and dispersed, till 1466, when by his death the sultan was freed from the most formidable enemy he had ever encountered. (See SCANDERBEG.) The death of Scanderbeg was followed by the entire reduction of Epirus and Albania. The Venetians in 1469 defeated the Turks in a pitched battle; but were driven out of Negropont; at that time the strongest city in Europe; after which they entered into an alliance with Ferdinand king of Naples, Lewis king of Cyprus, and the grand master of Rhodes, at the same time that they sent ambassadors to Uzun Hassan king of Persia, in order to persuade him to attack the Turkish dominions on the east side. Mohammed did not lose his courage at the number of his enemies; but having defeated the Persians, reduced the Venetians to such distress, that they were obliged to conclude a treaty in 1479. In 1481 the war was renewed, and the city of Rhodes besieged, but without success; however, the city of Cephalonia was taken from the Venetians, Italy invaded, and the city of Otranto taken. This was the last of the exploits of Mohammed II. who died this year of the gout, and was succeeded by his son Bajazet II.

(6.) TURKEY, HISTORY OF, TILL THE MURDER OF BAJAZET II. Under this prince a war commenced with the Mamelukes of Egypt; which, under his successor Selim I. ended in the

U u u total

total subjection of that country. (See EGYPT, § 20.) Bajazet, however, greatly facilitated Selim's conquest by the reduction of Circassia, whence the Mamelukes drew their principal resources. Caramania and Croatia were totally reduced; the cities of Lepanto, Modon, and Durazzo, taken by the Turks, though the Venetians recovered Cephalonia; Syria on the east, and Moldavia on the west, were invaded and ravaged by the victorious armies of the sultan; till at last a peace was concluded with the European powers in 1503. The year 1509 is remarkable for a dreadful earthquake at Constantinople, which overturned a great number of houses, and destroyed 13,000 people; being also followed by an epidemic distemper, which carried off great numbers. About this time also the sultan, finding the infirmities of old age drawing on, and being desirous of passing the remainder of his days in quiet, resolved to resign the throne to his eldest son Achmet. But having engaged in this affair with too great precipitation, and before he had gained over the grandees, his second son Selim, whom he had made governor of Trebizond, hastily crossing the Euxine sea, de-throned and put to death his father, in 1512.

(7.) TURKEY, HISTORY OF, TO THE DEATH OF SELIM I. This monster, who had not scrupled to sacrifice his father to his ambition, did not hesitate at establishing himself upon the throne by the death of his brother also. Accordingly, as Achmet, knowing he could be nowhere safe, resolved to stand on his defence, Selim with a powerful army, marched against him; and having defeated the few forces of his brother, took him prisoner and put him to death. Having thus secured himself, he marched against the Persians, whom he overthrew in a great battle: after which he took the city of Tauris; made some other conquests; and having secured tranquillity on the E. side of his dominions, turned his arms against Sultan Gauri of Egypt. Him he reduced in the manner related under EGYPT, § 19. His farther designs of conquest were frustrated by his death, which happened in 1519.

(8.) TURKEY, HISTORY OF, TO THE DEATH OF SOLIMAN II. Selim was succeeded by his son Soliman II. surnamed the *Magnificent*, who proved no less ambitious and warlike than his father. Having defeated and killed the governor of Damascus, who had rebelled against him, he attacked the European princes with a design to extend his dominions as far to the westward as he possessed to the eastward of his capital. In 1520 he set out with a great army to conquer Hungary. The city of Belgrade was immediately invested, and in a short time taken. Rhodes also being attacked by a great force by sea and land, was obliged to submit, after a most desperate resistance, (see RHODES, and SOLIMAN II.) and Soliman entered the city in triumph on Christmas day 1522. His conquests for some time were stopped by a rebellion in Egypt; but this being soon quashed, the war with Hungary was renewed in 1525. King Lewis having rashly engaged the Turkish army of 200,000 men with only 25,000, was utterly defeated, himself drowned in a ditch, and his whole army, excepting a few horse, cut in pieces.—This defeat was followed by the surrender of Buda, which,

however, the Hungarians retook in 1528; but in 1529, it was again taken by the Turks, and soon after both the Moldavians submitted to their jurisdiction. The city of VIENNA was then invested; but after being reduced to the greatest straits, the sultan was obliged to abandon the siege by the coming on of the autumnal rains; which, however, he did not without barbarously massacring all his prisoners. The raising the siege of Vienna was followed by an entire repulse of the Turks from the German territories; on which Soliman, resolving to extend his dominions on the east, subdued the country of Georgia, and made himself master of the city of Bagdad; at the same time that his admiral, the celebrated BARBAROSSA, ravaged the coasts of Italy, and took the cities of Biserta and Tunis in Africa. But, in 1536, he was obliged to retire before Charles V. of Spain, who retook the city of TUNIS. Soliman, to revenge this disgrace, suspended for a time the war in Persia, to turn all his forces against Italy; but while this country was in danger of being totally overwhelmed, a Venetian captain having rashly taken and sunk some Turkish vessels, Soliman changed his design of attacking Italy into that of chastising the Venetians. However, after some trifling encounters, a peace was concluded in 1540. This year the war was renewed in Hungary; the transactions were very unfortunate for the Christians, and ended in the entire reduction of the kingdom to a Turkish province. The kingdom of France being oppressed by its enemies, entered into an alliance with Soliman, who was now grown so powerful, that the whole European powers seemed scarce able to resist him. However, in 1565, he was baffled by the knights of MALTA; (see that article;) and in 1566 an end was put to his ambition and his conquests by death.

(9.) TURKEY, HISTORY OF, TO THE VICTORY AT LEPANTO. Soliman was succeeded by his son Selim II. surnamed *Mess*, or *The Drunken*. Under him the empire at first lost nothing of its lustre; but in 1571 the maritime power of the Turks was almost entirely destroyed at LEPANTO, where one of the most remarkable sea engagements mentioned in history took place. The Christian fleet was commanded by DORIA the Venetian admiral; and consisted of upwards of 209 galleys and large ships, besides smaller craft; and the Turkish fleet consisted of 335 sail. The number of Turks slain were supposed about 32,000, besides 3500 prisoners. The galleys taken amounted to 161. Forty more were sunk or burnt; and of gallies, with other small vessels, about 60 were taken.

(10.) TURKEY, HISTORY OF, TO THE DEATH OF MAHOMET III. Notwithstanding the prodigious loss sustained by the Turks on this occasion, the confederates reaped but little advantage from this victory; and next year Kilij Ali Pasha, who had succeeded to the post of high admiral, fitted out a fleet of 250 galleys, with which he ravaged the coasts of Christendom wherever he came, and maintained his ground so well, that the confederates could never gain the least advantage over him. The Turkish power from this time, however, began to decline. The progress of civilization being much more quick among the western nations, and their improvements in the art of war

very considerable, the Turks found it not only impossible to extend their dominion over Germany, but even a matter of some difficulty to withstand the power of the western princes. During the remainder of the reign of Selim II. the war was carried on in Hungary with little advantage on either side; but under his successor, Amurath III. the Turks met with several severe checks from the Germans. Amurath III. reigned 20 years. In 1594, Mohammed III. having succeeded his father Amurath, murdered his 19 brethren to secure himself on the throne; and caused 10 of his father's wives and concubines to be thrown into the sea, lest any of them should prove with child. The emperor Rodolph II. having entered into a confederacy against him with the princes of Transylvania, Walachia, and Moldavia, defeated the Turks and their Tartar auxiliaries in several engagements, and took many cities; while so grievous a famine and plague raged in Hungary, that of 85,000 Tartars who had entered the country the year before, scarce 8000 remained alive. This was followed by new misfortunes; so that in 1595 the Turks were entirely driven out of Transylvania, Moldavia, and Walachia.

(11.) TURKEY, HISTORY OF, TO THE PEACE WITH POLAND. Mahomet III. was succeeded by his son *Achmet I.* who died in 1617, leaving two sons, *OTHMAN I.* and *AMURATH IV.* yet the throne was seized by his brother *MUSTAFA I.*; who was deposed for *heresy*, in 1623 and strangled in prison by the Janizaries in 1611. In 1621, under *OTHMAN II.* the Turks first engaged in a war with Poland; but a peace was concluded the same year; the chief article of which was, that the Poles should have a free trade in the Turkish dominions, and that for this their merchants should pay 10,000 sequins. The Turkish affairs continued much in the same way till 1673, when a dreadful war broke out with Germany, Russia, and Poland, whose army was at that time commanded by the celebrated *JOHN SOBIESKI*. The year before, hostilities had commenced on account of the Poles having endeavoured to detach the Cossacks from their allegiance to the sultan. At this time the Turks were successful, through the dissensions which reigned among the Poles; and the latter were obliged to pay an annual tribute of 20,000 rix-dollars, and to deliver up 48 towns and villages in the territory of Kamienieck. However, the articles of this treaty were never executed; for, in 1673, the states of Poland sent a letter to *Kyoprili Achmed Pasha*, the vizir, informing him that they considered as null the conditions of the treaty, being concluded without their consent, and that they would rather suffer death than submit to the infamy of paying one farthing by way of tribute. On this the sultan, *MOHAMMED IV.* who had succeeded, in 1649, after the murder of his father, *Ibrahim I.* determined to take a severe revenge on their perfidy, set out with a great army; but was entirely defeated, with the loss of 20,000 men killed on the spot, all the baggage, 25,000 waggon loads of provisions and ammunition, and 2000 pounds of money. Soon after this victory, John was proclaimed king of Poland; but his subjects, jealous

of his glory, refused to support him properly in prosecuting his advantage; so that, 4 years after, a treaty was concluded, by which the Poles for ever resigned their pretensions to Kamienieck and to the dominion of the Cossacks in Podolia.

(12.) TURKEY, HISTORY OF, TO PRINCE EUGENE'S VICTORY AT ZENTA. But though peace was thus made with Poland, the war was carried on very unsuccessfully with Russia. In 1678, an army of the Tartars was entirely cut in pieces or taken near the city of Cherin; which so intimidated another army of 40,000 Turks, who had waited for the arrival of the auxiliaries, that they threw away their arms, and fled without stopping till they had crossed the Bog. This defeat inclined the sultan to peace; but the negotiations proving ineffectual, he, in 1679, again sent a powerful army of 80,000 Turks, 30,000 Tartars, and 4000 Cossacks, under the command of the vizir, to retrieve his lost honour. This army, however, succeeded little better than the former: for the vizir was defeated in several engagements; and at last put to death on account of the bad success of the war. In 1684 the Venetians again declared war, while the Poles and Germans continued their hostilities with the utmost violence. The Turks were forced to yield to the superior fortune and valour of their adversaries; they were defeated in a great number of engagements, and lost many places of importance. In 1687, Mahomet IV. was deposed by the Janizaries, and succeeded by his brother *SOLIMAN III.* an indolent prince, who died in 1691. *MAHOMET IV.* died in prison in 1693, and was succeeded by his brother *Achmet II.* who died in 1695, and was succeeded by his nephew *Mustapha II.* who defeated the imperialists at Temeswar, and made war with success against the Venetians, Poles, and Russians; but was deposed and died in 1703. He was succeeded by his brother *Achmet III.* who was deposed in 1730, and succeeded by his nephew, *MAHOMET V.* the son of *Mustapha II.* But to return to public affairs. Turkish affairs seemed to be totally going to wreck, when, in 1688, they were retrieved by the new vizir *Achmed Kyoprili*, a man of great skill and experience in war, as well as of the most upright character. Having roused the enthusiasm of the people, they flocked in great numbers to his standard; after which, having reformed many abuses both in the civil and military departments, he led them against the enemy. The good effects of his reformation were evident. Great numbers of the enemy were cut off, and almost all the important places taken which had been lost before; when, in 1691, he was defeated and killed by the Germans at *Ilankamen*. After his death the Turkish affairs again fell into disorder; and, though the utmost efforts were used by succeeding vizirs, no progress could be made; and, in 1697, a prodigious overthrow was given them by Prince Eugene at Zenta.

(13.) TURKEY, HISTORY OF, TO THE TREATY OF CARLOWITZ. At last, in 1698, all parties being weary of such an expensive and ruinous war, a pacification took place at Carlowitz, but on different terms with the different nations who had been at war with the Turks. The emperor made

U u u s a truce

a truce for 25 years, upon condition that all Transylvania should be resigned to him: the city of Temeswar was to be restored to the Turks, and the navigation of the Teisse and Maros rivers free to both nations: that the country between the Danube and the Teisse, called *Bacsbak*, remain in the emperor's hands; that the boundary of the eastern part of Hungary, belonging to the emperor, should be a right line drawn from the mouth of the Maros towards the banks of the river Teisse to the mouth of the Bosuth, where it falls into the Saave; that towards the south the Saave should part the Turkish from the imperial limits, till it receives the Unna; and that no new castles besides Belgrade and Peterwaradin should be erected, or old ones fortified, anywhere within these boundaries. The Russian ambassador made a truce only for two years, upon the footing of each party possessing what he had taken. The Poles made a truce on the like terms with the sultan; namely, that they should have Kamienieck, Podolia, and Ukraina, restored to them, in the same extent as possessed by them before sultan Mohammed's first expedition into Poland; and, on the other hand, resign Soczawa, Nemoz, and Sotaka, in Moldavia, to the Turks. The Venetians obtained these conditions: that all the Morea, as far as Hexamilos, should belong to them; and that the firm land, with Naupactum, (or Lepanto,) Prevesa, and the cattle of Romania, which had been demolished, should be restored to the Turks; that the bay of Corinth should be common to both, and the Venetians possess Lenkade with the adjacent islands. The yearly tribute paid by the islands in the Archipelago to the Venetians was to be abolished; and Zakynth to be declared free from the like burden by the Turks. In Dalmatia, Kuin, Cing, Kiklut, Verlika, Duare, and Vergoraz, were to be left to the republic, and fixed as the boundaries of their dominions on that side. The Ragusians were to continue free, and the Venetians to retain the castles of Castelnovo and Risauo, with what they possessed in the neighbourhood. Both parties were allowed to fortify their borders with new fortresses; or to repair those which were decayed, excepting Naupactum, Prevesa, and the castle of Romania.

(14.) **TURKEY, HISTORY OF, TO THE WAR WITH RUSSIA, AND CAPTURE OF AZOPH.** From the conclusion of the peace of Carlowitz to 1769, nothing remarkable occurs in the Turkish history, excepting that MUSTAPHA III. the son of *Achmet* III. succeeded his father in 1757. He was a weak prince, and drained the treasury. But the Turks recovered the Morea from the Venetians by the treaty of Passarowitz. (See **VENICE**.) Their war with the Russians under Peter the Great has been taken notice of under the article **RUSSIA**, § 17; and those afterwards with **PERSIA**, under that article, § 17. None of these, indeed, were of any great consequence; but, in 1769, a war commenced with Russia, which threatened the Ottoman empire with destruction, and which has given it such a severe check as it can scarcely recover. The origin of this war is given under the article **POLAND**, § 23; and during the course of it, an almost uninterrupted train of success attended the Russian arms.—About the end of March 1769, a

body of Russian troops made themselves masters of the important fortrefs of Azoph, at the mouth of the Don.

(15.) **TURKEY, HISTORY OF, TO THE CAPTURE OF BENDER.** In the end of April, prince Gallitzin, commander in chief of the Russian army on the frontiers of Poland, passed the Niefter, hoping to take the fortrefs of Choczim by surprise; but being disappointed, he was obliged to return. Near the beginning of July, however, he again passed that river, and on the 13th attacked and defeated the van of the grand vizir's army, consisting of about 50,000 or 60,000 men. Of the fugitives 13,000 entered Choczim; which was next day invested by the Russians: but they were at last obliged to raise the siege and repass the Niefter; which they could not effect without considerable loss. In the mean time, both the Ottoman and Russian courts were displeased with the conduct of their generals. The Turkish grand vizir was deprived of his command, and afterwards beheaded; and was succeeded by Moldovani Aga Pacha, a man of a bold and enterprising spirit. On his first taking the command of the army, finding it impossible to subsist where he was, he attempted to force a passage over the Niefter; but being three times repulsed with great loss, he made a precipitate retreat towards Bender, at the same time drawing the troops out of Choczim, which the Russians immediately took possession of. Prince Gallitzin was now superseded by Gen. Romanzow, who took the command of the army on the 29th Sept. Soon after his arrival, he received news of the success of general Elmpt, who, with a body of 10,000 men, had reduced the province of Yassy. He invested Bender; but finding the season of the year too far advanced, he soon withdrew his troops, and put them into winter quarters. This first campaign had proved to unpropitious to the Turkish affairs, that the court would gladly have concluded a peace, if they could have obtained it upon honourable terms; but the Russians insisting upon the entire cession of Moldavia and Walachia, as a preliminary article, the negotiations came to nothing. A new campaign was therefore resolved on; and this proved still more unsuccessful than before. The grand Russian army under general Romanzow passed the Niefter in May 1770; and, having assembled at Choczim on the 3d of June, marched towards Pruth: at the same time, their 2d army, commanded by general Panin, arrived before Bender. The plan of operation was, that the latter should form the siege of Bender, and Romanzow should cover it. On the 18th July, Gen. Romanzow attacked an army of 80,000 Turks and Tartars commanded by the Khan of Crimea, and strongly entrenched on an almost inaccessible mountain, forced their intrenchments, and obliged them to flee in the utmost confusion, leaving an immense quantity of ammunition and provisions, &c. in their camp; which they totally abandoned to the victors.—After this victory, the Russian general pushed on towards the Danube; and on the 2d of August attacked another Turkish army, commanded by the grand vizir in person, and totally defeated it, making himself master of their camp, ammunition, 143 pieces of cannon, and

and above 7000 carriages loaded with provisions. The loss of the Turks on this occasion was not reckoned less than 40,000 men, and some accounts raised it to 60,000.—During the course of this summer also, the fortrefs of Kilia Nova, at the most northerly mouth of the Danube, surrendered by capitulation; and likewise that of Ackerman, or Bialogorod, near the mouth of the Niefter. Bender was taken by storm on the 27th November, and the Russians, enraged at the obstinate resistance they met with, made a terrible slaughter of their enemies. It was computed that 30,000 Turks perished on this occasion.

(16.) **TURKEY, HISTORY OF, TO THE DESTRUCTION OF THE TURKISH FLEET.** The fortrefs of Brailow, situated on the N. side of the Danube, was invested on the 26th of September, and the garrison so much intimidated by the taking of Bender, that they abandoned the place, and most of them were drowned in crossing the river. During this campaign, it was reckoned that the Russians took 1000 pieces of cannon from their enemies.—This year also a Russian fleet of 16 or 18 ships entered the Mediterranean, and landed a body of troops on the Morea. These being joined by the Greeks, committed great cruelties on the Turks, and made themselves masters of almost the whole country. At last, however, the Porte, notwithstanding their bad success in other parts, found means to send a force into the Morea sufficient to overpower the Russians. The Greeks now suffered in their turn; and the Russians, hearing that a Turkish fleet had passed the Dardanelles, abandoned the Morea, and failed to meet their antagonists. A battle ensued, in which the Turks were defeated; and having imprudently retired into a neighbouring harbour, they were next day entirely destroyed by the Russian fire ships, except one ship of 64 guns, which was taken. This fleet consisted of 15 ships of the line, from 66 to 60 guns, three large frigates, and 7 large armed vessels, besides galleys. After this victory, the Russian fleet blocked up the mouth of the Dardanelles, interrupted the Turkish trade, prevented the carrying of provisions to Constantinople by sea, and raised contributions from most of the islands in the Archipelago.

(17.) **TURKEY, HISTORY OF, TO THE DEFEAT OF THE GRAND VIZIR'S ARMY AND RECAPTURE OF GIORGIOW.** In 1771, matters did not at first go on so successfully on the part of the Russians. On the side of the Danube, they were obliged to keep on the defensive. Another army, under prince Dolgorucki, had better success; they reduced the whole peninsula of Crim Tartary in less than a month, though defended by an army of 50,000 men.—During these transactions the Turks made themselves masters of the fortrefs of Giorgiow; which enabled them to become so formidable on the side of Walachia, that prince Repnin durst not attack them. Upon his refusal to do so, he was deprived of his command; which was given to General Essen. On the 17th August, he attacked the Turkish intrenchments; but, after a desperate engagement of four hours, was defeated, with the loss of upwards of 3000 men. This was the only engagement of any consequence in which the Turks had proved victorious since

the beginning of the war; and, after it, their usual bad fortune attended them. In consequence of their victory, they determined to winter on the N. side of the Danube, which would have been of the utmost service to them; and with which view they considerably reinforced their army in Walachia. But general Romanzow, by a train of masterly dispositions, not only thwarted all their schemes, but surprised them on their own side of the river. They had divided their army into two great bodies, which were stationed in the nearest and most important posts on the Turkish side of the Danube. On the 20th of October, one of these bodies was surprised at Tuliza by general Weismann, and another at Maczin by general Miloradowits. The event was the same in both places. The intrenchments were forced, the Turks totally routed, and their artillery, stores, and magazines taken, together with their towns and their castles. Next day general Weismann attacked the grand vizir himself, with the like success. The intrenchments were forced, a vast quantity of artillery taken, and likewise the town and castle of Babadagh; while the vizir, with the remains of his army, fled 30 miles to seek refuge at Mount Hemus. A few days afterwards general Essen defeated another body of Turks, and retook the fortrefs of Giorgiow, driving the enemy totally out of Walachia. The Russian fleet this year spread ruin and desolation through the defenceless islands of the Archipelago and the coasts of Asia, striking terror into the city of Constantinople itself. A dreadful pestilence raged this year in the Turkish army; and in autumn broke out at Moscow, where it destroyed vast numbers.

(18.) **TURKEY, HISTORY OF, TO THE DEATH OF GEN. WEISMAN.** The affairs of the Turks were now in such a desperate condition, that they very eagerly sued for peace. The only conditions on which this could be obtained, however, were, that the CRIMEA, Budziac Tartary, and all that vast tract of country on the coast of the Black Sea, as far as the N. shore of the Danube, should continue for ever under the dominion of Russia; that the Russians should enjoy an unlimited freedom of navigation on the Black Sea, together with the possession of the city of Asoph, on the mouth of the Don; and that a sum of money should be paid them by way of indemnification for the expences of the war. These terms, however, were rejected; and the negotiations, which continued through the whole year 1772, at last came to nothing. The commissioners on both sides retired from Bucharest, the place where the congress was held, on the 22d March 1773. For some time a desultory kind of war was carried on between detachments from the two armies. But as this was very prejudicial to the Russians, who could not be so easily recruited as the Turks, about the middle of June, Romanzow prepared for passing the Danube with the grand Russian army, consisting of 87,000 men: which, however, he did not accomplish till the 24th; when he marched with his army, in large divisions, towards the city of Silistria. He was terribly harassed on his march by large bodies of the Turkish cavalry, of whom the grand vizir had detached 27,000 for this purpose. At last,

123, however, they arrived before the city, which was strongly fortified, and defended by a body of troops consisting of about 24,000 men. On the 29th of June, this body was defeated by Gen. Weisman, who commanded the van of the Russian army, and forced to retire into Silitria. The grand vizir then detached 30,000 men to the relief of the place; upon this the Russians found it necessary to retreat; which was not accomplished without very great difficulty and loss. In this retreat general Weisman was killed, and the army left all their magazines behind them.

(19.) TURKEY, HISTORY OF, TO THE PEACE WITH RUSSIA, in 1774. Many other severe conflicts happened this campaign, which proved less glorious to the Russians than any of the former ones. In 1774, however, their arms were attended with better success. On the 11th Jan. 1774, the sultan MUSTAPHA III. died in his 17th year, and was succeeded by his brother ACHMET IV. the present sultan, although he left 4 sons, whom Achmet, with more than usual humanity, only keeps in confinement. Romanzow's army was reinforced by 40,000 men; and, on the night between the 16th and 17th of June, passed the Danube in spite of all opposition. A continued series of engagements then happened between the Russian generals and different bodies of the Turks. In these the latter were always defeated; and at last became so much dispirited, that a body of 40,000, or, according to some accounts, of 70,000 Turks, fled at the first sight of a body of their enemies greatly inferior in number, leaving behind them all their tents and baggage, with a fine train of brass artillery. From this time, disorder, mutiny, and dismay, seized all the Turkish armies, and they absolutely refused to face their enemies; and the ministers of state were obliged to furnish them with vessels for their transportation into Asia. According to some accounts, no fewer than 140,000 of the Turkish troops deserted in this manner. Even in the grand vizir's camp at Schunla, matters went on in the same manner. He was abandoned by his whole cavalry; his European and Asiatic troops quarrelled, and cut one another to pieces before his face; and, in short, the vast army he commanded was reduced almost to nothing. The Russian general did not fail to take advantage of these misfortunes. He placed the different divisions of his army in such advantageous situations, that he totally cut off all communication between the Turkish camp and every mean of subsistence. The unfortunate yizir, therefore, was obliged at last to submit to the terms which Romanzow dictated to him. The principal articles were, the independency of the Crimea; the absolute cession of Kilburn, Kerche, and Jenickal, and all the country between the Bog and the Nicper; a free navigation in all the Turkish seas, in which was included the passage through the Dardanelles, with all the privileges and immunities which were granted to the most favoured nations. Russia gave up all her conquests, except Afoph and Taganrock. There were, besides, several stipulations in favour of the inhabitants of Moldavia and Walachia, and the Greek islands which were restored by Russia.

(10.) TURKEY, HISTORY OF, TO THE WAR

WITH AUSTRIA, AND SURRENDER OF CHOCZIN. Soon after this period an extraordinary alarm was excited at the Porte by the sudden appearance of a *new prophet* in Upper Asia. This man, whose name was *Sheik Mansour*, pretended that he was predestined by the eternal and immutable decrees of Heaven to fill up the measure of Divine revelation to mankind; and that as he was to be the *last*, so he was the greatest of the prophets. The scene of his ministry was in the wide and desolate regions on the borders of the Caspian Sea; and though the first rumour of his proceedings represented him as at the head of a multitude of armed enthusiasts, ready to overturn the established government and religion of Mahomet, it was soon discovered that all the military fury of his zeal was directed against the Christians. He had even influence enough to form a combination of all the nations of Caucasian Tartars against the Russians, which was certainly of some service to the Turks in that war which the empress Catherine was now meditating against them. In the mean time, while this war was impending, the most formidable rebellion broke out in Egypt, the granary of the Turkish empire (see EGYPT, § 30); but it was, after a long, bloody, and dangerous war, almost suppressed by the wise conduct and intrepid bravery of Hassan Bey, the Captain Pacha or Grand Admiral, who, at the age of 70, fought with all the ardour of youth, and all the skill of the most consummate general. That veteran, however, was recalled before he was able to carry all his patriotic designs into execution, that he might aid the divan with his counsel, in the critical situation into which the empire was brought by the claims of the court of Russia. The result of the deliberation was a precipitate declaration of war against that court, contrary to the better judgment of the old Pacha. The war commenced in autumn 1787, and the hordes of Tartars which were first brought into the field, headed by the new prophet, were every where defeated by the superior discipline of the Russian troops commanded by Prince Potemkin. Some enterprises which were undertaken by the Turks against the island of Tamen and the Crimea were attended with as little success as the attempts of the Tartars; while the Emperor Joseph declared to the Porte that he would assist his ally the empress of Russia with an army of 80,000 men. Four Austrian armies were accordingly assembled; one at Carlsbad in Croatia, under Gen. de Vins; another at Peterwaradin in Hungary, under Gen. Langlos; a 3d on the borders of Lithuania, under Gen. Febris; and the 4th in the Bukovina, under the prince of Saxe Cobourg. Two other generals, ten lieutenant-generals, and 30 major-generals, were all ordered to prepare for active service in the frontier armies. If any thing had been yet wanting to show the fixed determination of the court of Vienna, the sending Gen. Alvinzi to act in and observe the conduct of the Russian armies during the war, and the receiving a Russian officer of equal rank to act the same part in the Austrian, would have been alone a sufficient explanation. The war between the Turks and Austrians was carried on with various success. At first the advantage was evidently on the side of the Ottoman

ians, and Joseph II. acquired no warlike renown. His declared purpose was to get possession of Belgrade; from which, however, his enemies repulsed him with disgrace. The prince of Saxe-Cobourg, in his department of the war displayed indeed prodigies of valour; but being opposed to a superior force, he was long obliged to act only on the defensive. At length, being joined by a body of Russian forces under Gen. Soltikow, preparations were made for commencing in form the siege of Choczim, which was surrendered to the allied armies on Michaelmas day 1788, after a defence which would have done honour to the ablest general in Europe. Still, however, success seemed to lean to the Turks. The grand vizir made a sudden incursion into the Bannat, and spread consternation and dismay to the very gates of Vienna. The Austrian affairs seemed approaching to a very alarming crisis. The first campaign of an invasive war had already produced an impression on the territory of the invader.

(21.) **TURKEY, HISTORY OF, TO THE CAPTURE OF OCZAKOW.** In this situation of affairs Marshal Laudohn was with some difficulty drawn from his retirement to take the command of the army in Croatia; and under his auspices fortune began to smile on the Austrian arms. He quickly reduced *Dubecz* and *Nevi*, though they were both defended with the most obstinate bravery. He then sat down before Turkish GRADISCA; but the autumnal rains coming on with such violence that the Saave overflowed its banks, he was compelled to raise the siege. During this period the war in the Bannat raged with the utmost violence; torrents of blood were shed, and much desperate valour, and many brave actions performed on both sides, while a great part of that unfortunate country suffered all the desolation that fire and sword could inflict. The inhabitants were objects of commiseration; but the injustice with which the emperor had commenced the war, made his personal losses be considered as the just reward of his conduct. Hitherto the Russians had hardly entered into the war; but at last they began to act with vigour both by sea and land. They experienced however a very general coldness with respect to their claims, pretensions, and designs, in almost all the courts of Europe. The court of London prohibited British seamen from entering into foreign service, and declared its resolution to observe the strictest neutrality. The United Provinces of Holland pursued the same line of conduct. In the mean time a vast Russian army, estimated at 150,000 men, appeared on the banks of the Bog, adjoining to the confines of Poland, Turkey, and Tartary, and on the way to the Black Sea, under prince Potemkin and Gen. Romanzow; assisted by prince Reppin, Gen. Soltikow, and other commanders. This great force was supported by a train of 137 pieces of artillery, besides a vast park of heavy battering cannon and mortars, destined for the siege of OCZAKOW; and furnished with an exuberance of powder, ball, shells, and military machines. After the most obstinate defence OCZAKOW was taken on the 17th of Dec. 1788, and the governor basha graced the triumphant return of Prince Potemkin to Peterburgh. In the mean time Russia found herself

attacked by a new and formidable enemy in the Swedish monarch, of whose exploits we have given an account elsewhere (see SWEDEN, § 45, 46, 48); and by his interference her conquests were certainly retarded.

(22.) **TURKEY, HISTORY OF, TO THE PEACE WITH AUSTRIA, AND CAPTURE OF ISMAIL.** Marshal Laudohn renewed his attempts upon Gradisca as soon as the season would permit, and after a brave defence it fell into his hands. This with some other successes roused the emperor from his inactivity, and made him seriously determined upon the attack which he had long meditated upon Belgrade. The enterprise was entrusted to Laudohn, who, with that good fortune which seemed constantly to attend him, made himself master of the place in less than a month. The rest of the campaign was little else than a succession of the most important successes; and a circumstance that did not a little contribute to this, was the system adopted by the Austrians and Russians, of suffering the Turkish troops to march out of the several places they garrisoned without molestation. Accordingly, while one detachment of General Laudohn's forces took possession of Czernitz in Walachia, another made itself master of Cladova in Servia. Bucharest, the capital of the former of these provinces, fell without opposition into the hands of Prince Cobourg; while Akerman on the Black Sea was reduced by the Russians; and Bender surrendered to Prince Potemkin, not without suspicion of sinister practices, on the 13th of November. In 1790, the emperor JOSEPH II. died, and his successor LEOPOLD II. showed a desire for peace. After the reduction of Orsova, therefore, which happened on the 16th of April 1790, the war was carried on with languor on the part of Austria; and in June a conference was agreed upon at Reichenbach, at which the ministers of Prussia, Austria, England, and the United Provinces assisted, and at which also an envoy from Poland was occasionally present. After a negotiation, which continued till the 17th August, it was agreed that a peace should be concluded between the king of Hungary and the Ottoman Porte; that the basis of this treaty should be a general surrender of all the conquests made by the former, retaining only Choczim as a security till the Porte should accede to the terms of the agreement, when it was also to be restored. Catherine was thus deprived of an ally, but still she continued the war. On the 22d of December 1790, the fortress of Ismail was taken by storm by General Suwarrow; and it is said that the siege and the capture did not cost the Russians less than 10,000 men. The most shocking part of the transaction is, that the garrison (whose bravery merited, and would have received from a generous foe the highest honours) were massacred in cold blood by the merciless Russians, to the amount of, by their own account, upwards of 30,000 men; and the place was given up to the unrestrained fury of the brutal soldiery. After this bloody scene, the Russians went into winter quarters; the vizir retired towards Constantinople, and on his return fell a sacrifice to the sanguinary policy which has long disgraced the Ottoman counsels.

(23.) **TURKEY, HISTORY OF, TO THE PEACE WITH**

WITH RUSSIA, in 1791. The campaign of 1791 opened on the part of Russia with the taking of Maczin, on the 4th April, by Prince Gallitzin; and in a subsequent victory on the 12th by the same general, in the neighbourhood of Brailow, the Turks lost not less than 4000 men and upwards of 100 officers, besides many pieces of cannon. On the 14th the Russian arms experienced a check, by which they lost about 700 men, and were obliged to relinquish the intention of besieging Brailow. After reinforcing this place, the vizir proceeded to the banks of the Danube near Silistria; and, by a bridge which he threw across the river, his advanced posts were enabled to make incursions on the opposite side. The ability of the vizir and the valour of the Turks were however exerted in vain against the discipline and experience of European armies. In June, 15,000 Turks were defeated by a party of cavalry under General Kutusow. On the 3d July the fortress of Anapa was taken by General Gudowitch, and the garrison, of 6000 men, made prisoners. This event was followed, on the 9th of the same month, by a signal victory which Prince Repnin obtained near Maczin over a body of 70,000, the flower of the Turkish army. The Ottomans left upwards of 4000 dead upon the field of battle, and lost their entire camp equipage, colours, and 30 pieces of cannon. The Russians are said to have lost only 150 men killed, and between 200 and 300 wounded. At last peace was restored between the Porte and Russia, principally through the mediation of Great Britain and the northern powers. Catherine II. confined her views at length to the possession of Oczakow, with the district extending from the Bog to the Neister, and even then providing for the free navigation of the latter river. These terms, considering the ill success of the war, cannot be accounted very disadvantageous to the Porte, who has lost a fortress more useful for the purpose of annoying Russia than for defending their own territories; but certainly of considerable importance to Russia, which, by this cession, has secured the peaceable enjoyment of the Crimea, the inhabitants of which are certainly highly indebted to the late empress, for the measures she adopted for their improvement and civilization, by establishing schools, academies, &c. See TARTARY, § III; TOMSK, &c.

(24.) TURKEY, HISTORY OF, TO THE PRESENT TIME. Nothing very important, either to Turkey or the world, has occurred in the history of this empire since the peace with Russia which we have mentioned. The Porte has been alternately at war with Great Britain and with France; but in neither contest has she acquired either honour or territory. The Turks declared war against the Russians on the 30th of December 1806, urged thereto by French intrigue; and our famous Fox administration attempted what they probably meant as a diversion in favour of the Russians. (See REVOLUTION, vi. 51.) After Bonaparte compelled the feeble Emperor Alexander to ratify the treaty of Tilsit, (See the same article, 50.) he encouraged for his own purposes the war between Russia and Turkey; in which however nothing decisive on either side occurred, and which was happily ended before the tyrant's grand attack on Rus-

sia, of which we have given a hasty sketch under the article WAR, § 238. The only remarkable fact therefore with respect to Turkey which we have still to record, is the revolution which placed Mustapha IV. on the Ottoman throne. In the spring of 1807, a spirit of revolt appeared among the janizaries in the grand vizier's camp, and a garrison at the Dardanelles. On the 15th of May the troops in garrison in the various castles of the Dardanelles, accounted for their insubordination, by objecting to the European uniform, the new tactics, &c. Hali Aga, commandant of Madichirbarna on the Asiatic shore, was put to death. Indische Bey, commandant of the entrance of the Black Sea, escaped the same fate only by flight. The Reis effendi coming at that time to inspect that post, the janizaries accused him as one of the patrons of the nizâm geded. He attempted to escape; but he and his attendants were all sacrificed. He was particularly disliked, as he had promised to raise the pay of the janizaries on condition of their submitting to the new discipline; and this promise was never performed. Other circumstances contributed to excite and increase their rage, and they determined with vigor and foresight to overthrow all their enemies. The sultan Selim for a time determined to defend himself, and troops and ammunition, &c. were brought to the seraglio. Soon after, the Mullahs, the Seimen bashes, &c. joined the revolted janizaries. A formal council was held, in which it was proposed to request the grand seignior to abolish the new discipline, &c. Selim thought he should be able to stop the insurrection, by sending the heads of Mahmud, Tersana Emiri, Haggai Ibrahim, &c. to the Emeldan, where the janizaries were in force. In this, however, he was disappointed. The janizaries were more enraged than ever. They admired and lamented Mahmud effendi, and demanded the head of the Reis effendi then in the grand vizier's camp. The janizaries searched every where for those officers who had countenanced and promoted the adoption of the European discipline, and fourteen of them they found and massacred. At this time Selim sent a letter in his own hand, abolishing for ever, and execrating the nizâm geded; but this the revolted troops would not now accept. The deposition of the grand seignior was determined on. Mustapha IV. born 7th September, 1799, eldest son of Sultan Achmet IV. set aside in 1789, was called to the throne. The solemn invitation to Mustapha to ascend the throne, was made on the 29th of May. The ceremony of investing him with the sabre of the Prophet, took place on the 3d of June. According to the ancient and approved custom of this barbarous empire, Selim, the deprived sultan, was put to death by his own nephews, that he might not disturb the tranquillity of the new sovereign Mustapha IV.; at whose feet it is said he threw himself, and killed the border of his garment, after which he submitted to his fate with the feelings of a true Mussulman. Molla Pacha, governor of Widin, is at this time (January 1813) in open rebellion against the Porte; but this is so common in the history of that state, as to excite little attention, and scarcely to require notice. It is said he is secretly

secretly excited by the Russians. Pelivan Aga, his personal enemy, is preparing to reduce him.

(25.) **TURKEY, INHABITANTS OF, DRESS, CHARACTER AND MANNERS OF THE.** The Turks are generally robust and well shaped, of a good mien, and patient of hardships, which renders them fit for war. They shave their heads; but wear their beards long, except the military and those in the seraglio, who wear only whiskers. They cover their heads with a white linen turban of an enormous size, and never put it off but when they sleep. None but Turks must presume to wear a white turban. Their breeches or drawers are of a piece with the stockings; and they have slippers instead of shoes, which they pull off when they enter a temple or house. They wear shirts, with wide sleeves, not gathered at the wrists, and over them a vest tied with a sash; their upper garment being a loose gown, something shorter than the vest. The women's dress pretty much resembles that of the men; only they have a stiffened cap with horns, something like a mitre, on their heads instead of a turban, and wear their hair flowing down. When they go abroad, they are so wrapped up, that their faces cannot be seen. The Turks sit, eat, and sleep, according to the custom of the east, on sofas or cushions, mattresses, and carpets. Rice is their most general food, and coffee their common drink. Their most usual salutation is to bow the head a little, laying the right hand on their breasts; but to persons of rank they stoop so low as to touch the border of their vest. The women are kept under a rigorous confinement. They have generally delicate skins, regular features, black hair and eyes, with an admirable chest. Many of them are complete beauties. Their cleanliness is extraordinary; or they bathe twice a week, and suffer not the smallest hair or the least soil to be upon their bodies. As to the qualities of their minds, they are said to want neither wit, vivacity, nor tenderness, and to be exceedingly amorous. It is no doubt for this reason that the men never suffer their wives faces to be seen, not even by the dearest friend they have in the world. There is no need of much wit to behave one's self well here; or a good mien and gravity supply the place of merit in the east, and much gaiety would spoil all. Not that the Turks want wit; but they speak little, and pride themselves in sincerity and modesty more than eloquence. The Turks use no unnecessary words, whereas the Greeks talk incessantly. Though these two nations are born under one climate, their tempers are more different than if they lived in the most distant countries. The Turks make profession of candour and faithfulness, and are a charitable good-natured people, calous, excepted, and very sober. On the other hand, they are extremely proud, insolent, indolent, superstitious, and covetous. They are also much addicted to unnatural lusts; and despise all other nations in general, especially those which are not of their religion. The common appellation that they give the Christians is that of *dogs*. An uniformity runs through all the actions of the Turks, and they never change their manner of living. They seem to have no kind of genius for the improvement of the arts and sciences, though

they live under the influence of the same heaven, and possess the same countries, as the ancient Grecians did. They generally loiter away their time, either among the women in the harem, or in smoking or taking opium; and though they herd together, you will observe as little conversation among them as amongst so many horses in a stable. They seldom travel, or use any exercise or rural sports, and discover little or no curiosity to be informed of the state of their own or any other country; but Turkey, after all, is not without men of parts, probity, and honour; nor without benevolent, liberal, conversible, and ingenious people. They behave very commendably to their slaves and servants, and frequently better than the Christians do to theirs. There are no hereditary governments or titles of nobility in Turkey; and indeed the commonalty there enjoy the greatest liberty.

(26.) **TURKEY, LANGUAGES, LEARNING, AND SCIENCES IN.** The languages spoken in European Turkey, are the Turkish and Tartarian, which have a great affinity to one another; the modern Greek, which differs widely from the ancient, the Slavonian, and Wallachian. The Arabic is the language of the learned. Learning is at a very low ebb among the Turks; however, they have some schools, colleges, and academies, but they are on a very different footing from those among us. Not many years since a printing-house was set up at Constantinople, where books of all kinds were allowed to be printed, except on matters of religion. The most ingenious Musselmens employ themselves in reading the Alcoran and the commentators upon it, to which almost all their learning is confined. Some of them amuse themselves with poetry, in which they are said to succeed very well. Other Turks delight in music, and spend the whole day in playing upon an instrument, without being tired, though they only repeat the same tune. It is said there are many MSS. in the Turkish, Arabian, and Persian languages, among the Turks; but it is not to be supposed that they contain any very deep, solid, ingenious, or useful learning.

(27.) **TURKEY, MILITARY FORCE OF.** The Turkish regular troops are the spahis and timar spahis, who are light horse. The latter, who have estates in land assigned them instead of pay, are obliged to bring a certain number of slaves into the field with them. The tributary princes of Moldavia and Wallachia, and of Tartary, are also obliged to send auxiliaries. But the flower of the Turkish army consists of the janisaries, who amount to about 40,000, and are all infantry. They have particular privileges, being subject to no jurisdiction but that of their aga or commander. Their pay is three aspers a day, besides victuals, and a suit of clothes every year. They are all lodged at Constantinople together in a sort of barracks, having been educated in the seraglio, and trained up to the exercise of arms from their infancy. Besides the janisaries, there is another body of foot called *sipsis*. The whole Turkish army, regulars and irregulars, amounts to above 300,000 men. Besides the true janisaries, or janisaries of the Porte, and in actual pay, there are great numbers all over the empire, who pro-

cure themselves to be registered in this body, in order to be entitled to their privileges. The bachelors only are capable of bearing offices in the barracks or chambers at Constantinople. When any of the janissaries are disabled in the service, they have an allowance for life. To distinguish them, they wear a cap of a particular make. The emperor's guards are composed of them, and they are feared and respected everywhere, though they carry only a cane in their hand; for arms are not delivered to them but when they take the field. The chief commanders of the army are distinguished by two or three horse-tails carried before them.

(28.) **TURKEY, NAVY OF.** The Turkish navy is not so considerable as might be expected in such extensive dominions, situated on several seas, and abounding in commodious harbours. By their neglecting navigation and foreign commerce, they can never find sailors to man a great fleet; and those they have are unskilful, as well as their pilots and officers. If they would apply themselves to navigation, and make the most of their situation and advantages, they could not fail to become a very formidable maritime power. Their navy generally consists of about 40 large ships, exclusive of galleys. In time of war they hire or buy merchant-ships, and others are sent them from Algiers, Tunis, and Tripoli. The captain-basha, or admiral, is the second officer in the empire, the grand vizir being the only officer above him. His power is absolute when he is out of the Dardanelles; and not only the sea-officers, but all the governors of the maritime provinces, receive orders from him. The pilots are mostly Greeks, and the captains renegadoes. The captain-basha sails round the Archipelago in summer, to collect the capitation tax, and learn the state of affairs in those parts.

(29.) **TURKEY, POPULATION OF.** In Constantinople alone, it is estimated that there are no fewer than 400,000, besides Turks, Jews, Armenians, &c. It is therefore probable, that there are no fewer than a million of souls in the whole empire. The islands in the Archipelago are very populous.

(30.) **TURKEY, PRODUCE OF.** See § 35.

(31.) **TURKEY, RELIGION OF.** Mahometanism of the sect of Omar, is the established religion; but Christians, Jews, and all other sects, are freely tolerated. *Friday* is their *Sabbath*. Their chief priest is called the *MUFTI*. Their places of worship *MOSCHES*.

(32.) **TURKEY, REVENUE OF.** The revenues of the empire are paid either into the public treasury, or into the sultan's private treasury. The former, called by the Turks *deitalmali mustimim*, i. e. *the public money of the Musselmens*, is not to be touched but on the most pressing exigency of the state. The other the sultan may dispose of at pleasure. Prince Cantimir says, in his time, 27,000 purses, amounting to 13,000,000 and a half of crowns, were annually returned to both treasuries; arising from the produce of the customs, demesne lands, the capitation or tax paid by every subject of the empire who is not of the Mahometan religion; the annual tributes paid by the cham of the Crim Tartars, the princes of

Moldavia, Walachia, the little republic of Ragusa, and part of Mingrelia; together with half a million of money out of a million and a half levied annually in Egypt. These are the fixed revenues; but vast sums are also raised by the confiscations of the estates and effects of the bashas and other officers, and from the estates of Turks dying without male issue.

(33.) **TURKEY, SERAGLIO OF.** The chief officers of the seraglio are the *kissar Agasi*, who is superintendent of the women, and has the command of all the black eunuchs; the *CAPAGA*, who has the command of all the white eunuchs, and to whom all petitions to be presented to the prince are delivered. Both these are also eunuchs, and of the same complexion as those of whom they have the command. Besides the women and eunuchs, there are in the seraglio the *iehoglans* and *azamoglans*, mutes, dwarfs, and buffoons. The *iehoglans* are young men bred up in the seraglio, not only to serve about the prince, but to fill in time the first posts of the empire. The *azamoglans* are trained up there for inferior employment. No children are admitted into the seraglio of Constantinople, Pera, or Adrianople, till they are first reviewed and approved of by the grand signior. They are generally the most beautiful, well-made, and sprightly, that can be met with. They are first taught, after being circumcised, silence, and a modest humble behaviour. Then they are instructed in the Mohammedan religion, to speak and write the Turkish language, and afterwards the Persian and Arabic. As they grow up, they are taught many exercises, and whatever is thought requisite to qualify them for state employments; but they are seldom preferred out of the seraglio until the age of 40. The ladies of the harem are a collection of young beautiful virgins, either the presents of governors, purchased, or captives taken in war; most of them being the children of Christian parents. They are taught music, dancing, and other accomplishments, and furnished with the richest clothes and ornaments. Some of them frequently play and dance before the grand signior, while others divert him with their conversation. They have many female slaves to wait on them; but are scarce ever suffered to go abroad, except when the grand signior changes his place of residence, when a troop of black eunuchs convey them to the boats, which are enclosed with lattices; and when they go by land, they are put into close chariots, and signals made at certain distances, to give notice that none may approach the road through which they are to pass.

(34.) **TURKEY, TITLES OF THE EMPEROR OF.** The empire is styled the *Ottoman kingdom* or empire, the *Ottoman Porte*, the *Sublime Porte*, the *Sublime Sultanian Porte*, &c. The appellation of *Porte* is said to be derived from the large gate built by Mohammed II. at the entrance of the seraglio at Constantinople; though the Orientals in general call a royal palace the *king's porte* or gate. The grand signior assumes still more pompous, or rather blasphemous titles, as "God upon earth, the shadow of God, the brother of the sun and moon, the disposer of crowns," &c.

(35.) **TURKEY, TRADE, AND MANUFACTURES OF.** The manufactures and commodities of Turkey

key are silks, carpets, goat's hair, wool, camel's hair, cotton-yarn, dimity, burdets, waxed linen, shagreen skins, Morocco leather; coffee, rhubarb, turpentine, storax, gums, opium, galls, mastic, emery, lemnian hole, pomegranate shells, sponges, dates, almonds, wine, oil, figs, raisins, mother of pearl, boxwood, saffron, &c. The inland trade is carried on chiefly by the Jews and Armenians. No nation is more advantageously situated for traffic than the Turkish; having the navigation of the Black Sea, the Levant, and the Red Sea; but they never attempt distant voyages, and have but few merchant ships. Tyre, Sidon, and Alexandria, which once commanded the navigation and trade of the world, are in their possession, but make no figure in commerce at this day. Several European Christian nations have envoys and residents at Constantinople, and consuls in other ports. In this empire there is a great traffic in the human species.

(II.) TURKEY, a town of New Jersey, in Essex County, on the banks of the Passaic. It has a Presbyterian church, and is 79 miles N.E. by N. of Philadelphia.

(III.) TURKEY, a town of Georgia, 60 miles N. of Oakessee.

(IV.) * TURKEY, *n. f.* [*gallina turca*, Latin.] A large domestic fowl supposed to be brought from Turkey.—Here he comes swelling like a turkey-cock. *Shak.*—The turkey-cock hath swelling gills. *Bacon.*—Who lately flic'd the turkey's calow care. *Gay.*

(V.) TURKEY, in ornithology. See MELEAGRIS.

(VI.) TURKEYS, REARING-OF. See RURAL ECONOMY, Part IV. Sec. VIII. § IV.

TURKIN, a town of Russia, in the prov. of Caucasus; on the banks of the Caspian Sea; 140 miles S. of Astracan. Lon. 65. o. E. Ferro. Lat. 44. 15. N.

TURKISH, *adj.* Of or from Turkey.

TURKMANS, or TURKMEANIANS. } See TARTARY, § 2.

(1.) * TURKOIS, *n. f.* [*turquoise*, French, from *turkey*.] A blue stone numbered among the meaner precious stones, now discovered to be a bone impregnated with cupreous particles.—The *turquois* stone is part of a bone tinged with green or blue. *Woodward.*

(2.) TURKOIS. See TURQUOISE.

TURKOMANS. See TARTARY, § 2.

(1.) * TURKSCAP, *n. f.* [*martagon*.] An herb. *Ainsworth.*

(2.) TURK'S CA., is a species of LILIUM.

TURLAMORE, a town of Ireland, in Clare.

TURLOUGHMORE, a town of Ireland, in Galway.

TURLINGTON, a celebrated English Quack, who made a fortune in Q. Anne's reign, by his *Balsam of Life*.

* TURM, *n. f.* [*turma*, Lat.] A troop. Not in use.—Legions and cohorts, *turns* of horse and wings. *Milton.*

TURMA. See DECURIA.

(1.) * TURMERICK, *n. f.* [*turmerica*, Latin.] An Indian root which makes a yellow dye.

(2.) TURMERICK, in botany. See CURCUMA, and LAKY § 3.

* TURMOIL, *n. f.* [derived by *Skinner* from *tremouille*, French, a mill-hopper, more probably derived from *mail*, to labour.] Trouble; disturbance; harassing uneasiness; tumultuous molestation. Little in use.—Torment and *turmoil*. *Spenser.*

After much *turmoil*

A blessed foul doth in elysium. *Shak.*

—Blinded greatness ever in *turmoil*. *Daniel.*

From this *turmoil* set free. *Denham.*

* To TURMOIL, *v. a.* [from the noun.] 1. To harass with commotion.—That wretched realm hath continually been *turmoiled*. *Spenser.*—Miserably tossed and *turmoiled*. *Spenser.*—Did earth, and heav'n, and Jove himself *turmoil*. *Dryden.* 2. To weary; to keep in uneasiness.—Toil and *turmoil'd* in fathomless and unquiet deeps of controversy. *Milton.*

(1.) * TURN, *n. f.* [from the verb.] 1. The act of turning; gyration. 2. Meander; winding way.

Fear milled the youngest from his way;

But Nilus hit the *turns*. *Dryden.*

3. Winding or flexuous course.—*Turns* and windings. *Addis.* 4. A walk to and fro.—Come, you and I must take a *turn* together. *Shak.*—I'll take a *turn* in your garden. *Dryd.*—Take a *turn* or two upon it. *Collier.* 5. Change; vicissitude; alteration.—The *turns* and varieties of all passions.

Hooker.—Oh, world, thy slippery *turns*! *Shak.*

The state of Christendom might by this have a *turn*. *Bacon.*—This *turn* hath made amends. *Milt.*

—This *turn's* too quick to be without design. *Dryden.*—Too well the *turns* of mortal chance I know. *Pope.*—The several *turns* of state. *Locke.*

6. Successive course.—Nobleness and bounty had their *turns* in his nature. *Bacon.* 7. Manner of proceeding; change from the original intention or first appearance.—The matter that fed them takes another *turn*. *Bluckem.*—The wife turn they thought to give the matter. *Swift.* 8. Chance; hap.—Every one has a fair *turn* to be as great as he pleases. *Col.* 9. Occasion; incidental opportunity.—Loaden at every *turn* with blows and reproaches. *L'Estr.* 10. Time at which by successive vicissitudes, any thing is to be had or done.

—Take your *turn* to speak. *Bacon.*—His *turn* will come to laugh at you again. *Den.*—And now the peaceful planets take their *turn*. *Dryd.*—When it came to their *turn* to govern. *Atter.*—Of these in their *turns*. *Arbut.*—The nymph will have her *turn*. *Swift.* 11. Actions of kindness or malice.—Thanks are half lost when good *turns* are delay'd. *Fairfax.*—Some natures delight in doing ill *turns*. *L'Estr.*—Shrewd *turns* strike deeper than ill words. *South.* 12. Reigning inclination.—The *turn* and fashion of the age. *Swift.* 13. A step off the ladder at the gallows.—Or take a *turn* for it at the session. *Butler.* 14. Convenience; use; purpose; exigence.—Diogenes' dish did never serve his master for more *turns*, notwithstanding that he made it his dish, cup, cap, measure, and water-pot. *Spens.*—They never found occasion for their *turn*. *Hubberd.*—His going I could frame to serve my *turn*. *Shak.*—My daughter Catharine is not for your *turn*. *Shak.*—Who first did serve their *turn*, and now serves his. *Dan.*—They had served their *turns*, often. *Clar.*—Neither will this

X X X X shift

shift serve the *turn*. *Wilkins*.—It will serve the *turn*. *Temple*. 15. The form; cast; shape; manner.—The *turn* of his thoughts and expressions. *Dryd*.—It gives my thought a *turn* that makes my heart the better. *Addif*.—Female virtues are of a domestick *turn*. *Addif*.—An agreeable *turn*. *Add*.—The *turn* of his neck and arms. *Addison*.—A sprightly *turn*. *Speer*.—Books give the same *turn* to our thoughts. *Swift*.—The *turn* of voice. *Watts*.—They will try to give all things a false *turn*. *Davenant*.—The whole *turn* of their expressions. *Arbut*. 16. The manner of adjusting the words of a sentence.—The *turn* of words. *Dryd*.—The *turn* of expression. *Addif*. 17. New position of things; as, something troublesome happens at every *turn*. 18. By *Turns*. One after another; alternately.—They feel by *turns* the bitter change. *Milton*.—By *turns* the tuneful muses love to sing. *Dryden*.—By *turns* put on the suppliant, and the lord. *Prior*.

(2.) *TURN*, in geography, a town of Walachia, at the conflux of the Danube and Alant, 34 miles E. of Orfova, and 24 S. of Brancovan.

(1.) * *To TURN*. v. a. [*turnan*, Sax. *tourner*, Fr. from *torno*, Latin.] 1. To put into a circular or vertiginous motion; to move round; to revolve.—She would have made Hercules *turn* the spit. *Shak*.—He *turn'd* me about with his finger and thumb. *Shak*.—Turning the key. *Shak*.—Turn swift their various motions. *Milt*. 2. To put the upper side downwards; to shift with regard to the sides.—What care does the hen take in turning the eggs frequently. *Addif*. 3. To change with respect to position.—When to advance, or stand, or *turn*. *Milt*.—He bid his angels *turn* ascanse the poles. *Milton*. 4. To change the state of the balance.—A feather will *turn* the scale. *Shak*.—A single soul's too light to *turn* the scale. *Dryden*. 5. To bring the inside out.—He told me I had *turn'd* the wrong side out. *Shak*.—Up from the bottom *turn'd* by furious winds. *Milton*. 6. To change as to the posture of the body, or direction of the look.—Turne head, ye well-rod peeres of Troy. *Chapm*.—His gentle dumb expression *turn'd* at length. *Milton*.—The monarch turns him to his royal guest. *Pope*. 7. To form on a lathe by moving round, (*torno*, Lat.)—This is the whole sum of turning. *Moxon*.—The lathe is made strong, because the matter it turns is metal. *Moxon*. 8. To form to shape.—His person is finely *turned*. *Tat*.—His limbs how *turn'd*, how broad his shoulders spread! *Pope*. 9. To change; to transform; to metamorphose; to transmute.—

My throat of war be *turn'd*

To the virgin's voice.

This mock of his

Hath *turn'd* his balls to gunstones.

Shak.

Shak.

—Turn the council of Ahiathophel into foolishness. *Sam*. xv.—Impatience turns an ague into a fever. *Taylor*.—O goodness! that shall evil *turn* to good. *Milt*.—To turn—metals of drossier ore to perfect gold. *Milton*. 10. To make of another colour.—The choicer of a hog *turned* syrup of violets green. *Floyer*. 11. To change; to alter.—Could *turn* so much the constitution. *Shak*. 12. To make a reverse of fortune.—And when they least expect it, turns the dice. *Dryden*. 13. To translate.—Who turns a Persian tale for half a crown. *Pope*. 14.

To change to another opinion, or party, worse or better; to convert; to pervert.—Turn ye not unto idols. *Lev*. 15. To change with regard to inclination or temper.—Turn thee unto me, and have mercy upon me. *Pf*. xxv. 16. To alter from one effect or purpose to another.—That unreasoningness they *turn* to soothing themselves. *Hooker*.—Turn it into advantage. *Taylor*.—Turning them to advantage in this world. *Tillot*. 17. To betake.—Sheep, and great cattle, it seems indifferent which of those two were most *turned* to. *Temple*. 18. To transfer.—These came to David, to turn the kingdom of Saul to him. *1 Chron*. xii. 23. 19. To fall upon by some change.—The destruction of Demetrius *turned* upon the father. *Bacon*. 20. To make to nauseate.—The fight of a luxurious feeder, would *turn* his stomach. *Fell*.—This beastly line quite turns my stomach. *Pope*. 21. To make giddy.—And turn their heads to imitate the fun. *Pope*. 22. To infatuate; to make mad; applied to the head or brain.—This cursed love will surely *turn* my brain. *Theocrit*.—A man who has his head *turned* with religious enthusiasm. *Addison*.—Her brain, I fear, is *turn'd*. *Rowe*. 23. To change direction to, or from any point.—Turn rein from th' equinoctial road. *Milton*.—He turns his eyes. *Locke*.—Unless he turns his thoughts that way. *Locke*.—They turn away their eyes. *Addison*. 24. To direct by a change to a certain purpose or propension.—My thoughts are *turn'd* on peace. *Addison*.—This turns the busiest spirits from the old notions of honour. *Addison*.—His natural magnanimity *turn'd* all his thoughts. *Addif*.—He *turn'd* his parts to books. *Prior*.—A soul *turn'd* to poetry. *Pope*. 25. To double in.—But turns at ev'ry seam an inch in. *Swift*. 26. To revolve; to agitate in the mind.—Turn these ideas about in your mind. *Watts*. 27. To bend from a perpendicular edge; to blunt.—Sharp tools, whose edges be very soon *turn'd*. *Ascham*. 28. To drive by violence; to expel; with out, or out of.—Rather *turn* this day out of the week. *Shak*.—They *turn'd* weak people out of the city. *Knolles*.—And fit to be *turn'd* out of door. *Hudibras*.—Turn'd myself out of my benefice. *Dryden*.—God would turn him out of paradise. *Locke*.—Turn'd the good man out of his dwelling. *Addif*. 29. To apply by a change of use.—

They all the sacred mysteries of heaven

To their own vile advantages shall *turn*.

—Land will be *turned* most to great cattle. *Temple*.

30. To reverse; to repeal.—God will *turn* thy

captivity. *Deut*. xxx. 31. To keep passing in a

course of exchange or traffick.—These yield the

readiest money of any that are *turn'd* in this king-

dom. *Temple*.—A man must *turn* the penny. *Col-*

lier. 32. To adapt the mind.—He was perfectly

well *turn'd* for trade. *Addif*. 33. To put towards

another.—I will make all thine enemies *turn* their

backs unto thee. *Exod*. 34. To retort; to throw

back.—His conscience turns these very reasonings

upon him. *Atterbury*. 35. To TURN away. To

dismiss from service; to discard.—She had hoped

to *turn away* the fancy that master'd her. *Sidney*.

—Yet you will be *turn'd away*. *Shak*.—She *turn'd*

away one servant. *Arbut*. 36. To TURN away.

To avert.—We pray to God to *turn away* evil

from us. *Duty of Man*. 37. To TURN back. To

return

turn to the hand from which it was received.—*Ve turn not back the silks upon the merchant. bak.* 38. To TURN off. To dismiss contemptuously.—Then take we down his load, and turn him off. *Shak.*—The murmurer is turn'd off. *Gov. Tongue.*—He turn'd off his former wife. *Addis.* 9. To TURN off. To give over; to resign.—We're not so wholly turned off to that reverſion, as to have no ſupplies for the preſent. *Decay of Piety.* 10. To TURN off. To deſect; to divert.—To turn off the thoughts of the people. *Addis.* 41. To be TURNED off. To advance to an age beyond. An odd ungrammatical phraſe.—Juſt turn'd off boy, and on the verge of man. *Ovid.*—When turned off. *Addis.* 42. To TURN over. To tranſfer.—Turning over the fault to fortune. *Sidney.* 43. To TURN over. To refer.—After he had ſaluted Soyman, he was turn'd over to the Baſſa's. *Knolles.*—You turn me over to another hand. *Dryd.* 44. To TURN over. To examine one leaf of a book ſter another.—To turn over a concordance. *Swift.* 5. To TURN over. To throw off the ladder.—Are blinded firſt, and then turn'd over. *Butler.* 6. To TURN to. To have recourſe to.—Turn to theſe rules. *Grew.*—They may be turn'd to on all occaſions. *Locke.*

(2.) * To TURN. v. n. 1. To move round; to have a circular or vertiginous motion.—They turn round like grindſtones. *Ben Jonſ.*—The gate on golden hinges turning. *Milt.*—Long turning round. *Bacon.* 2. To ſhew regard or anger, by directing he look towards any thing.—Pompey turned upon him and bade him be quiet. *Bacon.*—The underſtanding turns inwards on itſelf. *Locke.*—Turn, mighty monarch, turn, this way. *Dryden.* 3. To move the body round.—Seeing me ſhe turn'd. *Milton.*—He ſaid, and turning ſhort with ſpeedy pace. *Dryd.* 4. To move from its place.—The ſkeleton is apt to turn out on either ſide. *Wiſem.* 5. To change poſture.—Theſe dice could turn upon no other ſide. *Cheyne.* 6. To have a tendency or direction.—His cares all turn upon Altyanax. *A. Phillips.* 7. To move the face to another quarter.—The morning, as miſtaken, turns about. *Dryd.* 8. To depart from the way; to deviate.—My lords turn in, into your ſervant's houſe. *Gen. xix.* 2.—Virgil turns ſhort on a ſudden into ſome ſimilitude. *Dryd.* 9. To alter; to be changed; to be transformed.—Wood will turn into the nature of ſtone. *Bacon.*—Your bodies may at leaſt turn all to ſpirit. *Milton.*—A ſtorm of ſad miſchance will turn into ſomething good. *Taylor.*—This ſuſpicion turned to jealousy. *Dryd.*—When the wide earth o heaps of aſhes turn'd. *Pope.*—Butter that turns to oil. *Swift.* 10. To become by a change.—Cygnets from grey turn white. *Bacon.*—They will turn into a mouldy ſubſtance. *Boyle.*—They turn viragos too. *Dryd.*—The gall will turn of a blackiſh colour. *Arb.* 11. To change ſides.—I turn'd, and try'd each corner of my bed. *Dryd.*—A man on a fever turns often. *Swift.* 12. To change the mind, conduct, or determination.—Turn from thy fierce wrath. *Exod.*—Turn at my reproof. *Prov.*—He will relent and turn from his diſpleaſure. *Milton.* 13. To change to acid. Uſed of milk.—It turns in leſs than two nights. *Shak.*—Aſſes milk turneth not ſo eaſily as cows. *Bacon.* 14. To be brought eventually.—Something which may

turn to their advantage. *Locke.*—Every thing we do may turn to account at the great day. *Addis.*—Theſe things might turn to his deſtruction. *Addis.*—They have not turned to any great account. *Baker.* 15. To depend on, as the chief point.—The queſtion turns upon this point. *Swift.*—Conditions of peace certainly turn upon events of war. *Swift.*—Which reduces into one important action all the particulars upon which it turns. *Pope.* 16. To grow giddy.—Left my brain turn. *Shak.* 17. To have an unexpected conſequence or tendency.—Afflictions ſhall turn to our advantage. *Wake.* 18. To TURN away. To deviate from a proper courſe.—The turning away of the ſimple ſhall ſlay him. *Prov.* 19. To return; to recoil.—His foul eſteem—turns foul upon himſelf. *Milton.* 20. To be directed to, or from any point; as the needle turns to the pole. 21. To change attention or practice.—Forthwith from dance to ſweet repaſt they turn. *Milton.* 22. To TURN off. To divert one's courſe.—Turn off with care, for treacherous rocks are near. *Norris.*—This word, through all the variety of its applications, commonly preſerves that idea of change which is included in its primary meaning; all gyration, and all deſlection being change of place; a few of its uſes imply direction or tendency, but direction or tendency is always the cauſe and conſequence of change of place.

TURNAU, a town of Bohemia, in Boheſlaw; 44 miles NNE. of Prague, and 14 NE. of Jung-Buntzel.

* TURNBENCH. n. ſ. [turn and bench.] A term of turners.—Small work in metal is turn'd in an iron lathe called a *turnbench*, which they ſcrew in a vice, and, having fitted their work upon a ſmall iron axle, with a drill barrel, fitted upon a ſquare ſhank, at the end of the axle, next the left hand, they with a drill-bow, and drill-ſtring, carry it about. *Maxon.*

* TURNCOAT. n. ſ. [turn and coat.] One who forſakes his party or principles; a renegade.—Then is courteſy a turncoat. *Shak.*

TURNDORF, a town of Bavaria, 21 m. NW. of Amberg, and 32 NE. of Nuremberg.

TURNEBUS, Adrian, an eminent critic, born in 1512. His father was a Scotch officer whoſe name was Turnbull, which Adrian varied to *Turnebe*, in Latin *Turnebus*. He acquired ſo extenſive a reputation by his learning that he had great offers made him from Italy, Germany, and England; but he preferred poverty in France to riches anywhere elſe. He taught polite literature firſt at Toulouſe; but in 1547 went to be Greek profeſſor at Paris, in 1552, he took upon him the care of the royal Greek preſs for three years, when he quitted it on being admitted into the number of royal profeſſors. He died in 1565; and his works, which are all in Latin, were printed at Straſburg, in one vol. folio, 1600.

TURNEFF, an iſland in the bay of Honduras, near the coaſt of N. America; 30 m. long: Lon. 88. 20. W. Lat. 17. 15. N.

(1.) TURNER, in botany, a ſpecies of BRASSICA. For the culture of theſe, ſee RURAL ECONOMY, Part II. Sect. III.

(2.) TURNER BREAD. See BREAD.

(3.) TURNER FLY. See CHRYSOMELA, and RURAL ECONOMY, Part I. Sect. VII.

(1.) TURNER,

(1.) **TURNER, William, M. D.** a celebrated physician and divine, in the 16th century, born at Morpeth, in Northumberland, and educated at Cambridge where he became a Protestant, travelled over England to preach the reformed faith; for which Bp. Gardiner put him in prison. On his release he went to Italy, and graduated at Ferrara. On the accession of Edward VI. he returned, and was made Dean of Wells. When Mary succeeded, he again went abroad, and did not return, till after her death. Q. Elizabeth restored him to his preferments. He wrote a *Treatise on the Baths of England and Germany: A Complete Herbal or History of Plants*, fol. *Hifloria de naturis Herbarum, fœbulis & notis vallata*, 8vo; and some other botanical works. He died in 1568.

(1.) **TURNER, Francis**, son of the above, was educated at Winchester, and at New College Oxford. He became prebendary of St Paul's, dean of Windsor, and Bp. of Rochester in 1683, and in 1684 Bp. of Ely. He was one of the 7 bishops whom James VII. sent to the Tower; yet he was deprived of his bishopric at the revolution, for refusing to take the oaths. He published some sermons, several sacred poems, and the *Life of Mr Nicholas Ferrar*. He died in 1700.

(3.) * **TURNER. n. f.** [from *turn*.] One whose trade is to turn in a lathe.—Smooth-grain'd and proper for the turner's trade. *Dryden*.—Some turners, shew their dexterity in turning. *Moxon*.

TURNERA, in botany a genus of plants, in the class of *Pentandria*, and order of *Trigynia*, ranking in the natural method, under the 37th order. *Columnifera*.

TURNHOUT, a town of Holland, in the dep. of the Dommel and Scheldt, and ci-devant province of Dutch Brabant; 25 miles SSW. of Bois-le-Duc, and 18 SSE. of Breda.

(1.) * **TURNING. n. f.** [from *turn*.] Flexure; winding; meander.—Thro' paths and turnings often trod by day. *Milton*.

(1.) **TURNING** is the art of forming hard bodies, as wood, ivory, iron, into a round or oval shape by means of a machine called a *lathe*. This art was well known to the ancients, and seems to have been carried by them to a very great degree of perfection; at least Pliny and other authors tell us, that those precious vases enriched with figures in *half relief*, which still adorn our cabinets, were turned on the lathe. Turning is performed by the lathe, of which there are various kinds, and several instruments, as gouges, chisels, drills, formers, screw tales, used for cutting what is to be turned into its proper form as the lathe turns round. One of the most simple kinds of lathe is represented in *Pl. CCCXXXVIII. fig. 1.* in which *a* is the footstool, *b* the cord, *c* the frame of the lathe, *d d* the puppets, *e e* the points, *f* the spanging-tree. The lathe should be fixed in a place very well lighted; it should be immoveable, and neither too high nor too low. The puppets should neither be so low as to oblige the workman to stoop in order to see his work properly, nor so high that the little chips, which he is continually driving off, should come into his eyes. The piece to be turned should be rounded (if it be wood) before it be put on the lathe, either with a small hatchet made for the purpose, or with a plane, or

with a file, fixing it in a vice, and shaving it down till it is everywhere almost of an equal thickness, and leaving it a little bigger than it is intended to be when finished off. Before putting it on the lathe, it is also necessary to find the centres of its two end surfaces, and that they should be exactly opposite to each other, that when the points of the puppets are applied to them, and the piece is turned round, no side may belly out more than another. To find these two centres, lay the piece of wood to be turned upon a plank; open a pair of compasses to almost half the thickness of the piece; fix one of the legs in the plank, and let the point of the other touch one of the ends of the piece, brought into the same plane with the plank on which the compasses is fixed and very near the fixed leg. Describe 4 arches on that end at equal distances from each other at the circumference of the end, but intersecting one another within; the point of intersection is the centre of the end. In the same manner must the centre of the other end be found. After finding the two centres, make a small hole at each of them, into which insert the points of the puppets, and fix the piece so firmly as not to be shaken out, and yet loose enough to turn round without difficulty. The piece being thus fixed, it is necessary in the next place to adjust the cord, by making it pass twice round the piece and in such a manner that the two ends of the cord, both that which is fixed to the *spang* and to the *foot-board*, come off on the side on which the turner stands; that the piece may move against the edge of the cutting-tool and be turned. If the lathe be moved by a wheel, the manner of adjusting the cord needs no directions. If the workman does not choose to be at the trouble to find the two centres of the piece in the manner described above, let him lay, as nearly as he can, the centre of one end upon the point of the left hand puppet, and then let him push forward the right hand puppet, striking it with a mallet till its point is as near as he can in the centre of the other end of the piece; and then fixing the right hand puppet by a gentle blow of the mallet on the key, let him turn round the piece to see by the eye if the centres have been properly found. If any part of it bellies out, let him strike that part gently with the mallet till it goes properly; then let him strike one of the puppets pretty smartly to drive the points into the piece, and afterwards fix the puppet by striking the key. If the workman cannot judge by the eye whether the piece be turning properly round its centres or not, he should apply gently the point of an instrument called a *triangular graver*, leaning it on the *rest*, and it will mark by a line the place where the piece is out of its centre; and by striking upon this line with a mallet, the piece can easily be placed properly. The *rest*, of which we have just spoken, ought to be placed upon the two arms of the lathe, and fixed with screws as near the piece as the workman pleases. The piece being fixed between the two points of the puppets (or, as we call them in Scotland, the *head*), the cord adjusted, and the *rest* fixed as near the work as possible without touching it; the workman is now to take a *gauge* (*fig. 2. Pl. 334.* in which *a* is the mouth and *b* the handle) of

of a proper size on his left hand, and hold it by the handle a little inclined, keeping the back of the hand lowermost. With his right hand, the back of which is to be turned upwards, he is to grasp it as near the end as possible on this side of the *rest*; then leaning the gouge on the *rest*, he is to present the edge of it a little higher than the horizontal diameter of the piece, so as to form a kind of tangent to its circumference; then putting the right foot on the foot-board, and turning round the wheel, and holding the gouge firmly on the *rest*, the piece will be cut neatly. In the same manner are the chisels, formers, and other instruments to be used, taking care that the wood be cut equally, and that the instrument be not pushed improperly, sometimes stronger than at others; and taking care also that the instrument used do not follow the work, but that it be kept firmly in the hand without yielding. The young turner ought to endeavour to acquire the management of the gouge and the chisel, which are the instruments by far the most frequently used, and the most necessary in this art: by them, almost entirely, are the soft woods turned; for as for hard woods and other things, as box, ebony, horn, ivory, and the metals, they are hardly ever turned except by *shaving off*. In that case gravers are to be used with square, round, or triangular mouths (fig. 3, 4, 5). They should be held horizontally while applied to the wood, and not obliquely as directed for the gouge and the chisel. After the work is completely turned, it is next to be polished; and this cannot be done with the instruments hitherto mentioned. Soft woods, as pear-tree, hazel, maple, ought to be polished with shark-skin or Dutch rushes. There are different species of sharks; some of which have a greyish, others a reddish skin. Shark skin is always the better to be a good deal used; at first it is too rough for polishing. The *Dutch-rush*, before using, should be moistened a little, otherwise they break in pieces almost immediately, and render it exceedingly difficult to polish with them. They are particularly proper for smoothing the hard woods, as box, *lignum vitæ*, ebony, &c. After having cleaned up the piece well, it should be rubbed gently either with wax or olive-oil, then wiped clean and rubbed with its own raspings or with a cloth a little worn. Ivory, horn, silver, and brass, are polished with pumice-stone finely pounded and put upon leather or a linen cloth a little moistened: with this the piece is rubbed as it turns round in the lathe; and to prevent any dirt from adhering to any part of it, every now and then it is rubbed gently with a small rush dipped in water. To polish very finely, the workmen make use of *TRIPOLI*, and afterwards of putty or calx of tin. Iron and steel are polished with very fine powder of emery; this is mixed with oil, and put between two pieces of very tender wood, and then the iron is rubbed with it. Tin and silver are polished with a burnisher and hard kind of red stone called in France *sanguine lune*. They may be polished also with putty, putting it dry into flannel skin, or with the palm of the hand. To succeed in turning iron, it is necessary to have a *lathe* exceedingly strong in all its parts, and exceedingly well fixed. The pup-

pets should be short, and the *rest* well fixed very near the work: the back of the *rest* should be two or three lines lower than the iron to be turned. The lathe and other instruments being prepared, it is necessary to determine the length and thickness of the iron to be turned according to the design which is to be executed, and to make a model of it in wood a little thicker than it ought to be: Then one exactly like this is to be forged of the best iron that can be procured; that is to say, it must not be new, but well prepared and well beaten with hammers; it must have no flaws, nor cracks, nor pimples. New iron, which has not been well beaten, often contains round drops of cast iron, called by the workmen *grains*, which blunt the edges of the gouges, chisels, and other instruments used for cutting; break them, or make them slide: The iron being forged according to the model, it should be annealed, that is, heated red hot and allowed to cool slowly on the coals till the fire go out of itself. Some people, to soften the iron, cover it over with clay and allow it to cool. The iron cylinder being thus made, it is next to be put upon the lathe, finding the centres as formerly directed, and boring a small hole in them that the iron may not escape from the points. The points should be oiled from time to time to prevent their being excessively heated and spoiled, while the iron is turning. A *crotchet* is then to be applied to the iron to be turned, a little above its centre gently, and thus the inequalities of the cylinder will be taken off. Other instruments are then to be applied to mould the iron according to the model; and whenever any of them grow hot, they are to be plunged into a basin of water lying beside the workman. If the iron, after being properly turned, it is to be bored like a gun-barrel, one of the puppets is to be removed and another substituted in its place, having a square hole through it, into which the collar of the iron is to be fixed firmly, so as not to shake; then borers are to be applied, like those which locksmiths use to bore keys; and beginning with a small one, and afterwards taking larger ones, the hole is to be made as wide and deep as necessary; great care must be taken to hold the borers firm on the *rest*, otherwise there is danger of not boring the hole straight. The borer must be withdrawn from time to time to oil it and to clean the hole. As it is difficult to make a hole quite round with borers alone, it is necessary to have also an instrument a good deal smaller than the hole, one of the sides of which is sharp, very well tempered, and a little hollow in the middle. This instrument being fixed in a pretty long handle, is to be applied with steadiness to the inner surface of the hole, and it will entirely remove every inequality that may have been there before its application. The method of cutting a screw upon our cylinder, is this. Some persons use an instrument, consisting principally of a female screw, for this purpose: but this is rather dangerous; for if one presses too violently, or inclines it ever so little to the right or left, he runs the greatest risk of spoiling the screw. To avoid this danger, some persons use it only to trace out the lines of the screw, and afterwards finish it with a file. But there is a much better way of cutting a screw; and it is this

this. Take a tap for making a female screw, the threads of which have been cut very accurately, and exactly of the size of the screw which you want; and having put it in the opening which you have traced in the collar of the axis on which the screw is to be cut, solder it with tin, sal-ammoniac, and rosin, as exactly corresponding to the axis as possible. Take then a puppet with a hole cut into a corresponding female screw, into which the male screw is to be put. The axis on which the screw is to be cut must be placed exactly horizontally between the two puppets. The *rest* is then to be brought as near as possible to the place where the screw is to be cut, and a small hollow should be cut in that part of it which is exactly opposite to the place where the screw is to be cut, to hold your instrument firmly and prevent it from shaking. The instrument with which the screw is to be cut should be very sharp, and its point should make an angle of 60° with the screw to be cut; and if you wish the screw to be cut very deep, it should make an angle a little larger. The lathe being now put in motion, the tap fixed at the end of the axis will move gradually through the female screw in the puppet; and your instrument in the mean time will trace a similar male screw on the axis fixed in the lathe. Many persons, after having in this manner drawn the outlines of the screw, finish it with a screw-tale of 3 teeth corresponding exactly to the size of the screw. For turning *ovals*, a lathe of somewhat a different construction is used. The axis or spindle, having on it the pulley over which the band-cord passes for turning the lathe, is fixed between the two puppets so as to turn round easily; one end of it passes through one of the puppets, and to it is firmly fixed a circular plate of brass, so that it turns round along with the spindle. Upon this plate two brazen segments of circles are fastened, the circumference of which correspond to the circumference of the plate: their cords are parallel, and equally distant from the centre of the plate, so that they leave a distance between them. They have a groove in each of them: in these grooves another plate is placed which exactly fills up the space between the two grooves, but is shorter than the diameter of the larger circular plate on which it is laid. This plate is made to slide in the grooves. To its centre is fixed a short spindle, on which the piece of wood to be turned is fixed. When the lathe is set a going, the circular plate moves round, and carries the piece along with it; the plate of brass on which the piece is fixed loosely in the grooves already described, slides down a little every time that the grooves become perpendicular to the floor (and there are particular contrivances to prevent it from sliding down too far); and by these two motions combined, the circular one of the large plate, and the straight one of the small, the circumference of the piece of wood to be turned necessarily describes an oval; and gouges or other tools being applied in the usual manner supported on the *rest*, it is cut into an oval accordingly. The small plate may be made to slide either more or less in the grooves; and by this contrivance the transverse diameter of the oval, or rather ellipse, may be made longer or shorter at pleasure. Another, and

still simpler method, if possible, of turning *ovals* is this: Take two ovals of metal, exactly of the size of the oval which you intend to make; fix them firmly on the spindle of the lathe so as to turn round with it: fix between them the wood to be turned; and then it is easy, by the help of chisels and other tools, to cut it, as the lathe goes into exactly the figure of the external ovals. Or an oval may be formed by placing the wood, or whatever is to receive that shape, obliquely on the lathe. There are several other ingenious methods of turning; but our bounds do not permit us to enter upon them. We shall therefore conclude this article with a number of receipts which every turner ought to know. 1. *The method of moulding boxes both of shell and horn.*—In the first place, form a proper mould, which must consist of two pieces, viz. of a circle about half an inch thick, which should slope a little in order to draw out the moulded shell the more easily; and a ring fitted to the outside of the circle, so that both together make the shape of a box. These two pieces being adjusted, it is necessary to round the shell to be moulded of such a size that, when moulded, it will be a little higher than the ring of the mould, that there may be no deficiency. The mould is then to be put into a press on a plate of iron, exactly under the screw of the press; put then the shell upon the circle of the mould, so that its centre also is exactly opposite to the screw of the press: then take a piece of wood formed into a truncated cone, and not so thick as the diameter of the circle of the mould, nor so deep as the ring: then put a plate of iron above the cone, and screw down the press gently and cautiously till the whole is well fixed: then plunge the whole into a cauldron of boiling water placed above a fire. In 8 or 10 minutes the shell or horn will begin to soften; screw the press a little firmer, that the wooden cone may sink into the softened shell: repeat this from time to time till the cone is quite sunk in the mould; then take out the press and plunge it into cold water. When it is cold, take the box now formed out of the mould, and put into the inside of it a new mould of tin exactly of the form you wish the inside of the box to be: do the same with the outside, put it again into the press and plunge it into boiling water: screw the press gradually till the box be fashioned as you desire. 2. *Method of preparing green wood so that it will not split in the turning.*—Having cut your wood into pieces of a proper size, put it into a vessel full of a ley made with wood ashes. Boil it there about an hour; then, taking the cauldron off the fire, allow the ley to cool; then take out the wood and dry it in the shade. 3. *Method of giving an ebony-black to hard and fine woods.*—After forming the wood into the destined figure, rub it with aquafortis a little diluted. Small threads of wood will rise in the drying, which you will rub off with putnice-stone. Repeat this process again, and then rub the wood with the following composition: Put into a glazed earthen vessel a point of strong vinegar, two ounces of fine iron-slings, and half a pound of pounded galls, and allow them to infuse for three or four hours on hot cinders. At the end of this time augment the fire, and pour into the vessel

four ounces of copperas (sulphat of iron), and a chopin of water, having half an ounce of borax and as much indigo dissolved in it; and make the whole boil till a froth rises. Rub several layers of this upon your wood; and when it is dry, polish it with leather, on which you have put a little tripoli. 4. *Method of giving to plum tree the colour of brazil wood.*—Slack lime with urine, and bedaub the wood over with it while it is hot: allow it to dry; then take off the coat of lime and rub it with shamoy skin well oiled. Or, steep your wood in water, having a quantity of alum dissolved in it: then, having allowed brazil wood to dissolve in water five or six hours, steep your wood in it, kept lukewarm during a night; and when is dry, rub it, as before directed, with shamoy skin well oiled. 5. *Method of giving a fine black colour to wood.* Steep your wood for two or three days in lukewarm water in which a little alum has been dissolved; then put a handful of logwood, cut small, into a pint of water, and boil it down to less than half a pint. If you then add a little indigo, the colour will be more beautiful. Spread a layer of this liquor quite hot on your wood with a pencil, which will give it a violet colour. When it is dry, spread on another layer; dry it again and give it a third: then boil verdegreis at discretion in its own vinegar, and spread a layer of it on your wood: when it is dry, rub it with a brush, and then with oiled shamoy skin. This gives a fine black, and imitates perfectly the colour of ebony. 6. *Method of cleaning and whitening bones before using them.*—Having taken off with a saw the useless ends of the bones, make a strong ley of ashes and quick lime, and in a paul of this ley put four ounces of alum, and boil the bones in it for an hour; then take the vessel containing the ley off the fire and let it cool; then take out the bones and dry them in the shade. 7. *Method of folding shells.*—Clean the two sides of the shells which you wish to join together; then, having joined them, wrap them up in linen folded double and well moistened; then heat two plates of iron pretty hot that they may keep their heat for some time; and putting your shells rolled up between them under a press, which you must screw very tight, leave them there till the whole is cold, and they will be soldered. If you do not succeed the first time, repeat the process. 8. *Method of moulding shells.*—Put six pints of water into a kettle; add to it an ounce of olive or other oil; make the water boil; then put in your shell, and it will grow soft. Take it out and put it into a mould under a press, and it will take the figure you want. This must be done quickly; for if the shell cool ever so little, the process will fail. It will not require much pressure. 9. *Method of tinging bones and ivory red.*—Boil shavings of scarlet in water. When it begins to boil, throw in a quarter of a pound of ashes made from the dregs of wine, which will extract the colour: then throw in a little rock alum to clear it, and pass the water through a linen cloth. Steep your ivory or bone in aquafortis, and put it into the water. If you wish to leave white spots, cover the places destined for them with wax. 10. *To tinge ivory black.*—Steep the ivory five or six days in water of galls with

ashes made with dried dregs of wine and arsenic; then give it two or three layers of the same black with which plum-tree is blackened, in order to imitate ebony. Or, dissolve silver in aquafortis, and put into it a little rose water. Rub the ivory with this, and allow it to dry in the sun. 11. *Method of hardening wood to make pulleys.*—After finishing the pulley, boil it seven or eight minutes in olive oil, and it will become as hard as copper. 12. *To make Chinese varnish.*—Take of gum lac in grains four ounces; put it into a strong bottle with a pound of good spirit of wine, and add about the bulk of a hazel nut of camphor. Allow them to mix in summer in the sun, or in winter on hot embers for 24 hours, shaking the bottle from time to time. Pass the whole through a fine cloth, and throw away what remains upon it. Then let it settle for 24 hours, and you will find a clear part in the upper part of the bottle, which you must separate gently and put into another vial, and the remains will serve for the first layers.

* TURNINGNESS. *n. f.* [from turning.] Quality of turning; tergiversation; subterfuge.—So nature formed him, to all turningness of sleights. Sidney.

(1.) * TURNIP. *n. f.* A white esculent root. —Parships and turnips in his right-hand. *Peacham*. —With wither'd turnip-tops her temples crown'd. *Gay*. —Turnips hide their swelling heads below. *Gay*.

(2.) TURNIP, for turnips, a barbarous plural used by some slovenly writers on agriculture.

(3.) TURNIP. See BRASSICA, &c.

(4.) TURNIPS, SOWING OF. See RURAL ECONOMY, Part II. Sect. VIII. page 461, col. 2.

TURNIP DRILL. *n. f.* [turnip and drill.] an useful instrument in rural economy, invented by Mr Munning's for sowing turnips, at equal distances of 9, 18, 27, or 36 inches, or at any given distance of inches, of which nine are an aliquot part; and by which he enlarges the increase of the crop. Mr Munning's turnip-drill is represented in Plate CCCXLI. fig. 1, and 2. Fig. 1. A is the wheel, with an iron rim. B, the tin barrel, or seed-box, fixed to the axis of the above wheel. C, the aperture by which the seed is introduced into the box:—this aperture is afterwards closed by a cover. D, a semicircular plate of tin, to prevent any dirt falling upon the seed-box. E E, the two handles of the machine. Fig. 2. F represents the seed-box on a larger scale. G, the holes in the tin box, through which the seed falls upon the land. H, part of the axis of the wheel, to which the seed-box is fixed. A drill machine for sowing turnip-feed has also been invented by T. A. Knight, Esq. of Elton, near Ludlow. In Plate 341. fig. 3. A is the iron wheel, which, running on its edge, formed by two concave sides, makes the groove into which the seeds fall. B is a wheel, moving on the same axis with A, and turning the wheel C (which gives out the seed) by means of a strap. D, the tube through which the seed passes, and falls into the channel made by the iron wheel. E, the feet of the instrument. F, six lengths of jack-chain; which cover the seed remarkably well. The chain is perhaps preferable to any kind of harrow, because it can never become incumbered with loose straw, which is almost always found

on, or close to, the surface, when the ground has been manured; and the iron cutting-wheel has a similar advantage over any kind of share. G, the feed-box. H H, the handles of the machine. Fig. 4. is a section, on a larger scale, of the feed-box G, in fig. 2. The wheel, marked C, is also the same as in that figure; it is fixed upon the axis of the cylinder I, which is pierced upon the surface with holes at K, for the feed. This cylinder turns round within a groove at the bottom of the box, and is so well fitted therein, that no seed falls from the box but what is delivered by the holes K. A small brush, marked L, rubs against the cylinder, to clear out any seeds which may remain in the holes. M is a front-view of the wheel, exhibiting its edge.

TURNIP-ROOTED CABBAGE, *n. f.* a valuable plant recommended by Sir Thomas Bevor, in the Bath Society's *Papers*, for rearing and fattening young bullocks and widders. See his method of cultivating them, under **RURAL ECONOMY**, Part II. *Sec.* III. § 2.

(1.) * **TURNPIKE**. *n. f.* [*turn* and *pique*, or *pique*.] 1. A cross of two bars armed with pikes at the end, and turning on a pin, fixed to hinder horses from entering. 2. Any gate by which the way is obstructed.—The gates are shut and the turnpikes locked. *Arbutnot*.

(2.) **TURNPIKE ROADS**. Nothing has contributed more to the rapid improvement of Scotland, than turnpike roads. The tax they occasion is trifling compared with the benefits they produce. See Sir John Sinclair's *Stat. Acc.* vol. vi. p. 458. 520. ix. 530.

* **URNSICK**. *adj.* [*turn* and *sick*.] Vertiginous; giddy.—If a man fee another turn swiftly and long, himself waxeth *turnsick*. *Bacon*.

(1.) * **URNSOL**. *n. f.* [*Heliotropium*, Latin.] A plant. *Miller*.

(2.) **URNSOL**, in Botany. See **CHEMISTRY**, *Index*: **CROTON**, § III, N° 4; and **HELIOTROPISM**.

(3.) **URNSOL**, *n. f.* a dye-stuff manufactured in Holland, as follows:—That kind of lichen called *orchil*, or **LICHEN ROCELLA**, see that article, or, when that cannot be procured, the large oak moss, after being dried and cleaned, is reduced to powder, and by a kind of oil-press the powder is forced through a brass sieve, the holes of which are small. The sifted powder is then thrown into a trough and mixed with an alkali called *vetas*, which is nothing else than the ashes of wine lees in the proportion of half a pound of ashes to one pound of powder. This mixture is moistened with a little human urine. As soon as the mixture assumes a red colour, it is poured into another trough; it is again moistened with urine, and then stirred round, that the fermentation may be renewed. In the course of a few days it acquires a bluish colour, and is then carefully mixed with a 3d part of very pure pulverised potash; after which the mixture is put into wooden pails 3 feet in height, and 6 inches broad. When the third fermentation takes place, and the paste has acquired a considerably dark blue colour, it is mixed with chalk or pulverised marble, and stirred well round, that the

whole may be completely united. This last substance gives the colour no higher quality, and is intended merely to add to the weight. The blue, prepared in this manner, is poured into oblong square iron moulds; and the cakes, when formed, are placed upon fir boards on an airy floor in order to dry, after which they are packed up for sale.

(1.) * **TURNSPIT**. *n. f.* [*turn* and *spit*.] He that anciently turned a spit, instead of which jacks are now generally used. It is now used of a dog that turns the spit.—A *turnspit* in the royal kitchen. *Sauv.*

(2.) **TURNSPIT**, in zoology. See **CANIS**, § I, vi, No. 13.

TURNSTILE. *n. f.* [*turn* and *stile*.] A turnpike in a footpath. A *turnstile* is more certain *Hudibras*.—Twirling *turnstiles* interrupt the way. *Gay*.

TURNSTONE, in ornithology. See **TRINGA**.
TURO, a town of Naples, in the prov. of Bari; 22 miles SSW. of Conversano.

TUROE, an island of Denmark, in the Little Belt; 12 m. SW. of Assens, in the isle of Funen.

TURON, a town of Cochinchina, situated at the bottom of a bay so named. Lon. 107. 30. E. Lat. 15. 15. N.

TURPE, a town of Germany, in the ci-devant bishopric of Paderborn, allotted, in 1801-2, to the K. of Prussia.

(1.) * **TURPENTINE**. *n. f.* [*turpentina*, Ital. *terebinthina*, Lat.] The gum exuded by the pine, the juniper, and other trees of that kind.—As the *turpentine* tree I stretched out my branches. *Ecclesi.*—Vertgrease grinded with *turpentine*. *Peacham*.

(2.) **TURPENTINE** is a transparent viscous substance, flowing either naturally or by incision from several unctuous or resinous trees; as the terebinthus, pine, larch, fir, &c. See **PINUS**, N° 9; **CHEMISTRY**, *Index*; and **MATERIA MEDICA**.

TURPENTINE TREES. See **PISTACIA**.

(1.) **TURPETH**, *n. f.* the cortical part of the root of a species of convolvulus, brought from the East Indies. It is accounted a pretty strong cathartic; but it is very uncertain in its strength, for sometimes a dose from a scruple to a dram purges violently, while at other times a much greater dose produces very little effect. See **CONVOLVULUS**, N° 12.

(3.) **TURPETH**, or **TURBITH MINERAL**. See **CHEMISTRY**, *Index*.

(3.) **TURPETH**, or **TURBITH MINERAL**, in the old system of chemistry, was the name formerly given to the *yellow oxide of Mercury*. This oxide may be obtained by boiling 1 part of mercury in 1½ parts of sulphuric acid almost to dryness and then pouring hot water upon the mass. A yellow powder is obtained, formerly called *turbith-mineral*. This is the yellow oxide, but it is never pure, containing always one 10th of its weight of sulphuric acid. Nor is any process known by which it can be obtained pure. Its properties are therefore unknown. Bergman says it is composed of 96.8 parts mercury, and 3.2 oxygen. Fourcroy makes it 87 parts mercury, and 13 of oxygen.

* **TURPITUDE**. *n. f.* [*turpitude*, Fr. *turpitude*, from *turpis*, Latin.] Essential deformity of words, thought, or actions; inherent vileness; badness.

My

My turpitude

Thou thus dost crown with gold?

Shak.

—*Turpitude* or indecency. *South.*

TURPNI, a mountain of Silesia, in Tefche; 4 miles E. of Jablonskau.

(1.) * TURQUOISE. *n. f.* See TURKOIS. — It was my *turquoise*. *Shak.*

(2.) TURQUOISE is the tooth of an animal penetrated with the blue calx of copper: it loses its colour when heated; it is opaque, and of a lamellar texture, and susceptible of a fine polish; its specific gravity is from 2.5 to 2.908; some are of a deep blue, some are of a whitish blue, but become of a deeper when heated. This substance is found in Persia and Languedoc. The copper may be extracted from it by distilled vinegar. According to Reamur (*Mém. Par.* 1715.) nitrous acid will not dissolve that of Persia, though it will that of France.

TURRÆA, in botany, a genus of plants, in the class of *decandria* and order of *monogynia*; ranking, in the natural method, under the 49th order, *Compositæ*.

(1.) TURREFF, a parish of Aberdeenshire, of an irregular figure, extending $4\frac{1}{2}$ miles in every direction around the town (N^o 2.), except on the NW. where it is bounded by the DEVERON. It contains 16,896 Scots acres, of which only one 3d is cultivated; the remainder being covered with heath. The soil is light and fertile, and of late much improved by lime. The population, in 1794, was 1041; the increase 44, since 1755. There are relics of a druidical temple, and several considerable plantations.

(2.) TURREFF, a burgh of barony, in the above parish, on the banks of the Deveron, with a market and 2 fairs. It contains 700 inhabitants.

(1.) * TURRET. *n. f.* [*turris*, Lat.] A small eminence raised above the rest of the building; a little tower. — Discourse, I prythee, on this *turret's* top. *Shak.* — Up to a *turret* high. *Fairfax.* — And lift her *turrets* nearer to the skies. *Pope.*

(2.) TURRET, LOCH, a lake of Perthshire, in the parish of Monivaird and Strowan, about a mile and a quarter broad. It runs into the Earn, by a rivulet which gives the name of Glenturret to a romantic valley.

* TURRETED. *adj.* [from *turret*.] Formed like a tower; rising like a tower. — Take a *turreted* lamp of tin. *Bac.*

(1.) TURRETIN, Francis, minister and professor of divinity at Geneva, his native place, was born in 1623. Having studied at Geneva, Leyden, Saumur, Montauban, and Nîmes, with great success, he was admitted into the ministry in 1648, and served at the same time the French and Italian churches at Geneva. Two years after, he was offered the professorship of philosophy, which he refused; but accepted the invitation of the church of Lyons. He was recalled to Geneva a year after, being wanted to give lectures in divinity; which he began in 1653. He was sent to Holland in 1661, to procure money for the city of Geneva. He had in that journey all the success he could wish; and gained such a character, that he was strongly importuned by the Walloon churches at the Hague and at Leyden to enter in-

to their service. On his return he resumed the functions of his place, and continued there till his death. He died in 1687, with the character of a man of great merit; eloquent, judicious, laborious, learned, and zealous for orthodoxy. His works were published by his son, in 3 and in 4 vols. 4to.

(2.) TURRETIN, John Alphonfus, son of the above, was born at Geneva, in 1671; and became the first professor of ecclesiastical history, in that republic. He wrote an Abridgment of Ecclesiastical History; Sermons, and other works. He died at Geneva, 1737.

TURRITIS, TOWER MUSTARD, or WALL CRESS, in botany: a genus of plants belonging to the class of *tetradynamia*, and to the order of *siliquosa*; and in the natural system ranging under the 39th order, *Siliquosæ*. The siliqua is very long and angulated; the calyx connivent and erect; the corolla is also erect. There are 3 species; 2 of which are natives of Great Britain; viz.

1. TURRITIS GLABRA, and,

2. TURRITIS HIRSUTA.

TURRUNG, a river of Asia, in Candahar, which runs into a lake, 18 miles S. of Candahar.

TURSI, a town of Naples, in Basilicata, seated on the Sino, 8 miles from the gulf of Tarento, and 50 SW. of Bari. Lon. 16. 60. E. Lat. 40. 36. N.

TURSOSKA, a town of Hungary, 16 miles N. of Bolefko.

TURTEREBES, a town of Hungary, 14 miles NNE. of Zatmar.

(1.) * TURTLE. TURTLEDOVE. *n. f.* [*turtle*, Saxon; *tortorella*, Fr. *tortorella*, Ital. *turtur*, Lat.] 1. A species of dove. — When *turtles* tread. *Shak.* — We'll teach him to know *turtles* from jays. *Shak.* — Take me an heifer and a *turtledove*. *Gen.* — The blood of *turtles*. *Wifeman.* 2. It is used among sailors and gluttons for a tortoise.

(2.) TURTLE, in ichthyology. See TESTUDO.

(3.) * TURTLE-DOVE. See § 1.

(4.) TURTLE-DOVE, in ornithology. See COLUMBA.

(5.) TURTLE ISLANDS, an island in the S. Pacific Ocean, abounding with turtles.

(6.) TURTLE POINT, a cape on the coast of W. Florida, on the Gulf of Mexico. Lon. 89. 4. W. Lat. 29. 54. N.

(7.) TURTLE RIVERS, a river of the United States, in Georgia, which runs into the Atlantic, in Lon. 81. 40. E. Lat. 29. 54. N.

TURUCAIA, or } a town of European Tur-
TURUKEY, } key, in Bulgaria, the first town that was taken by Gen. Suworow. (See Suworow).

TURUCHAN, a river of Russia, which rises from a lake, in Lon. 101. 0. Lat. 69. 42.; and runs into the Enisei, a little S. of Turuchansk.

TURUCHANSK, a town of Russia, in Tobolskoi, on the Enisei, formerly called *Mangas*; 1800 miles ENE. of Petersburg. Lon. 106. 30. E. Ferro. Lat. 65. 40. N.

TURY, a river of Brazil, which runs into the Sea, 120 miles ESE. of Cayta.

TURZEK, a town of Lithuania, in Novogrodeckskoi, 24 miles E. of Novogrodeck.

Y y y 2

TUS,

TUS, a town of Persia. See **SARACENS**, § 15.

TUSA, a town of Sicily, in the valley of Demona: 6 miles WNW. of Miltrretta.

(1.) **TUSCAN**, *adj.* Of or belonging to, or from **TUSCANY**.

(2.) **TUSCAN EARTH**, a yellowish kind of bole dug in many parts of Italy, particularly about Florence, where there is a stratum of it 8 or 10 feet thick, at the depth of 3 or 6 feet from the surface. It is supposed to have an astringent property.

(3.) **TUSCAN ORDER**, in architecture. See **ARCHITECTURE**, *Index*.

(4.) **TUSCAN SEA**, that part of the Mediterranean, which washes the coast of **ETRURIA**, or **TUSCANY**, in Italy.

TUSCANY, a ci-devant *duchy* afterwards the kingdom of Etruria. It makes part of the ancient Heturia; excepting some small detached parts, is encompassed by a part of the Mediterranean, called here the **TUSCAN SEA**; the ecclesiastical state; the dept. of Panaro, in the Italian kingdom, or ci-devant *duchy* of Modena, and the republic Lucca; its extent from N. to S. being about 116 English miles, and about 80 from E. to W. Though some parts of it are mountainous, yet both the hills and dales are covered with vines, olives, citron, lemon, and orange trees, &c. The mountains yield also copper, iron, alums, &c. and some quarries of the finest marble, and porphyry. Here are also plenty of corn, rice, saffron, honey, wax, wool, flax, hemp, with mineral waters, rich pasture, salt pits, sulphur, alabaster, chalcidony, lapis lazuli, borax, amethysts, cornelians, jaspers, quicksilver, crystals, and black slate. In some places the elms and ashes yield manna. The principal river is the **ARNO**. This country fell under the dominion of the Romans about 455 B. C. The Ostrogoths possessed themselves of it in the 5th century, and after them the Lombards, who were expelled by Charlemagne, A. D. 800; in consequence of which it became subject to the Grecian emperors, who appointed governors over it. At last the cities of Florence, Pisa, Sienna, and some others, during the contentions between the pope and the emperor, and their respective adherents, the Guelphs and the Gibbelines, erected themselves into separate commonwealths. In that of Florence, John de Medici, a popular nobleman, so insinuated himself into the favour of his countrymen, that they invested him with sovereign power. Pope Pius V. conferred the title of *grand duke* on Cosmo de Medici in 1570, in whose family the *duchy* continued until the death of Gaston de Medici in 1737. The *duchy* was then transferred to the duke of Lorraine, afterwards the emperor Francis I. in lieu of the *duchy* of Lorraine, which, by the peace of 1736, was given to king Stanislaus during his life, and then was to be annexed to France. Leopold II. son of Francis I. emperor of Germany, succeeded to this *duchy*. It was next enjoyed by Leopold's ad. son, the archduke Ferdinand, who was shamefully deprived of his sovereignty by the French, in a time of profound peace. The empty title of king, was conferred by Napoleon on the son of the duke of Parma, an infant of Spain, whose widow and son were deprived and imprisoned, in

1808. See **REVOLUTION**, VI. 51. The principal towns are Florence, Pisa, Leghorn, Sienna, Orbicello, Piombino, and Arezzo. It now forms a part of the new erected kingdom of Italy, which includes the whole peninsula, with the exception of Naples; Bonaparte is himself the king, and his son in law, Eugene Beauharnois, bears the title of viceroy.

TUSCARORAS, a nation of N. American Indians, in New York, associated with the **ONEIDAS**.

TUSCHAMA, a town of Russia, in Irkutskoi, 28 miles NW. of Ilmsk.

TUSCHAMSKA, a town of Russia, in Irkutskoi: 100 miles NW. of Ilmsk.

TUSCHGER SEA, a lake of Carinthia.

(1.) **TUSCULANUM**, a villa belonging to Cicero, near Tusculum, where he wrote his *Quæstiones Tusculanæ*. Formerly the villa of Sylla; now called *Grotta Ferrata*.

(2.) **TUSCULANUM**, a town of Gallia Transpadana, situated on the W. side of lake Benacus; now called *Toscolano*. Many monuments of antiquity are dug up near it.

TUSCULUM. See **FÆSCATI**.

TUSGEL, a town of Asiatic Turkey, in Carmania: 42 miles NW. of Cogni.

* **TUSH**. *interj.* [Of this word I can find no credible etymology.] An expression of contempt. — *Tush*, say they, how should God perceive it. *Pj.* — *Tush*, *Tush*, my lord. *Camden*. — *Tush* never tell me. *Shak.*

TUSIO, a town of Italy, in the country of the Grisons; between Chiavenna and Coire, 15 miles S. of Coire, and 20 N. of Chiavenna.

TUSIS, a town and community of Switzerland, in the country of the Grisons, seated near the Nolla, at the beginning of the valley of Tomliasca, 16 miles S. by W. of Coire.

(1.) * **TUSK**. *n. f.* [*tyxas*, Saxon; *tosken*, old Frisick.] The long teeth of a pugnacious animal; the fang; the holding tooth. — Out-growing teeth, called fangs, or *tusks*. *Bacon*. — The boar depended upon his *tusks*. *L'Estr.* — Their adverse breaths with *tusks* oblique they wound. *Dryd.* — Whetting his *tusks*, and churning hideous foam. *Smith.*

(2.) **TUSK**, or **TORSK**, in ichthyology. See **GADUS**, N° 12.

TUSKAR, an island in St George's Channel, 5 miles from the SW. coast of Wexford county, Ireland. Lon. 6. 10. W. Lat. 52. 13. N.

* **TUSKED**. } *adj.* [from *tusk*.] Furnished with
* **TUSKY**. } *tusks*. — And seeks the *tusky* boar to rear. *Dryden*. — Of those beasts no one was horned and *tusked* too. *Grew*.

TUSPA, a town and river of Mexico, in Guasteca.

TUSSER, Thomas, author of a curious poetical work on Agriculture, born at Ravenhall, in Essex, and educated at Eton and Cambridge. He died in 1580.

TUSSILAGO, **COLT'S FOOT**, in botany, a genus of plants, belonging to the class of *syngeneses*, and order of *polygamia superflua*; and in the natural system, ranging under the 49th order, *Compositæ*. The receptacle is naked; the pappus simple; the scales of the calyx equal, of the same height as the disk, and somewhat membranaceous. There are 12 species; 3 of which are indigenous in Britain, viz.

1. **TUSSILAGO**

1. **TUSSILAGO FARFARA**, or common colt's foot, grows plentifully on the banks of rivulets, or in moist and clayey soils, in England and Scotland.—The leaves are smoked in the manner of tobacco, or a syrup or decoction of them and the flowers stand recommended in coughs and other disorders of the breast and lungs.

2. **TUSSILAGO HYBRIDA**, the HYBRID or MULE TUSSILAGO.

3. **TUSSILAGO PETASITES**, or common butterbur, is frequent in wet meadows and by the sides of rivers. Its leaves are the largest of any plant in Great Britain, and in heavy rains afford a seasonable shelter to poultry and other small animals. The root dug up in the spring is refinous and aromatic. A drachm of it in a dose has been sometimes given as a sudorific and alexipharmic.

* **TUSSICK**. *n. f.* [diminutive of *tussz*.] A tuft of grass or twigs.—*Tussicks* or bunches of thorns. *Greav.*

* **TUT**. *interj.* [This seems to be the same with *tush*.] A particle noting contempt.—*Tut, tut!* grace me no grace. *Shak.*

TUTACORIN, a town of Hindoostan, in the Carnatic, opposite Ceylon. It is 60 miles NE. of Cape Comorin. Lon. 76. 40. W. Lat. 8. 15. N.

* **TUTANAG**. *n. f.*—*Tutanage* is the Chinese name for spelter. *Woodward.*

TUTAPAN, a large town of New Mexico, on the W. coast of the N. Pacific Ocean.

TUTARY, a town of Sweden, in Smaland.

TUTBURY, a town in Staffordshire, with a market on Tuesday. It had a large castle; and is 15 miles E. of Stafford, and 134 NE. of London. Lon. 1. 40. W. Lat. 53. 0. N.

* **TUTELAGE**. *n. f.* [*tutelle*, *tutelage*, Fr. *tutela*, Lat.] Guardianship; state of being under guardians.—The *tutelage* whereof, as those [past] worlds did please. *Drayton*.—The *tutelage* of a minor belonging to the king. *Drummond*.—The French king's right of seignory or *tutelage*. *Bacon*.

* **TUTELAR**. } *adj.* [*tutela*, Lat.] Having the
* **TUTELARY**. } charge or guardianship of
any person or thing; protecting; defensive; guardian.—*Tutelary* spirits. *Brown*.—The *tutelary* goddesses of health. *Temple*.—*Tutelary* genii. *Dryden*.—The *tutelary* fates. *Dryden*.—Ye *tutelary* gods who guard this royal fabric. *Rowe*.

TUTENAGO, an ore of zinc, containing commonly from 60 to 90 per cent. of zinc, the remainder iron, and a small proportion of clay. See MINERALOGY, Chap. VII. Ord. X. Gen. II. Var. I.

TUTLINGEN, a town of Wirtemberg.

(1.) * **TUTOR**. *n. f.* [*tutor*, Latin; *tuteur*, Fr.] One who has the care of another's learning and morals; a teacher or instructor.—The *tutor* and the feeder of my riots. *Shak.*—When nobles are the tailor's *tutors*. *Shak.*—Upon which he stopt his *tutor*, saying, this is enough if I learn it. *Gov. of the tongue*.—He sought a *tutor* of his own accord. *Dryd.*—No science is so speedily learned without a *tutor*. *Watts*.

(1.) **TUTOR**, in the civil law, is one chosen to look to the persons and estate of children, left by their fathers and mothers in their minority. The different kinds of *tutary* established among the Romans, and the powers and duties of tutors, are described in *Infl. Leg.* 1. T. XIII. sect. 1. and 2.

to which the reader is referred. See also the article **GUARDIAN**.

(3.) **TUTOR**, in Scots law. See **LAW**, Part III. Chap. I. Sect. VI.

(4.) **TUTOR** is also used in the English universities for a member of some college or hall, who takes on him the instructing of young students in the arts and faculties.

* **To TUTOR**. *v. a* [from the noun.] 1. To instruct; to teach; to document.—He hath been *tutor'd* in the rudiments. *Shak.*—Not being tried and *tutor'd* in the world. *Shakespeare*.—The cock is *tutored* by instinct. *Hale*. 2. To treat with superiority or severity.—Give sorrow leave a while to *tutor* me. *Shak.*—Little girls *tutoring* their babies. *Addison*.

* **TUTORAGE**. *n. f.* [from *tutor*.] The authority or solemnity of a tutor.—They would make them children by usurping a *tutorage*. *Gov. Tong.*

* **TUTORESS**. *n. f.* [from *tutor*.] Directress; instructress; governess.—Fidelia shall be your *tutorefs*. *Moore*.—His mother, *tut'refs* of thy virtue, dy'd. *Harte*.

TUTORY, *n. f.* the power or office of a tutor or guardian. See **LAW**, Part III. Chap. I. Sect. VI. § 25.

(1.) * **TUTSAN**, or *parkleaves*. *n. f.* [*andro-gamum*, Lat.] A plant.

(2.) **TUTSAN**. See **HYPERICUM**, N° 1.

(1.) * **TUTTY**. *n. f.* [*tutia*, low Latin; *tutbie*, Fr.] A sublimate of zinc or calamine collected in the furnace.

(2.) **TUTTY**, an argillaceous ore of zinc, found in Persia, formed on cylindrical moulds into tubulous pieces, like the bark of a tree, and baked to a moderate hardness; generally of a brownish colour, and full of small protuberances on the outside, smooth and yellowish within, sometimes whitish, and sometimes with a bluish cast. Like other argillaceous bodies, it becomes harder in a strong fire; and after the zinc has been revived and dissipated by inflammable additions, or extracted by acids, the remaining earthy matter affords an aluminous salt, with sulphuric acids. Tutty is celebrated as an ophthalmic, and frequently employed as such in unguents and collyria. See **PHARMACY**, *Index*.

TUTUCORIN, or } the capital of the king-
TUTUKURIN, } dom of MADURA, on the E. coast of Malabar, famous for its pearl fishery, which employs about 60,000 people.

TUTURA, a town of Russia, in the gov. of Irkutskoi, situated on the Lena, 160 miles N. of Irkutsk. Lon. 105. 40. E. Lat. 54. 40. N.

TUTORANO, a town of Naples, in Otantro; 6 miles SSE. of Brindisi.

TUUE, a lake of Norway, in Christianland, 20 miles in compass.

TUXFORD, a town in Nottinghamshire, with a market on Monday; 13 miles NNW. of Newark, and 137 N. by W. of London. Lon. 0. 50. W. Lat. 53. 16. N.

TUY, a city of Spain, in Galicia; 254 miles W. of Madrid. Lon. 8. 12. W. Lat. 42. 4. N.

TUYERE, *n. f.* See **METALLURGY**, Part III. Sect. V.

TUYU, a country of S. America, in Patagonia.

* **TUZ**. *n. f.* [I know not whether it is not a word

word merely of cant.] A lock or tuft of hair.—And then thou kempst the *tuzzes* on thy cheek. *Dryden*.

TUZ-KURMA, a town of Asiatic Turkey, in Kurdistan.

TUZLA, a town of Asiatic Turkey, in Carmania, on a lake so named, 36 miles long.

TWAGER, a town of Sweden, in Halland, 28 miles NW. of Halmstad.

* **TWAIN**, *adj.* [*twegen*, *batewa*, both, twain, Saxon.] Two. An old word, not now used but ludicrously.—Can arbitrate this cause, betwixt us *twain*. *Shak*.—Like rats, oft bite the holy cords in *twain*. *Shak*.—Thou and I long since are *twain*. *Milt*.—When old winter split the rocks in *twain*. *Dryd*.—The trembling widow, and her daughters *twain*. *Dryden*.

(1.) * **TWANG**, *n. f.* [from the verb.] 1. A sharp quick sound.—They by the found and *twang* of nose. *Butler*.—Harmonic *twang* of leather, horn, and brass. *Pope*. 2. An affected modulation of the voice.—Seasoned with *twang* and tautology. *South*.—He has such a *twang* in his discourse. *Arbutnot*.

(2.) * **TWANG**, *interj.* A word making a quick action, accompanied with a sharp sound. Little used, and little deserving to be used.—

There's one, the best in all my quiver,
Twang! thro' his very heart and liver. *Prior*.

(1.) * **To TWANG**, *v. v.* To make to sound sharply. —A swaggering accent sharply *twang'd* off. *Shak*.

(2.) * **To TWANG**, *v. n.* [A word formed from the found.] To found with a quick sharp noise.—A thousand *twanging* instruments. *Shak*.—His bow *twang'd*. *Dryd*.—And every accent *twang'd* with smarting sorrow. *Dryden*.—The *twanging* bows. *Phil*.—Sounds the tough horn and *twangs* the quiv'ring string. *Pope*.

TWARSIMIRKA, a town of Silesia, in Oels, 6 miles NE. of Militsch.

* **TWANGLING**, *adj.* [from *twang*.] Contemptibly noisy.—She did call me raical, fidler, *twangling* jack. *Shak*.

* **To TWANK**, *v. n.* [Corrupted from *twang*.] To make to found.—*Twanking* of a brass kettle. *Addison*.

* **TWAS**, Contracted from *it was*.—Say 'twas I. *Dryden*.

* **To TWATTLE**, *v. n.* [*schwätzen*, German.] To prate; to gabble; to chatter.—*Twattling* gossip. *L'Estrange*.

* **TWAY**, For **TWAIN**.—That quite it clove his plumed crest in *tway*. *Spenser*.

(1.) * **TWAYBLADE**, *n. f.* [*Orphris*, Lat.] A polypetalous flower, consisting of six dissimilar leaves, of which the five upper ones are so disposed, as to represent in some measure an helmet, the under one being headed and shaped like a man. *Miller*.

(2.) **TWAY-BLADE**. See **OPHRYS**, N° 5.

* **To TWEAK**, *v. a.* [It is written *twæg* by Skinner, but *tweak* by other writers; *twacken*, German.] To pinch; to squeeze betwixt the fingers.—*Tweaks* me by the nose. *Shak*.—He *tweak'd* his nose. *Butler*.—Look in their face, they *tweak'd* your nose. *Swift*.

* **TWEAGUE**, *n. f.* [from the verb.] Per-

plexity; ludicrous distress. A low word.—This put the old fellow in a rare *tweague*. *Arbutnot*.

* **TWEAK**. See last article.

* **To TWEAK**. See **To TWEAG**.

TWEDA, a town of Sweden, in Smaland.

TWEDS, a town of Norway, in Christiansand.

TWEED, a large river of Scotland, which rises in the parish of Tweedsmuir, near the point where the counties of PEEBLES, DUMFRIES, and LANARK meet, and near the sources of the CLYDE, NITH, and ANNAN. It runs nearly NE. receiving many rivulets, till it reaches Peebles, when running nearly E. its stream is augmented by those of the ETTERIC near SELKIRK, the GALA at GALASHIELS, the LEADER near MELROSE, and the TERNOT at KELSO. A few miles below which, it leaves Roxburghshire, and for many miles forms the boundary between England and Scotland, until it falls into the German ocean, by a wide mouth at Berwick upon Tweed. In this last part of its course, it receives the WHITTAKER about 5 miles above its mouth. It abounds with salmon and trouts of various kinds; and its banks being beautifully picturesque, it has been much celebrated in Scottish poetry.

TWEEDDALE, or PEEBLES, a county in the south of Scotland. See PEEBLES.

TWEEDEN, a rivulet of Roxburghshire, which runs into the LIDDAL near its æstuary on the Solway Frith.

* **To TWEEDLE**, *v. a.* [I know not whence deriv'd] To handle lightly. Used of awkward fiddling.—A fidler brought in with him a body of lusty young fellows, whom he had *tweeded* into the service. *Addison*.

TWEEDMOUTH, a village and small sea port town of Northumberland, at the mouth of the Tweed, on the S. side of the river.

TWEEDSMUIR, a parish of Scotland, in Peeblesshire, 9 miles long, and nearly as broad. The surface is hilly, interperfed with flats and marshes. The soil is chiefly allotted to pasturing sheep, of which about 15,000 are reared annually. There are several ancient castles. The population, in 1791, was 227, decrease 170, since 1755.

* **TWEEZERS**, *n. f.* [*ctuy*, French.] Nippers, or small pincers, to pluck off hairs.—And beans in snuff-boxes and *tweezer* cases. *Pope*.

(1.) * **TWELFTH**, *adj.* [*twelfta*, Saxon.] Second after the tenth; the ordinal of twelve. He found Elifha plowing with twelve yoke of oxen, and he with the *twelfth*. 1 Kings, xix. 9.—Supposing one *twelfth* were copper. *Locke*.

(2.) **TWELFTH**, in music. See **MUSIC**, Df. § 14.

(3.) **TWELFTH DAY**, the festival of the Epiphany, or the manifestation of Christ to the Gentiles; so called, as being the twelfth day, exclusive, from the nativity or Christmas day.

(4.) * **TWELFTH TIDE**, *n. f.* The twelfth day after Christmas.—Plough-monday, next after that *twelfth tide*. *Tusser*.

* **TWELVE**, *adj.* [*twelf*, Saxon.] Two and ten; twice six.—Thou hast beat me out *twelve* several times. *Shak*.—From *twelve* to twenty. *Shak*.—Out at your window betwixt *twelve* and one. *Shak*.—On his left hand *twelve* reverend owls did fly. *Dryden*.

* **TWELFMONTH**.

* **TWELVEMONTH.** *n. f.* [*twelve* and *month*.] A year, as consisting of twelve months.—I shall laugh at this a *twelvemonth* hence. *Shak.*—This ear or *twelvemonth*. *Hold.*—By this time *twelvemonth*. *Evelyn.*—In the space of about a *twelvemonth*. *Addis.*—Not twice a *twelvemonth* you appear in print. *Pope.*

* **TWELVEPENNY.** *n. f.* [*twelve* and *pence*.] A shilling.

* **TWELVEPENNY.** *adj.* [*twelve* and *penny*.] old for a shilling.—The *twelvepenny* gallery. *Dryden.*

* **TWELVESCORE.** *adj.* [*twelve* and *score*.] twelve times twenty; two hundred and forty.—*Twelvescore* viragos of the Spartan race. *Dryd.*

TWENTE, a district of Holland, in the adjacent state of Overysel, now in the department of the Yssel.

* **TWENTIETH.** *adj.* [*twentecogotha*, Saxon.] twelfth; ordinal of twenty.—This year the *twentieth*. *Ben Jonson.*—The *twentieth* by descent. *Dryd.*—This must be coined one *twentieth* lighter. *Locke.*

* **TWENTY.** *adj.* [*twentig*, Saxon.] 1. Twice en.—Once in twenty-four hours. *Fell.*—Nineteen in twenty. *Swift.* 2. A proverbial or indefinite number.—Maximilian, upon *twenty* respects could not have been the man. *Bacon.*

* **TWIBIL.** *n. f.* [*twy* for *two* and *bill*, *bipennis*, Latin.] A halbert. *Ainsworth.*

* **TWICE.** *adv.* [*twigith*, Sax. *twées*, Dutch.] 1. Two times.—That *twice* he reeled, ready *twice* to fall. *Spens.*—He *twice* essay'd to cast his son in gold. *Dryd.* 2. Doubly.—With *twice* the loss, and by as vile a cheat. *Dryd.* 3. It is often used in composition.—Life is tedious as a *twice*-told tale. *Shak.*—*Twice*-born Bacchus burst the thunderer's thigh. *Creech.*—Extol the strength of a *twice*-conquer'd race. *Dryden.*

TWICKENHAM, a village of Middlesex, on the Thames, near its junction with the Coln; and adorned with many handsome villas, of which two are particularly celebrated; viz. that of Mr POPE, and *Strawberry Hill*, the seat of HORACE WALPOLE, E. of Oxford. In the church Mr Pope and his parents lie interred, and there is an elegant monument erected to his memory by the late Bp. Warburton of Gloucester. Twickenham is 11 miles SW. of London.

* **To TWIDLE.** *v. a.* [This is commonly written *tweddle*.] To touch lightly. A low word.—With my fingers upon the flute, I pressed close upon it, and *twiddled* it in, first one side, then the other. *Wifeman.*

* **TWIG.** *n. f.* [*twig*, *twigga*, Sax. *twygy*, Dut.] A small shoot of a branch; a switch tough and long.—Boats made of willow *twigs*. *Raleigh.*—The bended *twigs* take root. *Milton.*—His huge aw with a *twig* of bulrush bore? *Sandys.*—Cut her *twigs* at evening. *More.*—Inclose the softer *twigs*. *Philips.*

* **TWIGGEN.** *adj.* [from *twig*.] Made of twigs; wicker.—I'll beat the knave into a *twiggen* bottle. *Shak.*—After the manner of *twiggen* work. *Grew.*

* **TWIGGY.** *adj.* [from *twig*.] Full of twigs.

TWIGHTWEES, a tribe of N. American Indians, who reside in the North-Western Territory,

upon the banks of the Great Miami. They consist of 200 warriors.

(1.) * **TWILIGHT.** *n. f.* [*twaelicht*, Dutch; *twenlicht*, Saxon.] 1. The dubious or faint light before sunrise, and after sunset; obscure light.—Her *twilights* were more clear than our mid-day. *Donne.*—Suspicious ever fly by *twilight*. *Bacon.* 2. Uncertain view.—The *twilight* of her memory. *Donne.*—And in the *twilight* of his phancy's theme. *Cleavel.*—To grateful *twilight*. *Milt.*—They just arriv'd by *twilight* at a town. *Dryden.*—Only the *twilight* of probability. *Locke.*

(2.) * **TWILIGHT.** *adj.* 1. Not clearly or brightly illuminated; obscure; deeply shaded.—To arched walks of *twilight* groves. *Milt.*—O'er the *twilight* groves, and dusky caves. *Pope.* 2. Seen or done by twilight.—Trip no more in *twilights* ranks. *Milton.*

(3.) **TWILIGHT** is that light, whether in the morning before sun-rise, or in the evening after sun-set, supposed to begin and end when the least stars that can be seen by the naked eye cease or begin to appear. See **ASTRONOMY**, *Index*.

(1.) * **TWIN.** *n. f.* [*twinn*, Saxon; *twelingen*, Dutch.] 1. Children born at a birth. It is therefore seldom used in the singular; though sometimes it is used for one of twins.—Here's the *twin* brother of thy letter. *Shak.*—Those *twins* of learning Ipswich and Oxford. *Shak.*—Whence proceedeth the great difference of the constitutions of *twins*. *Drummond.*—Two *twins* less even lie in Nature's scale. *Cowley.*—They came *twins* from the womb. *Ottaway.*—Fair Leda's *twins*. *Dryden.* 2. Gemini, the sign of the zodiac.—Then parts the *twins* and crab. *Creech.*—When now no more, th' alternate *twins* are fir'd. *Thomson.*

(2.) **TWINS** are two young ones delivered at a birth, by an animal which ordinarily brings forth but one.

* **To TWIN.** *v. n.* [from the noun.] 1. To be born at the same birth.—Though he had *twinn'd* with me both at a birth. *Shak.* 2. To bring two at once.—Ewes yearly by *twinning* rich masters do make. *Tupper.* 3. To be paired; to be suited.

The fiery orbs above and the *twinned* stones
Upon the humble beach? *Shak.*

* **TWINBORN.** *adj.* [*twin* and *born*.] Born at the same birth.—O hard condition, and *twinborn* with greatness! *Shak.*

* **TWINE.** *n. f.* [from the verb.] 1. A twisted thread.—In skilful knitting of soft silken *twine*. *Spens.*—Sustain'd but by a slender *twine* of thread. *Dryden.* 2. Twist; convolution.—Not Typhon huge ending in snaky *twine*. *Milton.*—Braid your locks with rosy *twine*. *Milton.* 3. Embrace; act of convolving itself round.—With am'rous *twine* clasps the tall elm. *Philips.*

(1.) * **To TWINE.** *v. a.* [*twinan*, Sax. *twynan*, Dutch.] 1. To twist or complicate so as to unite, or form one body or substance out of two or more.—Fine *twined* linen. *Exod.* 2. I know not whether this is from *twine* or *twinn*.—

By original lapse, true liberty
Is lost, which always with right reason dwells,
Twin'd, and from her hath no dividual being.

Milton.

3. To unite itself.—

Lumps

Lumps of sugar lose themselves, and *twine* their subtle essence with the soul of wine.

Craft.

(2.) * *To TWINE*. *v. n.* 1. To convolve itself; to wrap itself closely about.—Let wreaths of triumph now my temples *twine*. *Pope*. 2. To unite by interposition of parts.—Friends now fast sworn, who *twine* in love. *Shak*. 3. To wind; to make flexures.—As rivers, though they bend and *twine*. *Swift*.—The deer rustles thro' the *twining* brake. *Thomson*. 4. To turn round.—As she some web wrought, or her spindles *twine*. *Chapm*.

* *TWINGE*. *n. f.* [from the verb.] 1. Short sudden sharp pain.—This gives me a *twinge* for my own sin. *Dryd*. 2. A tweak; a pinch.—Blows and *twinges* by the ears? *L'Estrange*.

* *To TWINGE*. *v. a.* [*twingen*, German; *twinge*, Danish.] 1. To torment with sudden and short pain.—The gnat *twing'd* him till he made him tear himself. *L'Estr*. 2. To pinch; to tweak.—But *twinging* him by th' ears and nose. *Hudibras*.

* *TWINK*. *n. f.* [See *TWINKLE*.] The motion of an eye; a moment. Not in use.—That in a *twink* the won me to her love. *Shak*.

* *To TWINKLE*. *v. n.* [*twincian*, Sax.] 1. To sparkle; to flash irregularly; to shine with intermitted light; to shine faintly; to quiver.—

At first I did adore a *twinkling* star. *Shak*.

As plays the fun upon the glassy streams,

Twinkling another counterfeited beam. *Shak*.

—And tear the *twinkling* stars from trembling sky.

Fairf.—The light that *twinkles* in the stars. *Boyle*.

The star of love,

That *twinkles* you to fair Almeyda's bed. *Dryd*.

—Your benefices *twinkl'd* from afar. *Dryden*.

Twinkling with stars, they freeze me while they light. *Dryden*.—These stars do not *twinkle* when

viewed through telescopes which have large apertures. *Newton*. 2. To open and shut the eye by turns.—The owl fell a moping and *twinkling*.

L'Estrange. 3. To play irregularly.—His eyes will *twinkle*, and his tongue will roll. *Donne*.

* *TWINKLE*. } *n. f.* [from the verb.]

(1.) * *TWINKLING*. } 1. A sparkling intermitting light. 2. A motion of the eye.—Suddenly, with *twinkle* of her eye. *Spenser*.—I come, I come; the least *twinkle* had brought me to thee. *Dryden*. 3. A short space, such as is taken up by a motion of the eye.—It can pourvey in *twinkling* of an eye. *Spenser*.—They vanish in a *twinkling*. *Dryd*.—In the *twinkling* of an eye. *Dryden*.

(2.) *TWINKLING OF THE STARS*. See *OPTICS*, *Index*.

* *TWINLING*. *n. f.* [diminutive of *twain*.] A twin lamb; a lamb of two brought at a birth.—

Twinlings increase bring. *Tupper's Husb*.

* *TWINNER*. *n. f.* [from *twain*.] A breeder of twins.—The lambs of such *twinnings* for breeders go take. *Tupper*.

* *TWIRL*. *n. f.* [from the verb.] 1. Rotation; circular motion. 2. Twist; convolution.—The *twirls* turning from the right hand to the left. *Woodward*.

(1.) * *To TWIRL*. *v. a.* [from *whirl*.] To turn round; to move by a quick rotation.—The *twirling* and *twirling* about of spindles. *Bacon*.—Dexterous damfels *twirl* the sprinkling mop. *Gay*.—

Some taught with dextrous hand to *twirl* the wheel. *Dodley*.

(2.) * *To TWIRL*. *v. n.* To revolve with a quick motion.

TWISS, William, a presbyterian divine, born at Newbury, in Berks, and educated at New College, Oxford. He was a member of the Assembly of divines at Westminster, and was made rector of St Andrews, Holborn. He was a zealous Calvinist, and wrote, 1. *Vindicie Potestatis & Providentie Dei*; folio: 2. *Quatuor Dissertationes de Scientia Medica*; fol. *Riches of God's Love*, and other works in defence of *Predestination*, &c.

* *TWIST*. *n. f.* [from the verb.] 1. Any thing made by convolution, or winding two bodies together.—Within a *twist* of twining others laid. *Add*. 2. A single string of a cord.—Winding a thin string about the work hazards its breaking, by the fretting of the several *twists* against one another. *Mox*. 3. A cord; string.—Thy silk *twist*. *Herbert*.—About his chin the *twist* he ty'd *Dryd*. 4. Contortion; writhe.—Turn or *twist* in the fibres. *Add*. 5. The manner of twisting.—He found fault with the length, the thickness, and the *twist*. *Arbuth*.

(1.) * *To TWIST*. *v. a.* [*getwisan*, Sax. *twiſſen*, Dutch.] 1. To form by complication; to form by convolution.—The smallest thread—that ever spider *twisted* from her womb. *Shak*.—*Twisting* a rope of hay. *Taylor*.—And *twist* our thread with gold and silk. *Prior*.—For well you *twist* the secret chains that bind. *Lyttleton*. 2. To contort; to writhe.—*Twist* it into a serpentine form. *Pope*. 3. To wreath; to wind; to encircle by something round about.—Pillars of smoke *twisted* about with wreaths of flame. *Burnet*. 4. To form; to weave.—That thou began'st to *twist* to fine a story? *Shak*. 5. To unite by intertexture of parts.—*Twist*—bays with ivy. *Waller*. 6. To unite; to inſinuate.—When avarice *twists* itself with the doctrine of the church. *Decay of Piety*.

(2.) * *To TWIST*. *v. n.* To be contorted; to be convolved.—An ileus, commonly called the *twisting* of the guts. *Arbuthnot*.—

Deep in her breast he plung'd the shining sword;

Th' Iuachans view the slain with vast surprise,

Her *twisting* volumes, and her rolling eyes. *Pope*.

TWISTE, a river of Germany, in the circle of the Upper Rhine, running into the Erpe, near Volckmarſan.

* *TWISTER*. *n. f.* [from *twist*.] 1. One who twists; a ropemaker. 2. The instrument of twisting. To this word I have annexed some remarkable lines, which explain *twist* in all its senses.—

When a *twister* a twitting will twist him a twist,

For the twisting of his twist he three twines doth intwist;

But if one of the twines of the twist do untwist,

The twine that untwisteth untwisteth the twist.

Untwirling the twine that untwisteth between,

He twirls with his *twister* the two in a twine;

Then twice having twisted the twines of the twine,

He twitcheth the twine he had twined in twain,

The twain that in twining before in the twine,

As twins were intwilted, he now doth untwine.

'Twist

Twixt the twain intertwisting a twine more between,
He, twirling his *twissler*, makes a twist of the twine. *Wallis*.

* To *TWIT*. *v. a.* [*edwitan*, Saxon.] To sneer; to flout; to reproach.—That shepherds do *twiten* each other's life. *Spenser*.—She *twits* me with my falsehood to my friend. *Shak*.—*Twitting* them for what's amiss. *L'Estrange*.—This these scoffers *twitted* the Christians with. *Tillotson*.—Gallen was *twitted* in his own time. *Baker*.

* *TWITCH*. *n. f.* [from the verb.] 1. A quick pull; a sudden vindication.—But *Hudibras* gave him a *twitch*. *Milton*.—The lion gave one hearty *twitch*. *L'Estrange*. 2. A contraction of the fibres.—

Contract the fibres, and the *twitch* produce,
Which gently pushes on the grateful food.

Blackmore.

Must give their stomachs cruel *twitches*. *Prior*.
Convulsive *twitches*. *Sharp*.

* To *TWITCH*. *v. a.* [*twician*, Saxon.] To vellicate; to pluck with a quick motion; to snatch.—He rose, and *twitch'd* his mantle blue. *Milton*.—*Twitch'd* by the sleeve. *Dryden*.—And fear'd at ev'ry step a *twitching* spright behind. *Dryden*.—Thrice they *twitch'd* the diamond in her ear. *Pope*.

* *TWITCHGRASS*. *n. f.* *Twitchgrass* is a weed that keeps some land loose, hollow, and draws away the virtue of the ground. *Mortimer*.

TWITE. See *FRINGILLA*, N° 10.

* *TWITTER*. *n. f.* 1. Any motion or disorder of passion; such as a violent fit of laughing, or fit of fretting.—To put them into amorous *twitters*. *Hudibras*.—The moon was in a heavy *twitter*. *L'Estrange*. 2. An upbraider.

* To *TWITTER*. *v. n.* 1. To make a sharp tremulous intermitted noise.—Swallows *twitter* on the chimney-tops.—They *twitter* cheerful. *Thomf*. 2. To be suddenly moved with any inclination. A low word.—A widow which had a *twittering* toward a second husband. *L'Estrange*.

* *TWITLETWATTLE*, *n. f.* [A ludicrous reduplication of *twattle*.] Tattle; gabble. A vile word.—Insipid *twitletwattles*, and frothy jests. *L'Estrange*.

* *TWIXT*. A contraction of *betwixt*.—Twilight, short arbiter *'twixt* day and night. *Milton*.
TWIZEL CASTLE, a village of England, in Northumberland, near Grindon, S. of Norham, near the junction of the Till and the Tweed.

* *TWO*. *adj.* [*twai*, Gothick; *two*, Saxon.] 1. One and one.—Between two girls, which hath the merriest eye. *Shak*.—The two latter. *Bacon*.—Lodge us two and two together. *Bacon*.—By two and two across the common way. *Dryden*.—2. It is used in composition.—Was longest liv'd of any two-legg'd thing. *Dryden*.—A two-legged animal. *Locke*.—The two-thap'd *Erichonius*. *Adisson*.—A two-leaved book of record. *Ayliffe*.

* *TWOEDGED*. *adj.* [*two* and *edge*.] Having an edge on either side.—A *twoedg'd* weapon. *Pope*.

(1.) * *TWOFOLD*. *adj.* [*two* and *fold*.] Double; two of the same kind; or two different things co-existing.—A *twofold* desire. *Hooker*.—Her *twofold* team. *Fairy Queen*.—Doth now with *twofold* vigorous lift me up. *Shak*.—Our *twofold* seas wash

either side. *Dryden*.—Time and place have each of them a *twofold* acceptation. *Locke*.—Ewes,—Dropp'd their *twofold* burdens. *Prior*.—Holiness may be taken in a *twofold* sense. *Atterbury*.

(2.) * *TWOFOLD*. *adv.* Doubly.—*Twofold* more the child of hell. *Matt. xxiii. 15*.

* *TWOHANDED*. *adj.* [*two* and *hand*.] Large; bulky; enormous of magnitude.—With huge *twohanded* sway. *Milton*.—The large *twohanded* whore. *Dryden*.

(1.) * *TWOPENCE*. *n. f.* A small coin, valued at twice a penny.—You all shew like gilt *twopences* to me. *Shak*.

(2.) *TWOPENCE HERB*, a species of *LYSIMACHIA*.

TWOPENNY, *n. f.* Small beer.

TWY, a river of S. Wales, in Cardiganshire.

TWYFORD, a town of England, in Hampshire, 2 miles from Winchester.

TWYNEHOLM, a parish of Scotland, in Kirkcudbrightshire, united with that of *Kirkcrist*. The 2 are of an oblong form, 9 miles long and a broad, seated on the W. banks of the *Dee* and the *Tarff*, and surrounded by the sea on the S. and W. The surface is mostly hilly, yet arable, with many fertile valleys interspersed. The only remnant of the ancient woods is around the old castle of Campstone, belonging to the E. of Selkirk. The population, in 1793, was 620; increase 102, since 1755.

TWYNT, a town and fort of Algiers, on the Mediterranean, 30 miles NW. of Tremesen.

TYACUL, a town of Hindoostan, in Mysore, 10 miles S. of Colar.

TYANA, a town of Cappadocia, at the foot of Mount Taurus.

TYANÆUS. See *APOLLONIUS*, N° 3.

TYANITIS, a province of Cappadocia.

TYBEE, an island of Georgia in the Savannah.

TYBER. See *TIBER*.

TYBUR. See *TIBUR*.

TYCOKZYN, a town of the late Poland, in Polachia, with a strong castle and a mint; seated on the *Narew*, 22 miles NW. of Biełsk; now annexed to Prussia. Lon. 23. 40. E. Lat. 53. 0. N.

TYCHIOS, an artist of Hyle in Boeotia, who made Hector's seven-fold shield. *Hom. Il. 7*.

TYDE, a town of HISPANIA TARRACONENSIS. *Sil. It. 3*.

TYDEUS, a celebrated hero, the son of *ORNEUS*, king of Calydon. Having killed a friend by accident, he fled to *ADRASTUS* K. of Argos, and married his daughter *DEITHYLE*, by whom he had the famous *DIOMEDES*. *Adrastus*, wishing to restore his son-in-law *POLYNICES* to the throne of Thebes, sent *Tydeus* against *Eteocles*, whom he challenged to single combat and defeated. He again went against Thebes in the war of the *EPIGONI*, and was mortally wounded by *Melanippus*; but would have been cured by *Minerva*, who came on purpose, had he not offended the goddess by using the body of *Menalippus* barbarously. *Hom. Il. 4*.

TYDORE, one of the *MOLUCCA* Islands, 9 miles from *TERNATÉ*.

(1.) * *TYE*. *n. f.* See *TIE*. A knot; a bond or obligation.—A most indissoluble *tye*. *Shak*.—I have no *tye* upon you to be true. *Dryden*.—Ho-

Z z z

nour's

nour's a second *tye*, the law of kings. *Addison*.—By the soft *tye* and sacred name of friend. *Pope*.

(2.) *TYE*, Christopher, Mus. D. a celebrated English musician, born in Westminster, in the reign of Henry VIII. He was admitted Dr in Music at Cambridge, in 1545. Dr Tye became instructor in that science to K. Edward VI. and organist of the Chapel Royal, under Q. Elizabeth. He composed a great number of *Anthems*.

* To *TYE*. *v. a.* To bind. See *TIE*.

(1.) * *TYGER*. *n. f.* See *TIGER*.

(2.) *TYGER*, in zoology. See *FELIS*, N° VI, XXI, XXII, and XXVII.

(3.) *TYGER-CAT*. See *FELIS*, N° I, II, and XXI.

(4.) *TYGER*, in geography, a river of S. Carolina, which runs into the Saluda, 5 miles NW. of Columbia, and by their united waters form the CANGAREE.

(5.) *TYGER-WOLF*. See *CANIS*, § I. N° vii. 2.

TYGERS POINT, a cape of Asia, on the SW. coast of Ava, at the mouth of the Persian Gulf. Lon. 94. 45. E. Lat. 15. 50. N.

(1.) * *TYKE*. *n. f.* [See *TYKE*.] Tyke in Scottish still denotes a dog, or one as contemptible and vile as a dog, and from thence perhaps comes *teague*.—Bale *tyke*, call'st thou me host? *Shak*.

(2.) *TYKE*, in zoology. See *CANIS*, § I, N° vi.

TYKOKZYN. See *TYCOKZYN*.

(1.) *TYLE*, or *TILE*, in building, a sort of thin laminated brick, used on the roofs of houses; or, more properly, a kind of fat clayey earth kneaded and moulded of a just thickness, dried and burnt in a kiln like brick, and used in the covering and paving of houses.

(2.) *TYLE*, in geography, a river of Northumberland, that runs into the Tweed, at

TYLEMOUTH, a village of Northumberland, on the S. bank of the Tweed, S. of Norham.

TYLEN, a town of England, in Yorkshire, N. of Doncaster.

TYLSEN, a town of Brandenburg, on the Dichme, 4 miles SSW. of Saltzwedel.

TYLOS, an ancient town of Peloponnesus, near Tænarus; now called *Bahrain*.

TYLWIN, a town of S. Wales, in Caermarthenshire, 5 miles W. of St. Clare.

* *TYMBAL*. *n. f.* [*tymbal*, French.] A kind of kettle drum.—A *tymbal's* sound were better than my voice. *Prior*.

TYMPAN, among printers, a double frame belonging to the press, covered with parchment, on which the blank sheets are laid in order to be printed of. See *PRINTING*, § 7.

TYMPANIA, an inland town of Elis.

(1.) * *TYMPANITES*. *n. f.* [*tympanites*.] That particular sort of dropsy that swells the belly up like a drum, and is often cured by tapping.

(2.) *TYMPANITES*. See *MEDICINE*, *Index*.

(1.) * *TYMPANUM*. *n. f.* A drum; a part of the ear, so called from its resemblance to a drum.—The three little bones in meatu auditorio, by firming the *tympanum*, are a great help to the hearing. *Wifeman*.

(2.) *TYMPANUM*, in mechanics, a kind of wheel placed round an axis or cylindrical beam, on the top of which are two levers or fixed flaves for the more easily turning the axis in order to

raise a weight required. The *tympanum* is much the same with the peritrochium; but that the cylinder of the axis of the peritrochium is much shorter and less than the cylinder of the *tympanum*.

(3.) *TYMPANUM*, in anatomy. See *ANATOMY*, *Index*.

(1.) * *TYMPANY*. *n. f.* [from *tympanum*, Lat.] A kind of obstructed flatulence that swells the body like a drum; the wind dropsy.—A tumour and *tympany*. *Hamm*.—As if the empire were a *tympany*. *Suckling*.—A lofty stile, swell to a *tympany*. *Roscommon*.—Pride is an unnatural *tympany*. *L'Estrange*.—Thine's a *tympany* of sense. *Dryden*.—The air is so rarified in this kind of dropical tumour, as makes it hard and tight like a drum, and from thence it is called a *tympany*. *Arbutn*.

(2.) *TYMPANY*. See *MEDICINE*, *Index*.

TYMPHÆI, an ancient people who dwelt between Epirus and Thessaly.

TYNAGH, a town of Ireland, in the county of Galway, and province of Connaught.

TYNAN, a town of Ireland, in the county of Armagh, and province of Ulster.

TYNDALE, William, a zealous English reformer, and memorable for having made the first English version of the BIBLE, was born on the borders of Wales before 1500. He was first of Magdalene-hall in Oxford. Afterwards he removed to Cambridge, and thence went to live with a gentleman in Gloucestershire as tutor to his children. There he showed himself so furious for Luther, that he was forced to leave the place. He then went to Germany, where he translated the New Testament and the Pentateuch. These being sent to England, made a great noise there; and the clergy procured a royal proclamation, prohibiting the buying or reading such translation or translations. But the clergy, not satisfied with this, sent one Philips to insinuate himself into his company, and under the pretext of friendship betray him into custody. He was sent to the castle of Filford, about 18 miles from Antwerp; and though the English merchants at Antwerp did what they could to procure his release, and letters were also sent from Lord Cromwell and others out of England, yet Philips bestirred himself so heartily, that he was tried and condemned to die. He was first strangled by the hangman, and then burned near Filford castle, in 1536. While he was tying to the stake, he cried with a fervent and loud voice, "Lord, open the king of England's eyes."

TYNDARIDÆ, an ancient people of Colchis.

TYNDARIS, a town of Colchis, on the Phasis.

TYNDARUS, king of Sparta, the husband of LEDA, and father of CASTOR and CLYTEMNESTRA. See these articles; and HELENA, N° 1.

TYNDRUM, a village of Perthshire in Braidalbin, on the W. military road, 12 m. from Dalnally, and 21 from Killin, chiefly inhabited by miners.

(1.) *TYNE*, a large river of England, in Northumberland, formed by the junction of two rivers called N. and S. Tyne, the one rising on the borders of Cumberland near Glaston muir, or rather in the hills of Roxburgh, in the S. and the other from the Cheviot hills in the N. These rivers meet and join their waters above Hexham, and form

in a large navigable river, which runs into the German ocean at **TYNEMOUTH**.

(2.) **TYNE**, a rapid river of E. Lothian, which rises in the hills, in the S. of that county, runs E. through the town of Haddington, where it sometimes overflows its banks, and after a course of 30 miles falls into the Frith of Forth a little W. of Dunbar. On Oct. 4th, 1755, it rose 17 feet above its level and overflowed great part of Haddington.

TYNEMOUTH. See **TINEMOUTH**.

TYNG, a river of England, in Devonshire.

TYNNINGHAME, a parish of Scotland in E. Lothian, united, in 1761, to that of **WHITEKIRK**. See **WHITEKIRK**.

(1.) **TYNRON**, a parish of Scotland, in Dumfriesshire, in the S. corner of the county, 15 miles long, and 4 broad, in a valley. The soil is surface is only fit for feeding sheep, of which there are 8000 reared. It is watered by the *Scarr* and the *Shinnel*. The population, in 1793, was 55; the increase 36 since 1755.

(2.) **TYNRON**, **DUN OR**, a beautiful pyramidal hill in the above parish, with an ancient castle on its top, which commands a very extensive prospect.

* **TYNY**. *adj.* Small.—He that has a little *tyny* *Shak.*

(2.) **TYOGA**, a county of New York, bounded the N. by that of Onondago; E. by Otsego, by Pennsylvania, and W. by Ontario. It consists of 5 townships, and 7500 citizens. **UNION** and **EMUNG** are the chief towns.

(2.) **TYOGA**, a navigable river of New York in Pennsylvania, which rises in Savage Mountain, Lycoming county, and falls into the **SUSQUEHANNA**, 13 miles below Lockhartsburg. It is navigable by batteaux above 50 miles.

TYONE, a town of Ireland, in the county of Kerry, and province of Munster.

(1.) * **TYPE**. *n. f.* [*type*, Fr. *typus*, Lat. *typus*.] Emblem; mark of something.—Short bolster'd heels, and those *types* of travel. *Shak.*—*Type* sweet rule, and gentle majesty. *Prior*. 2. That which something future is prefigured.—Inform them by *types*. *Milton*.—In *type* and shadow. *Johnson*. 3. A stamp; a mark. Not in use.—My father bears the *type* of king of Naples. *Shak.*

Unto the dignity and height of fortune,
The high imperial *type* of this earth's glory.

Shak.

Which, though in their mean *types* small matter appears. *Drayton*. 4. A printing letter.

(1.) **TYPE**, (*typus*) in theology, an impression, or representation of some model, which is called the *antitype*. In this sense the word occurs often in the writings of divines, who employ it to denote that prefiguration of the great events of man's redemption, which they consider the principal transactions recorded in the Old Testament to have been.

(1.) **TYPE**, in medicine, is used to denote the observed in the intention and remission of the pulse, &c.

To **TYPE**. *v. n.* To prefigure.—Things *typed* prefigured. *White*.

TYPHA, CAT'S TAIL, or REED MACE, in

botany, a genus of plants belonging to the class of *monocia*, and order of *triandria*; and in the natural system ranging under the 3d order, *Calamaria*. The amentum of the male flower is cylindrical; the calyx is tripetalous, but scarcely distinguishable; there is no corolla. The female has a cylindrical amentum below the male; the calyx is composed of villous hair; there is no corolla, and only one seed fixed in the capillary papus. There are two species, both natives of Britain, viz.

1. **TYPHA ANGUSTIFOLIA**, narrow leaved cat's tail, is found in pools and ditches. The leaves are semi-cylindrical, and the male and female spike are remote and slender.

2. **TYPHA LATIFOLIA**, great cat's tail, or reed mace, is frequent in ponds and lakes. The stalk is six feet high; the leaves a yard long, hardly an inch wide, convex on one side; the amentum, or cylindrical club, which terminates the stalk, is about six inches long, of a dark brown or fuscous colour. Cattle will sometimes eat the leaves, but Schreber thinks them noxious: the roots have sometimes been eaten in salads, and the down of the amentum used to stuff cushions and mattresses. Linnæus says, that the leaves are used by the coopers in Sweden to bind the hoops of their casks.

TYPHÆUS, in the Grecian mythology, a monstrous giant, the son of Tartarus and Terra; who had 100 heads like those of a dragon; flames of fire came from his mouth, and he uttered the most infernal yells. As soon as he was born, he began to avenge the deaths of his brethren, the giants, upon the gods, which so frightened all the deities, that they all fled and hid themselves under the forms of various animals. But of all the deities, **MINERVA** alone stood undaunted; she trusted in her arms, and still more in her wisdom, for sufficient defence against all the fiery darts of **Typhæus**. At last she whispered Jupiter to use his thunder. Jupiter assumed the form of a ram, Apollo that of a crow, Mercury became an ibis, Bacchus a goat, Juno a cow, Venus a fish, Diana a cat, &c. At last Jupiter resumed his courage, and seizing his thunder-bolts, struck the monster down, and crushed him under Mount **Ætna**, where he still breathes out fire and flames. **Typhæus** before this had married **ECHIDNA** and became the father of the three-headed dog **CERBERUS**, the three-bodied monarch **GERYON**, **ORTHOS**, and other monsters. *Ovid. Met. v. Hyg. Fab.*

(1.) **TYPHON**. See **WHIRLWIND**.

(2.) **TYPHON**, the devil of the ancient Egyptians. See **DELUGE**, § 5; **MYSTERIES**, § 21; and **MYTHOLOGY**, § 29, and **POLYTHEISM**.

* **TYPICAL**. **TYPICK**, *adj.* [*typique*, Fr. *typicus*, Lat.] Emblematical; figurative of something else.—The Levitical priesthood was only *typical* of the Christian. *Atterbury*.—And in the *typical* glory shew. *Prior*.

* **TYPICALLY**. *adv.* from *typical*.] In a typical manner.—Typically represented and mysteriously exemplified. *Norris*.

* **TYPICALNESS**. *n. f.* [from *typical*.] The state of being typical.

* **TYPICK**, See **TYPICAL**.

Z z z z

* To

* To **TYPIFY**. *v. a.* [from *type*.] To figure; to shew in emblem.—*Typified* in baptism. *Hamm.*
Our Saviour was *typified* by the goat. *Brown.*

* **TYPOGRAPHER**. *n. f.* [*τυπος* and *γραφω*.]
A printer.

* **TYPOGRAPHICAL**. *adj.* [from *typography*.]
1. Emblematical; figurative. 2. Belonging to the printer's art.

* **TYPOGRAPHICALLY**. *adv.* [from *typographical*.] 1. Emblematically; figuratively. 2. After the manner of printers.

* **TYPOGRAPHY**. *n. f.* [*typographie*, French; *typographia*, Latin.] 1. Emblematical, figurative, or hieroglyphical representation.—Containing rather *typography* than verity. *Brown.* 2. The art of printing.

(1.) **TYRA**, or **TYRAS**, a river of European Sarmatia, which runs into the Euxine Sea, between the Danube and the Borysthenes; now called **DNIESTER**. *Ovid.*

(2.) **TYRA**, a river of Upper Saxony, which runs into the Kelm, a mile W. of Kelbra, in Schwartzberg.

* **TYRANNESS**. *n. f.* [from *tyrant*.]—They were by law of that proud *tyranness*. *Spenser*.—The *tyranness* doth joy to see. *Spenser*.

* **TYRANNICAL**. **TYRANNICK**. *adj.* [*tyrannus*, Lat. *tyrannique*, French; *tyrannicus*, Gr.] Suiting a tyrant; acting like a tyrant; cruel; despotic; imperious.—*Tyrannick* power. *Shak.*—A power *tyrannical*. *Shak.*—Domitian had been *tyrannical*. *Bacon.*—Proud *tyrannick* pow'r. *Milton.*—*Tyrannical* and intolerable. *Taylor.*—Of a fresh wound from the *tyrannick* dart. *Denham.*—Our sects a more *tyrannick* power assume. *Roscommon.*—Th' oppressor rul'd *tyrannick* where he durst. *Pope.*

* **TYRANNICALLY**. *adv.* [from *tyrannical*.]
In manner of a tyrant.

* **TYRANNICIDE**. *n. f.* [*tyrannus* and *cedo*, Lat.] The act of killing a tyrant.

* **TYRANNICK**. See **TYRANNICAL**.

TYRANNION, a celebrated grammarian in Pompey's time, was a native of Amisus in Pontus. He was the scholar of Dionysius of Thrace at Rhodes. He fell into the hands of Lucullus, when that general defeated MITHRIDATES VII. and seized his dominions. This captivity of Tyrannion was no disadvantage to him, as it procured him an opportunity of being illustrious at Rome, and raising a fortune. He spent it, among other things, in making a library of above 30,000 volumes. He died very old, being worn out with the gout. His care in collecting books contributed very much to the preservation of Aristotle's works.

* To **TYRANNISE**. *v. n.* [*tyraniser*, Fr. from *tyrant*.] To play the tyrant; to act with rigour and imperiousness.—Fear will not be able to *tyrannise* over us. *Hooker.*—Then 'gan Carausius *tyrannise* anew. *Spenser.*—On him, that thus doth *tyrannise* o'er me. *Shak.*—With him, or under him to *tyrannise*. *Milt.*—Or kill'd and *tyrannis'd* without a guard. *Waller.*—He *tyrannises* over his own mind. *Locke.*

* **TYRANNOUS**. *adj.* [from *tyrant*.] Tyrannical; despotic; arbitrary; severe; cruel; imperious. Not in use.—*Tyrannous* ambition. *Sidney.*

—The unjust and *tyrannous* rule of Harold. *Spens.*
—And, like the *tyrannous* breathing of the north. *Shak.*—Fear you his *tyrannous* passion. *Shak.*—Subjection to his empire *tyrannous*. *Milton.*—This *tyrannous* and ambitious king. *Temple.*

* **TYRANNY**. *n. f.* [*tyrannis*, Latin; *τυραννίς*, Gr.] 1. Absolute monarchy imperiously administered.—Sole reigning holds the *tyranny* of heav'n. *Milton.*—The cities fell, often under *tyrannies*. *Temple.* 2. Unrefracted and cruel power.—

Boundless intemperance

In nature is a *tyranny*. *Shak.*
3. Cruel government; rigorous command.—Great *tyranny*, lay thou thy basis sure. *Shak.*—Suspensions dispose kings to *tyranny*. *Bacon.*—*Tyranny* must be. *Milton.* 4. Severity; rigour; inclemency.—The *tyranny* o' the open night's too rough. *Shak.*

(1.) * **TYRANT**. *n. f.* [*tyrannus*, Lat.] Rowland contends that this word, with the correspondent Greek and Latin, is derived from *tir*, Welsh and Erse, land, and *rhaner*, Welsh, to share; *q. d.* *tirhanner*, a sharer, or divider of land among his vassals. 1. An absolute monarch governing imperiously. 2. A cruel despotic and severe master; an oppressor.—Love to a resisting heart is a *tyrant*. *Sidney.*—For the whole space that's in the tyrant's grasp. *Shak.*

How fine this *tyrant*

Can tickle where she wounds! *Shak.*
—The house of woe, and dungeon of our *tyrant*. *Milton.*—Those scourges and plagues of the world, *tyrants*. *South.*—Thou mean'st to kill a *tyrant*, not a king. *Dryden.*—When *tyrant* custom had not shackl'd man. *Thomson.*

(2.) **TYRANT**, among the ancients, denoted simply a king or monarch; but the ill use which many invested with that character made of it, has altered the import of the word; and tyrant now carries with it the idea of an unjust or cruel prince, who invades the people's liberty, and rules in a more despotic manner than the laws of nature or of the country allow.

TYRAS. See **TYRA**, N° 1.

TYRAWLEY, a burgh of barony of Ireland, in the county of Mayo and prov. of Connaught.

TYRCONNEL, the ancient name of **DONEGAL**, in Ulster.

(1.) **TYRE**, a celebrated ancient city of Asia, on the coast of Syria. It was built, according to some writers, 2760 years before the Christian era. There were two cities of that name; the one called **PALÆTYRUS**, situated on the continent; and the other the city of **Tyre**, built on an island about half a mile from the shore. It was about 19 miles in circumference, including **Palætyrus**; the town on the island was about 4 miles round. The buildings of Tyre were very magnificent; the walls were 150 feet high, and broad in proportion. This city was at one period the most famous commercial city in the world. It resisted Nebuchadnezzar king of Babylon for 13 years; at the end of which, wearied with endless efforts, the inhabitants resolved to place the sea between them and their enemy, and passed accordingly into the island. The new city stood out against Alexander the Great for 7 months; and before he could take it, he was obliged to fill up the strait

strait which separated the island from the continent. (See MACEDON, § 11.) It was repaired afterwards by ADRIAN, and became the metropolis of the province. It afterwards fell into the hands of the Arabs; and after being taken by BALDWIN II. king of Jerusalem, it was destroyed by the sultan of Egypt in 1289, and abandoned, never more to rise from its ruins. An excellent account of its situation and modern state may be found in *Foley's Travels*, vol. ii. It now consists of a small village, composed of wretched huts, containing about 50 or 60 poor families. Its harbour is now almost choked up. It is called SOUR or TSOUR by the Orientals. See SUR, N° 3.

(1.) * TYRE. *n. f.* [properly *tyrē*.] See TIRE.—The *tyre* of her head. *Hakewill*.

TYREFIO, a seaport town of Sweden in Sudermania, 9 miles SE. of Stockholm.

TYRESIOD, a river of Norway. See NORWAY, § 15.

TYRI, a lake of Norway, in Aggerhuys; 15 miles NW. of Christiania.

(1.) TYRIAN, *adj.* [from *Tyre*.] Of, or belonging to, or invented in Tyre.

(2.) TYRIAN DYE. See MUREX, N° 1. and PURPURA.

TYRIANS, *n. f. plur.* the people of TYRE.

(1.) TYRIE, a parish of Aberdeenshire, 10 miles long and $4\frac{1}{2}$ broad. The surface is agreeably diversified. The soil, when not near moor, is generally a fertile red loam, pretty deep in the valleys, but shallow on the hills. The late Sir William Forbes of *Pitligo*, Bart. has erected a village called *New Pitligo*, with a bleachfield and other conveniences for manufactures. He also built and endowed two chapels in the village, one a chapel of ease, for the established church; the other a chapel of the Scotch Episcopal communion, with commodious houses for the minister of each. The population, in 1791, was 864, the increase 268, since 1755.

(3.) TYRIS, or TIR-Y, one of the HEBRIDES. See TIR-Y.

TYRNAW, a large and well fortified town of Upper Hungary, in the palatinate of Trientsehin; 30 miles NE. of Presburg. Lon. 17. 39. E. Lat. 48. 13. N.

(1.) * TYRO. *n. f.* [properly *tyro*, as in the Latin.] One not yet master of his art; one in his rudiments.—Where *tyros* take their freedom out to kill. *Garth*.

(2.) TYRO, in fabulous history, a daughter of SALMONEUS king of Elis; who, being harshly treated by her step-mother Sidero, was removed by her uncle Cretheus, to the banks of the Enipeus; where NEPTUNE, assuming the form of that river-god had a sons by her, the celebrated PELIAS and NELSUS, who being exposed were preserved by shepherds, and avenged their mothers injuries on Sidero. She afterwards married her uncle Cretheus, by whom she had *Æson*, *Amphybaon*, and *PEREUS*. *Hom. Od.* 11. 234.

TYROL. See TIROL.

TYROLESE. See TIROLESE.

TYRONE, a county of Ireland, in the province of Ulster, 46 miles long and 37 broad; bounded on the N. by Londonderry, on the E.

by Armagh and Lough-Neagh, on the S. by Fermanagh, and on the W. by Donnegal. It is a rough and rugged country, but tolerably fruitful; contains 12,683 houses, 30 parishes, 4 baronies, 4 boroughs, and sends 2 members to the imperial parliament. Dungannon is the capital.

TYROS, an island of Arabia.

TYRREL, a county of N. Carolina, in Edenton district; bounded on the N. by the Roanoke; E. by Hyde county, S. by Beaufort county, and W. by Martin and Pitt counties. In 1795, it contained 2995 citizens, and 1038 slaves. ELIZABETHTOWN is the capital.

TYRREL'S BAY, a bay on the S. coast of the island of St Vincent, 2 miles E. of Kingstown.

TYRRHENI, the ancient inhabitants of ETRURIA.

TYRRHENIAN SEA, } that part of the Medi-
TYRRHENUM MARE, } terranean which washes the coast of Etruria.

TYRTÆUS, an Athenian general and musician. He was called to the assistance of the Lacedæmonians in the ad war with the Messenians, about 685 B. C.; and a memorable victory which they obtained over that people is attributed to the animating sound of a new military flute or clarion, invented and played upon by Tyrtæus. Fragments of his poetry, in elegiac verse, are preserved in Stobæus, Lycurgus Orat. in Fulvius Ursinus, and in the Oxford edition of *Eleg. et Lyric. Frag. et Scholia*, 1759. *Æa Sufopmiva*, &c.

TYRWITT, Thomas, a learned writer, born in 1730, and educated at Eton and Queen's College, Oxford. In 1755, he was elected a fellow of Merton, which he afterwards resigned. In 1761, he became Clerk of the House of Commons. He published an edition of *Aristotle's Poetics*, and also of *Chaucer*. He also wrote *Notes on Shakespeare*, &c. He died in 1786.

TYSILO, a Welsh poet, historian, and divine, who flourished in the end of the 6th, and beginning of the 7th century. He wrote a *Chronicle of Britain*; from which GEOFFREY of Monmouth compiled his fabulous *History of Britain*.

TYSON, Edward, M. D. and F. R. S. a learned physician, born at Bristol, in 1650, and educated at Magdalen Hall, Oxford, where he studied physic, and graduated. He settled in London, and became F. R. S. He wrote many useful papers in the Society's *Transactions*. He was appointed physician to Bethlehem and Bridewell. He published *Phocæna*, or the *Anatomy of a Porpoise*; 4to. *Ephemeridis Vita*, or the *Natural History and Anatomy of the Ephemeris*; *Quarag Outang*, or the *Anatomy of a Pigmy, compared with that of a monkey, an ape, and a man*; 4to. He died suddenly, in 1708.

TYSTED, a town of Denmark, in N. Jutland, on a river that runs into the Gulf of Lymford; 40 miles W. of Aalborg. Lon. 8. 45. E. Lat. 57. 5. N.

(1.) TYTLER, William, Esq. an able writer, was born at Edinburgh, in 1711. He was the son of Mr Alexander Tytler, a writer. He was educated at the High School and the university of Edinburgh. In 1747, he was admitted into the Society of Writers to the Signet; and he honourably exercised

exercised this profession till his death in 1792. He was the author of an *Historical Inquiry into the evidence against Q. Mary, and Dissertation on her Marriage with the Earl of Bothwell*; in which works he vindicated her character. He collected the *Poetical remains of James I. King of Scotland*, and wrote *A Dissertation of Scottish Music; Observations on the Vision, a poem*; and a treatise on the *Fashionable Amusements in Edinburgh during the last century*.

(2.) **TYTLER**, Alexander Fraser, son of the former. This elegant and accomplished scholar died suddenly at Edinburgh on the 5th of January 1813, too recently to allow us to collect materials even for a sketch of his life. He formerly held the important situation of deputy judge advocate for Scotland, and professor of universal history in the University of Edinburgh. He published a *Treatise on Military Law*, which is held in high estimation, in one vol. 8vo, and *Elements of General History*, in 2 vols. 8vo, which has run through several editions. He published also a very valuable *Essay on Translation*, in 1 vol. 8vo; and, very recently, *An Historical and Critical Essay on the Life and Character of Petrarch*, 8vo. He was appointed a senator of the College of Justice in 1802, and, according to the custom of the Scottish judges, assumed the title of Lord Woodhouselee. He was made a commissioner of judicature in 1811. He was a respectable and upright judge, and particularly distinguished as a polite scholar and an elegant writer.

TYVY, a river of S. Wales, in Cardiganshire, which rises 5 miles N. of Tregannon, waters Tregannon and Llanbeder, and falls into Cardigan Bay, 3 miles below Cardigan.

TZACUA, in ornithology, a peculiar species of birds in Mexico. See MEXICO, N° I. § 13.

TZADURILLA, a town of Asiatic Turkey, in Natolia, on the banks of the Sangar, in Aclu, 63 miles SE. of Nice. Lon. 32. 8. E. Lat. 39. 0. N.

TZAGANUSKOI, a town of Russia, in Irkutskoi, on the borders of China; 48 miles NNW. of Selenginsk.

TZAR. See CZAR.

TZAREVAGOR, a town of Russia, in Tobolskoi, on the Tobol, 28 miles SE. of Okuneri. Lon. 82. 20. E. Ferro. Lat. 55. 20. N.

TZAREVOKOKCHAIK, a town of Russia, in Kazanskoi, 68 miles WNW. of Kazan. Lon. 65. 40. E. Ferro. Lat. 54. 50. N.

TZAREVOSANGURSK, a town of Russia, in Viatskaskoi, 100 miles SW. of Viatka. Lon. 65. 40. E. Ferro. Lat. 57. 8. N.

TZARITZIN, a town of Russia, in Saratovskoi, on the Volga; 180 miles S. of Saratov, and 378 E. of Ekaterinosslav. Lon. 62. 20. E. Ferro. Lat. 43. 35. N.

TZEKINSKOI, a fort of Russia, in Irkutskoi, on the borders of China, 100 miles WSW. of Selenginsk.

TZERNA, a river of European Turkey, in Romania, which runs into the Mariza, near Tzer-nitz.

TZERNITZ, a town of European Turkey, in Romania, near a river so named, 32 miles NNE. of Adrianople.

TZETZES, John, grammarian, was born at Constantinople, in the 12th century. He wrote *Commentaries upon Lycophron's Cassandra*, and a work entitled, *Cbiliades*. His works were printed at Oxford, by Potter, in 1697, folio.

TZIVILSK, a town of Russia, in Kazanskoi, 56 miles W. of Kazan. Lon. 65. 10. E. Ferro. Lat. 55. 40. N.

TZNA, a river of Russia, which rises 20 miles S. of Tambov, and runs into the Moksha, 20 miles NW. of Temnikov, in Tambovskoi.

TZURUCHATU, STAROI, a town of Russia, in Irkutskoi, on the Argunia, on the borders of China; 160 miles SE. of Nertchinsk. Lon. 137. 18. E. Ferro. Lat. 49. 18. N.

U V

(1.) * **V** Has two powers, expressed in modern English by two characters, *V* consonant and *U* vowel, which ought to be considered as two letters; but as they were long confounded while the two uses were annexed to one form, the old custom still continues to be followed. *U*, the vowel, has two sounds; one clear, expressed at other times by *eu*, as obtuse; the other close, and approaching to the Italian *u*, or English *oo*, as obtund. *V*, the consonant, has a sound nearly approaching to those of *b* and *f*. With *b* it is by the Spaniards and Gascons always confounded, and in the Runic alphabet is expressed by the same character with *f*, distinguished only by a diacritical point. Its sound in English is uniform. It is never mute.

(2.) *U*, *u*, *V* or *v*, is used, 1. as a letter; 2. as a numeral; and, 3. as an abbreviation. I. As a LETTER, it is the 20th of our alphabet; and the 5th vowel. It is formed in the voice by a round

U V

configuration of the lips, and a greater extrusion of the under one than in forming the letter *o*, and the tongue is also more canulated. The sound is short in *crust, must, tun, tub*; but is lengthened by a final *e*, as in *tune, tube*, &c. In some words it is rather acute than long; as in *brave, flute, lute*, &c. It is mostly long in polysyllables, as in *union, curious*, &c. but in some words it is obscure, as in *nature, venture*, &c. This letter in the form of *V* or *v*, is properly a consonant, and as such is placed before all the vowels; as in *vocal, venal, vibrate*, &c. Though the letters *v* and *u* had always two sounds, they had only the form *v* till the beginning of the 4th century, when the other form was introduced, the inconvenience of expressing two different sounds by the same letter having been observed long before. II. As a NUMERAL *V* stands for five; and with a dash added at top, thus *Ↄ*, it signifies 5000. III. As an ABBREVIATION, among the Romans, *V. A.* stood for

or *veterani assignati*; V. B. *viro bono*; V. B. A. *viri boni arbitrati*; V. B. F. *vir bone fidei*; V. C. *vir consularis*; V. C. C. F. *vale, conjux charissime, elicitur*; V. D. D. *voto dedicatur*; V. G. *verbi gratia*; Vir. V. *virgo vestalis*; VL. *videlicet*; V. V. *quinto nonarum*.

(1.) VAAGEN, EAST, an island in the North Sea, on the coast of Norway. Lon. 30. 5. E. Ferro. Lat. 68. 40. N.

(2.) VAAGEN, WEST, an island in the North Sea, on the coast of Norway. Lon. 29. 55. E. Ferro. Lat. 68. 30. N.

VAAS, a town of France, in the dep. of the arde, 21 miles S. of Man.

VAAST, St, a town of France, in the dep. of the Channel, 5 miles from Harfleur.

VABRES, a town of France, in the dep. of the Aveyron, and late prov. of Rouergue; 50 miles SE. of Rodez. Lon. 2. 55. E. Lat. 43. 57. N.

* VACANCY. *n. f.* [from *vacant*.] 1. Empty place; vacancy.—That thus you bend your eye *n. vacancy*. *Shak.* 2. Chasm; space unfilled.—*wide vacancy*. *Watts.* 3. [*Vacance*, Fr.] State of a post or employment when it is unsupplied.—The disposal of the revenues of some churches during the *vacancies*. *Lefley*.—The *vacancy* of a bishop. *Ayliffe.* 4. [*Vacances*, French.] Time of idleness; relaxation; intermission; time unengaged.—Those little *vacancies* from toil are sweet. *Dryd.*—*Vacancies* from necessary labour. *Watts.* 5. Idleness; emptiness of thought.—All dispositions to idleness or *vacancy* are dangerous. *Wot.*

* VACANT. *adj.* [*vacant*. Fr.; *vacans*, Lat.] 1. Empty; unfilled; void.—No *vacant* room to receive it. *Boyle*.—A better race to bring into their *vacant* room. *Milton.* 2. Free; unencumbered; uncrowded.—Those that are at leisure, and *vacant* from the affairs of the world. *More*.—*vacant* from uneasiness. *Locke.* 3. Not filled by an incumbent, or possessor.—Left the fiend invade *vacant* possession. *Milt.*—When the throne is *vacant*. *Swift.* 4. Being at leisure; disengaged.—*vacant* times as they lie not in camp. *Spens.*—He was *vacant* for that service. *Clar.*—There as not a minute of the day which he left *vacant*. *Ell.*—The memory relieves the mind in her *vacant* moments. *Addis.* 5. Thoughtless; empty of thought; not busy.—Who with a body fill'd, and mind. *Shak.*—The duke had a pleasant and *vacant* face. *Wotton.*

VACARICA, a town of Portugal, in Beira, 18 miles SE. of New Braganza, and 15 N. of Coimbra.

* To VACATE. *v. a.* [*vacare*, Latin.] 1. To annihilate; to make void; to make of no authority.—That after-act *vacating* the authority of the president. *K. Charles.* 2. To make vacant; to quit possession of: as, he *vacated* the throne. 3. To feast; to put an end to.—He *vacates* my revenge. *Dryden.*

* VACATION. *n. f.* [*vacation*, French; *vacatio*, Latin.] 1. Intermission of juridical proceedings, or any other stated employments; recess of courts or senates.—*Vacation* is all that time which lies between term and term, at London. *Cowel.*—There is for them to be occupied in the *vacation*. *Bacon.* 2. Leisure; freedom from trouble or

perplexity.—Benefit of peace, quiet, and *vacation* for piety. *Hammond.*

(1.) VACCA, an island in the Mediterranean, near the S. coast of Sardinia, 3 miles S. of St Antonio.

(2.) VACCA, an ancient city of Numidia.

* VACCARY. *n. f.* [*vacca*, Lat.] A cowhouse; a cow-pasture. *Bailey.*

VACCINÆ. See VARIOLÆ.

To VACCINATE. *v. a.* To inoculate with the cow-pox.

VACCINATION. *n. f.* Inoculation with the cow-pox. See MEDICINE, *Index*.

(1.) VACCINE, [from *vacca*, Latin, a cow.] *adj.* Of or belonging to a cow, or to the cow-pox.

(2.) VACCINE INOCULATION. See JENNERIAN. Much has been recently attempted, apparently by ignorant, interested, and prejudiced men, in order to excite the doubts in the public mind on the subject of this invention. The most eminent of the medical profession throughout the world support it, and the body of evidence, printed by the authority of parliament, seems perfectly conclusive.

VACCINIUM, the WHORTLE-BERRY, or *Bilberry*, in botany, a genus of plants of the class of *obandria*, and order of *monogynia*; and arranged in the natural system under the 18th order, *Bicornes*. The calyx is superior; the corolla monopetalous; the filaments inserted into the receptacle; the berry quadrilocular and polyspermous. There are 15 species; the most remarkable of which are,

1. VACCINIUM MYRTILLUS, *black whortle*, or *whortle berries*, or *bilberries*, growing in woods and on heaths abundantly. The flowers frequently vary, with 5 segments at the rim, and with 10 stamens. The berries when ripe are of a bluish black colour; and a variety has been found with white berries. They have an astringent quality. They dye a violet colour; but it requires to be fixed with alum.

2. VACCINIUM OXYCOCCUS, *CRAN BERRY*, *moor-berry*, or *moor-berry*, frequent on peat bogs in the Lowlands, but not so common in the Highlands of Scotland. The stalks are long, slender, woody, weak, and trailing: the leaves are stiff, acutely oval, glaucous underneath, their edges turned back, and grow alternate; 2 or 3 flowers grow singly on long red footstalks out of the extremity of the branches; the flowers are red, divided deeply into 4 acute segments, which are reflexed quite backwards; the filaments are downy; the anthers ferruginous and longer than the filaments: the berries red, and about the size of the hawthorn berries. At Longtown, on the borders of Cumberland, they are made so considerable an article of commerce, that, at the season when they are ripe, not less than 20l. or 30l.'s worth are sold by the poor people each market day for five or six weeks together, which are afterwards dispersed over different parts of the kingdom for making the well known cranberry tarts.

3. VACCINIUM VITIS IDÆA, *red whortle berries*, frequent in dry places, in heaths, woods, and on mountains. The berries have an acid cooling quality, useful to quench the thirst in fevers.

4. VACCINIUM

4. **VACCINIUM ULIGINOSUM**, the great bilberry bush, is found in low moist grounds, and almost at the summits of the Highland mountains. The leaves are full of veins, smooth and glaucous, especially on the under side; the berries are eatable, but not so much esteemed as the preceding.

VACH, one of the **LIPARI** Islands.

VACHA, a town of Hesse, on the Werra.

VACHIER, a town of France, in the dep. of Upper Loire; 9 miles S. of Puyen Velay.

* **VACILLANCY**, *n. f.* [*vacillans*, from *vacillo*, Lat. *vacillant*, Fr.] A state of wavering; fluctuation; inconstancy. Not much in use.—*Vacillancy* in human souls, and mutations in corporeal matter. *More*.

* **VACILLATION**, *n. f.* [*vacillatio*, from *vacillo*, Lat. *vacillation*, French.] The act or state of reeling or staggering.—The muscles keep the body upright, by readily assisting against every *vacillation*. *Derham*.

* **VACUATION**, *n. f.* [*vacuus*, Lat.] The act of emptying. *Diß*.

* **VACUIST**, *a. f.* [from *vacuum*.] A philosopher that holds a *vacuum*: opposed to a *plenist*.—Spaces, which the *vacuists* would have to be empty. *Boyle*.

* **VACUITY**, *n. f.* [*vacuitas*, from *vacuus*, Lat. *vacuité*, Fr.] 1. Emptiness; state of being unfilled.—Hunger is a state of *vacuity*. *Arbuthnot*. 2. Space unfilled; space unoccupied.—In filling up *vacuities*. *Hammond*—A vast *vacuity*. *Milt*.—*Vacuity* is interspersed in matter. *Bentley*.—Fill every *vacuity* of our soul. *Rogers*.—Redeeming still at night these *vacuities* of the day. *Fell*. 3. Inanity; want of reality.—*Vacuity* and emptiness. *Glanville*.

VACUNTÆ, an ancient people of Mauritania. See **MAURITANIANS**.

* **VACUOUS**, *adj.* [*vacuus*, Lat. *vacuë*, Fr.] Empty; unfilled.—Nor *vacuous* the space. *Milt*.

VACUP, a town of Bosnia, 32 miles SW. of Serajo.

(1.) * **VACUUM**, *n. f.* [Latin.] Space unoccupied by matter.—Enquiries about *vacuum*, or space and atoms. *Watts*.

(2.) **VACUUM**, in philosophy, denotes a space empty or devoid of all matter or body.—It has been a matter of much dispute among philosophers, whether there be in nature a perfect vacuum, or space void of all matter; but if bodies consist of material solid atoms, it is evident that there must be *vacuities*, or motion would be impossible. (See **METAPHYSICS**, *Sc&E*. XII.) We can even produce something very near a vacuum in the receiver of an air pump and in the Torricellian tube. (See **PNEUMATICS**, *Index*.) and it is doubtful whether the particles of the densest bodies known be in perfect contact. See **OPTICS**, *Index*.

(3.) **VACUUM BOYLEANUM**, is the approach to a real vacuum, to which we can arrive by means of the air-pump.

(4.) **VACUUM TORRICELLIAN**, is the most complete vacuum which we can make by means of the torricellian tube. See **BAROMETER**, and **PNEUMATICS**.

VADA, a sea port of Etruria, at the mouth of the Cecina; 16 miles SE. of Leghorn.

VADAGARY, a town of Hindoostan, in Madura, 15 miles W. of Coilpetta.

VADAMIA, a town of Asiatic Turkey, in the Arabian Irac, on the Euphrates, 105 miles WNW. of Bassora.

* **TO VADE**, *v. n.* [*vado*, Latin.] To vanish; to pass away. *Spenser*. A word useful in poetry, but not received.—And at whose touch the hills in smok shall *vade*. *Wotton*.

VADÉ MACUM, the title given to such books as men of particular professions, having frequent occasion to consult, may easily carry about with them.

VADIALCORA, a town of Arabia, in Hedjaz, 56 miles N. of Medina.

VADIFATIMA, a town of Arabia, in Hedjaz, 60 miles NW. of Mecca.

VADIN, a town of European Turkey, in Bel-sarabia, 32 miles W. of Nicopoli.

VADIUM, a pledge in law, is either *vivum* or *mortuum*.

(1.) **VADIUM MORTUUM**, or DEAD PLEDGE. See **MORTGAGE**.

(2.) **VADIUM VIVUM**, or LIVING PLEDGE, is when a man borrows a sum (suppose 200*l.*) of another; and grants him an estate, as of 20*l.* per annum, to hold till the rents and profits shall repay the sum so borrowed. This is an estate conditioned to be void as soon as such sum is raised. And in this case the land or pledge is said to be living; it subsists, and survives the debt; and, immediately on the discharge of that, results back to the borrower.

VADO, a town of Genoa, 3 miles S. of Savona.

VADACONDES, a town of Spain, in old Castile, 15 miles WSW. of Ofina.

VADOSAETTA, a town of Naples, in Capitanata, 6 miles SE. of Troja.

VADSTEIN, a town of Sweden, in W. Gothland, 31 miles W. of Nordkiöping. Lon. 15. 55. E. Lat. 58. 12. N.

VADUTZ, a town of Suabia, in Lichtenstein, 26 miles S. of Lindau.

VAELUE, a river of Ceylon.

VAENA, a town of Spain, in Andalusia, at the source of the Castro; 23 miles SE. of Cordora. Lon. 3. 30. W. Lat. 58. 12. N.

VAGA, a river of Russia, which rises near Povolokoe, and runs into the Dwina, at Vagkoi, in Archangel.

(1.) * **VAGABOND**, *adj.* [*vagabundus*, low Latin; *vagabond*, Fr.] 1. Wandering without any settled habitation; wanting a home.—*Vagabond* exile. *Shak*.—A *vagabond* debtor. *Ayliff*. 2. Wandering; vagrant.—Like to a *vagabond* bug upon the stream. *Shak*.—Blown *vagabond* or frustrate. *Milton*.

(2.) * **VAGABOND**, *n. f.* [from the adjective.] 1. A vagrant; a wanderer: commonly in a sense of reproach.—Wanderers and *vagabonds*. *Ral*.—A *vagabond* in Afric. *Addis*. 2. One that wanders illegally, without a settled habitation.—*Vagabond* is a person without a home. *Watts*.

VAGAI, a river of Russia, which runs into the Irtisch, 8 miles S. of Tobolsk.

* **VAGARY**, *n. f.* [from *vagus*, Lat.] A wild freak;

freak; a capricious frolick.—Flew off, and into strange vagaries fell. *Milt.*—Would he engage in some frolic, or take a vagary. *Locke.*

(1.) VAGINA, *n. f.* in anatomy, a canal reaching from the external orifice, or *os pudendi*, of women, to the uterus.

(2.) VAGINA, properly signifies a sheath or scabbard, and is used in architecture for the part of a terminus, because resembling a sheath, out of which the statue seems to issue.

(1.) VAGINAL, *adj.* Of or belonging to the Vagina.

(2.) VAGINAL COAT. See TUNICA, N° 2.

* VAGINOPENNOUS. *adj.* [*vagina* and *pena*, Latin.] Sheath-winged; having the wings covered with hard cases.

VAGNEY, a town of France, in the dep. of Vosges, 4 miles E. of Remiremont, and 12 S. of Broeyers.

VAGO, a town of Italy, near St Martins.

VAGOS, a town of Portugal, in Beira, on the coast of the Atlantic, 6 miles S. of New Braganza.

* VAGOUS. *adj.* [*vagus*, Lat. *vague*, French.] Wandering; unsettled. Not in use.—A *vagous* lust. *Ayliffe.*

VAGRAM, a town of Bavaria, in Saltzburg; 6 miles S. of Saltzburg.

* VAGRANCY. *n. f.* [from *vagrant*] A state of wandering; unsettled condition.

(1.) * VAGRANT. *adj.* Wandering; unsettled; vagabond; unfixed in place.—*Vagrant* and fictitious stories. *More.*—That brauteous Emma *vagrant* courtes took. *Prior.*—Lip's *vagrant* grace, and soft delight. *Prior.*

(2.) * VAGRANT. *n. f.* [*vagant*, Fr.] A sturdy beggar; wanderer; vagabond; man unsettled in habitation. In an ill sense.—*Vagrants* and outlaws. *Prior.*—Nor to collect the *vagrants* find a way. *Blackm.*—To make sturdy *vagrants* relieve themselves. *F. Atterb.*—Ye *vagrants* of the sky. *Pope.*

VAGSKOI UST, a town of Russia, in the province of Archangel, seated at the junction of the Vaga and Dwina; 20 miles NNW. of Schenskurfk.

* VAGUE. *adj.* [*vague*, Fr. *vagus*, Latin.] 1. Wandering; vagrant; vagabond.—*Vague* villains, good neither to live peaceably, nor to fight. *Hayward.* 2. Unfixed; unsettled; undetermined; indefinite.—*Vague* ideas. *Locke.*

VAGUS. See WAAG.

VAHARA, a town of Arabia Deserta, 150 miles S. of Jamama.

VAHLIA, in botany, a genus of plants; in the class of *Pentandria*, and order of *Dignia*.

VAIGAR, an island of Russia, in the Frozen Ocean, on the N. side of the Straits of Vagarskoi; 24 miles long and 4 broad.

VAIGE, a town of France, in the dep. of Maine, 12 miles E. of Laval.

* VAIL. *n. f.* [*vaile*, Fr. This word is now frequently written *veil*, from *velum*, Latin; and the verb *veil*, from the verb *velo*; but the old orthography commonly derived it, I believe rightly, from the French.] 1. A curtain; a cover thrown over any thing to be concealed.—A dark *vail* of forgetfulness. *Wisd.* 2. A part of female dress, by which the face and part of the shape is con-

cealed. 3. Money given to servants. It is commonly used in the plural. See VALE.

(1.) * To VAIL. *v. a.* To recover. See VEIL.

(2.) * To VAIL. *v. a.* [*avaler le bonet*, French. *Addison* writes it *vail*, ignorantly.] 1. To let fall; to suffer to descend.—They refused to *vail* their bonnets. *Carew.*—The virgin 'gan her beavoiir *vail*. *Fairf.* 2. To let fall in token of respect.—They would not *vail* their top-tails. *Knolles.*—And *vail* your tops to me, the sovereign of you all. *Drayton.*—*Vailing* the bonnet in salutations. *Addison.* 3. To fall; to let sink in fear, or for any other interest.—

That furious Scot,

'Gan *vail* his stomach, and did grace the shams
Of those that turn'd their backs. *Shak.*

(3.) * To VAIL. *v. n.* To yield; to give place; to shew respect by yielding. In this sense, the modern writers have ignorantly written *veil*.—Thy convenience must *veil* to thy neighbour's necessity. *South.*

VAIATA, a town of Italy, in the dep. of Olona, late Milanese; 13 miles E. of Milan.

VAILLAC, a town of France, in the dep. of the Lot; 12 miles NW. of Marillac, and 15 N. of Cahors.

VAILLANT, John Foy, a physician and great medalist, was born at Beauvais in 1632. Through the minister Colbert he travelled into Italy, Greece, Egypt, and Persia, to collect medals for the royal cabinet; and returned with so many as made the king's cabinet superior to any in Europe. Once, when in danger of being taken by an Algerine pirate, he hid some valuable coins in his stomach! From this curious cabinet he did not recover them without much difficulty. When Lewis XIV. gave a new form to the academy of inscriptions in 1701, Mr Vaillant was first made associate, and then pensionary. He wrote several works relating to ancient coins, and died in 1706.

(1.) VAILLY, a town of France, in the dep. of the Aisne, 8 miles E. of Soissons, and 9 NW. of Fismes.

(2.) VAILLY, a town of France, in the dep. of the Cher; 9 miles E. of Aubigny, and 9 W. of Sancerre.

* VAIN. *adj.* [*vain*, Fr. *vanus*, Lat.] 1. Fruitless; ineffectual.—For counsel is but *vain*. *Shak.*—*Vain* is the force of man. *Dryden.* 2. Empty; unreal; shadowy.—And *vain* chimera, vomits empty flame. *Dryden.*—And shedding *vain*, but seeming real tears. *Dryden.* 3. Meanly proud; proud of petty things; with of before the cause of vanity.—A *vain* man still boasting of himself. *I. Strange.*—He wad a torch aloft, and madly *vain*. *Dryd.*—*Vain* of their art. *Dryd.*—*Vain* men delight in telling what honours have been done them. *South.*—The *vain* design. *Pope.*—Unpleasing truths here mortify the *vain*. *Savage.*—Ye *vain*! desist from your erroneous strife. *Young.* 4. Shewy; ostentatious.—Load some *vain* church with old theatrick state. *Pope.* 5. Idle; worthless; unimportant.—Both all things *vain*, and all who in *vain* things. *Milton.*—That all the actions of our life were *vain*. *Denham.*—To your *vain* answer will you have recourse. *Blackm.* 7. False; not true. 7. In VAIN. To no purpose; to no end; ineffectually; without effect.—He tempts in

A a a a

v a n.

vain. Milt.—Providence and nature never did any thing in *vain*. *L'Estrange*.—Strong Halys stand in *vain*. *Dryden*.—The philosophers did in *vain* enquire. *Locke*.—We act and think in *vain*. *Addis.*—I have not written nor lived in *vain*. *West.*

* **VAINGLORIOUS.** *adj.* [*vanus* and *gloriosus*, Lat.] Boasting without performances; proud in disproportion to desert.—*Vain glorious* man. *Spens.*—Strength to glory aspires.—*Vain glorious. Milt.*—This his arrogant and *vain-glorious* expression witnebeth. *Hale.*

* **VAINGLORY.** *n. f.* [*vana gloria*, Latin.] Pride above merit; empty pride; pride in little things.—He had nothing of *vain-glory*. *Bacon*.—Expose every blast of *vain glory* to spiritual discipline. *Taylor*.—Natural aversion to *vain glory*. *Addison*.—A monarch's sword, when mad *vain-glory* draws. *Pope*.

* **VAINLY.** *adv.* [from *vain*] 1. Without effect; to no purpose; in *vain*.—Our cannons malice *vainly* shall be spent. *Shak.*—In weak complaints you *vainly* waste your breath. *Dryd.* 2. Proudly; arrogantly.—*Vainly* or vauntingly. *DeLany.* 3. Idly; foolishly.—Nor *vainly* hope to be invulnerable. *Milton*.—*Vainly* credulous. *Grew*.

* **VAINESS.** *n. f.* [from *vain*.] The state of being *vain*. Pride; falsehood; emptiness.—

—Lying, *vainness*, babbling. *Shak.*

(1.) **VAIR**, or **VAIRE**, a kind of fur, formerly used for lining the garments of great men and knights of renown. It is represented in engraving by the figures of little bells reversed, ranged in a line. See **HERALDRY**, Chap. II. *Señ. II.*

(2.) * **VAIR**, or **VAIRY.** *adj.* [in heraldry.] Variegated with coverings of gold, red, or other colours.

VAIRAC, a town of France, in the dep. of Lot; 4 m. NE. of Martel, and 9 NW. of St Cere.

VAIRE, a river of France, which runs into the Var; 3 miles NW. of Glandèves.

VAISER, a mountain of France, between Guilaumes and Perne, where a miraculous stone fell. See **SHOWER**, § 4.

VAISON, a town of France, in the dep. of the Mouths of the Rhone, and ci-devant county of Venaissin, seated on the Oueze; 22 miles NNE. of Avignon; and 23 SE. of Montelimar.

VAIVASWATA. See **POLYTHEISM**.

(1.) * **VAIVODE.** *n. f.* [*vaiwod*, a governor, Slavonian.] A prince of the Dacian provinces.

(2.) **VAIVODE.** See **WAIWODE**.

VAKUNAICA, a river of Russia, which runs into the Kirenga, in Lon. 126° E. Ferro. Lat. 56. 16. N.

(1.) **VAL**, a town of France, in the department of the Var, 3 miles N. of Brignolles.

(2.) **VAL**, a town of the French empire, in the dep. of Mont Blanc, late Savoy; 20 miles E. of Montier.

(3.) **VAL DI DEMONA**, **NOTO**, &c. See **DEMONA**, &c.

VALADARES, a town of Portugal, in Entre-Douro-e-Minho, 4½ miles SW. of Melgaffo.

VALAGODE, a town of Ceylon; 60 miles S. of Candy.

VALAIS, or **VALLAIS**, a valley in Switzerland, which extends from the source of the river Rhone

to the lake of Geneva. It is near 100 miles in length, but the breadth is very unequal. It is bounded on the N. by the Alps, which separate it from the cantons of Bern and Uri, on the E. by the mountains of Forche, on the S. by the dep. of the OLONA, in the Italian kingdom, ci-devant duchy of Milan and the Val d'Aoste, and on the W. by the dep. of MONT BLANC, late duchy of Savoy and the republic of Geneva. The inhabitants profess the Roman Catholic religion, and are subject to the swelling of the throat called *bronchocele*; and idiots are said to abound among them, more than in any other place of the globe. They are naturally hardy, enterprising, and good-natured. It is surrounded on all sides by very high mountains, most of which are covered with snow and ice that never thaw. However, the soil is fertile in corn, wine, and good fruit. The muscat-wine, which is produced here, is excellent, and well known all over Europe. There are mineral waters, plenty of game and some mines. STON is the capital. The mountains afford good pasture for their cattle in summer, and their harvest continues from May to October; it being sooner or later according to the situation of the place. This country is now annexed to the French empire.

* **VALANCE.** *n. f.* [from *Valencia*, whence the use of them came. *Skinner*.] The fringes or drapery hanging round the tester and head of a bed.—*Valance* of Venice, gold in needlework. *Shak.*—Thrust in the *valance* of the bed. *Swift*.

* **To VALANCE.** *v. a.* [from the noun.] To decorate with drapery. Not in use.—Old friend, thy face is *valanced*. *Shak.*

VALENTIA, in botany, **CROSS-WORT**; a genus of plants in the order *monocia*, of the class *polygamia*, and in the natural system arranged under the 41st order, the *asperifolia*. There is scarcely any calyx; the corolla is monopetalous, flat, four-parted, the stamina 4, with small anthers; the hermaphrodite flowers have a pistillum with a large germen, a bifid style, the length of the calyx, and one seed; the pistilla of the male flowers are hardly discernible. There are 8 species, one of which, viz.

VALENTIA CRUCIATA is a native of Britain; the stalks are square, the whole plant hairy, the leaves oval and verticillate, 4 in a whirl; the flowers are yellow, and grow on short peduncles out of the axils of the leaves. The root, like those of the galiums, to which it is related, will dye red. It is astringent, and was once used as a vulnerary.

VALBASE, a town of Spain, in Old Castile, 15 miles WSW. of Burgos.

VALCA, a river of Italy, in Patrimonio.

VALCALDA, a town of Genoa, 10 miles N. of Genoa.

(1.) **VALCKENBURG**, or **FAUQUEMONT**, a town of the French empire, in the department of the Ourte, and late province of Limburg, 8 miles E. of Maestricht. Lon. 5. 53. E. Lat. 50. 52. N.

(2.) **VALCKENBURG**, a town of Holland, in the dep. of the Delft, 3 miles NW. of Leyden.

VALCKOWAR, a town of Slavonia; at the junction of the Danube and Walpo; 70 miles NW. of Belgrade. Lon. 19. 52. E. Lat. 45. 35. N.

VALDAGNO.

VALDAGNO, a town of Austria, in Vicentino; 17 miles W. of Vicenza.

(1.) **VALDAI**, or **VALDAIA**, a town of Russia, in Novogorodskoe, on the side of a hill; 72 miles SE. of Novogorod. Lon. 51. 50. E. Ferro. Lat. 57. 50. N.

(2.) **VALDAI HILLS**, hills of Russia, in Novogorodskoe, the highest in the province.

(3.) **VALDAI LAKE**, a lake of Russia, in Novogorodskoe, 20 miles in compass.

VALDAJA. See **VALDAI**, No 1.

VALDARCETE, a town of Spain, in New Castile.

VALDASNES, a town of Portugal, in Tral-os-montes; 9 miles ESE. of Mirandela.

VALDEBURON, a town of Spain, in Leon; 34 miles NNE. of Leon.

VALDECONA, a town of Spain, in Catalonia; 15 miles S. of Tortosa.

VALDEMANZANAS, a town of Spain, in Leon; 8 miles SW. of Astorga.

VALDEMORO, two towns of Spain, in New Castile; 18, 13 miles S. of Madrid; 2d, 18 NE. of Cuenza.

VALDEPENAS, two towns of Spain: 1st, in Jaen, 8 miles W. of Jaen; 2d, in New Castile, 22 miles SE. Ciudad Real.

VALDERAS, a town of Spain, in Leon; 23 miles S. of Leon.

VALDERIES, a town of France, in the dep. of Tarn; 6 miles NE. of Alby.

VALDIGEM, a town of Portugal, in Beira, on the Duero; 3 miles NE. of Lamego.

(1.) **VALDIVIA**. See **BALDIVIA**.

(2.) **VALDIVIA**, a river of Peru, in Chili, running into the S. Pacific Ocean, at Valdivia.

VALDROME, a town of France, in the dep. of the Drome; 6 miles SSE. of Die.

* **VALE**. *n. f.* [*val*, Fr. *vallia*, Latin.] 1. A low ground; a valley; a place between two hills. *Vale* is a poetical word.—Who knows not *Ida vale*? *Spenser*.—Met in the *vale* of Arde. *Shak*.—Anchises, in a flow'ry *vale*. *Dryden*.—In those fair *vales* by nature form'd to please. *Harte*. 2. [From *avail*, profit; or *vale*, farewell. If from *avail*, it must be written *vail*, as *Dryden* writes. If from *vale*, which I think is right, it must be *vale*.] Money given to servants.—To what their sordid, begging *vails* amount. *Dryden*.—His revenue, besides *vales*. *Swift*.

VALEDIA, a sea-port town of Fez, on the Atlantic, with a very capacious natural harbour; 27 miles SSW. of Mazagan.

* **VALEDICTION**. *n. f.* [*valedico*, Latin.] A farewell.—A *valediction* forbidding to weep. *Donne*.

* **VALEDICTORY**. *adj.* [from *valedico*, Lat.] Bidding farewell.

VALEGGIO, a town of Italy, in the dep. of the Mincio, district and late duchy of Verona; 14 miles SW. of Verona.

(1.) **VALENCE**, an ancient, considerable, and populous city of France, in the dep. of the Drome, and ci-devant province of Dauphiné, on the left bank of the Rhone, and surrounded by walls, with a fort, and a grand cathedral. It is 30 miles N. by E. of Viviers, and 335 S. by E. of Paris. Lon. 4. 52. E. Lat. 44. 56. N.

(2.) **VALENCE**, a town of France, in the dep. of Lot and Garonne, on the Garonne, 12 miles SE. of Agen, and 22 E. of Nérac. Lon. 18. 33. E. Ferro. Lat. 44. 6. N.

(3.) **VALENCE EN ALBIGEOIS**, a town of France, in the dep. of the Tarn, 12 miles NE. of Alby, and 21 SSW. of Rodez.

VALENCEY, a town of France, in the dep. of the Indre, and ci-devant province of Berri, with a castle, on the Nabon: 15 m. S. of Romorantin.

(1.) **VALENCIA**, a province of Spain, which has the title of a kingdom; and is bounded on the E. and S. by the Mediterranean sea, on the N. by Catalonia and Aragon, and on the W. by New Castile and Murcia. It is about 165 miles long, and 63 broad.

(2.) **VALENCIA**, a city of Spain, and capital of the kingdom of the same name. It contains about 12,000 houses, besides those of the suburbs and the summer houses round it. It has an university, and an archbishop's see; and was taken from the Moors by the Christians in the 13th century. The town is handsome, but not very strong. The inhabitants manufacture wool and silk. It is seated on the Guadalaviar, over which there are five handsome bridges; and it is about 3 miles from the sea, where there is a harbour, 110 miles N. of Murcia, and 165 E. by S. of Madrid. This city surrendered to the earl of Peterborough in 1705; but it was lost again in 1707. (See **ENGLAND**, § 12.) Lon. 0. 10. W. Lat. 39. 23. N.

(3.) **VALENCIA**, a town of Portugal, in Entre-Duero-e-Minho, on the S. bank of the Minho, opposite Tuy in Spain; founded by Viriatus. It has 2 churches and 900 inhabitants, and lies 16 miles W. of Oporto, and 30 NW. of Braganza. Lon. 10. 13. E. Ferro. Lat. 42° N.

(4.) **VALENCIA DE ALCANTARA**, a town of Spain, in Estramadura, near Portugal: 24 miles SW. of Alcantara.

(5.) **VALENCIA DE DUERO**, a town of Portugal, in Beira; 2 miles from the Duero, and 12 W. of St Joao de Pefquiera.

(6.) **VALENCIA, VESO**. See **MONTE-LEONE**.

VALENCIENNES, an ancient, strong, and considerable city of France, in the department of the North, and late province of Hainault. It contains about 20,000 souls. The Scheld divides it into two parts. It is a very important place; the citadel and fortifications, the work of Vauban, were constructed by order of Lewis XIV. who took this town from the Spaniards. It was confirmed to him by the treaty of Nimeguen, in 1678. In 1793, it surrendered to the allies after a severe siege, but was afterwards abandoned; and is now in the possession of the French. Besides lace, this city is noted for manufactories of woollen stuffs and very fine linens. It is 20 miles WSW. of Mons, 17 NE. of Cambrai, and 120 NE. by N. of Paris. Lon. 3. 37. E. Lat. 50. 21. N.

VALENGIN, a town of Switzerland, in Neuchâtel, 3 miles NNW. of Neuchâtel.

VALENNYD, a river of N. Wales, in Merionethshire; running into the Traeth Bicha.

(1.) **VALENS**, an Arabian philosopher, founder of a sect of heretics in the 2d century, called **VALESIANS**.

(2.) VALENS, Flavius, emperor of the East, a great patron of the Arians; killed by the Goths, A. D. 379. See CONSTANTINOPLE, § 4-8; and ROME, § 88.

VALENTOLE, a town of France, in the dep. of Lower Alps; 18 miles S. of Digne, and 24 W. of Castellane.

VALENTANO, a town of Italy, in Patrimonio, in the duchy of Castro; 14 miles SW. of Orvieto.

(1.) VALENTIA, an island of the Atlantic, on the SW. coast of Ireland; 5 miles long, and 2 broad, separated from Kerry by a channel one mile broad. Lon. 10. 11. W. Lat. 51. 52. N.

(2.) VALENTIA, a town on the above island.

(3.) VALENTIA, in Italy. See VALENZA.

(1.) VALENTINE, pope of Rome, succeeded Eugenius II. and died in 827.

(2.) VALENTINE, the founder of the heretical sect of VALENTINIANS, was born in Egypt, and educated in Alexandria; but being disappointed of a bishopric, he set up his heresy, which resembles that of the GNOSTICS. He died in A. D. 160.

(3.) * VALENTINE. *n. f.* A sweetheart, chosen on Valentine's day.—And birds had drawn their *valentines*. Wotton.

(4.) VALENTINE, in geography, a town of France, in the dep. of Upper Garonne, and ci-devant province of Languedoc; 2 miles SW. of St Gaudens, and 9 NE. of St Bernard. Lon. o. 57. E. Lat. 43. 1. N.

VALENTINE'S BAY, a bay on the SE. coast of Terra del Fuoco.

VALENTINIAN I. emperor of the West, a renowned warrior, but a tyrant over his subjects. See ROME.

VALENTINIAN II. emperor of the West, a prince celebrated for his virtues, and above all for his moderation; yet a conspiracy was formed against him by Arbogastes, the commander in chief of his armies; and he was strangled in the year 392. See CONSTANTINOPLE, § 4-8; and ROME, § 88.

VALENTINIAN III. the son of Constantius by Pulcheria, daughter of Arcadius; succeeded A. D. 423, in his 6th year, and prospered while his mother PULCHERIA governed. But became a tyrant afterwards, and was murdered A. D. 454.

VALENTINIANS, in church history, a sect of Christian heretics, who sprung up in the 2d century, and were so called from their leader VALENTINUS. The Valentiniens were only a branch of the GNOSTICS, who realized or personified the Platonic ideas concerning the Deity, whom they called *Pleroma* or *Plenitude*. Their system was this: the first principle is *Bythos*, i. e. *Depth*, which remained many ages unknown, having with it *Ennoe* or *Thought*, and *Sige* or *Silence*; from these sprung the *Nous* or *Intelligence*, which is the only son, equal to and alone capable of comprehending the *Bythos*; the sister of *Nous* they called *Aletheia* or *Truth*; and these constituted the first quaternity of *æons*, which were the source and original of all the rest; for *Nous* and *Aletheia* produced the World and Life; and from these two proceeded Man and the Church. But besides these 2 principal *æons*, there were 22 more; the last of which, called *Sophia*, being desirous to ar-

rive at the knowledge of *Bythos*, gave herself a great deal of uneasiness, which created in her Anger and Fear, of which was born Matter. But the Horos or Bounder stopped her, preserved her in the *Pleroma*, and restored her to Perfection. *Sophia* then produced the Christ and the Holy Spirit, which brought the *æons* to their last perfection, and made every one of them contribute their utmost to form the Saviour. Her *Enthymese*, or *Thought*, dwelling near the *Pleroma*, perfected by the Christ, produced every thing that is in the world by its divers passions. The Christ sent into it the Saviour, accompanied with angels, who delivered it from its passions, without annihilating it; from thence was formed corporeal matter.

VALENTINUS. See VALENTINE, N° 2.

VALENZA, a strong town of Italy, in the dep. of the Olona, and ci-devant duchy of Milan, formerly capital of the Lomelin. It has been often taken and retaken in the wars of Italy. It was ceded to the king of Sardinia in 1707. It is seated on a mountain near the Po, 12 miles E. of Casal, and 15 SW. of Milan. Lon. 8. 56. E. Lat. 44. 58. N.

VALENZO, DO MINHO, a fortified town of Portugal, in Entre-Duero-e-Minho, seated on a hill on the Minho. Lon. 8. 11. W. Lat. 42. 2. N.

VALERIA. See SION, N° 3.

(1.) VALERIAN, or VALERIANUS, Publius Licinius, emperor of Rome, was taken captive, and cruelly treated by Sapor I. king of Persia. See ROME, § 72.

(2.) * VALERIAN. *n. f.* [*valeriana*, Lat. *valerian*, Fr.] A plant.

(3.) VALERIAN, } in botany, a genus of plants,
VALERIANA, } belonging to the class *trian-*
dria, and order *monogynia*; and in the natural system arranged under the 48th order, *Aggregatae*. There is hardly any calyx; the corolla is monopetalous, gibbous at the base, situated above the germen; there is only one seed. There are 22 species, only four of which are natives of Britain; viz.

1. VALERIAN DIOECIA, the *Dioecious Valerian*.

2. VALERIANA LOCUSTA, the *Locust Valerian*.

3. VALERIANA OFFICINALIS, the *Official Valerian*, alone is useful. The root of this plant is perennial; the stalk is upright, smooth, channelled, round, branched, and rises from 2 to 4 feet in height; the leaves on the stem are placed in pairs upon short broad sheaths; they are composed of several lance-shaped, partially dentated, veined, smooth pinnae, with an odd one at the end, which is the largest: the floral leaves are spear shaped, and pointed; the flowers are small, of a white or purplish colour, and terminate the stem on branches in large bunches. It flowers in June, and commonly grows about hedges and woods. It is supposed to be the *æu* of Dioscorides and Galen, by whom it is mentioned as an aromatic and diuretic. It is said by several authors to be efficacious in epilepsy. Bergius states its virtues to be antispasmodic, diaphoretic, emmenagogue, diuretic, anthelmintic. The root in substance is most effectual, and is usually given in powder from a scruple to a dram; its unpleasant flavour may be concealed by a small addition of mace. A tincture of valerian in proof spirit and

nd in volatile spirit are ordered in the London Pharmacopœia. Cats are very fond of the smell of this root, and seem to be intoxicated by it.

4. *VALERIANA RUBRA*, the *Red Valerian*.

VALERIANUS. See **VALERIAN**, N° 1.

(1.) **VALERIUS MAXIMUS**, a Latin historian, sprung from the families of the Valerii and Fabii, whereby he united the names of *Valerius* and *Maximus*. He studied polite literature, and afterwards followed Sextus Pompey to the wars. At his return he composed an account of the actions and remarkable sayings of the Romans and other great men; and dedicated that work to the Emperor Tiberius. Many of the learned think that this is the same that is now extant, and bears the name of *Valerius Maximus*; but others maintain, that what we have now is only an abridgment of the work written by this celebrated historian, and that this abridgment was made by one Nepotian of Africa.

(2.) **VALERIUS PUBLICOLA**, a celebrated Roman, named *Poplicola* or *Publicola*, from his popular acts. See **ROME**, § 14.

VALESIANS, a sect of heretics, in the 2d century, founded by **VALENS**, who were all voluntary eunuchs, and rejected the law and the prophets. They were condemned by the council of Achaia, A. D. 240.

(1.) **VALESIUS**, *Henricus*, or *Henry de Valois*, a learned critic, born at Paris, in 1603. He was bred to the law, but dropt it, and became historiographer to the king, who gave him a pension, as did also the French clergy, for publishing an edition of the ancient church historians. This work was published at Amsterdam in 3 vols. fol. and at Cambridge in 1689. He died blind, in 1726.

(2.) **VALESIUS**, *Adrianus*, brother to Henry, was also historiographer royal, and published a work entitled *Gesta Francorum*; in 3 vols. folio. He died in 1692.

VALESTRA, a town of the Italian kingdom, in the dep. of Panaro, and ci-devant duchy of Modena; 12 miles SW. of Modena.

* **VALET**. *n. f.* [*valet*, Fr.] A waiting servant. —Cast clothes to be worn by *valets*. *Addis*.

(1.) **VALET**, with us, is only used in the phrase *valet de chambre*, a servant whose office is to dress and undress his master, &c.

(1.) **VALETTE**, a city of Malta, capital of the island. (See **MALTA**, § 5.) Lon. 14. 34. E. Lat. 35. 54. N.

(2.) **VALETTE**, Peter De, the brave grandmaster of Malta, who defended it against the whole power of the Turks, for 4 months.

(5.) **VALETTE**, a town of France, in the dep. of Charente, and ci-devant prov. of Angoumois, 10 miles S. of Angoulême. Lon. 0. 15. E. Lat. 45. 30. N.

* **VALETUDINARIAN.** } *adj.* [*valetudinaire*, Fr. *valetudo*, Lat.]

* **VALETUDINARY.** } Weakly; sickly; infirm of health. —Physic, by purging noxious humours, prevents sickness in the healthy, or recourse thereof in the *valetudinary*. *Brown*. —The *valetudinary*, feeble part of mankind. *Derham*. —A *valetudinary* and very unequal state of health. *Black*. —Healthful animals,

opposed to *valetudinary* ones. *Cheyne*. —*Valetudinarians* must live where they can command. *Swift*.

VALEY, an island on the North Sea, on the SW. coast of Shetland.

VALEZIA, in botany, a genus of plants, in the class of *hexandria*, and order of *monogynia*; ranking, according to the natural method, in the 22d order, *Caryophyllee*.

VALFERMOSO, a town of Portugal, in Estremadura, 9 miles NE. of Lyria.

VALFROICOR, a town of France, in the dep. of the Vosges, 6 miles S. of Mirecourt.

VALGOM, a town of Ceylon, 6 miles N. of Candi.

VALGORGE, a town of France, in the dep. of the Aude, 9 miles NW. of Largentiere.

VALGUS, *Bow or Bandy Legged*. Some children are bow legged from their birth; others become so from sitting them on their feet too early. The tibia of some is crooked; the knees of others are distorted; from a fault in the ankle, the feet of some are turned inwards, these are called *vari*; and in others they turn outwards, these are called *valgi*. The best method of preventing these disorders in weakly children, is to exercise them duly, but not violently; by dancing or tossing them about in one's arms, and not setting them much on their feet, at least not without properly supporting them: if the disorder attends at the birth, or increases after it is begun, apply emollients, then apply boots of strong leather, wood, &c. as required, to dispose the crooked legs gradually to a proper form; or other instruments may be used instead of boots, which, when not too costly, are usually to be preferred. Slighter instances of these disorders yield to careful nursing, without instruments.

VALHALLA [*Scandin.* i. e. the hall of those who died by violence,] in the mythology of the ancient Saxons, Scandinavians, Danes, Swedes, &c. the paradise of **ODIN**, where after death the souls of warriors were believed to be feasted by **ODIN**, seated on a throne, and served by the **VALKYRIÆ**, &c. See **MYTHOLOGY**, § 41.

VALHERMOSO, a town of Spain, in New Castile, 12 miles ESE. of Guadalaxara.

VALIAM, an island of Russia, in lake Ladoga, 52 miles N. of Petersburg.

* **VALIANCE.** *n. f.* [from *valiant*; *valliance*, Valour; personal puissance; fierceness; bravery. Not in use. —To let him meet his doughty *valliance*. *Spenser*.

* **VALIANT.** *adj.* [*valliant*, Fr.] Stout; personally puissant; brave. We say, a *valiant* man; a *valiant* action. —Be thou *valiant* for me. 1 Sam. —A very *valiant* fencer. *Walt*. —A *valiant* combat. *Nelson*.

* **VALIANTLY.** *adv.* [from *valiant*.] Stoutly; with personal strength; with personal bravery. —Fight *valiantly* to-day. *Shak*. —*Valiantly* to withstand his enemies. *Knolles*.

* **VALIANTNESS.** *n. f.* [from *valiant*.] Valour; personal bravery; puissance; fierceness; stoutness. —Thy *valiantness* was mine. *Shak*. —The *valiantness* of the defenders. *Knolles*. —Shew not thy *valiantness* in wine. *Ecclus*.

(1.) * **VALID.** *adj.* [*valid*, Fr. *validus*, Latin.] 1. Strong; powerful; efficacious; prevalent. —Perhaps

Perhaps more *valid* arms. *Milton*. 2. Having intellectual force; prevalent; weighty; conclusive. — A *valid* argument. *Stephens*.

(2.) *VÁLID*, in law, an appellation given to acts, deeds, transactions, &c. which are clothed with all the formalities requisite to their being put into execution, and to their being admitted in a court of justice.

* *VALIDITY*. *n. f.* [*validité*, Fr. from *valid*.]

1. Force to convince; certainty.—You are persuaded of the *validity* of that famous verse. *Pope*.

2. Value. A sense not used.—

No less in space, *validity*, and pleasure. *Shak*.

VALINCOURT, John Baptist, Henry du Troufset de, born in Picardy, in 1655, wrote the *Life of Francis D. of Guise*, 12mo; *Observations on the Oedipus of Sophocles*, 4to, &c.

VALIQUERVILLE, a town of France, in the dep. of the Lower Seine, 6 miles NNW. of Caudebec.

VALK, a town of Russia, in Riga, 71 miles NE. of Riga. Lon. 41. 30. E. Ferro. Lat. 57. 50. N.

VALKENBURGH, Theodore, an eminent Dutch painter, born at Amsterdam, in 1675, where he died in 1721.

VALKI, a town of Russia, in the province of Charkovskoe, 16 miles SW. of Charkov. Lon. 53. 30. E. Ferro. Lat. 49. 36. N.

VALKYRIE, in the Saxon mythology, celestial virgins who attend the souls of heroes in Odin's paradise of *VALHALLA*. See *MYTHOLOGY*. § 41.

VALL, a town of Sweden, in Warmeland, 28 miles ESE. of Carlstadt.

(1.) *VALLA*, George, M. D. born at Placentia, was professor of belles lettres at Venice, where he died in 1460. He wrote *De expetendis et fugiendis rebus*, 2 vols. folio.

(2.) *VALLA*, Lawrence, a learned Italian, born at Placentia, in 1445. He retrenched the Latin language, from its Gothic barbarisms. He was apprehended and condemned to be burnt for heresy, but was saved by Alphonso K. of Naples; after which Pope Nicholas V. called him to Rome, and gave him a pension. He died there in 1465. His works are, 1. On the elegance of the Latin language, fol. and at Cambr. 8vo: 2. Life of Ferdinand V. king of Aragon, 4to: 3. Notes on the New Testament: 4. Treatise on Falsehood and Truth: 5. Fables: and, 6. Translations of *Thucydides*, *Herodotus*, and *Homer's Iliad*.

VALLABREGUES, a town of France, in the dep. of the Mouths of the Rhone, 3 miles N. of Tirascon, and 9 SW. of Avignon.

(1.) *VALLADOLID*, an ancient, large, and handsome city of Spain, in Old Castile, and capital of a principality of the same name, with a bishop's see and an university. It is surrounded with strong walls, embellished with handsome buildings, large public squares, piazzas, and fountains. It is large and populous, containing 11,000 houses, with fine long and broad streets, and large high houses, adorned with balconies. The market-place, called *El Campo*, is 700 paces in circumference, surrounded with a great number of convents, and is the place where the fairs are kept. There is another square in the middle of the city, surrounded with handsome brick houses, having

under them piazzas, where people may walk dry in all weather. All the houses are 4 stories; and there are balconies at every window, of iron gilt. There are 70 monasteries and nunneries; the finest of which is that of the Dominicans, its church is one of the most magnificent in the city. The kings resided a long time in this place; and the royal palace, which still remains, is of very large extent, though but two stories high; within are fine paintings of various kinds, and at one of the corners a curious clock, made in the same manner as that of Strasburg. The house of the inquisition is an odd sort of structure, for there are no windows, but a few holes to let in the light. The environs of the city are a fine plain, covered with gardens, orchards, vineyards, meadows, and fields. It is seated on the rivers Esgurra and Pisuerga. Lon. 4. 25. W. Lat. 41. 50. N.

(2.) *VALLADOLID*. See *MECHOACAN*, N° 2.

(3.) *VALLADOLID*, a town of Mexico, in the prov. of Honduras. Lon. 70. 33. E. Ferro. Lat. 14. 30. N.

(4.) *VALLADOLID*, a town of Mexico, in Yucatan, 75 miles E. of Merida.

VALLAIS. See *VALLAIS*.

VALLANCE, a town of France, in the dep. of Gers, 4 miles S. of Condom, and 16 N. of Auch.

* *VALLANCY*. *n. f.* [from *vallance*.] A large wig that shades the face.—

Critics in plume and white *vallancy* wig. *Dryd*.

VALLARÓIS, a town of Spain, in Aragon, 15 miles W. of Balbastro.

(1, 2.) *VALLE*, two towns of Norway, in Christianland: 1st, 16 miles SW. and 2d, 44 miles N. of Christianland.

(3.) *VALLE*, a town in Istria, 6 miles SE. of Rovigno.

(4.) *VALLE*, Peter DEL LA, a famous traveller, born at Rome, in 1586. He travelled into Turkey, Egypt, Syria, Persia, and India; and on his return, published his voyages in 54 Letters, at Rome, 1662, in 4 vols. He died in 1662. His work was translated into French, and published in 8 vols. 12mo.

VALLÆA, in botany, a genus of plants in the class of *Polyandria*, and order of *Monogynia*.

VALLELONGA, a town of Naples, in Calabria Citra, 18 miles ENE. of Nicotera.

VALLENCAY, a town of France, in the dep. of the Indre, 21 miles N. of Chateauroux. Lon. 19. 12. E. Ferro. Lat. 47. 12. N.

VALLERAUQUE, a town of France, in the dep. of Gard, 6 miles N. of Vigan.

VALLERS, a town of France, in the dep. of Indre and Loire, and late prov. of Touraine, 12 m. WSW. of Tours. Lon. 0. 41. E. Lat. 47. 24. N.

VALLERY, St., a town of France, in the dep. of Somme, late Picardy, 100 miles NW. of Paris.

VALLET, a town of France, in the dep. of Lower Loire, 2 m. N. of Clifton, and 12 E. of Nantes.

VALLETTE, a town of France, in the dep. of Isere, 15 miles SSE. of Grenoble.

(1.) * *VALLEY*. *n. f.* [*valée*, Fr. *vallis*, Lat.] A low ground; a hollow between hills.—*Vallies* are the intervals betwixt mountains. *Woodw*.—That hills and *vallies* yield. *Raleigh*.—Sweet interchange of hill and *valley*. *Milton*.—The heat of the *valley*. *Brown*.

(2.) *VALLEYS*,

(2.) VALLEYS, FOUR; a ci-devant district of Piedmont, otherwise called PIGNEROL, now in the French empire, and dep. of the Po. It was bounded on the N. by the marquissate of Susa, S. by that of Saluzzo, E. by Carmagnola, and W. by old France: being 24 miles long, and from 8 to 11 broad. PIGNEROL was the capital. This country is infamous for the persecution of the VALDENSES, in 1655. Its population is 8000, of whom 7000 are Protestants. It abounds with game.

VALLI, a town of Naples, in Lavora; 12 m. SE. of Capua.

VALLIERE, a town of France, in the dep. of Creuse: 6 miles SW. of Aubusson.

VALLISNERI, Anthony, M. D. an eminent Italian botanist, born in Tuscany, in 1661. He studied under Malpighi, and became physician. He died in 1730: His works were printed at Venice, in 3 vols 4to, 1773.

VALLISNERIA, a genus of plants of the class *Diacia*, and in the order of *Diandria*; ranking in the natural method, under the first and very numerous order, *Palme*.

VALLOIRE, a town of the French empire, in the dep. of Mont Blanc, and ci-devant Savoy; and county of Maurienne: 9 m. SSE. of St Jean.

(1.) VALLON, a town of France, in the dep. of the Valt: 10½ miles W. of Mans.

(2.) VALLON, a town of France, in the dep. of Ardeche; 9 miles NW. of Pont St Esprit.

VALLOUISE, a town of France, in the dep. of the Upper Alps: 9 miles SW. of Briançon.

VALLS, a town of Spain, in Catalonia; 9 miles N. of Tarragona.

VALMAROSSA, a town in Istria; 8 miles ESE. of the Capo.

VALMASEDA, a town of Spain, in the prov. of Biscay, 13 miles SW. of Bilbao.

VALMONT, a town of France, in the dep. of Lower Seine, and ci-devant prov. of Normandy; 15 miles E. of Pecamp. Lon. 1. 25. W. Lon. 49. 6. N.

VALNA, a town of Spain, in Andalusia, on a mountain near the Guadalquivir, and Cordova.

VALNDORF, a town of Hungary, 5 miles SW. of Szeben.

VALOE, an island of Sweden, in the Bay of Christiania: 7 miles SSE. of Tonsberg.

VALOGNE, a town of France, in the dep. of the Channel, and ci-devant prov. of Normandy; famous for manufactures of cloth and leather: 8 miles from the coast, and 158 W. by N. of Paris. Lon. 1. 26. W. Lat. 49. 30. N.

VALONA, a sea-port town of European Turkey, in Upper Albania, near the mountains of Chimera, 50 miles S. of Durazzo. It was taken by the Venetians, in 1690. Lon. 19. 23. E. Lat. 1. 4. N.

* VALOROUS. *adj.* [from *valour*.] Brave; stout; valiant.—Of their great deeds and *valorous* empire. *Spenser*.—Captain Jany is a *valorous* gentleman. *Shak*.

VALORSINE, a town of the French empire, in the dep. of Mont Blanc.

VALOVEK, a town of European Turkey, in Moldavia.

(1.) * VALOUR. *n. f.* [*valour*, Fr. *valor*, Lat. *Auf.*] Personal bravery; strength; prowess; puissance; stoutness.—And chafte, with the *valour* of my tongue. *Shak*.—Contend against thy *valour*. *Shak*.—When *valour* preys on reason. *Shak*.—An innate *valour*. *Howell*.—For contemplation he, and *valour* form'd. *Milt*.—And *valour*, and heroic virtue, call'd. *Milt*.—*Valour* gives awe, and promises protection. *Temple*.

(2.) VALOUR, in the mythology, the daughter of Pallas and Styx, and filter of STRENGTH and VICTORY. See STYX, N° 2.

(1.) VALPARAISO, a town of Spain, in New Castile, 15 miles S. of Huete.

(2.) VALPARAISO, or } a large and populous
VALPARISSA, } town of Peru, in Chili, on a bay of the S. Pacific Ocean, at the foot of a high mountain, with a well frequented harbour, defended by a strong fort. It is 225 miles N. of Concepcion. Lon. 72. 16. W. Lat. 33. 3. S.

VALPERGO, a town of the French empire, in the dep. of the Po, and late Piedmontese, and county of Canaveise: 16 N. of Turin.

VALPERSCHWEIL, a town of Switzerland, in the canton of Berne; 10 miles NW. of Berne.

VALPUESA, a town of Spain in Old Castile: 10 miles NNE. of Frías.

VALRAS, } or VAURAS, a town of France,
VALREAS, } in the dep. of the Drome; and ci-devant county of VENAISIN, 18 miles NNE. of Orange, and 15 SE. of Montelimart.

VALS, a town of France, in the dep. of the Ardeche and late prov. of Dauphine, famed for its mineral waters, 3 miles N. of Aubenas. Lon. 4. 26. E. Lat. 44. 48. N.

VALSALVA, Anthony Marie, M. D. a physician, born at Imola, in Italy, in 1666. He became professor of Anatomy at Bologna, and wrote a treatise on the Human ear, in 4to: *Dissertationes Anatomicae*, 2 vols. 4to. Ven. 1749. He died in 1723.

VALSECA, a town of Spain, in Old Castile; 4 miles N. of Segovia.

VALSTAGNO, a town in Vicentino: 16 miles N. of Vicentino.

VALTANAS, a town of Spain, in Leon; 15 miles E. of Valencia.

VALTELINE, a ci-devant territory and lordship in the country of the Grisons, at the foot of the Alps, at the entrance of Italy; annexed, along with BORMIO and CHIAVENNA, at the desire of the citizens, in 1797, to the CISALPINE REPUBLIC, (which see) and now a constituent part of the kingdom of Italy. Before these revolutionary changes, the VALTELINE, or as the Grisons call it *Valle Tellina*, was bounded on the N. by the other territories of the Grisons, E. by Bormio, and BRESCIANO, or, as it is now called, department of the MELLA, in the Italian kingdom; on the S. by the ci-devant county of Bergamesco, now in the dep. of the SERIO and by the late Milanese, now in the dep. of Olona; on the W. by the late county of Chiavenna, and the dep. of Olona, late Milanese. It consists of a large valley, surrounded by high mountains, 50 miles long, and from 8 to 10 broad. It is watered through its whole extent

tent by the Adda. The total population is 62,000. SONDRIO is the capital.

VALTIERRA, a town of Spain, in Navarre, 10 miles from Tudela.

VALVA, a town of Naples, in Abruzzo Citra; 36 miles NW. of Molise.

* VALUABLE. *adj.* [valuable, Fr. from *value*.] 1. Precious; being of great price. 2. Worthy; deserving regard.—That *valuable* person. *Attrib.*—Some minute circumstances are very *valuable*. *Swift*.

VALVANO, a town of Naples, in Principato Citra; 16 miles N. of Cangiano.

VALVASONE, a town of Austria, in Friuli, on the Tagliamento; 14 miles NW. of Udina.

VALVASOR. *n. f.* an ancient title of dignity among the Anglo-Saxons; the next below a *thane* or *Peer*. They were called in Latin *vice-domini*, or *vice-lords*; and their ladies *vidames*. They are mentioned by the ancient English lawyers as *virī magnæ dignitatis*, gentlemen of high dignity. Sir Edward Coke speaks highly of them: yet they are now so totally out of use, that antiquarians are not agreed respecting their origin, their office, or the extent of their powers.

* VALUATION. *n. f.* [from *value*.] 1. The act of setting a value; appraisement.—A just *valuation*. *Ray*. 2. Value set upon any thing.—So slight a *valuation*. *Shak*.—Take out of men's minds false *valuations*. *Bacon*.—The writers expressed not the *valuation* of the denarius. *Arbutnot*.

* VALUATOR. *n. f.* [from *value*.] An appraiser; one who sets upon any thing its price. A word which I have found no where else.—What *valuators* will the bishops make use of? *Swift*.

* VALUE. *n. f.* [*value*, French, *valor*, Latin.] 1. Price; worth.—Ye are physicians of no *value*. *Job*, viii.—Let nothing in the world be of any *value* with you. *Laso*. 2. High rate.—And therefore set this *value* on your life. *Addison*. 3. Rate; price equal to the worth of the thing brought.—The *value* of his pictures. *Dryden*.

(1.) * VALVE. *n. f.* [*valva*, Lat.] 1. A folding door.—

Swift through the *valves* the visionary fair Repasts'd. *Pope*.

Opening their *valves*, self-mov'd on either side,

The adamantine doors expanded wide. *Harte*.

2. Any thing that opens over the mouth of a vessel.—By opening of the *valve*, and forcing up of the sucker. *Boyle*. 3. [In anatomy.] A kind of membrane, which opens in certain vessels to admit the blood, and shuts to prevent its regress.—The blood is hindered from going backward by the *valves* of the heart. *Arbutnot*.

(2.) VALVE, in hydraulics, pneumatics, &c. is a kind of lid or cover of a tube or vessel, so contrived as to open one way, but which, the more forcibly it is pressed the other way, the closer it shuts the aperture; so that it either admits the entrance of a fluid into the tube or vessel, and prevents its return; or admits its escape, and prevents its re-entrance.

(3.) VALVE, in anatomy, a thin membrane applied on several cavities and vessels of the body, to afford a passage to certain humours going or e-

way, and prevent their reflux towards the place from whence they came.

* To VALUE. *v. a.* [*valoir*, Fr. from the noun.] 1. To rate at a certain price.—The tithes will be better *valued*. *Spenser*.—*Valuing* his reputation. *Carew*.—God alone *values* right the good. *Mil*. 2. To rate highly; to have in high esteem.—Very *valued* pieces. *Addis*.—He *values* himself. *Atterb*.—He *values* these. *Pope*. 3. To appraise; to estimate.—Shall *value* him. *Lev*. xxvii. 8. 4. To be worth; to be equal in worth to.—

The peace between the French and us *values*

The cost that did conclude it. *Shak*.

5. To take account of.—The mind doth *value* every moment. *Bacon*. 6. To reckon at, with respect to number or power.—The queen is *valued* thirty thousand strong. *Shak*. 7. To consider with respect to importance; to hold important.—So slightly *valued* in his messenger. *Shak*.—Neither of them *valued* their promises. *Clarendon*. 8. To equal in value; to countervail.—It cannot be *valued* with the gold of Ophir. *Job*. 9. To rank to estimation. This is a sense not in use.—*Falsing* the folly of the most foolish, by making the success prosperous. *Sidney*.—Some *value* themselves to their country by jealousies of the crown. *Temple*.—Vanity, or a desire of *valuing* ourselves. *Temple*.

* VALUELESS. *adj.* [from *value*.] Being of no value.—Which, touch'd and tried.—*Prove valueless*. *Shak*.

* VALUER. *n. f.* [from *value*.] He that values.—Hammond was no *valuer* of trifles. *Fell*.

VALVERDA, John DE, M. D. a Spanish physician, who attended Card. Tolido to Rome. He wrote a Treatise on Anatomy, Ven. 1589; and a tract *De animi et corporis sanitatē tuenda*, 1553.

(1.) VALVERDE, a town of Portugal, in Estremadura, 27 miles NW. of Alcantara; Lon. 6. 29. W. Lat. 39. 44. N.

(2.) VALVERDE, a town of Spain, in Estremadura, near Portugal; in a valley 8 miles from Elvas, and 8 from Badajoz. Lon. 6. 39. W. Lat. 38. 34. N.

(3.) VALVERDE, a town of Peru, in Lima, in a valley on the river; 15 miles from the sea-coast.

(4.) VALVERDE, a town of Spain, in New Castile; 20 miles S. of Cuenza.

(5.) VALVERDE DE CAMINO, a town of Spain, in Seville, 17 miles NE. of Moguer.

(6.) VALVERDE EN FRESNO, a town of Spain, in Leon; near Portugal; 24 miles NNW. of Coria, and 27 SW. of Rodrigo.

VALUIKI, a town of Russia, in Voronezh; 108 miles SSW. of Voronezh. Lon. 55. 30. E. Ferro. Lat. 50. 2. N.

VALUNTOWN, a town of Connecticut; 12 miles NNE. of Norwich.

* VALVULE. *n. f.* [*valvule*, Fr.] A small valve.

VAMBA, a province of Africa, in Anzico. VAM-KAOSÉ, an island in the Chinese Archipelago, 62 miles SW. of Macao; where St Francis XAVIER is buried.

* VAMP. *n. f.* The upper leather of a shoe. *Ainsworth*.

* To VAMP. *v. a.* [This is supposed, probably enough, by *Skinner* to be derived from *avant*, Fr. *before*; and to mean laying on a new outside.] To piece an old thing with some new part.—To vamp a body with a dangerous physick. *Shak.*—This opinion hath been vamped up by Cardan. *Bentley.*—I had never much hopes of your vamp lay. *Swift.*

* VAMPER. *n. s.* [from *vamp*.] One who pieces out an old thing with something new.

(1.) VAMPYRE, a species of bat. See VESPERTILIO.

(2.) VAMPYRE is also the name of an imaginary being who is believed by the MORLACKS to frequent church-yards, and to suck the blood of infants, &c. See MORLACKIANS.

(1.) VAN. *n. f.* [from *avant*, French.] 1. The front of an army; the first line.—Before each an prick forth the airy knights. *Milton.*—With an, main battle, wings, and rear. *Hudibras.*—an to van the foremost squadrons meet. *Dryden.* [van, Fr. *vannus*, Latin.] Any thing spread wide by which a wind is raised; a fan.—They call a ear a corn fan. *Broom.* 3. A wing with which the air is beaten.—

His sail-broad vans
He spreads for flight. *Milton.*
Who on their plummy vans received him soft. *Milton.*

His disabled wing unstrung:
He wheel'd in air, and stretch'd his vans in vain;
His vans no longer could his flight sustain. *Dryden.*

The vases minister to the progressive motion
the bird. *Derham.*

(2.) VAN, in geography, a populous town of Asiatic Turkey, in Armenia, or Caramania, on the frontiers of Persia, with a castle, and a Turkisharrison, on a mountain, near the lake. (N^o 3.) was taken and pillaged by Tamerlane. It comprehends 9 sangiacates under its jurisdiction. It 42 miles SE. of Beths, and 150 E. of Diarbek. *in.* 44. 50. E. Lat. 58. 30. N.

(3.) VAN, a lake of Asiatic Turkey, in Caramania, near the above town, 120 miles in circumference, abounding with fish.

(4.) VAN, a river of S. Wales, in Glamorganshire, which runs into the Bristol Channel, 5 miles below wbridge.

(5.) VAN, a town of Norway, in Aggerhuys, miles N. of Christiania.

(6.) VAN, a town of China, in Se tchuén.

* To VAN. *v. a.* [from *vannus*, Latin; *vanner*, French.] To fan; to winnow. Not in use.—e corn which in vanning lieth lowest is the best. *con.*

VANAKEN, Joseph, a Flemish painter, born Antwerp. He excelled in painting fatten, velvet, lace, and embroidery. He died in 1749.

VANBRUGH, Sir John, a celebrated Englishmatic writer and architect, descended of a family in Cheshire which came from France. He born about the middle of the reign of Charles and received a liberal education. His first comedy, called the *Relapse*, or *Virtue in Danger*, was in 1697 with great applause; which gave such encouragement, that he wrote 11 more comedies. He was appointed Clarencieux king *Vol. XXII. PART II.*

at arms, which he afterwards disposed of. In 1716 he was appointed surveyor of the works at Greenwich hospital; he was likewise made comptroller-general of his majesty's works, and surveyor of all the gardens and waters. He was an able architect; but his performances in that way are esteemed heavy. Under his direction were raised Blenheim house in Oxfordshire, Claremont in Surry, and his own house at Whitehall. He died of a quinsy in 1726.

VAN CAMPENS, a town of New Jersey; 32 miles NW. of Morristown.

VAN CHEAU, an island in the E. Indian Sea; in Lon. 110. 40. E. Lat. 8. 50. N.

* VANCOURIER. *n. f.* [*avantcourier*, French.] A harbinger; a precursor.

VANCOUVER, Captain George, of the royal navy, wrote an account of a Voyage of Discovery into the North Pacific Ocean, and Round the World, in 1790—1795. He died 10th May, 1798.

VANDALE, Anthony, M. D. a learned physician, born in Holland, in 1638. He wrote, *A Treatise on Oracles*, which was answered by several writers, and abridged by Fontenelle; also a work on the *Origin of Idolatry*; also a Dissertation on *Aristeas*, and the *Septuagint version*. He died at Haerlem, in 1708.

(1.) VANDALIA, a county of Mecklenburg, bounded by Schwerin, Stargard, Stockock, and Brandenburg: 75 miles long, and 7 broad. GUSTROW is the capital.

(2.) VANDALIA, a duchy of Farther Pomerania, subject to the K. of Prussia. STOLPEN is the capital.

VANDALS. *n. f. plur. a* brave and numerous, but barbarous people of Europe, who, along with the GOTHs, HERULs, SUEVI, ALANI, and BURGUNDIANS, emigrated in large bodies from their respective native countries, and spreading fire, sword, and desolation, everywhere, overthrew the Roman empire, in the 5th century. They were several times, however, successfully opposed by Stilicho. See ROME, § 91. From the similarity of their name to that of the two countries above described, they seem to have originally come from Lower Saxony and Pomerania. Others make them a tribe of the SARMATIANS, or SLAVONIANS. See PHILOLOGY, *Sett. XII.*

VANDELEVILLE, a town of France, in the department of the Meurthe, 9 miles NW. of Mirecourt, and 6 SW. of Vezelize.

VANDELLIA, in botany; a genus of plants belonging to the class *didynamia* and order *angiospermia*. The calyx is subquadrid; the corolla ringent; the two exterior filaments proceed from the disc of the lip of the corolla; the antheræ are connected; the capsule is unilocular and polyspermous. There is only one species known, viz.

VANDELLIA DIFFUSA.

VANDEPUT. See PUTEANUS.

(1.) VANDER-LINDEN, Henry, professor of divinity at Franeker, was born in 1546; and suffered much for his attachment to the reformation: in favour of which he wrote. He died in 1614.

(2.) VANDER-LINDEN, John Antonides, grandson of the preceding, was born at Enckhuysen in 1609, and educated at Leyden. He graduated

at Franeker in 1630, and in 1639 was made prof. of phyfic in that univerfity. In 1640 he went to that of Leyden. He wrote many medical works, and died in 1664.

VANDERMEER, John, a famous Dutch painter, who excelled in fea pieces: He was drowned in 1691, aged 64.

VANDERMEULEN, Anthony Francis, a Flemish painter, born at Brussels in 1634. He painted the battles of Lewis XIV. and married a daughter of the famous Le Brun. He died at Paris in 1690.

(1.) **VANDERMONDE**, Charles Augustus, M. D. a native of Macao, in China, born in 1772. He became an eminent phyfician, and was appointed cenfor royal at Paris, where he died in 1762. His chief works are, 1. *Effai fur la maniere de perfectionner l'Espece Humaine*; 2 vols. 12mo. *Dictionnaire de Sante*; 3. *Dissertation Anatomique*.

(2.) **VANDERMONDE**, a late celebrated French mathematician, born at Paris in 1715, famous for his love of fcience, and infamous for joining the Terrorifts. He died in 1795.

(1.) **VANDERVELDE**, Adrian, an eminent painter born at Amfterdam, in 1639. His works are rare and highly valued. He died in 1672.

(2.) **VANDERVELDE**, Ifaiah, an eminent painter, his battles are efteemed. He died at Leyden in 1630.

(3.) **VANDERVELDE**, John, brother to the above, an eminent engraver.

(4.) **VANDERVELDE**, William, brother to Ifaiah and born at Leyden, was alfo eminent in painting fea fights. He came over to London, got a penfion, and died in 1693.

(5.) **VANDERVELDE**, William, fon of the above, excelled his father, and died in London, in 1797.

VANDERVENNE, Adrian, a painter born at Delft, in 1589. He excelled in fcenes of humour.

VAN-DIEMEN'S LAND, the S. extremity of New HOLLAND, difcovered by TASMAN, in 1641-2. In 1773, it was vifited by Capt Fourneau, and fon after by Capt. Cook. Lon. 148° to 150° E. Lat. 40° 30' to 42° 30' S.

VAN DIEMEN'S ROAD, an anchoring place in the S. Pacific Ocean, on the coaft of TONGATABOO.

VANDSIA, a town of Norway, in Chriftianfand, 43 miles W. of Chriftianfand.

VANDY, a town of France, in the dept. of Ardennes, 3 miles N. of Vouziers.

VANDYCK, Sir Anthony, a celebrated painter, born at Antwerp in 1599. After giving feveral early proofs of his excellent genius, he became the difciple of the illuftrious Rubens. From this celebrated mafter he received not only inftruction in his art, but was by his generofity enabled to go to Rome. Having ftaid a fhort time there, he removed to Venice, where he attained the beautiful colouring of Titian, Paul Veronefe, and the Venetian fchool, which appeared from the many excellent pictures he drew at Genoa. After having fpent a few years abroad, he returned to Flanders, with fo noble, fo eafy, and natural a manner of painting, that Titian himfelf was hardly his fuperior; and no other mafter could equal him in portraits. He then went to England when

his fuperior genius foon brought him into great reputation; and above all, he excelled in portraits, which he drew with an inconceivable facility, and for which he charged a very high price. For fome of them he received 400 guineas a-piece. He foon found himfelf loaded with honours and riches. He married a daughter of lord Ruthven, earl of Gowry. His houfe was fo frequented by perfons of the greateft quality, that it rather reſembled the court of a prince than the lodgings of a painter. He died in 1641, and was buried in St. Paul's. It was faid he left 40,000 l.

(2.) **VANDYCK**, Philip, another eminent painter, born at Amfterdam, in 1680. He died in 1752.

(1.) **VANE**, Sir Henry, fon of Sir Henry Vane, Secretary of State to Charles I. was born in 1612, and educated at Magdalen-hall, Oxford. He then went to Geneva, where he became a republican; which led to a quarrel with his father, who was a rigid royalift. He then failed to New England, whence he returned in 1637, and during the civil war, took an active part againft the king. He, however, boldly oppofed Cromwell's ufurpation, for which Oliver imprifoned him. In 1662, he was tried and beheaded for high treafon. He wrote fome books, in the fpirit of the times.

(2.) * **VANE**. *n. f.* [*vane*, Dutch]. A plate hung on a pin to turn with the wind.—A *vane* blown with all winds. *Shak.*

(3.) **VANE**, a thin flip of bunting hung to the maft-head, or fome other conspicuous place in the fhip, to fhew the direction of the wind. It is commonly ſewed upon a wooden frame called the *ſtock*, which contains two holes whereby to flip over the ſpindle, upon which it turns round as the wind changes.

* **VANGUARD**. *n. f.* [*avant garde*, French.] The front, or firft line of the army.—The king's *vant guard*. Bacon.—In *vant guard* of his troops. *Chapman*.—

Vanguard to right and left the front unfold.

Milton.

VANIERE, James, a French Jeſuit, and Latin poet, born in 1664. He wrote an admired poem, entitled *Predium Ruſticum*; Paris, 1726, 12mo. He died at Toulouſe, in 1739.

(1.) * **VANILLA**. *n. f.* [*vanille*, Fr.] A fruit of thoſe plants is uſed to ſcent chocolate. *Miller*.—When mixed with *vanillies*, or ſpices, chocolate acquires the good and bad qualities of aromatic oils. *Arbutnot*.

(2.) **VANILLA**. See EPIDENDRON.

VANINI, Lucilio, a native of Taurifano, in Naples; who ſtudied theology, astrology, medicine, and philoſophy; and was ordained prieſt; yet was mad enough to die a martyr for *atheifm*. After preaching his falſe doctrine in England, Germany, and Holland, he was apprehended at Toulouſe, condemned and burnt alive, in 1619. The work for which he ſuffered was entitled *De Admirandis Naturæ Arcanis*, 8vo.

* **To VANISH**. *v. n.* [*vaneſco*, Latin; *evanouiſ*, Fr.] 1. To loſe perceptible exiſtence.—High honour is not only gotten and born by pain and danger, but muſt be nurſed by the like, or elſe *vanifeth* as ſoon as it appears to the world. *Sadney*.

While

While fancy brings the *vanish'd* piles to view,
And builds imaginary Rome anew. *Pope.*

To pass away from the fight; to disappear.—
Whither are they *vanish'd*? *Shak.*

Now I have taken heart, thou *vanishest*. *Shak.*
And in a moment *vanish'd* from her eye.

Pope.
To pass away; to be lost.—
All these delights will *vanish*. *Milton.*

That spirit of religion *vanish'd* all at once. *Atterbury.*

VANITY. *n. f.* [*vanitas*, Lat. *vanitas*, Fr.] 1. Pertinacity; uncertainty; inanity.—*Vanities* of *vanity*, all is *vanity*. *Ecl. 2.* Fruitless desire; fruitless endeavour.—*Vanities* possesseth many, who are proud to know the certainty of things to come.

2. Trifling labour.—To use long discourses, might rightly be judged a *vanity*. *Raleigh.*

3. Falsehood; untruth.—Here I may shew the *vanity* of that which is reported. *Sir J. Davies.*

Empty pleasure; vain pursuit; idle show; un-
substantial enjoyment; petty object of pride.—
Natures consumed in secular *vanity*. *Hooker.*

4. *Vanities* of mine art. *Davies.*—Make her free-
ly slave to *vanity*. *Davies.*

Sin, with *vanity*, had fill'd the works of men.

Milton.
The eldest equal the youngest in the *vanity* of
their dress. *South.*

Succeeding *vanities* the Bill regards. *Pope.*

5. Ostentation; arrogance.—They, through *van-*
ity, build many forged histories of their own an-
nity. *Spenser.*

6. The *vanities*, of learned philoso-
phers and poets. *Raleigh.*

7. Petty pride; pride
rested on slight grounds; pride operating on
all occasions.—Can you add guilt to *vanity*.

South.—*Vanities* the food of fools. *Swift.*

8. The world indulges women in *vanity*. *Law.*

VAN LAER, Peter, painter, better known by his
ek name of *BAMBOCIO*, which see. He paint-
ed inns, shops, cattle, &c. He died in 1673.

VAN LOO, Charles Andrew, painter, was
born at Nice in 1705, and studied under his bro-
ther John, N° 2. After visiting Italy, he became
member of the Academy of painting. He died in
1746.

VAN LOO, John Baptist, painter, born at
Paris in 1684, and died there in 1746.

VANMANDER, Charles, painter, was born at
Courtray in 1548. His principal pictures are
Adam and Eve, and the deluge. He died in 1606.

VANNA CHOIR, or **VENNOCHAR,** LOCH, one
of the chain of lakes formed by the Teith in
Highland, Scotland.

VANNES, a populous and ancient town of
France in the dep. of Morbihan, on a little arm
of the sea, forming a commodious harbour. It is
15 miles S.W. of Rennes, and 255 W. by S. of
Paris. Lon. 2° 41' W. Lat. 47° 39' N.

VANNI, Francis, painter, chiefly of religious
subjects, was born at Sienna in 1563, and died in
1636.

VANNIA, a town of Italy; north of the Po,
near CIVITA.

VANNIUS, a king of the Suevi, banished un-
der Claudius, &c. *Tac. An. 12, c. 29.*

VANNSTOWN, a town in the country of the

Cherokees, on a branch of Alabama river, N. A-
merica.

* **To VANQUISH.** *v. a.* [*vaincre*, Fr.] 1. To
conquer; to overcome; to subdue.—

The fearful French, whom you late *vanquish-*
ed. *Shak.*

—They subdued and *vanquish'd* the rebels. *Clarendon.*

—The gods the victor, Cato the *vanquish'd*
chose. *Dryd. 2.* To confute.—This assertion has
been *vanquish'd* in a reply. *F. Atterbury.*

* **VANQUISHER.** *n. f.* [from *vanquish*] Con-
queror; subduer.—Your *vanquisher*. *Shak.*

My *vanquisher*;
Spoil'd of his vaunted spoil. *Milton.*

Troy's *vanquisher*, and great Achilles' son.

A. Phil.

VANSIRE. See **MUSTELA**, N° 1.

VANSOMER, Paul, portrait painter, born at
Antwerp, 1576, resided long in England, and died
in 1621.

VANSWIETEN, Gerard, physician, was born
at Leyden in 1700. He studied under Boerhaave,
and went to Vienna where he became physician
and librarian to Maria Theresia. He read lectures
on the Materia Medica and practice of physic,
and performed many eminent cures. He died in
1771. His chief work is a commentary on the
Aphorisms of Boerhaave, 5 vols. 4to.

* **VANTAGE.** *n. f.* [from *advantage*.] 1.
Gain; profit.—What great *vantage* do we get by
the trade of a pastor? *Sidney.*

2. Superiority;
state in which one had better means of action than
another.—With the *vantage* of mine own excuse.

Shak.—He had them at *vantage*, being tired with
a long march. *Bacon.*—The same *vantage* of
ground. *South.*

3. Opportunity; convenience.—
Be assur'd, Madam, 'twill be done
With his next *vantage*. *Shak.*

* **To VANTAGE.** *v. a.* [from *advantage*.] To
profit. *Not in use.*

For needless fear did never *vantage* none.

Spenser.

* **VANTBRAS.** *n. f.* [*avant bras*, Fr.] Ar-
mour for the arm.—

I'll in my *vantbraces* put this wither'd brawn.

Shak.

Put on *vantbraces*, and greaves, and gauntlet.

Milton.

* **VAPID.** *adj.* [*vepidus*, Latin.] Dead; having
the spirit evaporated; spiritless; maukish; flat.

—Left spiritless wine to sharp or *vapid* change.

Phil.—A *vapid* and viscous constitution of blood.

Arbutnot.

* **VAPIDNESS.** *n. f.* [from *vapid*.] The state
of being spiritless or maukish; maukishness.

* **VAPORATION.** *n. f.* [*vaporation*, Fr. *vapo-*
ratio, Lat. *from vapour*.] The act of escaping in
vapours.

* **VAPORER.** *n. f.* [from *vapour*.] A boaster;
a braggart.—This shews these *vaporers*, to what
scorn they expose themselves. *Gov. Tong.*

* **VAPORISH.** *adj.* [from *vapour*.] 1. Vapo-
rous; full of vapours.—The *vaporish* place.

Sand. 2. Splenetic; peevish; humourous.—
Pallas grew *vaporish* once and odd. *Pope.*

* **VAPOROUS.** *adj.* [*vaporosus*, Fr. *from vapour*.]
1. Full of vapours or exhalations; fummy.
—The *vaporous* night approaches. *Shak.*—The

B b b b a warm

swarm and *vaporous* air of the vallies. *Derb.* 2. Windy; flatulent.—Beans or such *vaporous* food. *Bacon.*—A little *vaporous* moisture. *More.*—The food most *vaporous* and perspirable. *Arbuth.*—*Vaporous* streams of the blood. *Cheyne.*

(1.) * VAPOUR. *n. f.* [*vapeur*, Fr. *vapor*, Lat.] 1. Any thing exhalable; any thing that mingles with the air.—Gloomy *vapours*. *Chap.*—

Vapour, and mist, and exhalation hot. *Milt.*
It draws up *vapours* which obscure its rays.

Pope.

2. Fume; steam.—The *vapours* of meat. *Dryd.*—The *vapour* which ascends out of a still. *Newton.*—The *vapour* of vinegar. *Arbuth.* 3. Wind; flatulence.—Ointments, by stopping of the pores, shut in the *vapours*, and send them to the head extremely. *Bacon.* 4. Mental fume; vain imagination; fancy unreal.—His mind is clouded over with a melancholy *vapour*. *Hammond.* 5. [In the plural.] Diseases caused by flatulence, or by diseased nerves: hypochondriacal maladies; melancholy; spleen.—The spleen and the *vapours*. *Addison.*

(2.) VAPOUR, in philosophy, the particles of bodies rarefied by heat, and thus rendered specifically lighter than the atmosphere, in which they rise to a considerable height. See EVAPORATION, DAMP, GAS, &c. Many kinds of vapour are unfriendly to animal life, but the most noxious are those which arise from metallic substances. In the smelting and refining of lead, a white vapour arises, which, falling upon the grass in the neighbourhood, imparts a poisonous quality to it, so that the cattle which feed there will die; and in like manner stagnant waters impregnated with this vapour will kill fish. In some places the earth exhales vapour of a very noxious quality; such as the Grotto del Cani, and other places in Italy, where a mephitic vapour constantly hovers over the surface of the ground, proving instantly fatal to such animals as are immersed in it. In some parts of the world there have been instances of people killed, and almost torn to pieces, by a vapour suddenly bursting out of the earth under their feet. Of the aqueous vapour raised from the earth by the sun's heat are formed the clouds; but though these are commonly at no great distance from the earth we cannot from thence determine the height to which the vapours ascend. See METEOROLOGY, *Stiff.* VI.

(1.) * To VAPOUR. *v. a.* To effuse, or scatter in fumes or vapour.—

Break off this last lamenting kiss,
Which sucks two souls, and *vapours* both away.

Donne.

He'd laugh to see one throw his heart away,
Another sighing *vapour* forth his soul. *B. Jonf.*
—Opium loath some of its poisonous quality, if *vapoured* out, and mingled with spirit of wine. *Bac.*

(2.) * To VAPOUR. *v. n.* [*vaporo*, Latin.] 1. To pass in a vapour or fume; to fly off in evaporations.

When thou from this world wilt go,
The whole world *vapours* on thy breath. *Don.*
2. To emit fumes.—Swift running waters *vapour* not so much as standing waters. *Bacon.*
3. To bully; to brag.

Not true? quoth he: Howe'er you *vapour*,
I can what I affirm make appear. *Hudibras.*

You, what in real value's wanting
Supply with *vapouring* and ranting. *Hudibras.*

—That I might not be *vapoured* down by insignificant testimonies, I used the name of your society to annihilate all such arguments. *Glavins.*

Be you to us but kind;

Let Dutchmen *vapour*, Spaniards curse,
No forrow we shall find. *E. Dryd.*

(1.) VAPOUR-BATH, in chemistry, a term applied to a chemist's bath or heat, wherein a body is placed so as to receive the fumes of boiling water. It consists of two vessels, disposed over one another in such manner as that the vapour raised from the water contained in the lower, heats the matter inclosed in the upper. It is very common for the distilling of odoriferous waters, and the drawing of spirit of wine.

(2.) VAPOUR-BATH, in medicine, is used when a sick person is made to receive the vapours arising from some liquid matter placed over a fire. Vapour baths are very commonly used in Russia and other northern countries, not for any medicinal purpose, but as a luxury. Males and females are described as going promiscuously into the rooms or stoves heated to a very high degree with steam; and after *luxuriating* for some time under the hands of the attendants who *rub them down*, they rush out into the air, or even plunge into cold water.

(1.) VAPOURS, in medicine, a disease properly called *hype*, or the *hypochondriacal disease*; in men particularly, the *spleen*. See MEDICINE, *Index.*

(2.) VAPOURS, NOXIOUS, METHOD OF DISPERSING. A very simple apparatus has been recommended for dispelling the noxious vapours common in wells and other subterraneous places. A pair of smith's bellows, fixed in a wooden frame so as to work in the same manner as at the forge, placed at the edge of a well, and one end of a leathern tube (the hose of a fire engine) closely adapted to the nose and the other end thrown into the well, to reach within one foot of the bottom, will by being worked only half an hour render the air perfectly pure.

VAR, the ancient VARUS, a river of the Free empire, which rises in the ci-devant county of Nice, runs through it, and falls into the Mediterranean.

VARAMBON, a town of France, in the diocese of Ain, on the river Ain, 14 miles NNW. of Boncompagni.
VARANES, a name common to some of the Persian monarchs, in the age of the Roman emperors.

(1.) VARCHI, Benedict, was born at Florence in 1503. He wrote a history of Florence, &c. and died in 1566.

(2.) VARCHI, Benedict, was born at Fiesole in 1503. He was professor of morality at Padua, and wrote a history of his own times and some poems. He died at Florence in 1566.

VARDAE, a people of Dalmatia. *Cic. fam. ep. 9.*

VARENDORF, a town of Westphalia.
VARENIUS, Bernard, a Dutch physician, &c.

thor of a system of Universal Geography, which Sir Isaac Newton translated; also a description of Japan and Siam. He died in 1660.

(1.) VARENNE, a town of France, in the dep. of Allier, 12 miles SSE. of Moulins.

(2.) VARENNE, a small town of France, in the dep. of the Meuse, 13 miles N. of Clermont. Here the flight of the unfortunate Lewis XVI. was stopped in 1791.

VARESA, a town of the state of Genoa, 13 miles NNW. of Brugheto.

VARESE, or VARESSIO, a town of Italy, capital of the dep. of Verbano, seated on the river Verbano; 24 miles NNW. of Milan.

VARGAS, Lewis de, a painter, born at Seville, in 1528, and died in 1590.

VARI, in medicine, little, hard, and ruddy tumors, which frequently infest the faces of young persons of a hot temperament of body. See MEDICINE, Index.

VARIA, a town of Latium.

(1.) * VARIABLE. *adj.* [variable, Fr. *variabilis*, Latium.] Changeable; mutable; inconstant.

Oh, swear not by the inconstant moon
That monthly changes in her circled orb,
Lest that thy love prove likewise variable.

Shak.

Haply countries different

With variable objects shall expel
This something settled matter in his heart.

Milton.

—By the lively image of other creatures did those
ancients represent the variable passions of mortals.

Raleigh.—

This heart I know how variable and vain.

Milton.

(2.) VARIABLE, in geometry and analytics, is a term applied by mathematicians to such quantities as are considered in a variable or changeable state, either increasing or decreasing. Thus the abscissas and ordinates of an ellipsis, or other curve line, are variable quantities; because these vary or change their magnitude together, the one at the same time with the other. But some quantities may be variable by themselves alone, or while those connected with them are constant: as the abscissas of a parallelogram, whose ordinates may be considered as all equal, and therefore constant; also the diameter of a circle, and the parameter of a conic section, are constant, while their abscissas are variable. See FLUXIONS.

* VARIABLENESS. *n. f.* [from variable.] 1. Changeableness; mutability.—You are not solicitous about the variableness of the weather, or the change of seasons. Addison. 2. Levity; inconstancy.—Censurers subject themselves to the charge of variableness in judgement. Clarissa.

* VARIABLY. *adv.* [from variable.] Changeably; mutably; inconstantly; uncertainly.

* VARIANCE. *n. f.* [from vary.] Discord; disagreement; dissension.—I am come to set a man at variance against his father. Matthew.—

A cause of law, by violent course,
Was, from a variance, now a war become.

Daniel.

—Set not any one doctrine of the gospel at variance with others, which are all admirably consistent. Spratt.—

While a kind glance at her pursuer flies,
How much at variance are her feet and eyes.

Pope.

—If the learned would not at times submit to the ignorant; the old to the weaknesses of the young; there would be nothing but everlasting variance in the world. Swift.—

Many bleed

By shameful variance betwixt man and man.

Thomson.

—Who are they that set the first and second articles at variance with each other. Waterland.

(1.) * VARIATION. *n. f.* [variatio, Lat. *variation*, French.] 1. Change; mutation; difference from itself.—After much variation of opinion the prisoner was acquitted of treason. Hayward.—The operation of agents will easily admit of intension and remission; but the essence of things are conceived not capable of any such variation. Locke.—The fame of our writers is limited, in time as much as place, by the perpetual variation of our speech. Swift.—The same numerical quantity, by variations of texture, may constitute successively all kinds of body. Bentley. 2. Difference; change from one to another.—In some other places are more females than males; which, upon this variation of proportion, I recommend to the curious. Graunt.—Each sea had its peculiar shells, and the same variation of fishes. Woodward.

3. Successive change.—

Sir Walter Blunt

Stain'd with the variation of each foil. Shak.

4. [In grammar.]—The useful examples of the variation of words are often appointed to be repeated. Watts.

5. Change in natural phenomena.—Without any visible eclipse or want in himself, amidst divers variations in others. Wotton.

6. Deviation.—He observed the variation from the original. Fell.—A variation from the state of his creation. Hale.—The greater variation may be fairly deduced from him. Dryden.

7. Variation of the compass; deviation of the magnetick needle from an exact parallel with the meridian.

(2.) VARIATION OF THE COMPASS, is the deviation of the magnetic or mariner's needle from the meridian or true north and south line. On the continent it is called the *declination* of the magnetic needle which is a better term. At the period when the polarity of the magnet was first observed in Europe, whether originally, or as imported from China, the magnetic direction, both in Europe and in China, was nearly in the plane of the meridian. It was therefore an inestimable present to the mariner, giving him a sure direction in his course through the pathless ocean. But by the time that the European navigators had engaged in their adventurous voyages to far distant shores, the deviation of the compass needle from the meridian was very sensible even in Europe; and it is somewhat surprising that the Dutch and Portuguese navigators did not observe it on their own coasts. The son of Columbus positively says that it was observed by his father in his first voyage to America. It is certain that Gonzales Oviedo and Sebastian Cabot observed it in their voyages. But the deviation of the compass from the meridian was not then allowed by mathematicians. Pedro de Medina at Valladolid, in his *Arte de Navegar*, published

published in 1545, positively denies the variation of the compass. But so soon after as 1556, Martin Cortez, in a treatise of navigation, treated it as a thing completely established, and gives rules and instruments for discovering its quantity. About the year 1580 Norman published his discovery of the dip of the needle, and speaks largely of the horizontal deviation from the plane of the meridian, and attributes it to the attraction of a point, not in the heavens, but in the earth, and describes methods by which he hoped to find its place. To the third, and all subsequent editions of Norman's book (called the *new attractive*), was subjoined a dissertation by Mr Borroughs, on the variation of the compass, in which are recorded the quantity of this deviation in many places; and he laments the obstacle which it causes to navigation by its total uncertainty previous to observation. Observations were made from time to time, and published in the subsequent treatises on navigation. But in 1635, the mariners were thrown into a new and great perplexity, by the publication of a *Discourse mathematical on the variation of the Magnetical Needle*, by Mr Henry Gillebrand, Gresham professor of astronomy. He had compared the variations observed at London by Burroughs, Gunter, and himself, and found that the north end of the mariner's needle was gradually drawing more to the westward, and it has been found to deviate more and more to the westward ever since, as may be seen from the following little table in Waddington's Navigation.

London.

1576 Norm.	11° 15' E.
1580 Burr.	11 17
1622 Gunt.	6 12
1634 Gilleb.	4 5
1663	0 0
1666 Sellers	0 34 W.
1670	2 06
1672	2 30
1700	9 40
1720	13 —
1740	16 10
1760	19 30
1774	22 20
1778 Phil. Tr.	22 11

The celebrated Halley recommended the matter in the most earnest manner to the attention of government; and, after much solicitation obtained a ship to be sent on a voyage of discovery for this very purpose. In this vessel he repeatedly traversed the Atlantic Ocean, and went as far as the 50th degree of southern latitude. See his speculations on this subject in the Phil. Trans.

1683 and 1692. Having collected a prodigious number of observations made by others, and compared them with his own, he published in 1700 a synoptical account of them in a very ingenious form of a sea chart, where the ocean was crossed by a number of lines passing through those places where the compass had the same deviation. Thus, in every point of one line there was no variation in 1700; in every point of another line the compass had 20 degrees of east variation; and in every point of a third line it had 20° of west variation. These lines have since been called *Halleyan lines*, or *curves*. This chart was surely very valuable; yet the author himself pointed out objections to it. He stated that the change of variation was very different in different places, and in the same place at different times; and confessed that he had not discovered any general principle by which these changes could be connected. But the *Chart* was of immense use; although it became gradually less valuable, and in 1745 was exceedingly erroneous.

This made Messrs Mountain and Dodson, fellows of the Royal Society, apply to the admiralty and to the great trading companies for permission to inspect their records, and to extract from them the observations of the variations made by their officers. They got all the assistance they could demand; and, after having compared above 50,000 observations, they composed new variation charts, fitted for 1745 and 1756.

(3.) VARIATION OF THE COMPASS, CAUSE OF. Cortes ascribed the variation of the needle to the attraction of an eccentric point, and Bond thought this point was placed not in the heavens, but in the earth. This notion made the basis of the famous Theory of Magnetism of Dr Gilbert of Colchester, published about A. D. 1600: He asserted that the earth was a great magnet, and that all the phenomena of the mariner's compass were the effects of this magnetism. He showed at least that these phenomena were precisely such as would result from such a constitution of the earth; that is, that the positions of the mariner's needle in different parts of the earth were precisely the same with those of a small magnet similarly situated with respect to a very large one. Although he had made more magnetic experiments than all that had gone before him put together, still the magnetical phenomena were but little known till long after. But Gilbert's theory (for so it must be truly esteemed) of the magnetical phenomena is now completely confirmed. The whole of it may be understood from the following general proposition. Let *NS* (Pl. CCCXXXIX. fig. 1.) be a magnet, of which *N* is the north and *S* the south pole: Let *ns* be any oblong piece of iron, poised on a point *c* like a compass needle. It will arrange itself in a position *ncs* precisely the same with that which would be assumed by a compass needle of the same size and shape, having *n* for its north and *s* its south pole. And while the piece of iron remains in this position, it will be in all respects a magnet similar to the real compass needle. The pole *n* will attract the south pole of a small magnetical needle, and respect its north pole. If a paper be held over *ns*, and fine iron filings be strewed on it, they will arrange themselves into curves issuing from one of its ends and terminating at the other, in the same manner as they will do when strewed on a paper held over a real compass needle. But this magnetism is quite temporary; for if the piece of iron *ns* be turned the other way, placing *n* where *s* now is, it will remain there, and will exhibit the same phenomena. We may here add, that if *ns* be almost infinitely small in comparison of *NS*, the line *ns* will be in such a position that if *sa*, *sb*, be drawn parallel to *Nc*, *Sc*, we shall have *sa* to *sb* as the force of the pole *N* to the force of the pole *S*. And this is the true cause of that curious disposition of iron filings when strewed round a magnet. Each fragment becomes a momentary magnet, and arranges itself in the true magnetic direction; and when so arranged, attracts the two adjoining fragments, and co-operates with forces, which also arrange them. Now, to apply this theory to the point in hand: Let *ns* (fig. 2.) be a small compass needle, of which *n* is the north and *s* the south pole; let this needle be poised horizontally on the pin *cd*, and let *ns* be the position

sition of the dipping needle. Take any long bar of common iron, and hold it upright, or nearly so, as represented by AB. The lower end B will repel the pole n and will attract the pole s , thus exhibiting the properties of a north pole of the bar AB. Keeping B in its place, turn the bar round B' as a centre, till it come into the position A' B' nearly, parallel to $n' s'$. You will observe the compass needle $n s$ attract the end B' with either pole n or s , when B' A' is in the position B' A' perpendicular to the direction $n' s'$ of the dipping needle; and when the bar has come into the position B' A', the upper end B' will show itself to be a south pole by attracting n and repelling s . From this it appears, that the great magnet in the earth induces a momentary magnetism on soft iron, precisely as a common magnet would do. Therefore (says Dr Gilbert) it induces permanent magnetism on magnetisable ores of iron, such as loadstones, in the same manner as a great loadstone would do; and it affects the magnetism already imparted to a piece of tempered steel precisely as any other great magnet would. Therefore the needle in every part of the world arranges itself in the magnetic direction, so that, if poised as a dipping needle should be, it will be a tangent to one of the curves N & S of fig. 1. The horizontal needle being so poised as to be capable of playing only in a horizontal plane, will only arrange itself in the plane of the triangle N & S. That end of it which has the same magnetism with the south pole S of the great magnet included in the earth will be turned towards its north pole N. Therefore what we call the north pole of a needle or magnet really has the magnetism of the south pole of the great primitive magnet. If the line NS be called the axis, and N and S the poles of this great magnet, the plane of any one of these curves N & S will cut the earth's surface in the circumference of a circle, great or small, according as the plane does or does not pass through the centre of the earth. Dr Halley first imagined, that the north pole of the great magnet or loadstone which was included in the bowels of the earth was not far from Baffin's Bay, and its south pole in the Indian Ocean south-west from New Zealand. But he could not find any positions of these two poles which would give the needle that particular position which it was observed to assume in different parts of the world; and he concluded that the great terrestrial loadstone had four irregular poles (a thing not unseeing in natural loadstones, and easily producible at pleasure), two of which are stronger, and two weaker. When the compass is at a great distance from the two north poles, it is affected so as to be directed nearly in a plane passing through the strongest. But if we approach it much more to the weakest, the greater vicinity will compensate for the smaller absolute force of the weak pole, and occasion considerable irregularities. The appearances are favourable to this opinion. If this be the real constitution of the great magnet, it is almost a desperate task to ascertain by computation what will be the position of the needle. Dr Halley endeavours to account for the change of variation, by supposing this internal magnet not to adhere to the external shell which we inhabit, but to form a

nucleus or kernel detached from it on all sides and to be so poised as to revolve freely round an axis, of which we hoped to discover the position by observation of the compass. The philosopher will find nothing in this ingenious hypothesis inconsistent with our knowledge of nature. Dr Halley imagined that the nucleus revolved from east to west round the same axis with the earth. Thus the poles of the magnet would change their positions relatively to the earth's surface, and this would change the direction of the compass needle. The great Euler undertook to ascertain the position of the needle in every part of the earth. But he found the four poles would engage him in an analysis which would be excessively intricate, and has contented himself with computing for two only; observing that this supposition agrees so well with observation, that it is highly probable that this is the real constitution of the terrestrial magnet, and that the coincidence would have been perfect if he had hit on the due positions of the two poles. He places one of them in lat. 76° north, and long. 96° west from Tenerife. The south pole is placed in lat. 58° south, and long. 158° west from Tenerife. These are their situations for 1757.—Mr Euler has annexed to his dissertation on the 13th vol. Mem. R. A. Berlin, a chart of Halleyan curves suited to these assumptions, and fitted to the year 1757. Since then, another large variation chart has been published, fitted to a late period; but it is unaccompanied by authorities.

(4.) VARIATION OF THE COMPASS, DAILY.

This was first observed by Mr George Graham, in 1722, (*Philosophical Transactions*, N^o 383), and reported to the Royal Society of London. It usually moves (at least in Europe) to the westward from 8 morning till 2 P. M. and then gradually returns to its former situation. The diurnal variations are seldom less than 6° , and often much greater. Mr Graham mentions (*Philosophical Transactions*, N^o 428.) some observations by a Captain Hume, in a voyage to America, where he found the variation greatest in the afternoon. This being a general phenomenon, has also attracted the attention of philosophers. The most detailed accounts of it to be met with are those of Mr Canton, in *Philosophical Transactions*, Vol. LI. Part 2. p. 399, and those of Van Swinden, in his *Treatise on Electricity and Magnetism*. From the observations of Mr Canton, it appears, that although there be great irregularities in this diurnal change of position of the mariner's needle, there is a certain average, which is kept up with considerable steadiness. The following was the average of greatest daily change of position in the different months of the year, observed in his house Spital Square, in 1759.

January 7'	8'	May 13'	—'	Sep. 11'	43"
February 8	58	June 13	21	Oct. 10	36
March 11	27	July 13	14	Nov. 8	9
April 12	26	August 12	19	Dec. 6	58

Mr Canton attempts to account for these changes of position, by observing that the force of a magnet is weakened by heat. A small magnet being placed near a compass needle, ENE. from it, so as to make it deflect 45° from the natural position, the

the magnet was covered with a brass vessel, into which hot water was poured. The needle gradually receded from the magnet $\frac{1}{2}$ this of a degree, and returned gradually to its place as the water cooled. This is confirmed by uniform experience. The parts of the earth to the eastward are first heated in the morning, and therefore the force of the earth is weakened, and the needle is made to move to the westward. But as the sun warms the western side of the earth in the afternoon, the motion of the needle must take the contrary direction. But this way of explaining by a change in the force of the earth supposes that the changing cause is acting in opposition to some other force. We do not know of any such. The force, whatever it is, seems simply to produce its own effect, in deranging the needle from the direction of terrestrial magnetism. If *Æpinus's* theory of magnetic action be admitted, viz. that a bar of steel has magnetism induced on it by propelling the quiescent and mutually repelling particles of magnetic fluid to one end, or attracting them to the other, we may suppose that the sun acts on the earth as a magnet acts on a piece of soft iron, and in the morning propels the fluid in the north-west parts. The needle directs itself to this constipated fluid, and therefore it points to the eastward of the magnetic north in the afternoon. And (to abide by the same theory) this induced magnetism will be somewhat greater when the earth is warmer; and therefore the diurnal variation will be greatest in summer. This change of position of the constipated fluid must be supposed to bear a very small ratio to the whole fluid, which is naturally supposed to be constipated in one pole of the great magnet, in order to give it magnetism. Thus we shall have the diurnal variation a very small quantity. This is departing, however, from the principle of Mr Canton's explanation; and indeed we cannot see how the weakening the general force of the terrestrial magnet should make any change in the needle in respect to its direction; nor does it appear probable that the change of temperature produced by the sun will penetrate deep enough to produce any sensible effect on the magnetism. And if this be the cause, we think that the derangements of the needle should vary as the thermometer varies, which is not true. The other method of explaining is much better, if *Æpinus's* theory of magnetic attraction and repulsion be just; and we may suppose that it is only the secondary magnetism (*i. e.* that of the magnetisable minerals) that is sensibly affected by the heat; this will account very well for the greater mobility of the fluid in summer than in winter. A great objection to either of these explanations is the prodigious diversity of the diurnal variations in different places. This is so very great, that we can hardly ascribe the diurnal variations to any change in the magnetism of the primitive terrestrial magnet, and must rather look for its cause in local circumstances. This conclusion becomes more probable, when we learn that the deviation from the meridian and the deviation from the horizontal line are not affected at the same time. Van Swinden ascribes them solely to changes pro-

duced on the needles themselves. If their magnetism be greatly deranged by the sun's position, it may throw the magnetic centre away from the centre of the needle's motion, and thus may produce a very small change of position. But if this be the cause, we should expect differences in different needles. Van Swinden says, that there are such, and that they are very great; but as he has not specified them, we cannot draw any conclusion.

(5.) VARIATION OF THE COMPASS, OCCASIONED BY AURORÆ BOREALES. The aurora borealis is observed (in Europe) to disturb the needle exceedingly, sometimes drawing it several degrees from its position. It is always observed to increase its deviation from the meridian, that is, an aurora borealis makes the needle point more westerly. This disturbance sometimes amounts to six or seven degrees, and is generally observed to be greatest when the aurora borealis is most remarkable. This is a very curious phenomenon, and we have not been able to find any connection between this meteor and the position of a magnetic needle. It is to be observed, that a needle of copper or wood, or any substance besides iron, is not affected. We long thought it an electric phenomenon, and that the needle was affected as any other body balanced in the same manner would be; but a copper needle would then be affected. Indeed it may still be doubted whether the aurora borealis be an electric phenomenon. They are very frequent and remarkable in Sweden; and yet Bergman says, that he never observed any electric symptoms about them, though in the mean time the magnetic needle was greatly affected. We see the needle frequently disturbed both from its general annual position, and from the change made on it by the diurnal variation. This is probably the effect of auroræ boreales which are invisible, either on account of thick weather or day light. Van Swinden says, he seldom or never failed to observe auroræ boreales immediately after any anomalous motion of the needle; and concluded that there had been one at the time, though he could not see it. Since no needle but a magnetic one is affected by the aurora borealis, we may conclude that there is some natural connection between this meteor and magnetism. This should farther incite us to observe the circumstance formerly mentioned, viz. that the south end of the dipping needle points to that part of the heavens where the rays of the aurora appear to converge. We wish that this were diligently observed in places which have very different variation and dip of the mariner's needle. For the diurnal, and this irregular variation, consult the *Dissertations of Celsius* and of *Hiorter*, in the *Memoirs of Stockholm*; *Wargentin, Philosophical Transactions*, Vol. 48. *Braun (Comment Petropol. Novi, T. V. VII. IX.)*; *Graham* and *Canton* as above.

(6.) VARIATION OF CURVATURE, in geometry, is used for that inequality or change which takes place in the curvature of all curves except the circle, by which their curvature is more or less in different parts of them; and this variation constitutes the quality of the curvature of any line.

VARICOCELE. See SURGERY, *Index*.

(1.) * VARICOUS.

(1.) * **VARICOUS**, *adj.* [*varicosus*, Lat.] Dif-
fused with dilatation.—There are instances of one
einz only being *various*. *Sharp*.

(2.) **VARICOUS**, or **VARICOSE**. See **SURGERY**,
index.

* **TO VARIEGATE**. *v. a.* [*variegatus*, school
Latin.] To diversify; to stain with different co-
lours.—A white spar, which *variegates*. *Woodw.*
—*Variegated* marble. *Arbuth.*

Ladies, like *variegated* tulips, shew,
’Tis to the changes half the charms we owe.

* **VARIATION**. *n. f.* [from *variegare*.] Di-
versity of colours.—The tulips will soon lose their
variations. *Evelyn*.

(1.) * **VARIETY**. *n. f.* [*variété*, Fr. *varietas*,
Latin.] 1. Change; succession of one thing to
another; intermixture of one thing with another.

All forts are here that all th’ earth yields
Variety without end.

—*Variety* is nothing else but a continued novelty.

South.—*Variety* of colours. *Newton*. 2. One thing
of many by which *variety* is made. In this sense
it has a plural.—*Varieties* which the earth bringeth
forth. *Religib.* 3. Difference; dissimilitude.—*Vari-*
ety in tempers. *Atter*. 4. Variation; deviation;
change from a former state.—*Suppositions* of a
state, in things, from what they now appear.

Hale. 5. Many and different kinds.—*Variety* of
good. *Law*.

(2.) **VARIETY**, or **VARIETAS**, in botany, is a
change in some less essential part or quality; as
colour, size, pubescence, or age.—Externally; by
the plaiting or interweaving of the branches—by
bundling or uniting of several stalks into one broad
flat one; by the greater breadth, or narrowness,
or curling of leaves—by becoming awnless, or
smooth, or hirsute. Internally; by becoming mu-
tulated in the corolla; or having one larger than
ordinary—by luxuriance, multiplication, or ful-
ness—by becoming profligate, or crested—by
bearing bulbs instead of seeds—or being vivipa-
rous. The usual causes of variation are, climate,
oil, exposure, heat, cold, winds, and culture; and
often *disease*; hence **MORBUS**, in botany, is syno-
nymous with *Varietas*.

VARIGNON, Peter DE, mathematician, born
at Caen, in 1654. He was geometrician at the
Academy of Sciences at Paris, and professor of
mathematics in the College of Mazarin. He wrote
a treatise on mechanics, &c. and died 1722.

VARILLAS, Antony, historian, born at Gueret
in 1624. He wrote a history of France, anecdotes
of Florence, &c. and died in 1696.

VARINI, a people of Germany. *Tacit. de Ger.*

(1.) **VARIOLÆ**, the small-pox. See **MEDICINE**,
index.

(2.) **VARIOLÆ VACCINÆ**, or **COW-POX**, the
same commonly given to a very singular disease,
which has occupied a great share of the attention
of medical men. It has been many years preva-
lent in some of the great dairy counties in Eng-
land, particularly Gloucestershire; and it has been
long understood by the farmers and others in
these counties, that it for ever exempts all per-
sons who have been infected with it, from the
contagion of small-pox. Dr JENNER was the first

person who made this fact practically certain, by
introducing the vaccine inoculation. The fol-
lowing is an abstract of his account of the disem-
per: There is a disease to which the horse is
frequently subject. The farriers have termed it
the grease. It is an inflammation and swelling in
the heel, discharging matter. In the dairy county
of Gloucestershire, a great number of cows are
kept, and the office of milking is performed indis-
criminately by men and maid servants. One of
the former having been appointed to apply dress-
ings to the heels of a horse affected with *the*
grease, incautiously bears his part in milking the
cows with some particles of the infectious matter
adhering to his fingers. When this is the case,
it commonly happens that a disease is communi-
cated to the cows, and from the cows to the dai-
ry maids, which spreads through the farm, until
most of the cattle and domesticks feel its unplea-
sant consequences. This disease has obtained the
name of the cow-pox. It appears on the nipples
of the cows in the form of irregular pustules. At
their first appearance they are commonly of a pa-
lisch blue, or rather of a colour somewhat ap-
proaching to livid, and are surrounded by an ery-
sipelatos inflammation. These pustules, unless
a timely remedy be applied, frequently degenerate
into phagedenic ulcers, which prove extremely
troublesome. The animals become indisposed,
and the secretion of milk is much lessened. That
this disease originates with the horse, has been
disputed; but, as the fact is by no means ascer-
tained, the arguments on both sides are of minor
importance. The great question to be determin-
ed, is, whether this disease, when communicated
to the human subject, prevents the possibility
of future infection from small-pox; and happily
the weight of evidence arising from the experience
of several years universal practice, leaves little rea-
son to doubt that it does, although some medical
men of eminence persist in a contrary opinion.
The following remarks will be of use to the prac-
titioner. It is of the utmost consequence that the
matter employed should be the genuine vaccine
virus. Dr Jenner points out the following parti-
culars as sources of a spurious cow-pox: 1. That
arising from pustules on the nipples or udder of
the cow, which pustules contain no specific virus.
2. From matter, although originally possessing the
specific virus, which has suffered a decomposition,
either from putrefaction, or any other cause less
obvious to the senses. 3. From matter taken from
an ulcer in an advanced stage, though the ulcer
arose from a true cow-pox. 4. From matter pro-
duced on the human skin from the contact of
some peculiar morbid matter degenerated by a
horse. Many have remarked, that inoculation
with the vaccine matter is more apt to fail in
communicating the infection than with variolous
matter, especially if it be suffered to dry upon the
lancet before it is used. Care should therefore be
taken to moisten it a considerable time before it is
used. Danger may arise from mistaking the local
effects of the vaccine disease for its effects upon
the constitution. To guard practitioners against
this error, Dr Woodville makes the following re-
marks: “When a considerable tumour and an ex-
tensive redness takes place at the inoculated part,

C c c c

within

within two or three days after the infectious matter has been applied, the failure of inoculation may be considered as certain, as where neither redness nor tumour is the consequence. This rapid and premature advancement of the inflammation will always be sufficient to prevent the inoculator from mistaking such cases for those of efficient inoculation. But there are other circumstances under which I have found the inoculation to be equally ineffectual, and which, as being more likely to deceive the inoculator, require his utmost circumspection and discrimination. I here allude to cases in which it happens, that though the local affection does not exhibit much more inflammation than is usual, yet neither vesicle nor pustule supervenes; and in which, about the sixth or seventh day, it rapidly advances into an irregular suppuration, producing a festering or crustaceous sore. Care, however, should be taken to distinguish this case from that in which the inoculated part assumes a pustular form, though it continues for one or two days only, when the same appearances follow as those above described; for I have experienced the latter inoculation to be as effectual as where the tumour has proceeded in the most regular manner. The efflorescence at the inoculated part, which seldom intervenes before the eighth, or later than the eleventh day, is to be regarded as an indication that the whole system is affected; and if the patient has not felt any indisposition on or before its approach, he may be assured that there will not be any afterwards. When efflorescence does not commence till the 12th day, it is almost always attended with more indisposition than when it occurs on the eighth or ninth day. The efflorescence is more frequent in young infants than in children advanced to three or four years of age; and the former have the efflorescence and the disease more favourably than the latter, inasmuch that by far the greater part of them have no perceptible illness, and require no medicines. On the other hand, in adults, the cow-pox frequently produces headache, pain of the limbs, and other febrile symptoms, for 2 or 3 days, which are greatly relieved by a brisk purgative."

* **VARIOUS**, *adj.* [*various*, Latin.] 1. Different; several; manifold.—

Then were they known to men by *various* names,

And *various* idols through the heathen world. *Milton.*

2. Changeable; uncertain; unfixed; unlike itself.

Names are very *various* and doubtful. *Locke.*

3. Unlike each other.—

He in derision sets

Upon their tongues a *various* spirit. *Milton.*

So many and so *various* laws are giv'n. *Milt.*

Vast crowds of vanquish'd nations march along,

Various in arms, in habit, and in tongue. *Dryd.*

Various of temper, as of face or frame,

Each individual; his great end the same. *Pope.*

4. Variegated; diversified.—*Various* colours. *Milt.*

VARIVS, a Latin poet, intimate with Virgil and Horace, and appointed by Augustus to revise the *Eneid*. Some of his fragments are in Maittaire's *Corpus Poetarum*.

* **VARIOUSLY**, *adv.* [from *various*.] In a various manner.—*Variously* tossed by fortune. *Bacon.*

Various objects from the sense

Variously representing. *Milton.*

Those various squadrons *variously* design'd. *Dryden.*

—Different aliments, act *variously*. *Arbutnot.*

(1.) * **VARIX**, *n. f.* [Lat. *varice*, Fr.] In ulcers of the legs, accompanied with *varices* or dilatations of the veins, the *varix* can only be assisted by the bandage. *Sharpe.*

(2.) **VARIX**, in medicine, the dilatation of a vein, arising from too great abundance or thickness of the blood. See *SURGERY*, *Index*.

* **VARLET**, *n. f.* [*varlet*, old French, now *valet*.] 1. Anciently a servant or footman.—

Such lords ill example do give,

Where *varlets* and drabs so many live. *Tupper.*

A *varlet* running towards them hastily. *Spens.*

2. A scoundrel; a rascal. This word has deviated from its original meaning, as *far* in Latin.—

I am the veriest *varlet* that ever chew'd. *Shak.*

Where did'st thou leave these *varlets*. *Shak.*

Thou *varlet*, dost thy master's grains devour. *Dryden.*

—An impudent *varlet*, who was a private centinel resolved to try his eloquence. *Addison.*

* **VARLETRY**, *n. f.* [from *varlet*.] Rabble; crowd; populace.

Shall they hoist me up,

And shew me to the shouting *varlettry* *Shak.*

Of cens'ring Rome.

VARNA, a town of Bulgaria, capital of the territory of Drobugia with an Abp.'s see, and a harbour near the mouth of the river Varna on the Black Sea, 145 miles NW. of Constantinople.

(1.) * **VARNISH**, *n. f.* [*vernis*, French; *varnish*, Latin.] 1. A matter laid upon wood, metals, or other bodies, to make them shine.—

We'll put on those shall praise your excellence,

And set a double *varnish* on the same. *Shak.*

—*Varnish* makes cielvings not only shine, but last. *Bacon.*

This the blue *varnish*, that the green endears,
The sacred rust of twice ten hundred years. *Pope.*

2. Cover; palliation.

(2.) **VARNISH**, a clear limpid fluid, capable of hardening without losing its transparency, used by painters, gilders, &c. to give a lustre to their works, to preserve them and defend them from the air. A coat of varnish ought to possess the following properties: 1. It must exclude the action of the air; because wood and metals are varnished to defend them from decay and rust. 2. It must resist water; for otherwise the effect of the varnish could not be permanent. 3. It ought not to alter such colours as are intended to be preserved by this means. Resins are used as the basis of varnish. Resins may be dissolved by three agents. 1. By fixed oil. 2. By volatile oil. 3. By alcohol. And accordingly we have three kinds of varnish: the fat or oil varnish, essential varnish, and spirit varnish. Before a resin is dissolved in a fixed oil, it is necessary to render the oil drying. For this purpose the oil is boiled with metallic oxides; in which operation the mu-

cilage

ilage of the oil combines with the metal, while the oil itself unites with the oxygen of the oxide. To accelerate the drying of this varnish, it is necessary to add oil of turpentine. The essential varnishes consist of a solution of resin in oil of turpentine. The varnish being applied, the essential dries off, and leaves the resin. This is used only for paintings. When resins are dissolved in alcohol, the varnish dries very speedily, and is subject to crack; but this fault is corrected, by adding a small quantity of turpentine to the mixture, which renders it brighter, and less brittle when dry. The following are the ingredients in the different varnishes. For Toilet-boxes, Cases, Fans, &c.—Dissolve 2 oz. of gum mastic, and 8 oz. of gum sandarach, in a quart of alcohol; then add 6 oz. of Venice turpentine. For Wainscots, Canes, Chairs, Iron-chairs, Grates.—Dissolve, in a quart of alcohol, 8 oz. of gum sandarach, 2 oz. of seed lac, 4 oz. of rosin; then add 6 oz. of Venice turpentine. For Fiddles, &c. Put 4 oz. of gum sandarach, 2 oz. of lac, 2 oz. of gum mastic, 1 oz. of gum elemi, into a quart of alcohol, and hang them over a slow fire till they are dissolved; then add 2 oz. of turpentine. To employ Vermilion for painting Equipages.—Dissolve, in a quart of alcohol, 6 oz. of sandarach, 3 oz. of gum lac, and 4 oz. of rosin; afterwards add 6 oz. of turpentine. Golden-coloured Varnish. Pound separately 4 oz. of stick lac, 4 oz. of gamboge, 4 oz. of dragons blood, 4 oz. of annotta, and 1 oz. of saffron: put each of them separately into a quart of alcohol, and expose them for 5 days in a narrow-mouthed bottle to the sun, or in a very warm room, shaking them frequently. When all are melted, mix them together. In order to make silver imitate gold exactly when covered with this varnish, the quantity of ingredients must be somewhat greater. The method of gilding silver-leaf, &c. with this varnish, is as follows: The silver-leaf being fixed on the subject, in the same manner as gold-leaf, by the interposition of proper glutinous matters, the varnish is spread upon the piece with a brush or pencil. The first coat being dry, the piece is again and again washed over with the varnish till the colour appears sufficiently deep. What is called gilt leather, and many picture frames, have no other than this counterfeit gilding. For plain frames, thick tin-foil may be used instead of silver. The tin-leaf, fixed on the piece with glue, is to be burnished, then polished with emery and a fine linen cloth, and afterwards with putty applied in the same manner: being then lacquered over with varnish five or six times, it looks very nearly like burnished gold. The same varnish, made with a less proportion of the colouring materials, is applied also on works of brass. Oil varnishes.—Gum copal and amber are the substances principally employed in oil varnishes; as they possess solidity and transparency.—The copal is used for varnishing light, the amber for dark colours. It is best to dissolve them before mixing them with the oil. They should be melted in a pot on the fire; and are in a proper state for receiving the oil when they give no resistance to the iron spatula, and when they run off from it drop by drop. When the oil is well mixed with the copal or amber, take it off the fire; and when it is pretty

cool, pour in a greater quantity of the essence of turpentine than the oil that was used. After the varnish is made, it should be passed through a linen cloth. Oil varnishes become thick by keeping; but when they are to be used, it is only necessary to pour in a little essence of turpentine, and to put them for a little on the fire. The following are the most useful oil varnishes: White copal Varnishes.—On 16 oz. of melted copal pour 4, 6, or 8 oz. of linseed oil, boiled and quite free from grease. When they are well mixed, take them off the fire, and when pretty cool pour in 16 oz. of the essence of Venice turpentine. Amber varnish is made in the same way. For Coaches and Iron Work.—This varnish is composed of 2 oz. of bitumen of Palestine, 2 oz. of rosin, with amber, melted separately, and afterwards mixed; 6 oz. of oil is then added, and afterwards the turpentine, as directed above.—Golden-coloured varnish may be made also by substituting linseed oil for alcohol. Essential Oil Varnishes.—They are for pictures. They are usually made of gum mastic and turpentine dissolved together in some essential oil, and are applied cold to the picture. Varnish for Glass.—Pulverise a quantity of gum adragant, and let it dissolve for 24 hours in the white of eggs well beat up; then rub it gently on the glass with a brush.

(3.) VARNISH, DIRECTIONS FOR USING. Varnishes before they are used should be carefully kept from dust. When used, they should be sifted lightly with a brush, and spread upon a ground altogether free from dirt and moisture. The substance after being varnished, should be exposed to the heat of the sun, or placed in a warm room covered with a glass case. Oil varnishes require more heat than alcohol varnishes. The varnish should be put on very quickly, making great strokes with the pencil or brush, taking care that these strokes never cross one another; it should be spread equally, and never thicker than a leaf of paper: a second coat should not be put on till the first is quite dry. If the varnish, after being put on, becomes dull and uneven, it must be taken off entirely, and new varnish put on. When waincot is to be varnished, it is first painted of a wooden colour. This colour is made by infusing in water either red or yellow ochre (according to the colour wished for), terra ombria (a kind of ochre) and white lead; into this as much as necessary is put of parchment paste. Two thin coats of this are to be put on, and, after they are quit dry, the varnish. Varnishes are polished with pumice-stone and tripoli earth. The pumice-stone must be reduced to an impalpable powder, and put upon a piece of serge moistened with water; with this the varnished substance is to be rubbed lightly and equally. The tripoli must also be reduced to a very fine powder, and put upon a clean woolen cloth moistened with olive oil, with which the polishing is to be performed. The varnish is then to be wiped with soft linen, and, when quite dry, cleaned with starch or Spanish white, and rubbed with the palm of the hand or with a linen cloth. To recover colours or varnish, and to take off the dirt and filth which may adhere to them, a ley is used made of potash and the ashes of lees of wine. Take 48 oz. potash and 16 of the above-mentioned

ed ashes, and put them into 6 quarts of water, and the ley is made: instead of the ashes, an equal quantity of potash would probably do as well. To clean dirty colours, dilute some of this ley with 4 times its quantity of water, and rub the picture with it; then wash it with river water; and when dry, give it a coat or two of varnish. In order to take off a varnish, wash it with the above-mentioned ley, then with water, and then lift it off the substance on which it was with any iron instrument.

(4.) **VARNISH, CHINESE.** The Chinese varnish is not a composition, but a resin which exudes from a tree called in China *sh-chu*, "varnish tree." This tree grows in several provinces of the southern parts of China. They do not procure varnish from the *sh-chu* until its trunk is nearly 5 inches in diameter, which size it seldom attains to before 7 or 8 years. This liquor distills only in the night-time, and during the summer season. To cause the gum to flow, they make several rows of incisions round the trunk, the number of which is proportioned to the vigour of the tree. Shells are inserted into the incisions for the purpose of receiving the liquor distilled from them. They are made towards evening, and next morning they collect the varnish which has fallen into the shells; the following evening they are again inserted, and this operation is continued until the end of the summer. A thousand trees yield almost in one night 20 pounds of varnish. While the varnish distills, it exhales a malignant vapour, the bad effects of which can only be prevented by preservatives and great precaution. The merchant who employs the workmen is obliged to keep by him a large vase filled with rape-oil, in which a certain quantity of those fleshy filaments have been boiled that are found in hog's lard, and which do not melt. When the workmen are going to fix the shells to the trees, they carry some of this oil along with them, and rub their face and hands with it, which they do with greater care when they collect in the morning the varnish that has distilled during night. After eating, they wash their whole bodies with warm water, in which the bark of the chestnut-tree, fir wood, crystallized saltpetre, and some other drugs, have been boiled. When they are at work near the trees, they put upon their heads, a small cloth bag in which there are two holes, and cover the fore-part of their bodies with a kind of apron made of doe-skin, which is suspended from their necks with strings, and tied round them with a girdle. They also wear boots, and have coverings on their arms, made of the same kind of skin. The labourer who should attempt to collect varnish without using this precaution, would soon be punished for his rashness, and the most dreadful effects would ensue. The disorder shows itself by tetters, which become of a bright red colour, and spread in a very short time; the body afterwards swells, and the skin bursts and appears covered with an universal leprosy.—Besides the lustre and beauty which that varnish gives to many of the Chinese manufactures, it has also the property of preserving the wood upon which it is laid, especially if no other matter be mixed with it. It prevents it from being hurt either by dampness or worms. There are two methods of laying on the varnish;

the simplest is, when it is immediately laid on the wood. The work is first polished, and then daubed over with a kind of oil which the Chinese call *tong yau*. When this oil is dry, it receives two or three coats of varnish; which remain so transparent, that all the shades and veins of the wood may be seen through them. If the artist is desirous of entirely concealing the substance on which they are laid, nothing is necessary but to add a few more coats; these give the work a shining surface, the smoothness of which equals that of the most beautiful ice. When the work is dry, various figures are painted upon it in gold and silver, such as flowers, birds, trees, temples, dragons, &c. A new coat of varnish is then sometimes laid over these figures, which preserves them, and adds much to their splendour. The second method requires more preparation. The Chinese workmen fix to the wood by means of glue a kind of pasteboard, composed of paper, hemp, lime, and other ingredients, well beaten, that the varnish may incorporate with them. Of this they make a ground perfectly smooth and solid, over which the varnish is laid in thin coats, that are left to dry one after the other. It often happens, that the lustre of varnished tables and other pieces of furniture is insensibly destroyed by tea and warm liquors. "The secret of restoring to varnish its shining black colours (says a Chinese author) is to expose it for one night to a white hoar-frost, or to cover it some time with snow." For a method of imitating *Chinese varnish*, see TURNING.

(5.) **VARNISH, in numismatography**, signifies the colours antique medals have acquired in the earth. The beauty which nature alone is able to give to medals, and art has never yet attained to counterfeit, enhances the value of them. Some are blue, like the turquoise; others a bright vermilion colour; and others a shining brown, vastly finer than Brasil figures. But the most usual varnish is a beautiful green, which hangs to the finest strokes without effacing them, more accurately than the finest enamel does on metals. No metal but brass is susceptible of this; for the green rust that gathers on silver always spoils it, and it must be got off with vinegar or lemon juice. Falsifiers of medals have a false or modern varnish, which they use on their counterfeits, to give them the appearance or air of being antique. But this may be discovered by its softness.

(6.) **VARNISH, in pottery**, signifies a sort of shining coat, wherewith potter's ware, delft-ware, china-ware, &c. are covered, which gives them a smoothness and lustre. Melted lead is generally used for the first, and smalt for the second. See GLAZING.

* **To VARNISH, v. a.** [*verniffer, vernir*, French from the noun.] 1. To cover with something shining.

O vanity,

To set a pearl in steel is meanly *varnished*.

Sidney.

Thrust not your head into the public street,
To gaze on Christian fools with *varnished* faces.

Shak.

2. To cover; to conceal or decorate with something ornamental.

Speciou

Specious deeds on earth, which glory excites
Or close ambition *varnish'd* o'er with zeal.

Milton.

—They *varnish* o'er their non performance of good
actions by a pretence unto humility. *Fell.*

His manly heart was still above

Dissembled hate, or *varnish'd* love *Dryd.*

—Men *varnish* over and cover their deformity.
Locke. 3. To palliate; to hide with colour of
rhetorick.

They *varnish* all their errors. *Denb.*

Cato's voice was ne'er employed

To clear the guilty, and to *varnish* crimes.

Addison.

—Speak the plain truth, and *varnish* not your
crimes. *Philips.*

* **VARNISHER.** *n. f.* [from *varnish*.] 1. One
whose trade is to varnish.—An oil obtained of com-
mon oil may probably be of use to surgeons and
varnishers. *Boyle.* 2. A disguiser; an adorning.

Thou *varnisher* of fools and cheat of all the
wife. *Pope.*

(1.) **VARRO**, Marcus Terentius, a Roman
writer, was born B. C. 110. He served under
Pompey against the pirates, and obtained a naval
crown. He wrote a treatise on the Latin lan-
guage, and another *De Re Rustica*, which are ex-
tant, with some fragments of Menippean satires.
They were printed at Venice 1474, fol. and Rome
1537, 8vo. He died B. C. 29.

(2.) **VARRO**, Attacinus, the *Gaul*, a Latin poet
of the age of Cæsar, was born in Narbonne. He
wrote a poem *de Bello Sequanico*, and translated
into Latin, the *Argonautics* of Apollonius. Only
some fragments remain.

VARRONIA, in botany; a genus of plants be-
longing to the class of *pentandria*, and to the or-
der of *monogynia*; and arranged in the natural
system under the 41st order, *Aperisfolie*. The co-
rolla is quinquefid; the fruit a drupa, with a qua-
drilocular kernel. There are six species; none of
which are natives of Britain.

* **VARVELS.** *n. f.* [*vervelles*, Fr.] Silver rings
about the leg of a hawk, on which the owner's
name is engraved. *Diſt.*

VARUS, Quintilius, a Roman proconsul, com-
mander of the armies in Germany. He killed him-
self, A. D. 10, on his army being cut to pieces by
the enemy, under Arminius.

* **VARY.** *n. f.* [from the verb.] Change; alte-
ration. Not in use.—With every gale and *vary*
of their masters. *Shak.*

(1.) * **To VARY.** *v. a.* [*varior*, Latin; *varier*,
French.] 1. To change; to make unlike itself.—

Let your ceaseless change

Vary to our great Creator still new praise.

Milton.

2. To change to something else.—

Gods that never change their state

Vary oft their love and hate.

Waller.

—A *vary'd* posture. *Denh.*—We are to *vary* the
customs according to the time and country where
the scene of action lies. *Dryd.*

He *varies* ev'ry shape with ease

And tries all forms that may Pomona please.

Pope.

3. To make of different kinds.—God hath *varied*

their inclinations. *Brown.* 4. To diversify; to
variegate.—

God hath here

Vary'd his bounty so with new delights. *Milt.*

(2.) * **To VARY.** *v. n.* 1. To be changeable;
to appear in different forms.—

Darkling stands

The *varying* shore o' th' world. *Shak.*

2. To be unlike each other.—The constitutions
of nations *vary.* *Collier.* 3. To alter; to become
unlike itself.—*Vary* and try both ways in turn
Bacon.

So *varied* he, and of his tortuous train

Curl'd many a wanton wreath. *Milton.*

That each from other differ, first confess;

Next, that he *varies* from himself no less. *Pope.*

4. To deviate; to depart.—*Varying* from the right
rule of reason. *Locke.* 5. To succeed each other.—

While fear and anger, with alternate grace

Pant in her breast, and *vary* in her face. *Addiſ.*

6. To disagree; to be at variance.—

And *vary* thus in judgment of her seat.

Davies.

7. To shift colours.—

Will the falcon, stooping from above,

Smit with her *varying* plumage, spare the
dove? *Pope.*

VARZEY, a town of France, in the dep: of
Yonne, 32 miles from Auxerre.

VASARI, George, painter and architect, born
at Arezzo in 1514. He studied under Del Sarto
and Michael Angelo, and wrote the *Lives* of ce-
lebrated painters, sculptors, and architects, 3 vols
4to. He died at Florence, 1578. The treatise
on painting, Florence, 1619, 4to, was written by
a nephew of his.

VASCONES, an ancient people of Spain, on
the Pyrennees.

* **VASCULAR.** *adj.* [from *vasculum*, Latin.]
Consisting of vessels: full of vessels—*Vascular* so-
lids. *Arbutnot.*

* **VASCULIFEROUS.** *adj.* [*vasculum* and *fero*,
Lat.] Such plants as have, besides the common
calyx, a peculiar vessel to contain the seed, some-
times divided into cells; and these have always
a monopetalous flower, either uniform or disform.
Quincy.

(1.) * **VASE.** *n. f.* [*vas*, French; *vasa*, Lat.]
1. A vessel; generally a vessel rather for show
than use.—Each silver *vas*e in mystick order laid.
Pope. 2. It is used for a solid piece of ornamen-
tal marble.

(2.) **VASE**, a term frequently used for ancient
vessels dug from under ground, or otherwise found
and preserved in the cabinets of the curious. In
architecture, the appellation *vas*e is also given
to those ornaments placed on corniches, fochles,
or pedestals, representing the vessels of the an-
cients, particularly those used in sacrifice, as in-
cense pots, flower-pots, &c. See **PORTLAND**
VASE, § 10.

(3.) **VASE RIVER**, in N. America, falls into the
Mississippi, 55 miles NW. by N. from the mouth
of the Ohio, and is navigable about 60 miles.

(1.) * **VASSAL.** *n. f.* [*vassal*, French; *vassale*,
Ital.] 1. One who holds of a superior lord.—E-
very petty prince, *vassal* to the emperor. *Swift.*
—The

—The *vassals* bring their complaints to the viceroy. *Addison*. 2. A subject; a dependant.—She hath at her side a *vassal*. *Hooker*.—Such as they thought fit for labour, they received as *vassals*. *Spenser*.—Slaves and *vassals* to their pretended lords. *Davies*.—Passions ought to be *vassals*, not masters. *Ral*.

Vassals of his anger, when the scourge
Inexorable calls us to penance. *Milton*.

As all his *vassals* eagerly desir'd,
With mind averfe, he rather underwent
His people's will, than give his own consent.

Dryd.

—He subjugated a king, and called him his *vassal*. *Baker*. 3. A servant; one who acts by the will of another.

I am his fortune's *vassal*, and I send him
The greatness he has got. *Shak*.

4. A slave; a low wretch.—

Thou swear'st thy gods in vain,
O *vassal*! miscreant! *Shak*.

(2.) *VASSAL*, in our ancient customs, signified a tenant or feudatory person, who vowed fidelity and homage to a lord, on account of some land, &c. held of him in fee; also a slave or servant, and especially a domestic of a prince. See *FEO-DAL SYSTEM*.

* *VASSALAGE*. *n. f.* [*vasselage*, Fr. from *vassal*.] The state of a *vassal*; tenure at will; servitude; slavery; dependance.—

He renounc'd the *vassalage*
Of Rome again. *Spens*.

All my powers do their bestowing lose,
Like *vassalage*, at unawares encountering
The eye of majesty. *Shak*.

—They would have brought the Achæans from the conditions of followers and dependants unto meer *vassalage*. *Raleigh*.

Let us not then pursue
By force impossible, by leave obtain'd
Unacceptable, tho' in heaven, our state
Of splendid *vassalage*. *Milt*.

Cur'd *vassalage*,
First idoliz'd till love's hot fire be o'er,
Then slaves to those who courted us before.

Dryd.

VASSALBOROUGH, a town of the United States in Lincoln county, and State of Maine; on Kennebeck river.

VASSERBURG, a town of Bavaria, in the territory of Munich, seated on the Inn, and surrounded by mountains, 28 miles E. of Munich.

VASSI, a town of France, in the dep. of Upper Marne, on the Blaise, 115 miles E. of Paris.

(1.) * *VAST*. *adj.* [*vaste*, Fr. *vastus*, Lat.] 1. Large; great.—*Vast* numbers of men. *Clarend*.—An ample and capacious mind takes in *vast* and sublime ideas without pain. *Watts*.

His open stores,
Though *vast*, were little to his ampler heart. *Thomson*.

2. Viciously great; enormously extensive or capacious.—Vicious language is *vast* and gaping, swelling and irregular. *B. Jonf*.—

About whom rust the billowes, blacke and
vaste. *Chapm*.

They view'd the *vast* unmeasurable abyss. *Milton*.

Others, with *vast* Typhæan rage more fell,
Rend up both rocks and hills, and ride the air
In whirlwind; hell scarce holds the wild uproar. *Milton*.

(2.) * *VAST*. *n. f.* [*vastum*, Latin.] An empty waste.—They shook hands, as over a *vast*. *Shak*.—Through the *vast* of heaven it sounded. *Milt*.

The wat'ry *vast*

Secure of storms, your royal brother past. *Pope*.

* *VASTATION*. *n. f.* [*vastatio*, from *vastus*, Lat.] Waste; depopulation.—This wild-fire made the saddest *vastations*. *Decay of Piety*.

* *VASTIDITY*. *n. f.* [*vastitas*, Lat. from *vastus*.] Wildness; immensity. A barbarous word.—

Through all the world's *vastidity*. *Shak*.

* *VASTLY*. *adv.* [from *vast*.] Greatly: to a great degree.—We grow *vastly* both in strength and treasures. *Temple*.—They differ *vastly* in their manners. *Wilkins*.—It is *vastly* the concern of government. *South*.

* *VASTNESS*. *n. f.* [from *vast*.] Immensity; enormous greatness.—

Behemoth, biggest born of earth, upheav'd
His *vastness*. *Milton*.

She by the rocks compelled to stay behind,
Is by the *vastness* of her bulk confin'd. *Wall*.
The *vastness* of my subject. *Glanv*.—The *vastness* of his draught. *Dryd*.—The *vastness* of the ocean. *Bentley*.

* *VASTY*. *adj.* [from *vast*.] Large; enormously great.—

I can call spirits from the *vasty* deep. *Shak*.

* *VAT*. *n. f.* [*vat*, Dutch; *fat*, Sax.] A vessel in which liquors are kept in the immature state.—

Plumpy Bacchus, with pink eyes,
In thy *vats* our cares be drown'd. *Shak*.

—*Vats* and tubs. *Addis*.—

Wouldst thou thy *vats* with gen'rous juice
Should froth,

Respect thy orchards. *Phillips*.

VATABLES, Francis, professor of Hebrew in the Royal college of Paris, was born in Picardy. His knowledge of Hebrew astonished the most learned Jews. He wrote notes on the Bible, which were condemned by the faculty of theology at Paris, yet are highly esteemed. The last edition was in 2 vols. fol. 1729. He died in 1547.

VATAN, a town of France, in the dep. of Indre; 8 miles from Issoudun.

VATERNISH POINT, on the NW. coast of the Isle of Sky.

VATERSAY. See *WATERSAY*.

VATICAN, a magnificent palace of the pope, in Rome, which consists of several thousand rooms; but the parts of it most admired are the grand staircase, the pope's apartment, and especially the library, which is one of the richest in the world, both in printed books and manuscripts.

VATICANUS, the hill at Rome on which the palace of the pope stands.

* *VATICIDE*. *n. f.* [*vates* and *cedo*, Lat.] A murderer of prophets.—

The catiff *vaticide* conceiv'd a prayer. *Pope*.

* *To VATICINATE*. *v. n.* [*vaticinor*, Latin.] To prophesy; to practise prediction.—The most admired of all profane prophets, whose predictions have been cried up so much, did *vaticinate* here.

Howell.

VATTEL.

VATTEL, N. a writer on the law of nations, was born at Neufchatel, and died in 1770, at Brussels.

VAVAOO, one of the Friendly Islands, in the S. Pacific Ocean.

* **VAVASSOUR**, *n. f.* [*vavasseur*, Fr.] One who, himself holding of a superior lord, has others holding under him.—Names have been taken of civil honours, as kings, knight, valuator, or *vavasser*, quire. *Camden*.

VAVASSOR, Francis, a Jesuit, was born in 1603. He taught rhetoric and theology at Paris; where he died in 1681. He wrote two Latin poems on the Burlesque, and Epigrams, and a life of Jesus.

VAUBAN, Sebastian le Prestre, lord of, a celebrated engineer. He displayed his knowledge of fortification in the course of many sieges, and his services were rewarded with the first military honours. He was made governor of Lille in 1668, commissary general of the fortifications of France in 1678, governor of the maritime parts of Flanders in 1689, and a marshal of France in 1703. He died in 1707. He wrote, 1. *The French Engineer*, 8vo. 2. *Treatise on the Attack and Defence of Places*, 8vo. 3. *Essays on Fortification*, 2mo. 4. *Political Testament of M. Vauban*.

VAUCLUSE, a fine spring, within 8 miles of Avignon, distinguished as the retreat of Petarch.

VAUCOLEURS, an ancient town of France, in the department of the Meuse, on the side of a hill watered by the Meuse, 150 miles E. of Paris.

VAUD, **PAYS DE**, a pleasant and rich country of Switzerland, on the lake of Geneva, in the civeant canton of Bern. Lausanne is the capital.

* **VAUDEVIL**, *n. f.* [*vaudeville*, Fr.] A song common among the vulgar, and sung about the streets. *Trev.* A ballad; a trivial strain.

VAUDIN BAY, on the E. coast of the island of Martinico.

(1.) **VAUDOIS**, **THE VALLEYS OF**, are in Piedmont; the chief town Lucerna. See N° 2.

(2.) **VAUDOIS**, **VALDENSES**, or *Waldenses*, in ecclesiastical history, a name given to a sect of reformers. The origin of this famous sect, according to Mosheim, was as follows: Peter, an opulent merchant of Lyons, surnamed *Valdensis*, or *Valdissus*, from Vaux or Waldrum, a town in the marquise of Lyons, being struck with the glaring contradiction between the doctrines of the pontiffs and the truths of the Gospel, abandoned his mercantile vocation, distributed his riches among the poor, (whence the Waldenses were called *poor men of Lyons*;) and forming an association with other pious men, who had adopted his sentiments and his turn of devotion, he began in the year 1180 to assume the quality of a public teacher. Soon after, the Abp. of Lyons, and others, vigorously opposed him, but without success; for the number of his followers daily increased. They formed religious assemblies, first in France, and afterwards in Lombardy, from whence they propagated their sect throughout the other provinces of Europe with incredible rapidity, and with such invincible fortitude, that the most cruel inventions of merciless persecution could not damp their zeal, nor entirely ruin their cause. They did not at-

tempt to introduce new doctrines into the church. They only wanted to reduce the form of ecclesiastical government, and the manners, both of the clergy and people, to that amiable simplicity and primitive sanctity that characterized the apostolic ages. They denied the supremacy of the Roman pontiff, and maintained, that the rulers and ministers of the church were obliged, by their vocation, to imitate the poverty of the apostles. They considered every Christian, as, in a certain measure, qualified and authorized to instruct, exhort, and confirm the brethren in their Christian course, and demanded the restoration of the ancient penitential discipline of the church, *i. e.* the expiation of transgressions by prayer, fasting, and alms, which the new-invented doctrine of indulgences had almost totally abolished. They at the same time affirmed, that every pious Christian was qualified and entitled to prescribe to the penitent the kind or degree of satisfaction or expiation that their transgressions required; that confession made to priests was by no means necessary; and that the power of delivering sinners from the guilt and punishment of their offences belonged to God alone. They looked upon the prayers and other ceremonies that were instituted in behalf of the dead, as vain, useless, and absurd, and denied the existence of departed souls in an intermediate state of purification; affirming, that they were immediately, upon their separation from their body, received into heaven, or thrust down to hell. Their rules of practice were extremely austere. They prohibited all wars, and suits of law, and all attempts towards the acquisition of wealth, the inflicting of capital punishments, self-defence against unjust violence, and oaths of all kinds. During the greatest part of the 17th century, those of them who lived in the valleys of Piedmont, and who had embraced the doctrine, discipline, and worship of the church of Geneva, were oppressed and persecuted, in the most barbarous and inhuman manner, by the ministers of Rome. This persecution was carried on with peculiar marks of rage and enormity in the years 1653, 1656, and 1696, and seemed to portend nothing less than the total extinction of that unhappy nation. But since 1730, they have not been openly molested. A popish church has been built in every parish, and they are very much oppressed with taxes and other burdens. The population of the valleys of Lucerne, Peyrouse, and St Martins, does not exceed 20,000, of whom 2000 are Catholics.

VAUDREVANGE, a decayed town of France, in the dep. of the Meurthe, on the Sare, 50 miles NE. of Nancy.

VAVANY, a river in Suffolk.

VAUGELAS, Claude Favre, lord DE, was born at Bourg, in Bresse, in 1585. He was Chamberlain to the duke of Orleans, and member of the French academy. He contributed to the *Encyclopedie*; and wrote *Remarks on the French Language*, and a translation of Q. Curtius. He died poor, in 1650.

VAUGHAN, Sir John, chief justice of the common pleas under Charles II. He died in 1674, and his reports were published posthumously.

(1.) * **VAULT**, *n. f.* [*vaulte*, Fr. *volta*, Italian; *voluta*, low Lat.] 1. A continued arch.—

Oh

Oh you are men of stone,
Had I your tongues and eyes, I'd use them so
That heav'n's *vault* should crack. *Shak.*
—The form of the habitable earth, which was the
outward surface of this *vault*, or the cover of the
bays. *Burnet.* 2. A cellar.—

Crawl into the kill hole;
He will seek there; neither preys, well, *vault*,
But he hath an abstract for the remembrance of.
Shak.

The wine of life is drawn, and the meer lees
Is left this *vault* to brag of. *Shak.*

Whether your fruitful fancy lies
To banish rats that haunt our *vaults*. *Swift.*

3. A cave; a cavern.—
The silent *vaults* of death unknown to light,
And hell itself lie naked to his sight. *Sandys.*

4. A repository for the dead.—
Shall I not be stilled in the *vault*,
To whose foul mouth no healthsome air breathes
in? *Shak.*

(2.) *VAULT*, in architecture, an arched roof, so
contrived that the stones which form it sustain
each other. Vaults are in many cases to be pre-
ferred to fossils or flat ceilings, as they give a great-
er height and elevation, and are besides more firm
and durable.

(3.) * *VAULT*. *n. f.* [from the verb.] A leap; a
jump.

(1.) * *To VAULT*. *v. a.* [*vouter*, Fr. from the
noun.] To arch; to shape to a vault.—
Hath nature given them eyes

To see this vaulted arch, and the rich cope
Of sea and land? *Shak.*

2. To cover with an arch.—
Over head the dismal hills
Of fiery darts in flaming volleys flew,
And lying vaulted either host with fire. *Milton.*

(2.) * *VAULT*. *v. n.* [*voltiger*, Fr. *volegiare*, Ital.] 1. To leap; to jump.—

Faulting ambition, which o'erleaps itself. *Sh.*
The pretty vaulting sea refus'd to drown me,
Knowing that thou would'st have me drown'd
on shore. *Shak.*

He is vaulting variable ramps
In your despite, upon your purse. *Shak.*

—Vaulting into my saddle. *Shak.*—Leaning on his
lance, he vaulted on a tree. *Dryden.*—If a man
should vault down the monument. *Collins.*—Lucan
vaulted upon Pegasus. *Addison.* 2. To play the
tumbler, or posture-master.

* *VAULTAGE*. *n. f.* [from *vault*.] Arched
cellar. Not in use.—

He'll call you to so hot an answer for it,
That caves and womby vaultages of France
Shall chide your trespass. *Shak.*

* *VAULTED*. *adj.* [from *vault*.] Arched; con-
cave.—

Restore the lock! she cries, and all around,
Restore the lock! the vaulted roofs rebound.

Pope.

* *VAULTER*. *n. f.* [from *vault*.] A leaper;
a jumper; a tumbler.

* *VAULTY*. *adj.* [from *vault*.] Arched; con-
cave. A bad word.—

I will kiss thy detestable bones,
And put my eye-balls in thy vaulty brows,

And ring these fingers with thy household
worms. *Shak.*

The vaulty heav'ns so high above our heads.
Shak.

(1.) * *VAUNT*. *n. f.* [from the verb.] Brag;
boast; vain ostentation.—Sir John in vain vaunts
of his own counsels. *Spenser.*—
Him induc'd

With other promises and other vaunts. *Milton.*
Such vaunts as his who can with patience
read. *Granville.*

(1.) * *VAUNT*. *n. f.* [from *avouant*, Fr.] The first
part. Not used.—Leaps o'er the vaunt and first-
lings. *Shak.*

(1.) * *To VAUNT*. *v. a.* [*vaunter*, Fr.] To boast;
to display with ostentation.—

Not that great champion,
Whom famous poets' verse so much doth vaunt.
Spenser.

Not any damsel which her vaunteth most
In skilful knitting of soft silken twine. *Spenser.*

My vanquisher spoil'd of his vaunted spoil.
Milton.

(1.) * *To VAUNT*. *v. n.* 1. To play the braggart;
to talk with ostentation; to make vain show; to
boast.—

You say you are a better foldier,
Let it appear so; make your vaunting true.
Shakespeare.

—Their vaunting in wisdom was reproved with
disgrace. *Wisdom*, xvii. 7.—

So spake the apostate angels, though in pain,
Vaunting aloud, but rack'd with deep despair.
Milton.

—*To vaunt* and overvalue. *Gov. of Tongue.* 2. I
scarcely know in what sense Dryden has used this
word, unless it be miswritten for *vaults*.—

'Tis he: I feel him now in ev'ry part;
Like a new world he vaunts about my heart.
Dryden.

* *VAUNTER*. *n. f.* [*vanteur*, Fr. from *vant*.]
Boaster; braggart; man given to vain ostentation.
To menage steeds, as did this vaunter. *Spens.*

Tongue-valiant hero! Vaunter of thy might,
In threats the foremost, but the last in fight.
Dryden.

* *VAUNTFUL*. *adj.* [*vant and full*.] Boastful;
ostentatious.—

Young Clarion, with vauntful luskied. *Spens.*
* *VAUNTINGLY*. *adv.* [from *vaunting*.]

Boastfully; ostentatiously.—
I heard thee say, and vauntingly thou spak'st it
That thou wert cause of noble Gloster's death.
Shak.

* *VAUNTURE*. *n. f.* [*avant mur*.] A false
wall; a work raised before the main wall.—With
another engine named the warwolfe, he pierced
with one stone, and cut, as even as a thread, two
vauntmures. *Camden.*—Daily attempting the *vaun-
mures*. *Knolles.*

VAUXHALL, a village of Surry, on the
Thames, celebrated for its public gardens.

* *VAWARD*. *n. f.* [*vau and ward*.] Fore part.
Obsolete.—

Since we have the *vaaward* of the day. *Shak.*
Their bands i' th' *vaaward* are the Antiates,
Of their best truth. *Shak.*

VAYER,

VAYER. See MOTHE, N° 3.
VAYVODE, or VAIVODE. See WAYVODE.
VAXUCO, or FOUNTAIN TREE. See PHILIP-
PINES, N° 1.

UBALDI, or USULDI, Guido, a noble Italian
narrquis, who flourished in the 16th century, and
published in 1578, a Theory of Mechanics. See
STATICS.

UBEDA, a populous town of Spain, in Andalu-
sia, in a fertile country. It is 18½ miles SE. of
Madrid. Lon. 3. 13. W. Lat. 37. 58. N.

UBERLINGEN, formerly a free and imperial
city of Suabia, given to the Elector of Baden in
the arrangement of indemnities in 1802. Near it
are famous baths. It is on a high rock, 12 miles
N. of Constance.

* UBERTY. *n. f.* [*ubertas*, Latin.] Abundance;
fruitfulness.

UBES, ST, or SETUVAL, a sea-port town of
Portugal, in the province of Estremadura, seated
on a bay of the Atlantic Ocean, at the mouth of
the Sandao, on the ruins of the ancient *Cedobriga*,
1 mile south of Lisbon. It stands on an en-
sine, with a very strong castle built on a rock.
The soil about it is fertile in corn, wine, and fruits.
The inhabitants make great quantities of fine salt.
It has 4 churches, 2 hospitals, 10 convents, an
academy founded by John V. and 10,000 inhabi-
tants. Lon. 81. 54. E. Lat. 38. 22. N.

* UBICATION. } *n. f.* [*ubi*, Latin.] Lo-

* UBIETY. } cal relation; whereness. A
cholastick term.—Relations, *ubications*, duration,
the vulgar philosophy admits to be something.
Ulanville.

UBIQUITARIANS, formed from *ubique*, "eve-
ry where," in ecclesiastical history, a sect of Lu-
therans which rose and spread itself in Germany;
and whose distinguishing doctrine was, that the
body of Jesus Christ is every where, or in every
place. Brentius, one of the earliest reformers, is
said to have first broached this error, in 1560.

(1.) * UBIQUITARY. *adj.* [*from ubique*, Lat.]
existing every where.—*Ubiquitary* commerce. *Hosw.*

(2.) * UBIQUITARY. *n. f.* [*from ubique*, Latin.]
one that exists every where.—Either Aquinas is
life, or the Papists *ubiquitaries*. *Hall*.

* UBIQUITY. *n. f.* [*from ubique*, Latin.] Om-
nipresence; existence at the same time in all places.
Human nature admitteth not *ubiquity*. *Hooker*.

Pim the might,

A solemn wight

As you would meet

In any street

In that *ubiquity*. *Ben Jonson*.

The *ubiquity* of which they could thrust into a
corner of their closet. *South*.

UBY, or POLU UBY, an island in the Indian
ocean, at the entrance of the bay of Siam, 20
miles in circumference with plenty of wood.
Lat. 105. 56. E. Lat. 8. 25. N.

UCAH, PORT, is on the NW. coast of North
America, on Washington's island, S. of Port Geyer.
UCHE, an Indian town on the Chata Uche river,
America.

(1.) * UDDER. *n. f.* [*uder*, Saxon; *uder*, Dutch;
ur, Latin.] The breast or dugs of a cow, or
her large animal.—

VOL. XXII. PART II.

A lioness, with *udders* all drawn dry,

Lay couching head on ground.

Shak.

The she goat,

Not without pain, dragg'd her distended *udder*.
Prior.

(2.) UDDER, in zootomy, that part in brutes
wherein the milk is prepared, answering to the
mammaræ or breasts in women. See ZOOTOMY.

* UDDERED. *adj.* [*from udder*.] Furnished with
udders.—

Marian soft could stroke the *udder'd* cow. *Gay*.

UDENSKOI, a town of Siberia, in Irkutsk,
1000 miles NW. of Pekin, and 1200 E. of Tobolsk.
Lon. 96. 30. E. Lat. 53. 0. N.

UDDEVALLA, a town of Sweden, in W.
Gothland. It contains about 3000 inhabitants,
who export iron, planks, and herrings. It is 50
miles N. of Gothenburg.

UDINA, or UDINS, a town of Maritime Aus-
tria, in Friuli, containing 16,000 inhabitants. It
is near the Tagliamento and Lisenzo, 55 miles N.
by E. of Venice. Lon. 13. 3. E. Lat. 46. 9. N.

UDNY, a parish in Aberdeenshire, about 7½ miles
square. The general appearance is pretty flat.
The soil is in general a deep loam, with a con-
siderable proportion of marshy ground, on a clay
bottom. Their are many lime stones and granite
in almost every farm. In 1793, the population
was 1137, decrease 185 since 1755.

* VEAL. *n. f.* [*veal*, a calf, *veeler*, *vester*, to
bring forth a calf, old-*Fr.* *vitellus*, Latin.] The
flesh of a calf killed for the table.—

Wouldst thou with mighty beef augment thy
meal,

Seek Leadenhall; St James's sends thee *veal*.

Gay.

VEBO VALENCIA. See MONTE LEONE.

(1.) VECHT, a town of Westphalia, in the late
bithopric of Munster, 30 miles N. of Osnaburg.

(2.) VECHT, a river of Holland, and the E.
branch of the Rhine, separating it from the ci-
devant province of Utrecht. It falls into the Zuy-
der Zee.

(3.) VECHT, a river of Germany, which rises
near Munster. It crosses the countries of Stenford
and Bentheim, and running through Overysfel,
falls into the Zuyder Zee, where it is called Swart
Water.

* VECTION. VEGETATION. *n. f.* [*vectio*, *vec-
tito*, Lat.] The act of carrying, or being carried,
—Lolling in chariots; a species of *vegetation* sel-
dom used among the ancients. *Arbutnot*.

VECTIS, ancient name of the Isle of Wight.

* VEGETATION. See VECTION.

* VECTURE. *n. f.* [*vectura*, Latin.] Carriage.
—*Vecture* or carriage. *Bacon*.

VEDAS, the sacred books of the Hindoos, be-
lieved to be revealed by God, and called immor-
tal. They are considered as the fountain of all
knowledge, human and divine, and are 4 in num-
ber. The *Rigveda* consists of 5 sections; the *Ya-
jurveda* of 86; the *Samaveda* of 1000; and the
Atbaraveda of 9; with 1100 *sa'ac'ba's*, or branch-
es, in various divisions and subdivisions. The
Vedas in truth are infinite, but have been long
reduced to this number and order: the principal
part of them is that which explains the duties of

D d d d man

man in a methodical arrangement; and in the 4th is a system of divine ordinances. From these are reduced the four *Upavedas*, the first of which was delivered to mankind by BRAHMA, INDRA, DHANWANTARI, and five other deities; and comprehends the theory of disorders and medicines, with the practical methods of curing diseases. The 2d consists of music, invented for the purpose of raising the mind, by devotion, to the felicity of the Divine nature; the 3d treats of the fabrication and use of arms; and the 4th of *sixty-four* mechanical arts.

VEDETTE, in war, a centinel on horseback, with his horse's head towards the place whence any danger is to be feared, and his carbine advanced, with the butt end against his right thigh. When the enemy has encamped, there are vedettes posted at all the avenues, and on all the rising grounds, to watch for its security.

VEEPE, St, a town in Cornwall.

VEER, a town of Holland, in the dep. of the Meuse. It is in the isle of Walcheren, and has a good harbour, 3 m. NE. of Middleburg.

(1.) * To VEER. *v. a.* 1. To let out.—It is a great point of art, when our matter requires it, to enlarge and *veer* out all sail. *B. Jonf.* 2. To turn; to change.—

I see the heavy night at hand;

Veer the main-sheet, and bear up with the land. *Spens.*

—Sailing farther, it *veers* its lily to the west. *Brown.*

(2.) * To VEER. *v. n.* [*vireo*, Fr.] To turn about.—

Nigh rivers mouth, where wind

Veers oft, as of the steers and shifts her sail. *Milt.*

And turn your *veering* heart with every gale. *Rofcommon.*

I have no taste of the noisy praife

Of giddy crowds, as changeable as winds;

Servants to change, and blowing with the tide

Of swollen successes, but *veering* with its ebb. *Dryden.*

And as he leads, the following navy *veers*. *Dryden.*

—The turns and *veerings* of the people. *Addison.*

—The wind *veered* about. *Derb.*

(3.) To VEER AND HULL, to pull a rope tight,

by drawing it in and slackening it alternately, till

the body to which it is applied acquires an additional

motion, like the increased vibrations of a

pendulum, so that the rope is straitened to a greater

tension with more facility and dispatch. This

method is particularly used in hauling the bow-

lines. The wind is said to *veer* and haul when it

alters its direction, and becomes more or less fair.

Thus it is said to *veer* aft and to haul forward.

VEERING, or WEARING, the operation by

which a ship, in changing her course from one

board to the other, turns her stern to windward.

Hence it is used in opposition to TACKING,

wherein the head is turned to the wind, and the

stern to leeward. See SEAMANSHIP.

VEGA. Lopez Felix de, a Spanish poet was

born at Madrid of a noble family, in 1562. He

became secretary to the Duke of Alva, and after-

wards served on board the Armada, destined for

the invasion of England. After having lost two

wives, he entered into orders. Pope Urban VII. created him D. D. and bestowed on him the cross of the order of Malta, and a place in the apostolic exchequer. He died in 1635. His principal performances are comedies, which were acted with great success, and procured him a considerable fortune. His invention was so fertile that he sometimes wrote a comedy in a single day. He wrote several poems,—all his works make 25 vols.

* VEGETABILITY. *n. f.* [from *vegetable*.] Vegetable nature; the quality of growth without sensation.—Overcomes its *vegetability*, and converts it into a lapideous substance. *Brown.*

(1.) * VEGETABLE. *adj.* [*vegetabilis*, Lat.] 1. Belonging to a plant.—

The *vegetable* world, each plant and tree,
From the fair cedar on the craggy brow
To creeping moss. *Prior.*

—*Vegetable* juices. *Arbutnot.* 2. Having the nature of plants.—

Amidst them stood the tree of life,
High, eminent, blooming ambrosial fruit
Of *vegetable* gold. *Milton.*

—All animal and *vegetable* bodies. *Woodward.*

(2.) * VEGETABLE. *n. f.* [*vegetabilis*, school Lat.

vegetable, Fr.] Any thing that has growth with-

out sensation, as plants.—*Vegetables* are organized

bodies consisting of various parts, containing ves-

sels furnished with different juices, and taking in

nourishment from without, usually by means of a

root fixed to the earth, or to some other body, as

in the generality of plants; sometimes by means

of pores distributed over the whole surface, as in

sub-marine plants. *Hill's Materia Medica.*—

Let brutes and *vegetables* that cannot drink,

So far as drought and nature urges, think. *Wall.*

—Sensitives more than *vegetables*, and men more

than brutes. *Wilkins.*—In *vegetables* it is the shape,

we most fix on. *Locke.*—Other animated substances

are called *vegetables*, which have within them-

selves the principle of another sort of life and

growth, and of various productions of leaves,

flowers and fruit. *Watts.*

(3.) VEGETABLE FLY. See FLY, N° 9. and

INSECT, N° 10.

* To VEGETATE. *v. n.* [*vegeto*, Latin.] To

grow as plants; to shoot out; to grow without

sensation.—Some *vegetating* or prolific virtue.

Ray.—They would soon *vegetate*. *Woodward.*—

See dying vegetables life sustain,

See life dissolving *vegetate* again. *Pope.*

(1.) * VEGETATION. *n. f.* [from *vegeto*, Lat.]

1. The power of producing the growth of plants.

—Mineral matter, unfit for *vegetation*. *Woodw.*—

The fun, deep-darting to the dark retreat

Of *vegetation*, sets the flaming power

At large. *Thomson.*

Love warbles thro' the vocal groves,

And *vegetation* paints the plain. *Anon.*

2. The power of growth without sensation.—

Plants exceed animals in *vegetation* and fertility.

Hooker.—The *vegetation* of plants. *Ray.*

(2.) VEGETATION, in physiology the act where-

by plants receive nourishment and growth. The

process of nature in the vegetation of plants is ve-

ry accurately delivered by Malpighi: The egg or

seed of the plant being excluded out of the ovary,

called *pod* or *bus*, and requiring further fostering

and

and brooding, is committed to the earth; which having received it, not only does the office of incubation by her own warm vapours and exhalation, joined with the heat of the sun, but by degrees supplies what the seed requires for its further growth, as abounding everywhere with canals and sinuses, wherein the dew and rain water, impregnated with fertile salts, glide, like the chyle and blood in the arteries, &c. of animals. This moisture meeting with a new-deposited seed, is percolated, or strained through the pores or pipes of the outer rind or husk, corresponding to the secundines of the foetuses, on the inside whereof lies one or more, commonly two, thick seminal leaves answering to the placenta in women, and the cotyledons in brutes. These seed leaves consist of a great number of little vesiculæ, or bladders, with a tube corresponding to the navel-string in animals. In these vesiculæ is received the moisture of the earth strained through the rind of the seed; which makes a slight fermentation with the proper juice before contained therein. This fermented liquor is conveyed by the umbilical vessel to the trunk of the little plant; and to the germ or bud which is contiguous thereto: upon which a vegetation and increase of the parts succeed. From a number of experiments made by Mr Gough, and related by him in the fourth volume of the Manchester Transactions, it appears, that seeds will not vegetate without air; and that during their vegetation, they absorb oxygen, part of which they retain, and that carbonic acid is formed with the rest.

(3.) **VEGETATION, EXEMPLIFIED IN WHEAT.** The first day the grain is sown it grows a little turgid; and the secundine or husk, gapes a little in several places; and the body of the plant, being continued by the umbilical vessel to a conglobated leaf (which is called the *pulp* or *flesh* of the seed, and is what constitutes the flower) swells; by which means, not only the germ or sprout which is to be the future stem) opens, and waxes green, but the roots begin to bunch out; whence the placenta, or seed leaf, becoming loose, gapes. The second day, the secundine or husk, being broke through, the stem, or top of the future straw, appears on the outside thereof, and grows upward by degrees; in the mean time, the seed-leaf guarding the roots becomes turgid with its esculæ, and puts forth a white down. And the sif being pulled away, you see the roots of the plants bare; the future buds, leaves, and rest of the stalk, lying hid. Between the roots and the ascending stem, the trunk of the plant is knit by the navel-knot to the flower leaf, which is very soft, though it still retains its white colour and its natural taste. The third day, the pulp of the conglobated, or round leaf, becomes turgid with the juice which it received from the earth fermenting with its own. Thus the plant increasing in bigness, and its bud or stem becoming taller, soon whitish turns greenish; the lateral roots also break forth greenish and pyramidal from the aping sheath, which adheres chiefly to the plant; and the lower root grows longer and hairy, with many fibres shooting out of the same. Indeed here are hairy fibres hanging all along on all the roots, except on their tips; and these fibres are

seen to wind about the saline particles of the soil, little lumps of earth, &c. like ivy: whence they grow curled. Above the lateral roots there now break out two other little ones. The fourth day, the stem mounting upwards, makes a right angle with the seminal leaf: the last roots put forth more; and the other three growing larger, are clothed with more hairs, which straitly embrace the lumps of earth; and when they meet with any vacuity, unite into a kind of net-work. From this time forward the root pushes with more regularity downward, and the stalk upward, than before. There is, however, this great difference in their growth, that the stalk and branches find no resistance to their shooting up, while the roots find a great deal to their shooting downward, by means of the solidity of the earth; whence the branches advance much faster and farther in their growth than the roots; and these last often finding the resistance of a tough earth unfurmountable, turn their course, and shoot almost horizontally.

(1.) * **VEGETATIVE.** *adj.* [*vegetatif*, Fr. from *vegetate*.] 1. Having the quality of growing without life.—Creatures *vegetative* and growing, have their seeds in themselves. *Raleigh*. 2. Having the power to produce growth in plants.—Plants have a *vegetative* soul. *Wilkins*.—Homer makes deities of the *vegetative* faculties. *Broomer*.

(2.) **VEGETATIVE SOUL**, among philosophers, denotes that principle in plants by virtue of which they vegetate, or receive nourishment and grow.

* **VEGETATIVENESS.** *n. f.* [from *vegetative*.] The quality of producing growth.

* **VEGETE.** *adj.* [*vegetus*, Latin.] Vigorous active; spritely.—The soul was *vegete*, quick, and lively. *South*.—The faculties in age must be less *vegete* and nimble, than in youth. *Wallis*.

(1.) * **VEGETIVE.** *adj.* [from *vegeto*, Latin.] Vegetable; having the nature of plants.—

Nor rent off, but cut off ripe bean with a knife, For hindering stalks of his *vegetive* life. *Tusser*.

(2.) * **VEGETIVE.** *n. f.* [from the adjective.] A vegetable.—Hence *vegetives* receive their fragrant birth. *Sandys*.—

The tree still panted up th' unfinished part
Not wholly *vegetive*, and heav'd her heart.

Dryden.

VEGETIUS, Flavius Renatus, lived in the 4th century. He wrote Military Institutions which were printed at Paris 1762, 1800, and a treatise on the Veterinary art, which is in the *Rei Rustice Scriptores*, Leipzig, 2 vols. 4to.

* **VEHEMENCE.** *n. f.* [*vehementia*, Lat.] 1.

* **VEHEMENCY.** *n. f.* Violence; force.—

Universal hubbub wild

Of stunning sounds, and voices all confus'd,
— Assaults his ear with loudest *vehemence*. *Milton*.

2. Ardour; mental violence; terror.—*Vehemency* of affection. *Hooker*.—

The best persuasions

Fail not to use; and with what *vehemency*

The occasion shall instruct you. *Shak.*

—The *vehemence* of your affection. *Shak.*—*Vehemency* of expression. *Clarendon*.—

This pure cause would kindle my rapt spirits

To such a flame of sacred *vehemence*,

That dumb things would be mov'd to sympathy.

Milton.—This

—This *vehement* of his is most suitable to my temper. *Dryden*.

I hear him with a sacred kind of horror,

And tremble at his *vehement* of temper. *Addison*.

* **VEHEMENT.** *adj.* [*vehement*, Fr. *vehemens*, Latin.] 1. Violent; forcible.—Motions *vehement* or ponderous. *Bacon*.—Gold will endure a *vehement* fire for a long time, without any change. *Grew*. 2. Ardent; eager; fervent.—By their *vehement* intigation. *Shak*.—

I find

In all things else delight indeed, but such

As, us'd or not, works in the mind no change,
Nor *vehement* desire. *Milton*.

* **VEHEMENTLY.** *adv.* [from *vehement*.] 1. Forcibly. 2. Pathetically; urgently.—The Christian religion inculcates kindness *vehemently*. *Tillot*. (1.) * **VEHICLE.** *n. f.* [*vehiculum*, Latin.] 1.

That in which any thing is carried.—*Vehicles* of flame. *Addison*. 2. That part of a medicine which serves to make the principal ingredient potable.—The drink, or moistening *vehicle*. *Brown*. 3. That by means of which any thing is conveyed.—A *vehicle* to convey the meaning of a thing. *L'Esrange*.

(2.) **VEHICLE**, in pharmacy, is any liquid serving to dilute some medicine, in order that it may be administered more commodiously to the patient.

(1.) **VEGLIA**, an island in the Gulf of Venice, on the coast of Dalmatia, with a good harbour. It is pleasant and populous, and fertile in wine and silk; producing also good small horses.

(2.) **VEGLIA**, the only town in the island, N^o 1. seated on a hill on the sea coast, 110 miles SSE. of Venice. Lon. 14. 56. E. Lat. 45. 22. N.

VEIENTES, the inhabitants of **VEII**.

VEII, in ancient geography, a city of Etruria, long the powerful rival of Rome; distant about 12 miles to the NW. Taken after a siege of 10 years by Camillus; six years before the taking of Rome by the Gauls: and thither the Romans, after the burning of their city, had thoughts of removing; but were dissuaded from it by Camillus, (*Livy*.) It remained standing after the Punic war; and a colony was there settled, and its territory assigned to the soldiers. But after that, it declined so gradually, as not to leave a single trace standing. It was famous for the slaughter of the 300 Fabii on the Cremera (*Ovid*.) The spot on which it stood lies near Isola, in St Peter's patrimony. (*Holfstenius*.)

(1.) * **VEIL.** *n. f.* [*velum*, Lat.] 1. A cover to conceal the face.—

To feed his fiery lustful eye,

He snatch'd the *veil* that hung her face before. *Spenser*.

With gored hand, and *veil* so rudely torn.

Waller.

He cast a *veil* upon supposed grief. *Waller*.

As *veils* transparent cover, but not hide,
Such metaphors appear when right applied.

Granville.

She accepts the hero, and the dame

Wraps in her *veil*, and frees from sense of shame. *Pope*.

2. A cover; a disguise.—The borrow'd *veil* of modesty. *Shak*.—

And thro' the *veil* of words thou view'st the naked mind. *Dryden*.

—Cast a *veil* over those failings. *Addison*.

(2.) **VEIL**, in the Romish churches, in time of Lent, they have veils or curtains over the altar, crucifix, images of saints, &c. A veil of crape is wore on the head by nuns, as a badge of their profession: the novices wear white veils, but those who have made the vows black ones. See **NUN**.

* **To VEIL.** *v. n.* [*velo*, Latin. See **VAIL**.] 1. To cover with a veil, or any thing which conceals the face.—

Her face was *veil'd*, yet to my fancied sight

Love, sweetness, goodness, in her person shin'd. *Milton*.

—*Veil* their heads and faces. *Boyle*. 2. To cover; to invest.—

I desery

From yonder blazing cloud that *veils* the hill

One of the heavenly host. *Mil*.

3. To hide; to conceal.—

As half to shew, half *veil* the deep intent. *Pope*.

(1.) * **VEIN.** *n. f.* [*veine*, Fr. *vena*, Latin.] 1. In place of Dr Johnson's definition from Quincy, to save repetitions, See **ANATOMY**, *Index*.

When I did first impart my love to you

I freely told you all the wealth I had

Ran in my *veins*; I was a gentleman. *Shak*.

Horror chill ran through his *veins*, *Shak*.

And all his joints relax'd. *Mil*.

2. Hollow; cavity.—

Down to the *veins* of earth. *Milton*.

—Let the glass of the prisons be free from *veins*.

Newton. 3. Course of metal in the mine.—There

is a *vein* for the silver. *Jab*. xxviii. 1.—

Part hidden *veins* digg'd up, nor hath this

earth

Entrails unlike of mineral and stones. *Milton*.

—A *vein* of gold. *Swift*. 4. Tendency or turn of

the mind or genius.—

Invoke the muses and improve my *vein*. *Waller*.

—The compass of our genius, and according to

our *vein*. *Dryd*. 5. Favourable moment; time

when any inclination is predominant.—Artizans

have their *veins* and times. *Wotton*. 6. Humour;

temper.—

I put your grace in mind of what you prom-

is'd me.—

—I am not in the giving *vein* to-day. *Shak*.

—He hath a satirical *vein*. *Bacon*.—

They among themselves in pleasant *vein*,

Stood scoffing. *Milton*.

Speak'st thou in earnest or in jesting *vein*? *Dryden*.

—The currier struck the usurer upon the right

vein. *L'Esrange*.—The *vein* I have had of

running into speculations. *Temple*. 8. Current;

continued production.—He can open a *vein* of

true and noble thinking. *Swift*. 9. Strain; qua-

lity. 10. Streak; variegation: as the *veins* of

the marble.

(2.) **VEIN**, among miners, is that space which

is bounded with woughs, and contains ore, spar,

canck, clay, chirt, croil, brownhen, pitcher-chirt,

cur, which the philosophers call the *mother of met-*

als,

als, and sometimes foil of all colours. When it ears-ore, it is called a *quick vein*; when no ore, *dead vein*.

* **VEINED.** } *adj.* [*veineux*, Fr. from *vein*.] 1. Full of veins. 2. Streaked; variegated.—Combs, finely *veined*. *Mortimer*.—The *veiny marble*. *Thomson*.

VEJOVIS, or **VEJUPITER**, a deity of ill omen at Rome. He had a temple on the Capitoline Hill.

VEIROS, a town of Portugal, in Alentejo.

VEJUPITER. See **VEJOVIS**.

VELA, a remarkable cape on the coast of Terra Firma, in South America. Lon. 71. 25. W. Lat. 12. 30. N.

VELARIUS, in antiquity, an officer in the court of the Roman emperors, being a kind of usher, whose post was behind the curtain in the prince's apartment, as that of the chancellor's was at the entry of the ballustrade; and that of the ostiarii at the door. The *velarii* had a superior of the same denomination, who commanded them.

VELASQUEZ, Don Diego, de Silva, painter, born at Seville in 1594. Philip IV. appointed him his first painter, and knighted him with a pension He died at Madrid in 1660.

VELAY, a ci-devant prov. of France, bounded on the N. by Foréz, on the W. by Auvergne, on the S. by Gevazdan, and on the E. by Vivarez. It now forms the dep. of Upper Loire.

VELDENTZ, formerly a town of Germany, now in the French dep. of the Sarre and Moselle. It is on the E. bank of the Moselle, 15 miles NE. of Friers. Lon. 7. 3. E. Lat. 49. 52. N.

(1.) **VELEZ**, a town of New Castile.

(2.) **VELEZ DE GOMARA**, a town of Africa, in the kingdom of Fez, and in the province of Eriff. It is the ancient **ACARON**. With a harbour on the Mediterranean, and a handsome castle, where the governor resides. Lon. 4. 0. W. Lat. 35. 0. N.

(3.) **VELEZ MALAGA** a town of Granada.

VELICALA, a town on the head of the peninsula of California, near the coast of the N. Pacific Ocean. Lon. 115. 50. W. Lat. 20. 35. N.

VELIKI-USTIUG, a prov. of Russia, in Vologda, of which Ustiug is capital.

VELINO, **MONTE**, a mountain, supposed to be the most lofty part of the Appenines, more than 8397 feet above the level of the Mediterranean; 46 miles NE. of Rome.

VELIOCASSI, an ancient people of Gaul.

VELITES, in the Roman army, a kind of ancient soldiers, who were armed lightly with a javelin, a cask, cuirass, and shield.

VELLA, in botany, **SPANISH CRESS**, a genus of plants, of the class of *Tetradynamia*, and order of *Siliculosa*; ranking according to the natural method in the 39th order *Siliculosæ*.

VELLARI, a people of Gaul.

VELLEDA, a woman worshipped among the Germans, in the age of Vespasian.

* **VELLEITY**, *n. f.* [*velleit*, Fr. *velleitas*, from *velle*, Latin.] *Velleity* is the school-term used to signify the lowest degree of desire. *Locke*.—The wishing of a thing is not properly the willing of it; but it is that which is called by the schools an imperfect *velleity*, and imports no more than

an idle, un-operative complacency in, and desire of the end, without any consideration of the means. *South*.

VELLEIUS PATERCULUS. See **PATERCULUS**.

* **To VELLICATE**. *v. a.* [*vellico*, Latin.] To twitch; to pluck; to act by stimulation.—Those smells do pull and *vellicate* the sense. *Bacon*.—Something *vellicating* a nerve. *Arbutnot*.

* **VELLICATION**. *n. f.* [*vellicatio*, Latin.] Twitching; stimulation.—All purges have a kind of twitching and *vellication*. *Bacon*.—A particular motion and *vellication* impress upon the nerves. *Watts*.

(1.) * **VELLUM**. *n. f.* [*velin*, Fr. *velamen*, Lat. rather *vitulinum*, low Latin.] The skin of a calf dressed for the writer.—The scull was very thin, yielding to the pressure of my fingers like a piece of *vellum*. *Wifeman*.

(2.) **VELLUM** is a kind of parchment, that is finer, even, and more white than the common kind. See **PARCHMENT**, § 2.

(1.) * **VELOCITY**. *n. f.* [*velocité*, Fr. *velocitas*, Latin.] Speed; swiftness; quick motion.—The *velocities* of the several planets. *Bentley*.

(2.) **VELOCITY**, in mechanics, swiftness; that affection of motion whereby a moveable is disposed to run over a certain space in a certain time. It is also called *celerity*, and is always proportional to the space moved. *Huyghens*, *Leibnitz*, *Bernoulli*, *Wolfius*, and the foreign mathematicians, hold, that the momenta or forces of falling bodies, at the end of their falls, are as the squares of their velocities to the quantity of matter; the English mathematicians, on the contrary, maintain them to be as the velocities themselves to the quantity of matter. See **QUANTITY**.

VELORE, a town of Indostan, on the Carnatic, 90 miles W. of Madras.

(1.) * **VELVET**. *adj.* 1. Made of velvet.—

This was moulded on a porringer,
A velvet dish. *Shak.*

2. Soft; delicate.—

Through the velvet leaves the wind,
All unseen, 'gan passage find. *Shak.*

Then being alone,
Left and abandon'd of his velvet friends;
'Tis right quoth he: thus misery doth part
The flux of company. *Shak.*

In distant wilds, by human eyes unseen,
She rears her flow'rs, and spreads her velvet
green. *Young*

(2.) * **VELVET**. *n. f.* [*veluto*, Ital. *villus*, Lat. *velours*, Fr.] Silk with a short fur or pile upon it.—

Clad in white velvet all their troops they led.
Dryden.

—Velvet, watered silk. *Locke*.

(3.) **VELVET**, a rich kind of stuff, all silk, covered on the outside with a close, short, fine, soft shag, the other side being a very strong close tissue. The nap or shag, called also the *velveting*, of this stuff, is formed of part of the threads of the warp, which the workman puts on a long narrow channelled ruler or needle, which he afterwards cuts by drawing a sharp steel tool along the channel of the needle to the ends of the warp. The principal and best manufactories of velvet are in France and Italy, particularly in Venice, Milan,

Milan, Florence, Genoa, and Lucca; there are others in Holland, set up by the French refugees; whereof that at Haerlem is the most considerable; but they all come short of the beauty of those in France.

* *To VELVET. v. n.* To paint velvet.—Verdure is good to velvet upon black in any drapery. *Peacocks.*

VELVETSTOWN, a town of Ireland in Cork, Munster.

VELUM PALATI. See PALATE, § 2.

VELURE. *n. f.* [*velours*, Fr.] Velvet. An old word.—A woman's crupper of *velure*. *Shak.*

VENA, mountains of Carniola, on the borders of Istria, S. of lake Czernie.

VENAFRO, a town of Naples, on the Volturno, 27 miles W. of Capua, and 43 N. of Naples. Lon. 14. 19. E. Lat. 43. 32. N.

VENAFRUM, in ancient geography, a town of Campania, founded by Diocorides.

VENAISSIN, a ci-devant county of France, lately belonging to the pope, now annexed to the empire, and included in the department of the Drome. CARPENTRAS is the capital.

(1.) * *VENAL. adj.* [*venal*, Fr. *venalis*, Lat.] 1. Mercenary; prostitute.—

This verse be thine, my friend, nor thou refuse

This, from no *venal* or ungrateful muse. *Pope.*
2. [from *vein*.] Contained in the veins. A technical word.—*Penal* blood. *Ray.*

(2.) *VENAL*, or *VENOUS*, in anatomy, something that bears a relation to the veins.

* *VENALITY. n. f.* [*venalité*, Fr. from *venal*.] Mercenariness; prostitution.

(1.) *VENASQUE*, a town of France, in the above county of which it was the capital, on the Nasque; 14 miles NE. of Avignon, and 12 NW. of Apt.

(2.) *VENASQUE*, a town of Spain, in Arragon, on the Eßora; 42 miles NE. of Jaca.

* *VENATICK. adj.* [*venaticus*, Latin.] Used in hunting.

* *VENATION. n. f.* [*venatio*, Latin.] The act or practice of hunting.—The manner of their *venation* we shall find to be otherwise than by sawing away of trees. *Brown.*

VENCATIGHERY, a town of Hindoostan, in Myfore; 54 miles W. of Arcot.

VENCE, a town of France in the dep. of Var, 6 miles NE. of Grasse, N. of Antibes.

* *To VEND. v. a.* [*vendre*, Fr. *vendo*, Latin.] To sell; to offer to sale.—He expected to *vend* them. *Boyle.*

(1.) *VENDEE*, a dep. of France, bounded on the N. by those of Lower Loire, and Maine and Loire; on the E. by that of the two Sevrès; on the S. by that of the Lower Charente; on the SW. and W. by the sea. It is 60 miles long; on the W. 15 from N. to S. elsewhere about 50. It contains a part of the ci-devant prov. of Poitou. FONTENAY is the capital. Being much frequented by royalists, it suffered much during the revolution.

(2.) *VENDEE*, a river of France, which rises 8 miles NE. of Fontenay, runs through the above department, to which it gives name, and falls into the Sevrè, a mile from Marano.

(3.) * *VENDER. n. f.* [from *vend*.] One to whom any thing is sold.—If he sells his corn and the *vender* cuts it. *Ayliffe.*

VENDELOS, a town of Ceylon.

(1.) *VENDEN*, a mountain of Tirol.

(2.) *VENDEN*, a town of Russia, in Riga, on the Aa.

* *VENDER. n. f.* [*vendeur*, Fr. from *vend*.] A seller.—Where the consumption of commodity is the *venders* eat themselves. *Graunt.*—*Venders* of card-matches. *Addison.*

VENDEVIL, a town of France in the dep. of Aisne; 3 miles N. of Fere.

* *VENDIBLE. adj.* [*vendibilis*, Latin.] Saleable; marketable.—

Silence only is commendable

In a neat's tongue dried, and a maid not *vendible*. *Shak.*

—Profitable and *vendible* merchandize. *Carew.*—A metal *vendible* under a determinate name. *Boyle.*

* *VENDIBLENESS. n. f.* [from *vendible*.] The state of being saleable.

* *VENDIBLY. adv.* [from *vendible*.] In a saleable manner.

* *VENDITATION. n. f.* [*venditatio*, from *vendito*, Latin.] Boastful display.—Some by a cunning protestation against all reading, and *venditation* of their own natural, think to divert the sagacity of their readers from themselves, and cool the scent of their own fox-like thefts, when yet they are so rank as a man may find whole pages together usurped from one author. *Ben Jonson.*

* *VENDITION. n. f.* [*vendition*, Fr. *venditio*, Latin.] Sale; the act of selling.

VENDŒUVRES, a town of France, in the dep. of Aube: 10½ miles W. of Bar, and 15 E. of Troyes.

(1.) *VENDOME*, a town of France, in the dep. of Loire and Cher. In 1562 it was taken by the protestants, but was pillaged in 1586. It is seated on the Loire, 30 miles NE. of Tours, and 95 SW. of Paris. Lon. 1. 8. S. Lat. 47. 50. N.

(2.) *VENDOME*, Lewis Joseph, Duke of, a celebrated French general, was born in 1654. In 1697, he took Barcelona. In 1702 he superseded Villeroi in Italy, and gained several victories over the imperialists. In 1765 he defeated Prince Eugene at Cassano, and was on the point of taking Turin, when he was sent to Flanders, and there defeated by Marlborough. He then went to Spain, restored Philip to his capital, and took the English army under Lord Stanhope prisoners. He died in Spain in 1712.

VENDRE, a town of France, in the dep. of Eastern Pyrenees.

VENDREL, a town of Spain, in Catalonia; 25 miles WSW. of Barcelona, and 12 SSE. of Perpignan.

VENDRESS, a town of France, in the dep. of the Ardennes; 3 miles S. of Charleville.

VENEDI, an ancient people of Germany, near the Gulf of Dantzig.

* *To VENEER. v. a.* [among cabinet-makers.] To make a kind of marquetry or inlaid work, whereby several thin slices of fine woods of different

nt forts are fastened or glued on a ground of
 common wood. *Bailey.*

VENEERING, *part. n. f.* **VANERING**, or
venering, a kind of marquetry, or inlaying,
 whereby several thin slices or leaves of fine wood,
 of different kinds, are applied and fastened on a
 round of some common wood. There are two
 kinds of inlaying: the one, which is the more
 ordinary, is only making compartments of differ-
 ent woods; the other requires much more art,
 and represents flowers, birds, and the like figures.
 The first kind is what we properly call *veneing*,
 or the latter see **MARQUETRY**. The wood in-
 tended for veneering is first sawed out into slices
 or leaves, about a line thick. To saw them, the
 blocks or planks are placed upright in a kind of
 ice or sawing press. These slices are afterwards
 cut into slips, and fashioned according to the de-
 sign proposed; then the joints being carefully ad-
 justed, and the pieces brought down to their
 proper thickness, with several planes for the pur-
 pose, they are glued down on a ground or block
 of dry wood. The pieces thus joined and glued,
 he work, if small, is put in a press; if large, it
 is laid on the bench, covered with a board, and
 pressed down with poles, or pieces of wood, one
 end whereof reaches to the ceiling of the room,
 and the other bears on the boards. When the
 glue is quite dry, they take it out of the press and
 finish it; first with little planes, then with divers
 scrapers, some whereof resemble rasps, which
 take off dents, &c. left by the planes. When suf-
 ficiently scraped, the work is polished with seal-
 skin, wax, and a brush and polisher of shave-grass,
 which is the last operation.

* **VENEFICE**. *n. f.* [*veneficium*, Latin.] The
 practice of poisoning.

* **VENEFICIAL**. *adj.* [from *veneficium*, Latin.]
 Acting by poison; bewitching.—The magical vir-
 tues of misseitol, and conceived efficacy unto *ve-
 neficial* intentions, seemeth a pagan relique, de-
 rived from the ancient Druids. *Brown.*

* **VENEFICIOUSLY**. *adv.* [from *veneficium*,
 Latin.] By poison or witchcraft.—Left witches
 should draw or prick their names therein, and
veneficiously mischief their persons, they broke the
 shell. *Brown.*

* **VENEMOUS**. *adj.* [from *venin*, Fr.] Poison-
 ous. Commonly, though not better, *venomous*.
 —The barbarians saw the *venemous* beast hanging
 at his band. *As. xvii. 4.*

* **To VENENATE**. *v. a.* [*veneno*, Latin.] To
 poison; to infect with poison.—To *venenate* the
 blood. *Harvey.*—By calcination, the *venenate* parts
 are carried off. *Woodward.*

* **VENENATION**. *n. f.* [from *venenate*.] Poi-
 son; venom.—This *venenation* shoots from the eye,
 and this way a basilisk may poison. *Brown.*

* **VENENE**. *adj.* [*veneneus*, Fr. from *ve-*

* **VENENOSE**. *adj.* [*venenum*, Lat.] Poisonous; ve-
 nemous.—*Venene* bodies. *Harvey.*—Some *venenose*
 liquor, which infects shed upon leaves. *Rap.*

* **VENERABLE**. *adj.* [*venerabilis*, Fr. *venerabilis*,
 Lat.] To be regarded with awe; to be treat-
 ed with reverence.—Did thereby make the places
 where they died *venerable*. *Hooker.*—

To make the passage easy, safe, and plain,
 That leads us to this *venerable* wall.

Fairfax.
 Ye lamps of heaven, he said, and lifted high
 His hands, now free; thou *venerable* sky!
 Inviolable powers, ador'd with dread,
 Be all of you adjur'd. *Dryd.*

* **VENERABLY**. *adv.* [from *venerable*.] In a
 manner that excites reverence.—

The Palatine, proud Rome's imperial seat,
 An awful pile! stands *venerably* great:
 Thither the kingdoms and the nations come.

Addison.
 * **To VENERATE**. *v. a.* [*veneror*, Fr. *veneror*,
 Lat.] To reverence; to treat with veneration; to
 regard with awe.—

The shrine is that which thou dost *venerate*.
 And not the beast which bears it on its back.

Herbert.
 The lords and ladies here approaching paid
 Their homage, with a low obeisance made,
 And seem'd to *venerate* the sacred shade.

Dryden.
 —A good clergyman must love and *venerate* the
 gospel. *Clarissa.*—

Even the peasant dares these rights to scan,
 And learns to *venerate* himself as man.

Goldsmith.
 * **VENERATION**. *n. f.* [*veneration*, Fr. *veneratio*,
 Lat.] Reverend regard; awful respect.—
 The honour and *veneration* of the Creator. *Locke.*
 —Awe and *veneration*. *Addison.*

* **VENERATOR**. *n. f.* [from *venerare*.] Reve-
 rencer.—*Venerators* of nature. *Hale.*

(1.) * **VENEREAL**. *adj.* [*venereus*, Lat.] 1. Re-
 lating to love.—

These are no *venereal* signs. *Shak.*
 Vengeance is in my heart, death in my hand.

Shakespeare.
 Then sworn with pride, into the snare I fell
 Of fair fallacious looks, *venereal* train
 Soften'd with pleasure, and voluptuous life.

Milton.
 —They are averse to *venereal* pleasure. *Add.*—*Ve-
 nereal* distempers. *Blackm.* 2. Consisting of cop-
 per, called *venus* by chemists.—Vitriol, how *ve-
 nereal* and unsophistical however. *Boyle.*

(2.) **VENEREAL**, in medicine, belonging to *vene-*
 ry; as the lues *venerea*, &c. See **MEDICINE**, *Ind.*

* **VENEREOUS**. *adj.* [from *venery*.] Libidinous;
 lustful.—The male is very *venereous*. *Derk.*

VENERIE, a town of the French empire, in
 the dep. of the Po, and late Piedmontese, with a
 palace built by Emmanuel II, in which are car-
 ried on silk and woollen manufactures. It is 3
 miles NNW. of Turin.

VENERONI, John, was born at Verdun. He
 taught Italian at Paris; and, to pass for a Floren-
 tine, he changed his name to *Vigneron*. He was
 the author of an Italian Grammar, Dictionary,
 &c.

* **VENERY**. *n. f.* [*venerie*, from *vener*, Fr.] 1.
 The sport of hunting.—And follows other game,
 and *venery*. *Spenser.*—Beasts of *venery* and fishes.
Brown.—To make the new forest fitter for his
 pleasure and *venery*. *Howel.* 2. [From *Venus*.]
 The

The pleasures of the bed.—Lawful *venery*. *Grew*.

(1.) * **VENESECTIO**. *n. f.* [*vena* and *sectio*, Latin.] Blood-letting; the act of opening a vein; phlebotomy.—If the inflammation be sudden, after evacuation by purgatives, or a clyster and *venesection*, have recourse to anodynes. *Wifeman*.

(2.) **VENESECTIO**. See **SURGERY**, *Index*.

VENETI, a people of Italy, in Cisalpine Gaul, near the mouths of the Po. They were descended from a nation of Paphlagonia, who settled there under Antenor, some time after the Trojan war. See **NAVIGATION**, § 9.

(1.) **VENETIAN**, *adj.* Of or belonging to Venice.

(2.) **VENETIAN BOLE**, a fine red earth used in painting, and called in the colour shops *Venetian red*. It is dug in Carinthia.

VENETIANO, Dominic, a Venetian painter, who introduced oil painting into Italy, but communicating the secret to Castagno, he was murdered by him, that he might have the secret to himself.

* **VENEY**. *n. f.* [*venez*, Fr.] A bout; a turn at fencing.—Playing at sword and dagger, three *venezes*, for a dish of stewed prunes. *Shak*.

(1.) **VENEZUELA**, a province of S. America, in Terra Firma; bounded on the N. by the Gulf of Mexico, S. by New Granada, E. by Cumana, and W. by Hacha. It is very fertile, in corn, cotton, sugar, fruits, cocoa nuts, &c.

(2.) **VENEZUELA**, the capital of the above province, on a bay so named. Lon. 68. 50. W. Lat. 10. 35. N.

VENGAMBOUR, a town of Hindoostan in Mysore, 17 miles SE. of Errood.

VENGAPALEAM, a town of Hindoostan, in Mysore; 11 miles NNW. of Daraporum.

* **To VENGE**. *v. n.* [*wenger*, Fr.] To avenge; to punish.—

You are above,

You justices, that these our nether crimes

So speedily can *venge*. *Shak*.

* **VENGABLE**. *adj.* [from *venge*.] Revengeful; malicious.—

A thrilant dart he threw,

Headed with ire, and *vengeable* despite.

Spenser.

* **VENGANCE**. *n. f.* [*vengeance*, Fr.] 1. Punishment; penal retribution; avengement.—To perjury *vengeance* is due. *Hooker*.—

All the stor'd *vengeances* of heaven fell

On her ungrateful top. *Shak*.

—To morrow's *vengeance* on the head of Richard. *Shak*.—Let me see thy *vengeance* on them. *Jerem*.

—*Vengeance* for former miscarriages. *K. Charles*.—

Jove and Latona's son his wrath exprest'd,

In *vengeance* of his violated priest. *Dryden*.

—The chorus implored *vengeance* on the criminal. *Addison*.—

Round him a crowd of threat'ning furies
stands

With instruments of *vengeance* in their hands.

Harte.

2. It is used in familiar language. *To do with a vengeance* is to do with vehemence. This phrase was formerly solemn and dignified; *what a vengeance*, emphatically *what* ?—

x

Till the day of respiration to the just

And *vengeance* to the wicked. *Milton*.
—The pope could teach him his duty with a *vengeance*. *Ral*.—

And with a *vengeance* sent. *Milton*.

But what a *vengeance* makes thee fly,

From me too as thine enemy. *Hudibras*.

VENGEFUL. *adj.* [from *vengeance* and *full*.] Vindictive; revengeful; retributive.—

Doubt not but God

Hath wiselier arm'd his *vengeful* ire. *Milt*.

Dissembling for her sake his rising care,

And with wise silence pond'ring *vengeful* wars.

Prior.

VENHUYSEN, a town of Holland, in the dep. of the Texel, and late province of N. Holland; 4 miles SW. of Enckhuysen.

* **VENIABLE**. } *adj.* [*veniel*, Fr. from *venia*,

* **VENIAL**. } *Lat.* 1. Pardonable; susceptible of pardon; excusable.—

If they do nothing, 'tis a *venial* slip. *Shak*

—More *veniable* is a dependence upon potable gold. *Brown*.—

What horror will invade the mind,

When the strict judge who would be kind

Shall have few *venial* faults to find. *Reform*.

—I should rally the world out of indecencies and *venial* transgressions. *Addison*. 2. Permitted; allowed.—

No more of talk where God, or angel-guest,

With man as with his friend, familiar used

To fit indulgent, and with him partake

Rural repast; permitting him the while

Venial discourse unblam'd

Milton.

* **VENIALNESS**. *n. f.* [from *venial*.] State of being excusable.

(1.) **VENICE**, a celebrated city of Maritime Austria, and capital of a ci-devant republic of the same name, situated on the Lagunes or Small Islands, about 5 miles from the continent. It was founded about A. D. 451 or 452; when Attila, having destroyed the cities of Aquileia, Verona, Mantua, Treviso, &c. such of the inhabitants as escaped the slaughter fled to the islands on their coast, and there took up their residence. Historians are profuse in their commendations of the virtue of the Venetians during the infancy of their city. Nothing remarkable, however, occurs in the history of Venice for some time, excepting the change of government from the consular to the tribunitary form, which happened about 30 years after the building of the city. The republic first began to be of consequence after the destruction of Padua by the Lombards. About this time they were become masters of a fleet and a body of land forces. They engaged in a quarrel with the Lombards, and soon after distinguished themselves against the Ilirian pirates, who had committed depredations on their coasts; and the Tergestines or inhabitants of Trieste, who had suddenly carried off a number of the citizens of Venice. The city very soon arrived at a high pitch of affluence and power. In the war carried on by Justinian with the Goths in Italy, the Venetians gave considerable assistance to Narfes the Roman general, who expressed his gratitude by several rich presents, and by building two fine churches dedicated to the saint's Theodore and Germinian; the

the

the oldest public buildings, beside St Mark's and St Peter's, in Venice. From the time of Justinian to A. D. 697, historians are silent with regard to the Venetian affairs. A great revolution then took place in the government; the tribunes, having abused their power, were abolished; and in their stead was elected a *doge* or duke, in whom was vested the supreme authority. He was to represent the honour and majesty of the state; to have respect and distinction paid him beyond what the tribunes, or even the consuls, enjoyed; he was to assemble and preside at the great council; to have casting vote in all disputed points; to nominate to all offices, places, and preferments; and lastly, to enjoy the same authority in the church as in the state. Paul Anastasius Paoluccio was the first *doge*. He died in 717. This form of government was changed in 737, and a supreme magistrate chosen, with the title of *master of the horse* or *general of the forces*. His power was to continue only for a year, the shortness of its duration being thought a security against the abuse of it. But in five years afterwards the doges were restored, and John Fabricio, the 4th and last master of the horse, was deposed, and his eyes put out. Under the doges, the power and wealth of the Venetian republic continued to increase. In 764 the Heraclians and Jesulans, subjects to the republic, having formed some designs against the state, put themselves under the protection of Charlemagne. That conqueror, not finding it convenient to give them present assistance, settled them in Malamocco, until he could give them more effectual succour. The Venetians, however, disregarding the protection of that powerful monarch, attacked and instantly drove them out of Malamocco. Incensed at this, Charlemagne ordered his son Pepin to declare war against the republic. This was done; but the blow was for some time diverted by Astolphus king of the Lombards, who, committing great devastations in the territories of the pope, obliged Pepin to come to the assistance of his holiness. However, after having afforded the necessary succour to the pope, Pepin prosecuted the war with Venice. Upon which the Venetians declared themselves a free and independent state. But in 804 the war was renewed with the utmost fury. Pepin having quarrelled with Nicephorus the Greek emperor, and finding Obelerio the Venetian doge inclined to favour his adversary, he determined to exterminate the very name of the republic. After having laid waste the surrounding province, he led his army directly to Venice, blocking the city up at the same time by his fleet. The Venetians united and gave the chief command to Valentin, as Obelerio was supposed too nearly allied to Pepin to fight with that good-will and cheerfulness the service of his country required. The Venetians, notwithstanding the most obstinate defence, were at length reduced to that part of the city S. of the Rialto. While Pepin was preparing to lay a bridge over the canal, they resolved, as a last effort, to attack his fleet. Embarcating all the troops they could spare, they succeeded in driving the enemy's fleet aground, and the greater part of their troops perished in attempting to escape; the ships were all, to a few,

either taken or destroyed. During this action at sea, Pepin, having thrown a bridge over the Rialto, was attacked on every side by the Venetians from their boats and others who had posted themselves on the bridge. The battle was long, bloody, and doubtful, until the Venetians succeeded in breaking down the bridge; when all communication being cut off with the troops on shore, the French were to a man either killed or drowned. Pepin was so struck with the intrepidity of the Venetians, that he raised the siege, abandoned the enterprise, and concluded a peace with the republic. He afterwards came to Venice to intercede for Obelerio; but the populace being persuaded that he had acted treacherously, Pepin was no sooner gone than they tore him and his wife to pieces, though she was Pepin's sister. In 839, the Venetians engaged in an alliance offensive and defensive against the Saracens, with Michael III. the Greek emperor. A fleet of 60 galleys was immediately equipped, who joined the Grecian fleet and engaged the enemy; but during the heat of the engagement, the Greeks having basely deserted their allies, the Venetians were so completely defeated, that scarce a single vessel remained to carry the news of their misfortune to Venice. This defeat threw the city into the utmost consternation, as it was not doubted that the Saracens would immediately lay siege to the capital; instead of which they turned their arms against Ancona, which they pillaged and destroyed. The Narentines, however, a piratical people, no sooner heard of the defeat of the Venetians, than they laid waste the coasts of Dalmatia, and ravaged the country for a considerable way; at the same time that the city was distracted by internal dissensions and tumults, in one of which the doge was murdered. It was not till the year 884 that the Venetian affairs were thoroughly re-established. By the prudent and vigorous administration of Orso Participato the power of the Saracens was checked, the Narentines utterly defeated, and peace and domestic tranquillity restored. From this time the republic continued to flourish; and in 903 her reputation for arms became famous all over the world by a great victory gained over the Hungarians, who had invaded Italy, defeated Berengarius, and threatened the country with total destruction. For a long time after, we meet with no remarkable transactions in the Venetian history; but in general the republic increased in wealth and power by its indefatigable application to maritime affairs and to commerce. About the year 1040 it was ordained that no prince should associate a colleague with him in the supreme power. In 1084 the republic was, by the emperor of Constantinople, invested with the sovereignty of Dalmatia and Croatia, which, however, had been held long before by right of conquest. As soon as the Crusade was preached up, the Venetians fitted out a fleet of 200 sail against the infidels; but before this armament was in a condition to put to sea, war broke out with Pisa. The doge Vitalis Michael took upon him the command of the fleet, when, after having defeated the Pisans in a bloody action at sea, he set sail for Smyrna, and from thence to Acalan, at that time be-

B e e e sieged

sieged by the Christians. To his valour was owing the conquest of this city, as well as those of Caïpha and Tiberias; but before he had time to push his good fortune further, he was recalled on account of an invasion by the Normans of Dalmatia. Here he was equally successful: the Normans were everywhere defeated; and Michael returned home loaded with booty; but died soon after, to the great grief of all his subjects. He was succeeded by Ordelfapho Faliero, under whom the Venetians assisted Baldwin in the siege of Ptolemais, and were the chief instruments of its conquest; and Baldwin, in recompense for the services of the republic, invested her with the sovereignty of that city, which he endowed with many extraordinary privileges, to render his present more valuable. This good fortune, however, was overbalanced by a rebellion in Dalmatia and Croatia. The former was reduced; but, in a battle with the Croats, the doge was killed, and his army entirely defeated: by which disaster the Venetians were so much dispirited, that they made a peace on the best terms they could, giving up all thoughts of Croatia for the time. Under the government of Dominico Micheli, who succeeded Ordelfapho, the pope's nuncio arrived at Venice, and excited such a spirit of enthusiasm among all ranks and degrees of men, that they strove whose names should be first enrolled for the holy war. The doge, having fitted out a fleet of 60 galleys, sailed with it to Joppa, which the Saracens were then besieging. The garrison was reduced to the last extremity when the Venetian fleet arrived, surprised, and defeated that of the enemy with great slaughter; soon after which the Saracens raised the siege with precipitation. Tyre was next besieged, and soon was obliged to capitulate; on which occasion, as well as on the taking of Ascalon, the Venetians shared two-thirds of the spoils. But in the mean time the emperor of Constantinople, jealous of the increasing power and wealth of the republic, resolved to make an attack upon Venice, now weakened by the absence of the doge and such a powerful fleet. But the senate, having timely notice of the emperor's intentions, recalled the doge, who instantly obeyed the summons. Stopping at Rhodes, in his way home, to refresh and water the fleet, the inhabitants refused to furnish him with the necessaries he demanded. Incensed at this denial, he levelled their city with the ground; and from thence sailing to Chios, he laid waste and destroyed the country, carrying off the body of St Iodore, in those days accounted an inestimable treasure. After this he seized on the Islands of Samos, Lesbos, Andros, and all those in the Archipelago belonging to the emperor; and having reduced ZARA, Spolatra, and Trachu, places in Dalmatia which had revolted during his absence, he returned in triumph to Venice, where he was received with great joy. The Venetians now became very formidable throughout all Europe. The Sicilians, Paduans, with the states of Verona and Ferrara, felt the weight of their power; and in 1173 they ventured to oppose Frederic Barbarossa, emperor of Germany. The occasion of this quarrel was, that pope Alexander had taken shelter in Venice to avoid the resentment of Barbarossa, who had conceived an implacable a-

version against him, and threatened destruction to their city if they did not give him up. On this terrible menace, it was agreed to equip a fleet, and repel the attacks of such a formidable and haughty enemy. But before the armament could be prepared, Otho, the emperor's son, arrived before the city with a fleet of 75 galleys. The doge Sebastiano Ziani sailed out with the few vessels he had got equipped, to give the enemy battle. The fleets met off the coast of Istria, and a terrible engagement ensued, in which the imperial fleet was totally defeated, Otho himself taken prisoner, and 48 of his ships destroyed. On the doge's return, the pope went out to meet him, and presented him with a ring, saying, "Take this; Ziani, and give it to the sea, as a testimony of your dominion over it. Let your successors annually perform the same ceremony, that posterity may know that your valour has purchased this prerogative, and subjected this element to you, even as a husband subjecteth his wife." Otho was treated with the respect due to his rank; and soon conceived a great friendship for Ziani. At last, being permitted to visit the imperial court on his parole, he not only prevailed on his father to make peace with the Venetians, but even to visit their city, so famed for its commerce and naval power. He was received with all possible respect, and on his departure attended to Ancona by the doge, the senate, and the whole body of the nobility. During this journey, he was reconciled to the pope; and both agreed to pay the highest honours to the doge and republic. In the beginning of the 13th century, the Venetians, now become exceedingly powerful and opulent, by the commerce which they carried on with the richest countries of the world, were invited by young Alexis, son to the emperor of Constantinople, to his father's assistance, who had been deposed by a rebellious faction. In conjunction with the French, they undertook to restore him; and easily succeeded. But the old emperor dying soon after, his son was elected in his room, and a few days after murdered by his subjects; on which the empire was seized by Myrtillus, a man of mean birth, who had been raised by the favour of old Alexis. As the allied army of French and Venetians was encamped without the city, Myrtillus resolved immediately to drive them out of his dominions, and for this purpose attempted to surprise their camp; but being repulsed, he stood himself up in the city, with a resolution to stand a siege. The allies assaulted it with so much vigour, that the usurper was obliged to fly; and though the citizens held out after his departure, they were obliged in less than three months to capitulate. This proved a source of greater acquisition to Venice than all that had yet happened. All the chief offices of the city were filled up with Venetians, in recompense for their services; the allies entered Thrace, and subdued it; Candia, and all the Greek islands, also fell under the dominion of the republic. In the mean time the Genoese, by their successful application to commerce, having raised themselves in such a manner as to be capable of rivaling the Venetians, a long series of wars took place between the republics; in which the Venetians generally had the advantage, though sometimes they met

met with terrible overthrows. These expensive and bloody quarrels undoubtedly weakened the republic, notwithstanding its successes. In 1348, however, the Genoese were obliged to implore the protection of Visconti duke of Milan, to support them against their implacable enemies the Venetians. Soon after this, in 1352, the latter were utterly defeated, with such loss, that it was thought the city itself must have fallen into the hands of the Genoese, had they known how to improve their victory. This was in a short time followed by a peace; but from this time the power of the republic began to decline. Continual wars with the states of Italy, with the Hungarians, and their own rebellious subjects, kept the Venetians employed so that they had no leisure to oppose the Turks, whose rapid advances ought to have alarmed all Europe. After the destruction of the eastern empire, the Turks came more immediately to interfere with the republic. The consequences are related under the article TURKEY, § 5. Whatever valour might be shown by the Venetians, or whatever successes they might boast of, it is certain that the Turks ultimately prevailed; so that for some time it seemed scarce possible to resist them. What contributed also greatly to the decline of the republic, was the discovery of a passage to the East Indies by the Cape of Good Hope, in 1497. To this time the greatest part of the East India goods imported into Europe passed through the hands of the Venetians; but as soon as the above-mentioned discovery took place, the carriage by the way of Alexandria almost entirely ceased. Still, however, the Venetian power was strong; and in the beginning of the 16th century they maintained a war against almost the whole power of France, Germany, and Italy; but soon after we find them entering into an alliance with some Italian states and Henry IV. of France, against the emperor. These wars, however, produced no consequences of any great moment; and in 1573 tranquillity was restored by the conclusion of a peace with the Turks. Nothing of consequence happened in the affairs of the Venetian republic till 1645, when the Turks made a sudden and unexpected descent on the island of Candia. The senate of Venice did not display their usual vigilance on this occasion. They had seen the immense warlike preparations going forward, and yet allowed themselves to be amused by the grand seignior's declaring war against Malta, and pretending that the armament was intended against that island. The troops landed without opposition; and the town of CANEA was taken, after an obstinate defence. This news being brought to Venice excited an universal indignation against the Turks; and the senate resolved to defend to the utmost this valuable part of the empire. Extraordinary ways and means of raising money were fallen upon; among others, it was proposed to sell the rank of nobility. Four citizens offered 100,000 ducats each for this honour; and, notwithstanding some opposition, this measure was at last carried. Eighty families were admitted into the grand council, and to the honour and privileges of the nobility. The siege of CANDIA, the capital of the island of that name, is, in some respects, more memorable than that of

any town which history has recorded. It lasted 24 years. The amazing efforts made by the republic of Venice astonished all Europe; their courage interested the gallant spirits of every nation: volunteers from every country came to Candia to exercise their valour, to acquire knowledge in the military art, and assist a brave people whom they admired. During this famous siege, the Venetians gained many important victories over the Turkish fleet. Sometimes they were driven from the walls of Candia, and the Turkish garrison of Canea was even besieged by the Venetian fleets. Great slaughter was made of the Turkish armies; but new armies were soon found to supply their place. Mahomet IV. impatient at the length of this siege, came to Negropont, that he might have more frequent opportunities of hearing from the vizir, who carried on the siege. This war cost the lives of 100,000 Turks. Candia capitulated in 1668. The conditions were honourably fulfilled. Morfini, the Venetian general, marched out of the rubbish of this well-disputed city with the honours of war.—The expence of such a tedious war greatly exhausted the resources of Venice, which could not now repair them so quickly as formerly, when she enjoyed the rich monopoly of the Asiatic trade. This republic remained in a state of tranquillity, endeavouring, by the arts of peace, and cultivation of that commerce which she still retained, to fill her empty exchequer, till she was drawn into a new war, in 1683, by the insolence of the Ottoman court. The Venetians had for some time endeavoured, by negotiation and many conciliatory representations, to accommodate matters with the Turks; and though the haughty conduct of their enemies afforded small hopes of success, yet such was their aversion to war, that they still balanced, whether to bear those insults or repel them by arms; when they were brought to decision by an event which gave the greatest joy to Venice, and astonished all Europe. This was the great victory gained over the Turkish army before the walls of Vienna, by Sobieski, king of Poland. In this new war, their late General Morfini again had the command of the fleets and armies of the republic, and sustained the great reputation he had acquired in Candia. He conquered the Morea, which was ceded formally to Venice, with some other acquisitions, at the peace of Carlowitz, in 1699. During the war of the succession, the state of Venice observed a strict neutrality. They considered that dispute as unconnected with their interests, taking care, however, to keep on foot an army on their frontiers in Italy, of sufficient force to make them respected by the contending powers. But, soon after the peace of Utrecht, the Venetians were again attacked by their old enemies the Turks; who, beholding the great European powers exhausted by their late efforts, and unable to assist the republic, thought this the favourable moment for recovering the Morea, which had been so lately taken from them. The Turks obtained their object; and at the peace of Passarowitz, which terminated this unsuccessful war, the Venetian state yielded up the Morea; the grand seignior, on his part, restoring to them the small islands of Cerigo and Cerigotto, with some places which his

E e e 2 troops

groups had taken during the course of the war in Dalmatia. Those, with the islands of Corfou, Santa Maura, Zante, and Cephalonia, now form the republic of the SEVEN ISLANDS. By the treaty of Campo Formio, in 1797, the whole Venetian States were ceded to the emperor Francis II. and crested into the province of MARITIME AUSTRIA. VERONA, on the right of the Adige, alone was annexed to the CISALPINE REPUBLIC. The whole Venetian state now makes part of the ITALIAN KINGDOM.

(2.) VENICE, the capital, appears at a distance very striking, looking like a great town half floated by a deluge. Betwixt the city and the Terra Firma are a great many shallows, on which at low water you may almost every where touch the bottom with a pole; but all possible care is taken to prevent their becoming dry land. On the S. side of the city are also shallows; but on these there is a greater depth of water. The channels betwixt them are marked out by stakes or poles, which on the approach of an enemy would certainly be taken away. The city is divided by a vast number of canals, on which ply the gondoliers, or watermen, in their black gondolas or boats. The streets are very clean and neat, but narrow and crooked. There are no carriages, not so much as a chair, to be seen in them. Of the canals, that called *Il Canale Maggiore*, is by far the largest and longest, and consequently the most beautiful. Here races are sometimes run for prize in the gondolas. On its banks are also several state lyhouses. Over these canals are a great number of handsome bridges of one arch, but without any fence on either side: they are also built of white stone, with which the streets are all paved, except the Rialto over the great canal, which is all of marble, and cost the republic 250,000 ducats, the arch being 90 feet wide. The finest gondolas are those in which the foreign ministers make their public entries, being richly decorated with gilding, painting, and sculpture. The number of islands on which the city stands, according to some, is 60; according to others, 72. The circumference is about six Italian miles. The inhabitants are supposed to be about 150,000 including those of the islands Murano, Guidecca, and those who live on board the barges. The most remarkable places in the city are the ci-devant ducal palace, the square and church of St Mark, who is the tutelar saint of Venice; the mint, public library, grand arsenal, several of the palaces of the nobles, churches, convents, and hospitals. In these last is a prodigious collection of the finest paintings; Venice, in this respect, even surpassing Rome itself. But the finest and best of them were carried off to Paris by Bonaparte, in 1797, to enrich the National Museum, along with the famous *Laocoon*, &c. The diversions of the Venetians are chiefly masquerading, especially during the carnival and other festivals: ridottos, operas, plays, and concerts. During their festivals, debauchery, riot, and licentiousness, are carried to the greatest height: The square of St Mark is the greatest ornament of the city, and hath the form of a parallelogram. In this square, besides the church and palace of St Mark, are two towers, on one side of which is a curious clock; and the other has stairs so constructed that

one may ride up on horseback. Opposite to the ducal palace is the public library of the commonwealth: containing a large collection of books and MSS. with some fine paintings, statues, and curiosities. Hard by St Mark's square is the zecca, or mint. The grand arsenal is two and a half Italian miles in circuit, and contains vast quantities of naval and other warlike stores; here are the trophies of Scanderbeg and others, with the helmet of Attila, &c. The rope walk is 441 common paces in length, and the ropes and cables are valued at 2,000,000 of silver ducats. In the foundry none but brass cannon are cast; and 100 men are generally at work in the forges. The salt-petre works here deserve a traveller's notice: there is a vessel filled with wine and water four times a-day, where the workmen, though 1000 or more, may drink as much and as often as they please. Close to the Rialto is the bank. The trade of the city at present is far short of what it was formerly. Their chief manufactures are cloth; especially scarlet, silks, gold and silver stuffs, brocades, velvets, and paper, of which, and wine, oil, fruit, sweetmeats, anchovies, and several sorts of drugs used in physic and painting, the exports are still considerable. Venice has neither walls, gates, nor citadel. In the treasury of relics is the protocol, or original MS. as they pretend, of *St Mark's gospel*; it is rarely shown; and the writing, by length of time, is so defaced, that the greatest connoisseurs in MSS. cannot determine whether it was written in Greek or Latin. Besides what is properly called the city, there is a multitude of little islands lying round, which are covered with buildings, and make each of them a kind of separate town; the most considerable of which is that called *Giudecca*, or the "Jews Quarter," which is large and populous; with St Erasmo, St Helena, St Giorgio, Chioffa, Il Lido de Palestrina, Il Lido de Malamocco, and Murano; these islands are a sort of fence to the city, breaking the violence of the waves. To distinguish them from others, the Jews here must wear a bit of red cloth in their hats. The gardens in this city are few and inconsiderable. In the island of Murano are made those beautiful looking-glasses, and other glass-works, for which Venice is so much noted: here the family of Gornaro hath a palace, with a gallery of paintings, little short of an Italian mile in length. The salt-works in the island of Chioffa are of great benefit to the Venetians, and yield a very considerable revenue. There are several other small islands about Venice, but they are inconsiderable.

(3.) VENICE, GULF OF. See ADRIANUM.

(4.) VENICE, INHABITANTS OF. The Venetians are in general tall and well made. They are a lively ingenious people, extravagantly fond of public amusements, with an uncommon relish for humour, and yet more attached to the real enjoyments of life than to those which depend on ostentation. The women are of an easy address, and have no aversion to cultivating an acquaintance with those strangers who are properly recommended.

VENIRE FACIAS, in law, is a judicial writ lying where two parties plead and come to issue, directed to the sheriff, to cause 12 men of the same

same neighbourhood to meet and try the same, and to say the truth upon the issue taken.

* **VENISON.** *n. f.* [*venaison*, Fr.] Game; beast of chase; the flesh of deer. *Chapman* writes it as it is spoken, *venzon*.—

Shall we kill us *venison*?
And yet it irks me the poor dappled fools
Should have their round haunches gor'd. *Shak.*

We have a hot *venison* patty to dinner. *Shak.*
To our *venzon's* store.

We added wine, till we could wish no more,
Chapman.

—In the records of Ireland, there is no mention made of any park, though there be vert and *venison* within this land. *Darvies*.—

In equal portions with the *ven'son* shar'd.
Dryd.

VENIUS, OTHO, a celebrated Dutch painter, was born at Leyden, in 1556. He was the first, after Polydore Caravaggio, who reduced the claroscuro to a principle of the art of painting. He died at Brussels, 1634. He had also the honour of breeding up the famous Rubens in his art.

VENIZY, a town of France, in the dep. of Yonne, 3 miles N. of St Florentin.

VENLO, a town of the French empire, in the dep. of the Roer, and late duchy of Prussian Guelderland, on the E. bank of the Meuse, 10 miles SE. of Guelldres, 12 NNE. of Ruremond, and 25 NW. of Dusseldorp. It was taken by Gen. Jourdan on the 14th Oct. 1794. Lon. 25. 34. E. Per. Lat. 51. 27. N.

* **VENOM.** *n. f.* [*venin*, French.] Poison.—
Your eyes, which hitherto have borne in them

The fatal balls of murdering basilisks,
The *venom* of such looks we fairly hope
Have lost their quality. *Shak.*

Beware of yonder dog; for when he bites,
His *venom* tooth will wrangle to the death. *Shak.*

Like some tall tree, the monster of the wood,
O'er shading all that under him would grow,
He sheds his *venom* on the plants below. *Dryden.*

* **To VENOM.** *v. a.* To infect with venom; to poison; to envenom.

(1.) * **VENOMOUS.** *adj.* [from *venom*.] 1. Poisonous.—

Thy tears are saltier than a younger man's
And *venomous* to thy eyes. *Shak.*

2. Malignant; mischievous.—A *venomous* and destructive progeny. *Brown*.—A *venomous* writer. *Addison.*

(2.) **VENOMOUS SERPENTS.** See **SERPENT**, § 6-10. To the account there given, we shall here only add, that among the many venomous serpents which infest lake **ERIE**, in N. America, the most remarkable is that species called the *Hissing Snake*. It is about 18 inches long, small and speckled. When one approaches it, it flattens itself in a moment, and its spots, which are of various colours, become visibly brighter through rage; at the same time it blows from its mouth, with great force, a subtle wind, said to be of a nauseous smell; and, if drawn in with the breath of the unwary traveller, will infallibly bring on a decline, that in a few months will prove mortal.

No remedy has yet been found to counteract its baneful influence.

* **VENOMOUSLY.** *adv.* [from *venomous*.] Poisonously; mischievously; malignantly.—

These things sting him
So *venomously*, that burning shame detains him
From his Cordelia. *Shak.*

His praise of foes is *venomously* nice;
So touch'd it turns a virtue to a vice. *Dryden.*

* **VENOMOUSNESS.** *n. f.* [from *venomous*.] Poisonousness; malignity.

VENOSA, a town of Naples, in Basilicata.

(1.) * **VENT.** *n. f.* [*vente*, French.] 1. A small aperture; a hole; a spiracle; a passage at which any thing is let out.—

On her breast
There is a vent of blood, and something blown;
The like is on her arm. *Shak.*

They at once their reeds
Put forth, and to a narrow *vent* apply'd
With nicest touch. *Milton.*

—Have near the bung-hole a little *vent* hole stopp'd with a spile. *Mort.*—Scarce any countries that are annoyed with earthquakes that have not one of these fiery *vents* disgorgeing that fire, whereby it gains an exit. *Woodw.*—To draw any drink, be not at the trouble of opening a *vent*, or, if you take out the *vent*, stay not to put it in. *Swift.*—

Full o'er heads the swelling bag he rent,
And all the furies issued at the *vent*. *Pope.*

2. Passage out of secrecy to public notice.—The particular design took *vent* before hand. *Wotton.*

3. The act of opening.—

The farmer's cades mature,
Now call for *vent*; his lands exhaust, permit
T' indulge a-while. *Philips.*

4. Emission; passage.—

The smother'd fondness burns within him;
When most it swells and labours for a *vent*,
The sense of honour and desire of fame
Drive the big passion back into his heart. *Addison.*

5. Discharge; means of discharge.—

Had, like grief, been dew'd in tears,
Without the *vent* of words. *Milton.*

—Where a *vent* can be had. *Mortim.* 6. [*vente*, Fr. *venditio*, Latin.] Sale.—The *vent* for English cloaths. *Hayw.*—By this war there is no *vent* for any commodity. *Temple.*—The *vent* of that number. *Pope.*

(2.) **VENT**, in geography, a river of Cumberland, running in the S. Tyne.

(1.) * **To VENT.** *v. a.* [*venter*, French, from the noun; *sventare*, Italian.] 1. To let out at a small aperture. 2. To let out; to give way to.—

Hunger broke stone-walls, that the gods sent
not

Corn for the rich men only; with these fired
They *vented* their complainings. *Shak.*

—When men are young, and have little else to do, they might *vent* the overflowings of their fancy that way. *Denham.*—

Lab'ring thus with endless discontent,
The queen of heav'n did thus her fury *vent*. *Dryden.*

3. To utter; to report.—Had it been *vented* and imposed in some of the most learned ages, it might

might then with some pretence of reason, have been said to be the invention of some crafty statesman. *Stephens.* 4. To emit; to pour out.—

Revoke thy doom,

Or, whilst I can vent clamour from my throat
I'll tell thee thou dost evil. *Shak.*

5. To publish.—*Venting* the stolen treasures of divine letters. *Ral.* 6. To sell; to let go to sale.—The owners not *venting* and venturing the same. *Carver.*—Therefore did those nations *vent* such spice. *Raleigh.*

(2.) * *TO VENT. v. n.* To stuff; as, he *venteth* into the air. *Spenser.*

VENTA IENORUM, an ancient city of S. Britain, now called *Castor*. (See *CASTOR*, § II, N° 1.) The ruins of its walls contain a square of thirty acres, and exhibit four gates and towns. Urns, coins, &c. are dug up in it.

* *VENTAIL. n. f.* [from *ventail*, Fr.] That part of the helmet made to lift up. *Spenser.*

* *VENTANNA. n. f.* [Spanish.] A window.

What after pass'd

Was far from the *ventanna*, when I sate;
But you were near, and can the truth relate.

Dryden.

(1.) * *VENTER. n. f.* [Latin.] 1. Any cavity of the body, chiefly applied to the head, breast, and abdomen, which are called by anatomists the three *venters*. 2. Womb; mother.—*A* has issue *B* a son and *C* a daughter by one *venter*, and *D* a son by another *venter*. If *B* purchases in fee, and dies without issue, it shall descend to the sister, and not to the brother of the half blood. *Hale.*

(2.) *VENTER INSPICIENDO*, is a writ to search a woman that saith she is with child, and thereby with-holdeth lands from the next heir; the trial whereof is by a jury of women.

* *VENTIDUCT. n. f.* [*ventus* and *dustus*, Lat.] A passage for the wind.—Having been informed of divers *ventiducts*, I wish I had had the good fortune, when I was at Rome, to take notice of these organs. *Boyle.*

* *TO VENTILATE. v. a.* [*ventilo*, Latin.] 1. To fan with wind.—In close, low, and dirty alleys, the air is pent up, and obstructed from being *ventilated* by the winds. *Harv.*—Miners, by persiflations with large bellows, give free passage to the air, which *ventilates* and cools the mines. *Woodward.* 2. To winnow; to fan. 3. To examine; to discuss.—The same may be begun again, and *ventilated* de novo. *Ayliffe.*

* *VENTILATION. n. f.* [*ventilatio*, Lat. from *ventilate*.] 1. The act of fanning; the state of being fanned.—The soil, worn with too frequent culture, must lie fallow till it has recruited its exhausted salts, and again enriched itself by the *ventilations* of the air. *Addis.* 2. Vent; utterance. Not in use.—To his secretary doctor Mason, whom he let lie in a pallet near him for natural *ventilation* of his thoughts, he would break out into bitter eruptions. *Wotton.* 3. Refrigeration.—Procure the blood a free course, *ventilation* and transpiration. *Harvey.*

(1.) * *VENTILATOR. n. f.* [from *ventilate*.] An instrument contrived by Dr Hales to supply close places with fresh air.

(2.) *VENTILATOR. v. f.* a machine by which the noxious air of any close place, as an hospital,

gaol, ship, chamber, &c. may be discharged and changed for fresh. The noxious qualities of bad air have been long known; and no one has taken greater pains to set the mischiefs arising from foul air in a proper light than Dr Hales; who also proposed an easy and effectual remedy by the use of his ventilators; his account of which was read to the Royal Society in May 1741. In the November following, M. Triewald, military architect to the king of Sweden, informed Dr Mortimer, secretary to the Royal Society, that he had in the preceding spring invented a machine for the use of the king's men of war, to draw out the bad air from under the decks, the least of which exhausted 36,172 cubic feet of air in an hour, or at the rate of 21,732 tons in 24 hours. In 1742 he lent one of them, formed for a 60 gun ship to France; which was approved of by the Royal Academy of Sciences at Paris; and the king of France ordered all the men of war to be furnished with the like ventilators. The ventilators invented by Dr Hales consist of a square box ABCD (*Pl. CCCXXXVIII. fig. 1.*) of any size; in the middle of one side of this box a broad partition or midriff is fixed by hinges X, and it moves up and down from A to C, by means of an iron rod ZR, fixed at a proper distance from the other end of the midriff, and passing through a small hole in the cover of the box up to R. Two boxes of this kind may be employed at once, and the two iron rods may be fixed to a lever FG (*fig. 2.*) moving on a fixed centre O, so that by the alternate raising and pressing down of the lever FG, the midriffs are also alternately raised and depressed; whereby these double bellows are at the same time both drawing in air, and pouring it out, through apertures with valves made on the same side with, and placed both above and below, the hinges of the midriffs. In order to render the midriffs light, they are made of four bars lengthwise, and as many across them breadthwise, the vacant spaces being filled up with thin pannels of fir-board; and that they may move to and fro with the greater ease, and without touching the sides of the boxes, there is an iron regulator fixed upright to the middle of the end of the box AC (*fig. 1.*) from N to L, with a notch cut into the middle of the end of the midriff at Z; so that midriff, in the rising and falling, suffer no other friction than what is made between the regulator and the notch. Moreover, as the midriff ZX moves with its edges only 1-20th of an inch from the sides of the box ABCDEF, very little air will escape by the edges; and, therefore, there will be no need of leathern sides as in the common bellows. The end of the box at AC is made a little circular, that it may be better adapted between A and C to the rising and falling midriff; and at the other end X of the midriff a slip of leather may be nailed over the joints if needful. The eight large valves through which the air is to pass, are placed at the hinge end of the boxes BK (*fig. 2.*) as at 1, 2, 3, &c. The valve 1 opens inward to admit the air to enter when the midriff is depressed at the other end by means of the lever FG; and at the same time the valve 3 in the lower ventilator is shut by the compressed air which passes out of the valve 4. But when that midriff is raised, the valve 1 shuts, and

d the air passes out of the valve 2. And it is the same with the valves 3, 6, &c. of the other valves; so that the midribs are alternately rising and falling, and two of the ventilators drawing in air, and two blowing it out; the air entering at the valves 1, 3, 6, 8, and passing out at the valves 2, 5, 7. Before these last valves there is fixed to the ventilators a box QQ NM, (fig 9.), as a common receptacle for all the air which comes out of these valves; which air passes off by the trunk P, through the wall of a building. For a farther account of this machine we refer to the author himself, who gives a full detail of it and of its manner of working. See *Description of Ventilators by Stephen Hales, D. D. Lond. 1743, 8vo.* The ventilators in large ships, since the order for ventilating was first issued by the lords of the admiralty in 1756, are fixed in the gunner's fore-store room, and generally a-head of the sail-room. The foul air is carried up through the decks and fore-castle near the fore-mast, sometimes afore it; and sometimes bafit it, but more frequently on its starboard side; the lever, by which the ventilators are worked, is under the fore-castle in two-deck ships, and between the upper and middle decks in three-deckers; sometimes the lever is hung athwart ships; in some ships afore and aft, and in others oblique. The iron rod, which communicates the motion from the lever, passes through the partners of the fore-mast, and is connected with another lever, suspended at or near the middle; in some ships over the ventilators, in others under them, when it is found necessary to fix them up to the deck. The best method to save room is to place the ventilators over one another with their circular ends together; the air-trunk should be so high above the deck, that the men on deck may not be incommoded by the foul air which blows out of it; and therefore the trunk comes through the upper-deck, near and behind the fore-mast. For the method of freeing mines, ships, prisons, &c. from noxious air by means of fire pipes, see AIR-PIPES.

* VENTRICLE. *n. f.* [*ventricule*, French; *ventriculus*, Lat.] 1. The stomach.—While my heart beats, and my ventricle digests. *Hale.* 2. Any small cavity in an animal body, particularly those of the heart.—

Know'st thou how blood, which to the heart doth flow

Doth from one ventricle to the other go?

Donne.

—The fibres constringe the ventricles, and strong force out the blood. *Ray.*—The left ventricle of the heart. *Arbuthnot.*

VENTRILOQUISM, *n. f.* the art by which certain persons can so modify their voice, as to make it appear to the audience to proceed from any distance, and in any direction. Some faint traces of this art are to be found in the writings of the ancients; and it is the opinion of M. de la Chapelle, who in 1773 published an ingenious work on the subject, that the responses of many of the oracles were delivered by persons thus qualified to serve the purposes of priest-craft and delusion. As the ancient ventriloquists, when exercising their art, seemed generally to speak from their own bellies, the name by which they were

designed was abundantly significant; but it is with no great propriety that modern performers are called *ventriloquists*, and their art *ventriloquism*, since they appear more frequently to speak from the pockets of their neighbours, or from the roof or distant corners of the room, than from their own mouths or their own bellies.

* VENTRILOQUIST. *n. f.* [*ventriloque*, Fr. *venter* and *loquor*, Lat.] One who speaks in such a manner as that the sound seems to issue from his belly.

* VENTURE. *n. f.* [*aventure*, Fr.] 1. A hazard; an undertaking of chance and danger.—

When he reads

Thy personal venture in the rebel's fight,
His wonders and his praises do contend
Which should be thine or his. *Shak.*

—An irrational venture, and absurd choice. *South.*

I, in this venture, double gains pursue,
And laid out all my stock to purchase you.

Dryden.

—Who can run the venture? *Locke.* 2. Chance; hap.—Leave little to venture or fortune. *Bac.* 3. The thing put to hazard; a stake.—

My ventures are not in one bottom trusted,
Nor to one place. *Shak.*

Still we must take the current when it serves
Or lose our ventures. *Shak.*

Thrice happy you, that look as from the shore,

And have no venture in the wreck. *Daniel.*

4. At a VENTURE. At hazard; without much consideration; without any thing more than the hope of a lucky chance.—You have made an estimate of those lands at a venture. *Spens.*

A bargain at a venture made. *Hudibras.*

—Granted at a venture. *L'Estr.*—Scampering away at a venture. *L'Estr.*—Draws a bow at a venture. *South.*

(1.) * To VENTURE. *v. n.* [from the noun.] 1. To dare.—A man were better rise in his suit; for he that would have ventured at first to have lost the suitor, will not in the conclusion lose both the suitor and his own former favour. *Bacon.*—Origen ventures to assure them. *Addison.* 2. To run a hazard.—

Who freights a ship to venture on the seas.

Dryden.

—Dare hardly venture out. *Dryd.* 3. To VENTURE at. To venture on or upon. To engage in; or make attempts without any security of success, upon mere hope.—

That slander is found a truth now, and held for certain;

The king will venture at it.

Shak.

—It is too conjectural to venture upon. *Bacon.*—

And when I venture at the comic stile,
Thy scornful lady seems to mock my toil.

Waller.

—They but timorously ventured on such terms as aurietas and faxietas. *Locke.*—I would desire him to read, before he ventures at capping of characters. *Atterbury.*

(2.) * To VENTURE. *v. a.* 1. To expose to hazard.—In my school days, when I had lost one shaft, I shot his fellow of the self-same flight; by vent'ring both, I oft found both. *Shak.* 2. To put

or

or send on a venture.—The fish *ventured* for France they pack in staunch hogheads, so as to keep them in their pickle. *Carew*.

* **VENTURER.** *n. f.* [from *venture*.] He who ventures.

* **VENTURESOME.** *adj.* [from *venture*.] Bold; daring.

* **VENTURESOMELY.** *adv.* In a bold or daring manner.

* **VENTUROUS.** *adj.* [from *venture*.] Daring; bold; fearless; ready to run hazards.—*Venturous* counsels. *Bacon*.—

He paus'd not, but with *vent'rous* arm,
He pluck'd: he tasted. *Milton*.

—An old *venturous* Florentine. *Heylyn*.—The *vent'rous* humour of mariners. *Temple*.—

Savage pirates seek thro' seas unknown,
The lives of others, *vent'rous* of their own. *Pope*.

* **VENTUROUSLY.** *adv.* [from *venturous*.] Daringly; fearlessly; boldly.—Siege was laid to the fort by the Lord Gray, *venturously* indeed. *Bacon*.

* **VENTUROUSNESS.** *n. f.* [from *venturous*.] Boldness; willingness to hazard.—Made her repent her *vent'rouness*. *Boyle*.

(1.) **VENUS**, in mythology, the goddess of love and beauty. Cicero mentions two other deities of this name. *Venus*, styled *Urania* and *Celestis*; and the *Venus Pandemos* or *Popularis*, the wife of Vulcan, and the goddess of wanton and effeminate love. To the first the Pagans ascribed no attributes but such as were agreeable to the strictest chastity and virtue; and of this deity they admitted no corporeal resemblance, she being only represented by the form of a globe, ending conically. Her sacrifices were termed *nephelia*, on account of their sobriety. To her honey and wine were offered, and no animal except the heifer; and on her altars the wood of figs, vines, or mulberries, were not suffered to be burnt. The Romans dedicated a temple to this goddess, to whom they gave the name of *Verticordia*; because she turned the hearts of lewd women, and inspired modesty and virtue. But the most famous of these goddesses is the wife of Vulcan; who is represented as springing from the froth raised by the genitals of Saturn, when cut off by Jupiter and thrown into the sea. As soon as she was formed, she was laid in a beautiful shell embellished with pearl, and wafted by gentle zephyrs to the isle of Cytheria, whence she sailed to Cyprus. At her landing, flowers rose beneath her feet; she was received by the Hours, who braided her hair with golden fillets; and then wafted her to heaven, where her charms appeared so attractive, that most of the gods desired her in marriage; but Vulcan, by the advice of Jupiter, gained possession by putting poppies into her nectar. As *Venus* was the goddess of love and pleasure, the poets have been lavish in the description of her beauties; and the painters and statuary have endeavoured to give her the most lovely form; and her son Cupid is her inseparable companion. She was honoured as the mother of *HYMEN*, *CUPID*, *ÆNEAS*, and the *GRACES*, and was passionately fond of *Adonis* and *Auchifes*. This goddess was

principally worshipped at Paphos and Cyprus; and the sacrifices offered to her were white goats and swine, with libations of wine, milk, and honey. Her victims were crowned with flowers, or wreaths of myrtle.

(2.) **VENUS**, in astronomy. See *ASTRONOMY*, *Index*; *COOK*, N^o III, § 7; and *PNEUMATICS*.

(3.) **VENUS**, in zoology, a genus of insects belonging to the order of *vermes testacea*. This animal is a *tethys*; the shell is bivalve; the hinge with 3 teeth near each other, one placed longitudinally and bent inwards. There are many species; of which the most remarkable is,

VENUS MERCENARIA, or the *commercial*, with a strong, thick, weighty shell, covered with a brown epidermis; pure white within; slightly striated transversely. Circumference above 11 inches. These are called in North America *clams*. They differ from other species only in having a purple tinge within. Wampum or Indian money is made of them.

* **VENUS'S BASIN.** *n. f.* [*diapacus major*, Latin] A plant.

(1.) * **VENUS'S COMB.** *n. f.* [*pecten Veneris*, Lat.] A plant.

(2.) **VENUS'S COMB.** See *SCANDIX*.

VENUS'S FLY-TRAP. See *DIONEÆ MUSCIPULA*.

* **VENUS'S HAIR.** *n. f.* [*adiantum*.] A plant.

(1.) * **VENUS'S LOOKING-GLASS.** *n. f.* A plant.

(2.) **VENUS'S LOOKING GLASS.** See *CAMPANULA*.

(1.) * **VENUS'S NAVEL-WORT.** *n. f.* A plant.

(2.) **VENUS'S NAVEL-WORT.** See *CYNOGLOSSUM*.

VEPRECLÆ, diminutive from *vepres*, a *briar* or *bramble*; the 31st order in *Linneus's* *Fragment of a Natural Method*. See *BOTANY*, *Index*.

(1.) **VERA**, a town of Spain, in Grenada, 34 miles NE. of Almerico.

(2.) **VERA**, a town of Spain, in Navarre; 5 miles N. of Pampeluna.

(3.) **VERA CRUZ**, a sea-port town of N. America, in New Spain, with a very secure and commodious harbour, defended by a fort. Here the Flotilla annually arrives from Spain to receive the produce of the gold and silver mines of Mexico; and at the same time a fair is held here for all manner of rich merchandise brought from China and the East Indies by way of the South Sea, and for the merchandise of Europe by the way of the Atlantic Ocean. This town is not two miles in circumference; and about it there is a wall of no great strength on the land side. The air is unwholesome; and there are very few Spaniards here unless when the Flotilla arrives, and then it is crowded with people from all parts of Spanish America. It is 200 miles SE. of Mexico. Lon. 37. 25. W. Lat. 19. 12. N.

(4.) **VERA PAZ**, a fertile province of Mexico; 120 miles long, and 70 broad.

(5.) **VERA PAZ**, the capital of the above prov.

* **VERACIOUS.** *adj.* [*verax*, Latin.] Obtrant of truth.

* **VERACITY.** *n. f.* [*verax*, Latin.] 1. Moral truth; honesty of report. 2. Physical truth; consistency.

fluency of report with fact. Less proper.—There was no reason to doubt the *veracity* of those facts. *Addison*.

VERAGUA, a province of New Spain, bounded on the E. by that of Costa Rica, on the W. by Panama, on the N. by Darien and the Gulf of Mexico, and on the S. by the South Sea. It is about 125 miles long, from E. to W. and 60 broad from N. to S. It is a mountainous barren country; but has plenty of gold and silver. **CONCEPTION** is the capital.

VARAL, a river of Spain, in Arragon.
VERAMALLY, a town of Indostan, in the Carnatic.

VERATRUM, in botany, a genus of plants of the class of *polygamia*, and order of *monacia* and in the natural system arranged under the 10th order, *Coronarie*. There is no calyx; the corolla has 6 petals; there are 6 stamina: the hermaphrodite flowers have 3 pistils and 3 capules. There are 3 species, none of which are natives of Britain. The most important is the

VERATRUM ALBUM, or WHITE HELLEBORE. The root is perennial, about an inch thick, externally brown, internally white, and beset with many strong fibres; the stalk is thick, strong, round, upright, hairy, and usually rises four feet in height: the leaves are numerous, very large, oval, entire, ribbed, plaited, without footstalks, of a yellowish green colour, and surround the stem at its base: the flowers are of a greenish colour, and appear from June to August in very long, branched, terminal spikes. Every part of this plant is extremely acrid and poisonous, as its leaves and even seeds prove deleterious to different animals. The ancients, though sufficiently acquainted with its virulence, were not deterred from employing it internally in several diseases, especially those of a chronic and obstinate kind, as mania, melancholia, hydrops, elephantiasis, epilepsy, vertigo, lepra, rabies canina, &c. (See *MEDICINE*, § 39.). It was frequently observed to effect a cure, not only by its immediate action upon the primæ viæ, but when no sensible evacuation was promoted by its use. Veratrum has likewise been found useful in epilepsy, and other convulsive complaints; but the diseases in which its efficacy seems least equivocal, are those of the skin; as scabies and different prurient eruptions, herpes, morbus pediculofus, lepra, scrophula, &c.; and in many of these it has been successfully employed both internally and externally. As a powerful stimulant, and irritating medicine, its use has been resorted to only in desperate cases; and then it is first to be tried in very small doses in a diluted state, and to be gradually increased according to the effects.

(1.) * **VERB.** *n. f.* [*verbe*, Fr. *verbum*, Latin.] A part of speech signifying existence, or some modification thereof, as action, passion. And withal some disposition or intention of the mind relating thereto, as of affirming, denying, interrogating, commanding. *Clarke*.—Men usually talk of a noun and a verb. *Shak*.

(2.) **VERB.** in grammar. See *GRAMMAR*, under *ENGLISH LANGUAGE*, page 691.

(1.) * **VERBAL.** *adj.* [*verbal*, Fr. *verbalis*, Lat.]
VOL. XXII. PART II.

1. Spoken, not written. 2. Oral; uttered by mouth.—

Made she no verbal quest?

—Yes; once or twice she heav'd the name of father

Pantingly forth, as if it prest it heart. *Shak*.

3. Consisting in mere words.—

And loses, though but verbal, his reward.

Milton.

—They lose themselves in a verbal labyrinth. *Glan*.

—This is managed in words and verbal profession: South. 4. Verbose; full of words. Out of use.—

I am sorry,

You put me to forget a lady's manners,

By being so verbal.

Shak.

5. Minutely exact in words.—

Neglect the rules each verbal critic lays.

Pope.

6. Literal; having word answering to word.—

Verbal translation. *Denham*.—The verbal copier is encumbered with so many difficulties at once, that he can never disentangle himself from all. *Dryden*.

7. [*verbal*, Fr. in grammar.] A verbal noun is a noun derived from a verb.

(2.) **VERBAL FIGURES**. See *ORATORY*, § 198—221.

* **VERBALITY.** *n. f.* [from *verbal*.] Mere words; bare literal expression.—The letter and dead *verbality*. *Brown*.

* **VERBALLY.** *adv.* [from *verbal*.] 1. In words; orally.—By words and oral expressions verbally to deny the deity of Christ. *South*. 2. Word for word.—'Tis almost impossible to translate verbally, and well. *Dryd*.

VERBASCUM, in botany, *Mullein* or *Cow's LUNGWORT*, a genus of plants of the class of *pentandria*, and order of *monogynia*; and in the natural system arranged under the 18th order, *Luride*. The corolla is rotated, and rather unequal: the capsule is monolocular and bivalve. There are 12 species, 6 of which are natives of Britain;

1. **VERBASCUM NIGRUM**, or black mullein, having a stem beset with hairs that are beautifully branched; the blossoms yellow, with purple tips. It is a beautiful plant, and the flowers are grateful to bees. Swine eat it; sheep are not fond of it; cows, horses, and goats, refuse it. The other British species are the *lychnitis*, *nigrum*, *blattasi*, and *virgatum*.

2. **VERBASCUM THAPSUS**, or great mullein, has a stem single, simple, erect, covered with leaves, about six feet high. Leaves large, broad, white, woolly on both sides, sessile, decurrent. Flowers terminal, in a long spike, sessile, yellow. Catarrhal coughs and diarrhæas are the complaints for which it has been internally prescribed. Dr Home tried it in both, but it was only in the latter disease that this plant succeeded.

* **VERBATIM.** *adv.* [Latin.] Word for word.

Think not, that I have forg'd, or am not able
Verbatim to rehearse the method of my pen.

Shak.

—See the transcripts of both charters *verbatim* in *Mat. Paris. Hale*.

VERBENA, in botany, *VERVAIN*; a genus of plants of the class of *diandria*, and order of *monogynia*;
F f f f

magnum; and in the natural system arranged under the 40th order, *Personate*. There are 17 species, only one of which is a native of Britain; viz.

VERBENA OFFICINALIS, or common *vervain*, which grows on the road sides near towns and villages. The leaves have many jagged clefts, the blossoms are pale blue. It manifests a slight degree of asfringency, and was formerly much in vogue as a deobstruent; but is now disregarded. Mr Millar says, that it is never found above a quarter of a mile from a house: whence the common people in England call it *Simpler's joy*, because, wherever it is found, it is a certain sign of a house being near. Sheep eat it; cows, horses, and goats refuse it.

* **TO VERBERATE**. *v. a.* [*verbero*, Latin] To beat; to strike.

* **VERBERATION**. *n. f.* [*verberation*, French; from *verberate*.] Blows; beating.—The effects of a soft prels or *verberation*. *Arbutnut*.

VERBERIE, a town of France, in the dep. of the Oise, 9 miles NW. of Crespy, and 10 NE. of Senlis. Lon. 2. 51. E. Lat. 49. 12. N.

VERBESINA, in botany, *Naked-headed Hemp Agrimony*, a genus of plants of the class of *Syn-genesia*, and order of *Polygumia superflua*; and in the natural method ranking under the 49th order, *Compositæ*.

VERBO, a town of Hungary, 16 miles NW. of Leopoldstad.

VERBOSANIA, a town of European Turkey, in Bosnia; 30 miles S. of Serajo.

* **VERBOSE**. *adj.* [*verbosus*, Lat.] Exuberant in words; prolix; tedious by multiplicity of words.—

Let envy

Ill judging and *verbosely*, from Lethe's lake

Draw tuns immeasurable.

Prior.

—They ought to be brief, and not too *verbosely*.

Asyliffe

* **VERBOSITY**. *n. f.* [*verbosité*, Fr. from *verbosely*.] Exuberance of words; much empty talk.

He draweth out the thread of his *verbosity*

Finer than the staple of his argument. *Shak.*

—The *verbosities* of this philosophy. *Glanv.*—Homer is guilty of *verbosity*. *Brown.*

VERBROECK, a town of Holland, in the dep. of the Meuse, and late prov. of Dutch Flanders; 8 miles ESE. of Hulst.

VERCEL, a town of France, in the dep. of the Doubs, 10½ miles NE. of Ornans.

(1.) **VERCELLI**, a ci-devant lordship of Piedmont, now included in the French empire and dep. of the Sesia, containing about 20,000 souls.

(2.) **VERCELLI**, a city of the French empire, capital of the dep. of the Sesia; 30 miles SW. of Milan, and 38 NE. of Turin.

VERCHOTURE, a town of Russia, in Ekaterinenburg, the first built by the Russians in Siberia.

(1.) **VERD, CAPE**, a promontory on the W. coast of Africa, 40 miles NW. of the mouth of the Gambia. Lon. 17. 38. W. Lat. 14. 45. N.

(2.) **VERD, CAPE DE, ISLANDS OF**, are seated in the Atlantic Ocean, about 400 miles W. of the Cape. They are between the 13th and 19th degree of latitude; and the principal are 10 in number, lying in a semicircle. Their names are, *St Anthony, St Vincent, St Lucia, St Nicholas, the Isle*

of Sal, Pona Vija, Mayo, Sr Jago, Furgo, and Brava.

(1.) * **VERDANT**. *adj.* [*verdoyant*, French; *viridans*, Latin.] Green. This word is so lately naturalized, that *Skinner* could find it only in a dictionary.—

Each odorous bushy shrub,

Fenc'd up the verdant wall,

Milton.

(2.) **VERDANT**. See **PRASIANE**.

(1.) **VERDEN**, a duchy of Lower Saxony, bounded E. S. and N. by Lunenburg; W. by Bremen, about 28 miles square. It belongs to K. George III.

(2.) **VERDEN**, the capital of the above duchy, is seated on the Allier, 26 miles SE. of Bremen. Lon. 0 0 E. Lat. 53. 10. N.

* **VERDERER**. *n. f.* [*verder*, Fr. *viridarius*, low Lat.] An officer in the forest.

VERDESE, a town of Corsica.

(1.) * **VERDICT**. *n. f.* [*verum dictum*, Latin.]

1. The determination of the jury declared to the judge.—Before the jury go together, 'tis all to nothing what the *verdict* shall be. *Spenser.*

—They have a longing desire to overcome and to have the *verdict* pass for them. *Kettlewell.*

2. Declaration; decision; judgment; opinion.—Deceived greatly they are, who think that all they are on any such *verdict* agreed. *Hooker.*—The most natural *verdict* of common humanity. *South.*

—Tried by the *verdict* of those who had before condemned them. *Waterland.*

(2.) **VERDICT**. See **LAW, Part III.** and **TRIAL.**

VERDIER, Cezar, a French surgeon and anatomist, born at Molieres near Avignon. He gave lectures on Anatomy and Midwifery at Paris. He published a treatise on Anatomy and another on Midwifery. He died at Paris in 1759.

(1.) * **VERDIGRISE**. *n. f.* The rust of brass, which in time being consumed and eaten with tallow, turneth into green; in Latin *æruugo*; in French *vert de gris*, or the hoary green. *Peacham.*

—Brass turned into green, is called *verdigrise*. *Bacon.*

(2.) **VERDIGRISE**, or the acetite of copper, is much used by painters as a green colour. It is chiefly manufactured at Montpellier; the vines of Languedoc being very convenient for this purpose. See **CHEMISTRY, Index.** A solution or erosion of copper, and consequently of verdigrise, may be prepared by employing vinegar instead of wine. But it would not have the unctuousity of ordinary verdigrise, which quality is necessary in painting. Good verdigrise must be prepared by means of a vinous acid, or solvent half acid and half spirituous. Accordingly, the success of the operation depends chiefly on the degree of fermentation to which the wine employed has been carried: for this fermentation must not have been so far advanced that no sensibly vinous or spirituous parts remained in the liquor. Verdigrise is employed externally for deterring foul ulcers, and as an escharotic. It is rarely or never given internally.

(1.) * **VERDITER**. *n. f.* Chalk made green.—*Ferditure* ground with a weak gum arabic water, is the faintest and palest green. *Peacham.*

(2.) **VERDITER**, or **VERDATER**, is a preparation of copper, sometimes used by the painters,

&c.

Sec. for a blue; but more usually mixed with a yellow for a green colour. See *CHEMISTRY, Index*; and *COLOUR-MAKING, Index*.

(1.) **VERDON**, a river of France, running into the Durance, at Pertuis.

(2.) **VERDON**, a town of Prussian Pomerelia; 60 miles S. of Dantzic.

(3.) **VERDUN**, an ancient and strong city of France, in the dep. of the Meuse, and late prov. of Lorraine. Here the British subjects detained in France, when treating of the war in 1803, were sent. It suffered much during the revolution. It was taken by the Prussians in 1792, but retaken in 1793. It is seated on the Meuse, 43 miles SW. of Luxembourg, 150 E. of Paris. Lon. 5. 28. E. Lat. 49. 9. N.

(4.) **VERDUN**, a town of France, in the dep. of Upper Garonne, and late Languedoc; on the Garonne, 12 miles NW. of Toulouse. Lon. 1. 20. E. Lat. 43. 54. N.

(5.) **VERDUN**, a town of Spain, in Arragon.

(6.) **VERDUN**, a town of France, in the dep. of Aude; 6 miles NE. of Castlenaudary, and 15 NW. of Carcassonne.

(7.) **VERDUN**, a town of France, in the dep. of Upper Garonne; 18 m. NNW. of Toulouse.

(8.) **VERDUN**, a town of France, in the dep. of Saone and Loire; 9 miles NE. of Chalons.

* **VERDURE**. *n. f.* [*verdure*, French.] Green; green colour.—

Its *verdure* clad

Her universal face with pleasant green. *Milton*.

Let twisted olive bind those laurels fast;

Whose *verdure* must for ever last. *Prior*.

* **VERDUROUS**. *adj.* [from *verdure*.] Green; covered with green; decked with green.—

Higher than their tops,

The *verd'rous* wall of paradise up-sprung,

Which to our gen'ral fire gave prospect large,

Milton.

There the lowing herds chew *verd'rous* pasture. *Philips*.

(1.) **VERE**, Sir Francis, a renowned English general, was the 2d son of Geoffrey de Vere, a branch of the ancient family of that name, earls of Oxford, born in 1554. About the age of 31 he embarked with the troops sent by Q. Elizabeth, under the earl of Leicester, to assist the states of Holland; in which service his courage became immediately conspicuous; but his gallant behaviour in the defence of Bergen-op-Zoom, in 1588, when besieged by the prince of Parma, established his reputation. After the siege was raised, he was knighted by lord Willoughby, who had succeeded Leicester. He continued in the service of the states till 1595; in 1593, he was elected M. P. for Leominster. The famous expedition against Cadiz being resolved upon, Sir Francis was called home, and appointed to a principal command under the earl of Essex. The success was well known. In 1597 he was in Holland, at the battle of Turnhout, of which he has given a particular description in his *Commentaries*. In the same year he embarked, with the earl of Essex, in the expedition to the Azores; and at his return was appointed governor of the Briel in Holland, with the command of the English troops in the service of the states. In 1600 he was one of

the three generals at the battle of Nieuport, and the victory was universally ascribed to his conduct and resolution. But the last and most glorious achievement of his life was his gallant defence of Ostend, with about 1600 men, against an army of 12,000, from July 1601 until March 1602, when he resigned the government, and returned to Holland. He died in 1608, in the 54th year of his age. His *Commentaries* were printed at Cambridge, 1657, folio.

(2.) **VERE**, Sir Horace, brother of the above, was born in 1565. He was created a peer by the title of Lord Vere.

(3.) **VERE**, in geography, a river of England, in Hertfordshire running into the Coln, 2 miles SE. of St Albans.

(4.) **VERE**, a county of Jamaica, on the S. coast.

VEREA, a town of European Turkey, in Macedonia, 115 miles E. of Valona, and 48 W. of Saloniki.

* **VERECUND**. *adj.* [*verecund*, old French; *verecundus*, Latin.] Modest; bashful. *Diä*.

VERELST, Simon, an eminent Dutch Painter. He died in 1710.

VEREMUND, a native of Spain, who was archdeacon of St Andrews in Scotland, in the middle of the 11th century. He wrote a history of Scotland from its origin to the year 1060, and dedicated it to K. Malcolm III.

VERERIA, a town of Russia, in Moscovoe, 56 miles WSW. of Moscow.

VERES, a town of Russia, in Archangel; 80 miles NNW. of Kola.

VEREIL, a town of France, in the dep. of Upper Garonne; 10½ miles ENE. of Toulouse.

VERGANTINAS, a town of Spain, in Galicia; 20 miles SW. of Corunna.

VERGARA, a town of Spain, in Guipuscoa; 7 miles S. of Tolosa.

* **VERGE**. *n. f.* [*verge*, Fr. *virga*, Latin.] 1. A rod, or something in form of a rod, carried as an emblem of authority. The mace of a dean.—

Suppose him now a dean complete

Devoutly lolling in his seat,

The silver *verge*, with decent pride,
Stuck underneath his cushion side. *Swift*.

2. [*Vergo*, Latin.] The brink; the edge; the utmost border.—

Would the inclusive *verge*

Of golden metal, that must round my brow
Were red-hot steel, to sear me to the brain. *Shak*.

I say, and will in battle prove,

Or here, or elsewhere, to the furthest *verge*

That ever was survey'd by English eye. *Shak*.

Nature in you stands on the very *verge*
Of her confine. *Shak*.

Serve they as a flowery *verge* to bind
The fluid skirts of that same wat'ry cloud,
Lest it again dissolve, and shew'r the earth.

Milton.

Let fortune empty her whole quiver on me,
I have a soul, that, like an ample shield,
Can take in all, and *verge* enough for more.

Dryden.

—Every thing within the *verge* of nature, or out of it, has a proper part assigned it in this poem. *Addison*.—

Then let him chuse a damsel young and fair,
To bless his age, and bring a worthy heir,
To sooth his care, and, free from noise and strife,
Conduct him gently to the verge of life. *Pope.*
3. In law.—*Verge* is the compass about the king's court, bounding the jurisdiction of the lord steward of the king's household, and of the corner of the king's house, and which seems to have been 12 miles round. *Verge* hath also another signification, and is used for a stick, or rod, whereby one is admitted tenant, and, holding it in his hand, sweareth fealty to the lord of the manor; who, for that reason, is called tenant by the *verge*. *Cowell.*

Fear not; whom we raise
We will make fast within a halloved *verge*. *Shak.*

* To *VERGE*. *v. n.* [*vergo*, Lat.] To tend; to bend downwards.—*Verging* either way. *Holder.*—*Verging* to that period of life which is to be labour and sorrow. *Swift.*—When the juices *verge* to putrefaction. *Arbutnot.*

Man
Perhaps acts second to some sphere unknown,
Touches some wheel, or *verges* to some goal,
'Tis but a part we see and not the whole. *Pope.*

* *VERGER*. *n. f.* [from *verge*.] He that carries the mace before the dean.—I can tip the *verger* with half a crown and get into the best seat. *Fargusar.*

VERGES, a town of Spain in Catalonia; 19 miles E. of Gerona.

VERGIL, Polydore. See *VIRGIL*, No 2.

(1.) *VERGORAZ*, a town of European Turkey, in Dalmatia; 20 miles E. of Narenta.

(2.) *VERGORAZ AND NARENTA*, a province in Dalmatia, comprehending two districts, 36 miles long, and 13 broad; producing mulberries, figs, almonds, olives, &c. and containing 17,000 souls.

VERGY, a town of France, in the dep. of the Cote d'Or; 10 miles SSW. of Dijon.

* *VERIDICAL*. *adj.* [*veridicus*, Latin.] Telling truth. *Diß.*

* *VERIFICATION*. *n. f.* [from *verify*.] Confirmation by argument or evidence.—In *verification* of this we will mention a phenomenon of our engine. *Boyle.*

* *VERIFIER*. *n. f.* [from *verify*.] One who assures a thing to be true.

* To *VERIFY*. *v. n.* [*verifier*, French.] To justify against a charge of falsehood; to confirm; to prove true.—*Verified* in sundry other kinds of teaching. *Hooker.*—This is *verified* by a number of examples. *Bacon.*

So shalt thou best fulfil, best *verify*

The prophets old. *Milton.*

So spake this oracle, then *verified*

When Jesus, Son of Mary, second Eve,
Saw Satan fall. *Milton.*

Though you may mistake a year,

Though your prognosticks run too fast,

They must be *verify'd* at last. *Swift.*

Spain shall have three kings; which is now wonderfully *verified*. *Swift.*

* *VERILY*. *adv.* [from *very*.] 1. In truth; certainly.—

Verily 'tis better to be lowly born;
Than to be perk'd up in a glist'ring grief. *Shak.*
2. With great confidence.—It was *verily* thought. *Bacon.*—We are *verily* persuaded the consequence will be an entire alteration of religion among us. *Swift.*

VERIN, a town of Spain, in Galicia; 30 miles SE. of Orense.

VERINA, a town of Terra Firma, in Cumana; 45 miles E. of Cumana.

* *VERISIMILAR*. *VERISIMILIOUS*. *adj.* [*verisimilis*, Latin.] Probable; likely.—Many erroneous doctrines of pontificians are, in our days, wholly supported by *verisimilous* and probable reasons. *White.*

* *VERISIMILITUDE*. *n. f.* [*verisimilitudo*, Latin.] Probability; likelihood; resemblance of truth.—*Verisimilitude* or probable truth. *Brown.*—If not such verities at least such *verisimilitudes*. *Brown.*—*Verisimilitude* and opinion are an easy purchase. *Glauv.*—They are exalted as high as the poet can carry them, with proportion to *verisimilitude*. *Dryden.*—Horace gives a permission to painters and poets to dare every thing; yet he encourages neither to make things out of nature and *verisimilitude*. *Dryden.*

* *VERITABLE*. *adj.* [*veritable*, Fr.] True; agreeable to fact.—
Indeed I 's't true?
—Most *veritable*; therefore look to't well. *Shak.*

—The preface of the year succeeding, made from insects in oak apples, is I doubt too indistinct, nor *veritable* from event. *Brown.*

* *VERITABLY*. *adv.* [from *veritable*.] In a true manner.

* *VERITY*. *n. f.* [*verité*, Fr. *veritas*, Latin.] 1. Truth; consonance to the reality of things.—

The *verity* of religion. *Hooker.*—
I saw their weapons drawn; there was a noise;
That's *verity*. *Shak.*

—Prejudicial to *verity*. *Glauv.*—It is a proposition of eternal *verity*, that none can govern while he is despised. *Soutb.* 2. A true assertion; a true tenet.—An undeniable *verity*. *Sidney.*—Celestial *verity*. *Hooker.*—

If there come truth from them,
Why, by the *verities* on thee made good,
May they not be my oracles as well? *Shak.*

Must virtue be preserved by a lie?
Virtue and truth do ever best agree;
By this it seems to be a *verity*;
Since the effects so good and virtuous be. *Dow.*

3. Moral truth; agreement of the words with the thoughts.

(1.) * *VERJUICE*. *n. f.* [*verjus*, French.] Acid liquor expressed from crab-apples. It is vulgarly pronounced *verges*.—Hang a dog upon a crab-tree, and he'll never love *verjuice*. *L'Estr.*

The barley pudding comes in place,
Then bids fall on; himself, for saving charges,
A peel'd slic'd onion eats, and tipples *verjuice*. *Dryden.*

—The native *verjuice* of the crab. *Philips.*

(2.) *VERJUICE* is obtained from grapes or apples when unfit for wine or cider; or from sweet ones, whilst yet acid and unripe. Its chief use is in

in fauces, ragouts, &c. It is also an ingredient in some medicinal compositions, and is used by the wax-chandlers to purify their wax.

VERLANGA, a town of Spain, in Old Castile, on the Duero; below Almazan.

VERMAND, a town of France, in the dep. of Aisne, late capital of **VERMANDOIS**; 6 miles W. of St Quentin, and 8 E. of Peronne.

VERMANDOIS, a ci-devant prov. of France, in the late Picardy, which with the ci-devant prov. of Soissonnois, now forms the department of Aisne. It abounds in corn and flax.

VERMANTES, a town of France, in the dep. of Indre and Loire; 6 miles NW. of Bourgevil.

VERMANTON, a town of France, in the dep. of Yonne; 12 miles NW. of Avalon, and 12 SE. of Auxerre. Lon. 3. 49. E. Lat. 47. 40. N.

VERMEJO, a river of Brenos Ayres, running into the Parana.

VERMES, the sixth class of animals in the Linnean system, comprehending five orders. See **NATURAL HISTORY**, and **ZOOLOGY**.

(1.) * **VERMICELLI**. *n. f.* [Ital.] A paste rolled and broken in the form of worms.—With oysters, eggs, and *vermicelli*. *Prior*.

(2.) **VERMICELLI**, or **VERMICHELLY**, a composition of flour, cheese, yolks of eggs, sugar, and saffron, reduced to a paste, and formed into long slender pieces like worms, by forcing it with a piston through a number of little holes. It was first brought from Italy, where it is in great vogue: it is chiefly used in soups and pottages, to provoke venery, &c.

(1.) * **VERMICULAR**. *adj.* [*vermiculus*, Latin.] Acting like a worm; continued from one part to another of the same body.—The *vermicular* motion of the intestines. *Cheyne*.

(2.) **VERMICULAR**, is an epithet given to any thing that bears a resemblance to worms.

* **To VERMICULATE**. *v. a.* [*vermiculæ*, Fr. *vermiculatus*, Lat.] To inlay; to work in chequer work, or pieces of divers colours. *Bayley*.

* **VERMICULATION**. *n. f.* [from *vermiculate*.] Continuation of motion from one part to another.—My guts move by the motion of *vermiculation*. *Hale*.

* **VERMICULE**. *n. f.* [*vermiculus*, *vermis*, Lat.] A little grub worm.—Many *vermicules* are seen towards the outside of these apples. *Derham*.

* **VERMICULOUS**. *adj.* [*vermiculosus*, Latin.] Full of grubs; resembling grubs.

* **VERMIFORM**. *adj.* [*vermiforme*, Fr. *vermis* and *formo*, Lat.] Having the shape of a worm.

VERMIFORMIS, in anatomy, a term applied to various parts in the human body, bearing some resemblance to worms.

* **VERMIFUGE**. *n. f.* [from *vermis* and *fugo*, Lat.] Any medicine that destroys or expels worms.

(2.) **VERMIFUGE** is a medicine which expels worms from the intestines. Of those medicines which are in use for this purpose we have given a full account under **MEDICINE**, to the *Index* of which article we refer the reader. *Cowhage* is coming daily more into use, but is prohibited in every case where there is a tendency to inflammation in any part of the intestinal canal, or where the mucus has been carried off or greatly diminished by dysentery or any other cause. Dr

Haemmerlin of Ulm has lately recommended as a very powerful and safe vermifuge the coralline of Corfica, and says that it has been so used in that island with complete success from time immemorial. It is a fucus adhering to the rocks washed by the sea, and sometimes to the stones and shells thrown upon the shore. In the system of plants of Linnæus, it belongs to the class *cryptogamia*. Its most common names are *sea rock moss*; the *Grecian herb*; *lemithochorton*; and the *coralline of Corfica*.

(1.) * **VERMIL**. } *n. f.* [*vermeil*, *vermillon*,
(1.) * **VERMILION**.] Fr.] 1. The cochineal;

a grub of a particular plant. 2. Facitious or native cinabar; sulphur mixed with mercury.—This is the usual though not primitive signification.—Mercury is made into *vermillion* by solution or calcination. *Bacon*.—The fairest and most principal red is *vermillion*. *Peacocks*. 3. Any beautiful red colour.—And the pure snow with goodly *vermil* stain. *Spenser*.—Simple colours clear as *vermillion*. *Dryd*.—Pure *vermillion*. *Spenser*.

(2.) **VERMILION** is a very bright and beautiful red colour, composed of quicksilver and sulphur, in great esteem among the ancients under the name of *minium*; but what goes by the name of *minium* amongst us, is a preparation of lead, known also by the name of *red-lead*. See **CHEMISTRY**, *Index*.

* **To VERMILION**. *v. a.* [from the noun.] To die red.—A sprightly red *vermilions* all her face. *Grano*.

(1.) * **VERMIN**. *n. f.* [*vermin*, Fr. *vermis*, Lat.]

1. Any noxious animal. Used commonly for small creatures.—How to prevent the fiend, and to kill *vermin*. *Shak*.—*Vermin*, such as weazles and polecats. *Bacon*.—Like a *vermin* or a wolf. *Taylor*.—A weazel being taken in a trap, the poor *vermin* stood much upon her innocence. *L'Estr*.—These *vermin*, mice and rats. *Mortimer*.—To nourish *vermin*. *Swift*. 2. It is used in contempt of human beings.—You are my prisoners, base *vermin*. *Hudibras*.

(2.) **VERMIN** is a collective name, including all kinds of little animals and insects, which are hurtful or troublesome to mankind, beasts, or fruits, &c. as worms, lice, fleas, caterpillars, ants, flies, &c.

* **To VERMINATE**. *v. n.* [from *vermin*.] To breed vermin.

* **VERMINATION**. *n. f.* [from *verminate*.] Generation of vermin.—Redi tried experiments relating to the *vermination* of serpents and flesh. *Derham*.

* **VERMINOUS**. *adj.* [from *vermin*.] Tending to vermin; disposed to breed vermin.—A *verminous* disposition of the body. *Harvey*.

* **VERMIPAROUS**. *adj.* [*vermis* and *pario*, Latin.] Producing worms.—They confound *vermiparous* animals with oviparous. *Brown*.

VERMIS SETARIUS. See **SETACEOUS WORM**.

VERMONT, one of the United States of North America, bounded on the N. by Canada; on the E. by the Connecticut, which divides it from New Hampshire, on the S. by Massachusetts; and on the W. by New York. It is about 155 miles long, and 60 broad, and is divided into 7 counties. A chain of high mountains, running N. and S.

S. divides this State nearly in the centre, between the Connecticut and lake Champlain. The natural growth upon the mountain which gives name to the State, is hemlock, pine, spruce, and other evergreens; hence it has always a *green* appearance, and, on this account, has obtained the descriptive name of Vermont, from the French *Verd Mont*, Green Mountain. The country is generally hilly, but not rocky. It is finely watered, the soil is very fertile, and there is not a better climate in the world. The inhabitants have very lately been estimated at 100,000. The bulk of them are emigrants from Connecticut and Massachusetts. The principal town is Bennington, but the assembly generally hold their sessions at Windsor. By its constitution, universal suffrage of the citizens is established; and slavery is prohibited.

(1.) VERN, a town of France, in the dep. of the Dordogne, 10 miles S. of Perigueux.

(2.) VERN, a town of France, in the dep. of Maine and Loire; 6 miles S. of Segre, and 12 NW. of Angers.

* VERNACULAR. *adj.* [*vernaculus*, Lat.] Native; of one's own country.—A consumption is supposed a *vernacular* disease to England. *Harvey*.—The histories are transmitted to us in our *vernacular* idiom. *Addison*.

* VERNAL. *adj.* [*vernus*, Lat.] Belonging to the spring.—

Vernal bloom, or summer's rose. *Milton*.

VERNAMO, a town of Sweden, in Smaland.

* VERNANT. *adj.* [*vernans*, Lat.] Flourishing as in the spring.—*Vernant* flowers. *Milton*.

VERNANTOIS, a town of France, in the department of the Jura; 3 miles S. of Lons, and 6 N. of Orgelet.

VERNASSA, a town of Genoa; 5 miles SW. of Spezza.

VERNE, a town of France, in the department of the Doubs; 3 miles N. of Beaume, and 6 W. of Clerval.

(1.) VERNET, a town of France, in the department of the Eastern Pyrenees; 4½ miles S. of Prades.

(2.) VERNET, a town of France, in the dep. of the Allier, 13½ miles N. of Digné.

(1.) VERNEUIL, a town of France, in the department of the Eure. It was taken from John king of England, and lost by Charles VIII. in 1449. It is 18 miles W. of Dreux, and 21 S. of Evreux.

(2.) VERNEUIL, a town of France, in the dep. of Allier; 15 miles E. of Montmaurault, and 15 S. of Moulins.

VERNI, a town of Lucca.

VERNIER SCALE, a scale excellently adapted for the graduation of mathematical instruments, thus called from its inventor Peter Vernier, a person of distinction in the Franche Comté. See *NONIUS*, N° 3. Vernier's method is derived from the following principle. If two equal right lines, or circular arcs, A, B, are so divided, that the number of equal divisions in B is one less than the number of equal divisions of A, then will the excess of one division of B above one division of A be compounded of the ratios of one of A to A, and of one of B to B.

For let A contain 11 parts, then one of A to A is as 11 to 11, or $\frac{11}{11}$. Let B contain 10 parts,

then one of B to B is as 1 to 10, or $\frac{1}{10}$. Now

$$\frac{1}{10} - \frac{1}{11} = \frac{11-10}{10 \times 11} = \frac{1}{10 \times 11} = \frac{1}{10} \times \frac{1}{11}.$$

Or if B contains n parts, and A contains $n+1$ parts; then $\frac{1}{n}$ is one part of B, and $\frac{1}{n+1}$ is one

part of A. And $\frac{1}{n} - \frac{1}{n+1} = \frac{n+1-n}{n \times n+1} = \frac{1}{n \times n+1}.$

The most commodious divisions, and their aliquot parts, into which the degrees on the circular limb of an instrument may be supposed to be divided, on the radius of that instrument.

Let R be the radius of a circle in inches; and a degree to be divided into n parts, each being $\frac{1}{n}$ th part of an inch.

Now the circumference of a circle, in parts of its diameter a R inches, is $3.1415926 \times a R$ inches.

Then $360^\circ : 3.1415926 \times a R :: 1^\circ : \frac{3.1415926}{360} \times a R$ inches.

Or, $0.01745329 \times R$ is the length of one degree in inches.

Or, $0.01745329 \times R \times p$ is the length of 1° , in p th parts of an inch.

But as every degree contains n times such parts, therefore $n = 0.01745329 \times R \times p$.

The most commodious perceptible division is $\frac{1}{8}$ or $\frac{1}{10}$ of an inch. *Examp.* Suppose an instru-

ment of 30 inches radius, into how many convenient parts may each degree be divided? how many of these parts are to go to the breadth of the vernier, and to what parts of a degree may an observation be made by that instrument? Now $0.01745 \times R = 0.5236$ inches, the length of each degree; and if p be supposed about $\frac{1}{8}$ of an inch

for one division; then $0.5236 \times p = 4.188$ shows the number of such parts in a degree. But as this number must be an integer, let it be 4, each being $15'$; and let the breadth of the vernier contain 31 of those parts, or $7\frac{1}{2}^\circ$, and be divided into 30 parts.

Here $n = \frac{1}{4}$; $m = \frac{1}{30}$; then $\frac{1}{4} \times \frac{1}{30} = \frac{1}{120}$ of a degree, or $30'$, which is the least part of a degree that instrument can show.

If $n = \frac{1}{5}$, and $m = \frac{1}{36}$; then $\frac{1}{5} \times \frac{1}{36} = \frac{60}{5 \times 36}$ of a minute, or $20''$.

The following table, taken as examples in the instruments commonly made from 3 inches to 8 feet radius, shows the divisions of the limb to nearest tenths of inches, so as to be an aliquot of $60'$ s, and what parts of a degree may be estimated by the vernier, it being divided into such equal parts, and containing such degrees as their columns show.

Rad. inch- es.	Parts in a deg.	Parts in vernier.	Breadth of vernier.	Parts obser- ved.
3	1	15	15½	4 0'
6	1	20	20½	3 0
9	2	20	10½	1 30
12	2	24	12½	1 15
15	3	20	6½	1 0
18	3	30	10½	0 40
21	4	30	7½	0 30
24	4	36	9½	0 25
30	5	30	7½	0 20
36	6	30	5½	0 20
42	8	30	3½	0 15
48	9	40	4½	0 10
60	10	36	3½	0 10
72	12	30	2½	0 10
84	15	40	2½	0 6
96	15	60	4	0 4

By altering the number of divisions, either in the degrees or in the vernier, or in both, an angle can be observed to a different degree of accuracy. Thus, to a radius of 30 inches, if a degree be divided into 12 parts, each being five minutes, and the breadth of the vernier be 21 such parts, or 12°, and divided into 20 parts, then $\frac{1}{12} \times \frac{1}{20} = \frac{1}{240} = 15''$; or taking the breadth of the vernier $2\frac{1}{2}^\circ$, and divided into 30 parts; then $\frac{1}{12} \times \frac{1}{30} = \frac{1}{360}$, or 10''; Or $\frac{1}{12} \times \frac{1}{50} = \frac{1}{600} = 6''$; where the breadth of the vernier is 43°.

* **VERNILITY**. *n. f.* [*verna*, Latin.] Servile carriage; the submissive fawning behaviour of a slave. *Bailey*.

VERNIO, a town of Etruria, 11 miles NW. of Pistoia.

VERNISSON, a river of France, which runs into the Loing at Montargis.

VERNOIL, a town of France, in the dep. of Maine and Loire, 13½ miles SE. of Bauge.

(1.) **VERNON**, Edward, a celebrated English admiral of great bravery, born in Westminster in 1684: He acquired great fame by his exploits in the Spanish W. Indies. He bombarded Carthagena, and took Porto Bello in 1739. He died in 1757 at an advanced age.

(2.) **VERNON**, a town of France, in the dep. of Eure, on the S. bank of the Seine, 15 miles ENE. of Evreux, and 15 ESE. of Louviers.

VERNONBURG, a town of Georgia, 11 miles S. of Savanna.

VERNOUX, a town of France, in the dep. of Ardeche, 13½ miles S. of Tournon, and 10½ W. of Privas.

VEROLI, a town of Italy, in the Campania of Rome; containing 8 churches and 3 convents; 3 miles S. of Alatri.

VERON, a town of France, in the dep. of the Yonne; 5 miles SSE. of Sens.

VERONA, a city of Italy, in the department of the Mincio, and capital of the district, as it was of the ci-devant VERONESE. It has 3 castles, an academy, a town-house, and an opera-house. It

contains 57,000 citizens; it has strong walls, and an ancient Roman amphitheatre, which will hold 25,000 people. **PLINY** was born in it. It is 17 miles in circuit, and is seated on the Adige, 17 miles NE. of Mantua, and 62 SW. of Venice. Lon. 11. 24. E. Lat. 45. 26. N.

(1.) **VERONESE**, the people of VERONA.

(2.) **VERONESE**, a ci-devant territory of Italy, in the department of the Mincio, bounded on the N. by the Trentino, on the E. by the Vicentino and Paduano, on the S. by Mantua, and on the W. by the dep. of Olona. It is about 35 miles long and 27 broad, and is one of the most fertile countries in Italy, abounding in corn, wine, fruits, and cattle.

(3.) **VERONESE**. See **CAGLIARI**.

VERONETTE, a sea-port town of Italy.

VERONICA, in botany: A genus of plants of the class of *diandria*, and order of *monogynia*, and in the natural system arranged under the 40th order, *Personate*. There are 40 species; 15 are natives of Britain, only two of which have been applied to any use.

1. **VERONICA BECCABUNGA**, or common *brooklime*, the flowers of which are blue, in loose lateral spikes; leaves sessile, oval, opposite, thick, notched. This plant was formerly considered as of much use in several diseases, and was applied externally to wounds and ulcers; but if it have any peculiar efficacy, it is to be derived from its antiscorbutic virtue. As a mild refrigerant juice it is preferred where an acriminous state of the fluids prevails, indicated by prurient eruptions upon the skin, or in what has been called the *bat scurvy*. We must, however, acknowledge, that we should expect equal benefit from the same quantity of any other bland fresh vegetable matter taken into the system. To derive much advantage from it, the juice ought to be used in large quantities, or the fresh plant eaten as food.

2. **VERONICA OFFICINALIS**, common male speed-well, or fluellin; a native of Britain, growing on heaths and barren grounds. The blossoms are blue, the leaves elliptical, serrated, and hairy. The leaves have a small degree of astringency, and are somewhat bitter. The herb was formerly esteemed in medicine for various disorders, but is now almost totally disused. Cows, sheep, goats, and horses, eat it; swine refuse it.

VEROVITZA, a town of Slavonia, 36 miles SSE. of Canischa, and 52 NW. of Eszek.

VERPILLIERE, a town of France, in the dep. of Isere; 5 miles SE. of Lyons; and 4½ NE. of Vienna.

VERRANA, a town of Naples, in Otranto, 16 miles SSE. of Oria.

VERRAZ, a town of the French empire, in the dep. of the Po, late Piedmontese, and duchy of Aosta; 15 m. SE. of Aosta, and 35 N. of Turin.

VERRHEYEN, Philip, M. D. an eminent anatomist, born in Holland, in 1642. He laboured as a farmer till his 22d year; when he studied physic at the university of Louvain, where he graduated, and became a professor. He died in 1720. He published, 1. *De Corporis humani Anatomia*; 2 vols. 4to; 2. *De Febribus*, 8vo.

VERRIERS, 2 towns of France; 1. in the dep. of the Marne; 3 miles S. of St Mencheould; 2. in that

that of Vienne, $13\frac{1}{2}$ miles S. of Poitiers, and 12 W. of Mont Morillon.

VERRMEYEN, John Cornelius, an eminent painter at Haerlem, in 1500. He was employed by Charles V. He died at Brussels, in 1559, aged 59.

VERRNET, an eminent French painter, born at Avignon, in 1712. He died in 1789.

VERROCHIO, Andrew, a painter and statuary, born at Florence, in 1432. He discovered the art of taking casts in plaster, from the faces of the dead or the living. He executed some fine statues in bronze. He died in 1488.

VERRUCOLA, a town of Italy, in Etruria, 4 miles E. of Pisa.

VERRUYE, a town of France, in the dep. of the two Sevre, $7\frac{1}{2}$ miles SW. of Partenay.

* VERSABILITY. } *n. f.* [*versabilis*, Latin.]

* VERSABLENESS. } Aptness to be turn'd or wound any way. *Dis.*

(1.) VERSAILLES, a city of France, in the dep. of the Seine and Oise, and late province of the Isle of France, 10 miles WSW. of Paris. It contains 60,000 inhabitants, and since the Revolution has been created a bishop's see. In the reign of Lewis XIII. it was only a small village. This prince built here a hunting-but in 1630, which Bassompierre calls "the paltry chateau of Versailles." Although the situation was low and very unfavourable, Lewis XIV. built a magnificent palace here, which was the usual residence of the kings of France till the 6th of October 1789, when the late unfortunate Lewis XVI. and his family were removed from it to the Thuilleries. The buildings and the gardens are adorned with a vast number of statues, done by the greatest masters, and the water-works are all worthy of admiration. The great gallery is thought to be as curious a piece of workmanship of that kind as any in the world: nor is the chapel less to be admired for its fine architecture and ornaments. The gardens, with the park, are 5 miles in circumference, and surrounded by walls. There are three fine avenues to Versailles, one of which is the common road to Paris, the other comes from Seaux, and the third from St Cloud. Lon. 2. 12. E. Lat. 48. 48. N.

(2.) VERSAILLES, a town of Kentucky, 10 miles SE. of Frankfort.

* VERSAL. *adj.* [A cant word for *universal*.] Total; whole.—

Some for brevity

Have cast the *versal* world's nativity. *Hudib.*

* VERSATILE. *adj.* [*versutilis*, Latin.] 1. That may be turned round.—

Th' advent'rous pilot, in a single year
Learn'd his state cock-boat dext'rously to steer,
Versatile, and sharp piercing like a screw,
Made good the old passage, and still forc'd a new. *Harte.*

2. Changeable; variable.—Those *versatile* representations in the neck of a dove, and folds of scarlet. *Glanville.* 3. Easily applied to a new task.

* VERSATILENESS. } *n. f.* [from *versatile*.]

* VERSATILITY. } The quality of being versatile.

VERSCHORISTS. See HATTEMISTS.

VERSCHURING, Henry, a painter born at Gorcum, of which he was chosen magistrate. He was drowned in 1699, aged 68.

* VERSE. *n. f.* [*vers*, Fr. *versus*, Latin.] 1. A line consisting of a certain succession of sounds, and number of syllables.—

Thou hast by moonlight at her window
sung

With feigning voice, verses of feigning love. *Shak.*

2. [*Verfet*, Fr.] A section or paragraph of a book.

—Thus far the questions proceed upon the construction of the first earth; in the following *verses* they proceed upon the demolition of that earth.

Burnet. 3. Poetry; lays; metrical language.—

Vers embalms virtue; and tombs and thrones
of rhymes

Preserve frail transitory fame as much

As spice doth body from air's corrupt touch. *Donne.*

If envious eyes their hurtful rays have cast,
More pow'ful *verse* shall free thee from the blast. *Dryden.*

Whilst she did her various power dispole,
Virtue was taught in *verse*, and Athens glory rose. *Prior.*

You compose

In splay-foot *verse*, or hobbling prose. *Prior.*

4. A piece of poetry.—

This *verse*, my friend, be thine. *Pope.*

* TO VERSE. *v. a.* [from the noun.] To tell in verse; to relate poetically.—

In the shape of Corin fate all day,
Playing on pipes of corn, and *versing* love. *Shak.*

* TO BE VERSED. *v. n.* [*versor*, Latin.] To be skilled in; to be acquainted with.—She might be ignorant of their notions who was not *versed* in their names. *Brown.*

This, *versed* in death, th' infernal knight relates.

And then for proof fulfill'd their common fate. *Dryden.*

* VERSEMAN. *n. f.* [*verse* and *man*.] A poet; a writer in verse. In ludicrous language.—

The god of us *versemen*, you know, child, the fun. *Prior.*

From limbs of this great Hercules are fram'd
Whole groups of pigmies, who are *versemen* nam'd. *Harte.*

* VERSICLE. *n. f.* [*versiculus*, Lat.] A little verse.

* VERSIFICATION. *n. f.* [*versification*, Fr. from *versify*.] The art or practice of making verses.—Donne had not your *versification*. *Dryd.*

—Some object of his *versification*, which is in poetry what colouring is in painting, a beautiful ornament. *Glanville.*

* VERSIFICATOR. } *n. f.* [*versificator*, Fr. from *versify*.]

* VERSIFIER. } *versificator*, Latin.] A versifier; a maker of verses with or without the spirit of poetry.—Statius, the best *versificator* next Virgil, knew not how to design after him. *Dryd.*

—In Job and the Psalms we shall find more sublime ideas, more elevated language, than in any of the heathen *versifiers* of Greece and Rome.

Watts on the *Misc.*

(1.) * TO VERSIFY. *v. n.* [*versifier*, Fr. *versificor*, Latin.]

Latin.] To make verses.—You would wonder to hear how soon even children will begin to *versify*! *Sidney*.—To follow rather the Goths in rhyming, than the Greeks in true *versifying*. *Asch.*

I'll *versify* in spite, and do my best,
To make as much waste paper as the rest.

(2.) * *TO VERSIFY*. *v. a.* To relate in verse.—Unintermix'd with fictitious fancies, I'll *versify* the truth, not poetize. *Daniel*.

(1.) * *VERSION*. *n. f.* [*version*, Fr. *verso*, Lat.] 1. Change; transformation.—The *version* of air into water. *Brown*. 2. Change of direction.—Magnitude, colour, and *version* of the beams of comet. *Bacon*. 3. Translation.—Where the original is close, no *version* can reach it in the same compass. *Dryden*.—Invent some pretence against the reading, *version*, or construction. *Waverland*. 4. The act of translating.

(1.) *VERSION*. See *TRANSLATION*.

(1.) *VERSOIX*, a town of France, in the dep. of the Ain, on the bank of the lake of Geneva, 5 miles SE. of Gex, and 5 N. of Geneva.

(2.) *VERSOIX*, a river of France, in the dep. of Ain, running into the lake of Geneva.

(1.) *VERSOU*, a town of the French empire, in the dep. of Mont Blanc, and late Tarentaise, 4 miles N. of St Maurice.

(2.) *VERSOU*, a town of France, in the dep. of Isère, 6 miles N. of Grenoble.

VERSTEGAN, Richard, an English antiquary, born in London, of Flemish parents, and educated at Oxford. He went to Antwerp, and wrote on the Antiquities of the renowned English Nation. Lond. 1634, 8vo, and 1674. He also wrote, *Regal Governments of England*, &c. He died in 1625.

VERST. See *WERST*.

(1.) * *VERT*. *n. s.* [*vert*, Fr.] *Vert*, in the laws of the forest, signifies every thing that grows, and bears a green leaf within the forest, that may cover and hide a deer. *Cowel*.—Great plenty of *vert* and venison. *Sir J. Davies*.

(2.) *VERT*, in heraldry, the term for a green colour. It is called *vert* in the blazon of the coats of all under the degree of nobles: but in coats of nobility it is called *emerald*; and in those of kings *venus*. In engraving it is expressed by diagonals, or lines drawn athwart from right to left, from the dexter chief corner to the sinister base.

VERTAISON, a town of France, in the dep. of Puy de Dôme, 9 miles E. of Clermont.

VERTÈBRE, in anatomy. See *ANATOMY*, *Ind.*

* *VERTEBRAL*. *adj.* [from *vertebra*, Latin.] Relating to the joints of the spine.—The carotid, *vertebral*, and splenic arteries. *Ray*.

* *VERTEBRE*. *n. f.* [*vertebre*, Fr. *vertebra*, Lat.] A joint of the back.—The *vertebres* are elegantly compacted together. *Ray*.

VERTEILLAC, a town of France, in the dep. of Dordogne, 7½ miles N. of Ribérac.

* *VERTEX*. *n. f.* [Lat.] 1. Zenith; the point over head.—

These keep the *vertex*; but betwixt the bear And shining zodiac, where the planets err,

A thousand figured constellations roll. *Creech*.

.. A top of a hill; the top of any thing.—Every *vertex* or eminence affords new kinds of vegetables. *Derb*.

VOL. XXII. PART II.

* *VERTICAL*. *adj.* [*vertical*, Fr. from *vertex*] 1. Placed in the zenith.—

'Tis raging noon; and *vertical* the sun
Darts on the head direct his forceful rays.

Thomson

2. Placed in a direction perpendicular to the horizon.—From these laws all the rules of bodies ascending or descending in *vertical* lines may be deduced. *Cheyne*.

* *VERTICALITY*. *n. f.* [from *vertical*.] The state of being in the zenith.—Unto them the sun is vertical twice a year; making two distinct summers in the different points of the *verticality*: *Brown*.

* *VERTICALLY*. *adv.* [from *vertical*.] In the zenith.—Although it be not vertical unto any part in Asia, yet it *vertically* passeth over Peru and Brasilia. *Brown*.

VERTICILLATÆ, a class in Ray's and Boerhaave's Methods, consisting of herbaceous vegetables, having four naked seeds, and the flowers placed in whorls round the stalk. The term is synonymous to the *labiati*, or lip-flowers of Tournefort; and is exemplified in mint, thyme, and savory. *Verticillatæ* is also the name of the 42d order in Linnæus's Fragments of a Natural Method, consisting of plants of the above description.

* *VERTICILLATE*. *adj.* [from *verticillum*, Latin.] *Verticillate* plants are such as have their flowers intermixt with small leaves growing in a kind of whorls about the joints of a stalk, as pennyroyal, horehound, &c. *Quincy*.

VERTICILLUS, a mode of flowering, in which the flowers are produced in rings at each joint of the stem, with very short footstalks. The term is exemplified in mint, horehound, and the other plants of the natural order of *Verticillatæ*.

(1.) * *VERTICITY*. *n. f.* [from *vertex*.] The power of turning; circumvolution; rotation.—Those stars do not peculiarly glance on us, but carry a common regard unto all countries, unto whom their *verticity* is also common. *Brown*.—We believe the *verticity* of the needle without a certificate from the days of old. *Glanv*.—They have a *verticity* about their own centres. *Locke*.

(2.) *VERTICITY* is that property of the loadstone whereby it turns or directs itself to one particular point.

* *VERTIGINOUS*. *adj.* [*vertiginosus*, Latin.] 1. Turning round; rotatory.—This *vertiginous* motion gives day and night successively over the whole earth. *Bentley*. 2. Giddy.—These make the workmen faint and *vertiginous*. *Woodward*.

(1.) * *VERTIGO*. *n. f.* [Lat.] A giddiness; a sense of turning in the head.—*Vertigo* is the appearance of visible objects that are without motion, as if they turned round, attended with a fear of falling, and a dimness of sight. *Quincy*.—The forerunners of apoplexy are dulcets, *vertigos*, tremblings. *Arbutnot*.—

That old *vertigo* in his head,
Will never leave him till he's dead; *Swift*.

(2.) *VERTIGO*. See *MEDICINE*, *Index*.

VERTON, a town of France, in the dep. of the Lower Loire; 4½ miles NE. of Nantes.

VERTOT D'ARDEUR, Rene Aubert de, a celebrated historian, was born of a noble family in

G g g g Normandy,

Normandy, in 1655. At 16 years of age he became Franciscan friar; afterwards he entered into the order of the Præmonstratenses, in which he had several benefices; and at length was a secular ecclesiastic. He became secretary to the dukes of Orleans, member of the Academy of Inscriptions, and historiographer of Malta. He died at Paris in 1735. His principal works are, 1. The History of the Revolution of Sweden. 2. The Revolutions of Portugal. 3. The Revolutions of the Romans. 4. The History of Malta. These works are translated into most of the languages of Europe.

VERTUE, George, a celebrated engraver, born in London, in 1684. His engravings are mostly portraits. He wrote a History of Painters, which was published by Horace Walpole, in 3 vols. 4to. He died in 1757.

(1.) **VERTUIL**, a town of France, in the dep. of the Charente, 3 miles S. of Ruffec, and 20 N. of Angoulême.

(2.) **VERTUIL**, a town of France, in the dep. of Lot and Garonne, 6 miles NE. of Tonneins.

VERTUMNUS, in mythology, a god who presided over gardens and orchards, honoured among the Egyptians, from whom the worship of this deity was transmitted to the Romans. Ovid has described the various forms assumed by this deity, in order to obtain the love of Pomona. Some have supposed that Vertumnus, whose name they derive *a vertendo*, because he had power to change his form at pleasure, marked the year and its variations; and thus they say he pleased Pomona, by bringing the fruits to maturity. Accordingly, Ovid says, that he assumed the form of a labourer, reaper, vine-dresser, and old woman, to represent the four seasons, spring, summer, autumn, and winter. Vertumnus had a temple near the market place at Rome, being represented as one of the tutelary deities of the merchants. The commentators on Ovid say, that he was an ancient king of Etruria, who, by his diligent and successful cultivation of fruits and gardens, obtained the honour of being ranked among the gods.

VERTUS, a town of France, in the dep. of Marne, 15 miles SW. of Chalons, and 22 S. of Reims.

(1.) * **VERVAIN**. **VERVINE**. *n. f.* [*verveine*, Fr. *verbena*, Lat.] A plant.—

She nightshade strows to work him ill,
Therewith the *vervain*, and her dill,
That hindereth witches of their will. *Drayton*.
Some scattering pot-herbs here and there he found,
Which, cultivated with his daily care,
And bruis'd with *vervain*, were his frugal fare. *Drayton*.

(2.) * **VERVAIN**. *mallow. n. f.* A plant. It hath the whole habit of the mallow or althæa; but differs from it in having its leaves deeply divided. *Miller*.

(3.) **VERVAIN**, in botany. See **VERBENA**.

VERUDA, an island of Austria, in the Adriatic, near the coast of Istria, 4 miles S. of Pola.

* **VERVELES** *n. f.* [*vervelle*, Fr.] Labels tied to a hawk. *Ainsworth*.

VERULÆ, a town of Italy, possessed by the **HERNICI**. *Liv.* 9. C. 42.

VERVIERS, a town of the French empire, in the dep. of the Ourte, and late bishopric of Liege; 17 miles ESE. of Liege.

* **VERVINE**. See **VERVAIN**, N° 1.

VERVINS, a town of France, in the dep. of Aisne; famous for a treaty between Henry IV. of France, and Philip II. of Spain, in 1698, 110 m. N. of Paris. *Lon.* 4. o. E. *Lat.* 49. 50. N.

VERULAM, *Lord*. See **BACON**, N° 2.

VERULAMIUM, an ancient town of England, in Hertfordshire, near St Albans, built by the Romans. It was destroyed in the wars between the Britons and Saxons. It was a chief town of the **CATTI**.

VERUMONTANUM, in anatomy, a small eminence near the passages where the semen is discharged into the urethra.

VERUS, Lucius **Ælius** Aurelius Cejonius, emperor of Rome, the son of **Ælius** by Domitia Lucilla, was adopted by Marcus Aurelius as his colleague; and was sent into Syria, out of which he drove the Parthians, for which he had a triumph. (See **PARTHIA**, § 11.) He died in his 39th year. He was a prince of dissolute manners.

(1.) * **VERY**. *adj.* [*veray*, or *verai*, French; whence *veray* in ancient English. It has its degrees *verier* and *veriest*.] 1. True; real.—He with his *very* heart despiseth me. *Shak.*—In *very* deed as the Lord liveth. 1 *Sam.*—O that in *very* deed we might behold it. *Dryd.* 2. Having any qualities, commonly bad, in an eminent degree; complete; perfect; mere.—They who had drunk of Cicero's cup, were turned into *very* beasts. *Davies*.—

There, where *very* desolation dwells. *Mil.*
3. To note the things emphatically or eminently.

'Tis an ill office for a gentleman;
Especially against his *very* friend. *Shak.*

Was not my love
The *verier* wag o' th' two? *Shak.*

—The *very* knowledge of former times passes but for ignorance in a better dress. *South*.—Cloath'd down to the *very* wrists, and up to the *very* chin. *Addis*. 4. Same, emphatically.—Roses display'd, doth fall that *very* hour. *Shak.*—These *very* cocks *L'Esfrang.*—So catholick a grace is charity, that whatever time is the special opportunity of any other Christian grace, that *very* time is also the special opportunity of charity. *Spratt*.

(2.) * **VERY**. *adv.* In a great degree; in an eminent degree.—The Greek orator was so *very* famous for this. *Addis*.—That bold challenge was thought *very* strange. *Lefley*.

VERZINO, a town of Naples, in Calabria Ultra, 3 miles SW. of Umbriatico.

VERZUOLO, a town of the French empire, in the dep. of the Po, and late marquise of Salluzzo, in a fertile soil, and fine climate, near the Vratia. It has a castle, walls, and towers. It is 2½ miles S. of Saluzzo.

VERZY, a town of France, in the dep. of the Marne, 9 miles SE. of Reims.

VESALIUS, Andrew, M. D. a physician and anatomist, born at Brussels about 1512. He studied physic at Paris under James Sylvius; but applied himself chiefly to anatomy, which was then very little known, dissections being esteemed unlawful and impious. About 1537 the republic

of Venice made him professor in the university of Padua, where he taught anatomy for 7 years; Charles V. called him to be his physician, as he was also to Philip II. of Spain; but having opened the body of a Spanish gentleman, it is said, before life was extinct, the relations complained to the inquisition, and it required interest to allow him to expiate his offence by a pilgrimage to Palestine. He was shipwrecked on his return, and thrown upon the island of Zante, where he perished, in 1562. He was author of several works, the principal of which is *De humani corporis fabrica*.

VESCAVATO, a town of Corsica.

VESCIA, an ancient town of Campania. *Liv.* 8. c. 11.

VESCOVIO, a town of Italy, in Sabina: 12 miles S. of Narni.

VESCOVO, a town of Naples, in Principato Citra: 14 miles SW. of Amalfi.

VESELIZE, a town of France, in the dep. of Meurthe, on the Prenon, 13 miles SW. of Nanci, and 162 SE. of Paris. Lon. 6. 10. E. Lat. 48. 28. N.

VESENTIO, an ancient town of Gaul, now called BESANCON.

VESENTIUM, a town of Etruria.

* To VESICATE. *v. a.* [*vesica*, Lat.] To blister.—Celsus proposes, that in all these internal wounds, the external parts be *vesicated*. *Wifem.*—I saw the cuticular *vesicated*. *Wifem.*

* VESICATION. *n. f.* [from *vesicare*.] Blistering; separation of the cuticle.—I defended the *vesication* with pledgets. *Wifem.*

VESICATORIUM, a BLISTER: an application of an acrid nature made to any part of the body, in order to draw a flux of humours to that part, and thus elevate the scarf-skin into a blister.

* VESICATORY. *n. f.* [*vesicatorium*, technical, Latin.] A blistering medicine.

* VESICLE. *n. f.* [*vesicula*, Lat.] A small cuticle, filled or inflated.—The humour is contained in a *vesicle* or little bladder. *Brown.*—The lungs are made up of such air pipes and *vesicles* interwoven with blood-vessels. *Ray.*

* VESICULAR. *adj.* [from *vesicula*, Lat.] Hollow; full of small interstices.—A muscle is a bundle of *vesicular* threads. *Cbeysne.*

VESIKE, a river of France, running into the Lignon, near its junction with the Loire.

VESLE, two rivers of France; 1. in the dep. of the Aisne; which runs into the Aisne, near Veilly; 2. running into the Saine, opposite Varonec.

VESLETS, a town of France, in the dep. of Aisne, and late Soissonnois; 10 m. from Soissons.

(1.) VESOUL, a town of France, in the dep. of Upper Saone, and ci-devant prov. of Franche Comte. It is seated at the foot of the mountain, (N° 2.) near the Dugeon; 22 miles N. of Besaçon, and 200 SE. of Paris. Lon. 6. 8. E. Lat. 47. 30. N.

(2.) VESOUL, a mountain of France, in the dep. of Upper Saone.

VESPA, the WASP; a genus of insects belonging to the order of hymenoptera. The mouth consists of two jaws without any proboscis: the superior wings are plaited; the eyes are lunar; and there is a sharp sting in the tail. There are 239 species; 3 of which are natives of Britain, viz.

1. *VESPA COARCTATA*, the *small wasp*; has

black antennæ, yellowish at the base; the head is black with a yellow spot between the antennæ, and another at the base of the upper lip. Each segment of the abdomen is bordered with yellow. It is about half an inch long. The history, as well as the manners of this species, are the same as those of the common wasp; but their buildings are on a different construction. Their nest is fastened to the branch of a tree with a kind of band; and is in bigness from the size of an orange to an egg. Wood reduced to paper is the material part of it; which if it were of a ruddy colour, might be taken for a large opening rofe. It is covered over with a varnish impenetrable by water.

2. *VESPA CRABO*, the HORNET. It has tawny antennæ; the segments of the abdomen are black on the anterior part, and yellow on the posterior, with two black spots on each. Its length is an inch; it builds in hollow trees. Its cakes or combs are composed of a substance like coarse paper, or rusty parchment. It is very voracious, devouring other insects, and even bees.

3. *VESPA VULGARIS*, the *common wasp*. The male has seven yellow segments on the abdomen, with a black triangle on each: The head is yellow, and the antennæ long. The upper lip of the female is yellow, the antennæ short; there are six segments of the abdomen with two lateral black spots on each. M. Reaumur and Dr Derham agree in distinguishing three sorts of wasps; viz. the queens or females, the males, and the common labouring wasps, called *mules*, or *neuters*, which, according to Reaumur, are neither males nor females, and consequently barren. The queens, of which there is a great number, are much longer in the body, and larger than any other wasp: they have a large heavy belly, corresponding in size to the prodigious quantity of eggs with which they are charged. The males are less than the queens, but longer and larger than the common wasps, which are the smallest of the species: they have no stings, with which both the queens and common wasps are furnished. There are in one nest 200 or 300 males, and as many females: but their number depends on the size of the nest: and Dr Derham observed, that the males were bred, or at least mostly resided, in the two cells or partings, between the combs, next to the uppermost cell. The antennæ or horns of the male wasps are longer and larger than those of either of the other sorts: but the chief difference consists in their parts of generation, which are altogether different from those of other wasps. The males are the labourers belonging to a nest, and are employed in procuring materials for the nests and in constructing them, and also in furnishing the other wasps, and the young, with provisions. At the beginning of winter, the wasps destroy all the eggs, and all the young ones without exception: all the males and males, which have been employed in this work, being unfurnished with provisions, perish; and none survive except some few females, which, according to Reaumur, were fecundated in October, and raise a new colony in the beginning of spring. In spring a new commonwealth is founded by a single female impregnated during the autumn, and that has weathered out the severity of the winter. It digs a hole in a dry

G g g g soil,

soil, contrives itself a sinuous inlet, or else it takes up with the dwelling place of a mole, where it hastily builds a few cells and deposits its eggs. Within 20 days, they have gone through the different states of larvæ, chrysalids, and turned to wasps. Nature all-wise provides for every thing. The male wasps are the only ones that labour at laying the foundation of the republic. The first eggs that are hatched prove to be neuter wasps. No sooner are they come into existence, but they fall to work, enlarge the hole, and go about upon wood, lattice work, and window sashes, in search of materials for buildings. With their teeth they cut, hack, and tear off small fibres of wood, which they moisten with a liquor they disgorge, and then convey them to the work-shop. Other labourers are in waiting for them, who with those materials set about the construction of the wasp nest, which is commonly round, and made of materials resembling fine paper. The common covering of it, which is formed of several leaves or layers, with intermediate spaces, is pierced by two holes at a distance from one another, one of which is used for the entrance of the wasps, and the other only for their exit. The space within this covering is cut by a number of horizontal planes, with intervals between them of the size of about half an inch: they are suspended from one another by ligaments; and attached to the covering by their edges: they all have hexagonal cells in their lower surface. The eggs of the wasp are of an oblong form, and resemble those of a common fly, but they are larger; they are always fastened to the angles of a cell, never to the sides of it. They are usually placed single; it is very rare to find two in one cell; and, if they are laid so, it seems that only one succeeds; for there is never found more than one worm in a cell. The heads of all the nymphs are turned toward the centre of the comb, and their tails go obliquely downward toward the base of the cell. They are continually seen opening their mouths, and moving their forcipes, seeming ever hungry, and impatiently waiting for food from their parents. The cells are left open till the nymph is at its full growth; then the wasps cover it over with a thin lid, under which the worm undergoes its transformation; and as soon as it is arrived at the wasp-state, it eats its way through this thin cover, and comes to work with the rest. The elder brothers, or first hatched insects, take amazing care of those born after them, by proportioning their food to the delicacy of their stomach. First, it consists of the juice of fruits and meats; afterwards it is the carcasses of insects. The caterers provide for the labourers. Each one takes his own portion; there is no dispute, no fighting. The republic grows daily more numerous, living in profound peace. Every individual, as soon as he has acquired sufficient strength, flies away to the fields. They then become a gang of banditti. During the period of plenty, the wasps bring all the booty to the nest, and share it amongst them. Towards the month of October provisions begin to run short: The neuters and males tear from their cradles the eggs, the larvæ, the chrysalids, and the new-born insects, without showing mercy

to any. They next fight against one another. Frosts and rains throw them into a state of languor, and they almost all perish, some few females alone excepted, which in the ensuing spring become founders of new republics.

(1.) VESPASIAN, the 10th emperor of Rome; remarkable for his clemency and other virtues. See ROME, § 30.

(2.) VESPASIAN, TITUS. See ROME, § 31; and TITUS, N° 4.

(1.) * VESPER, *n. f.* [Lat.] The evening star; the evening.—These signs are black *Vesper's* pageants. *Shak.*

(2.) * VESPERS, *n. f.* without singular, [from *vesperus*, Latin.] The evening service of the Roman church.

VESPERTILIO, the BAT; a genus of quadrupeds, belonging to the order of *primates*. All the teeth are erect, pointed, near each other; and the first 4 are equal. The fore-feet have the toes connected by a membrane expanded into a kind of wings by which the creature is enabled to fly. There are 28 species, of which 4 are natives of Britain. The most remarkable are,

1. VESPERTILIO MURINUS, common bat; has a tail: the lips and nose are simple; and the ears are smaller than the head. It inhabits Europe, and is found in Britain. This animal flies only during the night, living chiefly on moths: when it lights on the ground, it is unable to rise again till it has crawled to some height: it remains torpid during winter, revives in the beginning of the spring, and comes abroad in the dusk of the evening. This species is two inches and a half long; when full grown, and about nine inches in extent; the fur is of a mouse-colour, tinged with reddish; it generally skims near the ground, with an uneven jerking flight; and often seeking for knots and other aquatic insects, flies close by the surface of water. They breed in summer, and are preyed on by owls. Bats are very voracious, if proper food is to be had; and though moths and other insects be their natural and common food, yet if flesh, whether raw or roasted, fresh or corrupted, comes in their way, they devour it with greediness. In this country they appear early in spring, flying about only in the evenings; but are sometimes roused from their torpidity by a warm day or two during winter, and will then venture out in quest of food, but recommence their state of hybernation whenever the cold returns: They retire at the end of summer into caves, ruined houses, or the roofs and eaves of houses, where they remain suspended by the hind legs, and enveloped in their wings, generally in large numbers. Bats may be caught by means of the flower cups of bur-dock, whitened and thrown up in the way of their flight; they are attracted by the whiteness, and the hooks of the bur, sticking to their membranous wings, making them fall to the ground. Bats have been subjected to some cruel experiments, by the Abbe Spallanzani and M. de Jurine; from which it appears, 1st, That the eyes of the bat are not indispensably necessary to it for finding its way; 2d, That the organ of hearing appears to supply that of sight in the discovery of bodies, and to furnish these animals with dis-

nt sensations to direct their flight and enable them to avoid those objects that may present themselves.

2. *VESPERTILIO NOCTULIS*, hath the nose lightly bilobated; ears small and rounded; on the chin a minute verruca; hair reddish ashy-colour; length of the rump 2 inches eight-tenths; all one inch seven-tenths; extent of wings 13 inches; inhabits Great Britain and France; flies high in search of food, not skimming near the ground. A gentleman informed Mr Pennant, that he saw taken, under the eaves of Queen's College, Cambridge, in one night, 185 of these animals; the second night, 63; the third night, 5; and that each that was measured had 15 inches extent of wings.

3. *VESPERTILIO PERUVIANUS*, the *Peruvian bat*, hath a head like a pug-dog; large straight-pointed ears; two canine teeth, and two small cutting teeth between each, in each jaw, the tail is inclosed in the membrane which joins to each hind-leg, and is also supported by two long cartilaginous ligaments involved in the membrane: colour of the fur, iron grey: body equal to that of a middle sized rat; extent of the wings, two feet five inches.

4. *VESPERTILIO SPECTRUM*, or *specfre*, with a long nose; large teeth; long, broad, and upright ears: at the end of the nose a long conic erect membrane, bending at the end, and flexible; hair on the body cinereous, and pretty long: wings full of ramified fibres; the membrane extends from hind leg to hind leg; no tail; but from the rump extend three tendons, terminating at the edge of the membrane. By Seba's figure the extent of the wings are two feet two inches; from the end of the nose to the rump, $7\frac{1}{2}$ inches. They inhabit South America; live in the palm trees; grow very fat; called *vampyre*, by M. de Buffon, who supposes it to be the species that suck human blood.

5. *VESPERTILIO VAMPIRUS*, the *VAMPIRE*, or *Ternate bat*, with large canine teeth; 4 cutting teeth above, the same below; sharp black nose; large naked ears; the tongue is pointed, terminated by sharp aculeated papillæ; talons very crooked, strong, and compressed sidewise; no tail; the membrane divided behind quite to the rump; head of a dark ferruginous colour; on the neck, shoulder, and under side, of a much lighter and brighter red; on the back the hair shorter, dusky, and smooth; the membranes of the wings dusky. They vary in colour; some being entirely of a reddish brown, others dusky. These monsters inhabit Guinea, Madagascar, and all the islands from thence to the remotest in the Indian Ocean. They fly in flocks, and perfectly obscure the air with their numbers; they begin their flight from one neighbouring island to another immediately on sun-set, and return in clouds from the time it is light till sun-rise. They live on fruits; and are so fond of the juice of the palm-tree, that they will intoxicate themselves with it till they drop on the ground. It is most likely, from the size of their teeth, they are carnivorous. Mr Edwards relates, that they will dip into the sea for fish. They swarm like bees; hanging by one another from the trees in great

clusters. The Indians eat them, and declare the flesh to be very good: they grow excessively fat at certain times of the year. The French who live in the Isle de Bourbon boil them in their bouillon to give it a relish. The negroes have them in abhorrence. Many are of an enormous size: Beckman measured one, whose extent from tip to tip of the wings was 5 feet 4 inches; and Dampier another, which extended farther than he could reach with outstretched arms. Their bodies are from the size of a pullet to that of a dove: their cry is dreadful, their smell rank, their bite, resistance, and fierceness great, when taken. The ancients had some knowledge of these animals. Herodotus mentions certain winged wild beasts like bats, that molested the Arabs who collected the cassia, to such a degree, that they were obliged to cover their faces, all but their eyes, with skins. It is very probable, as M. de Buffon remarks, it was from such relations that poets formed their fictions of *HARPIES*. Linnæus gives this species the title of *vampyre*; conjecturing it to be the kind which draws blood from people in their sleep. M. de Buffon denies it; ascribing that faculty only to the *SPECTRUM*, N^o 4. But there is reason to imagine that this thirst after blood is not confined to the bats of one continent, nor to one species; for Bontius and Nieuhoff inform us, that the bats of Java seldom fail attacking persons who lie with their feet uncovered, whenever they can get access; and Gumilla, after mentioning a greater and less species found on the banks of the Oronque, declares them to be equally greedily after human blood. Persons thus attacked have been known to be near passing from a sound sleep into eternity. The bat is so dexterous a bleeder, as to insinuate its aculeated tongue into a vein without being perceived, and then suck the blood till it is satiated; all the while fawning with its wings, and agitating the air in that hot climate in so pleasing a manner, as to lull the sufferer into a still sounder sleep. It is therefore very unsafe to rest either in the open air, or to leave open any entrance to these dangerous animals; but they do not confine themselves to human blood; for M. Condamine says, that in certain parts of America, they have destroyed all the great cattle introduced there by the missionaries. See *Plate CCCXXIX. fig. 3.*

* *VESPERTINE*. *adj.* *vespertinus*, Lat.] Happening or coming in the evening; pertaining to the evening.

VESPRIN, a town and bishop's see of Hungary; taken by Count Tilly in 1683, and retaken by Count Mercy in 1684. Its fortifications were razed in 1701. It is 16 miles SW. of Stuhlweissenburg, and 33 SSE. of Raab.

VESPUTIUS. See *AMERICUS*.

VESSA, a town of Sicily.

VESSAUX, a town of France, in the dep. of the Ardeche, 9 miles SW. of Privas.

(1.) * *VESSEL*. *n. f.* [*vasselle*, Fr. *vas*, Latin.] x. Any thing in which liquids, or other things are put.—

For Banquo's issue have I filled my mind,
Put rancours in the vessel of my peace,
Only for them.

—If you have two vessels to fill, and you empty one

Shak.
one

one to fill the other, there still remains one *vesfel* empty. *Burnet*. 2. The containing parts of an animal body.—Of these *vesfels* are constituted the organs of the body. *Arbutnot*.—Another cause of a wasting ulcer in the lungs, is, the disruption of a *vesfel*. *Blackmore*. 3. Any vehicle in which men or goods are carried on the water.—They had *vesfels* to transport themselves. *Rakigh*.—The Phœnicians first invented open *vesfels*. *Heylyn*.—The *vesfel* is represented as stranded. *Addis*.—

From storms of rage, and dangerous rocks of pride,

Let thy strong band this little *vesfel* guide.
It was thy hand that made it, through the tide
Impetuous of this life, let thy command
Direct my course, and bring me safe to land.

Prior.

Now secure the painted *vesfel* glides,
The fun-beams trembling on the floating tides.

Pope.

4. Any capacity; any thing containing.—

I have my fill

Of knowledge, what this *vesfel* can contain.

Milt.

5. [In theology.] One relating to God's household.—The few chosen *vesfels*. *Hammond*.

(1.) *VESSEL*. *n. f.* A general name given to the different sorts of ships which are navigated on the ocean, or in canals and rivers. It is, however, more particularly applied to those of the smaller kind, furnished with one or two masts. See *SHIP*, § 3, 19.

* *To VESSEL*. *v. a.* [from the noun.] To put into a vessel; to barrel.—Take earth and *vesfel* it, and in that set the seed. *Bacon*.

* *VESSETS*. *n. f.* A kind of cloth commonly made in Suffolk. *Bailey*.

* *VESSICNON*. *n. f.* [among horsemen.] A windgall, or soft swelling on the inside and outside of a horse's hoof. *Diſt*.

* *VEST*. *n. f.* [*vestis*, Latin.] An outer garment.—

O'er his lucid arm

A military *vest* of purple flowed. *Milton*.

When the queen in royal habits drest,

Old mystick emblems grace th' imperial *vest*.

Smith.

* *To VEST*. *v. a.* [from the noun.] 1. To dress; to deck; to enrobe.—

The verdant fields with those of heaven may vie,

With either *vested*, and a purple sky. *Dryd*.

Light! Nature's resplendent robe,

Without whose *vesting* beauty all were wrapt
In gloom. *Thomson*.

2. To dress in a long garment.—

Just Simeon and prophetic Anna spoke

Before the altar and the *vested* priest. *Milton*.

3. To make professor of; to invest; it has *with* before the thing possessed.—*Vested with* power over them. *Locke*.—

Had I been *vested with* the monarch's power,
Thou must have sigh'd, unlucky youth! in vain.

Prior.

4. To place in possession; with *in* before the possessor.—Entirely *vested in* the parliament. *Clarend*.—Empire was *vested in* him. *Locke*.

(1.) *VESTA*, in pagan worship, the same as Cybele. See *CYBELLE*, and *OPS*.

(2.) *VESTA*, in pagan worship, the goddess FIRE, was the daughter of Saturn and Ops and the sister of Ceres. She was so much in with chastity, that on Jupiter's ascending throne and offering to grant whatever she desired the only desired the preservation of her virgin which she obtained.—*Vesta* was not represented in her temple by any image.

(1.) * *VESTAL*. *adj.* [*vestalis*, Latin.] Denotes pure virginity.—

Her *vestal* livery is but sick and green;

And none but fools do wear it. *Sh*

(2.) * *VESTAL*. *n. f.* [*vestalis*, Latin.] A woman consecrated to *Vesta*; a pure virgin.—

Women are not

In their best fortunes strong, but want
perjure

The ne'er touch'd *vestal*.

How happy is the blameless *vestal*'s lot!

The world forgetting, by the world forgot. *P*

(3.) The *VESTALS*, among the ancient Romans were priestesses of the goddess *Vesta*, and had perpetual fire committed to their charge; there were at first only four in number, but afterwards increased to six; and it does not appear that the number ever exceeded six, among whom was superior to the rest, and called *vestalis maxima*. The *vestals* were chosen from six to ten years of age, and obliged to strict continency for 30 years the first 10 of which were employed in learning ceremonies of religion, the next 10 in the performance of them, and the 10 last in teaching them to the younger *vestals*. The habit of the *vestal* consisted of an head-dress, called *infula*, which clove to the head, and from whence hung certain laces called *vitta*; a kind of surplice made of white linen, and over it a purple mantle with long train to it.

VESTALIA, in Roman antiquity, a festival celebrated in honour of the goddess *Vesta*, on the 5th of the ides of June; i. e. on the 9th of the month.

(1.) *VESTIBLE*. See *ARCHITECTURE*, § 30

(2.) * *VESTIBULE*. *n. f.* [*vestibulum*, Latin.] The porch or first entrance of a house.

* *VESTIGE*. *n. f.* [*vestigium*, Latin.] Footstep; mark left behind in passing.—The truth passes slightly that they must use great subtilty to trace its *vestiges*. *Harvey*.

VESTINCHA, a town of Bosnia, 44 miles S. Birac, and 68 S. of Novi.

VESTITZA, a town of European Turkey, in the Morea, 44 miles ENE. of Chiarenza.

* *VESTMENT*. *n. f.* [*vestimentum*, Latin.] Garment; part of dress.—That so mean a thing as a *vestment* should withdraw their hearts from the service of God. *Hooker*.—Those sable *vestments* and that bright aspect. *Waller*.—*Vestments* suitable to the persons. *Dryden*.

(1.) * *VESTRY*. *n. f.* [*vestiaire*, Fr. *vestiarium* Latin.] 1. A room pendant to the church, in which the sacerdotal garments, and consecrated things are repositied.—The chalice from the robb'd *vestry* brings. *Dryden*. 2. A parochial assembly commonly convened in the vestry.—They created

the new senators, *vestry* elders, without any amendment of the word. *White*.—The common-council are chosen every year by the *vestry*. *rend*.—Where constables will not summon us *vestries*. *Blunt to Pope*.

2.) VESTRY is also a meeting consisting of the minister, church-wardens, and chief men of most parishes, who make a parish vestry. By custom are select vestries, being a certain number of persons chosen to have the government of the parish, make rates, and take the accounts of church-wardens, &c.

* VESTURE. *n. f.* [*vesture*, old French; *vestura*, Italian.] Garment; robe.—Her envious *vesture* seditiously fight repelling. *Fairfax*.—Cæsar's *vesture* wounded. *Shak.*—Should from her *vesture* chance steal a kiss. *Shak.*—There polish'd chests emboister'd *vestures* grac'd. *Pope*. 2. Dress; habit; external form.—This muddy *vesture* of decay. *Shak.*—Rocks, apparel'd with a *vesture* of plants. *Newton*.

VESUBIA, a river of the French empire, in the p. of the Po; and late Piedmontese, which runs to the Var, 8 miles N. of Nice.

VESULUS, a mountain of Liguria, among the Alps, at the source of the Po, now called VISO.

VESUVIAN, in mineralogy, white garnet of Vesuvius. See MINERALOGY, Part II. Ch. IV. l. 1. Ord. 1. Gen. IX. Sp. 3.

VESUVIUS, a celebrated volcano of Italy, 6 miles E. of Naples. This mountain has two tops; one of which only goes by the name of *Vesuvius*, the other being now called SOMMA; but Sir William Hamilton is of opinion, that the latter is that the ancients called *Vesuvius*. The perpendicular height of Vesuvius is only 3700 feet, though the ascent from the foot to the top is three Italian miles. One side of the mountain is well cultivated and fertile, producing great plenty of vines; but the south and west sides are entirely covered with cinders and ashes; while sulphureous smoke constantly issues from the top, sometimes attended with the most violent explosions of stones, the emission of great streams of lava, and all the other attendants of a most formidable volcano. The first of these eruptions recorded in history took place in the year 79: at which time the two cities of POMPEII and Herculaneum were entirely buried under the stones and ashes thrown out. Incredible mischief was also done to the neighbouring country, and numbers of people lost their lives, among whom was PLINY the Elder. It is the opinion of the best judges, however, that this eruption was by no means the first that had ever happened. The very streets of those cities which were at that time overwhelmed are unquestionably paved with lava. Since that time 30 different eruptions have been recorded, some of which have been extremely violent. In 1538, a mountain, three miles in circumference and a quarter of a mile in perpendicular height was thrown up in the course of one night. In 1766, Sir William Hamilton, began to observe the phenomena of this mountain; and since that time the public has been favoured with more exact and authentic accounts of the various changes which have taken place in Vesuvius than what were to be had before. The first great

eruption taken notice of by this gentleman was that of 1767, which though very violent, was mild in comparison with that of 1538. From 1767 Vesuvius never ceased for ten years to send forth smoke, nor were there many months in which it did not throw out stones, scorice, and cinders; which, increasing to a certain degree, were usually followed by lava; so that from the year 1767 to 1779 there were nine eruptions, some of them very considerable. In the month of August that year, however, an eruption took place, which, for its extraordinary and terrible appearance, may be reckoned among the most remarkable of any recorded concerning this or any other volcano. During the whole of July the mountain continued in a state of fermentation. Subterraneous explosions and rumbling noises were heard; quantities of smoke were thrown up with great violence, sometimes with red-hot stones, scorice, and ashes; and towards the end of the month these symptoms increased to such a degree as to exhibit, in the night the most beautiful fire-works. On Thursday 5th August the volcano appeared most violently agitated; a white and sulphureous smoke issued continually and impetuously from its crater, one puff seeming to impel another; so that a mass of them was soon accumulated, to appearance, four times the height and size of the volcano itself. These clouds of smoke were exceedingly white, resembling an immense accumulation of bales of the whitest cotton. In the midst of this very white smoke vast quantities of stones, scorice, and ashes were thrown up to the height of 2000 feet; and a quantity of liquid lava, seemingly very heavy, was lifted up just high enough to clear the rim of the crater, and take its way down the sides of the mountain. This lava, having run violently for some hours, suddenly ceased, just before it had reached the cultivated parts of the mountain, near four miles from the spot whence it issued. The heat, all this day, was intolerable at the towns of Somma and Ottaviano; and was sensibly felt at Palma and Lauri, which are much farther off. Reddish ashes fell so thick on the two former, that the air was darkened, so that objects could not be distinguished at the distance of ten feet. Long filaments of a vitrified matter, like spun glass, were mixed, and fell with these ashes; several birds in cages were suffocated, and the leaves of the trees in the neighbourhood of Somma were covered with white and very corrosive salt. About 12 at night, on the 7th, the fermentation of the mountain seemed greatly to increase. Our author was watching the motions of the volcano from the mole at Naples, which has a full view of it. Several glorious picturesque effects had been observed from the reflection of the deep red fire within the crater of Vesuvius, and which mounted high amongst those huge clouds on the top of it: when a summer storm, called in that country a *tropea*, came on suddenly, and blended its heavy watery clouds with the sulphureous and mineral ones, which were already like so many other mountains piled up on the top of the volcano. At this moment a fountain of fire was shot up to an incredible height, casting so bright a light, that the smallest objects were clearly distinguishable at any place within

within six miles or more of Vesuvius. The black stormy clouds, passing swiftly over, and at times covering the whole or a part of the bright column of fire, at other times clearing away and giving a full view of it, with the various tints produced by its reverberated light on the white clouds above, in contrast with the pale flashes of forked lightning that attended the tropea, forming such a scene as no power of art can express. One of the king's gamekeepers, who was out in the fields near Ottaviano while this storm was at its height, was surprised to find the drops of rain scald his face and hands; a phenomenon probably occasioned by the clouds having acquired a great degree of heat in passing through the above-mentioned column of fire. On the 8th the mountain was quiet till towards 6 P. M. when a great smoke began to gather over its crater; and about an hour after a rumbling subterraneous noise was heard in the neighbourhood of the volcano; the usual throws of red-hot stones and scorix began and increased every instant. The crater, viewed through a telescope, seemed much enlarged by the violence of last night's explosions, and the little mountain on the top was entirely gone. About 9, a most violent report was heard at Portici and its neighbourhood, which shook the houses to such a degree as made the inhabitants run out into the streets. Many windows were broken, and walls cracked by the concussion of the air on this occasion, though the noise was but faintly heard at Naples. In an instant a fountain of liquid transparent fire began to rise, and gradually increasing, arrived at last at the amazing height of 10,000 feet and upwards. Puffs of smoke, as black as can possibly be imagined, succeeded one another hastily, and accompanied the red-hot, transparent, and liquid lava, interrupting its splendid brightness here and there by patches of the darkest hue. Within these puffs of smoke, at the very moment of emission, a bright but pale electrical fire was observed playing briskly about in zig-zag lines. The wind was SW. and, though gentle, was sufficient to carry these puffs of smoke out of the column of fire; and a collection of them by degrees formed a black and extensive curtain behind it; in other parts of the sky it was perfectly clear, and the stars bright. The fiery fountain, of such immense magnitude, on the dark ground just mentioned, made the finest contrast imaginable; and the blaze of it reflected from the surface of the sea, which was at that time perfectly smooth, added greatly to this sublime view. The lava, mixed with stones and scorix, having risen to the amazing height already mentioned, was partly directed by the wind towards Ottaviano, and partly falling, still red-hot and liquid, upon the top of Vesuvius, covered its whole cone, part of that of the summit of Somma, and the valley between them. The falling matter, being nearly as inflamed and vivid as that which was continually issuing fresh from the crater, formed with it one complete body of fire, which could not be less than two miles and a half in breadth, and of the extraordinary height above mentioned, cast a heat to the distance of at least six miles round. The brushwood on the mountain of Somma was soon in a blaze, and the flame

of it being of a different colour from the deep red of the matter thrown out by the volcano, and from the silvery blue of the electrical fire, still added to the contrast of this most extraordinary scene. The black cloud, increasing greatly, once bent towards Naples, and threatened the city with speedy destruction; for it was charged with electrical fire, which kept constantly darting about in bright zig-zag lines. This fire, however, rarely quitted the cloud, but usually returned to the great column of fire whence it proceeded; though once or twice it was seen to fall on the top of Somma, and set fire to some dry grafs and bushes. Fortunately the wind carried back the cloud just as it reached the city, and had begun to occasion great alarm. The column of fire, however, still continued, and diffused such a strong light, that the most minute objects could be discerned at the distance of ten miles or more from the mountain. Mr Morris informed our author, that at Sorrento, which is 12 miles distant from Vesuvius, he read the title-page of a book by that volcanic light. All this time the miserable inhabitants of Ottaviano were involved in the utmost distress and danger by the showers of stones which fell upon them, and which, had the eruption continued for a longer time, would most certainly have reduced their town to the same situation with Herculaneum and Pompeii. The mountain of Somma, at the foot of which the town of Ottaviano is situated, hides Vesuvius from the view of its inhabitants; so that till the eruption became considerable, it was not visible to them. On Sunday night, when the noise increased, and the fire began to appear above the mountain of Somma, many of the inhabitants flew to the churches, and others were preparing to quit the town, when a sudden and violent report was heard; soon after which, they found themselves involved in a thick cloud of smoke and ashes; a horrid clashing noise was heard in the air, and presently fell a vast shower of stones and large pieces of scorix, some of which were of the diameter of 7 or 8 feet, which must have weighed more than 100 lb. before they were broken, as some of the fragments which Sir William Hamilton found in the streets still weighed upwards of 60 lb. When these large vitrified masses either struck against one another in the air, or fell on the ground, they broke in many pieces, and covered a large space of ground with vivid sparks of fire, which communicated their heat to every thing that was combustible. These masses were formed of the liquid lava; the exterior parts of which were become black and porous by cooling in their fall through such a vast space; whilst the interior parts, less exposed, retained an extreme heat, and were perfectly red. In an instant, the town and country about it were on fire in many parts, for there were several straw huts in the vineyards, which had been erected for the watchmen of the grapes; all of which were burnt. A great magazine of wood in the heart of the town was all in a blaze; and had there been much wind, the flames must have spread universally, and all the inhabitants would have been burnt in their houses; for it was impossible for them to stir out. Some, who attempted it with pillows, tables, chairs, the tops of wine casks, &c. on their heads

were either knocked down or soon driven back to their close quarters under arches and in the cellars of their houses. Many were wounded, but only two persons died of their wounds. To add to the horror of the scene, incessant volcanic lighting was whirling about the black cloud that surrounded them, and the sulphureous smell and heat would scarcely allow them to draw their breath. In this dreadful situation they remained about 25 minutes, when the volcanic storm ceased all at once, and Vefuvius remained fullen and silent. Some time after the eruption had ceased, the air continued greatly impregnated with electrical matter. The duke of Cottofiano told our author, that having, about half an hour after the great eruption had ceased, held a Leyden bottle, armed with a pointed wire, out at his window at Naples, it soon became considerably charged. But whilst the eruption was in force, its appearance was too alarming to allow one to think of such experiments.—He was informed also by the prince of Monte Mileto, that his son, the duke of Populi, who was at Monte Mileto the 8th of August, had been alarmed by the shower of cinders that fell there; some of which he had sent to Naples weighing 2 oz.; and that stones of an ounce weight had fallen upon an estate of his ten miles farther off. Monte Mileto is about 30 miles from the volcano. The Abbé Cagliani also related, that his sister, a nun in a convent at Manfredonia, had written to inquire after him, imagining that Naples must have been destroyed, when they, at so great a distance, had been alarmed by a shower of ashes which fell on the city at 11 P. M. so much as to open all the churches, and go to prayers. As the great eruption happened at 9, these ashes must have traveled 100 miles in 2 hours. Nothing could be more dismal than the appearance of Ottaiano after this eruption. The houses were unroofed, half buried under the black scoriz and ashes; all the windows towards the mountain were broken, and some of the houses themselves burnt; the streets choked up with ashes, in some narrow places, not less than 4 feet thick; and a few of the inhabitants who had just returned, were employed in clearing them away, and piling them up in hillocks, to get at their ruined houses. The palace of the prince of Ottaiano is situated on an eminence above the town, and nearer the mountain. The steps leading up to it were deeply covered with volcanic matter; the roof was totally destroyed, and the windows broken, but the house itself, being strongly built, had not suffered much. An incredible number of fragments of lava were thrown out during the eruption, some of which were of immense magnitude. The largest measured by Sir William Hamilton was 108 feet in circumference, and 17 in height. This was thrown at least a quarter of a mile clear of the mouth of the volcano. Another, 66 feet in circumference, and 19 in height, being nearly of a spherical figure, was thrown out at the same time, and lay near the former. This last had the marks of being rounded, nay, almost polished, by continual rolling in torrents or on the sea shore. Our author conjectures that it might be a spherical volcanic salt, such as that of 45 feet in circumference mentioned by M. de St Fond, in his *Treatise of*

VOL. XXII. PART II.

Extinguished Volcanoes. A third of 16 feet in height, and 92 in circumference, was thrown much farther, and lay in the valley between Vefuvius and the Hermitage. It appeared also, from the large fragments that surrounded this mass, that it had been much larger while in the air. Vefuvius continued to emit smoke for a considerable time after this great eruption, so that our author was apprehensive that another would soon ensue; but from that time nothing comparable to the above has taken place. From the time of this great eruption, to 1786, our author kept an exact diary of the operations of Vefuvius, with drawings, showing, by the quantity of smoke, the degree of fermentation within the volcano. The operations of the subterraneous fire, however, appear to be very capricious and uncertain. One day there will be the appearance of a violent fermentation, and the next every thing will be calmed; but whenever there has been a considerable ejection of scoriz and cinders, it has been a constant observation, that the lava soon made its appearance, either by boiling over the crater, or forcing its way through the crevices in the conical part of the mountain. In the year 1794 there was a very tremendous eruption, and the mischief done was very considerable; the lava covered and totally destroyed five thousand acres of rich vineyards and cultivated land, and drove the inhabitants of Torre del Greco from the town, a great part of the houses being either buried, or so injured as to be uninhabitable. The damage done in the vineyards by the ashes was also immense. The writer of this was on the top of Vefuvius in the month of May, 1801; the mountain was perfectly quiet, with smoke issuing from a few crevices like the smoke of a small fire. The effects of the eruption in 1794 were very visible, especially in Torre del Greco. A very violent eruption has been mentioned in the papers about two years ago, but we have no authentic description, either of its nature or of its effects. Sir William Hamilton observes, that the inhabitants of Naples in general pay so little attention to the operations of this volcano, that many of its eruptions pass unnoticed by at least two thirds of them. At the same time we know from undoubted evidence and enquiry on the spot, that during a violent eruption which seems to threaten danger to the city, the Neapolitans carry their clamours and their superstition to almost an incredible height; going in troops to their churches, and particularly addressing themselves to their tutelar saint Januarius. It is very probable, however, that the moment the danger is over they forget it. It is remarkable to observe, with what readiness and *sans froid* they inhabit the towns and villas on the brow of the mountain, and how quickly they return to spots which have suffered the most severely. Torre del Greco exhibited in 1801 the appearance of a ruined town; but the inhabitants were living in it in perfect security; a church had been completely overwhelmed, *i. e.* covered with lava, leaving about the height of two moderate stories of the steeple visible. To this they were at that time adding a new church, which was nearly completed. We were assured upon the spot, that in the eruption 1794, the lava flowed down slowly like a river into the sea; that

H h h h

when

when it was opposed by walls or houses, it accumulated and covered them, unless it found an easy vent elsewhere. It was added, and we firmly believe it, that the accumulated mass of liquid rock continued hot for a full twelvemonth. The inhabitants are not much alarmed by a stream of lava, which moves slowly, from which they can always remove themselves, and carry off their moveable property; the great danger consists in the clouds of burning ashes, which fly to a great distance, and the fall of which can neither be anticipated nor avoided. In 1794, we were told that one night, an immense mass of matter issued with prodigious force from the crater, and rose to a great perpendicular height; it for the most part fell down into the crater again, leaving a considerable hollow, which in 1802 was already covered with a slight vegetable mould.

(1.) * **VETCH**. *n. f.* [*vicia*, Latin.] A plant with a papilionaceous flower, producing a legume.—Where *vetches*, pulse, and tares have stood. *Dryden*.—An *ervum* is a sort of *vetch*, or small pea. *Arbutnot*.

(2.) **VETCH**, in botany. See *VICIA*, and *RURAL ECONOMY*, Part I. *Scd.* VI.

VIBEX, is sometimes used by physicians, for a black and blue spot in the skin occasioned by an efflux or extravasation of blood.

VIBIUS, SEQUESTER, a Latin writer, whose treatise De Fluminibus is extant; and was published by Oberlin, at Argent. in 8vo. 1778.

VIBO, a town of Italy, in Lucania, anciently called *Hippo*.

(1.) VIBORG, an ancient city of Denmark, in N. Jutland; 2 miles in circuit, with 3 churches, 6 miles N. of Hamborg. Lon. 9. 18. E. Lat. 36. 32. N.

(2.) VIBORG, a sea-port of Russia, on the gulf of Finland. It exports planks, tallow, pitch, and tar to Britain, 68 miles NW. of Petersburg.

VIBORSKOI, a prov. of Russia, bounded N. and W. by Finland, S. by the Gulf and Petersburg, E. by lake Ladoga and Olonetz, 152 miles long, and from 60 to 100 broad.

VIBRAIS, a town of France, in the dep. of the Sarte, 9 miles N. of Calais.

(1.) * To VIBRATE. *v. a.* [*vibro*, Lat.] 1. To brandish; to move to and fro with quick motion. 2. To make to quiver.—Breath vocalized, that is vibrated or undulated. Holder.

(2.) * To VIBRATE. *v. n.* 1. To play up and down, or to and fro.—Make it *vibrate* a little up and down. Boyle.—Do not all fixed bodies, when heated beyond a certain degree, emit light, and shine? And is not this emission performed by the vibrating motions of their parts? Newton. 2. To quiver.—The whisper *vibrates* on his sovereign's ear. Pope.

(1.) * VIBRATION. *n. f.* [from *vibro*, Latin.] The act of moving, or state of being moved with quick reciprocations, or returns; the act of quivering.—The fallies and vibrations of an harmless activity. South.—Do not the rays of light, in falling upon the bottom of the eye, excite vibrations in the tunica retina? Newton.—Mild vibrations sooth the parted soul. Thomson.

(2.) VIBRATION, in mechanics, a regular reciprocal motion of a body, as a pendulum.

VIBRATO, 'a river of Naples, in Abruzz Ultra; which runs into the Adriatic, 2 m. NNE. of Julia Nova.

VIBURNUM, in botany; a genus of plants of the class *pentandria*, order *trigynia*; and in the natural system, arranged under the 43d order, *di-morfe*. The calyx is quinquepartite and above the corolla divided into five laciniae; the fruit monospermous berry. There are 19 species; 3 of which are natives of Britain.

1. VIBURNUM LANTANA, common viburnum wayfaring, or plant meally tree, rises with woody stem, branching 20 feet high, having very pliant shoots covered with a lightish brown bark large heart-shaped, veined, serrated leaves, white and hoary underneath; and the branches terminated by umbels of white flowers, succeeded by bunches of red berries, &c.

2. VIBURNUM OPULUS, or *elder rose*; consisting of two varieties, one with flat flowers, the other globular. The former grows 18 or 20 feet high, branching opposite, of an irregular growth and covered with a whitish bark; large lobate or three-lobed leaves on glandulose footstalks, and large flat umbels of white flowers at the end of the branches, succeeded by red berries. The latter grows 15 or 18 feet high, branching like the other, garnished with large lobate, or three-lobed leaves, on glandular footstalks; and large globular umbels of white flowers at the ends of the branches, in great abundance. This tree when in bloom, exhibits a singularly fine appearance the flowers, though small, are collected numerously into large globular umbels round like a ball; hence it is sometimes called *snow-ball tree*.

3. VIBURNUM TINUS, common *laurestinus*, or evergreen viburnum; grows eight or ten feet high or more, branching numerously from the bottom upwards, assuming a close bushy growth, with the branches somewhat hairy and glandulous; very closely garnished with oval, wholly entire leaves, of a strong green colour, placed in pairs opposite; and whitish and red flowers, collected numerously in large umbellate clusters all over the plant, at the sides and ends of the branches, from January until March or April, exhibiting a most beautiful appearance. There are very many varieties. All the different species of viburnum, both deciduous and evergreen kinds, being of the tree kind, are woody and durable in root, stem, and branches. They may all be propagated by layers; and are of such hardy temperature, as to grow freely in the open ground all the year, in shrubberies and other hardy plantations.

(1.) VIC, a town of France, on the Seille, in the dep. of Meurthe, 197 miles E. of Paris.

(2.) VIC, a small town of France, in the dep. of the Upper Pyrennees, on the Adour, 11 miles N. of Tarbes.

(3.) VIC, a town of Spain, in Catalonia, somewhat decayed, but still containing handsome buildings. It is seated in a fine plain, near the Tav, 265 miles NE. of Madrid.

VICA PORA, a goddess at Rome, who presided over victory.

(1.) * VICAR.

(1.) * **VICAR.** *n. f.* [*vicarius*, Lat.] 1. The incumbent of an appropriated or impropriated benefice.—

Procure the *vicar*

To stay for me at church.

Shak.

—The *vicar* my defeat, and all the village see. *Dryden*.—What a contempt must he entertain, not only for his *vicar* at home, but for the whole clergy. *Swift*. 2. One who performs the functions of another; a substitute.—An archbishop may not only excommunicate and interdict his suffragans, but his *vicar-general* may do the same. *Ayliffe*.

(2.) **VICAR**, a person appointed as deputy to another, to perform his functions in his absence and under his authority.

(3.) **VICAR**, in the canon-law, denotes a priest of a parish, the predial tithes whereof are impropriated or appropriated; that is, belong either to a chapter, religious house, &c. or to a layman who receives them, and only allows the vicar the small tithes, or a convenient salary. See *PARSON*, § 2.

* **VICARAGE.** *n. f.* [from *vicar*.] The benefice of a vicar.—This gentleman lived in his *vicarage* to a good old age. *Swift*.

* **VICARIOUS.** *adj.* [*vicarius*, Lat.] Deputed; delegated; acting in the place of another.—The soul in the body is but a subordinate efficient, and *vicarious* and instrumental in the hands of the Almighty. *Hale*.—What can be more unnatural, than for a man to rebel against the *vicarious* power of God in his soul? *Norris*.

VICARS, John, writer of some virulent pamphlets against the Royalists in the civil wars, was born at London, and educated at Oxford. He became usher of the school in Christ's Hospital. He died in 1652.

* **VICARSHIP.** *n. f.* [from *vicar*.] The office of a vicar.

VICARY, Thomas, the first anatomical writer in English, was surgeon to Henry VIII. Edward VI. Mary I. and Elizabeth, and chief surgeon of St Bartholomew's hospital. His book is entitled "A Treasure for Englishmen, containing the anatomy of Man's bodie," published in 1548.

(1.) * **VICE.** *n. f.* [*vicium*, Latin.] 1. The course of action opposite to virtue; depravity of manners; inordinate life.—

No spirit more grofs to love

Vice for itself.

Milton.

—The foundation of *vice* lies in wrong measures of good. *Locke*. 2. A fault; an offence. It is generally used for an habitual fault, not for a single enormity.—

No *vice*, so simple, but assumes

Some mark of virtue on its outward parts. *Shak.*

—Shall have more *vices* than it had before. *Shak.*

—The excess and defects do make *vices*, or such things as ought not to be. *Wilkins*.—Ungovern'd appetite a brutish *vice*. *Milton*.—The *vices* of the clergy. *Dryden*.—Proud views and vain desires are truly *vices* and corruptions. *Law*. 3. The fool, or punchinello of old shows.—

I'll be with you again

In a trice, like to the old *vice*,

Your need to sustain;

Who with dagger of lath, in his rage and his wrath,

Cries, ah, ah! to the devil.

Shak.

—His face made of brass, like a *vice* in a game. *Tusser*. 4. [*Vijis*, Dutch.] A kind of small iron press with screws, used by workmen.—He found that marbles taught him percussion; bottle screws, the *vice*; whirlingigs, the axis in peritrochio. *Arbutnot*. 5. Gripe; grasp.—If he come but within my *vice*. *Shak.* 6. [*Vice*, Latin.] It is used in composition for one, *qui vicem gerit*, who performs, in his stead, the office of a superior, or who has the second rank in command: as, a *viceroi*, *vicechancellor*.

(2.) **VICE**, in ethics, is ordinarily defined an elective habit, denoting either an excess or defect from the just medium wherein virtue is placed.

(3.) **VICE**, in smithery and other arts conversant in metals, a machine or instrument serving to hold fast any thing they are at work upon, whether it is to be beat, filed, or rivetted.

(4.) **VICE** is also used in the composition of divers words to denote the relation of something that comes instead or in the place of another; as *vice-admiral*, *vice-chancellor*, &c. are officers who take place in the absence of admirals, &c.

* To **VICE.** *v. a.* [from the noun.] To draw by a kind of violence.—To *vice* you to't. *Shak.*

* **VICEADMIRAL.** *n. f.* [*vice* and *admiral*.] 1. The second commander of a fleet.—The *viceadmiral* was in the middle of the fleet. *Knolles*. 2. A naval officer of the second rank.

* **VICEADMIRALTY.** *n. f.* [from *viceadmiral*.] The office of a viceadmiral.—The *viceadmiralty* is exercised by Mr Trenanion. *Carew*.

* **VICEAGENT.** *n. f.* [*vice* and *agent*.] One who acts in the place of another. A vassal Satan hath made his *viceagent*. *Hooker*.

* **VICECHANCELLOR.** *n. f.* [*vicecancellarius*, Latin.] The second magistrate of the universities,

* **VICED.** *adj.* [from *vice*.] Vitious; corrupt. Not used.—Some high-*vic'd* city. *Shak.*

* **VICEGERENCY.** *n. f.* [from *vicegerent*.] The office of a vicegerent; lieutenantcy; deputed power.—The authority of conscience stands upon its *vicegerency* and deputation under God. *South*.

(1.) * **VICEGERENT.** *n. f.* [*vicem gerens*, Lat.] A lieutenant; one who is intrusted with the power of the superior, by whom he is deputed.—Remember thou art God's *vicegerent*. *Bacon*.—Employ it in unshaken duty to God's *vicegerent*. *Spratt*.—The type and true *vicegerent* of thy rage. *Dryden*.

(2.) * **VICEGERENT.** *adj.* [*vicegerens*, Latin.] Having a delegated power; acting by substitution.

Vicegerent son! To thee I have transferr'd
All judgment.

Milton.

VICEGRAD, a small town of Lower Hungary, on the Danube.

* **VICENARY.** *adj.* [*vicenarius*, Latin.] Belonging to twenty. *Bailyn*.

VICENTINO, or } a province in Italy, bound-
(1.) **VICENZA**, } ed on the N. by the Tiro-
lese, E. by Bassano, S. by Paduano, W. by the
ad-jacent Veronese, now in the department of
the *Mincio*, in the Italian kingdom. It is 40
miles

miles long, and 30 broad. It is partly hilly, partly flat; but very fertile in corn, fruit, and mulberry trees; 200 lb. of silk are made annually, sheep and black cattle are numerous. The mines abound with silver and iron. It contains 15 districts, 1 city, 13 towns and boroughs, 300 villages, and 108 communes. The total population, in 1797, was 286,000. The chief rivers are the *Astico*, *Timonchio*, *Cerison*, *Tergola*, and *Baebiglione*.

(2.) **VICENZA**, the capital of **VICENTINO**, with a bishop's see. It has handsome houses, fine squares, palaces and churches. There is an academy which meets in the Olympic Theatre, a master-piece of Palladio's. It is in a fine plain between the *Bachiglione*, and *Rerone*, 13 miles W. of Padua, 31 W. of Venice, and 133 N. of Rome. Lon. 11. 43. E. Lat. 45. 26. N.

* **VICEROY**, *n. f.* [*vicereis*, French.] He who governs in place of the king with regal authority.—Shall I be call'd but *viceroys* of the whole? *Shak.*—Mendoza, *viceroys* of Peru. *Bacon*.—The *viceroys* is generally absent. *Swift*.

* **VICEROYALTY**, *n. f.* [from *viceroys*.] Dignity of a viceroy.—These parts furnish out *viceroys* royalties for the grandees. *Addison*.

* **VICETY**, *n. f.* [Of this word I know not well the meaning or original: a *vice* thing is now called in vulgar language, *point vice*, from the French *point devise*, or *point de vice*; whence the barbarous word *vicety* may be derived.] Nicety; exactness. A word not used.—

With the peafish nicety,

And old Sherewood's *vicety*.

B. Jonson.

VIC FEZENSAC, a town of France, in the dep. of Gers, on the Douze, 15 miles W. of Auch.

VICHERY, a town of France, in the dep. of Vosges, 9 miles NW. of Mirecourt.

VICHI, a town of France, in the dep. of Allier, on the Allier, famous for its mineral springs. It is 180 miles S. by E. of Paris.

VICHO, a town of Naples, on the coast, almost destroyed by an earthquake, in 1694.

VICHY. See **VICHI**.

VICIA, in botany: A genus of plants of the class *diadelphia*, and order of *decandria*; and in the natural system arranged under the 32d order, *Papilionacea*. The stigma is bearded transversely on the lower side. There are 20 species, 7 of which are natives of Britain. The most important of these are,

1. **VICIA CRACCA**, tufted vetch. It has a stem branched, three or four feet long. Leaves pinnated; pinnæ generally ten or twelve pair, lance-shaped, downy. Stipulæ entire. Flowers purple, numerous, pendulous, in imbricated spikes. It is also reckoned an excellent fodder for cattle.

2. **VICIA FABA**, or common garden bean. It is a native of Egypt. It is too well known to require description.

3. **VICIA SATIVA**, common vetch, or tare. The stalks are round, weak, branched, about two feet long. Pinnæ five or seven pair, a little hairy, notched at the end. Stipulæ dentated. Flowers light and dark purple, on short pedicels, generally two together; pods erect; seeds black. It is known to be an excellent fodder for horses.

4. **VICIA SEPIUM**. See **RURAL ECONOMY**, Part I. Sect. VI. § 4.

* **VICINAGE**, *n. f.* [*vicinia*, Latin.] Neighbourhood; places adjoining.

* **VICINAL**, *adj.* [*vicinus*, Lat.] Near; nei-

* **VICINE**. } bouring.—Other *vicine* pass *Glauville*.

* **VICINITY**, *n. f.* [*vicinus*, Latin.] 1. Neighbourhood; state of being near.—There is a *vicinity* between agents and patients. *Hale*.—The abundance and *vicinity* of country seats. *Swift*. 2. Neighbourhood.—He shall fix the wandering parties in their old *vicinity*. *Rogers*.—Gravity must be carried them to the *vicinity* of the sun. *Beattie*.

VICIOLA, a river of Naples, in Abruzzo, which runs into the Trontino at Teramo.

VICIOSAS ISLES, in the bay of Honduras.

* **VICIOUS**, *adj.* [from *vici*.] See **VITIUM**. Devoted to vice; not addicted to virtue.—His *vicious* race. *Milton*.

* **VICISSITUDE**, *n. f.* [*vicissitudo*, Latin.] Regular change; return of the same things in the same succession.—Grateful *vicissitude*, like day and night. *Milton*.—The rays of light are alternately disposed to be reflected or refracted for *vicissitudes*. *Newton*.—The *vicissitude* of seasons. *Woodew*. 2. Revolution; change.—The *vicissitude* of good and bad fortune. *Atterbury*.—Revolve the sad *vicissitude* of things. *Gifford*.

VIC LE COMPTE, a town of France, in the dep. of Puy de Dome, with mineral springs. It is seated near the Illoar, 230 miles S. of Paris.

(1. 2.) **VICO**, 2 towns of Naples: 1. in Capitanata, 14 miles W. of Velle; 2. in Lavoro, 1 miles NW. of Sorrento.

(3.) **VICO**, a town of Corsica.

* **VICONTIELS**. In law *vicontiel* rents are farms, for which the sheriff pays a rent to the king, and makes what profit he can of them. *Vicontiel* writs are such writs as are triable in the county court, before the sheriff. *Bailey*.

VICOVARO, a town of the Italian kingdom, formerly in the territories of the Pope, near the Teverone, 40 miles NE. of Rome. Lon. 13. 1. E. Lat. 42. 30. N.

* **VICTIM**, *n. f.* [*vicima*, Latin.] 1. A sacrifice; something slain for a sacrifice.—Be sacrific'd as *victims* to his ghost. *Denb*.—And on the *victim* pour the ruddy wine. *Dryden*.—The *victim* ox, and snowy sheep prepar'd. *Addis*. 2. Something destroyed.—Behold where age's wretched *victim* lies. *Prior*.

(1.) * **VICTOR**, *n. f.* [*viclor*, Latin.] 1. Conqueror; vanquisher; he that gains the advantage in any contest. *Viclor* is seldom used with a genitive; we say the conqueror of kingdoms, not the *viclor* of kingdoms; and never but with regard to some single action or person: as we never say, Cæsar was in general a great *viclor*, but that he was *viclor* at *Pbarfalia*. We rarely say Alexander was *viclor* of Darius, though we say he was *viclor* at *Arbela*; but we never say he was *viclor* of *Perfia*.—

This strange race more strange conceits did yield;

Who *viclor* seem'd, was to his ruin brought;
Who seem'd o'erthrown, was mistress of the field.

—Both tugging to be *victors*, breast to breast. *Shak*.—Although the *viclor*, we submit to Cæsar. *Shak*.

What stroke shall bruise the victor's heel.
And how the victors fall. *Denham.*—In
 the *victors* from the vanquish'd fly. *Waller.*
 And him who should be *victor*, makes the slave.
Yden.—Heaven will not leave me in the *victor's*
 hand. *Addison.* 2. *Pope* has used this word in a
 punner perhaps unauthorised.

There *victor* of his health, his fortune,
 friends,

And fame, this lord of useless thousands ends.

Pope.

(2.) *VICTOR*, Sextus Aurelius, a Roman histo-
 rian, who flourished under the emperors Constan-
 tine and Julian. Ammianus Marcellus says, that
 Constantine made him consul, and honoured him
 with a brazen statue; although, he was born of
 poor and supposed African parents. Two books
 of his are extant: one *De viris illustribus urbis*
romæ; the other, *De Caesaribus*. The best edit.
Victor is that of Pitiscus, 8vo. Utr. 1696; and
 at Antuzenius, 4to. Amst. 1733.

VICTORIA, 1. a town of New Mexico, 2. an
 island on the coast of Brazil. 3. An ancient Ro-
 man name of PERTH.

VICTORINA, a matron, who led the Roman
 armies against the emperor Gallienus. See *ROME*,
 73.

VICTORINUS. See *STRIGELIUS*.

* *VICTORIOUS*. *adj.* [*victorieux*, French.] 1.
 conquering; having obtained conquest; superi-
 or in contest.—Victory doth more often fall by
 rout of the vanquished, than by the valour of
 the *victorious*. *Hayward.*—The son returned *victor-
 ous* with his saints. *Milton.*—Who twice *victori-
 ous* did our navy see. *Dryden.* 2. Producing con-
 quest.—And curs'd for ever this *victorious* day.
Pope. 3. Betokening conquest.—Now are our
 brows bound with *victorious* wreaths. *Shak.*

* *VICTORIOUSLY*. *adv.* [from *victorious*.]
 With conquest; successfully; triumphantly.—
 That grace will carry us *victoriously* through all
 difficulties. *Hammond.*

* *VICTORIOUSNESS*. *n. f.* [from *victorious*.]
 The state or quality of being victorious.

(1.) *VICTORIUS*, Benedict, physician, was
 born at Faenza, about 1482. He was professor
 at Bologna, and died about 1560. He wrote *De
 morbo Gallico*, 8vo, and some other works.

(2.) *VICTORIUS*, Lionel, a medical professor at
 Bologna; wrote on Infantile Diseases, 8vo; and
 died 1520.

(3.) *VICTORIUS*, Peter, a commentator on the
 ancients, was born at Florence, 1499, where he
 was professor of rhetoric, and member of the se-
 nate. He died 1585.

(1.) * *VICTORY*. *n. f.* [*victoria*, Latin.] Con-
 quest; success in contest; triumph.—He whin'd
 and roar'd away your *victory*. *Shak.*—With *victo-
 ry*, triumphing o'er his foes. *Milt.*—It is a *victory*
 over the most refractory passions. *Taylor.*

(2.) *VICTORY*, in mythology, is represented by
 herself as the daughter of Styx and Pallas; (See
STYX, N° 2.) and Varro calls her the daughter of
Heaven and Earth. The Romans erected a temple
 to her, where they prayed for success to their
 arms. They painted her in the form of a woman,
 clad in cloth of gold. In some medals, she is re-
 presented flying in the air, holding a laurel crown

in one hand, and a palm in the other; but in
 others she stands on a globe.

(3.) *VICTORY*, CAPS, is the NW. point of the
 Straits of Magellan, at the opening into the S.
 Pacific Ocean. Lon. 76° 40' W. Lat. 52° 15' S.

* *VICTRESS*. *n. f.* [from *victor*.] A female
 that conquers. Not used.—She shall be sole *vic-
 tress*; Caesar's Caesar. *Shak.*

* *VICTUAL*. *VICTUALS*. *n. f.* [*victualles*, Fr.
vittanaglia, Italian.] Provisions of food; stores for
 the support of life; meat; sustenance. *Chapman.*
 has written it as it is colloquially pronounced.—
Visuals and fresh water. *Abbot.*—You had musty
visuals. *Shak.*—And in a good large knapsack,
visuals store. *Chapman.*—He was not able to keep
 that place three days for lack of *visual*. *Kneller.*
 —Unprovided of tackling and *visual*. *K. Charles.*

* *To VICTUAL*. *v. a.* [from the noun.] To store
 with provision for food.—I must go *visual* Or-
 leans forthwith. *Shak.*

* *VICTUALLER*. *n. f.* [from *visuals*.] 1. One
 who provides victuals.—The English *victuallers*
 surceased not to bring all things necessary. *Hayes.*
 —Their conquest half is to the *victualler* due.
King. 2. One who keeps a house of entertainment.

(1.) *VIDA*, the ancient name of Cremona.

(2.) *VIDA*, Mark Jerome, bishop of Alva, in
 Monterrat, and one of the most excellent Latin
 poets that have appeared since the Augustine age,
 was born at Cremona in 1470. He was made bi-
 shop of Alva in 1552. He wrote hymns, eclogues,
 and poems, in Latin; and in prose, dialogues, sy-
 nodical constitutions, letters, and other pieces.
 He died in 1566, soon after his being made bishop
 of Cremona. The best edit. of his poems is that
 of Oxford, 3 vols 8vo.

* *VIDELICET*. *adv.* [Lat.] To wit; that is.
 This word is generally written *viz*.

VIDEN, a town of Bulgaria, on the Danube.

VIDUCASSES, an ancient people of Norman-
 dy.

* *VIDUITY*, *n. f.* [from *viduus*, Lat.] Widow-
 hood.

(1.) * *To VIE*. *v. a.* [Of this word the etymo-
 logy is very uncertain.] 1. To show, or practise
 in competition.—They *vie* power and expe-
 nce with those that are too high. *L'Estr.*—You *vie*
 happiness in a thousand diversions. *Boylston.* 2. In
 this passage the meaning seems to be, to add; to
 accumulate.—

She hang about my neck, and kiss and kiss
 She *vied* so fast,

That in a twink she won my heart to love. *Shak.*

(2.) * *To VIE*. *v. n.* To contest; to contend;
 to strive for superiority.—The younger sons may
 be enabled to *vie* with the best of their family.
 —May with the proudest Tyrian purple *vie*. *Add.*
 —While each to be the loudest *vies*. *Swift.*

VIELICZA. See *SALT*, § 11, 12.

VIELLO. See *MUSIC*, § 43.

VIEN, a small river which runs through Vienna.

(1.) *VIENNA*, the capital of the circle of Aus-
 tria, in Germany, and of the whole German em-
 pire. The city is not of very great extent, but is
 strongly fortified, and contains upwards of 250,000
 inhabitants. The streets, in general, are narrow,
 and the houses built high. Some of the public
 buildings are magnificent. The chief of them are the

the imperial palace, the library, and the museum; the palaces of the princes Lichenstein, Eugene, &c. Vienna was twice ineffectually besieged by the Turks; namely, in 1589 and 1683. * At the latter period, the siege was raised by John Sobieski, king of Poland, who totally defeated the Turkish army before the walls of this place. The arms of Napoleon, however, were more successful in 1805, as he entered the city in triumph on the 12th Nov. No houses without the walls are allowed to be built nearer to the glacis than 600 yards; so that there is a circular field of that breadth all around the town, which has a very beautiful effect. The suburbs contain about 70,000 inhabitants. The cathedral is built of free stone, is 114 yards long, and 48 broad, and the steeple is 447 feet high. Joining to this church is the archbishop's palace, the front of which is very fine. The university had several thousand students. Beside this, there is the academy of Lower Austria; and the archducal library is much frequented by foreigners, as it contains above 100,000 printed books, and 10,000 manuscripts. The academy of painting is remarkable for the fine pictures it produces. The archducal treasury, and a cabinet of curiosities of the house of Austria, are great rarities. The inhabitants, in general, live in a splendid manner. There is a fort of harbour on the Danube, where there are magazines of naval stores, and ships have been fitted out to serve on that river against the Turks. Vienna is an archbishop's see. It is seated at the place where the river Vion or Wien falls into the Danube, 30 miles W. of Presburg, 350 NNE. of Rome, 520 SE. by E. of Amsterdam, 565 E. of Paris, and 680 ESE. of London. Lon. 16. 28. E. Lat. 48. 13. N.

(2.) VIENNA, a post town on the E. coast of Maryland, Dorchester county; W. side of the Nanticoke, about 15 miles from its mouth.

(3.) VIENNA, capital of Green county, Kentucky.

(1.) VIENNE, an ancient town of France, in the dep. of Iſere, on the Rhone. It trades in wine, silk, and cutleries. Near Vienna is produced the famous Cote Rotie wine. It is 265 miles SE. of Paris.

(2.) VIENNE, a river of France, which rises in the dep. of Correza, and falls into the Loire between Chinon and Samur.

(3.) VIENNE, a department of France, bounded on the N. and NE. by that of Indre and Loire, on the E. by that of Indre, on the S. by those of Charente and Upper Vienne, and on the W. by the dep. of the Two Sevrès. It comprehends a part of the ci-devant province of Poitou, and is about 65 miles long, and 38 broad at a medium. Poitiers is the capital.

(4.) VIENNE, UPPER, a department of France, bounded on the N. by those of Vienne and Indre, on the E. and SE. by the dep. of Creuse, on the SW. by that of Dordogne, and on the W. by that of Charente. It contains the ci-devant province of Limosin; and is about 55 miles long from N. to S. and from 25 to 43 broad. Limoges is the chief city.

VIERZON, an ancient town of France, on the

Cher and Yevre, in the dep. of the Cher, famous for its forges; 100 miles SW. of Paris.

VIESTI, a small town of Naples.

VIETA, Francis, a mathematician, born at Fontenay in 1540. He was the first who used letters in algebra to designate known quantities. He also made corrections on the calendar, and improvements in geometry. He died in 1603. His works were published, Paris, 1646, 1 vol. folio.

* VIEW, *n. s.* [from the verb.] 1. Prospect.—Pretty, and full of view. *Shak.*—Vast and indefinite view. *Wotton.*—The walls of Pluto's palace are in view. *Dryden.*—Cut wide views through mountains to the plain. *Pope.* 2. Slight; power of beholding.—

I go, to take for ever from your view,
Both the lov'd object, and the hated too. *Dryd.*
—A clear view. *Locke.*—Full in my view set all the bright abode. *Pope.* 3. Intellectual fight; mental ken.—Some faint resolution I've in view. *Milton.* 4. Act of seeing.—

But straight his view
Confirms that more than all he fears is true.

Denham.
5. Sight; eye.—Objects near our view. *Locke.* 6. Survey; examination by the eye.—Surveying nature with too nice a view. *Dryd.* 7. Intellectual survey.—If the mind takes a view of the connection of ideas. *Locke.* 8. Space that may be taken in by the eye; reach of sight.—When now the Trojan navy was in view. *Dryd.* 9. Appearance; show.—Which, by the splendour of her view. *Waller.* 10. Display; exhibition to the sight or mind.—To give a right view of this mistaken part of liberty. *Locke.* 11. Prospect of interest.—No man sets about any thing, but upon some view or other. *Locke.* 12. Intention; design.—With that view he makes all his reflections. *Atterb.*—With a view to commerce. *Arb.*—Fisher seconded the cardinal upon the same views. *Waterland.*

* To VIEW, *v. a.* [from *veu*, from *voir*, or *voir*.] 1. To survey; to look on by way of examination.—Go, and view the country. *Jos.*—His own works and their works at once to view. *Milton.*—View not this spire, by measures giv'n. *Prior.*—When e'er we view some well proportion'd dome. *Pope.* 2. To see; to perceive by the eye.—

They here with eyes aghast
View'd first their lamentable lot. *Milton.*
—No more I hear, no more I view. *Pope.*

* VIEWER *n. s.* [from *view*.] One who views.
* VIEWLESS, *adj.* [from *view*.] Unseen; not discernible to the sight.—To be imprison'd in the viewless winds. *Shak.*—

Each stair mysteriously was meant, nor stood
There always, but drawn up to heav'n sometimes,

Viewless. *Milton.*
—Repas'd, and viewless mix'd with common air.
Pope.—Their feet half viewless quiver in the skies.
Pope.

UIG, a parish of Scotland, in the SW. district of the isle of Lewis, in Ross-shire. It is about 15 miles long and 13 broad.—The coast of Loch Roag, an arm of the sea which runs into the middle of the parish, every where affords safe harbours for ships of any burden, and following its windings,

is upwards of 60 miles round. It is studded with islands, and abounds with fish, which, with the manufacture of kelp, constitutes the chief source of the livelihood of the inhabitants. The coasts only are cultivated. There is a Druidical place of worship entire, the remains of a nunnery, and a Danish fort or dun. In 1793, the population was 1898; increase 586 since 1755.

VIGAN, a town of France, in the dep. of Gard, 25 miles NW. of Nîmes.

VIGEAUNS, ST., a parish in Forfarshire, on the sea coast, to the NE. of Arbroath, and comprehending great part of the suburbs of that town. It is 7 miles long, and from 3 to 4 broad, containing 9385 acres, all of which, except about 700 or 800 of muir and plantation, are arable. The soil is very various, but on the whole fertile. One part of the coast, which is high and rocky, has some astonishing caverns. In 1801, the population was 4931; increase 3341 since 1755.

* **VIGESIMATION**. *n. f.* [*vigefimus*, Latin.] The act of putting to death every twentieth man. *Bailey*.

VIGEVANO, a town of Italy, in the dep. of Olona, and formerly the residence of the dukes of Milan. Seated on the Tessino with a strong castle, 15 miles SW. of Milan.

(1.) * **VIGIL**. *n. f.* [*vigilia*, Lat.] 1. Watch; devotions performed in the customary hours of rest.—So they in heaven their odes and *vigils* tun'd. *Milt.*—Shrines! where their *vigils* pale-eyed virgins keep. *Pope*. 2. A fast kept before a holiday. —Will yearly on the *vigil* feast his neighbours. *Shak.*—And that, which on the Baptists *vigil* stands. *Harte*. 3. Service used on the night before a holiday.—The *vigils* are to be celebrated that night before them. *Stillingfleet*.—To sing their *vigils* for th' ensuing day. *Dryd.* 4. Watch; forbearance of sleep.—Yet Hymen may perforce her *vigils* keep. *Waller*.—The *vigils* of the card-table. *Addison*.

(2.) **VIGIL**, in church history, is the eve or next day before any solemn feast; because then Christians were wont to watch, fast, and pray, in their churches.

(3.) **VIGILS OF PLANTS**, a term under which botanists comprehend the precise time of the day in which the flowers of different plants open, expand, and shut. All plants which flower the same day, in the same place, do not open and shut precisely at the same hour. Some open in the morning, as the lip flowers, and compound flowers with flat spreading petals; others at noon, as the mallows; and a third set in the evening, or after sunset, as some geraniums and opuntias; the hour of shutting is equally determined. Of those which open in the morning, some shut soon after, while others remain expanded till night. The hours of opening, like the time of flowering, seem to vary, according to the species of the plant, the temperature of the climate, and that of the season. Flowers, whose extreme delicacy would be hurt by the strong impressions of an ardent sun, do not open till night; those which require a moderate degree of heat to elevate their juices; in other words, whose juices do not rise but in the morning or evening, do not expand till then; whilst those

which need a more lively heat for the same purpose, expand at noon when the sun is in his meridian strength. Hence it is, that the heat of the air being greater betwixt the tropics than elsewhere, plants which are transported from those climates into the cold or temperate climates of Europe, expand their flowers much later than in their native soil. Thus, a flower which opens in Senegal, will not open at the same season in France and England till eight or nine, nor in Sweden till ten. Linnaeus distinguishes by the general name of *solar* (*flores solares*), all those flowers which observe a determinate time in opening and shutting. These flowers are again divided, from certain circumstances, into three species, or kinds: 1. Equinoctial flowers (*flores equinoctiales*) are such as open and shut at all seasons, at a certain fixed or determinate hour. 2. Tropical flowers (*flores tropici*) are such whose hour of opening is not fixed at all seasons, but accelerated or retarded according as the length of the day is increased or diminished. 3. Meteorous flowers (*flores meteorici*) are such whose hour of expansion depends upon the dry or humid state of the air, and the greater or less pressure of the atmosphere. Of this kind is the Siberian snow-thistle, which shuts at night if the ensuing day is to be clear and serene, and opens if it is to be cloudy and rainy. In like manner the African marigold, which in dry serene weather opens at six or seven in the morning, and shuts at 4 o'clock in the afternoon, is a sure indication that rain will fall during the course of the day, when it continues shut after seven.

* **VIGILANCE**. *n. f.* [*vigilance*, Fr. *vigilant*.] * **VIGILANCY**. *n. f.* [*vigilantia*, Latin.] 1. Forbearance of sleep.—The strong passion for his country should have given him *vigilance*. *Broome*. 2. Watchfulness; circumspection; incessant care.—Shall Henry's conquest, Bedford's *vigilance*? *Shak.*—His continual *vigilance*. *Wotton*.—Of these the *vigilance* I dread. *Milt.*—The sagacity and *vigilance* of the dog. *Ray*. 3. Guard; watch.—That guard and most unusual *vigilance*. *Shak.*

In at this gate none pass

The *vigilance* here plac'd. *Milton*. * **VIGILANT**. *adj.* [*vigilans*, Latin.] Watchful; circumspect; diligent; attentive.—That *vigilant* and erect attention of the mind. *Hooker*.—Take your places, and be *vigilant*. *Shak.*—As he was *vigilant* in such cases. *Clarendon*.

* **VIGILANTLY**. *adv.* [from *vigilant*] Watchfully; attentively; circumspectly.—Observed so *vigilantly*. *Hayward*.

VIGILIUS, an African prelate, and polemical writer, who flourished about A. D. 484. His works were printed at Dijon, 1665, 4to.

VIGNAMONT, a town of the French empire, in the dep. of the Ourte, and late bishopric of Liege; 2 miles N. of Huy. Lon. 5. 22. E. Lat. 50. 34. N.

VIGNOLE, James Baroggio, architect, was born at Vignola, in 1507. He died at Rome, 1573. He wrote a treatise on the five orders of architecture, 3 vols 4to.

VIGO, a sea-port town of Spain, in Galicia, with an old castle and a fort. It is seated in a fertile country by the sea side. It is famous for the

III great

great victory gained by the English and Dutch fleets, under Sir J. Rook, over the French. (See ENGLAND, § 72.) Lon. 8. 21. W. Lat. 42. 3. N.

* **VIGOROUS**. *adj.* [from *vigor*, Lat.] Forcible; not weakened; full of strength and life.—At sea successful, *vigorous* and strong! *Wall*.—Their appetite returns always fresh and *vigorous*. *Atterb*.—*Vigorous* and successful. *Davenant*.

* **VIGOROUSLY**. *adv.* [from *vigour*.] With force; forcibly; without weakness.—With his one so *vigorously* he pres'd. *Dryden*.—If the fire burns bright and *vigorously*. *South*.—That prince whose cause you espouse so *vigorously*. *Swift*.

* **VIGOROUSNESS**. *n. f.* [from *vigour*.] Force; strength.—Excellent sufferance and *vigorousness*. *Taylor*.

* **VIGOUR**. *n. f.* [*vigor*, Latin.] 1. Force; strength.—Wou'd utmost *vigour* raise, and rais'd unite. *Milton*.—And of their wonted *vigour* left them drain'd. *Milt*.—*Vigour* soon returns. *Milt*.—Immortal *vigour*. *Milt*.—The *vigour* of this arm was never vain. *Dryd*. 2. Mental force; intellectual ability. 3. Energy; efficacy.—In fruitful earth his beams their *vigour* find. *Milton*.—The earth's attractive *vigour* to explain. *Blackmore*.

VIHIERS, a town of France, in the dep. of Maine; 163 miles SW. of Paris.

VILAINE, a river of France, which rises in the dep. of the Maine, waters Vitre and Rennes, divides the dep. of Morbihan from that of the Lower Loire, and enters the bay of Biscay below Roche Bernard.

* **VILE**. *adj.* [*vil*, Fr. *vili*, Latin.] 1. Base; mean; worthless; sordid; despicable.—*Vile* and despicable. *Hooker*.—Rather than I would be so *vile* esteem'd. *Shak*.—Shall be my brother; be he ne'er so *vile*. *Shak*.—O ye Pegaian nymphs, that hating *viler* things. *Dray*.—The inhabitants account gold but as *vile* a thing. *Abbot*.—*Vile* man, begot of clay, and born of dust. *Fair*.—The *vilest* of weeds. *Bentley*. 2. Morally impure; wicked.—Restor'd by thee, *vile* as I am. *Milton*.

* **VILED**. *adj.* [from *vile*, whence *revile*.] Abusive; scurrilous; defamatory.—Who used *vil'd* speeches against king Edward. *Hayward*.

* **VILELY**. *adv.* [from *vile*.] Basely; meanly; shamefully.—The Volscians *vilely* yielded the town. *Shak*.—Depriv'd of funeral rites, and *vilely* dragg'd. *A. Philips*.

* **VILENESS**. *n. f.* [from *vile*.] 1. Baseness; meanness; despicableness.—His *vileness* us shall never awe. *Dray*.—The essential *vileness* of matter. *Creech*.—The *vileness* of the clay. *Swift*. 2. Moral or intellectual baseness.—Then, *vileness* of mankind. *Prior*.

* **VILIFIER**. *n. f.* [from *vilify*.] One that vilifies.

* **TO VILIFY**. *v. a.* [from *vile*.] 1. To debase; to degrade; to make vile.—Themselves they *vilify'd*.—To serve ungovern'd appetite. *Milton*. 2. To defame; to make contemptible.—To hear his sovereign *vilify'd*. *Dray*.—All methods to *vilify* his person. *Addis*.—To deprecate and *vilify*. *Addis*.

* **VILL**. *n. f.* [*vill*, French; *villa*, Latin.] A village; a small collection of houses. Little in use. In every manor, town, or *vill*. *Hale*.

(1.) * **VILLA**. *n. f.* [*villa*, Latin.] A country seat.—*Villas* and palaces. *Addison*.—A furnish'd

villa stands, propos'd for sale. *Harris*.—Whether you call them *villa*, park or chace. *Pope*.

(2.) **VILLA ARAGONENSE**, a town of Sardinia.

(3.) **VILLA DE CONDE**, a sea-port of Portugal, in Entre Duero-e-Minho.

(4.) **VILLA DE HORTA**, chief town and port of Fyal one of the Azores. Lon. 28. 36. W. Lat. 38. 32. N.

(5.) **VILLA DE MOSE**, a town of new Spain, in Tabasco, on a river of the same name.

(6.) **VILLA DEL REY**, a town of Spain, in Estremadura.

(7.) **VILLA FLOR**, a town of Portugal, in Tral-os montes.

(8—11.) **VILLA FRANCA**, 1. a seaport of the French empire, in the dep. of Maritime Alps, 3 miles E. of Nice. 2. A town of Italy, in the dep. of the Minicio, and ci-devant Veronese, 10 miles S. of Verona. 3. The capital of St Michael, one of the Azores. Lon. 25. 35. W. Lat. 37. 30. N. 4. A town of Spain, in Estremadura, on the Tormes, 37 miles E. of Salamanca.

(12.) **VILLA FRANCA DE PENADES**, a town of Spain, in Catalonia.

(13, 14.) **VILLA HERMOSA**, 1. A town of Spain in Valencia: 2. A town of Mexico.

(15, 16.) **VILLA NOVA**: 1. A town of Portugal, in Entre-Duero-e-Minho: on the Duero, opposite Oporto: 2. A town of Brasil, 170 miles W. of Porto Seguro.

(17.) **VILLA NOVA D'ASTI**, a town of the French empire, in the dep. of the Po, and late Piedmontese; 10 miles W. of Turin.

(18.) **VILLA PANDA**, a town of Spain, in Leon.

(19—21.) **VILLA REAL**, 1. A town of Spain, in Valencia: 2. A seaport of Mexico, on the gulf so named, 200 miles E. of Mexico. Lon. 103. 36. W. Lat. 20. 0. N. 3. A town of Portugal, in Tral-os Montes.

(22, 23.) **VILLA RICA**, 1. A town of Chili: 2. A seaport of New Spain, in the gulf of Mexico, 200 miles E. of Mexico. Lon. 103. 36. W. Lat. 20. 0. N.

(24, 25.) **VILLA VICIOSA**, 1. A large town of Portugal, in Alentejo, with a handsome palace. It is 83 miles SE. of Lisbon, in Lon. 7. 16. W. Lat. 38. 36. N. 2. A seaport of Spain, in Asturias, on the bay of Biscay, 22 miles NE. of Oviedo.

VILLAC, a town of Carinthia, 18 miles NE. of Brixen.

* **VILLAGE**. *n. f.* [*village*, French.] A small collection of houses in the country, less than a town.—Or pelted *villages*, sheep-cots, and mills. *Shak*.—The early *village* cock. *Shak*.—Like the *village* curs. *Shak*.—The country *villages* were burnt down to the ground. *Kneller*.—Those *village* words give us a mean idea of the thing. *Dryd*.—In the vile habit of *village* slave. *Pope*.

* **VILLAGER**. *n. f.* [from *village*.] An inhabitant of the village.—Brutus had rather be a *villager*. *Shak*.—I shall appear some harmless *villager*. *Milt*.—Every *villager* doth not know. *Locke*.

* **VILLAGERY**. *n. f.* [from *village*.] District of villages.—That fright the maidens of the *villagery*. *Shak*.

(1.) * **VILLAIN**. *n. f.* [*villain*, Fr. *villains*, low Latin.] 1. One who held by a base tenure.—Being in condition of slaves and *villains*. *Darwin*.

A wicked wretch.—A dozen armed knights, or rather *villains*. *Sidney*.—Abhorred villain! unnatural, detested, brutish villain! *Shak.*—Who names me traitor, villain-like he lies. *Shak.*—He was stabbed to the heart by the hand of a villain. *Shak.*—Calm thinking *villains*, whom no faith could fix. *Pope*.

(2.) VILLAIN, or VILLEIN, in our ancient customs, denotes a man of servile or base condition, viz. a bond-man or servant.

VILLALPANDUS, John Baptist, Jesuit, who died in 1608. He wrote a comment on Ezekiel, 3 vols. fol. 1596, and an Exposition of St Paul's Epistles.

* VILLANAGE. *n. f.* [from *villain*.] 1. The state of a villain; base servitude.—No wretchedness is like to sinful villanage. *Spenser*.—Tenants in villanage. *Davies*. 2. Baseness; infamy.—But infamy and villanage are thine. *Dryden*.

VILLANETTE. See Music, § 152.

* To VILLANIZE. *v. a.* [from *villain*.] To debase; to degrade; to defame.—Could never villanize his father's fame. *Dryd.*—Debasing and villanizing of mankind. *Bentley*.

* VILLANOUS. *adj.* [from *villain*.] 1. Base; vile; wicked. 2. Sorry; in a familiar sense.—Thou art my son; a villanous trick of thine eye doth warrant me. *Shak.* 3. It is used by *Shakespeare* to exaggerate any thing detestable.—With foreheads villanous low. *Shak.*

* VILLANOUSLY. *adv.* [from *villanous*.] Wickedly; basely.—He villanously flew Selymes. *Kneller*.

* VILLANOUSNESS. *n. f.* [from *villanous*.] Baseness; wickedness.

* VILLANY. *n. f.* [from *villain*; *villonnie*, old French.] 1. Wickedness; baseness; depravity; gross atrociousness.—

Trust not those cunning waters of his eyes; For villany is not without such a rheum. *Shak.*—The commendation is not in his wit, but in his villany. *Shak.* 2. A wicked action; a crime. In this sense it has a plural.—No villanies or flagitious action. *South*.—Such villanies rous'd Horace into wrath. *Dryden*.—

VILLARET, Claude, born at Paris 1715. He was first an actor then became an author. He continued Velly's history of France, and wrote a treatise on acting, and a tract on the mind of Voltaire. He died in 1766.

VILLARS, Lewis Hector, peer and marshal of France, and grandee of Spain, was born at Moulins in 1653. After distinguishing himself on various occasions in the army, he was made marshal-de-camp in 1690, and was sent against Marlborough, but was defeated at Malplaquet, and dangerously wounded. He was appointed plenipotentiary for concluding a peace at Rastadt in 1714. In 1733 he was sent into Italy where he took Pifighione, and died at Turin 1734.

* VILLATICK. *adj.* [*villatius*, Lat.] Belonging to villages.—Same villatick fowl. *Mil.*

(1.) VILLE DIEU, a town of France, in the dep. of the Channel, 18 miles SE. of Constance, an unsuccessful expedition was made upon it, in 1792.

(2—4.) VILLE FRANÇE, 1st, a town of France

on the Aveiron, in the dep. of the Aveiron, 260 miles S. of Paris. 2d. A town in the dep. of the Eastern Pyrenees on the Tet, 300 miles S. of Paris. Lon. 2. 25. E. Lat. 42. 25. N. 3d. A town in the dep. of Rhone and Loire, fortified on the Morgan, 18 miles NW. of Lyons.

(5.) VILLE JUIEVE, a town 4 miles S. of Paris, on the great road to Lyons.

VILLEMUR, a town of France, in the dep. of Upper Garonne, on the Tarne, 12 miles from Toulouse.

(1.) VILLENA, the Marquis of, a Spanish poet, was of the royal house of Arragon, and lived in the beginning of the 15th century. He translated the *Æneis* into verse, and Dante into prose, and wrote a book on the *Gaya Scientia*, in which he describes the ceremonies of the Troubadours.

(2.) VILLENA, a town of Murcia.

(1.) VILLENAGE, in law. The folk-land or estates held in villenage, was a species of tenure not strictly feudal, Norman, or Saxon; but mixed and compounded of them all; and which also on account of the heriots that usually attend it, may seem to have somewhat Danish in its composition. Under the Saxon Government there were as Sir William Temple speaks, a sort of people in a condition of downright servitude, used and employed in the most servile works, and belonging, both they, their children, and effects, to the lord of the soil, like the rest of the cattle or stock upon it. These seem to have been those who held what was called the *folkland*, from which they were removable at the lord's pleasure. On the arrival of the Normans here, it seems not improbable, that they, who were strangers to any other than a feudal state, might give some sparks of enfranchisement to such wretched persons as fell to their share, by admitting them, as well as others, to the oath of fealty; which conferred a right of protection, and raised the tenant to a kind of estate superior to downright slavery, but inferior to every other condition. This they called *villanage*, and the tenants *villains*. These villains, belonging principally to the lords of manors, were either villains *regardant*, that is, annexed to the manor or land; or else they were *in gross*, or at large, that is, annexed to the person of the lord, and transferable by deed from one owner to another. They could not leave their lord without his permission; but, if they ran away, or were purloined from him, might be claimed and recovered by action, like beasts or other chattels. They held indeed small portions of land by way of sustaining themselves and families; but it was at the mere will of the lord, who might dispossess them whenever he pleased; and it was upon villain services, that is to carry out dung, to hedge and ditch the lord's demesnes, and any other the meanest offices: and their services were not only base, but uncertain both as to their time and quantity. A villain could acquire no property, either in lands or goods; if he purchased either, the lord might seize them to his own use; unless he contrived to dispose of them again before the lord had seized them. In many places also a fine was payable to the lord, if the villain presumed to marry his daughter to any one without leave from the lord:

and, by the common law, the lord might also bring an action against the husband for damages for thus purloining his property. For the children of villeins were also in the same state of bondage with their parents; whence they were called in Latin *nativi*, which gave rise to the female appellation of a villein, who was called a *neife*. In case of a marriage between a freeman and a neife, or a villein and a free woman, the issue followed the condition of the father, being free if he was free, and villein if he was villein; contrary to the maxim of the civil law, that *partus sequitur ventrem*. But no bastard could be born a villein, because by another maxim of our law he is *nullius filius*; and as he can gain nothing by inheritance, it were hard that he should lose his natural freedom by it.

The law, however, protected the persons of villeins against atrocious injuries of the lord: for he might not kill or maim his villein; though he might beat him with impunity. Villeins might be enfranchised by manumission. In process of time they gained considerable ground on their lords; and in particular strengthened the tenure of their estates to that degree, that they came to have in them an interest in many places full as good, in others better than their lords. For the good-nature and benevolence of many lords of manors having, time out of mind, permitted their villeins and their children to enjoy their possessions without interruption, in a regular course of descent, the common law, of which custom is the life, now gave them title to prescribe against their lords; and, on performance of the same services, to hold their lands, in spite of any determination of the lord's will. For though in general they are still said to hold their estates at the will of the lord, yet it is such a will as is agreeable to the custom of the manor; which customs are preserved and evidenced by the rolls of the several courts baron in which they are entered, or kept on foot by the constant immemorial usage of the several manors in which the lands lie. And as such tenants had nothing to show for their estates but these customs, and admissions in pursuance of them entered on those rolls, or the copies of such entries witnessed by the steward, they now began to be called *tenants by copy of court roll*, and their tenure itself a *copyhold*.

(2.) **VILLENAGE, PRIVILEGED**, a species of tenure otherwise called *villein socage*. See **TENURE**. Ancient demesne consists of those lands or manors which, though now perhaps granted out to private subjects, were actually in the hands of the Crown in the time of Edward the Confessor, or William the Conqueror, and so appear to have been, by the great survey in the exchequer, called *doomsday-book*. The tenants of these lands, under the crown, were not all of the same order or degree. Some of them, as Britton testifies, continued for a long time pure and absolute villeins, dependent on the will of the lord; and common copyholders in only a few points. Others were in a great measure enfranchised by the royal favour; being only bound in respect of their lands to perform some of the better sort of villein services; but those determinate and certain; as, to plough the king's land for so many days, to sup-

ply his court with such a quantity of provender and the like; all of which are now changed into pecuniary rents; and in consideration hereof they had many immunities and privileges granted them; as, to try the right of their property in peculiar court of their own, called a *court ancient demesne*, by a peculiar process denominated a writ of right close; not to pay toll or tax, not to contribute to the expences of knights of the shire; not to be put on juries, and the like. These tenants, therefore, though their tenure was absolutely copyhold, yet have an interest equivalent to a freehold: for though their services were of a base and villeinous original, yet the tenants were esteemed in all other respects to be high privileged villeins; and especially for that their services were fixed and determinate, and that they could not be compelled, (like pure villeins) to relinquish those tenements at the lord's will, or to hold them against their own: *et ideo* (as Bracton) *dicuntur liberi*. Lands holding by this tenure are therefore a species of copyhold, and as such preferred and exempted from the operation of the statute of Charles II. Yet they differ from common copyholds, principally in the privileges before mentioned: as also they differ from freeholders by one especial mark and distinction, villenage, noted by Bracton, and remaining to this day, viz. that they cannot be conveyed from man to man by the general common-law conveyances of feoffment, and the rest; but must pass by surrender to the lord or his steward, in the manner of common copy-holds; yet with this difference, that, in the surrenders of these lands in ancient demesne, it is not used to say, "to hold at the will of their lord," in their copies; but only, "to hold according to the custom of the manor."

(1.) **VILLENEUVE**, Gabrielle Susannah Barbot, DE, novel writer, was the widow of a French Lieut. Col. Her novels are numerous. She died in 1755.

(2, 3.) **VILLENEUVE**, 1. A small town of France in the dep. of Lot and Garonne, on the Lot, 17 miles N. of Agen. 2. A town in the dep. of Gard, 23 miles NW. of Nîmes.

(4.) **VILLENEUVE DE BORA**, a town of France, in the dep. of Ardeche, 12 miles NW. of Viviers.

VILLENGEN, a town of Suabia, in Brisgau, in the Black Forest, 28 miles E. by S. of Friburg.

VILLERS COTERETS, a town of France, in the dep. of Oise, 11 miles SW. of Soissons.

* **VILLI**. *n. s.* [Latin.] In anatomy, are the same as fibres; and in botany, small hairs like the grain of plush or flax, with which, as a kind of excrecence, some trees do abound. *Quincy*.

VILLIA, a town and river of Verragua in Guatemala, in Mexico, about 71 miles from Nata.

(1.) **VILLIERS**, George, D. of Buckingham, was born at Brooksbury, 1592. He became a very great favourite of James I. who advanced him to his dignity of duke, and made him a knight of the garter, lord high admiral, and master of the horse, and gave him the disposal of all places in church and state. He retained the same place in the favour of Charles I. but the people detested him. He took the command of an expedition for the

the relief of Rochelle, instead of which he made a descent on the Isle of Rhé and lost the greater part of his troops. A new expedition was planned, but he was stabbed by a Lieut. Fellow, when at Portsmouth ready to embark, 23d Aug. 1628.

(2.) VILLIERS, George, D. of Buckingham, son of the preceding, was born in 1627. He was educated at Cambridge, and on the breaking out of the civil wars, served the king with great zeal, till the ruin of the royal cause, when he went abroad. He afterwards accompanied Charles II. to Scotland, and was with him at the battle of Worcester, when he had the good fortune to escape. By marrying the daughter of lord Fairfax, he recovered a principal part of his estate before the restoration, when he was made a lord of the bed-chamber, member of the privy-council, and master of the horse. But entering into a conspiracy against the king, he lost his places. He afterwards recovered the royal favour, and was sent ambassador to France. He died in 1688. He wrote the celebrated comedy of the *Rehearsal*, and some poems. His morals were very dissipated.

* VILLOUS. *adj.* [*villosus*, Latin.] Shaggy; rough; furry.—The inward *villos* coat of the stomach. *Arb.*

VILVORDE, a town of the French empire, in the dep. of the Dyle, and ci-devant province of Austrian Brabant, 7 miles NE. of Brussels. Lon. 4. 31. E. Lat. 50. 56. N.

VIMINALIS, one of the 7 hills Rome stood on.

* VIMINEOUS. *adj.* [*vimineous*, Lat.] Made of twigs.—As in the hive's *vimineous* dome. *Prior.*

VINCA, in botany: A genus of plants of the class *pentandria*, and order of *monogynia*; and in the natural system arranged under the 30th order, *Contorta*. The corolla is twisted; there are two erect follicles; the seeds are naked. There are five species; only two of which are natives of Britain.

(1.) VINCA MAJOR, great periwinkle. It has a woody, erect stem; leaves broader and sharper pointed; pedicles of the flowers straight, and calyx as long as the tube; otherwise like the next.

(2.) VINCA MINOR, small periwinkle, has a woody, creeping, slender, crooked stem; leaves long, oval, entire, pointed, opposite, glossy. Flowers single, on long curved pedicles from the ax. of the leaves, which are large and blue.

(1.) VINCENT, Thomas, a divine who continued to preach regularly during the plague. He died in 1671. He wrote *God's terrible voice* in the city by plague and fire; an *Explanation of the Catechism*, and other religious books.

(2.) VINCENT, Nathaniel, non-conformist, wrote the *Conversion of a Sinner*, and the *Day of Grace*, 2vo; several sermons and other pious books. He died in 1697.

(3.) VINCENT, ST, a town of Spain in Old Castile.

(4.) VINCENT, ST, one of the Cape de Verd islands. It is uninhabited; but on the NW. side is a bay where ships find wood, water, and turtle. There is plenty of saltpetre.

(5.) VINCENT, ST, the most southerly captainship of Brazil. The capital is inconsiderable,

with a poor harbour. Lon. 45. 10. W. Lat. 23. 40. S.

(6.) VINCENT, ST, a town on the coast of Brazil in Amiaz island, in the bay of All Saints. Lon. 46. 30. W. Lat. 24. 15. S.

(7.) VINCENT, ST, one of the windward Caribbee islands. St Vincent was long a neutral island; but, at the peace of 1763, the French agreed that the right to it should be vested in the English; who, in the sequel, at the instance of some rapacious planters engaged in an unjust war against the Caribbees, who inhabited the windward side of the island, and who were obliged to consent to a peace, by which they ceded a very large tract of valuable land to the crown. The consequence of this was, that in the American war, in 1779, they greatly contributed to the reduction of this island by the French, who, however, restored it by the peace of 1783. Since that time it has continued in the possession of Great Britain. During the revolutionary war, the Caribs revolted; and, assisted by the French, spread desolation over the whole island. By the exertions of the governor, however, and the British forces in the West Indies, the revolt was quelled. St Vincent is in length about 24 miles, and about 18 in breadth; in circumference between 60 and 70. The climate is very warm. The country is in general hilly, in some places mountainous, but interspersed with a variety of pleasant valleys, and some luxuriant plains, the soil being everywhere very fertile. Few islands of its extent are so well watered. The inhabitants raise all kind of ground provisions in plenty, and with little trouble. The rivers and sea supply them with a variety of fish. They have abundance of excellent fruits, and very fine timber, fit for almost every use. It lies between Lon. 61. 10. and 61. 18. W. and between Lat. 13. 5. and 13. 19. N. about 60 miles W. of Barbadoes.

(8.) VINCENT, ST, DE LA PAZES, OF ONDA, a town of Popayan, S. America, 25 miles E. of San Sebastian.

(9.) VINCENT, ST, PORT, on the coast of Chili, in the S. Pacific Ocean.

(10.) VINCENT'S FORT, in the NW. territory of N. America, on the E. side of the Washita, 150 miles from its mouth. Lon. 90. 7. W. Lat. 39. 15. N.

VINCENTIUS, one of the Christian Fathers, A. D. 434. His works are best edited by Baluzius, Paris, 1699.

VINCI, Leonard, DA, was born in the castle of Vinci near Florence in 1445. Verocchio was his master, whom he soon excelled, as he did all the painters of his time. At Milan he founded his celebrated school of painting. He was also an excellent architect, and constructed the famous aqueduct which supplies Milan with water. From that place he went to Florence, where he laboured with Michael Angelo, in ornamenting the grand council chamber. At the invitation of Francis I. he visited the French court, where he died in the arms of that monarch, in 1510. He composed a great number of discourses on curious subjects; but none of them have been published but his *Treatise on the Art of Painting*.—
For

For his anatomical knowledge, see *ANATOMY*, *Index*.

* **VINCIBLE**. *adj.* [from *vincere*, Lat.] Conquerable; superable.—Not *vincible* in spirit. *Hagward*.—Because 'twas absolutely in my power to have attended more heedfully, there was liberty in the principle, the mistake which influenced the action was *vincible*. *Norris*.

* **VINCIBLENESS**. *n. f.* [from *vincible*.] Liability to be overcome. *Dick*.

* **VINCTURE**. *n. f.* [*vincitura*, Latin.] A binding. *Bailey*.

VINCULUM, in algebra, a character in form of a line, or stroke drawn over a factor, divisor, or dividend, when compounded of several letters or quantities, to connect them, and shows that they are to be multiplied or divided, &c. together by the other term. Thus $d \times a + b - c$ shows that d is to be multiplied into $a + b - c$.

VINDALIUS, a writer in the age of Augustus, who wrote 10 books on agriculture.

VINDELICI, an ancient people of Germany, between the head of the Rhine and the Danube, **VINDELICIA**, their country, forms now part of Suabia, and Bavaria, and Augsburg was their chief town. *Augusta Vindelicorum*.

* **VINDEMIAL**. *adj.* [*vindemia*, Latin.] Belonging to a vintage.

* **To VINDEMIATE**. *v. n.* [*vindemia*, Lat.] To gather the vintage.—Now *vindemiate*, and take your bees towards the expiration of this month. *Evelyn*.

* **VINDEMIATION**. *n. f.* [*vindemia*, Latin.] Grape-gathering. *Bailey*.

VINDEX, Julius, a governor of Gaul, who revolted against Nero, and on being defeated, slew himself.

* **To VINDICATE**. *v. a.* [*vindicco*, Lat.] 1. To justify; to support; to maintain.—Where the respondent denies any proposition the opponent must directly *vindicate* and confirm that proposition. *Watts*. 2. To revenge; to avenge.—Whether to *vindicate* or punish infidelity? *Bacon*.—To exact subjection, and *vindicate* rebellion. *Pearson*.—His justice is concerned to *vindicate* the affront. *Tillotson*.—To *vindicate* on Athens thy disgrace. *Dryden*. 3. To assert; to claim with efficacy.—Never any touch'd upon this way, which our poet justly has *vindicated* to himself. *Dryden*.—From all the world shall *vindicate* her trade. *Dryden*. 4. To clear; to protect from censure.—*Vindicated* from our neglect by the greatest signs and wonders. *Hammond*.—And *vindicate* the ways of God to man. *Milton*.

* **VINDICATION**. *n. f.* [*vindication*, Fr. from *vindicare*.] Defence; assertion; justification.—This is no *vindication* of her conduct. *Broome*.

* **VINDICATIVE**. *adj.* [from *vindicare*.] Revengeful; given to revenge.—He's more *vindicative* than jealous love. *Shak*.—*Vindicative* persons live the life of witches, who, as they are mischievous, so end they unfortunate. *Bacon*.—The evaporations of a *vindicative* spirit. *Howell*.—What is censorious or *vindicative*? *Spratt*.—A passion purely *vindicative*. *L'Estrange*.

* **VINDICATOR**. *n. f.* [from *vindicare*.] One who vindicates; an assertor.—A jealous *vindicator* of Roman liberty. *Dryden*.

* **VINDICATORY**. *adj.* [from *vindicator*.] Punitive; performing the office of vengeance.—*Vindicatory* punishments to take vengeance of his sins. *Bramhall*. 1. Defensory; justificatory.

VINDICIUS, the slave who discovered the plot for the restoration of Tarquin. He was amply rewarded and made a citizen of Rome.

* **VINDICTIVE**. *adj.* [from *vindicta*, Latin.] Given to revenge; revengeful.—I am *vindictive* enough to repel force by force. *Dryden*.—Augustus was of a nature too *vindictive*. *Dryden*.—Suit not reparative, but *vindictive*. *Kettlewell*.

(1.) * **VINE**. *n. f.* [*vinca*, Latin.] The plant that bears the grape.—The flower consists of many leaves placed in a regular order, and expanding in form of a rose; the ovary, which is situated in the bottom of the flower, becomes a round fruit, full of juice, and contains many small bones in each. The tree is climbing, sending forth claspers at the joints, by which it fastens itself to what plant stands near it, and the fruit is produced in bunches. The species are, 1. The wild vine, commonly called the claret grape. 2. The July grape. 3. The Corinth grape, vulgarly called the currant grape. 4. The parsley leav'd grape. 5. The miller's grape. This is called the Burgundy in England; the leaves of this sort are very much powdered with white in the spring, from whence it had the name of miller's grape. 6. Is what is called in Burgundy, Pineau, and at Orleans, Auverna; it makes very good wine. 7. The white Chasselas, or royal muscadine; it is a large white grape; the juice is very rich. 8. The black chasselas, or black muscadine; the juice is very rich. 9. The red chasselas, or red muscadine. 10. The burlake grape. 11. The white muscat, or white Frontinac. 12. The red Frontinac. 13. The black Frontinac. 14. The damask grape. 15. The white sweet water. 16. The black sweet water. 17. The white muscadine. 18. The raisin grape. 19. The Greek grape. 20. The pearl grape. 21. The St Peter's grape, or hesperian. 22. The malmsey grape. 23. The malmsey muscadine. 24. The red Hamburgh grape. 25. The black Hamburgh, or warmer grape. 26. The Switzerland grape. 27. The white muscat, or Frontinac of Alexandria; called also the Jerusalem muscat, and gros muscat. 28. The red muscat, or Frontinac of Alexandria. 29. The white melic grape. 30. The white morillon. 31. The Alicante grape. 32. The white Auvernat. 33. The grey Auvernat. 34. The raisin muscat. The late duke of Tuscany, who was very curious in collecting all the sorts of Italian and Greek grapes into his vineyards, was possessed of upwards of three hundred several varieties. *Miller*.—The vine-prop elm, the poplar never dry. *F. Queen*.—Under his own vine. *Shak*.—The captain left of the poor to be vindexers. 2 *Kings*.—Depending vines the shelving cavern screen. *Pope*.

(2.) **VINE**, in botany. See *Vitis*.

* **VINEFRETTER**. *n. f.* [from *vine* and *fret*.] A worm that eats vine leaves. See *APHIS* and *PUCERON*.

(1.) * **VINEGAR**. *n. f.* [*vinagre*, Fr.] 1. Wine grown four; eager wine.—*Vinegar* is made by setting the vessel of wine against the hot sun.

Bacon.

Bacon.—Heav'n's blest beams turns *vinegar* more
four. *Pope*. 2. Any thing really or metaphorically
four.—And other of such *vinegar* aspect. *Shak*.

(2.) VINEGAR, ACETUM, an agreeable acid and penetrating liquor, prepared from wine, cyder, beer, and other liquors; of considerable use, both as a medicine and a sauce. The word is French, *vinaigre*; formed from *vin*, "wine;" and *aigre*, "sour." See ACETUM, and CHEMISTRY, *Index*. Wine and other vinous liquors are changed into vinegar by the acetous fermentation, which is nothing more than the acidification or oxygenation of wine, produced in the open air by means of the absorption of oxygen. Vinegar is composed of hydrogen and carbon united together in proportions not yet ascertained, and changed into the acid state by oxygen. As vinegar is an acid, we might conclude from analogy, that it contains oxygen; but this is put beyond doubt by direct experiments. In the first place, we cannot change wine into vinegar without the contact of air, containing oxygen; secondly, this process is accompanied by a diminution of the air in which it is carried on from the absorption of its oxygen; and, thirdly, wine may be changed into vinegar by any other means of oxydation. Independent of the proofs which these facts furnish of the acetous acid being produced by the oxygenation of wine, an experiment made by Mr Chaptal, professor of chemistry at Montpellier, gives a distinct view of what takes place in the process. He impregnated some water with about its own bulk of carbonic acid gas, procured from beer vats in fermentation; and placed this water in a cellar, in vessels communicating with the air, and in a short time the whole was converted into acetous acid. This carbonic acid gas, procured from beer vats in fermentation, is not perfectly pure, but contains a great quantity of alcohol in solution; wherefore water impregnated with it contains all the materials necessary for forming the acetous acid. The alcohol furnishes hydrogen and one portion of carbon; the carbonic furnishes oxygen, and the rest of the carbon; and the air of the atmosphere furnishes the rest of the oxygen necessary for changing the mixture into acetous acid. From this observation it follows, that nothing but hydrogen is wanting to convert carbonic acid into acetous acid; or, more generally, that, by means of hydrogen, and according to the degree of oxydation, carbonic acid may be changed into all the vegetable acids: and, on the contrary, that, by depriving any of the vegetable acids of their hydrogen, they be converted into carbonic acid.

(3.) VINEGAR CONCENTRATED. See CHEMISTRY, *Index*.

(4.) VINEGAR, EGGS IN. See ANIMALCULE, N° 9.

(5.) VINEGAR, METHOD OF MAKING. The process indicated by Boerhaave is still the most frequently used. It consists in fixing two casks in a warm room or place. Two false bottoms of basket-work are fixed at a certain distance from the bottom, upon which the refuse of grapes and vine twigs are placed. One of these tuns is filled with wine, and the other only half filled. The fermentation begins in this last; and, when

it is in full action, it is checked by filling the cask up with wine out of the other. The fermentation then takes place in the last-mentioned cask, that remained half filled; and this is checked in the same manner by pouring back the same quantity of liquid out of the other: and in this way the process is continued till the vinegar is made, which is usually in about 15 days. When the fermentation develops itself, the liquid becomes heated and turbid; a great number of filaments are seen in it; it emits a lively smell; and much air is absorbed, according to the observation of the Abbé Rozier. A large quantity of lees is formed, which subsides when the vinegar becomes clear. This lees is very analogous to the fibrous matter. Vinegar is purified by distillation. The first portions which pass over are weak; but soon afterwards the acetous acid rises, and is stronger the later it comes over in the distillation. This fluid is called *distilled vinegar*; and is thus cleared of its colouring principle, and the lees, which are always more or less abundant. Vinegar may likewise be concentrated by exposing it to the frost. The superabundant water freezes, and leaves the acid more condensed.

(6.) VINEGAR, METHOD OF MAKING BEER. Take a middling sort of beer, indifferently well hopped; into which, when it has worked well and grown fine, put some rape, or hulks of grapes, usually brought home for that purpose; mash them together in a tub; then letting the rape settle, draw off the liquid part, put it into a cask, and set it in the sun as hot as may be; the bung being only covered with a tile, or slate-flone: and in about 30 or 40 days it will become a good vinegar, and may pass in use as well as that made of wine, if it be refined, and kept from turning musty. Or thus:—To every gallon of spring-water add three pounds of Malaga raisins; which put into an earthen jar, and place them where they may have the hottest sun from May till Michaelmas; then pressing all well, tun the liquor up in a very strong iron-hooped vessel, to prevent its bursting: it will appear very thick and muddy when newly pressed; but will refine in the vessel, and be as clear as wine. Thus let it remain untouched for three months before it is drawn off, and it will prove excellent vinegar.

(7.) VINEGAR, METHOD OF MAKING CYDER. The cyder (the meanest of which will serve the purpose) is first to be drawn off fine into another vessel, and a quantity of the must of apples to be added: the whole is set in the sun, if there be convenience for it; and at a week or nine days end it may be drawn off.

(8.) VINEGAR, METHOD OF MAKING WINE. Any sort of vinous liquor being mixed with its own faces, flowers, or ferment, and its tartar first reduced to powder; or else with the acid and austere stalks of the vegetable from whence the wine was obtained, which hold a large proportion of tartar; and the whole being kept frequently stirring in a vessel which has formerly held vinegar, or set in a warm place full of the steams of the same, will begin to ferment anew, conceive heat, grow sour by degrees, and soon after turn into vinegar. The remote subjects of acetous fermentation

mentation are the same with those of vinous; but the immediate subjects of it, are all kinds of vegetable juices, after they have once undergone that fermentation which reduces them to wine: for it is absolutely impossible to make vinegar of must, the crude juice of grapes, and other ripe fruits, without the previous assistance of vinous fermentation. The proper ferments for this operation, whereby vinegar is prepared, are, 1. The faeces of all acid wines. 2. The lees of vinegar. 3. Pulverized tartar, especially that of Rhenish wine, or the cream or crystals thereof. 4. Vinegar itself. 5. A wooden vessel well drenched with vinegar, or one that has long been employed to contain it. 6. Wine that has often been mixed with its own faeces. 7. The twigs of vines, and the stalks of grapes, currants, cherries, or other vegetables of an acid austere taste. 8. Bakers' leaven, after it is turned acid. 9. All manner of ferments, compounded of those already mentioned.

(9.) VINEGAR, SALT OF. See CHEMISTRY, Index.

VINER'S ISLANDS, in Hudson's bay, lies NE. of the mouth of Albany river.

VINES, Richard, nonconformist, was a member of the Westminster assembly. He was a frequent preacher before Parliament. He died in 1655, several of his Sermons have been printed.

(1.) * VINEYARD. *n. f.* [*wingeard*, Saxon.] A ground planted with vines.—And give our vineyards to a barbarous people. *Shak.*—Some had surfeited in the vineyards. *Clarendon.*

(2.) VINEYARD SOUND, on the SE. coast of Massachusetts, in the straits between the Elizabeth Islands, and Martha's vineyard.

VINGORIA, a Dutch settlement in the peninsula of Indostan, on the coast of Concan, N. of Goa.

* VINNEVED, or *Finney*, *adj.* Mouldy. *Ainsf.*

VINNIUS, Arnold, professor of law at Leyden, was born at Holland, 1588, and died 1657. He wrote a commentary on the Institutes of Justinian, 2 vols. 4to, and another on the ancient law writers, 8vo.

VINNY, or FINNY, a small river of Angushire, which rises near Forfar, and joins the LUNAN at the church of Kinkell.

* VINTAGE. *n. f.* [*vinage*, Fr.] The produce of the vine for the year.—The best wines are in the driest vintages. *Bac.*—And half the vintage of the year our own. *Waller.*

* VINTAGER. *n. f.* [from *vintage*.] He who gathers the vintage. *Ainsworth.*

VINTAIN, a town of Africa, situated about two miles up a creek on the S. side of the Gambia. It is much resorted to by Europeans, on account of the great quantities of bees wax which are brought thither for sale. Lon. 15. 56. W. Lat. 13. 9. N.

VINTIMIGLIA, an ancient town of Italy, in Genoa, with a small harbour at the mouth of the rivers Bibera and Rotta, 70 miles SW. of Genoa.

* VINTNER. *n. f.* [from *vinum*, Latin.] One who sells wine.—The *vintner* may draw what religion he pleases. *Howek.*—The *vintner* destroys more lives than any malignant disease. *Swift.*

* VINTRY. *n. f.* The place where wine is sold. *Ainsworth.*

VIO, Thomas DE. See CAJETAN.

(1.) * VIOL. *n. f.* [*violle*, Fr. *viola*, Italian.] A stringed instrument of musick.—An unstringed *ol*, or a harp. *Shak.*—To strain a string, stop with the finger, as in the necks of lutes and *viol*. *Bac.*—Some strain the *viol* best. *Drayt.*—Of lute or *viol*, still more apt for mournful things. *Milt.*

(2.) VIOL, a musical instrument of the same form with the VIOLIN, and, like that struck with a bow. See MUSIC, § 46, 48.

VIOLA, in botany, a genus of plants of the class *syngnesia*, order *monogynia*; in the natural system arranged under the 29th order, *Campanulæ*. The calyx is pentaphyllous; the corolla five petaled, irregular, with a nectarium behind, horse shaped; the capsule is above the germen, three valved, monoclocular. There are 28 species; five of which are natives of Britain. The most important are,

1. VIOLA ODORATA, purple sweet violet, has leaves heart-shaped, notched; flowers deep purple, single; creeping scions. The flowers of this plant, taken in the quantity of a dram or two, are said to be gently purgative or laxative, and, according to Bergius and some others, they possess an anodyne and pectoral quality.

2. VIOLA PALUSTRIS, March violet. The leaves are smooth, reniform, two or three on each footstalk; flowers pale blue, small, inodorous. An infusion of the flowers is an excellent test of the presence of acids and alkalis.

3. VIOLA TRICOLOR, pansies, HEART'S-EASE or three faces under a hood. The stems are diffuse, procumbent, triangular; the leaves oblong, cut at the edges; stipule dentated; the flowers purple, yellow, and light blue; inodorous.

* VIOLABLE. *adj.* [from *violabilis*, Lat.] Such as may be violated or hurt.

* VIOLACEOUS. *adj.* [from *viola*, Lat.] Resembling violets.

VIOLAIS. See MUSIC, § 46.

* To VIOLATE. *v. a.* [*violo*, Latin.] 1. To injure; to hurt.—Employed to *violate* the sleep of those. *Milt.*—May mix with bliss, and yet not *violate*. *Dryd.*—To know, what known will *violate* thy peace. *Pope.* 2. To infringe; to break any thing venerable.—

Some of violated vows

'Twixt the souls of friend and friend. *Shak.*

—Those offences in general *violate* reason. *Hook.*

—Those reasonings *violating* common sense. *Beattie.*

3. To injure by irreverence.—I would *violate* my own arm rather than a church. *Brown.*—Forbidden to *violate* the sacred fruit. *Milton.* 4. To ravish; to deflower.—The Sabine's *violated* charms. *Prior.*

* VIOLATION. *n. f.* [*violatio*, Latin.] 1. Infringement or injury of something sacred or venerable.—The wilful *violation* of oaths. *Hooker.*—Men considered the *violation* of an oath a great crime. *Addis.* 2. Rape; the act of deflowering.—Of hot and forcing *violation*. *Shak.*

* VIOLATOR. *n. f.* [*violator*, Lat.] 1. One who injures or infringes something sacred.—Sacrilegious *violators* of churches. *South.* 2. A ravisher.—An hypocrite, a virgin *violator*. *Shak.*—The *violator*'s upbraidings and insults. *Clarissa.*

* VIOLENCE. *n. f.* [*violentia*, Lat.] 1. Force; strength applied to any purpose.—And blown

with restless violence about. *Shak.*—The violence of this conflict. *Milt.* 2. An attack; an assault; murder.—She, as it seems, did violence on herself. *Shak.* 3. Outrage: unjust force.—The whole earth fill'd with violence. *Milton.* 4. Eagerness; vehemence.—That seal you ask for with such violence. *Shak.* 5. Injury; infringement.—Offering violence to all records. *Burnet.* 6. Forcible desolation.

* **VIOLENT.** *adj.* [*violentus*, Latin.] 1. Forcible; acting with strength.—A violent cross wind blows. *Milton.* 2. Produced, or continued by force.—The posture is unnatural and violent. *Burnet.* 3. Not natural, but brought by force.—Violent or shameful death their due reward. *Milt.* 4. Assailant; acting by force.—Some violent hands were laid on Humphry's life. *Shak.* 5. A foe subtle or violent. *Milton.* 5. Unseasonably vehement.—We might be reckoned fierce and violent. *Hook.*—Such violence shall not take heaven, but hell by force. *Dec. of Piety.* 6. Extorted; not voluntary.—Vows made in pain, as violence and void. *Milton.*

* **VIOLENTLY.** *adv.* [from *violens*.] With force; forcibly; vehemently.—

Temp'rately proceed to what you would
Thus violently redress. *Shak.*
—Flame burneth violently. *Bacon.*—Ancient privileges must not be exacted violently. *Taylor.*

(1.) * **VIOLET.** *n. f.* [*violette*, Fr. *viola*, Latin.] A flower.—When daisies pied, and violets blue. *Shak.*—And in the violet embroider'd vale. *Milt.*—It alters not our simple idea, whether we think that blue be in the violet itself, or in our mind only. *Löcke.*

(2.) **VIOLET**, in botany. See **VIOLA**.

(3.) **VIOLET CRAB**, in zoology. See **CANCER**, N° 15.

(1.) * **VIOLIN.** *n. f.* [*violon*, Fr. from *viol.*] A fiddle; a stringed instrument of musick.—Praise with violins and lutes. *Sandys.*—Sharp violins. *Dryd.*

(2.) **VIOLIN**, or **FIDDLE**, a musical instrument mounted with four strings or guta, and struck or played with a bow. The style and sound of the violin is the gayest and most sprightly of all other instruments; and hence it is of all others the fittest for dancing. Yet there are ways of touching it, which render it grave, soft, languishing, and fit for church or chamber music.—It generally makes the treble or highest parts in concerts. Its harmony is from fifth to fifth. Its play is composed of brass, counter-tenor, tenor, and treble; so which may be added, a fifth part; each part has four fifths, which rise to a greater seventeenth. See **MUSIC**, § 46, 48.

* **VIOLIST.** *n. f.* [from *viol.*] A player on the viol.

(1.) * **VIOLONCELLO.** *n. f.* [Ital.] A stringed instrument of music.

(2.) **VIOLONCELLO**, of the Italians, is properly our fifth violin; which is a little bass violin, half the size of the common bass violin, and the strings bigger and longer in proportion: consequently its sound is an octave lower than our bass violin; which has a noble effect in concerts.

(1.) * **VIPER.** *n. f.* [*viperæ*, Latin.] 1. A serpent of that species which brings its young alive, of which many are poisonous.—A viper came out. *Vql. XXII. PART II.*

of the heat. *As.*—The viper's deadly teeth shall pierce his skin. *Sandys.*—Viper-catchers are no more afraid of the bite of a viper, than of a common puncture. *Derham.* 2. Any thing mischievous.—Where is this viper. *Shak.*

(2.) **VIPER**, in zoology. See **COLUBER**, **POISON**, and **SERPENT**.

* **VIPERINE.** *adj.* [*viperinus*, Lat.] Belonging to a viper.

* **VIPEROUS.** *adj.* [*vipereus*, Lat. from *viper.*] Having the qualities of a viper.—Civil dissention is a viperous worm. *Shak.*—This viperous traitor. *Shak.*—Some viperous critic may bereave. *Dau.*

(1.) * **VIPER'S BUGLOSS.** *n. f.* [*echium*, Latin.] A plant.—Each flower is succeeded by four seeds, which are in form of a viper's head. *Miller.*

(2.) **VIPER'S BUGLOSS.** See **ECHIUM**.

(3.) * **VIPER'S GRASS.** *n. f.* [*scorzonera*, Latin.] A plant.

(4.) **VIPER'S GRASS.** See **SCORZONERA**.

VIQUE, a town of Spain, in Catalonia.

VIRACOCCHA. See **DELUGE**, § 7.

* **VIRAGO.** *n. f.* [Latin.] 1. A female warrior; a woman with the qualities of a man.—Melpomene is represented like a virago or manly lady. *Peacbam.*—To arms! to arms! the fierce virago cries. *Pope.* 2. It is commonly used in detestation for an impudent turbulent woman.

VIRE, a town of France, in the dep. of Calvados, on the Vire, 130 miles W. of Paris.

VIRECTA, in botany, a genus of plants of the class *pentandria*, and order of *monogynia*.

* **VIRELAY.** *n. f.* [*virrelay*, *virelai*, Fr.] A sort of little ancient French poem, that consisted only of two rhymes and short verses, with strops. *L'Atad.*

The mournful muse in mirth now lift ne mask,
As she was wont in youth and summer days;
But if thou algate lust like *virrelays*,
And looser songs of love to underlong. *Spenser.*

The band of flutes began to play,
To which a lady sung a *virelay*. *Dryden.*

* **VIRENT.** *adj.* [*virens*, Latin.] Green; not faded.—In these, yet fresh and virent, they carve out figures. *Brown.*

* **VIRGE.** *n. f.* [*virga*, Lat. better *verge*, from *verge*, Fr.] A dean's mace.—The silver virge with decent pride. *Swift.*

(1.) **VIRGIL**, or **PUBLIUS VIRGILIUS MARO**, prince of the Latin poets, was born at Andes, near Mantua, about 70 years B. C. His first years were spent at Cremona, whence he removed to Rome, when his country was partitioned out among the soldiers after the battle of Philippi. There, by means of his friend **MÆCENAS**, he was introduced to Augustus, who restored to him his estate. On this occasion he wrote his 1st Eclogue; and on completing the *Bucolica*, he wrote the *Georgica*. After these were finished, and had been read by Augustus, he began the *Æneid*, at the request of the emperor. The poet was engaged 11 years on this immortal work, but died without revising it, at Brundisium, B. C. 19, in the 52d year of his age. He left the greatest part of his property to Mæcenas, Tucca, and Augustus. His remains were interred on a spot in the road leading from Naples to Puteoli. He was of a remarkably timorous disposition. The best editions of Virgil, are Baskerville's 4to. Birmingham. 1757:

K k k k

the

the Variorum, 8vo. 1661; and Glasgow 12mo, 1758. This poet has been well translated into English by Dryden, Pitt, and Warton.

(1.) VIRGIL, Polydore, an historian, born at Urbino in Italy, was sent, in the beginning of the 16th century, by pope Alexander VI. as sub-collector of the Papal tax called *Peter-pence*, into this kingdom. Having gained the favour of Henry VIII. he was preferred step by step to the arch-deaconry of Wells. By order of that sovereign, he wrote a History of England in Latin, more elegant than faithful. Polydore continued in England during the whole reign of Henry VIII. and part of that of Edward VI. In 1550, he requested leave to revisit his native country. He was accordingly dismissed with a present of 300 crowns, and the privilege of holding his preferments to the end of his life. He died at Urbino in the year 1555. He wrote, also, 1. *De rerum inventioribus*; of which an English translation was published by Langley in 1663. 2. *De prodigiis et fortibus*. 3. *Episcoporum Anglie catalogus*. Manuscript. 4. *De vita perfecta*. Basil, 1546, 1553, 8vo. 5. *Epistola erudite*; and some other works.

(3.) VIRGIL, a military township of New York, in Onondago county.

VIRGILIAN HUSBANDRY, a term used by authors to express that sort of husbandry, the precepts of which are so beautifully delivered in Virgil's Georgics. The husbandry in England is Virgilian in general. In those parts of England along the southern coast, where the Romans principally inhabited, not only the practice, but the expressions, are in many respects the same with those of the ancient Romans, many of the terms used by the ploughmen being of Latin origin, and the same with those used by those people on the like occasions. And on a strict observation, more of Virgil's husbandry is at this time practised in England than in Italy itself. This change in the Italian husbandry is, however, much more to the credit of that people, than the retaining the Virgilian scheme is to ours.

(1.) * VIRGIN. *adj.* Besitting a virgin; suitable to a virgin; maidenly.—The *virgin* crimson of modesty. *Shak.*—What says the silver with her *virgin* hue? *Shak.*—The formal decencies of *virgin* shame. *Cowley.*—A *virgin* state of life. *Law.*

(2.) * VIRGIN. *n. f.* [*virge*, Fr. *virgo*, Latin.] 1. A maid; a woman unacquainted with men.—The best regarded *virgins* of our clime. *Shak.*—So *virgin*-like without. *Shak.*—The damsel was very fair, and a *virgin*. *Gen.*—An hypocrite, a *virgin* violator. *Shak.*—At which a *virgin* hides her face. *Cowley.* 2. A woman not a mother. Unusual.—

Likest to Ceres in her prime,
Yet *virgin* of Proserpina from Jove. *Milton.*
3. Any thing untouched or unmingled; any thing pure; as, *virgin* honey.—*Virgin* wax. *Boyle.*—*Virgin* earth. *Woodw.*—*Virgin* mould. *Derh.* 4. The sign of the zodiac in which the sun is in August.—Thence down again by Leo and the *Virgin*. *Milt.*

(3.) VIRGIN GORDA, one of the principal of the Virgin islands (N^o 4.) 12 miles E. of Tortula, about 18 miles in length.

(4.) VIRGIN ISLANDS, a group of small islands

in the W. Indies, E. of Porto Rico, in Long. 63. o. W. Lat. 18. 10. N.

(5.) VIRGIN MARY, CAPE OF, the NE. point of the entrance of the straits of Magellan. Long. 67. 54. W. Lat. 52. 32. S.

* To VIRGIN. *v. n.* [a cant word.] To play the virgin.—

A kiss

I carried from thee, my dear; and my true lip
Hath *virgin'd* it e'er since. *Shak.*

(1.) * VIRGINAL. *adj.* [from *virgin*.] Maidenly; pertaining to a virgin.—Of chastity and honour *virginal* Spens.

Tears *virginal*

Shall be to me even as the dew to fire. *Shak.*
—Conjugal or *virginal* chastity. *Hammond.*

(2.) * VIRGINAL. *n. f.* [more usually *virginals*.] A musical instrument, so called because commonly used by young ladies.—Harps and *virginals*. *Bacon.*

* To VIRGINAL. *v. n.* To pat; to strike as on the virginal. A cant word.—Still *virginalling* upon thy palm. *Shak.*

(1.) VIRGINIA. Her tragical story is recorded under ROME, § 20.

(2.) VIRGINIA, one of the United States of North America, is bounded on the east by the Atlantic Ocean, on the north by Pennsylvania and the river Ohio, on the west by the Mississippi, on the south by North Carolina. These boundaries include an area somewhat triangular of 121,525 miles, whereof 79,650 lie westward of the Alleghany mountains, and 57,034 westward of the meridian of the mouth of the Great Kanaway. The principle rivers in Virginia are, Roanoke, James river, which receives the Rivanna, Appamattox, Chickahominy, Nansemond, and Elizabeth rivers; York river, which is formed by the junction of Pamunky and Mettaponny rivers; Rappahannock, and Patomak. By the census taken in 1790, the population was 747,610, of whom 292,627 were slaves. The college of William and Mary is the only public seminary in Virginia. The buildings are of brick, sufficient for an indifferent accommodation of perhaps 100 students. There are a number of flourishing academies in Virginia; one in Prince Edward county, one at Alexandria, one at Norfolk, one at Hanover, and others in other places. The present denominations of Christians in Virginia are Presbyterians, who are the most numerous, and inhabit the western parts of the state; and Episcopalian, who are the most ancient settlers, and occupy the eastern and first settled parts of the state. Intermingled with these are great numbers of Baptists and Methodists. Virginia has produced some of the most distinguished men that have been active in effecting the important revolutions in America. The Virginians who are rich, are in general sensible, polite, and hospitable, and of an independent spirit. The poor are ignorant and abject; all are of an inquisitive turn, and in many other respects very much resemble the people in the eastern states. At almost every tavern or ordinary on the public road, there is a billiard table, a backgammon table, cards, and other implements for various games. The passion for cock-fighting is very great. The executive powers

owers are lodged in the hands of a governor chosen annually, and incapable of acting more than 3 years in 7. He is assisted by a council of 6 members. The judiciary powers are divided among several courts. Legislation is exercised by two houses of assembly, the one called the *House of Delegates*, composed of two members from each county, chosen annually by the citizens possessing an estate for life in 100 acres of uninhabited land, or 25 acres with a house on it, or in a house or lot in some town. The other called the *Senate*, consisting of 24 members, chosen quadrennially by the same electors, who for this purpose are distributed into 24 districts. The concurrence of both houses is necessary to the passage of a law. They have the appointment of the governor and council, the judges of the superior courts, auditors, attorney-general, treasurer, register of the land office, and delegates to Congress. Before the last war, there was exported from this state, *communibus annis*, nearly as follows:

Articles.	Quantity.
Tobacco, . . .	55,000 hhds. of 1000 lb.
Wheat, . . .	800,000 bushels
Indian Corn, . . .	600,000 bushels
Shipping, . . .	
Masts, planks, skantling, shingles, staves, . . .	
Tar, pitch, turpentine, . . .	30,000 barrels
Peltry, viz. skins of deer, beavers, otters, muskrats, racoons, foxes, . . .	180 hhds. of 600 lb.
Pork, . . .	4,000 barrels
Flax seed, hemp, cotton, . . .	
Pit-coal, pig-iron, . . .	
Pease, . . .	5,000 bushels
Beef, . . .	1,000 barrels
Sturgeon, white fish, herring, . . .	
Brandy from peaches and apples, whisky, . . .	
Horses, . . .	

The amount of the above articles is 850,000l. Virginia money, or 607,142 guineas.

The whole country, before it was planted, was one continued forest, interspersed with marshes, which in the West Indies they call *savamps*. No country now produces greater quantities of excellent tobacco; and the soil is generally so sandy and shallow, that after they have cleared a fresh piece of ground out of the woods it will not bear tobacco after two or three years, unless cow-penosed and well dunged. Caves have been discovered among the mountains, which yield so much saltpetre, that 500,000 pounds might be collected annually. The forests yield oaks, poplars, pines, cedars, cypresses, sweet myrtles, chestnuts, hickory, live oak, walnut, dog-wood, alder, hazel, chinquapins, locust-trees, sassafras, elm, ash, beech, with a great variety of sweet gums and incense, which distil from several trees; pitch, tar, rosin, turpentine, plank-timber, masts, and yards. Virginia yields also rice, hemp, Indian corn, plenty of pasture, with coal, quarries of stone, and lead and iron ore.

(3.) VIRGINIA, a town of Ireland, in Cavan, Ulster, on Lough Ramor, 40 miles from Dublin.

(1.) * VIRGINITY. *n. f.* [*virginitas*, Latin.] Maidenhead; unacquaintance with man.—The rich worth of your virginity. *Shak.*—Natural virginity of itself is not a state more acceptable to God. *Taylor.*

(2.) VIRGINITY, the test or criterion of a virgin; or that which entitles her to the denomination. See HYMEN.

VIRINSTOW, a village in Devonshire, SE. of Lustenecote.

VIRGO, in astronomy, one of the signs or constellations of the zodiac. See ASTRONOMY, *Index*.

VIRGULA DIVINATORIA, divining rod. See MINE, § 5.

VIRIATHUS, a shepherd of Lusitania, who from heading a gang of robbers, came to command a powerful army. He made war against the Romans for 14 years with success. Many generals, and Pompey himself, were beaten. Cæpio being sent against him, meanly bribed his servants to murder him.

VIRIDOMARUS, a young man of great power among the Ædui. Cæsar greatly honoured him, but he fought at last against the Romans.

* VIRILE. *adj.* [*virilis*, Lat.] Belonging to man; not puerile; not feminine.

* VIRILITY. *n. f.* [*virilité*, Fr. *virilitas*, Lat. from *virile*.] 1. Manhood; character of man.—The lady made generous advances to the borders of virility. *Rambler.* 2. Power of procreation.—Before they begat children, or gave any testimony of their virility. *Brown.*

VIRIPLACA, a goddess among the Romans, who presided over the peace of families.

* VIRMILION. *n. f.* Properly *vermilion*. A red colour.—With a vermilion dye his temples stain'd. *Roscommon.*

VIRTON, a town of France, in the dep. of Forre, 22 miles W. of Luxemburg. Lon. 5. 41. E. Lat 49. 36. N.

(1.) * VIRTUAL. *adj.* [*virtual*, Fr. from *virtue*.] Having the efficacy without the sensible or material part.—Metalline waters have virtual cold in them. *Bacon.*—Heat and cold have a virtual transition, without communication of substance. *Bacon.*

Do they mix

Irradiance? *virtual*, or immediate touch? *Milt.*—Fomented by his virtual pow'r, and warm'd. *Milton.*—Neither an actual or virtual intention of the mind. *Stillingfleet.*

(2.) VIRTUAL, or POTENTIAL; something that has a power or virtue of acting or doing. The term is chiefly understood of something that acts by a secret invisi ble cause, in opposition to actual and sensible.

* VIRTUALITY. *n. f.* [from *virtual*.] Efficacy.—In one grain of corn there lieth dormant a virtuality of many others. *Brown.*

* VIRTUALLY. *adv.* [from *virtual*.] In effect, though not materially.—They are virtually contained in other words still continued. *Hamm.*—The bulk of the people virtually gave their approbation. *Addison.*

* To VIRTUATE. *v. a.* [from *virtue*.] To make efficacious. Not used.—Potable gold should be

K k k k 2

be *virtuated* with a power of generating the essentials. *Harvey*.

(1.) * **VIRTUE**. *n. f.* [*virtus*, Latin.] 1. Moral goodness; opposed to *vice*.—Either I'm mistaken, or there is *virtue* in that Falstaff. *Shak.*—God must delight in *virtue*. *Addison*.—*Virtue* only makes our bliss below. *Pope*.—Through the veil of his vices we see a dawn of greatness and *virtue*. *Shak.* 2. A particular moral excellence.—In Belmont is a lady—Of wondrous *virtues*. *Shak.*—Remember all his *virtues*. *Addison*. 3. Medicinal quality.—All your unpublisch'd *virtues* of the earth. *Shak.*—The *virtuous* bezoar is taken from the beast that feedeth upon the mountains; and that without *virtue* from those that feed in the vallies. *Bacon*. 4. Medicinal efficacy.—An essay writer must practise the chymical method, and give the *virtue* of a full draught in a few drops. *Addison*. 5. Efficacy; power. Before *virtue* is used sometimes by and sometimes in; by in *virtue* is meant in consequence of the *virtue*.—There's a *virtue* in stones. *L'Estrange*.—Where there is a full purpose to please God, there, what a man can do, shall, by *virtue* thereof, be accepted. *South*.—By *virtue* of syllogism. *Locke*.—I his they shall attain, in *virtue* of piety. *Asterbury*.—He used to travel through Greece, by *virtue* of this fable. *Addison*. 6. Acting power.—Jesus knowing that *virtue* had gone out of him. *Mark*. 7. Secret agency; efficacy, without visible or material action.—Yet no part toucheth, but by *virtue's* touch. *Davies*. 8. Bravery; valour.—Trust to thy single *virtue*;—Discharge. *Shak.*—The conquest of Palestine, with singular *virtue* they performed. *Raleigh*. 9. Excellence; that which gives excellence.—Terence is thought the sole grace and *virtue* of the fable, the sticking in of sentences, as our poets do the forcing in of jests. *B. Jon.* 10. One of the orders of the celestial hierarchy.—Thrones, dominations, principdoms, *virtues*, pow'rs. *Milton*.—A winged *virtue* through th' etherial sky. *Tickel*.

(2.) **VIRTUE**, in ethics, a term used in various significations. In the general it denotes power, or the perfection of any thing, whether natural or supernatural, animate or inanimate, essential or accessory. But, in its more proper or restrained sense, *virtue* signifies a habit, which improves and perfects the possessor and his actions. See **MORAL PHILOSOPHY**.

* **VIRTUELESS**. *adj.* [from *virtue*.] 1. Wanting virtue; deprived of virtue. 2. Not having efficacy; without operating qualities.—Altogether silent, *virtueless*, and dead. *Raleigh*.—*Virtueless* the wisht all herbs and charms. *Fairfax*.—Some would make those glorious creatures *virtueless*. *Hakeworth*.

* **VIRTUOSO**. *n. f.* [Italian.] A man skilled in antique or natural curiosities; a man studious of painting, statuary, or architecture.—Methinks those generous *virtuosos* dwell in a higher region than other mortals. *Glanv.*—*Virtuosos*, the Italians call a man who loves the noble arts, and is a critic in them. And amongst our French painters, the word *vertueux* is understood in the same signification. *Dryden*.—The *virtuoso* of that time. *Tatler*.—The *virtuoso* of France. *Addison*.

* **VIRTUOUS**. *adj.* [from *virtue*.] 1. Morally

good; applied to persons and practices.—If his occasion were not *virtuous*. *Shak.*—*Virtuous* and holy, be thou conqueror. *Shak.*—Is wisest, *virtuouslest*, discreetest, best. *Milton*.—One *virtuous* rarely found. *Milton*.—For God's service, and all *virtuous* ends. *Kettlew.* 2. [Applied to women.] Chaste.—The modest wife, the *virtuous* creature. *Shak.* 3. Done in consequence of moral goodness. Love oft to *virtuous* acts inflames the mind. *Dryd.*—Consider how powerfully you are called to a *virtuous* life. *Lacu.* 4. Efficacious; powerful.—Wolves, with her *virtuous* drugs, so tame she made. *Chapm.*—With one *virtuous* touch, th' arch-chemic fun. *Milt.* 5. Having wonderful or eminent properties.—That *virtuous* steel he rudely snatch'd away. *Spens.*—Lifting up his *virtuous* staff on high. *Spens.*—He own'd that *virtuous* ring and glass. *Milton*. 6. Having medicinal qualities.—There is a *virtuous* bezoar, and another without virtue. *Bacon*.—*Virtuous* herbs. *Dryd*.

* **VIRTUOUSLY**. *adv.* [from *virtuous*.] In a virtuous manner; according to the rules of virtue.—The gods are my witnesses, I desire to do *virtuously*. *Sidney*.—They taught no less *virtuously* how to die. *Hooker*.—They that mean *virtuously*. *Shak.*—But our past life, when *virtuously* spent. *Darb.*—She has been *virtuously* educated. *Add.*

* **VIRTUOUSNESS**. *n. f.* [from *virtuous*.] The state or character of being virtuous.—The love of Britomart, and *virtuousness* of Belphebe. *Spens.*

VIRTZ, a lake of Russia, in Riga, 40 miles round; 96 miles NNE. of Riga.

VIUELA, a town of Spain, in Aragon, 9 miles from Tarragona.

* **VIRULENCE**. *n. f.* [from *virulent*.] Men-

* **VIRULENCY**. *n. f.* [from *virulent*.] Malignancy of temper; bitterness.—*Virulency* and bitterness. *Decay of Piety*.—Unworthy malice and impotent *virulency*. *Fell.*—*Virulence*, instead of charity. *Add.*—Intemperance of speech, and *virulence* of pen. *Swift*.

(1.) * **VIRULENT**. *adj.* [*virulent*, Fr. *virulentus*, Latin.] 1. Poisonous; venomous. 2. Poisoned in the mind; bitter; malignant.

(2.) **VIRULENT**, a term applied to any thing that yields a virus; that is, a contagious or malignant pus.

* **VIRULENTLY**. *adv.* [from *virulent*.] Malignantly; with bitterness.

(1.) **VIS**, [Lat.] *n. f.* strength or force.

(2.) **VIS INERTIAE**. See **MECHANICS**, Part III. Sect. II.

(3.) **VIS MEDICATRIX NATURÆ**. See **MEDICINE**, Index.

VISAGAPATAM, a town of Hindoostan, in Cicacole, 50 miles W. of Cicacole, and 100 NE. of Rajamundy.

* **VISAGE**. *n. f.* [*visage*, Fr. *visagio*, Italian.] Face; countenance; look. It is now rarely used but with some ideas of dislike or horror.—Phebe's—Silver *visage*. *Shak.*—She'll flea thy wolfish *visage*. *Shak.*—The *visage* of offence. *Shak.*—With *visage* all inflam'd. *Milton*.—His goary *visage* down. *Milton*.—Love and beauty still that *visage* grace. *Waller*.

VISCERA, in anatomy, a term signifying the same with entrails; including the heart, liver, lungs,

lungs, spleen, intestines, and other inward parts of the body. See *ANATOMY INDEX*.

* *TO VISCERATE*. *v. a.* [*viscera*, Latin.] To embowel; to exentrate.

* *VISCAMUND*. See *FISCHAMUND*.

* *VISCID*. *adj.* [*viscidus*, Latin.] Glutinous; tenacious.

(1.) * *VISCIDITY*. *n. s.* [from *viscid*.] 1. Glutinousness; tenacity; ropiness.—This motion in some human creatures may be weak, in respect to the *viscid*ity of what is taken, so as not be able to propel it. *Arbuthnot*. 2. Glutinous concretion.—Catharticks of mercurials precipitate the *viscidities* by their stypticity. *Floyer*.

(2.) *VISCIDITY*, or } the quality of something
(1.) *VISCOSITY*, } that is vitcid or viscous;
that is, glutinous and sticky, like birdlime, which the Latins call by the name of *viscus*.

(2.) * *VISCOSITY*. *n. s.* [*viscosus*, Fr. from *viscosus*.] 1. Glutinousness; tenacity.—The air being mixed with the animal fluids, determines their condition as to rarity, density, *viscosity*, tenacity. *Arbuthnot*. 2. A glutinous substance.—Semenal *viscosities*. *Brown*.

(1.) * *VISCOUNT*. *n. s.* [*vicecomes*, Lat.] *Viscount* signifies as much as sheriff; between which two words there is no other difference, but that the one comes from our conquerors the Normans, and the other from our ancestors the Saxons. *Viscount* also signifies a degree of nobility next to an earl, which is an old name of office, but a new one of dignity, never heard of amongst us, till Henry VI. his days. *Cowel*.

(2.) *VISCOUNT* [*Vice Comes*], was anciently an officer under an earl, to whom, during his attendance at court, he acted as deputy to look after the affairs of the county. Now a viscount is created by patent as an earl is; his title is *Right Honourable*; his mantle is two doublings and a half of plain fur; and his coronet has only a row of pearls close to the circle.

* *VISCOUNTESS*. *n. s.* [from *viscount*. *Viscount* and *viscountess* are pronounced *vicount* and *vicountess*.] The lady of a viscount; a peeress of the fourth order.

* *VISCOUS*. *adj.* [*viscous*, Fr. *viscosus*, Lat.] Glutinous; sticky; tenacious.—Nitre severeth and divideth any thing that is foul and *viscous*. *Bacon*.—Holly is of so *viscous* a juice as they make bird-lime of the bark. *Bacon*.

VISCUM, in botany, a genus of plants of the class *diacia*, order *tetrandria*, and in the natural system arranged under the 48th order, *aggrigate*. The male calyx is quadripartite; the anther adheres to the calyx: the female calyx consists of four leaves; there is no style; the stigma is obtuse. There is no corolla; the fruit is a berry with one seed. There are 9 species; only one of which is a native of Britain, viz.

VISCUM ALBUM, or common MISSELTOW. It is a shrub growing on the bark of several trees, particularly the oak; the leaves are confugate and elliptical, the stem forked; the flowers whitish in the axils of the leaves. This plant was reckoned sacred among the druids. See *DRUIDS*, § 12.

VISET, a town of the French empire, in the dep. of the Ourte; and late bishopric of Liege; 6 miles S. of Maestricht, and 8 N. of Liege.

WISEU, a town of Portugal, in Beira; 27 miles S. of Lamega, and 42 NE. of Coimbra.

VISHNOU, that person in the triad of the Bramins who is considered as the preserver of the universe. *Brahma* is the creator and *Siva* the destroyer; and these two, with Vishnou, united in some inexplicable manner, constitute *Brahme*, or the supreme god of the Hindoos. See *DELUGE*, § 6. *POLYTHEISM*, *MYTHOLOGY*, § 20.

VISAPOOR, a town of Hindoostan, capital of a prov. so named; 306 miles N. of Seringapatam.

* *VISIBILITY*. *n. f.* [*visibilité*, Fr. from *visible*.] 1. The state or quality of being perceptible by the eye.—The colours of outward objects brought into a darkened room, do much depend for their *visibility* upon the dimness of the light they are beheld by. *Boyle*. 2. State of being apparent, or openly discoverable; conspicuousness.—The perpetual *visibility* of the church. *Stillingfleet*.—The *visibility* and example of our virtues. *Rogers*.

(1.) * *VISIBLE*. *adj.* [*visible*, Fr. *visibilis*, Lat.] 1. Perceptible by the eye—

On this mount he appeared; under this tree stood *visible*. *Milton*.

—Each'thought was *visible*. *Dryden*.—The least spot is *visible* on ermine. *Dryd*.—Virtue made *visible* in outward grace. *Young*. 2. Discovered to the eye.—*Visible* spirits. *Shak*. 3. Apparent; open; conspicuous.—The factions at court were greater, or more *visible* than before. *Clarendon*.

(2.) * *VISIBLE*. *n. f.* Perceptibility by the eye.—*Visibles* work upon a looking-glass, and audibles upon the places of echo. *Bacon*.

* *VISIBleness*. *n. f.* [from *visible*.] State or quality of being visible.

* *VISIBLY*. *adv.* [from *visible*.] In a manner perceptible by the eye.—The day being *visibly* governed by the sun. *Holder*.—By the head we make known more *visibly* our supplications. *Dryd*.

VISIER, an officer or dignitary in the Ottoman empire, whereof there are two kinds; one called by the Turks *Vizier-azem*, that is, "grand visier," is the prime minister of state in the whole empire. He commands the army in chief, and presides in the divan or great council. Next to him are six other subordinate visiers, called *visiers of the bench*; who officiate as his counsellors or assessors in the divan.

VISIGNANO, a town in Istria; 21 miles N. of Rovignano.

VISIGOTHS, or *WESTERN GOTHS*. See *GOTHS*, ITALY, § 6; and SPAIN, § 11.

VISINA, a town in Istria; 42 miles SE. of Umago.

(1.) * *VISION*. *n. f.* [*vision*, Fr. *visio*, Lat.] 1. Sight; the faculty of seeing.—Anatomists, when they have taken off the dura mater, can then see, through the thinner coats, the pictures of objects lively painted thereon; and these pictures, propagated by motion along the fibres of the optic nerves into the brain, are the cause of *vision*. *Newton*.—The perfection of *vision*. *Newton*. 2. The act of seeing.—*Vision* in the next life is the perfecting of faith in this. *Hammond*. 3. A supernatural appearance; a spectre; a phantom.—No dreams, but *visions* strange. *Sidney*.—Last night the very gods shew'd me a *vision*. *Shak*.—
And

And, in a *vision*, full of majesty. *Shak.*—To call by *vision*, from his father's house. *Milton.* 4. A dream; something shewn in a dream. "A dream happens to a sleeping; a vision may happen to a waking man. A dream is supposed natural, a vision miraculous; but they are confounded.—'Twas but a *vision* still, and *visions* are but vain. *Dryden*—The *visions* of a dream. *Locke.*

(2.) *VISION*, in optics, the act of seeing or perceiving external objects by means of the organ of sight, the eye. See *ANATOMY, Index*; and *METAPHYSICS.*

(3.) *VISION.* From various experiments Mr Home considers the following facts to have been ascertained respecting vision: "1. That the eye has a power of adjusting itself to different distances when deprived of the crystalline lens; and therefore the fibrous and laminated structure of that lens is not intended to alter its form, but to prevent reflections in the passage of the rays through the surfaces of media of different densities, and to correct spherical aberration." 2. That the cornea is made up of laminae; that it is elastic, and when stretched is capable of being elongated one 11th part of its diameter, contracting to its former length immediately upon being left to itself. 3. That the tendons of the four straight muscles of the eye are continued to the edge of the cornea, and terminate, or are inserted, in its external laminae: their action will therefore extend to the edge of the cornea. 4. That in changing the focus of the eye from seeing with parallel rays to a near distance, there is a visible alteration produced in the figure of the cornea, rendering it more convex; and when the eye is again adapted to parallel rays, the alteration by which the cornea is brought back to its former state is equally visible."

(1.) * *VISIONARY.* *adj.* [*visionnaire*, Fr. from *vision*.] 1. Affected by phantoms; disposed to receive impressions on the imagination.—Or lull to rest the *visionary* maid. *Pope.* 2. Imaginary; not real; seen in a dream; perceived by the imagination only.—The hunter close pursu'd the *visionary* maid. *Dryd.*—Let me know whether I have the same place in the real heart, that I had in the *visionary* one. *Addison.*—Further *visionary* prospects. *Swift.*

(2.) * *VISIONARY.* } *n. f.* [*visionnaire*, Fr.] One whose imagination is disturbed.—This account exceeded all the Noctambuli or *visionaries* I have met with. *Turner.*—The lovely *visionary* gave him perpetual uneasiness. *Female Quixotte.*

* *VISIT.* *n. f.* [*visite*, Fr. from the verb.] The act of going to see another. A designed or accidental *visit*. *Watts.*—If this woman would make fewer *visits*. *Law.*

(1.) * *To VISIT.* *v. a.* [*visiter*, Fr. *visito*, Lat.] 1. To go to see.—You must go *visit* the lady that lies in. *Shak.*—Virgins *visited* by angel powers. *Pope.* 2. [In scriptural language.] To send good or evil judicially.—When God *visiteth*, what shall I answer him? *Job.*—Thou shalt be *visited* of the Lord with thunder. *Isa.*—God *visit* thee in good things. *Judith.*—Whenever God shall *visit* us with so fatal an event. *Swift.* 3. To salute with a pre-

sent.—Samson *visited* his wife with a kid. *Judges.* 4. To come to a survey, with judicial authority.—The bishop ought to *visit* his diocese every year in person. *Ayliffe.*

(1.) * *VISIT.* *v. n.* To keep up the intercourse of ceremonial salutations at the houses of each other.—*Visiting* on Sundays. *Law.*

* *VISITABLE.* *adj.* [from *visit*.] Liable to be visited.—All hospitals are *visitabile* by the king or lord chancellor. *Ayliffe.*

* *VISITANT.* *n. f.* [from *visit*.] One who goes to see another.—While the great *visitant* approach'd. *Miln.*—When the *visitant* comes again, he is no more a stranger. *South.*—Had been a *visitant* in Spain. *Arbut.*—Grieved that a *visitant* so long should wait. *Pope.*—Drusa receives her *visitants* in bed. *Young.*

* *VISITATION.* *n. s.* [*visito*, Lat.] 1. The act of visiting.—'Tis not a *visitation* fram'd, but forc'd. *Shak.*—Nothing but peace and gentle *visitation*. *Shak.* 2. Object of visits.

O flow'rs,
My early *visitation*, and my last. *Milton.*
3. [*Visitation*, Fr.] Judicial visit or perambulation.—Your grace, in your metropolitical *visitation*. *White.*—The arch-deacon's *visitation*. *Ayliffe.* 4. Judicial evil sent by God; state of suffering judicial evil.—That which thou dost not understand when thou readest, thou shalt understand in the day of thy *visitation*. *Taylor.* 5. Communication of divine love.—The most comfortable *visitations* God hath sent men from above. *Hooker.*

* *VISITATORIAL.* *adj.* [from *visitor*.] Belonging to a judicial visitor.—Some will have it, that an archdeacon does of common right execute this *visitatorial* power in his archdeaconry. *Ayliffe.*

* *VISITER.* *n. s.* [from *visit*.] 1. One who comes to see another.—The access of gentle *visitors*. *Shak.*—You see this confluence, this great flood of *visitors*. *Shak.*—They entertain their *visitors* with strange rambling discourses. *Harvey.*—I should hardly prevail to find one *visitor*. *Swift.* 2. [*Visiteur*, Fr.] An occasional judge; one who regulates the disorders of any society.—The *visitors* expell'd the orthodox. *Walton.*—Your charter claims him as your *visitor*. *Garth.*—Whatever abuses have crept into the universities, might be reformed by strict injunctions to the *visitors* and heads of houses. *Swift.*

VISITZ, a town of Austria, 14 miles E. of Waidhofen.

* *VISIVE.* *adj.* [*visif*, Fr. *visus*, Lat.] Formed in the act of seeing.—This happens when the axis of the *visive* cones, diffused from the object, fall not upon the same plane; but that which is conveyed into one eye is more depressed or elevated than that which enters the other. *Brown.*

VISNEA, in botany, a genus of plants, in the class of *Dodecandria*, and order of *Trigynia*.

VISNITZA, a town of European Turkey, in Moldavia; 30 miles N. of Suzava.

* *VISNOMY.* *n. s.* [corrupted from *physiognomy*.] Face; countenance. Not in use.—

Each of the gods by his like *visnomy*
Eath to be known, but Jove above them all.

VISO, a town of Spain, in New Castile; 25 miles ESE. of Ciudad Real.

(1.) *VISON.*

(1.) **VISON**, a town of the French empire in the p. of Tanaro, and late duchy of Monterrat.

(2.) **VISON**, in zoology. See **MUSTELA**, N° 5.

* **VISOR**. *n. f.* [This word is variously written, *visard, visar, visor, vizard, vizor*. I prefer *visor*, as nearest the Latin *visus*, and concurring with *visage*, a kindred word; *visere*, Fr.] A mask used to disfigure and disguise. See **VIZARD**.—My weaker government since, makes you pull off the *visor*. *Sidney*.—You never saw so ill favoured a *visor*. *Sidney*.—By which deceit doth mask in *visor* fair. *Spenser*.—But that thy face is, *visor*-like, nchanging. *Shak*.—One *visor* remains. *Shak*.—The Cyclops might, perhaps, in their wars use a head-piece, or *visor*. *Broom*.—Swarms of knives he *visor* quite disface. *Young*.

* **VISOURED**. *adj.* [from *visor*.] Masked.—With *visor*'d falsehood and base forgery? *Milt*.

(1.) **UIST**, NORTH, one of the WESTERN ISLANDS of SCOTLAND, in Inverness-shire, between HARRIS on the N. and BENBECULA on the S.; from which last it is separated by a narrow channel, which is dry at low water. It is of a very irregular form; of about 20 miles long, and from 12 to 18 miles broad. That part of the coast which is washed by the Atlantic is inaccessible, except in very calm weather. On the E. coast, however, it has several safe harbours. On the E. coast the ground is hilly and barren. The W. and N. parts are low and level. The cultivated parts are pleasant and fertile. The lakes abound with trout, and are frequented by flocks of wild fowls. About 2000 black cattle and 1000 small horses are pastured on the hills. About 1200 tons of kelp are made annually. The island belongs to Lord M'Donald. The population, in 1793, of this island and parish, including those of ORINSAY, BORRERAY, VALLAY, GRAMSAY, and ILERAY, &c. was 3,218; the increase 1309 since 1755.

(2.) **UIST**, SOUTH, another of the HEBRIDES, in Inverness-shire, lies between BARRAY on the S. and BENBECULA, on the N; 32 miles long, and from 9 to 10 broad. The surface and soil are similar to those of N. Uist. The number of sheep is 7000, of horses 800, and of black cattle 500: 1100 tons of kelp are made. The population of this island, and parish, with those of ROWA, ERISKAY, and BENBECULA, in 1793, notwithstanding great emigrations, was 3,450; the increase 1241 since 1755. These islands belong to M'Donald of Clanranald and M'Donald of Boisdale.

* **VISTA**. *n. f.* [Ital.] View; prospect through an avenue.—The spacious hollow of the cupola, makes one of the beautifullest *vistas* that the eye can pass through. *Addis*.—Its *vistas* opens, and its alleys green. *Thomson*.

VISTULA, or **WISLA**, a large river of Poland, which taking its rise in the mountains S. of Silesia, visits Cracow, Warsaw, &c. and continuing its course northward, falls into the Baltic sea below Dantzic.

* **VISUAL**. *adj.* [*visuel*, Fr.] Used in sight; exercising the power of sight; instrumental to sight.—An eye thrust forth so as it hangs a pretty distance by the *visual* nerve, hath been without any power of sight; and yet, after being replaced, recovered sight. *Bacon*.—

Nor think my hurt offends me; for my fire Can soon repose in it the *visual* fire. *Chapman*.
Sharpen'd his *visual* ray. *Milton*.

Then purg'd with euphrasy and rue
The *visual* nerve. *Milton*.

VISZOLA, a town of Hungary, 12 miles N. of Bolefkó.

(1.) * **VITAL**. *adj.* [*vitalis*, Latin.] 1. Contributing to life; necessary to life.—'Tis *vital* spirits. *Sidney*.—The sun's mild lustre warms the *vital* air. *Pope*. 2. Relating to life.—

Let not Birdolph's *vital* thread be cut. *Shak*.
On the rock a scanty measure place

Of *vital* Bax, and turn the wheel a pace. *Dryd*.

3. Containing life.—*Vital* in every part. *Milt*.—

And *vital* virtue infus'd and *vital* warmth. *Milt*.

4. Being the seat of life.—The dart flew on, and pierc'd a *vital* part. *Pope*. 5. So disposed as to live. Little used, and rather Latin than English.

—Pythagoras and Hippocrates affirm the birth of the 7th month to be *vital*. *Brown*. 6. Essential; chiefly necessary.—Grief's *vital* part. *Bp. Corbet*.

(2.) **VITAL**, in physiology, an appellation given to whatever ministers principally to the constituting or maintaining life in the bodies of animals; thus the heart, lungs, and brain, are called *vital parts*; and the operations of these parts by which the life of animals is maintained are called *vital functions*.

VITALIANO, Donati, naturalist, was born in Padua, 1717, wrote *Saggio della storia naturale dell' Adriatico*, in 1750. His Sardinian majesty appointed him professor of botany and natural history at Turin. He sent him to visit Egypt, Syria, Palestine, Arabia, and the East Indies, to make observations and to collect the rarest productions of nature. The greatest part of this journey he performed, but died at Bassora, in 1763. He left in MS. two volumes in folio.

(1.) * **VITALITY**. *n. f.* [from *vital*.] Power of subsisting in life.—Motion, *vitality*, and operation. *Raleigh*.—Providence hath endued all seed with a lasting *vitality*. *Ray*.

(2.) **VITALITY OF THE BLOOD**. See **BLOOD**, § 12. and 13.

* **VITALLY**. *adv.* [from *vital*.] In such a manner as to give life.—The organical structure of human bodies, whereby they are fitted to live and move, and be *vitally* informed by the soul. *Bent*.

* **VITALS**. *n. f.* [Without the singular.] Parts essential to life.—

The silent, slow, consuming fires,

Which on my inmost *vitals* prey. *Philips*.

VITCHEGDA, a river of Russia, rising in Utiug, and running into the Dwina.

(1.) **VITEGRA**, a river of Russia, running into Lake Onegskoi, near Vitagra.

(2.) **VITEGRA**, a town of Russia, in Olonetskoi; at the S. end of lake Opezkoi, 88 miles E. of Olonetz.

* **VITELLARY**. *n. f.* [from *vitellus*, Lat.] The place where the yolk of the egg swims in the white.—The *vitellary* or place of the yolk is very high. *Brown*.

VITELLUS, emperor of Rome. See **ROME**, § 49.

VITELLUS, the yolk of an egg. See **EGG**.

VITEPSK, a town of Russia, in Polotskoi, on the Duna, taken from Poland, in 1654; 56 miles ESE. of Polotsk.

VITERBO, a town of Italy, in Patrimonio, 20 miles SE. of Orvieto, and 34 NNW. of Rome. It has 15,000 inhabitants, 16 churches, many palaces, and a very hot spring. Lon. 12. 26. E. Lat. 42. 15. N.

VITETZ, a town of Bosnia, 14 m. S. of Serajo.

VITEX, in botany, the *AGNUS CASTUS*, or **CHASTE TREE**, a genus of plants in the class of *Didymia*, and order of *Angiospermia*; ranking by the natural system in the 39th order, *Personate*.

* To **VITIATE**. *v. a.* [*vitio*, Lat.] To deprive; to spoil; to make less pure.—Before she was *vitiated* by luxury. *Bael. Kale*.—Speeches are often somewhat *vitiated*. *Holder*.—*Vitiated* humours. *Harvey*.—This will *vitiate* the taste of the readers. *Garth*.—A transposition of the order of the sacramental words, in some men's opinion, *vitiate*s baptism. *Ayliffe*.

* **VITIATION**. *n. f.* [from *vitiate*.] Deprivation; corruption.—The blood's *vitiation*. *Harvey*.

VITIGES, king of the Ostrogoths; See **ITALY**, § 10, 11.

VITIGUDINO, a town of Spain, in Leon.

* To **VITILITIGATE**. *v. n.* [*vitiosus* and *litigo*, Latin.] To contend in law litigiously and caviliously.

* **VITILITIGATION**. *n. f.* [from *vitiligitate*.] Contention; cavillation.—To leave your *vitiligation*. *Hudibras*.

* **VITIORITY**. *n. f.* [from *vitiosus*, Lat.] Depravity; corruption.—The corruption, perverseness, and *vitiosity* of man's will. *South*.

* **VITIOUS**. *adj.* [*vitiosus*, Fr. *vitiosus*, Latin.] 1. Corrupt; wicked; opposite to virtuous. It is rather applied to habitual faults, than criminal actions. It is used of persons and practices.—It is no *vitious* blot, murder, or foulness. *Shak*.—His *vitious* race. *Milton*.—Wit's what the *vitious* fears, the virtuous shun. *Pope*.—The common soldiers have the *vitious* example of their leaders. *Swift*. 2. Corrupt; having physical ill qualities.—*Vitious* language. *B. Jonson*.—Here from the *vitious* air and sickly skies. *Dryden*.

* **VITIOUSLY**. *adv.* [from *vitious*.] Not virtuously; corruptly.

* **VITIOUSNESS**. *n. f.* [from *vitious*.] Corruptness; state of being vitious.—When we in our *vitiousness* grow hard. *Shak*.—What makes a governor justly despised is *vitiousness* and ill morals. *South*.

VITIS, in botany; A genus of the class *pentandria*, order *monogynia*; and in the natural system arranged under the 40th order, *Personate*. The petals cohere at the top, and are withered; the fruit is a berry with five seeds. There are 11 species, the most important of which is

VITIS VINIFERA, or common *vine*, which has naked, lobed, sinuated leaves. There are many varieties, (see **VINE**, N° 1.) all propagated either from layers or cuttings, the former of which is greatly practised in England, but the latter is much preferable. In choosing the cuttings, you should always take such shoots of the last year's growth as are strong and well ripened; these should be cut from the old vine, just below the place where they

were produced, taking a knot, or piece of two year's wood to each, which should be pith smooth; then you should cut off the upper of the shoots, so as to leave the cutting about sixteen inches long. When the cuttings are made if they are not then planted, they should be covered with their lower part in the ground, in a soil, laying some litter upon their upper part to prevent them from drying: in this situation they may remain till the beginning of April; when they should be taken out and washed from filth they have contracted; and if very dry, stand with their lower parts in the water 6 hours, which will distend their vessels, and dilate them for taking root. If the ground be strong inclined to wet, open a trench where the cuttings are to be planted, which should be filled with lime rubbish, the better to drain off the moisture then raise the borders with fresh light earth at two feet thick, so that it may be at least a foot above the level of the ground: then open the border at about six feet distance from each other, put one good strong cutting into each hole, which should be laid a little sloping, that their tops incline to the wall; but it must be put in so deep as that the uppermost eye may be level with the surface of the ground. Having placed the cuttings in the ground, fill up the hole gently, press down the earth close about it, and raise a little hill just upon the top of the cutting, to cover the upper eye quite over, which will prevent it from drying. Nothing more is necessary but to keep the ground clear from weeds until the cuttings begin to shoot; at which time look after them carefully, and rub off any small shoots, fastening the first main shoot to the wall; continue to look after these once in three weeks during the summer, constantly rubbing off lateral shoots which are produced. The Michaelmas following, if the cuttings have produced strong shoots, prune them down to two eyes. In the spring after the weather is past, gently dig up the borders to level the earth; but be very careful, in doing this, not to injure the roots; also raise the earth up to the stems of the plants, so as to cover the old wood but not so deep as to cover either of the eyes the last year's wood. After this they will require no farther care until they begin to shoot; then nip off all weak dangling shoots, leaving no more than the two produced from the two eyes of the last year's wood, which should be fastened to the wall. From this time till the vines have done shooting look them over once in three weeks or a month, rub off all lateral shoots as they are produced, fasten the main shoots to the wall as they are tended in length; about the middle or latter end of July, it will be proper to nip off the tops of these two shoots, which will strengthen their lower eyes. As soon as the leaves begin to drop in autumn, prune these young vines again, leaving the buds to each of the shoots, provided they are strong; otherwise it is better to shorten them down to two eyes if they are good; for it is a very wrong practice to leave much wood upon young vines, or to leave their shoots too long, which greatly weakens the roots; then fasten them to the wall spreading them out horizontal each way, that there may be room to train the new shoots the following

owing summer, and in the spring the borders must be dugged as before. The uses of the fruit of the vine for making wine, &c. are well known. The vine was introduced by the Romans into Britain, and appears formerly to have been very common. From the name of *vineyard* yet adhering to the ruinous sites of our castles and monasteries, there seem to have been few in the country but what had a vineyard belonging to them. The county of Gloucester is particularly mentioned by Malmibury in the 12th century, as excelling all the rest of the kingdom in the number and goodness of its vineyards. In the earlier periods the Isle of Ely was expressly denominated the *Isle of Vines* by the Normans. Vineyards are frequently noticed in the descriptive accounts of Doomsday Book; and those of England are even mentioned by Bede as early as the commencement of the 8th century. Doomsday Book exhibits a particular proof that wine was made in England during the period preceding the conquest. And after the conquest the bishop of Ely appears to have received at least 3 or 4 tuns of wine annually, as tythes, from the produce of the vineyards in his diocese; and to have made frequent reservations in his leases of a certain quantity of wine for rent. A plot of land in London, which now forms East-Smithfield and some adjoining streets, was withheld from the religious house within Aldgate by four successive confablers of the Tower, in the reigns of William II. Henry I. and Stephen, and made by them into a vineyard. In the old accounts of rectorial and vicarial revenues, and in the old registers of ecclesiastical suits concerning them, the tythe of wine is an article that frequently occurs in Kent, Surrey, and other counties. And the wines of Gloucestershire, within a century after the conquest, were little inferior to the French in sweetness. The beautiful region of Gaul, which had not a single vine in the days of Cæsar, had numbers so early as the time of Strabo. The south of it was particularly stocked with them; and they had even extended themselves into the interior parts of the country: But the grapes of the latter did not ripen kindly. France was famous for its vineyards in the reign of Vespasian, and even exported its wines into Italy. The province of Narbonne was then covered with vines; and the wine-merchants of the country were remarkable for all the knavish dexterity of our modern brewers, tinging it with smoke, colouring it (as it was suspected) with herbs and noxious dyes, and even adulterating the taste and appearance with aloes. And as our first vines would be transplanted from Gaul, so most probably were those of the Allobroges in Franche Compté. These were peculiarly fitted for cold countries. They ripened even in the frosts of advancing winter. And they were of the same colour, and seem to have been of the same species, as the black Muscadines of the present day, which have lately been tried in the island, and found to be fittest for the climate. These were certainly brought into Britain a little after vines had been carried over all the kingdoms of Gaul, and about the middle of the 3d century; when the numerous plantations had gradually spread over the face of the latter, and must naturally have continued their progress into the former. The Romans, even nearly to

the days of Lucullus, were very seldom able to regale themselves with wine. Very little was then raised in the compass of Italy. And the foreign wines were so dear, that they were rarely produced at an entertainment; and when they were, each guest was indulged only with a single draught. But in the 7th century of Rome, as their conquests augmented the degree of their wealth, and enlarged the sphere of their luxury, wines became the object of particular attention. Many vaults were constructed, and good stocks of liquor deposited in them. And this naturally gave encouragement to the wines of the country. The Falernian rose immediately into great repute; and a variety of others, that of Florence among the rest succeeded it about the close of the century. And the more westerly parts of the European continent were at once subjected to the arms, and enriched with the vines, of Italy.

VITOSCHA, a mountain of European Turkey, in Bulgaria, near Romania, with warm baths at its foot.

VITRE, a town of France, in the dep. of Ille and Vilaine, and ci-devant prov. of Bretagne. It has a great trade in linen cloth, stockings, gloves, &c. It is seated on the Vilaine, 20 miles NE. of Rennes, and 32 SE. of St Malo. Lon. 1. 13. W. Lat. 48. 14. N.

(1.) * VITREOUS. *adj.* [*vitre*, Fr. *vitreus*, Lat.] Glassy; consisting of glass.—The cavity containing the vitreous humour. *Ray*.—This viscid phlegm seems to be the vitreous pituite of the ancients. *Arbuth.*

(2.) VITREOUS-ELECTRICITY. See ELECTRICITY, *Index*.

(3.) VITREOUS HUMOUR OF THE EYE. See ANATOMY, *Index*.

(4.) VITREOUS SPAR. See CHEMISTRY, *Ind.*
* VITREOUSNESS. *n. f.* [from *vitreous*.] Resemblance of glass.

VITRIFIABLE EARTH. See CHEMISTRY, *Index*.

VITREY, a town of France, in the department of Upper Saône, 6 miles W. of Jussey, and 17 E. of Langres.

VITRI. See VITRY.

* VITRIFICABLE. *adj.* [from *vitricate*.] Convertible into glass.

* To VITRIFICATE. *v. a.* [*vitrum* and *facio*, Lat.] To change into glass.—We have metals vitrified, and other materials. *Bacon*.

(1.) * VITRIFICATION. *n. f.* [*vitrication*, Fr. from *vitricate*.] Production of glass; act of changing, or state of being changed into glass.—For vitrification likewise, what metals will endure it? *Bacon*.—The vitrification of brick and metals. *Bacon*.—Minerals and metals capable of vitrification. *Boyle*.

(2.) VITRIFICATION, in chemistry. See CHEMISTRY, *Index*; and GLASS; and GLASS-MAKING.

(1.) VITRIFIED, *part. adj.* turned into glass.

(2.) VITRIFIED PORTS, a very singular kind of structures found in the Highlands and N. parts of Scotland, which appear to have been melted into a solid mass, resembling the lava of a volcano, which they are supposed to be, by many of the learned. Others suppose them to be works of art. See the arguments on both sides, in the

works of Messrs Williams, Barrington, and Frazer-Tyler, on this subject.

(1.) * **To VITRIFY.** *v. a.* [*vitriser*, Fr. *vitrum* and *facio*, Lat.] To change into glass.—Metals will *vitriify*. Bacon.—Iron-slag, *vitriified*, has in it cortices incompassing one another, like those in agates. Woodward.

(2.) * **To VITRIFY.** *v. n.* To become glass; to be changed into glass.—Animal substances calcined, will not *vitriify* in the fire. *Arbutnoot*.

VITRING, a town of Carinthia, 4 miles SW. of Clagenfurt.

(1.) * **VITRIOL.** *n. f.* [*vitriol*, Fr. *vitriolum*, Latin.] *Vitriol* is produced by addition of a metallic matter with the fossil acid salt. Woodward.—I rubbed it with the *vitriol* stone. *Wisem*.

(2.) **VITRIOL**, a compound salt, formed by the union of iron, copper, or zinc, with the sulphuric acid. It is of 3 colours, *white, blue, and green*, according to the metal. See CHEMISTRY. *Index*.

* **VITRIOLATE.** } *adj.* [*vitrioli*, Fr. from
* **VITRIOLATED.** } *vitriolum*, Latin.] Im-
pregnated with vitriol; consisting of vitriol.—Iron may be dissolved by any tart, salt, or *vitriolated* water. Bacon.—Which gave the water they impregnated a fair *vitriolate* colour. Boyle.

(1.) **VITRIOLIC ACID.** See SULPHURIC ACID, and CHEMISTRY. *Index*.

(2.) * **VITRIOLICK.** } *adj.* [*vitriolique*, French;
* **VITRIOLOUS.** } from *vitriolum*, Latin.]
Resembling vitriol; containing vitriol.—*Vitriolous* spirits fixed unto salt by the effluvia of steel. Brown.—These salts have a smack of a *vitriolick* taste. *Greav*.—By over-fermentation or long-keeping, wine becomes sharp as in hock, like the *vitriolick* acidity. *Floyer*.

VITRUVIUS POLLIO, Marcus, a very celebrated Roman architect, was, according to the common opinion, born at Verona, and lived in the reign of Augustus. His treatise on architecture is extant, of which there are several English translations.

(1.) **VITRY**, a town of France, in the dep. of the Straits of Calais: $4\frac{1}{2}$ miles SW. of Douay, and 9 NE. of Arras.

(2.) **VITRY**, a town of France, in the dep. of Paris, $4\frac{1}{2}$ miles SSE. of Paris.

(3.) **VITRY, LE BRULE**, a town of France, in the dep. of the Marne; 3 miles NE. of Vitry; (N° 4.) It was 3 times burnt, whence the epithet: 1st, in the 12th century by Count Chartres; 2d, by the English and Burgundians in the war with Charles VII. when 60 villages were burnt with it, in 1422: and 3dly by Charles V.

(4.) **VITRY LE FRANÇOIS**, a town of France, in the dep. of Marne, and late prov. of Champagne. It has a fine square, with a church in the middle, and a great trade in corn. It is seated on the Marne, 15 miles SE. of Chalons, 25 W. of Bar, and 100 E. of Paris. Lon. 4. 38. E. Lat. 48. 44. N.

VITTE. See INTULA.

VITTEAUX, a town of France, in the dep. of Cote d'Or, and ci-devant duchy of Burgundy, on the Braine, among mountains, abounding with marble; 27 miles W. of Dijon, and 12 SE. of Semur. Lon. 4. 27. E. Lat. 57. 20. N.

VITTORIA, a city of Spain, capital of Alava.

It is walled, and well built, with a fountain the middle of a large square; surrounded by trees. The merchants are rich, and trade wool, wines, hard-ware, &c. It is 33 SE. of Bilbao, and 155 N. of Madrid. Lon. 56. W. Lat. 42. 55. N.

* **VITULINE.** *adj.* [*vitulinus*, Latin.] Belonging to a calf, or to veal. *Bailey*.

* **VITUPERABLE.** *adj.* [*vituperabilis*, Latin.] Blame-worthy. *Ainsworth*.

* **To VITUPERATE.** *v. a.* [*vituperer*, Fr. *supers*, Latin.] To blame; to censure.

* **VITUPERATION.** *n. f.* [*vituperatio*, Latin.] Blame; censure.—Such a writing ought to be clean, and free from any cavil or *vituperation* rasure. *Ayliffe*.

VITUS'S DANCE, St. See MEDICINE, *Index*.
VIU, a town of the French empire, in the dep. of the Stura, and late prov. of Piedmont, on the Stura, 14 miles NW. of Turin.

* **VIVACIOUS.** *adj.* [*vivax*, Latin.] 1. Lived.—Tho' we should allow them their perpetual calm and equability of heat, they will not be able to prove, that therefore men would be *vivacious* as they would have us believe. *Bow*. 2. Spritely; gay; active; lively.

* **VIVACIOUSNESS.** *n. f.* [*vivacité*, French.]

* **VIVACITY.** } from *vivacious*.
Liveliness; spiriteliness.—He had a great *vivacity* in his countenance. *Dryden*. 2. Longevity; length of life.—Fables are raised concerning the *vivacity* of deer. *Brown*. 3. Power of living.—So *vivacious* is their *vivacity*. *Boyle*.

VIVAR, a town of Spain, in Old Castile, 10 miles from Burgos.

VIVARAIS, a ci-devant province of France, Lower Languedoc; on the right bank of the Rhone, now included in the dep. of Audeche.

VIVARIO, a town of Corsica, 10 miles S. of Corte.

VIVARO, an island in the Mediterranean, of Ithia.

* **VIVARY.** *n. f.* [*vivarium*, Latin.] A warm fish-pond.

* **VIVE.** *adj.* [*vif*, Fr. *vivus*, Lat.] Livelily forcible; pressing.—By a *vive* and forcible persuasion. *Bacon*.

* **VIVENCY.** *n. f.* [*vivo*, Latin.] Manner supporting or continuing life, or vegetation.—A *vivency*, though not in a distinct and indisputable way. *Brocun*.

VIVER, a town of Spain, in Valencia: 8 miles NW. of Segorba.

(1.) **VIVERO**, a town of Spain, in Galicia, the foot of a steep mountain, near the Landrov with a large harbour at its mouth; 30 miles NW. of Mondonnedo. Lon. 7. 34. W. Lat. 43. 50. N.

(2.) **VIVERO**, a river of Spain, in Galicia, running into the sea 12 miles E. of Cape Ortegal.

VIVEROL, a town of France, in the dep. of Puy de Dome; 9 miles SSW. of Ambert, and 2 N. of Puy.

VIVERA, THE WEASEL; a genus of quadrupeds belonging to the order of feræ. They have six fore-teeth, the intermediate ones being shorter, and more than three grinders, and the claws are exerted. There are 27 species, the principal of which are,

1. **VIVERA**

V. VIVERRA ICHNEUMON, with the tail tapering to a point, and the toes distant from each other; inhabits Egypt, Barbary, India and its islands. It is there a most useful animal, being an inveterate enemy to the serpents and other noxious reptiles which infest the torrid zone; it attacks without dread that most fatal of serpents the Naja, or COBRA DE CAPELLO; and should it receive a wound in the combat, instantly retires, and is said to obtain an antidote from a certain herb (according to Sparmann the *opbiorrhiza*;) after which it returns to the attack, and seldom fails of victory: it is a great destroyer of the eggs of crocodiles, which it digs out of the sand; and even kills multitudes of the young of those terrible reptiles; it was not therefore without reason that the ancient Egyptians ranked the ichneumon among their deities. This animal is at present domesticated and kept in houses in India and in Egypt, for it is more useful than a cat in destroying rats and mice; and grows very tame. It is very active: springs with great agility on its prey; will glide along the ground like a serpent, and seem as if without feet. It sits up like a squirrel, and eats with its fore feet, catching any thing that is flung to it. It is a great enemy to poultry, and will feign itself dead till they come within reach: loves fish; draws its prey, after sucking the blood, to its hole. Its excrements are very fetid; when it sleeps, it springs its head and tail under its belly, appearing like a round ball, with two legs sticking out. Rumphius observes how skilfully it seizes the serpents by the throat, so as to avoid receiving any injury; and Lucan beautifully describes the same address of this animal in conquering the Egyptian asp.

2. VIVERRA VULPECULA, or *sisting weasel*, has a short slender nose; short ears and legs; black body, full of hair; the tail long, of a black and white colour; length from nose to tail about 18 inches. It inhabits Mexico, and perhaps other parts of America. This and some other species are remarkable for the pestiferous, suffocating, and most fetid vapour they emit from behind, when attacked, pursued, or frightened; it is their only means of defence. Some turn their tail to their enemy, and keep them at a distance by a frequent creptus; and others ejaculate their urine, tainted with the horrid effluvia, to the distance of 18 feet. The pursuers are stopped with the terrible stench. Should any of this liquor fall into the eyes, it almost occasions blindness; if on the clothes, the smell will remain for several days, in spite of all washing; they must even be buried in fresh soil, in order to be sweetened. Dogs that are not true bred, run back as soon as they perceive the smell; those that have been used to it, will kill the animal: but are often obliged to relieve themselves by thrusting their noses into the ground. There is no bearing the company of a dog that has killed one for several days. Professor Kalm was one night in great danger of being suffocated by one that was pursued into a house where he slept; and it affected the cattle so, that they bellowed through pain. Another, which was killed by a maid-servant in a cellar, so affected her with the stench, that she lay ill for se-

veral days; all the provisions that were in the place were so tainted that the owner was obliged to throw them away. Notwithstanding this, the flesh is reckoned good meat, and not unlike that of a pig; but it must be skinned as soon as killed, and the bladder taken carefully out. It breeds in hollow trees, or holes under ground, or in clefts of rocks: climbs trees with great agility; kills poultry; eats eggs and young birds.

3. VIVERRA ZIBETHA, or CIVET CAT, has short rounded ears; the back and sides cinereous, tinged with yellow, marked with large dusky spots disposed in rows; the hair coarse; that on the top of the body longest, standing up like a mane; the tail sometimes wholly black; sometimes spotted near the base; length, from nose to tail, about 2 feet 3 inches; the tail 14 inches; the body pretty thick. It inhabits India, the Philippine Isles, Guinea, Ethiopia, and Madagascar. The famous drug musk, or civet, which is produced from an aperture between the privities and the anus, in both sexes, is secreted from certain glands. The persons who keep them procure the musk by scraping the inside of this bag twice a-week with an iron spatula, and get about a dram each time; but it is seldom sold pure, being generally mixed with suet or oil, to make it more weighty. The males yield the most, especially when they are previously irritated. They are fed, when young, with pap made of millet, with a little flesh or fish; when old, with raw flesh. In a wild state, they prey on fowl. These animals seem not to be known to the ancients; it is probable the drug was brought without their knowing its origin; for it is certain the fine gentlemen in Rome used perfume.

(1.) * **VIVES**. *n. f.* A distemper among horses. — *Vives* is much like the strangles. *Furrier's Dict.*

(2.) **VIVES**. See FARRIERY.

* **VIVID**. *adj.* [*vividus*, Latin.] 1. Lively; quick; striking.—Its former *vivid* colour. *Bayle*. —The fullest and most *vivid* colours. *Newton*. —The *vivid* green his shining plumes unfold. *Pope*. 2. Spritely; active.—Spritely, *vivid* faculties. *South*.—Where the imagination is *vivid*. *Watts*.

* **VIVIDLY**. *adv.* [from *vivid*.] With life; with quickness; with strength.—Some are more and some less *vividly* illustrated. *Boyle*.—More warmly and *vividly*. *South*.

* **VIVIDNESS**. *n. f.* [from *vivid*.] Life; vigour; quickness.

VIVIER, a town of France, in the dep. of Ille and Vilaine; 3 miles N. of Dol, and 9 SE. of St Malo.

VIVIERS, a town of France, in the dep. of Ardèche, on the right bank of the Rhone, ci-devant capital of the late prov. of VIVARAIS; 13 miles SE. of Anbas, and 17 SE. of Privas.

* **VIVIFICAL**. *adj.* [*vivificus*, Lat.] Giving life. *Bailey*.

* **To VIVIFICATE**. *v. a.* [*vivifico*, Lat.] 1. To make alive; to inform with life; to animate. 2. To recover from such a change of form as seems to destroy the essential properties. A chymical term.

* **VIVIFICATION**, *n. f.* [*vivification*, Fr. from *vivificare*.] The act of giving life.—There follows eth *vivification* and figuration. *Bacon*.

* **VIVIFICK.** *adj.* [*vivifque*, Fr. *vivifcus*, Lat.] Giving life; making alive.—The sun's salutary and vivifick beams. *Ray*.

* **To VIVIFY.** *v. a.* [*vivifier*, Fr. *vivus* and *facio*.] Lat.] To make alive; to animate; to endue with life.—Snow could hardly vivify. *Bac.*—Sitting on eggs doth vivify, not nourish. *Bac.*—Gut worms, as soon as vivified, creep into the stomach for nutriment. *Harvey*.

* **VIVIPAROUS.** *adj.* [*vivus* and *pario*, Latin.] Bringing the young alive; opposed to *oviparous*.—We cannot from them infer *viviparous* exclusion. *Brown*.—Their species might continue, though they had been *viviparous*. *More*.—If birds had been *viviparous*, the burthen of their womb had been too great and heavy, that their wings would have failed them. *Ray*.

VIVOIN, a town of France, in the dep. of the Sarte; 13½ miles N. of Mans.

VIVONNE, a town of France, in the dep. of Vienne; 6 miles E. of Lusignan; and 9 S. of Poitiers.

VIVRIES, an ancient city of France, in the dep. of Ardeche, and late province of Dauphiny, seated among rocks, on one of which the cathedral is built. It is seated on the Rhone, 20 miles N. of Orange, and 70 NE. of Montpellier. Lon. 4. 46. E. Lat. 44. 40. N.

VIX, a town of France, in the dep. of the Vendee; 6 miles S. of Fontenay, and 13½ ESE. of Luçon.

* **VIXEN.** *n. f.*—*Vixen* or *fixen* is the name of a she-fox; otherwise applied to a woman whose nature and condition is thereby compared to a she fox. *Verfegen*.—She was a *vixen*, when she went to school. *Shak.*—A two legg'd *vixen*. *Wycherley*.

* **VIZ.** *n. f.* [This word is *videlicet*, written with a contraction.] To wit; that is. A barbarous form of an unnecessary word.—

That which is oft by lundry writers,

Has been apply'd t' almost all fighters,

More justly may b' ascrib'd to this,

Than any other warrior, viz.

None ever acted both parts border,

Both of a chieftain and a soldier. *Hudibras*.

—The several modifications of the human voice by the organs of speech, viz. the letters of the alphabet, form'd by the several motions of the mouth. *Holder*.—Let this be done relatively, viz. one thing greater or stronger. *Dryden*.

VIZA, a town of European Turkey, in Romania, at the foot of a mountain, near the Glicenero.

VIZAGAPATAM. See INDIA, § 17; and **VISAGAPATAM**.

* **VIZARD.** *n. f.* [*visfere*, Fr. See **VISOR**.] A mask used for disguise.—Let the suits be such as become the person when the vizards are off. *Bac.*—Æschylus brought vizards in a civiler disguise. *Rowson*.—A lie is like a vizard. *South*.—They put on the vizard of seeming sanctity. *Atterb.*—She held her vizard in her hand. *Addison*.

* **To VIZARD.** *v. a.* [from the noun.] To mask.—Degree being vizarded. *Shak.*

VIZIAMANGALUM, a town of Hindoostan, in the Myore; 13 miles SW. of Erroad.

VIZIANAGRAM, a town of Hindoostan, in Cicacole; 30 miles SW. of Cicacole, and 108 NE. of Rajamundy.

VIZIANAGUR, a town of Hindoostan, in Cicacole; 38 miles WSW. of Ganjam.

* **VIZIER.** *n. f.* [properly *Wazir*.] The prime minister of the Turkish empire.—He made him vizier, which is the chief of all the bassas. *Koolha*.

—This grand vizier presuming to invest. *Walker*.

VIZILLE, a town of France, in the department of Isère; 7½ miles SSE. of Grenoble.

UK, a river of Russia, which runs into the Uda;

16 miles N. of Ulinik.

UKELE, a town of Arabia, in Yemen.

UKELEY, a river of Upper Saxony, running into the Rega, in Brandenburg.

UKRAINE, a large country of Europe, lying on the borders of European Turkey, Poland, Russia, and little Tartary. Its name properly signifies a frontier. By the partition of Poland it has all become the property of Russia. The principal town is Kiow.

(1.) **UKSA**, a town of Russia, in Viborg; 44 miles N. of Serdopol.

(2.) **UKSA**, a river of Russia, running into lake Ladoga; 40 miles NW. of Olonetz.

VLADIMIR, a city of Russia, at the conflux of the Kliazma, and Neri; capital of Viadimirskoe; 100 m. E. of Molkow, and 408 SE. of Petersburg.

VLADIMIRSKOE, a prov. of Russia, bounded N. by those of Iaroslavl, and Kostrom; E. by Nizegrodskoe; S. by Tambovskoe, and Riazanskoe; NW. by Tverkskoe; and W. by Moskovskia; 160 miles long from E. to W. and 80 broad from N. to S.

VLADISLAW. See **KNOWVLADISLAW**.

VLAK, a mountain of Bosnia; 20 miles SW. of Zwornick.

ULAMINSKA, a town of Russia, in Tobolskoe; 48 miles ESE. of Yalactorovsk.

ULARDINGEN, a town of Holland, in the dep. and on the N. bank of the Meuse; 1 mile W. of Schiedam.

ULBACH, a river of Suabia, running into the Elzbach; 4 miles NW. of Elzbach.

ULCAMI, a kingdom of Guinea, between those of Ardres and Benin.

(1.) * **ULCER.** *n. f.* [*ulcere*, Fr. *ulcus*, Latin.] A fore of continuance; not a new wound.—Pour'd in the open ulcer of my heart. *Shak.*—My ulcers swell. *Sandys*.—Intestine stone and ulcer, colick pangs. *Milton*.—From the several apostemations sinuous ulcers were made. *Wifeman*.

(2.) **ULCER**, in surgery. See **SURGERY**, *Index*.

(3.) **ULCER**, in farriery. See **FARRIERY**.

(1.) * **To ULCERATE.** *v. a.* [*ulcerer*, Fr. *ulcer*, Lat.] To disease with sores.—Some depend upon the intemperament of the part ulcerated. *Harvey*.—Such as have their lungs ulcerated. *Arbuthnot*.

(2.) * **To ULCERATE.** *v. n.* To turn to an ulcer.

* **ULCERATION.** *n. f.* [*ulceration*, Fr. *ulceratio*, from *ulcer*, Lat.] 1. The act of breaking into ulcers. 2. Ulcer; sore.—The effects of mercury on ulcerations are manifest. *Arbuthnot*.

* **ULCERED.** *adj.* [*ulceré*, from *ulcer*.] Grown by time from a hurt to an ulcer.—A dog for licking ulcered wounds. *Temple*.

* **ULCEROUS.** *adj.* [*ulcerosus*, Latin.] Afflicted with old sores.—All swollen and ulcerous he cures. *Shak.*—An ulcerous disposition of the lungs. *Harvey*.

* **ULCEROUSNESS.**

* **ULCEROUSNESS.** *n. f.* [from *ulcerous*.] The state of being ulcerous.

ULEX, in botany, a genus of plants of the class of *diadelphia*, and order of *decandria*; and in the natural system arranged under the 3d order, *Pa-silionaceæ*. The calyx consists of two leaves quinque-lobed: the pod almost covered by the calyx. There are two species, one of which,

ULEX EUROPEUS, the *furze*, *gorse*, or *ubin*, is a native of Britain; it is two well known to need description. Its uses, however, are many; as a fuel where wood and coals are scarce; and as hedge-wood upon light barren land: its use as a sort of provender too seems to be fully proved, tho' not yet established. See **FENCE**.

ULIASSER, or **HOMIOA**, one of the **MOLUCCAN** Islands; 9 miles long and $1\frac{1}{2}$ broad. It is fertile in rice and cloves.

VLIE, or **FLIE**, a town of Holland, in the dep. of the Meuse, and late prov. of N. Holland: at the entrance of the Zuyder Zee.

VLIELAND, a district of Holland, in the dep. of the Meuse. **VLIE** is the capital.

ULIETEA, one of the **SOCIETY ISLANDS**. It is about 63 miles in circuit. Its productions are plantains, cocoa nuts, yams, hogs, and fowls. Lon. 201. 4. E. Lat. 20. 1. S.

(1.) * **ULIGINOUS.** *adj.* [*uliginosus*, Latin.] Slimy; muddy.—The *uliginous* lacteous matter taken notice of in the coral fishings upon the coast of Italy, was only a collection of the coralline particles. *Woodward*.

(2.) **ULIGINOUS**, in agriculture, an appellation given to a moist, moorish, and fenny soil.

ULLAGE, *n. f.* in gauging, is so much of a cask or other vessel as it wants of being full.

ULM, a free and imperial city of Germany, in the circle of Suabia, seated on the river Iller. It is a pretty large place, defended by fortifications; and the inhabitants are protestants. Here the archives of the circle are deposited, and it carries on a very great trade. The elector of Bavaria became master of it, in 1702, by a stratagem; but in 1704, the French being vanquished at the battle of Hochstet, the Bavarians surrendered it by capitulation. The Roman Catholics have but two churches, all the rest belonging to the Protestants. Ulm was taken by the French *imperialists*, on the 19th Oct. 1805, after a battle in which 30,000 Austrians were killed, wounded, or taken prisoners. The Austrian garrison of Ulm capitulated. Lon. 10. 12. E. Lat. 48. 25. N.

ULMUS, in botany, a genus of plants belonging to the class of *pentandria*, and order of *digynia*; and in the natural system arranged under the 53d order, *Scabridæ*. The calyx is quinquefid; there is no corolla. The fruit is a dry, compressed, membranaceous berry. There are 3 species; one of which is a native of Britain.

1. **ULMUS CAMPESTRIS**, common *elm*. The leaves are rough, oval, pointed, doubly serrated, unequal at the base. Bark of the trunk cracked and wrinkled. Fruit membranous.

2. **ULMUS MONTANA**, the *wych elm*, or *witch hazel*, is generally reckoned a variety of this species. All the sorts of elm may be either propagated by layers or suckers taken from the roots of the old trees. The elm delights in a stiff strong

soil. It is observable, however, that here it grows comparatively slow. In light land, especially if it be rich, its growth is very rapid; but its wood is light, porous, and of little value, compared with that which grows upon strong land; which is of a closer stronger texture, and, at the heart, will have the colour, and almost the heaviness and the hardness, of iron.

ULOGHONE, *n. f.* a mournful tune played by the Scottish Highlanders, at funerals.

(1.) **ULSTER**, the most northerly province of Ireland. In Latin it is called *Ultonia*, in Irish *Cui Guilly*. It is bounded by the Atlantic Ocean on the W.; St George's Channel and the Irish Sea on the E.; the Deucalidian Ocean on the N.; and on the S. and SW. by the provinces of Leinster and Connaught. Its greatest length is near 120 miles, its breadth about 100; and its circumference, including the windings and turnings, 460; containing 9 counties, 58 market towns and boroughs, 1 archbishopric, 6 bishoprics, and 214 parishes. Ulster abounds in lakes and rivers, which supply it with variety of fine fish, especially salmon, besides what it has from the sea, with which a great part of it is bounded. The southern parts of it are rich, fertile, well cultivated, and inclosed; but the greater part of the northern is open and mountainous.—The towns of this province are in general the neatest and best built of any in Ireland, as well as the farm houses; which in most parts of the kingdom are constructed of no better materials than clay and straw. The inhabitants of Ulster are also more like the English in their manners and dialect than those of the other three provinces; for as it includes within itself the whole, or by far the greater part, of the linen manufactory, the best branch of trade in the kingdom, they have consequently the greatest intercourse with England. This province had anciently petty kings of its own. It was first subjected to the English in the reign of Henry II. by John Courcy, the first who bore the title of *earl of Ulster*; but it afterwards threw off the yoke, and was never entirely reduced till the reign of James I. when great numbers of Scots by his encouragement went and settled in it. Of these, most of the present inhabitants are the descendants. This province was the first and principal scene of the bloody massacre in 1641.

(2.) **ULSTER**, a large and mountainous county of New York, bounded on the N. by those of Albany and Schoharie, E. by the Hudson, which separates it from Dutchess county, S. by Orange, NW. by Otsego, and W. by Northampton county in Pennsylvania. It is divided into 14 townships, viz. Woodstock, Middleton, Rochester, Mamaroneck, Hurley, Marletown, Shawangunk, Montgomery, Walkill, New Windsor, Newberry, New Marlborough, Newpaltz, and Kingston. It is 81 miles long, and 67 broad. It contained 26,491 citizens in 1795, and 2069 slaves. Kingston is the capital.

ULTERIOR, *adj.* in geography, is applied to some part of a country or province, which, with regard to the rest of that country, is situated on the farther side of the river, mountain, or other boundary, which separates the two countries.

* **ULTIMATE.** *adj.* [*ultimus*, Lat.] Intended in

in the last resort; being the last in the train of consequences.—My harbour, and my ultimate repose. *Milt.*—Not conducive to ultimate happiness. *Addison.*—The ultimate allotment of God to men. *Rogers.*

* **ULTIMATELY.** *adv.* [from *ultimate*.] In the last consequence.—Charity is more extensive than either of the two other graces, which center ultimately in ourselves. *Atter.*—Trust in our own powers, ultimately terminates in the friendship of other men. *Rogers.*

ULTIMATUM. *n. s.* in European politics, the last terms of a treaty.

* **ULTIMITY.** *n. s.* [*ultimus*, Latin.] The last stage; the last consequence. A word very convenient, but not in use.—Alteration of one body into another, from crudity to perfect concoction, is the *ultimity* of that process. *Bacon.*

ULTIMO. [Lat.] or by contraction, *ult.* in letter-writing, the last month.

(1.) * **ULTRAMARINE.** *adj.* [*ultra marinus*, Lat.] Being beyond the sea; foreign. *Ainsl.*

(2.) * **ULTRAMARINE.** *n. s.* [*ultra and marinus*, Latin] One of the noblest blue colours used in painting, produced by calcination from the stone called lapis lazuli. *Hill.*—The blue of *ultramarine*. *Dryden.*

(1.) * **ULTRAMONTANE.** *adj.* [*ultramontain*, Fr. *ultra montanus*, Lat.] Being beyond the mountains.

(2.) **ULTRAMONTANE**, is chiefly used of France and Italy, which are separated by the Alps. See **TRANS**.

* **ULTRAMUNDANE.** *adj.* [*ultra and mundus*, Lat.] Being beyond the world.

* **ULTRONEOUS.** *adj.* [*ultra*, Lat.] Spontaneous; voluntary.

ULVA, in botany, **LAVER**, a genus of plants of the class of *cryptogamia*, and order of *algæ*. The fructification is inclosed in a diaphanous membrane. There are 17 species: 12 of which are British plants. They are all sessile, and without roots, and grow in ditches and on stones along the sea coast. None of them are applied to any particular use different from the rest of the *algæ*, except perhaps the

ULVA UMBILICALIS, which in England is pickled with salt and preserved in jars, and afterwards stewed and eaten with oil and lemon juice. This species, called in English the *navel laver*, is flat, orbicular, sessile, and coriaceous.

ULUG BEIG, a Persian prince and learned astronomer, was descended from the famous Tamerlane, and reigned at Samarcand about 40 years; after which he was murdered by his own son in 1449. His catalogue of the fixed stars, rectified for the year 1434, was published at Oxford by Mr Hyde, in 1665, with learned notes. Mr Hudson printed in the English Geography *Ulug Beig's Tables* of the Lon. and Lat. of Places; and Mr Greaves published in Latin, his *Astronomical Epœbas*, at Lond. in 1650. See **ASTRONOMY**, *Ind.*

(1.) **ULYSSES**, king of Ithaca, the son of Laertes, and father of **TELEMACHUS**, and one of those heroes who contributed most to the taking of Troy. After the destruction of that city, he wandered for 10 years; and at last returned to I-

thaca, where, with the assistance of **Telemachus**, he killed Antinous and other princes who intended to marry his wife Penelope, and seize his dominions. He at length resigned the kingdom to his son **Telemachus**; and was killed by **Telegonus**, his son by Circe, who did not know him. See **CIRCE**. The hero is the subject of the **ODYSSEY**.

(2.) **ULYSSES**, in geography, a military town-ship of New York, in **ONONDAGO** county.

ULYSSES-HAVEN, a village of Angus-shire, on the sea coast, in the parish of Craig.

ULYSSEIPO. See **OLUSIPO**.

UMBAGOG, a large lake of New Hampshire, in Grafton county, near Maine.

* **UMBEL.** *n. s.* In botany, the extremity of a stalk or branch divided into several pedicles or rays, beginning from the same point, and opening so as to form an inverted cone. *Diâ.*

UMBELLA, an **UMBEL**, in botany, a species of receptacle; or rather a mode of flowering, in which a number of slender footstalks proceed from the same centre, and rise to an equal height, so as to form an even and generally round surface at top. See **BOTANY**, *Index*.

UMBELLATÆ, the name of a class in Ray's and Tournefort's methods, consisting of plants whose flowers grow in umbels, with five petals that are often unequal, and two naked seeds that are joined at top and separated below. They constitute the 45th order of Linnæus's Fragments of a Natural Method. See **BOTANY**, *Index*.

* **UMBELLATED.** *adj.* In botany, is said of flowers when many of them grow together in umbels. *Diâ.*

(1.) * **UMBELLIFEROUS.** *adj.* [*umbel and ferre*, Lat.] In botany, being a plant that bears many flowers, growing upon many footstalks, proceeding from the same centre; and chiefly appropriated to such plants whose flowers are composed of five leaves, as fennel and parsnip. *Diâ.*

(2.) **UMBELLIFEROUS PLANTS**, are such as have their tops branched and spread out like an umbrella.

(1.) * **UMBER.** *n. s.* 1. *Umber* is a sad colour; which grind with gum-water, and lighten it with a little ceruse, and a shive of saffron. *Prochem.*—I'll with a kind of *umber* smirch my face. *Shak.*—*Umber* is very sensible and earthy. *Dryd.*—*Umbres*, ochres, and minerals. *Woodw.* 2. A fish. [*stymalus*, Lat.]—The *umber* and grayling differ as the herring and picher do. *Walt. Angler.*

(2.) **UMBER**, or **UMBRES**, in natural history, a fossil brown or blackish substance, used in painting; so called from *Ombria*, the ancient name of the duchy of Spoleto in Italy, whence it was first obtained; diluted with water, it serves to make a dark brown colour, usually called with us an *hair colour*. Dr Hill and Mr da Costa consider it as an earth of the ochre kind. It is found in Egypt, Italy, Spain, and Germany; in Cyprus also it is found in large quantities; but what is brought into England is principally from different parts of the Turkish dominions. But it might be found in considerable plenty also in England and Ireland, if properly looked after, several large masses of it having been thrown up in digging on Mendip hills

in Somersetshire, and in the county of Wexford in Ireland: it is also sometimes found in the veins of lead ore both in Derbyshire and Flintshire.

* **UMBERED.** *adj.* [from *umber* or *umbra*, Lat.] Shaded; clouded.—Each battle sees the other's *umber'd* face. *Shak.*

(1.) * **UMBILICAL.** *adj.* [*umbilical*, Fr. from *umbilicus*, Lat.] Belonging to the navel.—Birds are nourished by *umbilical* veins. *Brown.*—In a calf, the *umbilical* vessels terminate in a multitude of caraneous papillæ. *Ray.*

(2.) **UMBILICAL**, among anatomists, something relating to the umbilicus or navel.

(3.) **UMBILICAL CORD**, or the **NAVEL-STRING**, the hollow ligament by which an embryo communicates with the mother, and draws nourishment from her. This must be carefully cut by the midwife or accoucheur, after parturition, as negligence or inattention to this is often the cause of fatal ruptures. See **MIDWIFERY**, Part I. Sec. II.

(4.) **UMBILICAL REGION.** See **ANATOMY**, Ind. **UMBILICUS.** See **ANATOMY**, § 266.

* **UMBLES.** *n. f.* [*umbles*, Fr.] A deer's entrails. *Dis.*

* **UMBO.** *n. f.* [Latin.] The point or prominent part of a buckler.—Or like the *umbo* of the Romans. *Swift.*

* **UMBRAGE.** *n. f.* [*ombrage*, Fr.] 1. Shade; screen of trees.—Woods spread their *umbrage* broad. *Milton.*—And the cool *umbrage* seek. *Phil.* 2. Shadow; appearance.—The rest are *umbrages* quickly dissipated. *Bramb.*—No show of truth nor *umbrage* of reason. *Woodw.*—Thus given *umbrage* to the opinion. *Woodw.* 3. Repentment; offence; suspicion of injury.—That the king should take no *umbrage* of his arming. *Bacon.*

* **UMBRAGEOUS.** *adj.* [*ombrageux*, Fr.] Shady; yielding shade.—*Umbrageous* grots and caves of cool recess. *Milton.*—In a pleasant, and *umbrageous* garden. *Harvey.*—Beneath th' *umbrageous* multitude of leaves. *Thomson.*

* **UMBRAGEOUSNESS.** *n. f.* [from *umbrageous*.] Shadiness.—The *umbrageousness* of this tree. *Raleigh.*

* **UMBRATILE.** *adj.* [*umbratilis*, Latin.] Being in the shade.

(1.) * **UMBREL.** } *n. f.* [from *umbra*, Lat.]

(1.) * **UMBRELLA.** } A screen used in hot countries to keep off the sun, and in others to bear off the rain.—I can carry your *umbrella*, and fan your ladyship. *Dryden.*—Defended by th' *umbrella's* oily shed. *Gay.*

(2.) An **UMBRELLA**, is a moveable canopy, made of silk or linen spread out upon ribs of whalebone, and supported by a staff, to protect a person from rain, or the scorching beams of the sun.

* **UMBRIERE.** *n. f.* The visor of the helmet.

* **UMBROSITY.** *n. f.* [*umbrosus*, Lat.] Shadiness; exclusion of light.—Oiled paper admits the rays with much less *umbrosity*. *Brown.*

* **UMPIRAGE.** *n. f.* [from *umpire*.] Arbitration; friendly decision of a controversy.

* **UMPIRE.** *n. f.* [This word *Minshaw*, with great applause from *Skinner*, derives from *un pere*, Fr. a father.] An arbitrator; one who, as a common friend, decides disputes. It is by *Brown*

taken simply for a judge in a sense not usual.—This bloody knife—Shall play the *umpire*. *Shak.*—Just death, kind *umpire* of men's miseries. *Shak.*—And made the echo *umpire* of my strains. *Brown.*—*Umpire* betwixt the chemists and the peripateticks. *Boyle.*—Some great *umpire* intercessor. *South.*—You for their *umpire* and their synod take. *Dryden.*—Causes too light for the hearing of courts and *umpire*. *Kettow.*

* **UN.** A Saxon privative or negative particle answering to *in* of the Latins, and *a* of the Greeks, *on*, Dutch. It is placed almost at will before adjectives and adverbs. All the instances of this kind of composition cannot therefore be inserted, but I have collected a number sufficient, perhaps more than sufficient, to explain it.—The examples however, though numerous, might have easily been made more; for almost every adjective has a substantivè and an adverb adhering to it, as *unfaithful*, *unfaithfulness*, *unfaithfully*. *Un* is prefixed to adjectives with their derivatives, as *unapt*, *unaptness*, *unaptly*; and to passive participles as *hurt*, *unhurt*: favoured, unfavoured; it is prefixed likewise to participle adjectives, as *pleasing*, *unpleasing*, but rarely in the verbal sense expressing action; we cannot say the dart flew *unwounding*, though we say the man escaped *unwounded*. *Un* and *un* may be thus distinguished. To words merely English we prefix *un*, as *unjust*; to words borrowed in the positive, sense, but made negative by ourselves, we prefix *un*, as *generous*, *ungenerous*. When we borrow both words we retain the Latin or French *in*, as *elegant*, *inelegant*; *politic*, *impolitic*.—Before substantives if they have the English termination *ness*, as *unwise*, *ungracious*, *unjust*; it is proper to prefix *un* if they have the Latin or French terminations in *tude*, *ice*, or *ence*; and for the most part if they end in *ty* the negative *in* is put before them, as *unapt*, *unaptness*, *inaptitude*; *unjust*, *injustice*; *imprudence*; *unfaithful*, *unfaithfulness*, *infidelity*.

* **UNABASHED.** *adj.* [from *abashed*.] Not shamed; not confused by modesty.—Earle's on high, stood *unabash'd* Desoe. *Pope.*

* **UNABLE.** *adj.* [from *able*.] 1. Not having ability. With *to* before a verb, and *for* before a noun.—Weary, and *unable* to resist. *Raleigh.*—Gods *unable*

T' acquit themselves, and prosecute their foes.

Milton.—The prince *unable* to conceal his pain. *Dryden.*—I intended though far *unable* for the attempt. *Dryd.*—Man, was *unable* even to form an idea of happiness. *Rogers.* 2. Weak; impotent.—A love that makes breath poor, and speech *unable*. *Shak.*

* **UNABOLISHED.** *adj.* [from *abolished*.] Not repealed; remaining in force.—A number of needless laws *unabolished*. *Hooker.*

* **UNACCEPTABLE.** *adj.* [from *acceptable*.] Not pleasing; not such as is well received.—He was very *unacceptable* to his countrymen. *Clar.*—'Tis as indecent as *unacceptable*. *Gow. of the Tongue.*—Every method must be *unacceptable* and displeasing. *Addis.*—An *unacceptable* duty. *Rogers.*

* **UNACCEPTABLENESS.** *n. f.* [from *unacceptable*.] State of not pleasing.—The *unacceptableness* of the subject. *Collier.*

* **UNACCEPTED.**

* **UNACCEPTED.** *adj.* [from *accepted*.] Not accepted.—Offer'd again the *unaccepted* wreath. *Prior*.

UNACCESSIBLE. See **INACCESSIBLE**.

* **UNACCESSIBLENESS.** *n. s.* [from *unaccessibility*.] State of not being to be attained or approached.—Remoteness and *unaccessibility*. *Hale*.

* **UNACCOMMODATED.** *adj.* [from *accommodated*.] Unfurnished with external convenience.—*Unaccommodated* man is no more than such a poor, bare, forked animal as thou art. *Shak*.

* **UNACCOMPANIED.** *adj.* [from *accompanied*.] Not attended.—Seldom cometh *unaccompanied* with the like. *Hayward*.

* **UNACCOMPLISHED.** *adj.* [from *accomplished*.] Unfinished; incomplete.—And leave an *unaccomplished* love behind. *Dryden*.—Nor durst their *unaccomplished* crime pursue. *Dryden*.

* **UNACCOUNTABLE.** *adj.* [from *accountable*.] 1. Not explicable; not to be solved by reason; not reducible to rule.—I shall note difficulties, which are not usually observed, though *unaccountable*. *Glanv.*—The folly is so *unaccountable*. *L'Estrange*.—An *unaccountable* disposition. *Add.*—It is yet more *unaccountable*. *Rogers*.—The Chinese are an *unaccountable* people. *Baker*.—It is wholly *unaccountable* to us. *Swift*. 2. Not subject; not controlled.

* **UNACCOUNTABLY.** *adv.* Strangely.—His heart *unaccountably* melted at the sight of him. *Addison*.

UNACCURACY. See **INACCURACY**.

* **UNACCURATE.** *adj.* [from *accurate*.] Not exact.—Galileo using an *unaccurate* way. *Boyle*.

* **UNACCURATENESS.** *n. s.* [from *unaccurate*.] Want of exactness. For this are commonly used *inaccurate* and *inaccuracy*.—The *unaccuracy* and *unconcludingness* of analytical experiments. *Boyle*.

* **UNACCUSTOMED.** *adj.* [from *accustomed*.] 1. Not used; not habituated: with to.—*Unaccustomed* to the yoke. *Jer. xxxi*.—Animals *unaccustomed* to the want of air. *Boyle*. 2. New; not usual.—Shall give him such an *unaccustomed* dram. *Shak*.—Change native home for *unaccustomed* air. *Phil*.—An old word ought never to be fixed to an *unaccustomed* idea, without just and evident necessity. *Watts*.

* **UNACKNOWLEDGED.** *adj.* [from *acknowledged*.] Not owned.—An *unacknowledged* successor to the crown. *Clarendon*.

* **UNACQUAINTANCE.** *n. s.* [from *acquaintance*.] Want of familiarity; wanting of knowledge; followed by *with*.—Utter *unacquaintance* with his master's designs. *South*.

* **UNACQUAINTED.** *adj.* [from *acquainted*.] 1. Not known; unusual; not familiarly known.—And th' *unacquainted* light began to fear. *Spens*. 2. Not having familiar knowledge; followed by *with*.—Whole ears were *unacquainted* with such matter. *Hooker*.

Shall I inform my *unacquainted* feet,

In the blind mazes of this tangled world? *Milt*.—My ears are *unacquainted* with such bold truths. *Denham*.—Youth, that *with* joys had *unacquainted* been. *Dryden*.—*Unacquainted* with death. *Wake*.

* **UNACTIVE.** *adj.* [from *active*.] 1. Not brisk; not lively.—Tame, *unactive* children. *Locke*. 2. Having no employment.—While other animals *unactive* range. *Milton*.—Private, *unactive*, calm, contemplative. *Milton*.—A faint, *unactive* thing. *South*. 4. Having no efficacy.—

In the fruitful earth

His beams, *unactive* else, their vigour find.

Milton.

UNACTIVELY. See **INACTIVELY**.

UNACTIVITY. See **INACTIVITY**.

* **UNACTUATED.** *adj.* Not actuated.—The peripatetic matter is a mere *unactuated* power. *Glanv.*

UNADEQUATE. See **INADEQUATE**.

UNADEQUATELY. See **INADEQUATELY**.

* **UNADMIR'D.** *adj.* Not regarded with honour.—Oh! had I rather *unadmir'd* remain'd. *Pope*.

UNADMISSIBLE. *adj.* Not to be admitted.

* **UNADORN'D.** *adj.* Not worshipped.—Nor was his name unheard, or *unador'd*. *Milton*.

* **UNADORN'D.** *adj.* Not decorated; not embellished.—Desert and bare, unlightly, *unadorn'd*. *Milton*.—But hoary winter, *unadorn'd* and bare. *Addison*.

* **UNADVENTUROUS.** *adj.* Not adventurous.—Irresolute, unhardy, *unadvent'rous*. *Milt*.

UNADVERTENCE. See **INADVERTENCE**.

UNADVERTENT. See **INADVERTENT**.

* **UNADVISED.** *adj.* 1. Imprudent; indiscreet.—

Madam, I have *unadvise'd*

Deliver'd you a paper that I should not. *Shak*. 2. Done without due thought; rash.—Is too rash, too *unadvise'd*, too sudden. *Shak*.—The *unadvise'd* forwardness of divers chief counsellors. *Hayw*.—No *unadvise'd* productions. *Glanv.*

* **UNADVISEDLY.** *adv.* Imprudently; rashly;—indiscreetly.—Speech, *unadvise'dly* uttered. *Hooker*.—Error we have *unadvise'dly* taken upon us to defend. *Hooker*.—Men shall deal *unadvise'dly* sometimes. *Shak*.—A word *unadvise'dly* spoken. *South*.

* **UNADULTERATED.** *adj.* Genuine; not spoiled by spurious mixtures.—Pure and *unadulterated*. *Addison*.

* **UNAFFECTED.** *adj.* 1. Real; not hypocritical.—And *unaffected* sorrow sat on ev'ry face. *Dryden*. 2. Free from affectation; open; candid; sincere.—With inward greatness, *unaffected* wisdom. *Addison*.—Of softest manners, *unaffected* mind. *Pope*. 3. Not formed by too rigid observation of rules; not laboured.—In their majestic, *unaffected* stile. *Milton*. 4. Not mov'd; not touch'd; as, he sat *unaffected* to bear the tragedy.

* **UNAFFECTEDLY.** *adv.* Really; without any attempt to produce false appearances.—*Unaffectedly* cheerful. *Locke*.

* **UNAFFECTING.** *adj.* Not pathetic; not moving the passions.

* **UNAFFECTEDLY.** *adj.* Free from trouble. My *unaffected* mind. *Dan*.

* **UNAGREEABLE.** *adj.* Inconsistent; unsuitable —

Advent'rous works! yet to thy pow'r and mine

Not *unagreeable*.

Milton.

* **UNAGREEABLENESS.**

- * **UNAGREEABLENESS.** *n. f.* Unfuitable acts to; inconsistency with.—*Unagreeableness* to the gospel œconomy. *Decay of Piety.*
- * **UNDAIDABLE.** *adj.* Not to be helped.—Labouring art can never ransom nature From her *undaidable* estate. *Shak.*
- * **UNAIDED.** *adj.* Not assisted; not helped.—Th' *unaided* eye. *Blackmore.*
- * **UNAIMING.** *adj.* Having no particular direction.—The noisy culverin, o'ercharg'd lets fly, And bursts, *unaiming*. *Granv.*
- * **UNAKING.** *adj.* Not feeling or causing pain.—Show them th' *unaking* scars which I would hide. *Shak.*
- * **UNALASHKA.** See **ONALASHKA.**
- * **UNALIENABLE.** *adj.* Not to be transferred.—*Unalienable* right in a particular family. *Swift.*
- * **UNALIAYED.** *adj.* Not impaired by bad mixtures.—*Unallayed* satisfactions. *Boyle.*
- * **UNALLIED.** *adj.* 1. Having no powerful relation. 2. Having no common nature; not congenial.—*Unallied* and disproportioned substances. *Collier.*
- * **UNALIENABLE.** See **INALIENABLE.**
- * **UNALIMENTAL.** See **INALIMENTAL.**
- * **UNALTERABLE.** *adj.* Unchangeable; immutable.—A fixed, *unalterable* relation of one nature to another. *Sotab.*—The fixt *unalterable* laws. *Creesh.*—*Unalterable* in his purpose. *Atterbury.*
- * **UNALTERABLENESS.** *n. s.* Immutability; unchangeableness.—The *unalterableness* of the corpuscles. *Woodward.*
- * **UNALTERABLY.** *adv.* Unchangeably; immutably.—Retains *unalterably* firm his love entire. *Milton.*—*Unalterably* constituted by those motions. *Holder.*
- * **UNALTERED.** *adj.* Not changed; not changeable.—We suffer to remain *unalter'd*. *Hook.*—To whom our Saviour, with *unalter'd* brow. *Milton.*—To shew the truth of my *unalter'd* breast. *Dryden.*—On some *unalter'd* cause they fare depend. *Dryden.*—Grains and nuts pass often thro' animals *unalter'd*. *Arbutb.*—Fair, *unalter'd*, and free from mineral infusions. *Woodward.*
- * **UNAMAZED.** *adj.* Not astonished; free from astonishment.—Not *unamaz'd* she thus in answer spake. *Milton.*
- * **UNAMBITIOUS.** *adj.* Free from ambition. My humble muse, in *unambitious* strains. *Pope.*—I am one of those *unambitious* people. *Pope.*
- * **UNAMENDABLE.** *adj.* [*inamendabilis*, Lat.] Not to be changed for the better.—Mankind is *unamendable*. *Pope.*
- * **UNAMIALE.** *adj.* Not raising love.—Repellent religion in an *unamiable* light. *Addison.*—The *unamiable* part of themselves. *Addison.*—Nor are the hills *unamiable*. *Philips.*
- * **UNANALISED.** *adj.* Not resolved into simple parts.—Refined and *unanalysed* nitre. *Boyle.*
- * **UNANCHORED.** *adj.* Not anchored.—Where ships may rest, *unanchor'd*, and unt'y'd. *Pope.*
- * **UNANELED.** *adj.* [*un* and *knell*.] Without the bell rung. This sense I doubt.—Unbousel'd, unanointed, *unanel'd*. *Shak.*
- * **UNANIMATED.** *adj.* Not enlivened; not

vivified.—A lump of uninformed *unanimated* matter. *Dryden.*

* **UNANIMITY.** *n. f.* [*unanimité*, Fr.] Agreement in design or opinion.—An honest party of men acting with *unanimity*. *Addison.*

* **UNANIMOUS.** *adj.* [*unanime*, Fr. *unanimis*, Latin.] Being of one mind; agreeing in design or opinion.—*Unanimous*, as sons of one great fire. *Milton.*—All bred in arms, *unanimous* and brave. *Dryden.*

* **UNANIMOUSLY.** *adv.* [from *unanimous*.] With one mind.—This particular is *unanimously* reported. *Addison.*

* **UNANIMOUSNESS.** *n. f.* [from *unanimous*.] The state of being unanimous.

* **UNANPOINTED.** *adj.* 1. Not anointed. 2. Not prepared for death by extreme unction.—Unhousel'd, *unanointed*, unanel'd. *Shak.*

* **UNANSWERABLE.** *adj.* Not to be refuted. This is a manifest and *unanswerable* argument. *Ral.*—The emergent difficulties, are *unanswerable*. *Granv.*—The pye's question was *unanswerable*. *L'Estr.*—Reasons that are *unanswerable*. *Addison.*—The excuse, if real, is *unanswerable*. *Atter.*

* **UNANSWERABLY.** *adv.* Beyond confusion.—It *unanswerably* follows. *South.*

* **UNANSWERED.** *adj.* 1. Not opposed by a reply.—*Unanswer'd* lest thou boast. *Milton.*—

Must I tamely bear

This arrogance *unanswer'd*! *Addison.*

2. Not confuted.—Merriments and jests *unanswer'd*. *Hooker.* 3. Not suitably returned.—Quench, Corydon, thy long *unanswer'd* fire. *Dryden.*

* **UNAPPALLED.** *adj.* Not daunted; not impressed by fear.—Can thoughts still thinking so rest *unappalled*? *Sidney.*—Sat *unappall'd* in calm and sinless peace. *Milton.*—As a lion, *unappall'd* with fear. *Dryden.*—With eyes erect and visage *unappall'd*. *Smith.*

* **UNAPPARELLED.** *adj.* Not dressed; not clothed.—In Peru they were an *unapparelled* people. *Bacon.*—Till our souls be *unapparelled*. *Donne.*

* **UNAPPARENT.** *adj.* Obscure; not visible.—From the *unapparent* deep. *Milton.*

* **UNAPPEASEABLE.** *adj.* Not to be pacified; implacable.—The *unappeasable* rage. *Ral.*—Thy anger, *unappeasable*, still rages. *Milton.*

* **UNAPPEASED.** *adj.* Not pacified.—That so the shadows be not *unappeas'd*. *Shak.*—His son forgot, his enpress *unappeas'd*. *Dryden.*

* **UNAPPLICABLE.** *adj.* [from *apply*.] Such as cannot be applied.—He appeared now as *unapplicable* to their purposes as the other. *Clarend.*—Ideas, that demonstratively shew the equality or inequality of *unapplicable* quantities. *Locke.*

* **UNAPPREHENDED.** *adj.* Not understood.—They of whom God is altogether *unapprehended*. *Hooker.*

* **UNAPPREHENSIVE.** *adj.* [from *apprehend*.] 1. Not intelligent; not ready of conception.—He makes a man *unapprehensive* and insensible. *South.* 2. Not suspecting.

* **UNAPPROACHED.** *adj.* Inaccessible.—God is light,

And never but in *unapproached* light

Dwelt from eternity. *Milton.*

M m m m * **UNAPPROVED.**

* **UNAPPROVED.** *adj.* [from *unapprove*.] Not approved.—May come and go so *unapproved*. *Milt.*

* **UNAPT.** *adj.* [from *apt*.] 1. Dull; not apprehensive. 2. Not ready; not propense.—I am a soldier, and *unapt* to weep. *Shak.*—*Unapt* to stir at these indignities. *Shak.* 3. Unfit; not qualified; with *to* before a verb, *for* before a noun.—Fear is, of all affections (anger excepted) the *unaptest* to admit any conference with reason. *Hooker.*—Sensual pleasures make this spirit *unapt* for noble or wise employments. *Taylor.* 4. Improper; unfit; unsuitable.

* **UNAPTLY.** *adv.* [from *unapt*.] Unfitly; improperly.—His hinder legs do not *unaptly* resemble a pair of ours. *Grew.*

* **UNAPTTNESS.** *n. f.* [from *unapt*.] 1. Unfitness; unsuitableness.—The person that is gowned, is by his gown restrained from lightness by the very *unaptness* of his weed. *Spenser.* 2. Dulness; want of apprehension.—
That *unaptness* made you minister
Thus to excuse yourself. *Shak.*

3. Unreadiness; disqualification; want of preparation.—The mind gets an *unaptness*, or an aversion to any vigorous attempt. *Locke.*

* **UNARGUED.** *adj.* [from *argue*.] 1. Not disputed.—
What thou bidd'st—*Unargu'd* I obey. *Milt.*

2. Not censured.—
Not that this work liv'd in the hands of foes,
Unargu'd then. *B. Jonson.*

* **TO UNARM.** *v. a.* [from *arm*.] To disarm; to strip of armour; to deprive of arms.—*Unarm*, *unarm*, and do not fight to-day. *Shak.*—*Unarm*, me Eros. *Shak.*—*Unarming* the malice of venemous spirits. *Brook.*

* **UNARMED.** *adj.* [from *unarm*.] Having no armour; having no weapons.—*Unarm'd*, and unresolv'd to beat them back. *Shak.*
He all *unarm'd*
Shall chace thee with the terror of his voice. *Milton.*

—Though *unarm'd* I am. *Dryd.*—Man is born altogether *unarm'd*. *Grew.*

* **UNARRAIGNED.** *adj.* Not brought to a trial.—Should here be judg'd, unheard, and *unarraign'd*. *Daniel.*

* **UNARRAYED.** *adj.* Not dressed.—As if this infant world yet *unarray'd*. *Dryd.*—Half *unarray'd*, he ran to his relief. *Dryden.*

* **UNARTFUL.** *adj.* 1. Having no art, or cunning.—And innocence *unartful* in his face. *Dryd.* 2. Wanting skill.—How *unartful* it would have been. *Cheyne.*

* **UNARTFULLY.** *adv.* In an artful manner.—The report, although not *unartfully* drawn. *Swift.*

* **UNARTIFICIALLY.** *adv.* Contrarily to art.—Not a feather is *unartificially* made. *Derham.*

* **UNASKED.** *adj.* 1. Not courted by solicitation.—*Unask'd*, thou tak'st such pains to tell me. *Denham.* 2. Not sought by entreaty or care.—
The bearded corn enl'd
From earth *unask'd*. *Dryden.*
Unask'd their pains, ungrateful their advice. *Dryd.*

* **UNASPIRING.** *adj.* Not ambitious.—Most and *un aspiring*. *Rogers.*

* **UNASSAILED.** *adj.* Not attacked; not as-

saulted.—It grieves my soul to leave thee *unassail'd*. *Shak.*—To keep my life and honour *unassail'd*. *Milton.*

* **UNASSAILABLE.** *adj.* Exempt from assault.—One *unassailable* holds on his rank. *Shak.*

* **UNASSAYED.** *adj.* Unattempted.—What is faith, love, virtue *unassayed*. *Milton.*

* **UNASSISTED.** *adj.* Not helped.—Reason, *unassisted* by human power. *Addison.*—What *unassisted* reason could not discover. *Rogers.*

* **UNASSISTING.** *adj.* Giving no help.—Nor idle stood with *unassisting* hands. *Dryden.*

* **UNASSUMING.** *adj.* Not arrogant.—*Unassuming* worth in secret liv'd. *Thomson.*

* **UNASSURED.** *adj.* 1. Not confident.—A timorous and *unassured* countenance. *Glenn.* 2. Not to be trusted.—The feigned friends, the *unassured* foes. *Spenser.*

* **UNATTAINABLE.** *adj.* Not to be gained or obtained; being out of reach.—*Unattainable* by our discourse. *Dryd.*—I aim at no such *unattainable* privilege. *Locke.*

* **UNATTAINABLENESS.** *n. f.* State of being out of reach.—The impossibility, or *unattainableness* of the good proposed. *Locke.*

* **UNATTEMPTED.** *adj.* Untried; not assayed.—He left no means *unattempted* of destroying his son. *Sidney.*—But that my hand, as *unattempted* yet. *Shak.*—Things *unattempted* yet in prose or rhyme. *Milton.*—Leave nothing *unattempted*. *Denham.*—How many things have been left *unattempted*? *Atterbury.*

* **UNATTENDED.** *adj.* 1. Having no retinue, or attendants.—Goddess-like she went not *unattended*. *Milton.* 2. Having no followers.—*Unattended* generals. *Dryden.* 3. Unaccompanied; forsaken.—Hath left you *unattended*. *Shak.*

* **UNATTENDING.** *adj.* Not attending.—That praise address'd to *unattending* ears. *Milt.*—Neptune in anguish his charge *unattending*. *Dryd.*

* **UNATTENTIVE.** *adj.* Not regarding.—Man's nature is so *unattentive* to good. *Gow. Ton.*—Seldom draw the eyes of the *unattentive*. *Tait.*

* **UNATONED.** *adj.* Not expiated.—A brother's blood yet *unaton'd*. *Rowe.*

* **UNAVAILABLE.** *adj.* Useless; vain with respect to any purpose.—Wherefore is reading so *unavailable*? *Hooker.*

* **UNAVAILING.** *adj.* Useless; vain.—You safely *unavailing* pity show. *Dryd.*—And spreads for aid his *unavailing* hands. *Pope.*

* **UNAVOIDABLE.** *adj.* 1. Inevitable; not to be shunned.—*Unavoidable* occasions of war. *Dryden.*—It is *unavoidable* to all, to have opinions, without proofs of their truth. *Locke.*—Transgression will, through weakness, be *unavoidable* to the best guarded. *Rogers.*—The *unavoidable* deficiencies of our service. *Rogers.*—The *unavoidable* moment of death. *Clarissa.* 2. Not to be missed in ratiocination.—One of them is *unavoidable*. *Tillotson.*—I think it *unavoidable* for every rational creature, to have the notion of an eternal, wise being, who had no beginning. *Locke.*

* **UNAVOIDABLENESS.** *n. f.* Inevitability.—The *unavoidableness* of sensations. *Glenn.*

* **UNAVOIDABLY.** *adv.* Inevitably.—The most perfect administration must *unavoidably* produce opposition. *Addison.*

* UNAVOIDED

* **UNAVOIDED.** *adj.* Inevitable.—And *unavoided* is the danger now. *Shak.*

Rare poems ask rare friends;

Yet satyrs, since the most of mankind be

Their *unavoided* subject, fewest see. *B. Jonson.*

* **UNAUTHORISED.** *adj.* Not supported by authority; not properly commissioned.—

To kiss in private?

An *unauthorized* kiss. *Shak.*

—*Unauthorized*'d by my supreme command. *Dryd.*

* **UNAWARE.** } *adv.* [from *aware*, or *wary*.]

* **UNAWARES.** } 1. Without thought; with-

out previous meditation.—Take heed lest you fall

unawares into that inconvenience. *Spenser.*—It is

my father I *unawares* have kill'd. *Shak.*—We fall

into deception *unaware*. *Milton.*—He swallow'd

unawares the sleepy draught. *Dryden.*—'Tis a

temptation like that of a limb lopp'd off; one is

trying every minute *unawares* to use it, and finds

it is not. *Pope.* 2. Unexpectedly; when it is not

thought of, suddenly.—Left destruction come

upon him at *unawares*. *Psalms xxxvi. 8.*—My

hand, *unawares* to me, was carried up with violence.

Boyle.—We put the evil day far from us,

and then it catches us *unawares*. *Wake.* 3. In

this sense I believe at *unawares* is the proper use.

He breaks at *unawares* upon our walks,

And, like a midnight wolf, invades the fold.

Dryden.

* **UNAWED.** *adj.* Unrestrained by fear or reverence.—Ministers *unawed* by any guilt of their own. *Clarendon.*—Unforc'd by punishment,

unaw'd by fear. *Dryden.*

* **UNBACKED.** *adj.* 1. Not tamed; not

taught to bear the rider.—At which, like *unback'd*

colts, they prick'd their ears. *Shak.*—An *unback'd*

filly may give thee a fall. *Suckling.*—They flinch

like *unback'd* fillies. *Dennis.* 2. Not countenan-

ced; not aided.—

Let the weight of thine own infamy

Fall on the unsupported, and *unback'd*. *Daniel.*

sed; not blunted.—Th' *unbated* fire. *Shak.*

* **UNBATHED.** *adj.* [from *bathe*.] Not wet.

—The blade return'd *unbathe'd*. *Dryden.*

* **UNBATTERED.** *adj.* Not injured by

blows.—Or else my sword, with an *unbatter'd*

edge. *Shak.*

* To **UNBAY.** *v. a.* To set open; to free from the restraint of mounds.—I ought now to *unbay* the current of my passion. *Norris.*

* **UNBEARING.** *adj.* Bringing no fruit.—*Unbearing* branches. *Dryden.*

* **UNBEATEN.** *adj.* 1. Not treated with blows.—For she had rode five miles unpurr'd,

unbeaten. *Bp. Corbet.* 2. Not trodden.—We must

tread *unbeaten* paths. *Bacon.*—If your bold muse

dare tread *unbeaten* paths. *Rowcommon.*—Some

new, *unbeaten* passage to the sky. *Swift.*

* **UNBECOMING.** *adj.* Indecent; unsuitable;

indecorous.—All things *unbecoming*. *Shak.*—No

unbecoming deed. *Milton.*—It was *unbecoming* of

any but Pan. *Dryden.*—My grief lets *unbecoming*

speeches fall. *Dryden.*—It appears most *unbecom-*

ing and unnatural. *Addis.*—*Unbecoming* passages

in plays. *Swift.*—*Unbecoming* warmth. *Swift.*

* **UNBECOMINGNESS.** *n. f.* Indecency;

indecorum.—Representing the ill or *unbecoming-*

ness of the fault. *Locke.*

* To **UNBED.** *v. a.* To raise from a bed.—

Eels *unbed* themselves. *Walton.*

* **UNBEFITTING.** *adj.* Not becoming; not

suitable.—Love is full of *unbefitting* strains. *Shak.*

—Or think thee *unbefitting* holiest place. *Milton.*

—*Unbefitting* his dignity and interest. *Swift.*

* To **UNBEGET.** *v. n.* To deprive of exis-

tence.—

Wishes each minute he could *unbget*

Those rebel sons. *Dryden.*

* **UNBEGOT.** } *adj.* [from *begot*.] 1. E-

* **UNBEGOTTEN.** } ternal; without gene-

ration.—The eternal, *unbegotten*, and immutable

God! *Stillingfleet.* 2. Not yet generated.—Your

children yet unborn, and *unbegot*. *Shak.*—The

race unbless'd, to being yet *unbegot*. *Milton.* 3. Not

attaining existence.—Better were it for him to

have been unborn and *unbegot*. *South.*

* To **UNBEGUILE.** *v. a.* To deceive; to

set free from the influence of any deceit.—Then

unbeguile thyself. *Donne.*—Their comeliness *un-*

beguiled the vulgar. *Howell.*

* **UNBEHELD.** *adj.* Unseen; not discove-

rable to the sight.—These then, though *unbeheld*

in deep of night. *Milton.*

* **UNBELIEF.** *n. f.* 1. Incredulity.—*Unbelief*

is blind. *Milton.*—I'm justly plagu'd by this your

unbelief. *Dryden.*—An excess of credulity or of

unbelief. *Watts.* 2. Infidelity; irreligion.—Where

profess'd *unbelief* is, there can be no visible church

of Christ. *Hooker.*

* To **UNBELIEVE.** *v. a.* 1. To discredit;

not to trust.—As I, thus wrong'd, hence *un-*

believed go. *Shak.*—It was enough to make any man

unbelieve his senses. *Wotton.* 2. Not to think real

or true.—Of such an unforeseen an *unbelieve'd* of-

fence. *Dryden.*

* **UNBELIEVER.** *n. f.* An infidel; one who

believes not the scripture of God.—Arguments

such as *unbelievers* themselves must think reason-

able. *Hooker.*—Sad fate of *unbelievers*, and yet

just. *Waller.*—Wicked ungodly men and *unbelie-*

vers. *Tillotson.*—One of them was a Christian,

and the other an *unbeliever*. *Atterbury.*—Men al-

ways grow vicious before they become *unbelievers*.

Swift.

* **UNBELIEVING.** *adj.* Infidel.—But th'

M m m m 3 *unbelieving*

unbelieving squadrons turn'd to flight. *Philips*.—The unbelieving Jews. *Addison*.—The unbelieving part of mankind. *Rogers*.

* **UNBELOVED**. *adj.* Not loved.—Who-e'er you are, not *unbelov'd* by heav'n. *Dryden*.

Nor pass'd *uncelebrated*, nor unsung. *Milt.*

* *UNCENSURED*. *adj.* Exempt from publick reproach.—How difficult for any ruler to live *uncensured*. *Addis.*—Whose right it is *uncensur'd* to be dull. *Pope*.—To be *uncensur'd*, and to be oblige, is the same thing. *Pope*.

* *UNCERTAIN*. *adj.* [*incertain*, *Fr.* *incertus*, *Lat.*] 1. Doubtful; not certainly known.—

That whether 'tis a part of earth or sky,

Uncertain seems. *Denham*.

2. Doubtful; not having certain knowledge.—Man is *uncertain* of every thing. *Tillotson*.—With certain pain, *uncertain* of relief. *Gramm.* 3. Not sure in the consequence.—*Uncertain* way of gain! *Shak.*—Or whistling slings dismiss'd th' *uncertain* stone. *Gay*.—An *uncertain* haste. *Pope*. 4. Not exact; not sure.—He bent his bow, *uncertain* in his aim. *Dryden*. 5. Unsettled; irregular.—As the form of our publick service is not voluntary, so neither are the parts thereof *uncertain*. *Hooker*.

* *UNCERTAINED*. *adj.* Made uncertain. A word not used.—The diversity of seasons are not so *uncertained* by the sun and moon alone. *Ral.*

* *UNCERTAINTY*. *adv.* 1. Not surely; not certainly.—For wealth, which so *uncertainly* must come. *Dryd.*—Known very imperfectly and *uncer-*

tainty. *Locke*. 2. Not confidently.—Speak softly or *uncertainly*. *Denham*.

* *UNCERTAINTY*. *n. f.* 1. Doubtfulness; want of knowledge.—Stay till fit time wear out *uncertainty*. *Denham*.—

You common cry of curs, whose breath I hate,

Here then remain with your *uncertainty*;

Let ev'ry feeble humour shake your hearts. *Shak.*

2. Inaccuracy.—Doubtfulness and *uncertainty* in the signification of some words. *Locke*. 3. Contingency; want of certainty.—God's omniscience is a light shining into every dark corner, redoubtably grasping the greatest and most slippery *uncertainties*. *South*. 4. Something unknown.—He that quits a moral certainty for an *uncertainty*. *L'Estr.*

* *TO UNCHAIN*. *v. a.* To free from chains.—So was his fame complete, and Andromede *unchain'd*. *Prior*.

* *UNCHANGEABLE*. *adj.* Immutable; not subject to variation.—Every such law ought for ever to remain *unchangeable*. *Hooker*.

* *UNCHANGEABLENESS*. *n. f.* Immutability.—*Unchangeableness* of colour. *Newot*.

* *UNCHANGEABLY*. *adv.* Immutably; without change.—All truth is *unchangeably* the same. *South*.—Must then subsist *unchangeably* the same. *Blackmore*.

* *UNCHANGED*. *x. f.* 1. Not altered.—Our spirits are *unchanged*. *Taylor*.—

More safe I sing with mortal voice, *unchang'd*

To hoarse, or mute. *Milton*.

2. Not alterable.—And heav'n's *unchang'd* decrees attentive hear. *Dryd.*—Honour *unchang'd*. *Pope*.

* *UNCHANGING*. *adv.* Suffering no alteration.—But that thy face is, vizard-like, *unchanging*. *Shak.*—True expression, like th' *unchanging* sun. *Pope*.

* *TO UNCHARGE*. *v. a.* To retract an accusation.—

Even his mother shall *uncharge* the practice,

And call it accident. *Shak.*

* *UNCHARITABLE*. *adj.* Contrary to charity; contrary to the universal love prescribed by christianity.—*Uncharitable* zeal our reason whets. *Denb.*—*Uncharitable* interpretations. *Add.*

* *UNCHARITABLENESS*. *n. f.* Want of charity.—Unretracted *uncharitableness*. *Gov. Tong.*—We are justly kept back by our own *uncharitableness*. *Kettlew.*—Heaven and hell are the proper regions of mercy and *uncharitableness*. *Atterb.*

* *UNCHARITABLY*. *adv.* In a manner contrary to charity.—Far be it from me that I should ever think so desperately, or with so *uncharitably*. *Spenser*.—*Uncharitably* with me you have dealt. *Shak.*—Men, imprudently and *uncharitably* often, employ their zeal for persons. *Spratt*.

* *UNCHARY*. *adj.* Not wary; not cautious not frugal.—And laid my honour too *unchary* out. *Shak.*

* *UNCHASTE*. *adj.* Lewd; libidinous; no continent; not chaste; not pure.—The most impudently *unchaste* woman of all Asia. *Sidn.*—With *unchaste* purposes. *Shak.*—Whoever is *unchaste* cannot reverence himself. *Bac.*—Lust, by *unchaste* looks. *Milton*.—*Unchaste* life. *Taylor*.

* *UNCHASTITY*. *n. f.* Lewdness; incontinence.—Intemperance, sensuality, and *unchastity*. *Woodw.*—A spirit of *unchastity*. *Arbuth.*

* *UNCHEERFULNESS*

* **TO UNCLASP.** *v. a.* To open what is shut with clasps.—

—Prayer can *unclasp* the girdles of the north. *Taylor.*

* **UNCLASSICK.** *adj.* Not claffick.—*Unclaffick* ground. *Pope.*

* **UNCLE.** *n. f.* [*oncle*, Fr.] The father's or mother's brother.—Hamlet punishes his *uncle* rather for his own death, than the murder of his father. *Shak.*

* **UNCLEAN.** *adj.* 1. Foul; dirty; filthy.—A length of beard descends, uncomb'd, *unclean*. *Dryd.*—But when the precious coin is kept *unclean*. *Dryd.* 2. Not purified by ritual practices.

3. Foul with sin.—What act more execrably *unclean*, profane? *Milton.*—Where no *unclean* thing shall enter. *Rogers.* 4. Lewd; unchaste.—And, fairy-like too, pinch the *unclean* knight. *Shak.*—Reproach us as *unclean*. *Milton.*—Inordinate and *unclean* affections. *Perkins.*

* **UNCLEANLINESS.** *n. f.* Want of cleanliness.—Profane liberty and *uncleanliness*. *Clar.*

* **UNCLEANLY.** *adj.* 1. Foul; filthy; nasty.—The very *uncleanly* flux of a cat. *Shak.* 2. Indecent; unchaste.—'Tis pity that these harmonious writers have ever indulged any thing *uncleanly* or impure. *Watts.*

* **UNCLEANNESS.** *n. f.* 1. Lewdness; incontinence.—Miserable houses of *uncleaness*. *Graunt.* 2. Want of cleanliness; nastiness.—Unhandsomeness, or *uncleaness*. *Tagl.* 3. Sin; wickedness.—I will save you from all your *uncleanesses*. *Exek.* 4. Want of ritual purity.

* **UNCLEANSED.** *adj.* Not cleansed.—Pond earth is a good compost, if the pond have been long *uncleaned*. *Bacon.*

* **TO UNCLECH.** *v. a.* To open the closed hand.—His fist *uncleches*, and the weapon falls. *Garth.*

* **TO UNCLEW.** *v. a.* [from *clew*.] To undo. If I should pay for't as 'tis extoll'd,

If would *unclew* me quite. *Shak.*

* **UNCLIPPED.** *adj.* Whole; not cut.—A distinction between clipped and *unclipped* money. *Locke.*

* **TO UNCLOATH.** *v. a.* To strip; to make naked.—The boughs are never *unclothed*. *Ral.*—Poor orphans minds are left as *unclothed* as their bodies. *Atterb.*—Cover the couch over with thick woollen clothes, the warmth whereof will make it come presently; which once perceived, forthwith *uncloath* it. *Mort.*—*Uncloath* them of all these mixtures. *Watts.*

* **TO UNCLOG.** *v. a.* 1. To disencumber; to exonerate.—It would *unclog* my heart. *Shak.* 2. To set at liberty. *Unclog'd* in empty space. *Dryd.*

* **TO UNCLOISTER.** *v. n.* To set at large.—*Uncloister'd* from the womb. *Norris.*

* **TO UNCLOSE.** *v. a.* To open.—Soon as thy letters trembling I *unclose*. *Pope.*

* **UNCLOSED.** *adj.* Not separated by inclosures.—Through those *unclosed* parts. *Clar.*

* **UNCLOUDED.** *adj.* Free from clouds; clear from obscurity; not darkened.—*Unclothed* deity. *Milton.*—*Unclothed* light. *Rose.*

Blest with temper, whose *unclothed* ray,
Can make to-morrow cheerful as to-day. *Pope.*

* **UNCLOUDEDNESS.** *n. f.* Openness; freedom

I have *unclasp'd*

To thee the book, ev'n of my secret soul. *Shak.*

dom from gloom.—The greatest *uncloudedness* of the eye. *Boyle*.

* **UNCLOUDY**. *adj.* Free from a cloud.—And twinkling orbs berflow th' *uncloudy* skies. *Guy*.

* **TO UNCLUTCH**. *v. a.* To open.—The terrors of the Lord could not melt his bowels, *unclutch* his griping hand, or dissize him of his prey. *Decay of Piety*.

* **TO UNCOIF**. *v. a.* To pull the cap off.—Yonder are two apple-women scolding, and just ready to *uncoif* one another. *Arbuth*.

* **TO UNCOIL**. *v. a.* [from *coil*.] To open from being coiled or wrapped one part upon another.—The spiral air-vessels are like threads of cobweb, a little *uncoiled*. *Derham*.

* **UNCOINED**. *adj.* Not coined.—A fellow of plain, *uncoined* constancy. *Shak*.—An ounce of *uncoined* standard silver. *Locke*.

* **UNCOLLECTED**. *adj.* Not collected; not recollected.—And to my soul yet *uncollected* said. *Prior*.

* **UNCOLOURED**. *adj.* Not stained with any colour, or die.—Things *uncoloured* and transparent. *Bacon*.—The *uncolour'd* sky. *Milton*.

* **UNCOMBED**. *adj.* Not parted or adjusted by the comb.—Curled, *uncombed* hairs. *Spens*.—Their locks are beds of *uncombed* snakes. *Crafsb*.—Thy locks *uncomb'd*, like a rough wood appear. *Dryd*.

* **UNCOMEATABLE**. *adj.* Inaccessible; unattainable. A low corrupt word.

* **UNCOMELINESS**. *n. f.* Want of grace; want of beauty.—Men thun the places for the *uncomeliness* thereof. *Spens*.—Reproof to all *uncomeliness*. *Shak*.—They ought for their *uncomeliness* to be exiled from judicious eyes. *Wotton*.—Real *uncomeliness*. *K. Char*.—The beauty or *uncomeliness* in good and ill breeding. *Locke*.

* **UNCOMELY**. *adj.* Not comely; wanting grace.—He thought inquisitiveness an *uncomely* guest. *Sidney*.—Neither is the same accounted an *uncomely* manner of riding. *Spens*.—They durst not go thither, for fear of *uncomely* affronts. *Clarend*.—*Uncomely* courage, unbecoming skill. *Thoms*.

* **UNCOMFORTABLE**. *adj.* 1. Affording no comfort; gloomy; dismal; miserable.—*Uncomfortable* exile. *Hooker*.—The most *uncomfortable* time of the year. *Add*.—Ours is melancholy and *uncomfortable* portion here below! *Wake*.—The sun ne'er views th' *uncomfortable* seats. *Pope*. 2. Receiving no comfort; melancholy.

* **UNCOMFORTABLENESS**. *n. f.* Want of cheerfulness.—The want of just dispositions may occasion this *uncomfortableness*. *Tayl*.

* **UNCOMFORTABLY**. *adv.* Without cheerfulness.

* **UNCOMMANDED**. *adj.* Not commanded.—Those *uncommanded*, absurd austerities of the Romish profession. *South*.

* **UNCOMMON**. *adj.* Not frequent; rare; not often found or known.—Some of them are *uncommon*. *Add*.

* **UNCOMMONLY**. *adv.* Not frequently; to an uncommon degree.

* **UNCOMMONNESS**. *n. f.* Infrequency; rareness; rarity.—Our admiration of the antiquities about Naples and Rome, does not so much arise out of their greatness as *uncommonness*. *Add*.

* **UNCOMMUNICATED**. *adj.* Not communicated.—Whatsoever is natural to deity, the same remaineth in Christ *uncommunicated* unto his manhood. *Hooker*.

* **UNCOMPACT**. *adj.* Not compact; not closely cohering.—How could a liquid, that lay hardening by degrees, settle in such a furrowed, *uncompact* surface? *Add*.

* **UNCOMPANIED**. *adj.* Having no companion.—Thence she fled, *uncompained*, unsought. *Fairfax*.

* **UNCOMPASSIONATE**. *adj.* Having no pity.—Her *uncompassionate* fire. *Shak*.—Drowned in the *uncompassionate* surges. *Sandys*.—In *uncompassionate* anger do not so. *Milt*.

* **UNCOMPELLED**. *adj.* Free from compulsion.—The amorous needle, once join'd to the loadstone, would never, *uncompelled*, forsake the enchanting mineral. *Boyle*.—Nor, *uncompell'd*, the dangerous truth betray. *Pope*.

* **UNCOMPLAISANT**. *adj.* Not civil; not obliging.—A natural roughness makes a man *uncomplaisant* to others. *Locke*.

* **UNCOMPLEAT**. *adj.* Not perfect; unfinished.—The *uncompleat* and unfinished parts of the fable. *Pope*.

* **UNCOMPOUNDED**. *adj.* 1. Simple; not mixed.—*Uncompounded* matter. *Newt*.—Your *uncompounded* atoms. *Blackm*. 2. Simple; not intricate.—The substance of the faith was comprised in that *uncompounded* style. *Hamn*.

* **UNCOMPREHENSIVE**. *adj.* 1. Unable to comprehend. 2. In *Shakespeare* it seems to signify *incomprehensible*.—

The providence, that's in a watchful state,
Knows almost every grain of Pluto's gold;
Finds bottom in th' *uncomprehensive* deep. *Shak*.

* **UNCOMPRESSED**. *adj.* Free from compression.—Full of *uncompressed* air. *Boyle*.

* **UNCONCEIVABLE**. *adj.* Not to be understood; not to be comprehended by the mind.—Obscure and *unconceivable*. *Locke*.—Small to an *unconceivable* degree. *Blackm*.

* **UNCONCEIVABLENESS**. *n. f.* Incomprehensibility.—The *unconceivableness* of something they find in one, throws men violently into the contrary hypothesis, though altogether as unintelligible. *Locke*.

* **UNCONCEIVED**. *adj.* Not thought; not imagined.—Vast is my theme, yet *unconceived*. *Creech*.

* **UNCONCERN**. *n. f.* Negligence; want of interest; freedom from anxiety; freedom from perturbation.—The want of judgment in friends, and the *unconcern* of different persons. *Swift*.

* **UNCONCERNED**. *adj.* 1. Having no interest.—*Unconcerned* in the changes of the world. *Tayl*.—The evidence of *unconcerned* senses. *Glanv*.—In matters, where we are wholly *unconcerned*. *Swift*. 2. Not anxious; not disturbed; not affected.—Before the thing it has *with* in *Milton*, for in *Dryden*, and *at* in *Rogers*.—

See the morn,
All *unconcerned* with our unrest, begins
Her rosy progress smiling. *Milton*.

—Can I be *unconcerned*? *Denb*.—And *unconcern'd* for all she felt before. *Dryd*.—Happy mortals *unconcern'd*

concern'd for more. *Dryd.*—We shall be easy and and *unconcern'd* at all the accidents of the way. *Rogers.*

* **UNCONCERNEDLY.** *adv.* Without interest or affection; without anxiety; without perturbation.—So *unconcernedly* can relate our woes. *Denh.*—And *unconcern'dly* cast his eyes around. *Dryd.*—Is heaven to be parted with so *unconcernedly*? *Bentley.*

* **UNCONCERNEDNESS.** *n. f.* Freedom from anxiety or perturbation.—No man, having done a kindness to another, would think himself justly dealt with, in a total neglect, and *unconcernedness* of the person who had received that kindness. *South.*

* **UNCONCERNING.** *adj.* Not interesting; not affecting; not belonging to one.—Things *unconcerning* to us. *Decay of Piety.*—So many *unconcerning* parts of knowledge. *Addison.*

* **UNCONCERNMENT.** *n. f.* The state of having no share.—An happy *unconcernment* in those legal murders. *South.*

* **UNCONCLUDENT.** } *adj.* Not decisive;

* **UNCONCLUDING.** } inferring no plain or certain conclusion or consequence.—Our arguments are inevident and *unconcludent*. *Hale.*—False and *unconcluding* reasonings. *Locke.*

* **UNCONCLUDINGNESS.** *n. f.* Quality of being unconcluding.—The unaccuracy and *unconcludingness* of the analytical experiments. *Boyle.*

* **UNCONCOCTED.** *adj.* Not digested; not matured.—We swallow cherry-stones, but void them *unconcocted*. *Brown.*—An *unconcocted*, evanid meteor. *Glanv.*

Where all th' amazing fireworks of the sky,
In *uncocted* seeds fermenting lie. *Blackmore.*

* **UNCONDEMNED.** *adj.* Not condemned. A familiar and *uncondemned* practice. *Locke.*

* **UNCONDITIONAL.** *adj.* Absolute; not limited by any terms.—Bind not thy sentence *unconditional*. *Dryd.*—An absolute and *unconditional* power. *Ayliffe.*

* **UNCONFINABLE.** *adj.* Unbounded.—Why, thou *unconfusable* baseness, it is as much as I can do to keep mine honour. *Shak.*

* **UNCONFINED.** *adj.* 1. Free from restraint.—That shews thou art *unconfined*. *Shak.*—The expression is more easy when *unconfined* by numbers. *Dryden.*—Poets, a race long *unconfined* and free. *Pope.* 2. Having no limits; unbounded.—Light, the same sufficient and *unconfined* good, whether ten thousand enjoy the benefit of it, or but one. *Spe3.*—Blest with a taste exact, yet *unconfined*. *Pope.*

* **UNCONFIRMED.** *adj.* 1. Not fortified by resolution; not strengthened; raw; weak.—In th' *unconfirm'd* troops, much fear did breed. *Dan.* 2. Not strengthened by additional testimony.—Nor was long
His witness *unconfirm'd*. *Milton.*

3. Not settled in the church by the rite of confirmation.

* **UNCONFORM.** *adj.* Unlike; dissimilar; not analogous.—Not *unconform* to other shining globes. *Milton.*

* **UNCONFORMABLE.** *adj.* Inconsistent; not conforming. That we may hold any thing
Vol. XXII. PART II.

unconformable. *Hooker.*—Moral evil is an *action* *unconformable* to the rule of our duty. *Watts.*

* **UNCONFORMITY.** *n. f.* Incongruity; inconsistency.—The moral goodness or evil of men's actions, consists in their conformity or *unconformity* to right reason. *South.*

* **UNCONFUSED.** *adj.* Distinct; free from confusion.—It is more distinct and *unconfused* than the sensitive memory. *Hale.*—Ideas *unconfused*. *Locke.*

* **UNCONFUSEDLY.** *adv.* Without confusion.—Distinctly and *unconfusedly*. *Locke.*

* **UNCONFUTABLE.** *adj.* Irrefragable; not to be convicted of error.—One argument they boasted of as *unconfutable*. *Spratt.*

* **UNCONGEALED.** *adj.* Not concentered by cold.—The aqueous parts will freeze, but the spirit will be found *uncongealed* in the center. *Brown.*

* **UNCONJUGAL.** *adj.* Not consistent with matrimonial faith; not bestitting a wife or husband.—Of falsehood most *unconjugal* traduc'd. *Mils.*

* **UNCONNECTED.** *adj.* Not coherent; not joined by proper transitions or dependence of parts; lax; loose; vague.—*Unconnected* discourse. *Watts.*

* **UNCONNEIVING.** *adj.* Not forbearing penal notice.—

To that hideous place not so confined,
By rigour *unconneiving*. *Milton.*

* **UNCONQUERABLE.** *adj.* Not to be subdued; insuperable; not to be overcome; invincible.—His *unconquerable* arms. *Dryd.*—Spadillo, first *unconquerable* lord. *Pope.*

* **UNCONQUERABLY.** *adv.* Invincibly; insuperably.—Wild, furious herds, *unconquerably* strong. *Pope.*

* **UNCONQUERED.** *adj.* 1. Not subdued; not overcome.—And still *unconquer'd* by my foes. *Denham.*—*Unconquer'd* yet. *Dryd.* 2. Insuperable; invincible.—*Unconquered* courage. *Sid.*—That wife Minerva wore, *unconquer'd* virgin. *Milton.*

* **UNCONSCIONABLE.** *adj.* 1. Exceeding the limits of any just claim or expectation.—An *unconscionable* request. *L'Estr.* 2. Forming unreasonable expectations.—You cannot be so *unconscionable*. *Dryden.* 3. Enormous; vast. A low word.—Stalking with less *unconscionable* strides. *Milt.* 4. Not guided or influenced by conscience.—How infamous is the false, fraudulent, and *unconscionable*. *South.*

* **UNCONSCIONABLENESS.** *n. f.* Unreasonableness of hope or claim.

* **UNCONSCIONABLY.** *adv.* Unreasonably.—Be used so *unconscionably* hard. *Hudib.*—*Unconscionably* dear. *Dryd.*

* **UNCONSCIOUS.** *adj.* 1. Having no mental perception.—*Unconscious* causes. *Blackm.* 2. Unacquainted; unknowing.—Untam'd, *unconscious* of the galling yoke. *Pope.*

* **UNCONSECRATED.** *adj.* Not sacred; not dedicated; not devoted.—The sin of Israel had even *unconsecrated* and profaned that sacred edifice. *South.*

* **UNCONSENTED.** *adj.* Not yielded.—The weaknesses of our nature, *unconsented* to, will not be imputed to us. *Wake.*

* **UNCONSIDERED.** *adj.* Not considered;
N n n n n o n

not attended to.—Not *unconsidered* leave your honour *Shak.*—It will not be *unconsidered*. *Brown.*

• **UNCONSONANT.** *adj.* Incongruous; unfit; inconsistent.—It seemeth a thing *unconsonant*. *Hooker.*

• **UNCONSTANT.** *adj.* [*inconstant*, Fr. *inconstant*, Latin.] Fickle; not ready; changeable; mutable.—More *unconstant* than the wind. *Shak.* Th' *unconstant* *Sciva, May.*

• **UNCONSTRAINED.** *adj.* Free from compulsion.—Will your, with free and *unconstrained* soul. *Shak.*—A free and *unconstrained* will. *Ral.*

His highness is return'd.—

And *unconstrain'd*. *Denham.*
—We *unconstrain'd*, what he commands us, do. *Dryden.*

• **UNCONSTRAINEDLY.** *adv.* Without force suffered.—Such a patron has frankly, generously, and *unconstrainedly* relieved me. *South.*

• **UNCONSTRAINT.** *n. f.* Freedom from constraint; ease.—That air of freedom and *unconstrained*. *Felton.*

• **UNCONSULTING.** *adj.* [*inconsultus*, Lat.] Heady; rash; improvident; imprudent.—*Unconsulting* affection. *Sidney.*

• **UNCONSUMED.** *adj.* Not wasted; not destroyed by any wasting power.—With ever-burning sulphur *unconsumed*. *Milton.*—A power to remain in the fire *unconsumed*.

• **UNCONSUMMATE.** *adj.* Not consummated.—He left his house betroth'd, and *unconsummate* night. *Dryden.*

• **UNCONTEMNED.** *adj.* Not despised.—Which of the peers
Have *uncontemn'd* gone by him. *Shak.*

• **UNCONTENTED.** *adj.* Not contented; not satisfied.—Do lead this *uncontented* gift away. *Dryd.*

• **UNCONTENTINGNESS.** *n. f.* Want of power to satisfy.—The *uncontentingness* of all other goods. *Egyle.*

• **UNCONTESTABLE.** *adj.* Indisputable; not controvertible.—*Uncontestible* evidence of truth. *Locke.*

• **UNCONTESTED.** *adj.* Not disputed; evident.—'Tis by experience *uncontested* found. *Blackm.*

• **UNCONTRITE.** *adj.* Not religiously penitent.—An *uncontrite* sinner. *Hamm.*

• **UNCONTROVERTED.** *adj.* Not disputed; not liable to debate.—The *uncontroverted* certainty of mathematical science. *Gl'v.*

• **UNCONTROULABLE.** *adj.* 1. Resistless; powerful beyond opposition.—His *uncontrovable* intent. *Milton.* 2. Indisputable; irrefragable.—The king's *uncontrovable* title to England. *Hayw.*—An *uncontrovable* maxim. *Swift.*

• **UNCONTROULABLY.** *adv.* 1. Without possibility of opposition. 2. Without danger of refutation.—*Uncontrovably*, and under general consent. *Brown.*—They might safely and *uncontrovably* pretend it greater or less. *South.*

• **UNCONTROULED.** 1. Unrefined; unopposed; not to be overruled.—

Should I try the *uncontroled* worth

Of this pure cause. *Milton.*

—Extends thy *uncontrold*, and boundless reign. *Dryd.*—The British navy, *uncontrold*. *Phil.* 2.

Not convinced; not refuted.—That Julius Cæsar was so born, is an *uncontroled* report. *Hayward.*

• **UNCONTROLEDLY.** *adv.* Without controul; without opposition.—Honour it commands *uncontroledly*. *Decay of Piety.*

• **UNCONVERSABLE.** *adj.* Not suitable to conversation; not social.—Morose, *unconversible* qualities. *Rogers.*

• **UNCONVERTED.** *adj.* 1. Not persuaded of the truth of Christianity.—Nations, yet *unconverted*. *Hooker.*—The *unconverted* heathens. *Addis.*—The guilt and misery of their former *unconverted* estate. *Rogers.* 2. Not religious; not yet induced to live a holy life.—Thus Baxter wrote a Call to the *Unconverted*.

• **UNCONVINCED.** *adj.* Not convinced.—The ignorant and *unconvinced*. *Locke.*

• **TO UNCORD.** *v. a.* To loose a thing bound with cords.

• **UNCORRECTED.** *adj.* Inaccurate; not polished to exactness.—It comes out from the first draught, and *uncorrected*. *Dryd.*

• **UNCORRUPTED.** *adj.* Not vitiated; not depraved.—But from the *uncorrupted* blood of kings. *Rosom.*—No rule but *uncorrupted* reason knew. *Dryd.*—I wish we had more of them *uncorrupted*. *Locke.*

• **UNCORRUPTNESS.** *n. f.* Integrity; uprightness.—In doctrine, shew *uncorruptness*, gravity, sincerity. *Tit. ii. 7.*

• **TO UNCOVER.** *v. a.* 1. To divest of a covering.—*Uncover* your bed. *Harvey.*—The very instant it is *uncovered*. *Locke.* 2. To deprive of clothes.—Thou wert better in thy grave, than to answer, with thy *uncovered* body, this extremity of the skies. *Shak.* 3. To strip of the roof.—Porches and schools—*Uncover'd*. *Prior.* 4. To shew openly; to strip of veil, or concealment.—He cover'd; but his robe

Uncover'd more. *Milton.*

—There will come some day to *uncover* every soul of us. *Pope.* 5. To bare the head, as in the presence of a superior.—Than stand *uncover'd* to the vulgar groom. *Shak.*

• **UNCOUNSELLABLE.** *adj.* Not to be advised.—It would have been *uncounsellable* to have marched. *Clarendon.*

• **UNCOUNTABLE.** *adj.* Innumerable.—Those *uncountable*, glorious bodies the stars. *Ral.*

• **UNCOUNTERFEIT.** *adj.* Genuine; not spurious.—Not only *uncounterfeit*, but most fervent. *Spratt.*

• **TO UNCOUPLE.** *v. a.* To loose dogs from their couples.—*Uncouple* in the western valley, go. *Shak.*—*Uncouple* here, and let us make a bay. *Shak.*—Th' *uncoupled* hounds began the chase. *Dryd.*

• **UNCOURTEOUS.** *adj.* Uncivil; unpollite.—In behaviour never *uncourteous*. *Sidney.*

• **UNCOURTEOUSLY.** *adv.* Uncivilly; unpollitely.—Though somewhat merrily, yet *uncourteously* he hailed. *Alcham.*

• **UNCOURTLINESS.** *n. f.* Unsuitableness of manners to a court; inelegance.—The *uncourtliness* of their phrases. *Addison.*

• **UNCOURTLY.**

* **UNCOURTLY**. *adj.* Inelegant of manners; uncivil.—The lord treasurer hath been so *uncourtly* as to stop it. *Swift*.

* **UNCOUTH**. *adj.* [*uncuth*, Saxon.] Odd; strange; unusual.—A very *uncouth* fight was to behold. *Spens*.—*Uncouth* in arms yclad and strange disguise. *Fairfax*.—I am surprised with an *uncouth* fear. *Shak*.—This *uncouth* dream of evil sprung, I fear. *Milton*.—Bound on a voyage *uncouth* and obscure. *Milton*.—It was to *uncouth* a fight for a fox to appear without a tail. *L'Esran*.—*Uncouth*, perhaps unlawful to reveal. *Dryden*.—The meaning of the author seems harsh and *uncouth* to me. *Locke*.—*Uncouth* and rugged. *Baker*.

* **UNCOUTHLY**. *adv.* Oddly; strangely. Venetians do not more *uncouthly* ride. *Dryd*.

* **UNCOUTHNESS**. *n. f.* Oddness; strangeness.—The disadvantage of *uncouthness*. *Decay*.

* To **UNCREATE**. *v. a.* To annihilate; to reduce to nothing; to deprive of existence.—Left what I made I *uncreate*. *Carver*.—Who can *uncreate* thee thou shalt know. *Mil*.—Light dies before her *uncreating* word. *Pope*.

* **UNCREATED**. *adj.* 1. Not yet created.—Misery *uncreated* till the crime. *Mil*. 2. [*Incréé*, Fr.] Not produced by creation.—What can a being *uncreated* bound. *Black*.—The next paragraph proves that the idea we have of God is God himself; it being something, as he says, *uncreated*. *Locke*.

* **UNCREDITABLENESS**. *n. f.* Want of reputation.—To all other dissuaves we may add the *uncreditableness*. *Decay of Piety*.

* **UNCROPPED**. *adj.* Not cropped; not gathered.—

Thy abundance wants Partakers, and *uncropp'd* falls to the ground. *Mil*.

* **UNCROSSED**. *adj.* Uncancelled.—

Such gain the cap of him that makes them fine, Yet keeps his book *uncross'd*. *Shak*.

* **UNCROUDED**. *adj.* Not straitened by want of room.—

An amphitheatre,

That held *uncrouded* nations in its womb. *Add*.

* To **UNCROWN**. *v. a.* To deprive of a crown; to deprive of sovereignty.—And therefore I'll *uncrown* him ere't be long. *Shak*.—See a sacred king *uncrown'd*. *Dryden*.

(1.) * **UNCTION**. *n. f.* [*onction*, Fr.] 1. The act of anointing.—The *unction* of the tabernacle. *Hooker*. 2. Unguent; ointment.—The king himself the sacred *unction* made. *Dryd*. 3. The act of anointing medically.—They should use bathing in hot water, rather than *unctions*. *Arbut*. 4. Any thing softening or lenitive.—Lay not that flattering *unction* to your soul. *Shak*. 5. The rite of anointing in the last hours.—Extreme *unction*, administered as the dying man's viaticum. *Hamm*. 6. Any thing that excites piety and devotion; that which melts to devotion.

(2.) **UNCTION**, in matters of religion, is used for the character conferred on sacred things by anointing them with oil. *Unctions* were very frequent among the Hebrews. They anointed both their kings and high priests at the ceremony of their inauguration. They also anointed the sacred vessels of the tabernacle and temple, to sanctify and consecrate them to the service of God. The *unction* of kings is supposed to be a ceremony in-

troduced very late among the Christian princes. It is said that none of the emperors were ever anointed before Justinian or Justin. The emperors of Germany took the practice from those of the eastern empire: king Pepin of France was the first who received the *unction*. In the ancient Christian church, *unction* always accompanied the ceremonies of baptism and confirmation. Extreme *unction*, or the anointing persons in the article of death, was also practised by the ancient Christians, in compliance with the precept of St James, chap. v. 14th and 15th verses; and this extreme *unction* the Romish church has advanced to the dignity of a sacrament. It is administered to none but such as are affected with some mortal disease, or in a decrepit age. It is refused to impenitent persons, as also to criminals. The parts to be anointed are, the eyes, the ears, the nostrils, the mouth, the hands, the feet, and the reins. The laity are anointed in the palms of the hands, but priests on the back of it; because the palms of their hands have been already consecrated by ordination. The oil with which the sick person is anointed represents the grace of God, which is poured down into the soul, and the prayer used at the time of anointing expresses the remission of sins thereby granted to the sick person; for the prayer is this:—"By this holy *unction*, and his own most pious mercy, may the Almighty God forgive thee whatever sins thou hast committed by the fight," when the eyes are anointed; by the bearing, when the ears are anointed; and so of the other senses.

* **UNCTUOSITY**. *n. f.* [from *unctuosus*.] Fatness; oiliness.—Fulgurous exhalations contain an *unctuosity*. *Brown*.

* **UNCTUOUS**. *adj.* Fat; clammy; oily.—And morsels *unctuous* grease his pure mind. *Shak*.—Compact of *unctuous* vapour. *Mil*.—So fat and *unctuous*. *Heylyn*.—The trees were *unctuous* fir, and mountain ash. *Dryden*.—Whether they *unctuous* exhalations are. *Dryden*.—Dilating, and with *unctuous* vapour fed. *Philips*.—Fat, sulphureous, *unctuous* bodies. *Newton*.

* **UNCTUOUSNESS**. *n. s.* Fatness; oiliness; clamminess; greasiness.—A great degree of *unctuousness*. *Boyle*.

* **UNCUCKOLDED**. *adj.* Not made a cuckold.—It is a deadly sorrow to behold a soul *knave uncuckolded*. *Shak*.

* **UNCULLED**. *adj.* Not gathered.—First-fruits, the green ear, and the yellow sheaf, *Uncull'd*, as he came to hand. *Mil*.

* **UNCULPABLE**. *adj.* Not blameable.—They are in that respect *unculpable*. *Hooker*.

* **UNCULTIVATED**. *adj.* [*incultus*, Latin.] 1. Not cultivated; not improved by tillage.—Our use *uncultivated* lay. *Dryd*.—Common and *uncultivated*. *Locke*. 2. Not instructed; not civilized.—Too grave for their *uncultivated* age. *Rosc*.—*Uncultivated* nature left to itself. *Locke*.

* **UNCUMBERED**. *adj.* Not burthened; not embarrassed.—Lord of yourself, *uncumber'd* with a wife. *Dryd*.

* **UNCURBABLE**. *adj.* That cannot be curbed or checked. Not used.—So much *uncurbable* her garboyles. *Shak*.

* **UNCURBED**. *adj.* Licentious; not restrained.—With frank and with *uncurbed* plainness. *Shak*.

(1.) * *To UNCURL. v. a.* To loose from ringlets, or convolutions.—

There stands a rock, the raging billows roar
Above his head in storms, but when 'tis clear,
Uncurl their ridgy backs, and at his feet appear.

Dryd.

—He sheaths his paws, *uncurls* his angry mane.
Dryd.—And snakes *uncurl'd* hang list'ning round
their heads. *Pope.*

(2.) * *To UNCURL. v. n.* To fall from the ringlets.—My fleece of woolly hair now *uncurls*.
Shak.

* *UNCURLED. adj.* Not collected into ringlets.—With honest faces, though *uncurl'd* hair.
Dryd.—Curl'd or *uncurl'd* since locks will turn to grey. *Pope.*

* *UNCURRENT. adj.* Not current; not passing in common payment.—A piece of *uncurrent* gold. *Shak.*—Are shuffled off with such *uncurrent* pay. *Shak.*

* *To UNCURSE. v. a.* To free from any execration.—*Uncurse* their souls; their peace is made. *Shak.*

* *UNCURST. adj.* Not execrated.—Unthreatened, *uncurs'd* by any language or secret imprecation of mine. *K. Charles.*—Heav'n sure has kept this spot of earth *uncurst*. *Waller.*

* *UNCUT. adj.* Not cut.—And trees *uncut* fall for his fun'ral pile. *Waller.*—A nail *uncut*, and head uncomb'd the loves. *Young.*

* *To UNDA. v. a.* To open; to free from the restraint of mounds.—*Undams* his wat'ry stores.
Dryd.

* *UNDAMAGED. adj.* Not made worse; not impaired.—
Plants will frequent changes try,

Undamag'd.

Philips.

* *UNDAUNTED. adj.* Unsubdued by fear; not depressed.—

Bring forth men children only;

For thy *undaunted* metal should compose

Nothing but males.

Shak.

—And in his burning ship *undaunted* fought
Dryd.—*Undaunted* worth, inviolable truth. *Dryd.*

* *UNDAUNTEDNESS. n. f.* Boldness; bravery; intrepidity.—Luther shewed a particular *undauntedness* in the cause of truth. *Atterb.*—*Undauntedness* under dangers. *Pope.*

* *UNDAUNTEDLY. adv.* Boldly; intrepidly; without fear.—It shall bid his soul go out of his body *undauntedly*. *South.*

* *UNDAZZLED. adj.* Not dimmed, or confused by splendor.—

Here matter new to gaze the devil met

Undazzled.

Milt.

—*Undazzled* and untroubled eyes. *Boyle.*

* *To UNDEAF. v. a.* To free from deafness.

My death's sad tale may yet *undeaf* his ear.

Shakspere.

* *UNDEBAUCHED. adj.* Not corrupted by debauchery.—Her sons were *undebauch'd*, and therefore strong. *Dryden.*

* *UNDECAGON. n. f.* [from *undecim*, Latin, and *gon*, Gr.] A figure of eleven angles or sides.

* *UNDECAYING. adj.* Not suffering diminution or declension.—Their parents *undecaying* strength declare. *Blackmore.*

* *UNDECAYED. adj.* Not liable to be di-

1

minished or impaired.—How fierce in fight, with courage *undecay'd*. *Dryd.*—

If in the melancholy shades below,

The flames of friends and lovers cease to glow;

Yet mine shall sacred last; mine *undecay'd*.

Burn on thro' life, and animate my shade. *Pope.*

* *To UNDECEIVE. v. a.* To set free from the influence of a fallacy.—

All men will try, and hope to write as well,
And, not without much pains, be *undeciev'd*.

Roscommon.

—And *undecieve* the long abused age. *Denham.*
Our coming judgments do in part *undecieve* us.
Glavv.—Christ saves the world by *undecieving* it. *South.*

* *UNDECEIVABLE. adj.* Not liable to deceive, or be deceived.—An *undecivable* calculation. *Holder.*

* *UNDECEIVED. adj.* Not cheated; not imposed on.—Secure repose, and kindness *undeciev'd*. *Dryd.*

UNDECEMVir, a magistrate among the ancient Athenians, who had 10 other colleagues or associates joined with him in the same commission. They took care of the apprehending of criminals, secured them in the hands of justice, and when they were condemned, took them again into custody, that the sentence might be executed on them. They were chosen by the tribes, each tribe naming its own; and as the number of the tribes after Calisthenes was but 10, which made 10 members, a scribe or sotary was added, which made the number 11.

* *UNDECEIDED. adj.* Not determined; not settled.—Twenty things *undecided* by the express word of God. *Hooker.*—'Tis *undecided* by the men of skill. *Roscommon.*—Aristotle has left *undecided* the duration of the action. *Dryd.*—Long *undecided* lasts the airy strife. *Philips.*

* *To UNDECK. v. a.* To deprive of ornaments.—T' *undeck* the pompous body of a king. *Shak.*

* *UNDECKED. adj.* Not adorned; not embellished.—Eve has *undeck'd* save with herself. *Milton.*

* *UNDECISIVE. adj.* Not decisive; not conclusive.—An *undecisive* experiment. *Glavv.*

* *UNDECLINED. adj.* 1. Not grammatically varied by termination. 2. Not deviating; not turned from the right way.—His *undeclined* ways precisely kept. *Sandys.*

* *UNDEDICATED. adj.* 1. Not consecrated; not devoted. 2. Not inscribed to a patron.—I should let this book come forth *undedicated*. *Boyle.*

* *UNDEEDED. adj.* Not signalized by action.—I sheath my sword *undeeded*. *Shak.*

* *UNDEFACED. adj.* Not deprived of its form; not disfigured.—Though torn by mortars, stand yet *undefac'd*. *Gravv.*

* *UNDEFEASIBLE. adj.* Not defeasible; not to be vacated or annulled.

* *UNDEFILED. adj.* Not polluted; not vitiated; not corrupted.—*Undefil'd* rewards. *Wisdan.* iv. 3.—Whose bed is *undefil'd*. *Milton.*—Unmix'd with foreign filth, and *undefil'd*. *Dryd.*

* *UNDEFINED. adj.* Not circumscribed, or explained by a definition.—Legions of obscure, *undefined* words. *Locke.*

* *UNDEFINABLE. adj.* Not to be marked out

ut; or circumscribed by a definition.—Those sounds to us are *undefinable*. *Grew*.—Simple ideas are *undefinable*. *Locke*.

* **UNDEFORMED**. *adj.* Not deformed; not misfigured.—*Undeform'd* by battles. *Pope*.

* **UNDEFIED**. *adj.* Not set at defiance; not challenged.—False traitor, thou to strike foe *undefied*. *Spenser*.—He basely threw it at him, *undefy'd*. *Dryd*.

* **UNDELIBERATED**. *adj.* Not carefully considered.—The prince's *undeliberated* throwing himself into that engagement, transported him with passion. *Clarendon*.

* **UNDELIGHTED**. *adj.* Not pleased; not touched with pleasure.—

The fiend saw, *undelighted*, all delight. *Miln*.

* **UNDELIGHTFUL**. *adj.* Not giving pleasure.—*Undelightful* condition of life. *Clarendon*.

* **UNDEMOLISHED**. *adj.* Not razed; not thrown down.—She *undemolish'd* stood. *Phil*.—They stood by, and suffered Dunkirk to lie *undemolish'd*. *Swift*.

* **UNDEMONSTRABLE**. *adj.* Not capable of fuller evidence.—Certain, common, and *undemonstrable* principles. *Hooker*.

* **UNDENIABLE**. *adj.* Such as cannot be gaind.—An *undeniable* verity. *Sidney*.—He supposed the principles *undeniable*. *White*.—We have a plain and *undeniable* certainty. *Woodward*.

* **UNDENIABLY**. *adv.* So plainly, as to admit no contradiction.—It is *undeniably* founded in holy writ. *Hammond*.—This account is *undeniably* rejected by the moderns. *Brown*.—This *undeniably* follows. *Dryden*.

* **UNDEPLORED**. *adj.* Not lamented.—Rife, wretched widow! rife; nor *undeplored*. Permit my ghost to pass this Stygian ford. *Dryd*.

* **UNDEPRAVED**. *adj.* Not corrupted.—Our *undeprecated* natures. *Glanv*.

* **UNDEPRIVED**. *adj.* Not divested by authority; not stripped of any possession.—He, *undepri'd*, his benefice forfook. *Dryd*.

(1.) * **UNDER**. *preposition*. [*under*, Gothick; *under*, Saxon; *onder*, Dutch.] 1. In a state of subjection to.—The world was *under* Jove. *Dryd*.—*Under* the determination of some other than himself. *Locke*. 2. In the state of pupillage to.—

To those that live—*Under* thy care. *Dentb*.

—The princes made such improvements *under* him. *Guard*. 3. Beneath; so as to be covered, or hidden; not over; not above.—Bottles let down into wells *under* water. *Bacon*.—Clapp'd on ship-board *under* hatches. *Fell*.—If it had not been *under* water. *Burn*.—Thy bees lodge *under* covert of the wind. *Dryd*.—Many a good poetick vein is buried *under* a trade. *Locke*. 4. Below in place; not above. This is the sense of *under* sail; that is, *having the sails* spread aloft.—As they went *under* sail by him. *Sidn*.—When the false Trojan *under* sail was seen. *Shak*.—Missetoe hath been found to put forth *under* the boughs. *Bac*.—Be gather'd now, ye waters, *under* heav'n. *Milt*. 5. In a less degree than.—Medicines take effect, sometimes *under*, and sometimes above, the natural proportion of their virtue. *Hook*.—If you write in your strength, you stand revealed at first; and should you write *under* it, you cannot avoid some peculiar graces. *Dryd*. 6. For less than.—We

are thrifty enough not to part with any thing serviceable, *under* a good consideration. *Ray*. 7. Less than; below.—Man, once fallen, was not to be reformed by any thing *under* a new creation. *South*.—These men seldom talk *under* certainty and demonstration. *Coll*.—There are several hundred parishes in England *under* twenty pounds a year, and many *under* ten. *Swift*. 8. By the show of.—He does it *under* name of perfect love. *Shak*.—Evaded *under* some plausible distinction. *Baker*. 9. With less than.—Several young men could never leave the pulpit *under* half a dozen conceits. *Swift*. 10. In the state of inferiority to; noting rank or order of precedence.—It was too great an honour for any man *under* a duke. *Add*. 11. In a state of being loaded with.—To groan and sweat *under* the business. *Shak*.—Sinking *under* burthens. *Shak*. 12. In a state of oppression by, or subjection to.—Comfort *under* the great pressures of this life. *Till*.—*Under* the present pain, we find not ourselves capable of the least degree of happiness. *Locke*.—*Under* the extremity of torture. *Coll*.—No longer *under* false reproaches grieve. *Addis*. 13. In a state in which one is seized or overborn.—The prince and prince's must be *under* no less amazement. *Pope*. 14. In a state of being liable to, or limited by.—*Under* pain of greater displeasure. *Hooker*.—The greater part of mankind is *under* necessity of seeing with other men's eyes. *South*.—Conditions *under* which they enter upon their authority. *Locke*.—So great a proportion of both sexes is tied *under* such vows of chastity. *Add*.—Things of another world are *under* the disadvantage of being distant. *Atterb*. 15. In a state of depression, or dejection by; in a state of inferiority.—

Under him,

My genius is rebuk'd as Antony's was by Cæsar. *Shak*.

16. In the state of bearing, or being known by.—This fashion, *under* the name of Puritan. *Swift*.—Coining with less silver in it, *under* the same denomination. *Locke*. 17. In the state of.—*Under* the present disposition of things. *Swift*. 18. Not having reached or arrived to; noting time.—Three sons, he dying, left *under* age. *Spens*. 19. Represented by.—Morpheus is represented *under* the figure of a boy asleep. *Addis*. 20. In a state of protection.—*Under* favour, there are other materials for a commonwealth. *Coll*. 21. With respect to; referred to.—Mr Duke may be mentioned *under* the double capacity of a poet and a divine. *Fell*.—*Under* this head may come in the several wars. *Lefley*. 22. Attested by.—Left us an evidence *under* his own hand. *Locke*. 23. Subjected to; being the subject of.—Present them all *under* one view. *Burn*.—The narrow mind of man, not being capable of having many ideas *under* view at once. *Locke*.—The thing *under* proof is not capable of demonstration. *Locke*.—The subject *under* consideration. *Locke*.—That poem, which lay so long *under* Virgil's correction. *Addis*. 24. In the next stage of subordination.—This is the only safe-guard, *under* the spirit of God. *Locke*. 25. In a state of relation that claims protection. 26. It is generally opposed to *above* or *over*.

(1.) * **UNDER**. *adv.* 1. In a state of subjection, or inferiority.—Ye purpose to keep *under* the children

dren of Judah. *2 Chron.* 2. Below; not above.
3. Less; opposed to *over* or *more*.—Without alteration, *under* or *over*. *Addis.* 4. It has a signification resembling that of an adjective; lower in place; inferior; subject; subordinate. But, perhaps, in this sense it should be considered as united to the following word.—

With the spleen

Of all the *under* fiends.

Shak.

5. It is much used in composition, in several senses, which the following examples will explain.

* **UNDERACTION.** *n. f.* Subordinate action; action not essential to the main story.—Episodes, or *underactions*. *Dryd.*

* **To UNDERBEAR.** *v. a.* [*under* and *bear*.]

1. To support; to endure.—Patient *underbearing* of his fortune. *Shak.* 2. To line; to guard. Out of use.—Cloth of gold, *underborne* with a bluish tinsel. *Shak.*

* **UNDERBEARER.** *n. f.* [*under* and *bearer*.] In funerals, those that sustain the weight of the body, distinct from those who are bearers of ceremony, and only hold up the pall.

* **To UNDERBID.** *v. a.* [*under* and *bid*.] To offer for any thing less than it is worth.

To UNDERBID. *v. a.* To bind below.

* **UNDERCLERK.** *n. f.* [*under* and *clerk*.] A clerk subordinate to the principal clerk.—In the treasury he was an *underclerk*. *Swift.*

* **To UNDERDO.** *v. n.* [*under* and *do*.] 1. To act below one's abilities.—You overact, when you should *underdo*. *Ben Jon.* 2. To do less than is requisite.—Nature much oftener overdoes than *underdoes*. *Grew.*

UNDERESCHEATOR. *n. f.* A subordinate escheator. *Ash.*

* **UNDERFACTION.** *n. f.* [*under* and *faction*.] Subordinate faction; subdivision of a faction.—Christianity loses by contests of *underfactions*. *Deq. of Piety.*

* **UNDERFELLOW.** *n. f.* [*under* and *fellow*.] A mean man; a sorry wretch.—A principal officer, with no more civility, though with much more business, than those *underfellows* had shewed, put interrogatories unto him. *Sidney.*

* **UNDERFILLING.** *n. f.* [*under* and *fill*.] Lower part of an edifice.—First examine the bed of earth upon which we will build, and then the *underfillings*, or substructions, as the antients called it. *Wotton.*

* **To UNDERFONG.** *v. a.* [*under* and *fangan*, Saxon.] To take in hand. Obsolete.—

Thou, Menalcas, that by thy treachery

Didst *underfong* my lady to weke to light. *Spens.*

* **TO UNDERFURNISH.** *v. a.* [*under* and *furnish*.] To supply with less than enough.—Can we suppose God would *underfurnish* man for the state he designed him. *Collier.*

* **To UNDERGIRD.** *v. a.* [*under* and *gird*.] To bind below; to round the bottom.—They used helps, *undergirding* the ship. *ABs.*

* **To UNDERGO.** *v. a.* [*under* and *go*.] 1. To suffer; to sustain; to endure evil.—

With mind averse, be rather *underwent*

His people's will, than give his own consent.

Dryden.

2. To support; to hazard. Not in use.—To *undergo* with me an enterprize. *Shak.*—Having the chiefest actions *undergone*. *Daniel.* 3. To sustain, to be the bearer of; to possess. Not in use.—

Their virtues else be they as pure as grace;

As infinite as man may *undergo*. *Shak.*

4. To sustain; to endure without fainting.—As *undergoing* stomach. *Shak.* 5. To pass through.—Changes it would successively *undergo*. *Burns.*

—Bread will *undergo* an alteration that is merely the effect of heat. *Airhab.* 6. To be subject to.—Claudio *undergoes* my challenge. *Shak.*

* **UNDERGROUND.** *n. f.* [*under* and *ground*.] Subterraneous space.—A spirit rais'd from depth of *underground*. *Shak.*—From *underground*, the blood oozes he drains. *Milt.*

* **UNDERGROWTH.** *n. f.* [*under* and *growth*.] That which grows under the tall wood.—The *undergrowth* of shrubs. *Milton.*

(1.) * **UNDERHAND.** *adj.* Secret; clandestine; sly.—By *underhand* means. *Shak.*—My *underhand* detractors. *Addison.*

(1.) * **UNDERHAND.** *adv.* [*under* and *hand*.] 1. By means not apparent; secretly.—The church *underband*, through a kind of heavenly fraud, taketh therewith the souls of men. *Hooker.* 2. Clandestinely; with fraudulent secrecy.—She *underband* dealt with the principal men of that country. *Sidney.*—Can order matters *underband* to write ill against me. *Dryd.*—Such mean revenge, committed *underband*. *Dryden.*—Wood is still working *underband* to force his halfpence upon us. *Swift.*

Inflame the mutiny, and *underhand*

Blow up their discontents. *Addison.*

* **UNDERIVED.** *adj.* [*from derived*.] Not borrowed.—Ideas *underived* from the body. *Locke.*

* **UNDERLABOURER.** *n. f.* [*under* and *labourer*.] A subordinate workman.—Two thousand chosen men, besides many *underlabourers*. *Wilkins.*

* **To UNDERLAY.** *v. a.* [*under* and *lay*.] To strengthen by something laid under.

* **UNDERLEAF.** *n. f.* [*under* and *leaf*.] A species of apple.—Of the *underleaf* the cyder is best at two years. *Mortimer.*

* **To UNDERLINE.** *v. a.* [*under* and *line*.] 1. To mark with lines below the words. 2. To influence secretly.—By mere chance in appearance, though *underlined* with a providence, they had a full light of the infants. *Watson.*

* **UNDERLING.** *n. f.* [*from under*.] An inferior agent; a sorry, mean fellow.—Glad to be *underlings* to them they hated least. *Sidney.*—Strengthen divers of their *underlings* against them. *Spenser.*—We are *underlings*. *Shak.*—Yet every one shall make him *underling*. *Milt.*—The *underlings* at the post office. *Pope.*

* **To UNDERMINE.** *v. a.* [*under* and *mine*.] 1. To dig cavities under any thing, so that it may fall, or be blown up; to sap.—The church was *undermin'd* and then betray'd. *Denham.*—*Undermining* the foundation. *Pope.* 2. To excavate under.—A vast rock *undermin'd* from one end to the other. *Addis.* 3. To injure by clandestine means.—To *undermine* the royal sovereignty. *Sidney.*—Have hir'd me to *undermine* the dukes. *Shak.*—Allure or terrify, or *undermine*. *Milt.*—The *undermining*

erming smile becomes habitual. *Dryden*.—He could be warn'd who are like to *undermine* him, and who to serve him. *Löcke*.

* **UNDERMINER**. *n. f.* [from *undermine*.] 1. He that saps; he that digs away the supports. 2. A clandestine enemy.—Enemies and *underminers*. *Bacon*.—To pay my *underminers* in their coin. *Tilt*.—Disturbers and *underminers* of government. *South*.

* **UNDERMOST**. *adj.* [This is a kind of superlative, anomalously formed from *under*.] 1. Lowest in place.—The *undermost* stone. *Boyle*. 2. Lowest in state or condition.—The party that is *undermost*. *Addison*.—This was to last no longer than they were *undermost*. *Atterb.*

(1.) * **UNDERNEATH**. *adv.* [Compounded from *under* and *neath*, of which we still retain the comparative *netber*, but in an adverbial sense use *keneth*.] In the lower place; below; under; beneath.—With him I flew, and *underneath* beheld. *Milt.*—Above, about, or *underneath*. *Milton*.—Or fullen Mole that runneth *underneath*. *Milt.*—Howls horrible from *underneath*. *Dryden*.—It left a free passage *underneath*. *Addison*.

(2.) * **UNDERNEATH**. *prep.* Under.—Bruit's *underneath* the yoke of tyranny. *Shak.*—If *underneath* the standard of the French. *Shak.*—*Underneath* this stone doth lie. *B. Jonf.*—And nothing *underneath* the sun is new. *Sandys*.—Are *underneath* his wide dominion cast. *Dryden*.

* **UNDEROFFICER**. *n. f.* [under and officer.] An inferior officer; one in subordinate authority.—Execution committed by *underofficers*. *Ayliffe*.

* **UNDEROGATORY**. *adj.* Not derogatory.—Apprehensions *underogatory* from what we shall possess. *Boyle*.

* **UNDERPART**. *n. f.* [under and part.] Subordinate or essential part.—A tragedy should be lightened with *underparts* of mirth. *Dryden*.

* **TO UNDERPIN**. *v. a.* [under and pin.] To prop; to support.—Victors, to secure themselves against disputes of that kind, *underpin* their acquiescent *jure belli*. *Hale*.

* **UNDERPLOT**. *n. f.* [under and plot.] 1. A series of events proceeding colaterally with the main story of a play, and subservient to it.—The *underplot*, is subservient to the chief fable. *Dryd.* 2. A clandestine scheme.—He still suspects an *underplot*. *Addison*.

* **TO UNDERPRAISE**. *v. a.* [under and praise.] To praise below desert.—

In *underpraising* thy deserts. *Dryden*.

* **TO UNDERPRIZE**. *v. a.* [under and prize.] To value at less than the worth.—

My praise doth wrong this shadow

In *underprizing* it. *Shak.*

* **TO UNDERPROP**. *v. a.* [under and prop.] To support; to sustain.—Here am I left to *underprop* the land. *Shak.*—There was made a shoring or *underpropping* act for the benevolence. *Bacon*.—And *underprop* the head that bears the crown. *Fenton*.

* **UNDERPROPORTIONED**. *adj.* [under and proportion.] Having too little proportion.—To

make scanty and *underproportioned* returns of civility. *Collier*.

* **UNDERPULLER**. *n. f.* [under and puller.] Inferior or subordinate puller.—*Underpullers* in destruction. *Collier*.

* **UNDERRATE**. *n. f.* [from the verb.] A price less than is usual.—But not at *underrates* to sell. *Cowley*.—And at an *underrate* in Smithfield bought. *Dryden*.

* **TO UNDERRATE**. *v. a.* [under and rate.] To rate too low.

* **TO UNDERSAY**. *v. n.* [under and say.] To say by way of derogation or contradiction. Obsolete.—But I dare *undersay*. *Spenser*.

* **UNDERSECRETARY**. *n. f.* [under and secretary.] An inferior or subordinate secretary.—He hath his *under-secretaries* for the several nations. *Bacon*.

* **TO UNDERSSELL**. *v. a.* [under and sell.] To defeat, by selling for less; to sell cheaper than another.—They may, with great gain, *undersell* us. *Child*.

* **UNDERSERVANT**. *n. f.* [under and servant.] A servant of the lower class.—The bones, as *underservants*, with the muscles. *Grew*.

* **TO UNDERSSET**. *v. a.* [under and set.] To prop; to support.—A strong company, and well *underset* with rich men. *Bacon*.

* **UNDERSSETTER**. *n. f.* [from *underset*.] Prop; pedestal; support.—The four corners thereof had *undersetters*. 1 *Kings*, vii. 30.

* **UNDERSSETTING**. *n. f.* [from *underset*.] Lower part; pedestal.—Their *undersettings*, or pedestals. *Wotton*.

(1.) * **UNDERSHERIFF**. *n. f.* [under and sheriff.] The deputy of the sheriff.—Love's *undersherieve*. *Cleaveland*.

(2.) **UNDER-SHERIFF**. See **SHERIFF**, § 2.

* **UNDERSHERIFFRY**. *n. f.* [from *undersheriff*.] The business, or office of an *undersheriff*.—The cardinals of Rome call all temporal business, of wars and embassages, *shirreria*, which is *undersheriffries*. *Bacon*.

* **UNDERSHOT**. *part. adj.* [under and shoot.] Moved by water passing under it.—Driving an *undershot* wheel. *Cornew*.

* **UNDERSONG**. *n. f.* [under and song.] Chorus; burthen of a song.—

So ended the: and all the rest around

To her redoubled that her *undersong*. *Spenser*.—Menalcas shall sustain his *undersong*. *Dryd.*

(1.) * **TO UNDERSTAND**. *v. a.* preterite *understand*. [understand, Saxon.] 1. To conceive with adequate ideas; to have full knowledge of; to comprehend; to know.—

I nam'd them as they pass'd, and *understood* Their nature. *Milton*.

—Or rail at arts he did not *understand*? *Dryden*.

—To bear for once with what you *understand*. *Addis.* 2. To know the meaning of; to be able to interpret.—

He gather'd his own doom, which *understood*, Not instant, but of future time; to hell

He now return'd. *Milton*.

—The Ulysses of Ovid upbraids his ignorance, that he *understood* not the shield for which he pleaded. *Dryd.* 3. To suppose to mean.—The

most

most learned interpreters *understood* the words of fin, and not of Abel. *Locke*. 4. To know by experience.—

Love unlibidinous reigned, nor jealousy

Was *understood*, the injur'd lover's hell. *Milton*.

5. To know by instinct.—

Amorous intent, well *understood*

Of Eve, whose eye darted contagious fire. *Milt.*

6. To interpret at least mentally: to conceive with respect to meaning.—Though not but by the spirit *understood*. *Milton*.—It was not so to be *understood*. *Stillingfleet*. 7. To know another's meaning.—

Each to other calls

Not *understood*.

Milton.

8. To hold in opinion with conviction.—

For well I *understand* in the prime end

Of nature her th' inferior. *Milton*.

9. To mean without expressing.—

War then, war

Open or *understood*, must be resolv'd. *Milton*.

10. To know what is not expressed.—

I bring them to receive

From thee their names, and pay the fealty
With low subjection; *understand* the same. *Milt.*

(1.) * *TO UNDERSTAND*. *v. n.* 1. To have the use of intellectual faculties; to be an intelligent or conscious being.—A wife and *understanding* heart. *Chronicles*.—I *understand*, and grow, and see. *Donne*. 2. To be informed by another.—I *understood* of the evil Eliashib did. *Neb. xiii.* 7.—I *understand* by Sanga. *B. Jonson*. 3. Not to be ignorant; to have learned.—

I *understood* not that a grateful mind

By owing owes not, but still pays, at once

Indebted and discharg'd. *Milton*.

I *understood* not all was but a shew

Rather than solid virtue. *Milton*.

(1.) * *UNDERSTANDING*. *adj.* Knowing; skillful.—The preient physician is a very *understanding* man. *Addis.*

(2.) * *UNDERSTANDING*. *n. f.* [from *understand*.] 1. Intellectual powers; faculties of the mind, especially those of knowledge and judgment.—I speak as my *understanding* instructs me. *Shak.*—Make him of quick *understanding* in the fear of the Lord. *Isa.*—

When she rates things, and moves from ground to ground,

The name of reason she obeys by this;

But when by reason she the truth hath found,

And standeth fix'd, she *understanding* is. *Davies*.

Life and sense,

Fancy and *understanding*.

Milton.

—We find wisdom withdrawing the will from the quarrels of the *understanding*, *Holyday*.—By *understanding*, I mean that faculty whereby we are enabled to apprehend the objects of knowledge. *Wilk.*—The *understanding* of man. *Tillotson*.—The *understandings* of a senate. *Swift*. 2. Skill, knowledge; exact comprehension.—Right *understanding*. *Locke*.—A great sense and *understanding* of religion. *Locke*. 3. Intelligence; terms of communication.—A good *understanding* between him and his people. *Clarendon*.—We have got into some *understanding*. *Arbuth.*

(3.) *UNDERSTANDING*. See METAPHYSICS and LOGIC.

* *UNDERSTANDINGLY*. *adv.* [from *understand*.] With knowledge.—Sundays may be *understandingly* spent in theology. *Milton*.

* *UNDERSTOOD*. *pret.* and *part. passiv.* *understand*.

* *UNDERSTRAPPER*. *n. f.* [under and *strapper*.] A petty fellow; an inferior agent.—Every *understrapper* perk'd up. *Swift*.

UNDERSWEN, a town of Bern, on Thun.

(1.) * *TO UNDERTAKE*. *v. a.* *preterite undertook*; to participate *passive undertake*. [underfugen, German.] 1. To attempt; to engage in.—

The task he *undertakes*

Is numbring sands. *Shak.*

—She *undertook* the manage of his family. *Fell-*

We *undertook*, and we perform'd the same. *Id.*

—The English *undertake* th' unequal war. *Dryd.*

—Of dangers *undertaken*, fame achiev'd. *Dryd.*

2. To assume a character. Not in use.—His name and credit shall you *undertake*. *Shak.* 3. To engage with; to attack.—It is not fit your lordship should *undertake* every companion. *Shak.*—You'll *undertake* her no more? *Shak.* 4. To take the charge of.—

I give my charge up to Sir Nicholas Vaux,

Who *undertakes* you to your end. *Shak.*

(2.) * *TO UNDERTAKE*. *v. n.* 1. To assume any business or province.—O Lord, I am oppressed, *undertake* for me. *Isa. xxxviii.* 34.—I *undertook* alone to wing th' abyss. *Milton*. 2. To venture; to hazard.—

It is the cowardly terror of his spirit,

That dare not *undertake*. *Shak.*

3. To promise; to stand bound to some condition.

—I dare *undertake* they will not lose their labour.

Woodward.

* *UNDERTAKEN*. *part. passiv.* of *undertake*.

* *UNDERTAKER*. *n. f.* [from *undertake*.] 1.

One who engages in projects and affairs.—Astrim was naturally a great *undertaker*. *Clarendon*.

—*Undertakers* in Rome purchase the digging of

fields, and arrive at great estates by it. *Addis.*

—Perplexities that some *undertakers* have encountered it with. *Woodward*.—Oblige thy favorite *undertakers*. *Prior*. 2. One who engages to build for another at a certain price.—

Should they build as fast as write,

'Twould ruin *undertakers* quite. *Swift*.

3. One who manages funerals.—

While rival *undertakers* hover round,

And with his spade the sexton marks the ground. *Young*.

* *UNDERTAKING*. *n. f.* [from *undertake*.] Attempt; enterprize; engagement.—Men of renown, that is, of great *undertaking* and adventurous actions. *Raleigh*.—Too great an *undertaking*. *Temple*.

* *UNDERTENANT*. *n. f.* [under and *tenant*.] A secondary tenant; one who holds from him that holds from the owner.—Settle and secure the *undertenants*. *Davies*.

* *UNDERTOOK*. *preterite* of *undertake*.

* *UNDERVALUATION*. *n. f.* [under and *value*.] Rate not equal to the worth.—There is often failing by an *undervaluation*. *Wotton*.

* *UNDERVALUE*. *n. f.* [from the verb.] Low rate; vile price.—The *undervalue* and discredit of these commodities. *Temple*.

* **TO UNDERVALUE.** *v. a.* [*under and value.*]
 1. To rate low; to esteem lightly; to treat as of little worth.—

Her name is Portia, nothing *undervalu'd* Shak.

To Cato's daughter. Shak.

—I *undervalu'd* all ensigns of authority. *Atterb.*
 2. To deprecate; to make low in estimation; to despise.—I write not this to *undervalue* the other parts of poetry. *Dryden*.—Multitudes lessen and *undervalue* it. *Addison*.—Schooling Luther an *undervaluing* term. *Atterbury*.

* **UNDERVALUER.** *n. f.* [*from undervalue.*]
 One who esteems lightly.—An *undervaluer* of money was Sir Henry Wotton. *Walton*.

UNDERWALD, or } a canton of Switzer-
UNDERWALDEN, } land, and the sixth in rank. It is bounded on the N. by Lucern and the Lake of the Four Cantons, on the E. by the high mountains which separate it from the canton of Uri; on the S. by that of Bern; and on the W. by the canton of Lucern. The religion of this canton is the Roman Catholic. Arnold Melchthal, who first raised the standard of Swiss liberty, was born in it.

* **UNDERWENT.** *preterite of undergo.*

(1.) * **UNDERWOOD.** *n. f.* [*under and wood.*]
 The low trees that grow among the timber.—When you fell *underwood*, fow haws and flocs. *Mortimer*.

(2.) **UNDERWOOD.** See **RURAL ECONOMY**, Part III. *See* X. p. 477.

* **UNDERWORK.** *n. f.* [*under and work.*]
 Subordinate business; petty affairs.—They that are proper for war carry on the *underwork* of the nation. *Addison*.

* **TO UNDERWORK.** *v. a.* *preterite underworked, or underwrought;* participate passive *underworked, or underwrought.* 1. To destroy by clandestine measures.—That thou hast *underwrought* its lawful king. *Shak.* 2. To labour or polish less than enough.—A work may be *overwrought* as well as *underwrought*. *Dryden*. 3. To work at a price below the common.

* **UNDERWORKMAN.** *n. f.* [*under and workman.*]
 An inferior, or subordinate labourer.—Nor would they hire *underworkmen*. *Lestry.*—*Underworkmen* are expert enough at making a single wheel. *Swift*.

* **TO UNDERWRITE.** *v. a.* [*under and write.*]
 To write under something else.—He was by him answered in the *underwritten* sort. *Sidney*.—The addition and change I have here *underwritten*. *Sanderson*.

(1.) * **UNDERWRITER.** *n. f.* [*from underwrite.*]
 An insurer; so called from writing his name under the conditions.

(2.) **UNDERWRITER.** See **INSURANCE**, § II.

* **UNDESCRIBED.** *adj.* Not described.—God left nothing in his word *undescribed*. *Hooker*.—I had rather leave it *undescribed*. *Collier*.

* **UNDISTINGUISHABLE.** *adj.* 1. Not to be distinctly seen.—These things seem small and *undistinguishable*. *Shak.*

The quaint mazes in the wanton green,
For lack of tread, are *undistinguishable*. *Shak.*

—An *undistinguishable* confusion. *Rogers.* 2. Not to be known by any peculiar property.—No idea can be *undistinguishable* from another. *Locke.*

* **UNDISTINGUISHED.** *adj.* 1. Not mark'd out so as to be known from each other.—The *undistinguish'd* seeds of good and ill. *Dryd.*—*Undistinguish'd* duration. *Locke.* 2. Not to be seen otherwise than confusedly; not separately and plainly described.—But sown so thick with stars, 'tis *undistinguish'd* light. *Dryd.* 3. Not plainly discerned.—Wrinkles *undistinguish'd* pass. *Swift.* 4. Admitting nothing between; having no intervening space.—Oh *undistinguish'd* space of woman's will! *Shak.* 5. Not mark'd by any particular property.

Sleep to those empty lids
Is grown a stranger; and day and night
As *undistinguish'd* by my sleep, as night. *Decc.*

6. Not treated with any particular respect.—Sad chance of war! now destitute of aid,
Falls *undistinguish'd* by the victor spade. *Pope.*

* **UNDISTINGUISHING.** *adj.* Making no difference.—The promiscuous and *undistinguishing* distribution of good and evil which was necessary for carrying on the designs of providence in this will be rectified in another. *Add.*—*Undistinguishing* complaisance. *Garth.*

* **UNDISTRACTED.** *adj.* Not perplex'd by contrariety of thoughts or desires.—A more immediate, and *undistracted* communion with himself. *Boyle.*

* **UNDISTRACTEDLY.** *adv.* Without disturbance from contrariety of sentiments.—The affections being at liberty to devote themselves more *undistractedly* to God. *Boyle.*

* **UNDISTRACTEDNESS.** *n. f.* Freedom from interruption by different thoughts.—Calmanes of mind, and *undistractedness* of thoughts. *Boyle.*

* **UNDISTURBED.** *adj.* 1. Free from perturbation; calm; tranquil; placid.—That *undisturbed* song of pure content. *Milt.*—Lull'd in their ease, and *undisturb'd* before. *Dryden.*—The *undisturbed* fruition of God to all eternity. *Atterb.*—*Undisturbed* in danger. *Locke.* 2. Not interrupted by any hindrance or molestation.—And craves no more than *undisturb'd* delight. *Dryd.*—Unvex'd with quarrels, *undisturb'd* with noise. *Dryden.* 3. Not agitated.—*Undisturb'd* and silent waters. *Dryd.*

* **UNDISTURBEDLY.** *adv.* Calmly; peacefully.—To lay before them *undisturbedly* the thread and coherence of any discourse. *Locke.*

* **UNDIVIDABLE.** *adj.* Not separable; not susceptible of division.—Tragedy, pastoral, scene *undividable*, or poem unlimited. *Shak.*

How comes it, husband,

That thou art thus estranged from thyself?

Thyself, I call it, being strange to me;

That *undividable*, incorporate,

Am better than thy dear self's better part. *Shak.*

* **UNDIVIDED.** *adj.* Unbroken; whole; not parted.—A whole and *undivided* affection. *Tayl.*—Spreads *undivided*, operates unspent. *Pope.*

* **UNDIVULGED.** *adj.* Secret; not promulgated.—*Undivulged* crimes. *Shak.*

* **TO UNDO.** *v. a.* preterite *undid*; participle passive *undone*. [from *do*.] 1. To ruin; to bring to destruction.—It will *undo* so many as shall trust unto it. *Hayw.*—Subdued, *undone*, they did at last obey. *Rose.*—Some to *undo*, and some to be *undone*. *Deub.*

Hither ye come, dislike, and so *undo*

The players.

Denb.

When I beheld the charming maid,

I'm ten times more *undone*.

Add.

1. To loose; to open what is shut or fastened; to unravel.—They false and fearful do their hands *undo*. *Sidn.*—Pray *undo* this button. *Shak.*—To *undo* the charming band. *Milt.*—Her own teeth would *undo* the knot. *Wall.* 3. To change any thing done to its former state; to recall, or annul any action.—To *undo* some things of men, which God doth know they cannot better. *Hook.*—Could not again *undo*. *Shak.*—We seem ambitious God's wholework t' *undo*. *Donne.*—They make the Deity do and *undo*, go forward and backwards. *Burnet.*—He has the merit of the gift *undone*. *Dryd.*—We have not done what we can to *undo* our fault. *Tillotson.*—*Undo* what I've been labouring all this while. *Add.*—She'd all *undo* what she had done. *Swift.*

(1.) * **UNDOING.** *adj.* Ruining; destructive.—Great and *undoing* mischief. *South.*

(2.) * **UNDOING.** *n. s.* Ruin; destruction; fatal mischief.—The utter *undoing* of some. *Hooker.*—False lustre could dazzle my daughter to her *undoing*. *Add.*

We act, as if the fraud was pleasing to us,
And our *undoing* joy.
—How oft are our petitions our *undoing*. *Hurtq.*

Rower.

* **UNDONE.** *adj.* [from *undo*.] 1. Not done; not performed.—I cannot with the fault *undone*. *Shak.*—What they had left *undone*. *Clar.* 2. Ruined; brought to destruction.—We rest all *undone*, till all be done. *Daniel.*

* **UNDOUBTED.** *adj.* Indubitable; indisputable; unquestionable.—His fact, till now, came not to an *undoubted* proof. *Shak.*—Th' *undoubted* son of God. *Milt.*—*Undoubted* records of certain events. *Glanville.*—And of *undoubted* victory did boast. *Wall.*—An *undoubted* assurance. *Tillot.*

* **UNDOUBTEDLY.** *adv.* Indubitably; without question; without doubt.—Some fault *undoubtedly* there is. *Hooker.*

This cardinal, *undoubtedly*

Was fashion'd to much honour.

Shak.

—*Undoubtedly* God will relent. *Milt.*—The original is *undoubtedly* one of the greatest this age has produced. *Dryden.*—He shall *undoubtedly* be saved. *Tillotson.*

* **UNDOUBTING.** *adj.* Admitting of no doubt.—Received with an *undoubting* faith. *Ham.*

* **UNDRAWN.** *adj.* Not pulled by any external force.—

Forth rush'd

The chariot of paternal deity *undrawn*. *Milton.*

UNHARROWED. *adj.* Not harrowed.

* **UNHATCHED**. *adj.* 1. Not disclosed from the eggs. 2. Not brought to light.—

Some *unhatch'd* practice

Hath puddled his clear spirit. *Shak.*

* **UNHAZARDED**. *adj.* Not adventured; not put in danger.—

Here I should still enjoy thee day and night
Whole to myself, *unhazarded* abroad,
Fearless at home. *Milt.*

* **UNHEALTHFUL**. *adj.* Morbid; unwholesome.—The *unhealthful* season is the autumn. *Grav.*—Of sultry summers, or *unhealthful* springs. *Dryd.*

* **UNHEALTHY**. *adj.* Sickly; wanting health.—Dull and *unhealthy*. *Locke.*—*Unhealthy* mortals. *Philips.*

* **UNHEARD**. *adj.* 1. Not perceived by the ear.—Their children cries *unheard*. *Milt.* 2. Not vouchsafed an audience.—What pangs I feel, unpitied and *unheard*! *Dryden.* 3. Unknown in celebration.—Nor was his name *unheard*, or unador'd. *Milt.* 4. **UNHEARD OF**. Obscure; not known by fame.—*Unheard of* may I live and die in peace. *Graville.* 5. **UNHEARD OF**. Unprecedented.—The most *unheard of* confusion. *Swift.*

* **To UNHEART**. *v. a.* To discourage; to depress.—It much *unhearts* me. *Shak.*

UNHEARTY. *adj.* Not cheerful.

* **UNHEATED**. *adj.* Not made hot.—The narrow pores of *unheated* glass. *Boyle.*

* **UNHEEDED**. *adj.* Disregarded; not thought worthy of notice; escaping notice.—Some *unheeded* circumstance. *Boyle.*—He of his fatal guilt gave proof *unheeded*. *Milt.*—*Unheeded* bait of love. *Dry.*—The world's great victor pass'd *unheeded* by. *Pope.*

* **UNHEEDFUL**. *adj.* [from *unheed*.] Not cautious.

* **UNHEEDING**. *adj.* Negligent; careless.—He pass'd unmark'd by my *unheeding* eyes. *Dryd.*

* **UNHEEDY**. *adj.* Precipitate; sudden.—Threat'ning *unheedy* wreck, and rash decay. *Spens.*—Wings and no eyes, figure *unheedy* haste. *Shak.*—Pluck'd up by some *unheedy* swain. *Milt.*

* **To UNHIDE**. *v. a.* To uncover; to expose to view. *Spenser.*

* **UNHELPED**. *adj.* Unassisted; having no auxiliary; unsupported.—*Unhelp'd* I am, who pity'd the distress'd. *Dryd.*

* **UNHELPPFUL**. *adj.* Giving no assistance.—With sad and *unhelpful* tears. *Shak.*

* **UNHEWN**. *part. adj.* Not hewn.—Rough-cast, *unhewn* poetry. *Dryd.*

* **UNHIDEBOUND**. *adj.* Lax of maw; capacious.—To stuff this maw, this vast *unhidebound* corple. *Milt.*

* **To UNHINGE**. *v. a.* 1. To throw from the hinge. 2. To displace by violence.—And hills *unhing'd*, from their deep roots depart. *Blackm.* 3. To disorder; to confuse.—Just or unjust, I would the world *unhinge*. *Wall.*—Cheats would *unhinge* states, and run all into confusion. *Ray.*

* **UNHOLINESS**. *n. f.* Impiety; profaneness; wickedness.—The *unholiness* of obtruding upon men remission of sins for money. *Ral.*

* **UNHOLY**. *adj.* 1. Profane; not hallowed.—All things now in the church are *unholy*. *Hook.*

Drive out the sinful pair,

From hallow'd ground th' *unholy*. *Milt.*

2. Impious; wicked.—Think not us therefore *unholy*. *Hooker.*—Far other raptures of *unholy* joy. *Pope.*

* **UNHONOURED**. *adj.* 1. Not regarded with veneration; not celebrated.—*Unhonour'd* tho' I am. *Dryd.*—Pales *unhonour'd*, Ceres unemploy'd. *Dryd.* 2. Not treated with respect.—Unmark'd, *unhonour'd* at a monarch's gate. *Pope.*

* **To UNHOOP**. *v. a.* To divest of hoops.—*Unhoop* the fair sex. *Add.*

* **UNHOPED**. *adj.* Not expected; greater
* **UNHOPED FOR**. } than hope had promised.—
With *unhop'd* success. *Dryd.*—Whence your *unhop'd* for safety may be wrought. *Dryd.*

* **UNHOPEFUL**. *adj.* Such as leaves no room to hope.—Benedict is not the *unhopefullest* husband that I know. *Shak.*—I thought it might prove no *unhopeful* way. *Boyle.*

* **To UNHORSE**. *v. a.* To beat from a horse; to throw from the saddle.—He would *unhorse* the lustiest challenger. *Shakespeare.*—*Unhorsed* and sore wounded. *Knolles.*—On a fourth he flies, and him *unhorsed* too. *Dan.*—To fare like men *unhors'd*. *Wall.*—The knights *unhors'd* may rise from off the plain. *Dryd.*

* **UNHOSPITABLE**. *adj.* [*inhospitalis*, Latin.] Affording no kindness or entertainment to strangers; cruel; barbarous.—Stain'd with my blood the *unhospitable* coast. *Dryd.*

* **UNHOSTILE**. *adj.* Not belonging to an enemy.—Indignant, by *unhostile* wounds destroy'd. *Philips.*

* **To UNHOUSE**. *v. a.* To drive from the habitation.—Thinking her *unhous'd* here, and fled from us. *Donne.*—*Unhous'd* thy virgin soul from her fair biding place. *Milt.*

* **UNHOUSED**. *adj.* 1. Homeless; wanting a house.—Naked creatures, wh^o bare, *unhoused* trunks. *Shak.* 2. Having no settled habitation.—My *unhoused*, free condition. *Shak.*—You *unhous'd*, lawless, rambling libertines. *Southern.*

* **UNHOUSELLED**. *adj.* Having not the sacrament.—*Unhousel'd*, unanointed, unanell'd. *Shak.*

P p p p a * **UNHUMBLED**.

* **UNHUMBLED.** *adj.* Not humbled; not touched with shame or confusion.—*Unhumbled, unrepented, unreformed. Milt.*

* **UNHURT.** *adj.* Free from harm.—Two men only came off *unhurt. Bac.*—My nimble feet from *unhurt* flow'rs rebound. *Dryd.*—Through burning climes I pass'd *unhurt. Add.*—*Unhurt*, amidst the war of elements. *Add.*

* **UNIhurtFUL.** *adj.* Innoxious; harmless; doing no harm.—You imagine me too *unhurtful* an opposite. *Shak.*—Flames *unhurtful*, hovering, dance in air. *Blackmore.*

* **UNHURTFULLY.** *adv.* Without harm; innoxiously.—Innocently and *unhurtfully. Pope.*

(1.) * **UNICORN.** *n. f.* [*unicornus, unus and cornu, Lat.*] 1. A beast, whether real or fabulous, that has only one horn.—Wert thou the *unicorn*, pride and wrath would confound thee. *Shak.*—*Unicornus* may be betrayed with trees. *Shak.*—Nature, in conigerous animals, hath placed the horns inversed upwards, as in the rhinoceros, Indian *als*, and *unicorn* beetles. *Brown.*—Dioscorides hath made no mention of *unicorns* horn. *Brown.*—Some *unicorns* we will allow even among insects. *Brown.*—Will the fierce *unicorn* thy voice obey. *Sandys.* 2. A bird.—Or the *unicorn* bird, the principal marks are these; headed and footed like the dunghill cock, tailed like a goose, horned on his forehead, with some likeness, as the *unicorn* is pictured; spur's on his wings, bigger than a swan. *Grew.*

(2.) The **UNICORN** is thought to be the same with the rhinoceros. See RHINOCEROS. Sparmann informs us, that the figure of the unicorn described by the ancients has been found delineated by the Senee Hottentots on the plain surface of a rock in Caffraria; and therefore conjectures, that such an animal either does exist at present in the internal parts of Africa, or at least once did so. Father Lobo affirms that he has seen it.

(3.) **UNICORN FISH.** See MONODON.

UNIE. See NIE.

(1.) * **UNIFORM.** *adj.* [*unus and forma.*] 1. Keeping its tenour; similar to itself.—Though it may put on a face never so *uniform* and alike, yet it is in reality very different. 2. Conforming to one rule; acting in the same manner; agreeing with each other.—Churches are bound to be *uniform* in their ceremonies. *Hooker.*—All, with *uniform* consent, admire her. *Hooker.*—Neither *uniform* in their designs, nor direct in their views. *Sau.*

(2.) **UNIFORM,** denotes a thing to be similar, or consistent either with another thing, or with itself, in respect of figure, stature, proportion, or the like; in which sense it stands opposed to *disform.*

(1.) * **UNIFORMITY.** *n. f.* [*uniformité, Fr.*] 1. Resemblance to itself; even tendur.—There is no *uniformity* in the design of Spenser. *Dryden.*—Steadiness and *uniformity.* *Add.* 2. Conformity to one pattern; resemblance of one to another.—The unity of the church of Christ, consisteth in that *uniformity*, which all the several persons thereunto belonging have. *Hooker.*—The council ordained constant *uniformity. Nelson.*

(2.) **UNIFORMITY,** regularity, a similitude or resemblance between the parts of a whole. Such as that we meet with in figures of many sides, and angles respectively equal, and answerable to each

other. A late ingenious author makes beauty to consist in uniformity, joined or combined with variety. Where the uniformity is equal in two objects, the beauty, he contends, is as the variety; and where the variety is equal, the beauty is as the uniformity.

(3.) **UNIFORMITY** is particularly used for one and the same form of public prayers, and administration of sacraments and other rites, &c. of the church of England, prescribed by the famous stat. 1. Eliz. and 13. and 14. Car. II. cap. 4. called the *Act of Uniformity.* See LITURGY.

* **UNIFORMLY.** *adv.* [*from uniform.*] 1. Without variation; in an even tenour.—Thou faith the church doth *uniformly* hold. *Hooker.*—*Uniformly*, and without interruption. *Newton.* 2. Without diversity of one from another.

UNIGENITUS. See JANSENISTS.

* **UNIMAGINABLE.** *adj.* Not to be imagined by the fancy; not to be conceived.—

Things to their thought

So *unimaginable* as hate in heav'n. *Mil.*

—Artful and *unimaginable* touches. *Milton.*—An infinite succession is utterly *unimaginable. Tullison.*

* **UNIMAGINABLY.** *adv.* To a degree not to be imagined.—*Unimaginably* subtle compasses. *Boyle.*

* **UNIMITABLE.** *adj.* [*inimitable, Fr. inimitabilis, Lat.*] Not to be imitated.—Both these are *unimitable. Burnet.*

* **UNIMMORTAL.** *adj.* Not immortal; mortal.—Both to destroy, or *unimmortal* make. *Mil.*

* **UNIMPAIRABLE.** *adj.* Not liable to waste or diminution.—If the superior be *unimpaired*, it is a strong presumption, that the inferiors are likewise *unimpaired. Hakeswill.*

* **UNIMPAIRED.** *adj.* Not diminished; not worn out.—Yet *unimpaired* with labours, or with time. *Dryd.*—Our public credit continues *unimpaired. Add.*

* **UNIMPLORED.** *adj.* Not solicited.—

Of my celestial patrons, who deigns

Her nightly visitation *unimplored.* *Milton.*

* **UNIMPORTANT.** *adj.* 1. Not momentous. 2. Assuming no airs of dignity.—A free, *unimportant*, natural, easy manner. *Pope.*

* **UNIMPORTUNED.** *adj.* Not solicited; not teased to compliance.—Ever ran—To danger *unimportun'd. Donne.*

* **UNIMPROBABLE.** *adj.* Incapable of melioration.

* **UNIMPROVEABLENESS.** *n. f.* [*from unimprovable.*] Quality of not being improvable.—Ignorance and *unimproveableness* in knowledge. *Hammond.*

* **UNIMPROVED.** *adj.* 1. Not made better. 2. Not made more knowing.—Not a mask were *unimprov'd* away. *Pope.* 3. Not taught; not meliorated by instruction.—Of *unimproved* mettle, hot and full. *Shak.*—Shallow, *unimproved* intellects. *Glanv.*

* **UNINCREASABLE.** *adj.* Admitting no increase.—*Unincreasable* elevation and vastness of affection. *Boyle.*

* **UNINDIFFERENT.** *adj.* Partial; leaning to a side.—His opinion touching the catholick church was as *unindifferent*, as, touching our church,

hurch, the opinion of them that favour this pretended reformation is. *Hooker.*

* **UNINDUSTRIOUS.** *adj.* Not diligent, not laborious.—A sluggish or *unindustrious* agent. *Dec. f. Piety.*

* **UNINFLAMMABLE.** *adj.* Not capable of being set on fire.—The *uninflammable* spirit of such concretions. *Boyle.*

* **UNINFLAMED.** *adj.* Not set on fire.—A greater heat than others have *uninflamed*. *Bacon.*

* **UNINFORMED.** *adj.* 1. Untaught; uninstructed.—Nor *uninform'd*—Of nuptial sanctity. *Milton.*—*Uninformed* minds. *Pope.* 2. Unanimated; not enlivened.

* **UNINGENUOUS.** *adj.* Illiberal; disingenuous.—This stratagem would be as unskilful, as it is *uningenuous*. *Decay of Piety.*

* **UNINHABITABLE.** *adj.* Unfit to be inhabited.—That supposed *uninhabitable* burnt zone. *Raleigh.*—To man an *uninhabitable* flood. *Blackmore.*

* **UNINHABITABLENESS.** *n. f.* Incapacity of being inhabited.—The *uninhabitableness* of the torrid zone. *Boyle.*

* **UNINHABITED.** *adj.* Having no dwellers.—The whole island is now *uninhabited*. *Sandys.*—*Uninhabited*, until'd, unsown. *Pope.*—The island seemed to be *uninhabited*. *Swift.*

* **UNINJURED.** *adj.* Unhurt; suffering no harm.—*Uninjur'd* in this wild surrounding waste. *Milton.*—Untouch'd thy tomb, *uninjur'd* be thy dust. *Prior.*

* **UNINSCRIBED.** *adj.* Having no inscription.—Obscure the place, and *uninscrib'd* the stone. *Pope.*

* **UNINSPIRED.** *adj.* Not having received any supernatural instruction or illumination.—Men *uninspir'd*. *Locke.*—And yet not wholly *uninspir'd* the fings. *Dryden.*

* **UNINSTRUCTED.** *adj.* Not taught; not helped by institution.—And *uninstructed* how to stem the tide. *Dryden.*—*Uninstructed* in the arts. *Locke.*—*Uninstructed* persons. *Addison.*—*Uninstructed* Christians. *Locke.*

* **UNINSTRUCTIVE.** *adj.* Not conferring any improvement.—Were not men of abilities thus communicative, their experience would be *uninstructive*. *Addison.*

* **UNINTELLIGENT.** *adj.* Not knowing; not skilful; not having any consciousness.—We will give you sleepy drinks, that your senses may be *unintelligent*. *Shak.*—The *unintelligent* vulgar. *Glanv.*—A drivelling, *unintelligent*, untractable changeling. *Locke.*—An author *unintelligent* and blind. *Blackm.*—The obvious products of *unintelligent* nature. *Bentley.*

* **UNINTELLIGIBILITY.** *n. f.* Quality of not being intelligible.—Credit the *unintelligibility* of this union and motion. *Glanv.*—If we have truly proved the *unintelligibility* of it. *Burnet.*

* **UNINTELLIGIBLE.** *adj.* [*unintelligible*, Fr.] Not such as can be understood.—It was *unintelligible* in his time. *Swift.*—On the learn'd *unintelligible* prize! *Dryden.*—Harmless, *unintelligible* enthusiasm. *Rogers.*

* **UNINTELLIGIBLY.** *adv.* In a manner not to be understood.—Sound is not *unintelligibly* explained by a vibrating motion communicated

to the medium. *Locke.*—It is to talk *unintelligibly*. *Locke.*

* **UNINTENTIONAL.** *adj.* Not designed; happening without design.—*Unintentional* deficiencies of style. *Boyle.*

* **UNINTERESTED.** } *adj.* Not having in-

* **UNINTERESTED.** } terest.—The greatest part of an audience is always *uninterested*. *Dryd.*

* **UNINTERMITTED.** *adj.* Continued; not interrupted.—Continued and *uninterrupted*. *Hale.*

* **UNINTERMIXED.** *adj.* Not mingled.—*Unintermix'd* with fictitious fantasies. *Daniel.*

* **UNINTERRUPTED.** *adj.* Not broken; not interrupted.—With unmixed joy, *uninterrupted* rest. *Roscommon.*—*Uninterrupted* union and correspondence. *Addis.*—A vast, *uninterrupted* prospect. *Addison.*—The *uninterrupted* stitch in superficial wounds, is rejected. *Sharp.*

* **UNINTERRUPTEDLY.** *adj.* Without interruption.—A successive augmentation *uninterruptedly* continued. *Pearson.*—The powers of the body are *uninterruptedly* employed. *Locke.*

* **UNINTRENCHED.** *adj.* Not intrenched.—Unfortified and *unintrenched*. *Pope.*

* **UNINVESTIGABLE.** *adj.* Not to be searched out.—The works of this visible world being *uninvestigable* by us. *Ray.*

* **UNINVITED.** *adj.* Not asked.—Come *uninvited*. *Philips.*

* **UNJOINTED.** *adj.* 1. Disjoined; separated.—

I hear the sound of words; their sense the air dissolves *unjointed* ere it reach my ear. *Milton.*

2. Having no articulation.—They are all three immovable or *unjointed*, of the thickness of a little pin. *Grew.*

UNIOLA, in botany, SEA-SIDE OATS OF CAROLINA, a genus of plants, in the class of *Triandria*, and order of *Dygnia*; ranking in the natural method under the 4th order, *Gramina*. It is a native of Carolina.

(1.) * **UNION.** *n. f.* [*unio*, Lat.] 1. The act of joining two or more, so as to make them one.—And gladly of our *union* hear thee speak. *Milt.*—One kingdom, joy, and *union* without end. *Milt.* 2. Concord; conjunction of mind or interests.—An *union* with God. *Taylor.* 3. A pearl. Not in use.—And in the cup an *union* shall he throw. *Shak.* 4. [In law.] *Union* is a combining or consolidation of two churches in one, which is done by the consent of the bishop, the patron, and incumbent. And this is properly called an *union*: but there are two other sorts, as when one church is made subject to the other, and when one man is made prelate of both, and when a conventual is made cathedral. Touching *union* in the first signification, there was a statute, an. 37 Hen. VIII. chap. 27. that it should be lawful in two churches, whereof the value of the one is not above six pounds in the king's books, of the first fruits, and not above one mile distant from the other. *Union* in this signification is personal, and that is for the life of the incumbent; or real, that is, perpetual, whosoever is incumbent. *Cowel.*

(2.) **UNION**, in geography, a post town of Pennsylvania; capital of Fayette county. It has a court-house. It is 298 miles from Philadelphia.

(3.) **UNION**, or THE UNION, by way of emi-

nence, is more particularly used to express the act by which the two separate kingdoms of England and Scotland were incorporated into one, under the title of *The kingdom of great Britain*. This union, in vain attempted by king James I. was at length effected in the year 1707, 6 Anne, when 25 articles were agreed to by the parliaments of both nations; the purport of the most considerable being as follows: 1. That on the first of May 1707, and for ever after, the kingdoms of England and Scotland shall be united into one kingdom, by the name of GREAT BRITAIN. 2. The succession to the monarchy of Great Britain shall be the same as was before settled with regard to that of England. 3. The united kingdom shall be represented by one parliament. 4. There shall be a communication of all rights and privileges between the subjects of both kingdoms, except where it is otherwise agreed. 9. When England raises 2,000,000 l. by a land-tax, Scotland shall raise 48,000 l. 16, 17. The standards of the coin, of weights, and of measures, shall be reduced to those of England throughout the united kingdoms. 18. The laws relating to trade, customs, and the excise, shall be the same in Scotland as in England. But all the other laws of Scotland shall remain in force; but alterable by the parliament of Great Britain. Yet with this caution, that laws relating to public policy are alterable at the discretion of the parliament; laws relating to private right are not to be altered but for the evident utility of the people of Scotland. 21. Sixteen peers are to be chosen to represent the peerage of Scotland in parliament, and forty-five members to sit in the house of commons. 23. The sixteen peers of Scotland shall have all privileges of parliament; and all peers of Scotland shall be peers of Great Britain, and rank next after those of the same degree at the time of the union, and shall have all privileges of peers, except sitting in the house of lords, and voting on the trial of a peer. These are the principal of the 25 articles of union, which are ratified and confirmed by statute 5 Ann. c. 8; in which statute there are also two acts of parliament recited; the one of Scotland, whereby the church of Scotland, and also the four universities of that kingdom, are established for ever, and all succeeding sovereigns are to take an oath inviolably to maintain the same: the other of England, 5 Anne, c. 6. whereby the acts of uniformity of 13 Eliz. and 13 Car. II. (except as the same had been altered by parliament at that time,) and all other acts then in force for the preservation of the church of England, are declared perpetual; and it is stipulated, that every subsequent king and queen shall take an oath inviolably to maintain the same within England, Ireland, Wales, and the town of Berwick upon Tweed. And it is enacted, that these two acts "shall for ever be observed as fundamental and essential conditions of the union."

(4.) UNION OF ENGLAND WITH IRELAND. See IRELAND, § 24.

(5.) UNION OF UTRECHT. See UNITED PROVINCES, § 7.

* UNIPAROUS. *adj.* [*unus* and *pario*.] Bringing one at a birth.—*Uniparous* animals. *Brown*.

UNIQUE, *adj.* [*Fr. only*.] among antiquaries, that of which there is but one in the world; as the gold coin of *Otho*, &c.

(1.) * UNISON. *adj.* [*unus* and *sonus*, Latin.] Sounding alone.—

Sounds intermix'd with voice

Choral, or *unison*.

Milton

(2.) * UNISON. *n. f.* 1. A string that has the same sound with another.—In musical strings tuned *unisons*. *Glanv.* 2. A single unvaried note.—While a long, solemn *unison* went round. *Pope*.

Diversify'd 'midst *unison* of chime,

Freer than air, yet manacled with rhyme. *Hart*.

(3.) UNISON, in music. See INTERVAL, § III. and MUSIC, Def. § 19.

* UNIT. *n. f.* [*unus*, *unitus*, Latin.] One; the least number; or root of numbers.—'Tis above a hundred million millions odds to an *unit*. *Bentley*.—Units are the integral parts of any large number. *Watts*.

UNITARIANS, *n. f. plur.* in ecclesiastical history, a name given to those who confine the glory and attribute of divinity to the One only great and supreme God, and Father of our Lord Jesus Christ. Dr PRIESTLY was the head of the sect.

UNITAS FRATRUM, or UNITED BRETHREN, in ecclesiastical history, a church of which some account will be found under the articles HERRHUT, and HERRNHUTTERS. The church of the United Brethren took its rise in Moravia during the 14th century; but is said by the Brethren to have derived its origin from the Greek church in the 9th century, when, by the instrumentality of Methodius and Cyrillus, two Greek monks, the kings of Bulgaria and Moravia being converted to the faith, were, together with their subjects, united in communion with the Greek church. Methodius was the first bishop; and for their use Cyrillus translated the Scriptures into the Slavonian language. Though they consider episcopal ordination as necessary to qualify the servants of the church for their respective functions, they allow to their bishops no elevation of rank or pre-eminent authority; their church having from its first establishment been governed by synods, consisting of deputies from all the congregations; and by other subordinate bodies, which they call *consensuses*. In questions of importance, or of which the consequences cannot be foreseen, recourse is had to the *lot*, which is never made use of but after mature deliberation and fervent prayer. In their opinion, episcopal consecration does not confer any power to preside over one or more congregations; and a bishop can discharge no office but by the appointment of a synod, or of the Elders conference of the Unity. Presbyters among them can perform every function of the bishop except ordination; for he confirms, by the laying on of hands on young persons when they first become candidates for the communion. Deacons are assistants to the presbyters much in the same way as in the church of England; and in the Brethren churches deaconesses are retained, for the purpose of privately admonishing their own sex, and visiting them in their sickness; but though they are solemnly blessed to this office, they are not permitted to teach in public, and far less to administer

r the sacrament. They have also *seniores ci-*
les, or lay-elders, in contradistinction to spiritual
ders or bishops, who are appointed to watch
er the constitution and discipline of the Unity of
e Brethren; over the observance of the laws of
e country in which congregations or missions
e established; and over the privileges granted
the Brethren by the governments under which
ey live. They do not consider a regular course
f literary education as at all necessary to qualify
ersons for admission into orders, provided they
offess a thorough knowledge of the word of God,
hich they call *solid Christian experience*, and a well
gulated zeal to serve God and their neighbours.
n Sunday, besides the public prayers, which
re either read from a liturgy or pronounced ex-
mpore by the minister, one or two sermons are
reached in every church or chapel; and after
he morning service an exhortation is given to the
hildren. Previous to the holy communion,
hich is administered on some Sunday once a-
month, and likewise on *Maunday Thursday*, each
erson who intends to communicate converses
ith one of the elders on the state of his soul, ex-
pressing his desire to partake of the sacrament.
The celebration of the communion is generally
eceded by a *love feast*, which is also kept on other
olemn occasions. On *Maunday Thursday*, be-
fore communion, the Brethren have a solemn *foot-*
washing; and at this, and we suppose at other
imes, they greet one another with the *kiss of cha-*
riety. These ceremonies they consider as religious
ites, and authorized through all ages of the church
y our Saviour himself and his two apostles St
Peter and St Paul. (John xii. 14. 1 Peter v. 14.
Rom. xvi. 16.) Our limits will not permit us to
give a systematic view of the doctrinal tenets of
the Brethren. Though they acknowledge no o-
ther standard of truth than the sacred Scriptures,
they adhere to the Augsburg Confession, and
speak respectfully of the 39 articles of the church
of England. They believe that the kingdom of
Christ is not confined to any particular party,
community, or church; and they consider them-
selves, though united in one body or visible church,
as spiritually joined in the bond of Christian love
to all who are taught of God, and belong to the
universal church of Christ, however much they
may differ in forms, which they deem non-essen-
tials. A full account of this society of Christians,
will be found in *Cranz's Ancient and Modern His-*
tory of the Protestant Church of the United Brethren,
printed in London, 1780; and in a work entitled
An Exposition of Christian Doctrine as taught in
the Protestant Church of the United Brethren, Lond.
1784.

(1.) * To UNITE. v. a. [*unitus*, Latin.] 1. To
join two or more into one.—The force in one
right hand he now *unites*. *Spenser*.—A proposition
for *uniting* both kingdoms. *Swift*. 2. To make
to agree.—The king proposed to *unite* his king-
dom in one form of worship. *Clarendon*. 3. To
make to adhere.—The peritonæum may be *united*
with the muscular flesh. *Wise*. 4. To join.
—To give our hearts *united* ceremony. *Shak*.—
Charity is of a fastening and *uniting* nature. *Pearce*.
—*United* with colours of a friendly nature. *Dryd*.

5. To join in interest.—Unto their assembly, mine
honour be not thou *united*.

(2.) * To UNITE. v. n. 1. To join in an act; to
concur; to act in concert.—If you will now *unite*
in your complaint. *Shak*. 2. To coalesce; to be ce-
mented; to be consolidated. 3. To grow into one.

(I.) UNITED, *part. adj.* Joined together in
political or religious union.

(II.) UNITED BRETHREN. See UNITAS FRA-
TRUM.

(III. I.) UNITED PROVINCES, or UNITED NE-
THERLANDS, otherwise called the BATAVIAN RE-
PUBLIC, consist of the seven provinces of Holland,
Zealand, Friesland, Groningen, Overijssel, Zut-
phen, and Utrecht. They are bounded on the
W. by the German Ocean; on the E. by the ci-
devant territories in the circle of Westphalia, now
annexed to France; and on the S. by the late
Austrian Flanders, Brabant, and the duchy of
Cleves; now annexed to France, and included in
the departments of the Scheldt, the Lys, the Two
Nethes, Jemappes, the Dyle, the Meuse, the
Ourte, and the Roer. They compose the great-
est part of the ancient BATAVIA, whose inhabi-
tants were formerly so much renowned for their
valour. Under the Romans they were exempt
from imposts and taxes, in consequence of bear-
ing the honourable title of *Allies of the Republic*.

(2.) UNITED PROVINCES, ANIMALS IN THE.
The animals here are much the same as in Eng-
land; but their horses and horned cattle are lar-
ger. Storks build and hatch on their chimneys;
but, being birds of passage, they leave the coun-
try about the middle of August, with their young,
and return in February following. It is said there
are some wild boars and wolves here; and that
neither oysters nor herrings are to be found upon
the coast; but of other fish they have the several
sorts, both in their seas and rivers, that we have
in Britain.

(3.) UNITED PROVINCES, CLIMATE, SOIL, AND
PRODUCE OF THE. The seven United Provinces
being in great part surrounded by the sea, lying
low and abounding in marshes, have a damp and
unwholesome air. Rains and fogs are frequent;
and the gout, scurvy, rheumatism, and agues,
very common and difficult of cure. The effects
of human industry here are wonderful in the
dykes and dams erected for defending the country
against the inundations of the sea, and in ditches,
canals, mills, and sluices, for draining the marshes.
The quantity of grain produced is not sufficient
for home consumption; but the pastures in the
marshes are so rich, that they can spare a great
deal of butter and cheese for exportation. They
have also a good breed of sheep, whose wool is
highly valued. There is turf, madder, tobacco,
some fruit, and iron; but all the pit-coal and tim-
ber used in this country, and indeed most of the
necessaries of life, are imported. All the provin-
ces either lie upon, or communicate with the
North Sea, by means of the *Zuyder*, or *South Sea*;
which was formed partly by the Rhine's right
branch, then increased by the Vecht, which has
now another outlet, overflowing the low swampy
grounds through which it passed; and partly by
the sea, in the 13th century, breaking in, and over-
flowing

flowing a large tract of ground contiguous to that before laid under water by the Rhine.

(4.) **UNITED PROVINCES, COMMERCE AND MANUFACTURES OF THE.** With regard to the commerce of this country, their East India company had the monopoly of the fine spices for more than 100 years, and was long the most opulent and powerful of any in the world. Though the country itself produces very few things, yet almost all the products and commodities of the globe may be found here, nearly as cheap as in the countries where they are made or produced. A vast variety of manufactures are carried on in the provinces, and a great number of hands are employed, and much wealth acquired, by the herring, cod, and whale fisheries. Ship-building employs vast numbers of hands. The trade of this country however, upon the whole, has long been declining; owing partly to a decline of their ancient parsimony and industry; but chiefly to the improvement of manufactures, trade, and navigation, in other countries; and still more effectually (recently) by the anti-commercial tyranny of Bonaparte.

(5.) **UNITED PROVINCES, ESTABLISHED RELIGION OF THE.** The established religion here before the Revolution was the Presbyterian, or Calvinism; none but Presbyterians were admitted into any office or post in the government, excepting the army; all religions and sects, however, were tolerated, and had their respective meetings or assemblies for public worship, among which the Papists and Jews were very numerous. Since the late alliance with France, no particular religion is established; and the phlegmatic Dutch have drunk deep of the cup of infidelity, mixed by their new and volatile allies.

(6.) **UNITED PROVINCES, HISTORY OF THE, TILL THE CAPTURE OF BRIEL.** At the accession of Charles V. the seven provinces, which now compose the Batavian Republic, enjoyed a kind of independence; but his policy and warlike disposition soon reduced them to obedience. When he resigned the sceptre to his son Philip II. the Low Countries were in a most flourishing condition. In this small tract of country were reckoned no fewer than 350 large cities inclosed with walls, and 6,300 considerable towns, all become rich by their application to the arts and to commerce. The extreme superstition, however, and cruel bigotry of Philip, soon proved a source of discontent. The doctrines of the reformers had been preached and received with avidity in the Low Countries. A cruel persecution of the reformed had been commenced by Charles V. inasmuch that he is said to have destroyed no fewer than 100,000 persons on account of their religion. This cruelty had no effect except to increase the number of heretics; which being observed by Mary queen of Hungary, sister to the emperor, she invited him to the Low Countries, that he might personally behold the bad effects of his cruelty. On this the emperor granted a toleration, but Philip was altogether inflexible. To proceed more effectually against the reformed, a court of inquisition was instituted; and under pretence that the three bishoprics, which at that time comprehended the whole country, were too large, 17 of these dignitaries were erected, three with

the title of archbishops. To afford sufficient revenues for these, it became necessary to suppress several abbeys, which of itself produced great discontent. But what gave the finishing stroke to the whole was, Philip's announcing his intention of residing constantly in Spain; his appointing MARGARET, duchess of Parma, his natural sister, to be regent of the Netherlands; and giving her for a counsellor cardinal Granvele, a bloody persecutor of the reformed; at the same time that the provinces were oppressed by the violences of foreign troops, for the payment of whom they were also oppressed by taxes. The duchess took upon her the government of the Low Countries in 1560; and was no sooner arrived at Brussels, than complaints poured in from all quarters against the inquisition, cardinal Granvele, and the new bishoprics. The duchess endeavoured in vain to allay the ferment. At the head of the malecontents were the prince of Orange, count Egmont, and count Horn, who strenuously insisted on calling an assembly of the States-general, and laying before them the grievances by which the country was oppressed. The event was, that in 1564 the cardinal was obliged to resign his dignity; which yet produced no good effect, as he was succeeded by two of his creatures, Barlamont and Viglius, who trod exactly in his footsteps. They pushed on the inquisition to fresh executions. All the obnoxious decrees were enforced with double rigour; upon which the state of affairs became so alarming, that it was thought necessary to send count Egmont into Spain, to have a personal interview with the king on the subject. Philip, accustomed to deceit, gave a smooth answer, abated the rigour of his decrees, and ordered the governante sometimes to consult with the prince of Orange. Thus tranquillity was for a time restored; but in 1566, it being discovered that a scheme for the total extirpation of the Protestants had been concerted by the queen-mother of France, her son Charles IX. and Isabella queen of Spain, in a conference at Bayonne, matters became worse than ever. The consequence of this was a general association against the inquisition. The confederates, headed by Henry de Brodenrode, waited on the duchess of Parma, in such a formidable body, that she was obliged to dismiss them with an absolute promise of granting their demands. This promise not seeming likely to be fulfilled but by force, they sent deputies to Madrid; and receiving no satisfaction, the people broke out into acts of open rebellion. The principal inhabitants, however, still remained quiet; but instead of taking measures to conciliate them, Philip sent the duke of Alva into the Netherlands with an army of 10,000 veteran troops, to put the last hand to the misery of the people. The prince of Orange retired into Germany, along with counts Brodenrode and Hoogstrate. Their example was followed by great numbers of all ranks and conditions; and the duchess of Parma resigned the government. She was succeeded by the duke of Alva. The new governor was a proud and mercilefs tyrant; and the army he commanded was fierce, rapacious, and cruel. The whole country was filled with blood and horror; counts

Egmont

mont and Horn were ignominiously executed, and the estate of the prince of Orange was confiscated. These last proceedings drove the people to despair; and they invited the prince to return and take upon him the defence of the country from such insufferable tyranny and oppression. All this time the prince of Orange, and his brother Lewis of Nassau, had been labouring to form alliances for the defence of the liberties of their country. He had represented matters in such a light to the emperor Maximilian, that he sent an ambassador to Philip, exhorting him to treat his subjects in the Netherlands with less rigour. This embassy was haughtily received; Philip continued his persecutions, and the prince of Orange his preparations for entering the low countries. His first efforts, however, were very unsuccessful. A detachment of Germans in the service of the prince attempted to penetrate into Brabant and surprize Liuremond; but were defeated by a detachment from the duke of Alva's army. Another party consisting chiefly of French, attempted to penetrate into Artois by the way of Picardy; but their officers were arrested by orders of Charles IX. Lewis of Nassau, however, defeated a body of Spaniards, and killed 600 of them on the spot; but the vigilance of his enemies prevented him from drawing any advantage of consequence from his victory. The duke of Alva was so much hagrined at the defeat sustained by his party, that he instantly assembled his troops from all quarters. His army then appeared too formidable to be opposed, and the prince of Nassau, with count Hoogstrate, retired towards the Ens. But being hard pushed by the duke of Alva, and mutinies arising among their troops for want of pay, they were soon brought to an action, and totally defeated. In the mean time, the prince of Orange was hastening to the relief of his distressed allies with an army of 28,000 men; but being also defeated, and Hoogstrate killed, his soldiers deserted in such crowds, that he was at last obliged to disband his army and return to Germany. This disaster happened in 1569. The duke of Alva resolved to make the most of his time. He entered Brussels in triumph; and let loose his vengeance against all who had in the least assisted, or been supposed to assist, the prince of Orange. All the prisoners taken in the last campaign were put to death: and, not contented with this barbarity, the cruel governor projected nothing less than the total extirpation of the reformed religion, by the destruction of every one who professed it; and of rendering himself despotic, by erecting citadels in all the considerable towns which were to be garrisoned by his soldiers. He began with Amsterdam, in which he laid the foundations of a strong citadel. The people complained of it as an infringement of their rights, but the duke was deaf to their complaints. At Antwerp he caused his statue to be erected; and here he was figured treading on the necks of two smaller statues, which represented the two estates of the Low Countries. This piece of insolent vanity exasperated the people to a great degree; and they were still farther provoked by a demand of the twentieth part of every man's estate to be paid immediately for the sup-

port of the army, besides the tenth of all the merchandise, and the twentieth of all immovables, to be annually levied as a standing revenue. The provinces remonstrated, and refused to submit to such intolerable exactions: the governor was inflexible; and being incensed at their resistance, he sent the regiment of Lombardy to live at free quarters in the province of Utrecht. All this time the prince of Orange was employed in laying plans for the deliverance of his distressed country; but in 1571, the duke of Alva growing impatient, ordered the edict concerning the new taxes to be published at Brussels. The city was instantly filled with confusion; the soldiers seized on the goods of the inhabitants by force; tradesmen shut up their shops; and the peasants refused to bring provisions to the market. The states offered to pay a subsidy of 2,000,000 florins annually in lieu of the intended tax; but their offer was rejected. The drum beat to arms; and orders were issued to hang all who refused to comply. The soldiers were preparing to obey, when news arrived of the surrender of Briel in the island of Voorn, at the entrance of the Meuse, to a squadron of ships of war that had been fitted out by the prince of Orange. Lumey, who commanded the squadron, made a descent on the island from forty ships, destroyed the churches, broke the images, and executed the priests, but offered no violence to the other inhabitants.

(7.) UNITED PROVINCES, HISTORY OF, THE TILL THE CRUEL MASSACRE AT WAERDEN. However unimportant the conquest of so inconsiderable a place as Briel might appear, it alarmed the duke of Alva, and produced the most extravagant rejoicings in Brussels. The duke regarding it as the harbinger of further opposition, dropped his taxes and executions, and diligently applied himself to suppress the growing spirit of rebellion. He withdrew the garrison from Brussels, and detached it, under the command of Maximilian Hermin Bossu, against the ships of war which were called *Gueux*. This officer, endeavouring to force Briel, was defeated by the Orange party, and forced to retire with loss to the island of Beyerland. Trifling as this victory might seem, it served to animate the depressed spirits of the enemies to the government. The prince of Orange, sensible of the advantage of possessing this island, exhorted the nobility of his party to fortify and garrison it; his orders were obeyed, by which means he soon became master of Delfshaven, a town situated on the opposite banks of the Meuse. It appeared in Bossu's retreat how unpopular the duke of Alva was in every part of the country. Dordrecht shut its gates against him; Rotterdam refused to admit his troops; but Bossu obtaining permission that they should pass through in separate small divisions, seized the gates, and began a general massacre of the inhabitants. Four hundred perished by the sword, the town was pillaged, the women were ravished, and every possible act of barbarity and inhumanity committed. Retribution was soon made by the enemy: Alva had detached Ossorio d'Angulo with a body of horses to secure the port of Flushing, and to erect a citadel. The inhabitants de-

nited Ossorio admittance, shut their gates, and seized Pacanco, a famous engineer, who had come to measure the ground where the citadel was to be erected. Apprehending that attempts would be made to force them to submission, they petitioned Lumey, admiral of the Gueux, for assistance; and he furnished them with 200 men, under Captain Treflong. On the arrival of this reinforcement, the Spanish engineer was hanged, and an unsuccessful attempt made to surprise Middleburg, the capital of Walcheren. Not dispirited by this disappointment, the Zealanders assiduously prosecuted their cruises upon the Spaniards, and obtained as much wealth as purchased a large store of arms and ammunition at Antwerp. Joined by great numbers of English and Scottish adventurers, they ventured to attack the duke of Medina Celi, sent with a strong squadron to succeed the duke of Alva in the government of the Netherlands. The duke was completely defeated, a great number of his ships were taken, and a booty, amounting to near 1,000,000 livres, was carried off by the Zealanders. The duke of Alva now ordered a squadron of ships to be equipped at Amsterdam, to bridle the insolence of Lumey and the Zealanders, while he raised an army to oppose the prince of Orange and Lewis de Nassau, who were making great preparations in Germany and France. To augment the army in the field, he had draughted most of the garrisons. Thus the prince's friends gained possession of North Holland; and Lewis of Nassau was projecting a scheme to surprise Mons, with the inhabitants of which he held a secret correspondence. The design succeeded; which emboldened most of the cities and towns in Holland to declare against the government. The count de Bergues gained over several cities in Overysel, Guelderland, and Friesland. In a word, the revolt became so general, that the duke of Alva soon found he could not long resist the torrent. He now, when too late, published an edict to appease the people, setting forth, that he would consent to remit the most oppressive taxes, if the States could suggest any other means of raising the necessary supplies. He convoked the States-general to meet at the Hague, but his orders were now disregarded; and the States, in contempt of his authority, assembled at Dordrecht, inviting deputies from the prince of Orange, the nobility, and the towns that had declared against the governor. Here money was raised to enable the prince of Orange to begin his march. His forces amounted to 15,000 foot and 7000 horse. He had promised to advance three months pay; and was enabled to perform his engagements by the liberality and public spirit of the States-general and the cities. He showed the address with which he could manage and direct the people; and without the name of sovereign of the provinces under his government, he possessed the authority. However, he conducted matters with the utmost delicacy. The Popish religion was banished the churches, and persons of that persuasion were, with great caution, admitted into public employments. Not only the king's revenue and church tythes were appropriated to the public service, but the estates

of those who remained firm in their loyalty. While the States-general were employed in ways and means to maintain an army, the prince of Orange advanced to Ruremonde, which he took by assault. From thence he marched to Brabant, and raised heavy contributions. He took Mechlin, Oudenarde, and Dendermonde; but could not restrain the excesses of the soldiers, who pillaged the churches, massacred the priests, and committed other barbarities. Next he approached to Mons, besieged by the duke of Alva, with design if possible, to engage him to give battle. The duke baffled all his endeavours to force him, and carried Mons by capitulation. The whole Spanish dominion, however, lately so insolent and exulting, was ready to expire in the Netherlands, had it not been revived by the massacre of the Protestants in Paris. While the fate of Mons was depending, the States of Holland met at Harlem, to deliberate on the defence of the province and the prosecution of the war. Amsterdam was in the enemy's hands, which greatly obstructed all their measures. It was therefore determined to besiege it; and the enterprise was committed to Lumey, chief of the Gueux. After putting the States to considerable expence, the project miscarried through Lumey's misconduct. Water was his element, but his vanity led him to display his abilities as a land-officer. He made regular approaches, and was foiled in every attempt. The reduction of Mons, and the depression of spirit consequent on the massacre at Paris, obliged the prince of Orange to retire to Holland, and encouraged Alva to invest Dendermonde, Oudenarde, and Mechlin. The latter, being in no condition to resist, opened its gates; but the Spanish soldiers chose to scale the walls, to give an air of assault to the enterprise, and countenance to the horrid barbarities intended. Protestants and Catholics were massacred without distinction. The town was pillaged, and the booty estimated at 400,000 florins. All the other towns were evacuated by the garrisons, and loaded with heavy impositions by Alva. As to the prince, he had now removed the seat of war into the province of Holland. Only this province and Zealand remained firm to their engagements; the rest, overwhelmed with consternation, capitulated on the best terms they could procure from the government. Frederic de Toledo was dispatched by Alva to begin the operations in Holland. He had already reduced Zutphen and Guelderland; and, flushed with success, appeared before Wzerden, which he summoned to admit a garrison. The burghers replied, that they were entrusted by the king with the defence of the place, and could not receive a military force without violence to their privileges and engagements. They soon had reason to repent their firmness: the town was taken by surprise; and all the burghers, assembled in the great church to take the oaths of fidelity to the king, were wantonly butchered. Infants, old men, women, and the sick, were all put to the sword, without pity or remorse; and of all the barbarities hitherto committed, this was the most horrible.

(8.) UNITED PROVINCES, HISTORY OF THE, TILL THE CAPTURE OF HARLEM. Having finished

ished this tragedy, Frederic went to Amsterdam, to deliberate with the officers of the army about the siege of Haerlem. Here it was determined, before they proceeded to extremities, that the city of Amsterdam should write to the magistrates, exhorting them, in the most pathetic terms, to submit, rather than incur the punishment inflicted on Waerden. The council of Haerlem met to take this letter into consideration. Some were for soliciting an immediate reinforcement from the prince of Orange; and others, who apprehended the prince was too weak to afford the necessary relief, were for making the best terms possible with the king. Those of the latter opinion were the magistrates. Accordingly, without consulting the burghers, deputies were dispatched to Frederic to stipulate conditions. In their absence, Ripperda, a gentleman of Friesland, strongly attached to the prince of Orange and the cause of liberty, assembled the chief burghers; and so animated them against the Spaniards, that they resolved to stand a siege, and suffer all the horrors of war rather than submit. They sent to the prince of Orange to acquaint him with their determination, and to implore assistance. Four companies of Germans were detached to reinforce the garrison of Haerlem; and the deputies, on their return, were seized as traitors to their country, sent to the prince of Orange, and by his order beheaded. Frederic was preparing to compel the burghers to submission. On the 19th of December he invested the town, after carrying Sparendam fort by assault, with great loss and slaughter of his soldiers. A variety of errors were committed in the attack, in the defence, and manner of succouring Haerlem. The assailants and defendants had equally shown themselves ignorant of the art of war, and implacable in their resentment. The prince of Orange used every expedient to relieve the town; but all his attempts were frustrated by untoward accidents, and the vigilance of the Spaniards. At last, quite spent with fatigue, despairing of relief, weakened by losses, and totally exhausted of provisions and ammunition, the burghers of Haerlem surrendered upon more favourable terms than they could well expect. A few only of the most obstinate were executed; the rest were pardoned on taking an oath of fidelity, and paying an acknowledgment of 15,000 florins. During the siege of Haerlem, the Zealanders were performing glorious achievements by sea, and gaining victories over the Spanish naval armaments. All the efforts of the governor of Antwerp could not prevent their carrying off a great number of ships out of the harbour. To revenge the insult, and relieve Middleburg and Rammekeins, blocked up by the Zealanders, he equipped a squadron, and gave battle to Wertz, the Zealand admiral, but was defeated. After repairing and augmenting his fleet, he again set sail with sixty large vessels, encountered a squadron of Zealanders much inferior in strength, and met with his former fortune. Most of his ships were sunk or taken; but he found means to push into Middleburg, with the broken remains of his squadron, to the great joy of the garrison, now reduced by the scarcity of provisions to the last extremity. D'Avila's dis-

grace did not end here; for, on his return to Antwerp, he was a third time attacked and defeated with considerable loss, by Wertz, who thus repaired the disappointment of an unsuccessful attempt made on Tolen.

(9.) UNITED PROVINCES, HISTORY OF THE, TILL THE DEFEAT OF THE SPANISH FLEET. Soon after the reduction of Haerlem, Alva, perceiving that his severity answered no other purpose than irritating the people more against the Spanish government, published a proclamation, couched in the most soothing terms: but the people were not disposed to confide in promises so often violated. The Spaniards were preparing to invest Alcaer, and the Hollanders put every means in practice to resist them. Frederic, with 16,000 men, sat down before a town fortified by no regular works, and defended only by 300 burghers, and 800 soldiers, in extreme want of provisions, and without the prospect of relief. But the prince of Orange so animated them by a letter, that, to a man, they determined to sacrifice their lives, and spill the last drop of their blood in the breach. What particularly inspired the defendants with courage, was the prince's good fortune in surprising Gertrudenburg. Their valour was crowned with success, the siege being raised and the town relieved. This advantage was attended with another of less importance, but which equally served to inspire the Hollanders. The duke of Alva's grand fleet, equipped with great labour and expence, was defeated by the Zealanders.

(10.) UNITED PROVINCES, HISTORY OF THE, TILL THE PACIFICATION OF GHENT. Notwithstanding this success, the affairs of the States were yet in a most precarious situation; and their ability to support themselves appeared in the highest degree problematical. The duke of Alva had resigned the government, and his successor Don Lewis de Requesnes had orders to push the war with vigour, while his antagonists prepared for the most obstinate resistance. The first advantage appeared on the side of the prince of Orange, by the surrender of Middleburg. But this was soon balanced by the defeat and death of prince Lewis of Nassau. The Spaniards, however, were prevented from pursuing the advantage they had gained, by a mutiny among their troops. Their distresses on account of this tumult were likewise augmented by a victory gained by the Zealanders at sea; when almost 40 of the Spanish ships were taken or destroyed. Philip then perceiving that numberless difficulties would attend the reduction of the provinces by force, published an act of grace; but in such a limited manner, that it was unanimously rejected. Requesnes then determining to close the campaign with some remarkable exploit, laid siege to Leyden. The city was reduced to the utmost distress for want of provisions; the whole country was laid under water; and they could receive no relief except what was obtained by boats forcing themselves through the enemy to the city. In short they were reduced to the brink of destruction, when a violent south-west wind drove the inundation against the works of the besiegers with such violence, that they were obliged to relinquish

The enterprise. In their retreat they were attacked by the garrison, and 500 of them destroyed. This disappointment so provoked the Spanish soldiery, that they deposed Valdes the commander, whom they had chosen for themselves, and proclaimed their old one: a second mutiny ensued, and they marched in a tumultuous manner to Utrecht. Here, however, they met with a very unfavourable reception. Barlaumont the governor declared them rebels and traitors to their king; and gave free liberty to every one to massacre them wherever they could be found. The mutineers attempted to set fire to the gates; but being repulsed, and their leader slain, they capitulated, were received into favour, and sent into winter-quarters. The year 1575 commenced with some negotiations for peace; but these proving ineffectual, though the emperor interposed his mediation as far as possible, the war was renewed with redoubled fury. Fortune now declared in favour of the Spaniards: and the States were reduced to such despair, that they began seriously to think of making an offer of the provinces to some Protestant power who might be able to defend them against the tyranny of the Spaniards. This offer was made to queen Elizabeth of England; but she declined it, for political reasons. A negotiation was even set on foot for this purpose with France, in favour of the duke of Anjou; but it ended in nothing besides the advantage of establishing a mart at Calais for the disposal of the prizes made by the Gueux. Philip, however, notwithstanding his power, had the utmost difficulty in supporting the expence of the war. He had already borrowed more than 40,000,000 crowns from the Spanish and Genoese merchants, and the interest still unpaid now amounted to as much as the capital. The war had besides cost a greater sum sent in specie from Spain and the Indies, which, with the immense losses occasioned by the stagnation of trade in the Netherlands, had quite exhausted the treasury. Large arrears were due to the troops; they were every day mutinying, and some broke out into actual rebellion. To remedy these evils, Requesnes demanded a supply of the provinces; and they answered him, by requiring restitution of their privileges, and dismissal of the Spanish troops. Flanders, in particular, paid the desired subsidy, by balancing it against half the damages the province sustained from the misconduct of the governors and the wars wantonly and unnecessarily excited. While this affair was in agitation, Requesnes died of an ardent fever: the council of state assumed the administration, and the prince of Orange took the opportunity of the confusion that ensued to lay the first foundation of the Pacification of Ghent, by which his affairs were considerably retrieved, and the greatest blow given to the court of Spain she had yet sustained. All now was anarchy in the Low Countries. The garrison of Ziericzee mutinied for want of pay; and to appease them, the council of state sent 500,000 livres, which the Walloon regiments under Madragon seized upon, after expelling the Spanish soldiers, and wounding and murdering their officers. This did not unite the Spanish mutineers among themselves; they turned out

the few remaining officers, and made new appointments. Joining with the garrison of Lillo, they marched, to the number of 2000 men, towards the capital; committed horrible outrages; overwhelmed the inhabitants of Brussels with conflagration; and, upon the 26th of July, seized upon Alost, confined the principal burghers, and hanged up a king's officer. The most favourable conditions were offered by the council of state, to appease the tumult, and provisions were sent to the mutineers. This created suspicion in the inhabitants of Brussels, that the mutiny was excited by the connivance of the council, with a view of ruining the provinces, without incurring the resentment and odium consequent on any appearance of legal oppression. They arrested the council, declared the Spaniards rebels, and took measures, in concert with the other cities and provinces, for expelling foreigners out of the Netherlands. A confederacy to this purpose was formed between the provinces of Hainault, Artois, and Flanders, to which all the rest except Luxemburgh acceded; and Don John of Austria, who had entered the Low Countries in quality of governor and successor to Requesnes, was obliged to live in obscurity in Luxemburgh until the storm should subside. The prince of Orange was all this while profiting by these commotions. He had long laboured to have the States-general convoked; and he now saw them not only assembled, but preparing to make head against the Spaniards, by a strange vicissitude of fortune, arising from accidents which all his penetration and sagacity could not foresee. United in councils against the common enemy, every measure was taken for reducing the citadels of Ghent, Antwerp, and Maestricht, the chief places in the hands of the Spaniards, and what must principally contribute to their expulsion. Ghent citadel was taken on the 27th of November, 1576, by the assistance of a strong reinforcement of troops and artillery sent by the prince of Orange. At Antwerp the states of Brabant were less successful. The citadel was vigorously attacked; but the mutineers at Alost entering the citadel to assist their countrymen, a sally was made, the besiegers were driven from their trenches, great part of the town was consumed by fire, and the rest pillaged for three days with every kind of insolence and brutality, at a time when Antwerp was the most flourishing and populous city in the Netherlands, and indeed among the most wealthy in Europe. It is affirmed that the treasure carried off amounted to four millions, besides an infinity of rich merchandise. This terrible calamity united Papists and Protestants without distinction in a confederacy, and co-operated with the measures of the prince of Orange to form the Pacification of Ghent: which was a confederacy of all the provinces to expel foreign soldiers; to restore the ancient form of government; to refer matters of religion to the several states of the provinces; for ever to unite the other 15 provinces in the same common interest with Holland, Zealand, and the prince of Orange; to renew the commerce and amity between them; to assemble the states in the manner practised under the house of Burgundy and Charles V.; to suspend all the rigorous edicts

the duke of Alva on the subject of religion, unless the States-general should take the matter into consideration; to release all the natives made prisoners, mutually, without ransom; and to restore all things upon the same footing as before the war, and the tyrannical government of the duke of Alva.

(II.) UNITED PROVINCES, HISTORY OF THE, ALL THE UNION OF UTRECHT. The States-general began with soliciting aid from the queen of England. Their ambassador had a gracious reception; and Elizabeth advanced them 20,000*l.* sterling, on condition that the French should not be invited into the Netherlands, that they would accept of reasonable terms of accommodation if offered, and that the loan should be repaid the ensuing year. Next a cessation of hostilities was agreed upon with Don John, upon his assurances that every reasonable request of the provinces would be granted. On the 27th of December, deputies were sent with proposals to Don John to disband the foreign troops; but he denied to now what security the States would give for their allegiance after the departure of the Spanish forces; and remonstrated against the unreasonableness of disarming the king, while his rebellious subjects were in arms, and ready to seize the first opportunity of deserting their obedience. He likewise demanded security with respect to religion; and insisted so warmly on this head, that it was obvious he had no inclination to part with the Spanish army before the provinces of Zealand and Holland embraced the Catholic religion. After much altercation, necessity at length obliged Don John to grant all that was required, to confirm the Pacification of Ghent, and dismiss the Spanish army. He had the king's authority for his proceedings; the treaty was proclaimed at Brussels and Antwerp on the 17th of February; and Don John immediately acknowledged governor, and he king's lieutenant of the Netherlands. It must be observed, however, that when this edict was signed, the provinces of Holland and Zealand, by the advice of the prince of Orange made the following objections; *viz.* that the States-general had not established the right of assembling this sovereign tribunal in the persons originally invested with that power by the constitution; that in some particular instances they had suffered an infraction of their privileges; that the Spanish troops were allowed to carry off the immense wealth they had acquired in the Netherlands, and by the destruction of the city of Antwerp in particular; that no stipulation was made in favour of those dispossessed of their estates, &c. For these reasons the States and the prince refused to sign the edict, though they consented to all the articles that did not contradict those specified. This raised a contention, by which the public peace was soon broken. Don John was strenuous in recommending violent measures against the prince and his party. To this purpose he wrote a letter in cipher to the king; but this letter fell into the hands of Henry IV. of France, who transmitted it to the prince of Orange. Escovedo, secretary to Don John, was next sent into Spain with a message to the same purpose; but the governor becoming impatient for his return, left the country himself, un-

der pretence of complimenting Margaret Q. of Navarre on her journey to Spaw. In this expedition he seized on the citadel of Namur; but attempted to justify his conduct to the States, by representing, that he was under a necessity of retiring to a place of safety, while he saw the flames of war and rebellion ready to break out all around him; and concluded with desiring the States to disarm the burghers of Brussels, who were closely attached to the prince of Orange. This letter was answered by an invitation from the States to return; promising at the same time, that they would, to the utmost of their power, bring to punishment all those who should form any designs against him. This, however, was not only refused, but the whole tenor of his conduct afterwards showed, that he was resolved to commence hostilities, and that he was encouraged to do so by Philip. The event was, that Don John was deposed from his dignity, the archduke Matthias was appointed governor general, and preparations were made for a new and vigorous war. The Spanish troops were ordered to assemble in Naples and Milan; levies were made in Burgundy and Luxembourg; and a resolution was taken of supporting Don John with the whole power of the Spanish monarchy. To oppose this formidable power, the States, in 1578, entered into a new treaty with the queen of England; by which that princess agreed to advance them 100,000*l.* Sterling, and to assist the provinces with 3000 foot and 1000 horse; on condition that the loan should be repaid with interest in 8 months; that certain towns should be ceded to her in security; and that the States should defray the expence of transporting their troops, and take them into pay, while they acted in their service. Elizabeth, however, afterwards departed from these conditions, under pretence that the French would suspect her having some designs on the Netherlands, and would for that reason unite their forces with those of Spain against her. Instead of the English troops, she now proposed to send John Calmar, count Palatine, with 3000 foot and 3000 horse; refusing at the same time to pay the money stipulated, till the States had consented to this alteration. Before this treaty was concluded, Don John was joined by an army of 16,000 foot and 2000 horse, all chosen veterans, commanded by Alexander Farnese, duke of Parma, the best officer in the Spanish service. Being thus superior to the prince of Orange, the Spaniards gained several advantages; which, however, were more than balanced by the loss of the city of Amsterdam. This place had been closely blocked up for several months by sea and land, and at last concluded a treaty with the friends of the prince of Orange; by which it was stipulated, that the Protestants should hold their religious meetings without the walls, and have a burying-place within; that the garrison should be disbanded, and 600 men, commanded by the burghers, levied for the defence of the city; that all persons banished on account of religion should be recalled; that Amsterdam should enjoy all its ancient privileges, and that all vacancies in public employments should be filled without distinction of party or connection. This capitulation, however, was soon after broken; the Catholic magistrates

magistrates were driven out of the city, attended by the priests and popish clergy of every denomination; the images were pulled down, and only the reformed clergy suffered to preach publicly. Some ineffectual negotiations next took place; after which the States, sensible that the misfortunes and losses in the winter arose from the dissolution of the provincial states, vested the archduke, the council of state, and the prince of Orange, with a power of levying what number of troops they should think necessary, and disposing of them as they thought proper, without referring to the states in every particular: they only recommended that they would proportion the expences to the revenue, which at that time amounted to 600,000 livres. About this time a revolution, greatly beneficial to the common cause, was effected in Guelderland; John of Nassau, brother to the prince of Orange, had been appointed governor of this province. Upon entering on the administration, he perceived that the whole conduct of affairs was in the hands of persons strongly affected to king Philip and the Catholic religion; most of the cities professed Popery; and the count, who had sworn to the pacification at Ghent, was refrained from attempting any change in religion. The face of affairs, however, took a sudden turn; John acquired great popularity, and soon discovered that foreigners were the leading persons. By this artifice and policy he stimulated the people against them; they were deprived of their seats in the provincial states, and turned out of their offices in the government of the cities. Thus Nassau obtained the chief direction, and was able to co-operate with the measures planned by his brother. Another revolution happened in Groningen, of which the *seur de Billy* was governor. Billy was by birth a Portuguese, by religion a Catholic, and consequently a dependent on the court of Spain: he refused to accede to the union of the provinces, and the States-general found it necessary to send to him Francis Martin Stella, with proposals for signing the pacification of Ghent. Billy suspecting that the deputy's real design was to excite a revolt in the province, put him to the torture to extort confession; after having first wounded him with his own hand. The deputy bore the most excruciating tortures with firmness; and having a surgeon to dress his wound to enable him to undergo a second trial, he communicated something in the Greek language, which the surgeon soon made public: in consequence, the mob assembled, rescued Stella, declared for the pacification of Ghent, and obliged Billy to quit his government. The change of councils in these two provinces was of the utmost service to the confederacy; and would have enabled the province to have encountered the whole power of Spain, had not their affairs been distracted by dissensions among themselves. At last the prince of Orange, perceiving that little confidence was to be placed in the unanimity of provinces rent by faction, different in religion, and divided by ambition, political maxims, and private interest, formed the scheme of more closely uniting the provinces of which he was governor, and cementing them with those more contiguous, in which the Protestant interest prevailed. Such an alliance was subject

to fewer difficulties than attended the more general one of uniting all the provinces; it was in fact the only measure that could be proposed with safety, and it was prosecuted with that alacrity and address for which William was deservedly celebrated. On the 23d of January 1579, deputies from the provinces of Holland, Zealand, Utrecht, Friesland, Groningen, Overijssel, and Guelderland, met at Utrecht, and signed the alliance ever since known by the name of the *Union of Utrecht*, the basis of that commonwealth, so renowned by the appellation of the *United Provinces*. This treaty of alliance was founded upon the infraction of the pacification of Ghent solemnly acceded to by Philip, and the late invasion of certain towns in Guelderland. It was not hereby intended to divide the seven provinces from the other ten, or to renounce the pacification of Ghent; its object was to preserve the liberty stipulated in that pacification, by more vigorous operations, and united councils. This alliance was so universally approved, that in a short time the cities of Ghent, Nimeguen, Arnheim, Leewarden, Yvelo, Ypres, Antwerp, Breda, Bruges, with several other towns, besides a great number of noblemen and persons of distinction, embraced and signed the union.

(12.) UNITED PROVINCES, HISTORY OF THE TO THE MASSACRE OF MAASTRICHT. While the prince of Orange was busied in conciliating factions, forming alliances, and strengthening the union, the duke of Parma was taking measures to disconcert his projects, and reduce the provinces to the king's obedience. He dispatched Gonzaga and Mondragon with 8000 men to lay siege to Maastricht. The town was taken by assault; the governor hanged; and 45 of the chief inhabitants were tortured to death. After some farther inconsiderable advantages obtained in the neighbourhood of Ruremonde, the king's army insulted Antwerp, where the archduke and the prince of Orange then resided. The States army was intrenched near Bergerhont, a post attacked without success by the duke of Parma, after a brisk skirmishing of two hours between the armies. La Noue, however, the general of the states army, not choosing to expose himself to continual alarms from the enemy's cavalry, retired under the cannon of Antwerp. On La Noue's retreat, the duke of Parma invested Maastricht. The siege began on the 8th of March, and continued without remission to the 29th of June. This defence was deemed very extraordinary, as the fortifications were in bad order, the garrison slender, and the place but poorly provided with the necessaries of a siege. One Sebastian Tappin, an engineer by profession, a Protestant, and a brave and alert soldier, by his indefatigable vigilance raised continual obstructions to the duke's approaches. The garrison had sustained frequent assaults, and made divers bloody sallies, by which they were so much fatigued, that during a parley the town was surprised and many soldiers were put to the sword; but Tappin was saved by favour of the duke of Parma, who gave strict orders that he should have quarter. For three days Maastricht was a scene of the utmost desolation and horror, the Spanish soldiers committing every excess and enormity.

despite of all the endeavours of the general, to refrain their licentiousness, and maintain discipline.

(13.) UNITED PROVINCES, HISTORY OF THE, OR THE REJECTION OF PHILIP II. With such diligence did the duke apply himself to this siege, that, unable to support the fatigue, he was seized with a fever, which nearly proved fatal. His situation inspired the enemy with fresh courage. They ventured to appear in the field; reduced Aloft, and some other places of little consequence; but could not prevent the loss of Menin, taken by assault, though it was soon after retaken by the prince of Orange. In Brabant the states likewise obtained some advantages, though of too unimportant a nature to merit attention. The truth is, all the United Provinces were in a deplorable situation; and their trifling successes were owing entirely to accident, or the duke of Parma's illness. Several provinces contributed nothing to be common cause; others furnished but a small proportion of the taxes agreed upon at the union. The army had large arrears due, and lived at discretion; in a manner more oppressive to the people than taxes to the amount of their regular pay. The people clamoured against the states; they brew the blame on the officers for relaxing in the joint of discipline; and the officers recriminated, alleging, that the fault was in the states, who ailed in performing their engagements to the army. All was in confusion; but as no person would acknowledge his error, there appeared little hopes of amendment. In a word, nothing besides the same distress in the Spanish army could have prevented the duke of Parma from reducing the revolted provinces to accept any terms he should think fit to prescribe. He was equally in want of money; and his late treaty with the Walloons required that he should dismiss all his foreign troops in the space of six weeks after the publication of the treaty. His situation indeed was so deplorable, that he requested leave to resign his command, and retire with the foreign soldiers to Italy; but the court of Spain had too much confidence in his ability to entrust so important a charge to another. In this state of affairs the animosity of the parties remained, without the power of showing their resentment. The states were resolute, but unable to defend their liberties. Philip was determined, but too weak to be despotic; and both were obliged to content themselves with publishing bitter remonstrances against each other. At last the prince of Orange renewed the treaty with the duke of Anjou. The queen of England was again offered the sovereignty, but she still declined it. After long deliberations, and warm debates, it was at length determined, in 1580, to call in the duke of Anjou, as he only resource in so great a calamity. Accordingly the year began with a solemn treaty, whereby the United Provinces renounced their allegiance to Philip, and acknowledged Francis Hercules de Valois, duke of Alençon and Anjou, for their sovereign. As to the provinces of Holland and Zealand, they were left wholly in the hands of the prince of Orange, whose power as stadtholder was in no respect limited by the duke's sovereignty. After all, Grotius affirms, that the

duke's authority was merely nominal, that the real power devolved on the prince of Orange. When the king of Spain was informed of this open defection of the Provinces, he attributed the whole to the prince of Orange, and proceeded directly to proscribe him; he confiscated his estate, upbraided him with ingratitude, and attempted to stain his character with ignominy. He even promised a reward of 25,000 crowns to whoever should bring him the prince of Orange dead or alive; the same to his heirs, in case the person perished in the enterprise; and he declared all those proscribed, their estates confiscated, their honours and dignities abolished, who adhered to William a month after the publication of this edict. The prince of Orange did not silently pass over this proscription. He employed one Villiers, a Frenchman, to refute the edict: his answer was well received, and is recorded by historians as a proof of the spirit, the equity, the prudence, and the moderation of the prince. However, when it was proposed to the states for their opinion, with a request that they would publish it in their own name, they declined it; but the following year, after long deliberations at the Hague, they published an edict, excluding king Philip from any sovereignty, right, or authority, over the Netherlands. This writing appeared on the 26th of July 1581, under the title of *The Abdication of Philip king of Spain*.

(14.) UNITED PROVINCES, HISTORY OF THE, UNTIL THE MURDER OF WILLIAM I. PRINCE OF ORANGE. It was in vain for Philip to remonstrate; he knew the states were to be convinced only by the sword; to this therefore he appealed. The duke of Parma blocked up Cambray so closely, that the garrison was reduced to the extremity of living upon horses, dogs, and cats; though they still refused to capitulate, in hopes of being succoured. At length the duke of Anjou assembled a body of 10,000 foot and 4000 horse, and approached Cambray. The viscount de Turenne and count Voulondois undertook to force themselves with a body of men into the town; but they were surrounded and taken prisoners by the Spaniards. This disappointment did not discourage the duke of Anjou; he still pressed forward with intention to attack the Spanish lines: but the duke of Parma, not caring to hazard a battle, deserted his works, and retired to Bouchain. As soon as the duke of Anjou entered the city, he took an oath to govern it agreeably to its ancient laws, and to preserve the citizens in the full possession of all its liberties. He was now pressed by the states and the prince of Orange to march directly into Flanders: he endeavoured to comply; but his army, composed chiefly of volunteers, was so weakened by desertion that the design was laid aside. It was about this time that the duke of Anjou resumed the notion of addressing Elizabeth queen of England. Not deterred by the ill success of his former negotiation, he determined upon a voyage to England; an excursion which proved equally unsuccessful to himself and unfortunate to the United Provinces, as during his absence the duke of Parma made himself master of Tournay, which concluded the transactions of this campaign. He was magnificently entertained

entertained, led into a persuasion that all would succeed according to his wish, and at length tired out with tedious expectation. In his absence, St Guilan was reduced by the prince of Espinoi. This general directed his march towards Dunkirk, with intention to join the French forces. The duke of Parma, who had notice of his motion, repaired to seize the opportunity of investing Tournay. He began his approaches, and was vigorously received by that garrison, inspired by the courage of the princess Maria d'Espinoi, niece of the count Horn so cruelly beheaded by the duke of Alva. The town was stormed in breach by the D. of Parma, who supported the assailants in person, received a wound, and had the mortification to see the Spaniards thrown headlong from the walls. The duke of Anjou repeatedly promised succours; but either forgot, or could not perform his engagements: the latter indeed is the most probable; as he was certainly a dupe to the superior policy of Elizabeth, who had not yet declared openly in favour of the States. In the end, despairing of relief, harassed with perpetual watching, and weakened by losses, the garrison capitulated on the 29th of November. The conditions were honourable; and the prince of Espinoi was treated with particular marks of distinction by the duke of Parma, who highly esteemed the heroic qualities of this amazon. This advantage was succeeded by another, obtained by the Spanish general Verdugo, over the confederate army in Friesland, commanded by general Norris and William Lewis of Nassau, a young prince of great expectation. It appears from the Spanish account, that Norris was attacked in a defile, where he could not draw out his troops in battalia; and that he was put in confusion, and defeated with great loss. On the other hand, the Dutch writers allege, that he attacked the enemy; but being inferior to them in cavalry, retreated in good order, with scarce any loss. The year 1582 began with a spectacle very unusual in the Netherlands, the public entry of a sovereign elected by the people. The duke of Anjou setting sail from England on the 8th day of February, arrived on the 10th at Flushing, where he was received by the princes of Orange and Espinoi. Next day they set out for Antwerp with a magnificent retinue, and went up the Scheldt attended by 50 barges. His reception at Antwerp was splendid beyond any thing ever seen in the provinces; they even exceeded the preparations made for Philip himself on his being appointed to the government in the Netherlands by Charles V. his father. While the states of Brabant were employed in festivity and mirth, a Biscayan merchant, named *Gaspar Anafra*, had contrived a project to redeem his shattered fortune by the death of the prince of Orange. He corrupted one of his domestics, by the promise of half the reward, to strike the blow. The assassin entered the citadel; and as the prince was passing after dinner into another room, discharged a pistol and dangerously wounded him behind the ear. The prince was stunned with the force of the ball, and before he recovered, the assassin was killed by his attendants; which prevented for a time the absolute discovery of the plot, though it afterwards appeared from circumstances. It was traced that he had

confessed the secret to a Dominican named *Antonio Tunmermon*, receiving from the wicked priest absolution, and a promise of eternal reward. Tunmermon was hanged, drawn, and quartered, his limbs being fixed upon the walls of Antwerp. But though for this time the prince escaped the danger, he was in 1584 assassinated at Delft, by one Balthazar Gerrard or Guion, a person who had before served his highness with fidelity and zeal. He was at that very time employed by the prince to carry letters into France, and had received money to bear his expenses, with which he purchased pistols to murder his benefactor. At the criminal's examination, it appeared that he had long meditated this bloody action, and was confirmed in his resolution by the Jesuits and Catholic priests: he even affirmed on the rack, that the duke of Parma was privy to the design, who promised he should have the reward; upon the whole, Gerrard seems to have been an enthusiast, and his crime the result rather of insanity, than of any concerted scheme, or malicious intention. His punishment, however, regarded only the action: it was cruel beyond measure, shocking to humanity, and a striking instance of the vehement party-spirit of the times, rather than of the justice of the judges, or the attachment of the people to the prince of Orange.

(15.) UNITED PROVINCES, HISTORY OF THE, UNTIL THE PEACE OF 1648. The United Provinces were now in a most deplorable situation. The duke of Anjou had been totally unable to resist the duke of Parma, in consequence of which many towns had been taken; and in other respects the states had sustained immense losses. The duke of Anjou, chagrined and disappointed, had retired to France, where he died. But above all, the loss of the prince of Orange seemed to give the finishing stroke to the affairs of the states; and confusion and anarchy now reigned in their councils. The provinces of Zealand and Holland alone endeavoured to repair the loss, and show their gratitude to William by electing his son Maurice their stadtholder and captain general by sea and land, Maurice was at that time only 18 years of age; but appeared in every respect worthy of the high dignity which had been conferred upon him. The first step taken by the confederates was a solemn renewal of the treaty of Utrecht; after which the most vigorous preparations were made for the defence of the country. But before any thing of consequence could be done, the duke of Parma had reduced Lissenhouk, Dendermonde, Vilvorde, Ghent, and Antwerp; which struck the states with such terror, that they again offered the sovereignty to queen Elizabeth. This was once more refused; though that princess engaged, by a new treaty, to assist the states both with men and money. An army was accordingly sent into the Netherlands under the command of the earl of Leicester: but it does not appear that this was of any essential service to the cause; for the conduct of that general was so exceedingly improper, that he was not only baffled in every military enterprise, but drew upon himself a general odium. It is very probable indeed that the States could not long have supported themselves in such circumstances, had not Philip rashly engaged in a

war with England, with whose naval power he could scarce be enabled to cope by any superiority in numbers whatever. The defeat of the Spanish Armada in 1588, (See ARMADA, § 2; and ENGLAND, § 41.) gave such a blow to the power of that nation, as totally disabled them from carrying on the war in the Netherlands. Instead of sending the proper assistance to the duke of Parma, that general received orders to hasten to the aid of the duke of Mayence, who had been defeated by Henry IV. The duke was obliged to comply with this order, though he was sensible the loss of the United provinces must be the consequence. Prince Maurice now carried every thing before him; and by the end of 1591, the Dutch saw their frontiers extended, the whole country secured by rivers and covered by fortified towns, with the greatest probability of driving the Spaniards out of Friesland in another campaign. The remainder of the history of this war is only a detail of the Spanish losses and misfortunes, which now ensued. Their affairs were at last totally ruined by a decisive victory gained by prince Maurice, in 1600, over the archduke Albert, who had been appointed the Spanish governor of the Netherlands. Philip II. died in 1598, leaving the affairs of his kingdom in the most distressed situation; notwithstanding which, his successor Philip III. was too haughty to consent to peace, or allow that the States were free, though he was plainly unable to keep them in subjection. At last, in 1606, the courts of Madrid and Brussels began to think of peace in good earnest. In 1607 a suspension of hostilities took place, and in 1609 a treaty was concluded. In the first article of the treaty, the archduke, in his own and the king of Spain's name, acknowledged the United Provinces, and renounced all claim to sovereignty over them, but in such general terms as would admit of altercation. In the 2d, a truce for 12 years, by sea and land, through all the dominions of both parties, was concluded. By the 3d article, the parties were to remain in possession of what they held, without cession or exchange. In the 4th, a general amnesty was stipulated, and full freedom of trade by sea and land to each other's dominions granted. This necessarily implied a cessation of hostilities in the Indies; however, great debates afterwards arose upon this account. Spain observing the rapid progress of the Hollanders in the India trade, apprehended they would soon become too powerful in that quarter; and the Dutch were willing to maintain the advantage of their superiority. Both, for this reason, disputed the article; yet it could not be set aside without destroying the whole treaty, and the fruits of all their laboured conferences. The 5th article regulated the imports, and duties to be paid by the subjects of the archduke and the States, trading to each other's dominions, which were to be on the same footing with those of other nations. The archduke used his utmost endeavours to have the duties at Lillo, on the Scheld, abolished, and the commerce of Antwerp restored to its former grandeur; but this was so diametrically opposite to the interest of the Hollanders, that it was impossible it should ever take place. The 6th and 7th articles likewise regard-

VOL. XXII. PART II.

ed commercial affairs. But it would be unnecessary to dwell on particulars. Sufficient is it that the truce was mutually beneficial, Spain being no longer in condition to support the war, and the Hollanders having obtained the end of all their desperate resistance and invincible perseverance in the cause of liberty. Philip of Nassau, by the truce, entered into possession of all his paternal estates in the Spanish Netherlands and Burgundy, while the States rewarded the faithful services of Maurice with a pension of 25,000 florins, to be paid annually out of the public treasury, besides an appointment of 60,000 francs as governor-general. Pensions were likewise settled on the other princes of the house of Nassau; all were gratified in a manner that demonstrated the high sense the republic had of their merit, though they might possibly be disappointed in their great design of raising prince Maurice to the sovereign authority. No sooner were the Dutch freed from this extreme danger, and felt the blessings of liberty, than dissensions among themselves took place. The disputes betwixt the Arminians and Calvinists produced violent disturbances, which frequently ended in the persecution of the former. In 1632 war was renewed with Spain; and it may be remarked that during the whole course of it, the subjects of the republic traded to the Spanish ports, as if there had been an entire friendship subsisting between the two nations. It was no uncommon practice with them to supply towns with provisions that were besieged by their own armies; and to furnish the enemy with ammunition and other necessities, without which they could not carry on the war. Their motive and apology for this conduct was, that thus they kept in their own hands the profits by which other nations would be enriched. By steadily pursuing this line of conduct, making as many prizes as they could by force, and at the same time making as much profit of their enemies as could be obtained by a lucrative trade, it is no wonder that the republic should flourish, and rival in wealth the greatest nations in Europe. In 1628 the Spaniards met with a dreadful blow by the capture of their fleet from Mexico. This was the greatest prize the Hollanders had ever met with; being valued at no less than 15,000,000 livres. From this time the Spaniards were everywhere defeated and baffled, in almost every enterprise they undertook; nevertheless, they carried on the war, with an obstinacy hardly to be matched, for 20 years longer. At last, in 1648, a treaty was concluded, by which his Catholic Majesty renounced all right and sovereignty over the Lords the States-general of the United Provinces, who were henceforth declared a free and independent republic, and that both sides should remain in the unmoisted possession of what they held severally at the signing of the treaty.

(16.) UNITED PROVINCES, HISTORY OF THE, UNTIL THE RETREAT OF THE FRENCH, AND MURDER OF THE DE WITS, &c. From this time to the year 1670, we meet with nothing very remarkable in the history of the United provinces. By invariably pursuing the maxims of prudence, industry, and frugality, the republic had attained the highest pitch of grandeur. Amsterdam was become the emporium of Europe, and the richest

R r r city

city in the universe. Holland alone contained 3,000,000 of souls, and all the other provinces were proportionably populous. The States dispatched ministers and consuls to China, Siam, and Bengal, to the Great Mogul, the king of Persia, the khan of Tartary, the Grand Signior, the czar of Muscovy, and the princes of Africa. They were considered as an important weight in the scale of Europe, and no treaty was concluded without their ambassadors. The triple alliance with England and Sweden, into which they had entered, gave Lewis suspicion that they proposed to set bounds to his ambition, and clip those bold pinions which had so swiftly conveyed his conquests over the Low Countries. Van Beuningen's insolence, in comparing himself to Joshua stopping the course of the sun, which was the French king's device, highly disgusted his majesty; who was shocked at the presumption and pride of a republic just started out of obscurity, and gained, in the space of a century, from the ocean. But what was still more alarming to Lewis, was the probability that the Dutch would ruin the manufactures of France, and his new established commerce of the Indies. His jealousy discovered itself in various instances; and the pensioner De Witt, who at that time had the leading of affairs, his brother, and his party, did all in their power to remove these prejudices; but the unhappy differences which then prevailed in the United Provinces frustrated all their endeavours. Lewis now sought every opportunity of breaking with the Dutch; less perhaps from any dread of their power, or ability to injure him, than with a view to enlarge his dominions by the entire conquest of the Low Countries. He knew that the whole strength of the republic consisted in her marine; that her frontier was weak, her provinces divided, and the chief power in the hands of men inveterately set against the family of Orange, the ancient captains of the republic. His first attempt was to dissolve the triple alliance, and disengage from it Charles II. king of England. In this business the duchess of Orleans was employed: she went to England under pretence of visiting the king her brother; and her negotiation was successful. In the mean time Lewis possessed himself of Lorraine, under pretence that duke Charles was forming alliances in the empire against France. The following year was spent in negotiations with the emperor, Spain, and Sweden, with the electors of Cologne and Brandenburg, with the bishop of Munster, and other spiritual German princes. The design of Lewis was to prevent their acceding to the triple alliance; from which he had already weaned one power, the most considerable of the whole. The bishop of Munster beheld with uneasiness the growing power of the United Provinces: he pretended that they had made several attempts upon the counties of Stirum, Culemburg, Bentheim, and East Friesland; that they had seized on Ravenstein on the Meuse, and several other places belonging to his bishopric. In his own defence he concluded a treaty with France, and prevailed on the elector of Cologne to follow his example. By signing a treaty with these two princes, the king opened a way to Holland by the Meuse and the Rhine; he thus established places of arms and magazines in a country distant from

his own dominions, and secured a retreat in case his enterprise proved abortive. With respect to the emperor, every artifice was used to keep him neutral; and indeed his own inclinations co-operated but little in favour of the Dutch, whom he regarded as subjects revolted from the princes of his family, and in possession of several places belonging to the empire. In Sweden, Lewis's negotiations were equally successful; for here he prevailed so far with Charles XI. as to obtain a stipulation, that if the emperor, or any of the princes of the empire, joined their forces to the Dutch, a Swedish army should march into the very heart of Germany and join the French, in order to force those princes to observe the treaty of Westphalia. Of all the Germanic body, the elector of Brandenburg alone interested himself for the safety of the States-general. The peace of Westphalia had prevented this enterprising prince from extending his dominions in Germany, and retaking Pomerania from the Swedes. He had long aspired at the stadtholdership of Holland; and though that office had been for six years suppressed; yet he flattered himself that, in case of a war, he might obtain it, perpetuate it in his family, and in time reduce Holland by dint of force, intrigue, and stratagem. With this view, he rejected the proposals of several princes of the empire, and even those of France, endeavouring by every possible method to insinuate himself into the friendship and confidence of the States. In the end he concluded a treaty with them, whereby it was stipulated that he should assist the republic with 25,000 men. Berneking, the Dutch ambassador at Madrid, disconcerted all the schemes of France at that court, and engaged the queen of Spain to furnish money and troops for the defence of the United Provinces. Thus was the face of Europe wholly changed. France and England, who had contributed largely to the raising and aggrandizing the republic, were now incited to destroy her; while Spain, which for an age had been endeavouring to suppress her, was arming for her support. Pierre de Groot, the Dutch minister at the Hague, was employed to penetrate into Lewis's designs; he gave his constituents notice that he foresaw a terrible storm ready to fall upon them, which they might nevertheless break by seasonable submissions and proper acknowledgments. Upon this the States wrote to the king, endeavouring to appease his wrath; but finding him inexorable, they prepared for receiving him, and provided for the security of their provinces. But the long peace the republic had enjoyed had destroyed her standing forces, and little confidence could be reposed in her new levied soldiers. As soon as matters were ripe for execution, Lewis ordered an army of 100,000 men to file off towards the Rhine. Before the opening of the campaign, and previous to his declaration of war, he divided his army into 4 columns; commanding one in person, with the marshal Turenne under him. Another was led by the prince of Conde, assisted by the marshals Humieres and Bellefonds; the 3d was headed by Crequi; and the 4th marched to Westphalia under the conduct of the duke of Luxemburg, to join the Bishop of Munster. As the marshals Crequi, Bellefonds, and Humieres,

refused to receive orders from Turenne, they were banished; but after six months exile, were recalled, at the instance of the whole body of marshals in France, upon their making proper submissions. Such an army drawing towards their frontiers could not but terrify the Dutch, now torn with civil factions. The partisans of the Orange family were for abolishing the perpetual edict, and raising William III. to the dignity enjoyed by his predecessors; but the De Witt faction opposed him violently, though they could not prevent the young prince from being chosen captain general and high admiral. Many persons hoped that William's new dignity would incline his uncle Charles II. to return to the triple alliance; but that hope was frustrated by the conduct of Charles, who, in conjunction with Lewis, declared war against the States-general on the 7th April. A month after, the elector of Cologne and bishop of Munster followed the example of the two kings. The Dutch put themselves in the best posture of defence that circumstances would admit. Maestricht was strongly garrisoned; the prince of Orange had assembled an army of 23,000 men, with which he advanced to the banks of the Yssel, and the Dutch fleet cruised off the mouth of the Thames to prevent the junctions of the naval forces of England and France, which amounted to 230 ships. All Europe watched the first motions of two powerful kings, seconded by the best generals of the age. Lewis joined his army at Charleroy: it was composed of 23 companies of *gens d'armes*, life-guards, mousquetaires, and light-horse, two regiments of the French and Swiss guards, 14 of foreign infantry, and 60 of light-horse or dragoons, comprising in all an army of 110,000 fighting men, under marshall Turenne as captain-general. Holland could only be attacked by the Rhine or the Meuse; and the generals and ministers differed by which of these insets they were to make the first impressions. At last, after several deliberations, it was determined to make both attacks at the same time, the more to disconcert their councils. It is probable that Turenne always opposed the siege of Maestricht; for we find him, immediately after the surrender of Maseik, strongly dissuading the king from that enterprise, in opposition to the sentiments of the prince of Conde. At last he prevailed; and it was resolved in council to advance towards the Rhine, and besiege at the same time the towns of Rhinberg, Vessel, Orfol, and Burick. These places were all well fortified, and deemed the keys of Holland; however, the Dutch did not appear disturbed at their being invested, as they were only under the protection of, and did not immediately belong to, the United Provinces. They were besides in hopes that any attempts upon the territory of Cleves would hasten the preparations of the elector of Brandenburg, and even rouse the emperor into a sense of the danger he was in from the vast designs of Lewis. Nothing could oppose armies so well appointed, led by generals so skilful and so experienced. The 4 towns surrendered within a few days of each other; and Rhinberg, that held out longest, opened its gates on the 7th of June. A few days after, the town and fort of Rhees, and the town of Emerick, sur-

rendered; upon which the king resolved to pass the Rhine by a ford, over which the cavalry were to swim. This bold enterprise was projected and conducted by Coëde; who, in the face of two regiments of foot, and several squadrons of horse under general Warts, intrenched on the opposite side, effected the passage, in the same order, and with as much regularity, as if he had marched his troops on dry land. The enemy made a stout resistance; but were driven from their post, after having killed the duke of Longueville on the spot, and wounded the prince of Conde, which disabled him for some time from attending the service, and obliged him to resign the command of his army to Turenne. It is almost incredible with what rapidity towns and fortresses yielded to the fortune of Lewis. The reduction of Betan, the most fruitful country of the United Provinces, and the surrender of Tolbus fort, obliged the prince of Orange to abandon the Yssel, lest he should be attacked in the rear, and to retire to the very heart of the country, as far as Rhenen, in the province of Utrecht. Thus the town of Arnhem, the forts of Knotsemborough, Voom, St Andre, and Shenck, this last, the strongest in the Netherlands (having cost the great Henry Frederic prince of Orange a seven months siege), with a variety of other forts and towns, surrendered as soon as summoned; and at last Nimwegen, a town strong from the nature of the works and fortifications, and garrisoned by 8000 fighting men, including the inhabitants, was invested. After the citizens had for 8 days exhibited signal proofs of courage in defence of their liberties, they were forced to yield to the superior skill of Turenne: In the mean time the bishop of Munster and elector of Cologne, having joined that body of troops under the command of the duke of Luxemburg, the united army entered the province of Overysse, and, by dint of cruelty and terror, which the duke spread, reduced the towns as soon as he appeared before them. Animated by that implacable rage that constantly attends religious wars, the two prelates obliged the duke to exert a severity, by no means suited to his nature, against heretics and the rebellious subjects of the house of Austria. Next the king's forces penetrated into the province of Utrecht, where their conquests went on with the same rapidity, and put the capital of the province in the utmost danger. To retard its fate, the Dutch adopted the expedient of opening their sluices, and overflowing the country. The other towns followed the example of Utrecht; and Holland, Brabant, and Dutch Flanders, was one vast lake, the towns rising like islands in the midst of the waters. Farther to stem the torrent of Lewis's conquests, the people were persuaded the only barrier was to lodge the supreme power in the hands of the prince of Orange. They accordingly obliged the states of Holland and West Friesland to unite the dignity of stadtholder to those of captain-general and high-admiral, with which the prince was already invested. They likewise sent remonstrances so pathetic to the king of England, that Charles, moved with the situation of the republic, and jealous of the designs of Lewis, dispatched the duke of Buckingham and earl of Arlington into Holland, to quiet the fears of

the Dutch, and insist upon the king's penetrating no farther into Holland. In case of Lewis's refusal, Charles declared that he would break the alliance; as he perceived that, instead of securing Zealand to the English, agreeable to the treaty, the designs of France were to unite the whole republic to their own monarchy. Lewis had in fact no great regard to the menaces of his ally; but as persisting obstinately to advance into a country which the inundation rendered impassable, might terminate in the ruin of all his schemes, he seemed, out of compliment to the king of England, to listen to terms of accommodation; which, after all his victories, could not fail of proving advantageous. In 3 months he had conquered the provinces of Guelderland, Overysel, and Utrecht, taken about 50 towns and forts, and made 24,000 prisoners. Conde and Turenne advised him to send the prisoners to work upon the canal of Languedoc, and to leave all the places that were not essential to the preservation of his conquests; the minister Louvois was of a different opinion, and his sentiments determined the king. The prisoners were released for a trifling ransom, and the king's army totally reduced and exhausted by the continual drains made to garrison the conquered places. A negotiation was set on foot at Bostel, near Bois-le-duc, whither the king, attended by the English ambassadors and the Dutch deputies, repaired, but the terms required of the republic were so hard, that they were rejected with disdain by the Dutch; who, animated by their stadtholder, resolved to wait a change of fortune in the midst of the waters. They used every expedient to rouse the princes of Germany in their defence; and so successfully, that the elector of Brandenburg, the nearest and most interested prince, prepared to take the field. The undaunted courage, the vigilance, the public spirit of the prince of Orange, gained him the entire confidence and affection of the republic; and excited their resentment against the two brothers De Witts, his implacable enemies, whom they accused of receiving pensions from Lewis. The suggestion was false; but possibly their love of liberty, and jealousy of the house of Orange, had carried those two great politicians too far in their pacific measures and complaisance to the power of the French monarch. The pensionary was attacked in the street by the populace; but by his personal bravery broke through the crowd, and saved his life, though covered with wounds. Soon after, the sedition broke out afresh, and the partisans of the house of Orange again stirred up the animosity of the republic against the De Witts. Several crimes were laid to the pensioner's charge, but he cleared himself. Suborned witnesses accused his brother of an attempt to poison the prince of Orange. Cornelius was imprisoned and treated with great barbarity. While he was under the torture, he sung that ode of Horace, *Iustum et tenacem propositi virum*. His brother took him out of prison after sentence of banishment was pronounced; the tumult rose high, and both the De Witts were cruelly torn in pieces in the streets. William of Orange seemed touched at this terrible sacrifice; he made the pensionary's eulogium, and ordered the murderers to be pro-

secuted; however, the clemency he the advantages he obtained by the animosity he bore the De Witts, all men that he secretly countenance. William III. prince of Orange, in the daily ingratiated himself more. His whole fortune for the safety of the exerted himself with such prudence and all Europe began to unite against the by the month of July. Every prince was in motion to succour the Dutch emperor, the king of Denmark, the elector of Brandenburg, the duke of Brunswick Lüneburg, the duke of Hesse, immediately ordered troops to join; several of the other princes preparing to take the field. All was England began to waver, and there was power in Europe upon whom Lewis could heartily rely. The army of Brandenburg was commanded by the elector in person, and of the empire under the famous Marlborough joined near Hildesheim, and composed 40,000 men. Turenne, now appointed commander of the king's army on his return, marched to oppose the enemy's passing. For three whole months were the elector and Montecuculi employed in abortive attempts to effect a passage at Mentz, Coblenz, and other places. This answered the purpose, making a powerful diversion in favour of the Dutch, though they could not accept their design of joining the prince of Orange. After repeated disappointments, the French army directed its march to Westphalia. Turenne followed, to keep the bishop of Münster steady to his engagements. For half the campaign, he, with a body of 16,000 men, every stratagem of the elector and Montecuculi, the latter the most renowned general of the empire, at the head of an army near triple strength. He obliged them to go into winter quarters, in a country harassed and exhausted, and confirmed the bishop of Münster in the alliance of France, at the very time he was on the point of deserting with the emperor. He obliged the elector of Brandenburg, who took the chief command, to resign Montecuculi's illness, to abandon the siege of Werle; took Unna, Kamen, Altena, Berckem, and several other towns and fortresses. By continuing his operations, he forced the elector to remove his winter quarters again into the field, chased him from post to post, until he obliged him to quit Westphalia, re-pass the Weser, and retreat with precipitation into the bishopric of Hildesheim. After taking possession of the elector's towns in Westphalia, he pursued him into the bishopric of Hildesheim; and at length, by the merit of superior genius, forced him to seek shelter in his hereditary dominions. All this was effected after Louvois had appointed the marshal's army quarters in Alsace and Lorraine, amidst the rigours of a severe winter, opposed by a superior enemy, by the artifices of Louvois, and seconded only by his own prudence, and the affections of his troops, which he maintained amidst all the difficulties, hardships, and dangers they encountered. It was indeed supposed, that Montecuculi was prevented from giving Turenne battle by the

the

the remonstrances of prince Lobkowitz, the emperor's ambassador, influenced by the gold of Lewis. Certain indeed it is, that Montecuculi's illness arose from his chagrin at seeing all his projects frustrated by the unsteady dilatory conduct of the court of Vienna. Lewis's negotiations disturbed Europe no less than his arms. His tools and creatures swarmed in every court. Leopold could not be prevented from declaring in favour of Holland; but his ministers were brought off from seconding the emperor's intentions. The whole English nation exclaimed against the alliance of their king with France; but Charles stood in need of French gold to supply his extravagance and profligacy. The elector of Bavaria had indeed been compelled by Lewis to retire to his capital; but it was by *méridint* of intrigue that he was forced from his alliance with Holland and constrained to sign a peace with France. While Turenne was thus employed on the Rhine, Conde having recovered of his wounds, returned to the command of the army in Holland. He besieged and took Maestricht in 13 days. Having repaired the fortifications, he proposed making himself master of several other towns; but the inundations every where stopped his course. All his attempts to draw off the waters were in vain; and he was forced to content himself with preserving, without pretending to extend, the king's conquests. Whatever glory Lewis acquired by land, the conduct of his admirals deserved equal praise with that of his generals. In little more than 12 months, the French were taught the art of naval war. Before, they fought ship to ship; but understood nothing of those evolutions by which whole fleets imitate the movements of armies. The duke of York, afterwards James II. invented the method of giving all orders at sea by means of signals: this, and every other part of the art, the French borrowed from the English; and became so apt scholars, that they ventured to give battle to the Hollanders, the great rivals of the English, on that element. Their fleet amounting to 40 sail, besides fire-ships, joined to the English, gave battle three different times to the Dutch. De Ruyter gained additional glory in these engagements: and D'Estrees the French admiral gained the esteem of De Ruyter. In the mean time, Spain declared in favour of the Dutch; and prevailed upon the emperor to act more heartily in the cause of Holland, and in defence of the liberties of Europe. The prince of Orange was reinforced by 10,000 Spaniards, sent to him by the governor of the Low Countries. Philip had concluded a treaty with the States at the Hague, whereby he declared war against France, engaged the emperor to make a powerful diversion on the Rhine, stipulated not to accept of peace before the Dutch had retrieved all their losses; and obtained from them a promise to listen to no terms of accommodation before Philip was reinstated in all his possessions in the Low Countries, previous to the peace of the Pyrenees. Montecuculi was ordered to advance with 30,000 men to Franconia; and Turenne, joining the troops of Cologne and Munster, passed the Main, and took post in the electorate of Mentz. The prince of Orange receiving no impediment

from Conde, who was forced on account of the inundations to repair the Meuse, thought this a proper time for action, as the enemy had no considerable forces in the heart of the United Provinces. He ordered some troops to file off secretly to Amsterdam and Muiden; lined with infantry the intrenchments which secured the passage to Holland; and, to deceive the duke of Luxembourg, who commanded in Utrecht, sent some forces by sea to attack Bommel. The duke, not penetrating the prince's design, came to succour the place; and William, finding his stratagem succeed, marched to Naerden, and with 25,000 men invested and took the place before the duke could provide for its security. Upon this success, the Dutch took courage; fortune inclined in their favour, and in a short time all the horrors of war were removed from the interior parts of the United Provinces to the Spanish Netherlands. Neither the experience nor consummate address of Turenne, the genius of Vauban, nor the indefatigable vigilance of Louvois, could repair the error committed in ruining the army to garrison the conquered towns. Even Conde's fire seemed extinguished in the waters with which the Dutch had drowned their country. Instead of penetrating farther, he was obliged to retreat. Turenne could not prevent the junction of Montecuculi and the prince of Orange, nor the loss of Bonne. This junction, and the declaration of Spain obliged the armies of France to abandon the three provinces with still more rapidity than they had conquered them. The triumphal arch at St Dennis was hardly erected as a monument of Lewis's victories, before the fruits of those victories were relinquished. In a word the parliament of England would no longer suffer Charles to be the mercenary tool of France; the late ill success cooled the elector of Cologne and the bishop of Munster in their friendship; and Lewis, forsaken by all his allies, found himself under the necessity of maintaining singly a war against the empire, Spain, and the United Provinces.

(17.) UNITED PROVINCES, HISTORY OF THE, UNTIL THE PRESENT TIME. From that period the United Provinces have been distinguished among the European nations as a very considerable maritime and commercial power. Their connection with Britain by the Revolution in 1688, when William III. stadholder of Holland became king of this island, brought on a much closer connection between the two nations than had ever taken place before. By this connection, William formed a plan of humbling his great adversary Lewis XIV. who had so lately brought his country to the verge of ruin. For this purpose he renewed the war in 1689, and commanded the army in person. However, he was overmatched by the abilities of Luxemburg the French general; who opposed him, and obliged him to conclude a peace in 1697. His enmity to the French king, however, was not extinguished. The remaining part of his life he employed in forming the most powerful confederacy against that monarch; and so much was he wrapped up in this project, that even in his dying moments it seemed to prevail over every other consideration.

consideration. (See ENGLAND, § 31.) His measures, however, were adopted by his successor Queen Anne; and the French monarchy had nearly sunk under the united efforts of the forces of Britain, Holland, and Germany, headed by the experienced generals Marlborough and Eugene. But at last the whole plan was disconcerted by a revolution in the British ministry; the Dutch were disappointed in the moment of expectation, and obliged to consent to the peace of Utrecht, which left them exposed to the attempts of France as much as ever. A barrier composed of a great number of fortified towns was indeed granted them; but barriers of this kind are a slender defence against the modern improvements in war. In the war of 1639, these towns were taken one after another by Marshal Saxe, who thus avenged the exploits of the duke of Marlborough; while the Dutch and British army, commanded by the late duke of Cumberland, were driven from place to place, without being able to make one successful effort from the beginning of the war to the end of it. See ENGLAND, § 81. It is probable that the bad success of this war cooled the affections of the Dutch towards Britain so much, that ever since they have acted rather as concealed enemies than friends. In the war of 1755, their attachment to France was evident; and in the last, it proceeded to such an height, as to oblige the British ministry to declare war against them. The issue of this war is still fresh in our memories. A single naval engagement was the only event of consequence that took place, and showed that both were formidable antagonists to each other. The war was undertaken in opposition to the wishes of the stadtholder, who having been maintained in his prerogative chiefly by the powerful influence of Britain and Prussia, could have no motive for making a rupture with the court of London. The subsequent transactions of the States-general have been related under other articles. (See PRUSSIA, § 13, and REVOLUTION, N° VI, § 19.) Having deserted the grand alliance formed against the disturbers of the peace of Europe, and the office of the stadtholder being abolished, the Batavian republic, under the name of an ally, became in reality little better than a province of France. The consequence of this alliance was what might have been expected. The British government, obliged to attack its enemies wherever it might find them, commenced hostilities against the Batavian Republic; and in the compass of a very short period wrested from them their most valuable possessions both in the eastern and in the western world. In the mean time this hapless country, which was turned into the BATAVIAN REPUBLIC in imitation of France, became a kingdom when her mistress became an empire. See REVOLUTION, VI, § 50. But even this was not sufficient; the United Provinces once so great, so rich, and free, became an integral part of France—the commerce, name, and glory gone, and subject to endless insults, to vexatious taxes, and above all to the horrid law of conscription. See REVOLUTION, VI, § 54.

(12.) UNITED PROVINCES, LATE CONSTITUTION OF THE. The late constitution was some-

what singular. Most of the towns in the several provinces were little republics, whose deputies, with the nobility, composed the states thereof: and the deputies of the provinces, in like manner, composed the States General. Every town or province might send as many deputies as they pleased to the assemblies of the provincial states, or States General; but those of each town or province had but one voice, and presided by turns. No resolution taken by the States General was of any force till confirmed by the several provinces. The legislative power in the towns was vested in the senates; and the executive in the burgomasters, syndics, &c. The states of the provinces were styled, Noble and Mighty Lords; but those of Holland, Noble and Most Mighty Lords; and the States General, High and Mighty Lords, or the Lords the States General of the United Netherlands, or their High Mightinesses. Besides the States General, there was also a council of state, consisting of deputies from the several provinces, making twelve in all; of which Holland sent three; Guelderland, Zealand, and Utrecht, two a-piece; and Friesland, Groningen, and Overysse, one. In this council every deputy presided a week by turns, and the stadtholder had a decisive voice when the votes happened to be equal. The principal affairs that came under their deliberation, were those relating to the army and finances. The stadtholder was also president of the states in every province, but had no seat in the States General. One dissenting voice in the provincial states prevented their coming to any resolution. See STADTHOLDER. Such was the constitution of the Seven United Provinces. With respect to the administration of justice, every province had its tribunal, to which, except in criminal cases, appeals lie from the petty and country courts; and it is said, that justice is nowhere distributed with more impartiality.

(19.) UNITED PROVINCES, LATE TAXES AND REVENUE OF THE. The taxes in these provinces are so many, and so heavy, especially in Holland, that it is not without reason asserted, that the only thing that has escaped taxation there is the air they breathe. The province of Holland contributes above one half of the whole public expenses. For the encouragement of trade the duties on goods and merchandise are exceeding low.

(20.) UNITED PROVINCES, MANNERS, AND CHARACTER OF THE PEOPLE OF THE. As to the character of the Dutch, the boors or husbandmen are industrious enough, but heavy, and slow of understanding. The seamen are a plain, blunt, but rough, surly, and ill-mannered sort of people. Their tradesmen are something sharper, and make use of all their skill to take advantage of those they deal with. Every class of men is extremely frugal. All appetites and passions run lower and cooler here than in other countries, avarice excepted. Quarrels are very rare; revenge is seldom heard of; and jealousy scarcely ever known. It is very uncommon for any of them to be really in love, or even to pretend to it; nor do the women seem to care whether they are or not. People converse pretty much upon a level here; nor is it easy to distinguish the man from the master,

after, or the maid from the mistress, such liberties do they allow their servants, or rather are obliged to allow them; for they may not be struck corrected, but the dispute must be left to the magistrate. The Dutch are tall and strong built; at both men and women have the grossest shapes that are to be met with anywhere. Their garb, except among the officers of the army and some of others, is exceeding plain, and the fashions change as seldom as in Spain. The men are addicted to drinking, which some think necessary in this foggy air, both for their health, and the improvement of their understandings. Among their diversions, that of skating in winter is one of the chief. It is amazing to see the crowds in a hard frost upon the ice, and their dexterity in skating; both men and women darting along with inconceivable velocity. The Dutch are remarkable for their cleanliness; nothing can exceed the neatness of their houses, towns, and villages. Many of them have distinguished themselves by their earning, and some even by their wit and ingenuity; witness ERASMUS, GROTIUS, &c. The Dutch excel also in painting and engraving; and some of them have been no contemptible satirists.

(21.) UNITED PROVINCES, POPULATION OF THE. This small state is very populous. The total population of the 8 departments is estimated at two millions.

(22.) UNITED PROVINCES, RIVERS AND HARBOURS OF THE. The principal rivers are the Rhine, the Meuse, the Scheld, and the Vecht. The first is divided into several branches; one of which joins the Old Ifsel, and after that falls into the Zuyder Sea; another named the *Leck*, at the village of Krimpen, mingles with the Meuse; a third, called the *Crooked Rhine*, is branched out at Leyden into canals, of which one runs into the lake of Haarlem, and another loses itself in the sand hills between Catwyk on the Rhine, and Catwyk on the sea; and a fourth, called the *Wall*, falls into the Meuse over-against Workum. The Meuse, after dividing itself into two branches, and again uniting these, falls into the North Sea below Rotterdam. The Scheld below Antwerp divides itself into two branches, called the *Western* and *Eastern Scheldt*; the first separating Flanders from Zealand; and the other, running N. by Bergen-op-Zoom, and afterwards E. between the islands of Beveland and Schowen, falls into the sea a little below. The Vecht runs from E. to W. through the department of the Yssel, or late province of Overijssel, and falls into the Zuyder Sea. There are many smaller rivers that join these, and a vast number of canals; yet there are few good harbours in the provinces. The best are those of Rotterdam, Helvoetsluis, and Flushing. As to the harbour of Amsterdam, it is indeed one of the largest and safest in Europe; but there is a bar at the entrance of it, over which large vessels cannot pass without being lightened or unloaded. There are no mountains in these provinces; and the only lake, properly so called, is that of Haarlem. The country is extremely well cultivated, especially the department of Amstel, or late province of Holland, which, in this respect, perhaps has not its equal in the universe.

The towns are very agreeable, being kept clean, and having canals in the middle of the streets, planted with trees.

(23.) UNITED PROVINCES, UNIVERSITIES OF THE. There are five universities in the republic, viz. those of Utrecht, Leyden, Franeker, Groningen, and Harderwic; but the three last are inconsiderable. The dissenters in England often send their children to these universities for education. Before the reformation there was an archbishop at Utrecht, who had for his suffragans the bishops of Deventer, Groningen, Middleburg, Haarlem, and Lewarden. The language here is a dialect of the German, but French is much spoken by the better sort.

(IV. 1.) UNITED STATES OF AMERICA. When the United States of N. America first published their declaration of INDEPENDENCY, 4th July, 1776. (See AMERICA, § 14.) there were only THIRTEEN STATES in the Union; but this great commonwealth now consists of *Seventeen* States, all united in a firm FOEDERAL UNION, under the same general system of laws and of liberty: viz. MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW HAMPSHIRE, VERMONT, NEW YORK, NEW JERSEY, PENNSYLVANIA, DELAWARE, MAINE, MARYLAND, VIRGINIA, KENTUCKY, NORTH CAROLINA, SOUTH CAROLINA, TENNESSEE, and GEORGIA. For an account of the geography, extent, population, animals, productions, trade, manufactures, and history of these States; see these articles; and for a general account of the whole country and people, See AMERICA, and AMERICANS; and for the second American war, see WAR, § 238, towards the end.

(1.) UNITED STATES, TRADE OF THE. The following will give an idea of the Commercial progress, and of the relative situation of America with the principal European States. The exports from the United States, between the 1st of October, 1802, and the 30th Sept. 1803, of Domestic and Foreign Produce, were as follows:

	Dollars.
To Great Britain and Colonies	25,369,073
France, and her Colonies	8,445,013
Holland, E. and W. India Colonies	5,523,439
Spain, and her Colonies	4,533,539
Hamburg, Bremen, &c.	3,279,732
Portugal, and her Colonies	2,308,548
Denmark, Norway, and Islands	1,891,895
Sweden, and Swedish W. Indies	265,470
Italy	2,571,563
Prussia	319,625
Malta	14,109
Austrian Ports in the Adriatic	42,045
Morocco and Barbary States	36,757
Cape of Good Hope	34,522
China	172,495
E. Indies, generally not particularized	59,733
W. Indies, ditto	1,794,104
Europe, ditto	335,453
Africa, ditto	35,358
South Seas	826
North-West Coast of America	32,000

Total Dollars 35,890,032
Of this sum 13,594,073 were foreign produce;
2,744,523

2,714,523 of the exports to Holland; and 3,312,820 of those to France were of this description. The exports of domestic growth or manufacture, therefore, amount to 42,205,961 dollars; of which England alone imports 11,602,457; Scotland 2,474,518; Ireland 2,167,052; Guernsey, &c. 215,237; being considerably more than a third part of the entire. Spain and Portugal united take only 5,073,638; or not near an eighth part. The principal domestic articles of export were, 2,489,954 lb. of butter; 1,190,867 lb. of cheese; 1,680,346 lb. of ham and bacon; 2,052,302 lb. of lard; 2,079,608 bushels of Indian corn; 1,311,853 barrels of flour; 686,145 bushels of wheat; 81,838 tierces of rice; 37,712,079 lb. of cotton; 59,217 lb. of tallow; and 1,255,422 lb. of tallow candles; tobacco, manufactured, 142,515 lb. and unmanufactured, 86,991 hogheads; tar, 78,939 barrels, and 61,178 of turpentine; coaches and other carriages (carts to the West Indies) 9,893; and shoes and slippers, 26,058 pairs. The several States contribute to the above aggregate of exports in the following sums:

	Dollars.
New York	10,818,387
Massachusetts	8,768,566
South Carolina	7,811,108
Pennsylvania	7,525,710
Virginia	7,414,346
Maryland	5,209,418
Georgia	2,370,875
Rhode Island	1,275,596
Connecticut	1,248,571
North Carolina	952,641
New Hampshire	494,620
Delaware	428,153
Vermont	117,450
New Jersey	21,311

PORTS.

Port Adams	1,099,703
Michillimackiney	202,842
Detroit and Massé	40,764

* **UNITIVE**. *adj.* [from *unite*.] Having the power of uniting.—The *unitive* way of religion, which consists of the contemplation and love of God. *Norris*.

(1.) * **UNITY**. *n. f.* [*unitas*, Lat.] 1. The state of being one.—Those hereticks introduced a plurality of Gods; and so made the profession of the *unity* part of the symbolum, that should discriminate the orthodox from them. *Hamm*.—The production of one being the destruction of another, although they generate, they increase not; and must not be said to multiply, who do not transcend an *unity*. *Brown*.—

His image multiply'd:

In *unity* defective. *Milton*.—Whatever we can consider as one thing, suggests to the understanding the idea of *unity*. *Locke*. 2. Concord; conjunction.—You see, there is such *unity* in the proofs. *Shak*.—The *unity* of the spirit in the bond of peace. *Pearson*.—Take *unity* then out of the world. *Holyday*.—We ought to promote *unity*. *Spratt*. 3. Agreement; uniformity.—*Unity*, as well in ceremonies as in doctrine. *Hooker*. 4. Principal of dramatick writing, by which the tenour of the story, and propriety of representation is preserved.—The *unities* of time, place, and

action, are exactly observed. *Dryd*.—In poetry it is absolutely necessary that the *unities* should be understood. *Add*. 5. [In law.] *Unity* of possession is a joint possession of two rites by several titles. *Coswell*.

(2.) **UNITY**, in poetry. Aristotle laid it down as a rule, that there are 3 unities to be observed, viz. the unity of action, of time, and of place.

* **UNJUDGED**. *adj.* Not judicially determined.—Causes *unjudg'd* disgrace the loaded file. *Prior*.

(1.) * **UNIVERSAL**. *adj.* [*universalis*, Latin.] 1. General; extending to all.—The woe had been *universal*. *Shak*.—Appetite, an *universal* wolf. *Shak*.—Divine laws are *universal*, in respect of persons. *White*.—No subject can be of *universal* concern. *Reynolds*. 2. Total; whole.—The *universal* frame. *Dryd*. 3. Not particular; comprising all particulars.—

From thing particular

She doth abstract the *universal* kinds. *Davies*.—An *universal* was the object of imagination, and there was no such thing in reality. *Arbuth*.

(2.) * **UNIVERSAL**. *n. f.* The whole; the general system of the universe. Not in use.—To what end had the angel been set to keep the entrance into Paradise after Adam's expulsion, if the *universal* had been paradise. *Ral*.—Plato calleth God the cause and original, the nature and reason of the *universal*. *Ral*.

* **UNIVERSALITY**. *n. f.* [*universalitas*, school Latin.] Not particularity; generality; extension to the whole.—This catholicism consisteth in *universality*, as embracing all sorts of persons. *Pearse*.—An *universality* of sin. *South*.—The *universality* of the deluge I insist upon. *Woodw*.—A special conclusion cannot be inferred from a moral *universality*. *Watts*.—He mistook accident for *universality*. *Reyn*.

* **UNIVERSALLY**. *adv.* [from *universal*.] Throughout the whole; without exception.—Willeth *universally* to fly from evil. *Hook*.—There best beheld, where *universally* admir'd. *Milton*.—*Universally* valuable. *Dryd*.—This institution *universally* prevailed. *Addison*.

(1.) * **UNIVERSE**. *n. f.* [*univers*, Fr. *universum*, Latin.] The general system of things.—Fills the wide vessel of the *universe*. *Shak*.—God here sums up all into man; the whole into a part; the *universe* into an individual. *South*.—Whose word call'd out this *universe* to birth. *Prior*.

(2.) **UNIVERSE** is a collective name, signifying the whole world; or the assemblage of heaven and earth, with all things therein. See *ASTRONOMY* and *GEOGRAPHY*.

(1.) * **UNIVERSITY**. *n. f.* [*universitas*, Latin.] A school, where all the arts and faculties are taught and studied.—My son and servants spend all at the *university*. *Shak*.—Degrees of the *universities*. *Selden*.—The *universities* flourished. *Clarend*.

(2.) **UNIVERSITY** is the name of a corporation formed for the education of youth in the liberal arts and sciences, and authorized to admit such as have studied in it, to certain *degrees* in different faculties, which not only served as certificates of proficiency in science, but also confer on those who obtain them considerable privileges within the *university*, as well as some rank in the state without

without it. Universities generally comprehend within them one or more colleges; but this is not always the case; for the university of St Andrew's was in being before either of its colleges was founded, and it would continue in being with all its privileges though both its colleges were levelled with the dust. In every university with which we are acquainted, there are four faculties, viz. *Theology, Law, Physic, and the Arts and Sciences*, comprehending mathematics, natural and moral philosophy, &c.; and in Oxford, Cambridge, and some other universities, *Music* is considered as a fifth faculty. In each of these there are two degrees, those of *Bachelor* and *Doctor*; for though in the universities of Great Britain and Ireland we have no such degree as *Doctor in Arts and Sciences*, our *Master of Arts* answers to the degree of *Doctor in Philosophy*, which is conferred by many of the universities on the continent. Universities in their present form, and with their present privileges, are institutions comparatively modern. They sprang from the convents of regular clergy, or from the chapters of cathedrals in the church of Rome, where young men were educated for holy orders, in that dark period when the clergy possessed all the little erudition which was left in Europe. These convents were seminaries of learning probably from their first institution; and we know with certainty, that in Old Aberdeen there was a monastery in which youth were instructed in *theology, the canon law, and the school philosophy*, at least 200 years before the university and King's College were founded. The same was doubtless the case in Oxford and Cambridge, and probably in every town in Europe where there is now a university, which has any claim to be called ancient; for it was not till the more eminent of the laity began to see the importance of literature and science, that universities distinct from convents were founded, with the privilege of admitting to degrees, which conferred some rank in civil society. These universities have long been considered as lay corporations; but as a proof that they had the ecclesiastical origin which we have assigned to them, it will be sufficient to observe, that the Pope arrogated to himself the right of vesting them with all their privileges; and that, prior to the reformation, every university in Europe conferred its degrees in all the faculties by authority derived from a papal bull. The most ancient universities in Europe are those of OXFORD, CAMBRIDGE, PARIS, SALAMANCA, and BOLOGNA; and in the two English universities, the first founded colleges are those of *University, Balliol, and Merton*, in the former, and *St Peter's* in the latter. Oxford and Cambridge, however, were universities, or, as they were then called, *studies*, some hundreds of years before colleges or schools were built in them; for the former flourished as a seminary of learning in the reign of Alfred the Great, and the other, could we believe its partial partizans, at a period still earlier. The universities of Scotland are four, ST ANDREW'S, GLASGOW, ABERDEEN, and EDINBURGH. In Ireland there is but one university, viz. that of DUBLIN, founded by Queen Elizabeth, and very richly endowed.

VOL. XXII. PART II.

(3.) UNIVERSITY COURTS in England. The two universities enjoy the sole jurisdiction, in exclusion of the king's courts, over all civil actions and suits whatsoever, where a scholar or privileged person is one of the parties; excepting in such cases where the right of freehold is concerned. And then by the university charter they are at liberty to try and determine, either according to the common law of the land, or according to their own local customs, at their discretion; which has generally led them to carry on their process in a course much conformed to the civil law. This privilege, so far as it relates to civil causes, is exercised at Oxford in the chancellor's court: the judge of which is the vice-chancellor, his deputy, or assessor. From his sentence an appeal lies to delegates appointed by the congregation; from thence to other delegates of the house of convocation; and if they all three concur in the same sentence, it is final, at least by the statutes of the university, according to the rule of the civil law. But if there be any discordance or variation in any of the three sentences, an appeal lies in the last resort to judges delegates appointed by the crown, under the great seal in chancery. As to the jurisdiction of the university courts in criminal matters, the chancellor's court at Oxford, and probably also that of Cambridge, hath authority to try all offences or misdemeanors under the degree of treason, felony, or mayhem; and the trial of treason, felony, and mayhem, by a particular charter, is committed to the university jurisdiction in another court, namely, the court of the lord high steward of the university. The process of the trial is this: The high steward issues one precept to the sheriff of the county, who thereupon returns a panel of 18 freeholders; and another precept to the bedells of the university, who thereupon return a panel of 18 matriculated laymen, *laicos privilegio universitatis gaudentes*: and by a jury formed of *medietate*, half of freeholders and half matriculated persons, is the indictment to be tried; and that in the guildhall of the city of Oxford. And if execution be necessary to be awarded in consequence of finding the party guilty, the sheriff of the county must execute the university process; to which he is annually bound by an oath.

* **UNIVOCAL.** *adj.* [*univocus*, Lat.] 1. Having one meaning.—*Univocal* words are such as signify but one idea, or but one sort of thing. *Watts*. 2. Certain; regular; pursuing always one tenour.—This conceit makes putrefactive generations correspondent unto seminal productions; and conceives unequivocal effects, and *univocal* conformity unto the efficient. *Brown*.

* **UNIVOCALLY.** *adv.* [from *univocal*.] 1. In one term; in one sense.—How is sin *univocally* distinguished into venial and mortal, if the venial be not sin? *Hale*.—Being itself does not predicate *univocally* touching God. *Hale*. 2. In one tenour.—All creatures are generated *univocally* by parents of their own kind. *Ray*.

* **UNJOYOUS.** *adj.* Not gay; not cheerful.—Lifts her pale eye *unjoyous*. *Thomson*.

* **UNJUST.** *adj.* [*injuste*, Fr. *injustus*, Lat.] Iniquitous; contrary to equity; contrary to justice. It is used both of persons and things.—*Quarrel*

S o s s

unjust

unjust against the good and loyal. *Shak.*—Finding his usurpation most unjust. *Shak.*—He that is unjust in the least, is unjust also in much. *Luke xvi.* Unjust usurpations and extortions. *K. Charles.*—The unjust the just hath slain. *Milton.*—He was so unjust as to do his brother an injury. *Locke.*

* **UNJUSTIFIABLE.** *adj.* Not to be defended; not to be justified.—These reproaches are unjustifiable. *Gov. of the Tongue.*—An unjustifiable piece of rashness. *Addison.*—Not out of ambition, or any other unjustifiable motive. *Atterbury.*

* **UNJUSTIFIABLENESS.** *n. f.* The quality of not being justifiable.—The illegality of all these commissions, and the unjustifiableness of all the proceedings. *Clarendon.*—When it is unlawful upon the unjustifiableness of the ground, we sin in it till we put an end to it. *Kettlewell.*

* **UNJUSTIFIABLY.** *adv.* In a manner not to be defended.

* **UNJUSTLY.** *adv.* In a manner contrary to right.—Thy country fought of thee, it fought unjustly. *Milton.*—Accus'd unjustly, then unjustly slew. *Denham.*—Your choler does unjustly rise. *Dryden.*—Moderation the one side unjustly pretends to. *Swift.*

* **UNKEMPT.** *adj.* Not combed. Obsolete.—And how my rhimes been rugged and unkempt. *Spenser.*

* **UNKENNEL.** *v. a. 1.* To drive from his hole.—I warrant we'll unkenel the fox. *Shak.*—I warrant you, colonel, we'll unkenel him. *Dryden.* 2. To rouse from its secrecy or retreat.—

If his occult guilt

Do not itself unkenel in one speech,

It is a damned ghost that we have seen. *Shak.*

* **UNKENT.** *adj.* [un and ken, to know.] Unknown. Obsolete.—As child whose parent is unkent. *Spenser.*

* **UNKET.** *adj.* 1. Not kept; not retained. 2. Unobserved; unobeyed.—Many things are now unkett, and abolished, every where. *Hooker.*

* **UNKIND.** *adj.* Not favourable; not benevolent.—None can be call'd deform'd, but the unkind. *Shak.*—Rich gifts wax poor, when givers prove unkind. *Shak.*—To Nimrod our author seems a little unkind. *Locke.*—'Till thou prov'st perjur'd or unkind. *Prior.*—And, in their height of kindness, are unkind. *Young.*

(1.) * **UNKINDLY.** *adj.* [un and kind.] 1. Unnatural; contrary to nature.—And 'gan abhor her brood's unkindly crime. *Spenser.* 2. Malignant; unfavourable.—Forbidding every bleak, unkindly fog. *Milton.*

(2.) * **UNKINDLY.** *adv.* 1. Without kindness; without affection.—The herd, unkindly wife. *Denham.*—If we unkindly part. *Dryden.* 2. Contrarily to nature.—Abortive, monstrous, or unkindly mix'd. *Milton.*

* **UNKINDNESS.** *n. f.* [from unkind.] Malignity; ill-will; want of affection.—Take no unkindness of his hasty words. *Shak.*—His unjust unkindness. *Shak.*—Manifested unkindness towards him. *Clarendon.*—As one who loves, and some unkindness meets. *Milton.*—Christ was the only person to have repented this unkindness. *South.*—And with unkindness seem'd to tax the god. *Dryden.*

* **To UNKING.** *v. a.* To deprive of royalty.

—God save king Henry, unking'd Richard first. *Shak.*—If as they would unking my father now. *South.*

* **UNKISSED.** *adj.* Not kissed.—I will be part unkind. *Shak.*

* **UNKNIGHTLY.** *adj.* Unbecoming a knight.—Their unknighly errand. *Sidney.*

* **To UNKNIT.** *v. a. 1.* To unweave; to be parate.—

Would he had not unknit himself

The noble knot he made. *Shak.*

2. To open.—Unknit that threat'ning, unknit brow. *Shak.*

* **UNKLE.** *n. f.* [uncle, French.] The brother of a father or mother. See **UNCLE.**—His uncle Siward, and the good Macduff. *Shak.*—My wealthy unkle from this world remove. *Dryden.*

* **To UNKNOW.** *v. a.* To cease to know.—Oh! can you keep it from you yourselves, unknown it? *Smith.*

* **UNKNOWABLE.** *adj.* Not to be known.—Distinguish well between knowables and unknowables. *Watts.*

* **UNKNOWING.** *adj.* 1. Ignorant; not knowing; with *of*.—Let me speak to th' unknowing world. *Shak.*—Unknowing persons. *Devy of Piety.*—Unknowing I prepar'd thy bridal bed. *Dryden.*—Unknowing he requires it. *Dryden.*—His bounds, unknowing of his change, pursue. *Dryden.*—Surveys his charge, unknowing of deceit. *Pope.* 2. Not practised; not qualified.—The lion moved unknowing to give place. *Dryden.*—And curs'd with hearts unknowing how to yield. *Pope.*

* **UNKNOWINGLY.** *adv.* Ignorantly; without knowledge.—Unknowingly he strikes and kills by chance. *Dryden.*—The Syrians were unknowingly led out of their way. *Addison.*

* **UNKNOWN.** *adj.* 1. Not known.—'Tis not unknown to you. *Shak.*—Unknown to us. *Mit.*—Unknown, unseen, my easy minutes pass. *Pope.*—Palamedes, not unknown to fame. *Dryden.*—You are not guilty, since unknown 'twas done. *Dryden.*—Despise the known, nor tremble at the unknown. *Pope.* 2. Greater than is imagined.—The planting of hemp and flax would be an unknown advantage to the kingdom. *Bacon.* 3. Not having cohabitation.—I am yet unknown to woman. *Shak.* 4. Without communication.—Unknown to Sir Roger. *Addison.*

* **UNLABOURED.** *adj.* 1. Not produced by labour.—Unlaboured harvests shall the fields adorn. *Dryden.* 2. Not cultivated by labour.—As the bright natives of th' unlabour'd field. *Blackin.* 3. Spontaneous; voluntary.—And from the theme unlabour'd beauties rise. *Tickel.*

* **To UNLACE.** *v. a. 1.* To loose any thing fastened with strings.—But thought his arms to leave, and helmet to unlace. *Spenser.*—There lies a knight with helm unlac'd. *Spenser.*—The belmet from my brow unlac'd. *Pope.* 2. To loose a woman's dress.—She lay for dead, till I help'd with unlacing her. *Sidney.*—Unlace yourself. *Donne.* 3. To divest of ornaments.—You unlace your reputation. *Shak.*

* **To UNLADE.** *v. a. 1.* To remove from the vessel which carries.—Unlade his hopes into another bottom. *Denham.* 2. To exonerate from.

which carries.—Shall here *unlade* him, and depart no more. *Dryd.* 2. To put on. Ufed of a vessel.—At Tyre the ship was to *unlade* her burden. *Asi.* xxi. 3.

* *UNLAD.* *adj.* 1. Not placed; not fixed.—The first foundations of the world being as yet *unlaid*. *Hooker.* 2. Not pacified; not filled; not suppressed.—Stubborn *unlaid* ghost. *Milton.*

* *UNLAMENTED.* *adj.* Not deplored.—He died *unlamented* by any. *Clarendon.*—Thus *unlamented* pass the proud away. *Pope.*

* *To UNLATCH.* *v. a.* To open by lifting up the latch.—My worthy wife the door *unlatch'd*. *Dryden.*

* *UNLAWFUL.* *adj.* Contrary to law; not permitted by the law.—

Before I be convict by course of law,
To threaten me with death is most *unlawful*.

Shak.

—It is an *unlawful* thing for a Jew to come unto one of another nation. *Asi.*—Shew me when it is *unlawful* to take these courses. *South.*—Uncouth, perhaps *unlawful* to reveal. *Dryd.*

* *UNLAWFULLY.* *adv.* 1. In a manner contrary to law or right.—He next year will be tempted to gain something *unlawfully*. *Taylor.* 2. Illegitimately; not by marriage.—I had rather my brother die by the law, than my son should be *unlawfully* born. *Shak.*—*Unlawfully* born, may claim of the man's affection who begot me. *Addison.*

* *UNLAWFULNESS.* *n. f.* 1. Contrariety to law; state of not being permitted.—If those alledged testimonies of scripture did indeed concern the matter to such effect as was pretended, that which they should infer were *unlawfulness*. *Hooker.*—The *unlawfulness* of lying. *South.* 2. Illegitimacy.

* *To UNLEARN.* *v. a.* To forget, or disuse what has been learned.—Antisthenes, being asked of one, what learning was most necessary for man's life? answered, to *unlearn* that which is naught. *Bacon.*—Take new pains to *unlearn* those habits. *Holder.*—The government of the tongue, our greatest scholars have *unlearn'd*. *Decay of Piety.*

Some cyders have by art, or age, *unlearn'd*
Their genuine relish. *Philips.*

—What they thus learned from him in one way, they did not *unlearn* again in another. *Atterbury.*—A wicked man is obliged to *unlearn* his former life. *Rogers.*

* *UNLEARNED.* *adj.* 1. Ignorant; not informed; not instructed.—Wisdom that here th' *unlearn'd* shall understand. *Davenant.*—And by succession of *unlearn'd* times. *Ross.*

Some at the bar, with subtilty defend

The cause of an *unlearned* noble friend. *Dryd.*—*Unlearned* men. *Locke.* 2. Not gained by study; not known.—They learn such things chiefly as were better *unlearned*. *Milt.* 3. Not suitable to a learned man.—I will prove those verses to be very *unlearned*. *Shak.*

* *UNLEARNEDLY.* *adv.* Ignorantly; grossly.—They think *unlearnedly*, who are of another belief. *Brown.*

* *UNLEAVENED.* *adj.* Not fermented; not

mixed with fermenting matter.—They baked *unleavened* cakes of the dough. *Exod.* ii. 39.

* *UNLEISUREDNESS.* *n. f.* Business; want of time; want of leisure. Not in use.—The *unleisurefulness* of the wandering author. *Boyle.*

* *UNLESS.* *conjunct.* Except; it not; supposing that not.—*Unless* we observe both, we obey neither. *Hooker.*—*Unless* I look on Sylvia in the day. *Shak.*

What hidden strength,
Unless the strength of heav'n, if you mean that?
Milton.

For sure I am, *unless* I win in arms,
To stand excluded from Emilia's charms.

Dryden.

—It never comes *unless* extorted. *Dryden.*—*Unless* he were, like Phœbus, young. *Swift.*

* *UNLESSONED.* *adj.* Not taught.—An *unlesson'd* girl, unchool'd, unpractis'd. *Shak.*

* *UNLETTERED.* *adj.* Unlearned; untaught.—Unschool'd and *unlettered* men. *Hooker.*—*Unletter'd* him. *Milton.*—Th' *unletter'd* christian. *Dryden.*

* *UNELEVELLED.* *adj.* Not laid even.—All *unelevell'd* the gay garden lies. *Tickel.*

* *UNLIBIDINOUS.* *adj.* Not lustful; pure from carnality.—Love *unlibidinous* reign'd. *Milt.*

* *UNLICENSED.* *adj.* Having no regular permission.—

Ask what boldness brought him hither
Unlicensed. *Milton.*

—No more, *unlicens'd*, thus to brave the main.
Pope.

* *UNLICKED.* *adj.* Shapeless; not formed; from the opinion that the bear licks her young to shape.—Like to a chaos, or *unlick'd* bear-whelp. *Shak.*—Those *unlick'd* bear-whelps. *Donne.*

The bloody bear, and independent beast,
Unlick'd to form, in groans her hate exprest.

Dryden.

* *UNLIGHTED.* *adj.* Not kindled; not set on fire.—There lay a log *unlighted* on the earth. *Dryd.*—Untouch'd, *unlighted* glows. *Prior.*

* *UNLIGHTSOME.* *adj.* Dark; gloomy; wanting light.—A mighty sphere! he fram'd, *unlightsome* first. *Milton.*

* *UNLIKE.* *adj.* 1. Dissimilar; having no resemblance.—Where cases are so *unlike* as theirs and ours. *Hosker.*

So the twins humours, in our Terence, are
Unlike. *Denham.*

—*Unlike* the niceness of our modern dames. *Dryd.*—Our ideas, inceed one another, not much *unlike* the images in the inside of a lantern. *Locke.*

—*Unlike* successes equal merits found. *Pope.* 2. Improbable; unlikely; not likely.—Make not impossible that which but seems *unlike*. *Shak.*—It were not *unlike* to befall to Spain. *Bacon.*

* *UNLIKELIHOOD.* } *n. f.* [from *unlikely*.]
* *UNLIKELINESS.* } Improbability.—A

midst all the *unlikelihooods* and discouraging circumstances. *South.*—Improbability and *unlikeliness*. *Locke.*

(1.) * *UNLIKELY.* *adj.* 1. Improbable; not such as can be reasonably expect'd.—A very *unlikely* envy she hath stumbled upon. *Sidney.* 2. Not promising any particular event.—Effects are
S s s s s strange,

strange, when they grow by *unlikely* means. *Hook.*
—Success in things *unlikely*. *Denham.*—Not only
unlikely to reach the future, but unworthy of the
present age. *Swift.*

(1.) * *UNLIKELY*. *adv.* Improbably.—They
not *unlikely* may proceed from the discoveries
each shall communicate to another, of God and
nature. *Pope.*

* *UNLIKENESS*. *n. f.* Dissimilitude ; want
of resemblance.—Comparing its likeness, or *un-
likeness* with the original. *Dryden.*

* *UNLIMITABLE*. *adj.* Admitting no bounds.
—He tells us 'tis unlimited and *unlimited*. *Locke.*

* *UNLIMITED*. *adj.* 1. Having no bounds ;
having no limits.—So *unlimited* is our impotence.
Boyle.—*Unlimited* excellencies. *Tillotson.* 2. Un-
defined ; not bounded by proper exceptions.—
Unlimited generalities. *Hooker.* 3. Unconfined ;
not restrained.—An *unlimited* will. *Taylor.*—An
unlimited exercise of mercy. *Rogers.*—*Unlimited*
conjugal fidelity. *Arbuth.*

* *UNLIMITEDLY*. *adv.* Boundlessly ; with-
out bounds.—Many ascribe too *unlimitedly* to the
force of a good meaning. *Decay of Piety.*

* *UNLINEAL*. *adj.* Not coming in the or-
der of succession.—

They put a barren sceptre in my gripe,
Thence to be wrench'd by an *unlineal* hand,
No son of mine succeeding. *Shak.*

* *To UNLINK*. *v. a.* To untwist ; to open.
—The serpent seeing him *unlink'd* itself. *Shak.*

* *UNLIQUIFIED*. *adj.* Unmelted ; undis-
solved.—Rigid and *unliquified*. *Addison.*

* *To UNLOAD*. *v. a.* 1. To disburden ; to
exonerate ; to free from load.—And death un-
loadeth thee. *Shak.*—Vain man, forbear, of cares
unload thy mind. *Creech.*—Some to *unload* the
fertile branches run. *Pope.* 2. To put off any
thing burdensome.—To you duke Humphry must
unload his grief. *Shak.*—Nor can my tongue un-
load my heart's great burden. *Shak.*

* *To UNLOCK*. *v. a.* 1. To open what is
shut with a lock.—I have seen her *unlock* her clo-
set. *Shak.*—*Unlocks* the door. *Dryd.* 2. To open
in general.

My purse, my person, my extremest means,
Lie all *unlock'd* to your occasions. *Shak.*

—I yielded, and *unlock'd* her all my heart. *Milton.*

—*Unlocks* their binding qualities. *Mortimer.*—A
fluxion of quick-lime *unlocks* the salts. *Arbuth.*

—*Unlocks* your springs, and open all your shades.
Pope.

* *UNLOCKED*. *adj.* Not fastened with a
lock.

* *UNLOOKED*. } *adj.* Unexpected ; not
* *UNLOOKED* for. } foreseen.—If he had not
come *unlook'd for*. *Stacy.*—How much *unlook'd*

for in this expedition. *Shak.*—But by some *unlook'd*
accident cut off.—Whatsoever is new is *unlook'd*
for. *Bacon.*

From that high hope, to what relapse
Unlook'd for are we fall'n. *Milto.*

—Your affairs I have recommended to the king,
but with *unlook'd* success. *Denham.*—She comes
unlook'd for, if she comes at all. *Pope.*

(1.) * *To UNLOOSE*. *v. a.* To loose. A word
perhaps barbarous and ungrammatical, the parti-

cle prefixed implying negation ; so that to *unloose*
is properly to bind.—York, *unloose* your long im-
prison'd thoughts.—Shall from your neck *unloose*
his am'rous fold. *Shak.*—The gordian knot of
he will *unloose*. *Shak.*—T' *unloose* this tied-up ju-
stice. *Shak.*—The latchet of his shoes I am not wa-
thy to stoop down and *unloose*. *Mark.* 1. 7.—The
industry of those that should attempt to *unloose* the
knots. *Decay of Piety.*

(2.) * *To UNLOOSE*. *v. n.* To fall in pieces ;
to loose all union and connexion.—Without this
virtue, the publick union must *unloose*. *Collier.*

* *UNLOSABLE*. *adj.* [A word rarely used.]
Not to be lost.—The *unlosable* mobility of atoms.
Boyle.

* *UNLOVED*. *adj.* Not loved.—That they
feel that feel *unloved* love. *Sidney.*—But miserable
most to love *unlovd*. *Shak.*—He was generally
unloved. *Clarendon.*

* *UNLOVELINESS*. *n. f.* Unamiableness ;
inability to create love.—To countervail his own
unloveliness. *Sidney.*

* *UNLOVELY*. *adj.* That cannot excite love.
There seems by this word generally more interde-
ed than barely negation. See *UNLOVELINESS*.

* *UNLOVING*. *adj.* Unkind ; not fond.—
Which argu'd thee a most *unloving* father. *Shak.*

* *UNLUCKILY*. *adv.* Unfortunately ; by ill
luck.—Things have fallen out so *unluckily*. *Shak.*
—An ant dropt *unluckily* into the water. *L'Estr.*
—A fox *unluckily* crossing the road. *Addison.*

* *UNLUCKY*. *adj.* 1. Unfortunate ; produ-
cing unhappiness. This word is generally used
of accidents slightly vexatious.—*Unlucky* accidents.
Boyle. 2. Unhappy ; miserable ; subject to fre-
quent misfortunes.—This *unlucky* eye. *Spenser.* 3.
Slightly mischievous ; mischievously wasteful.—
His doings *unluckie*, and ever unjust. *Tupper.*—An
unlucky wag. *L'Estrange.*—There was a lad, th'
unluckiest of his crew. *King.* 4. Ill-omen'd ; in-
auspicious.—And haunt me not with that *unlucky*
tag. *Dryden.*

* *UNLUSTROUS*. *adj.* Wanting splendour ;
wanting lustre.—Bare and *unlustrous* as the smooth
light. *Shak.*

* *To UNLUTE*. *v. a.* To separate vessels clo-
sed with chymical cement.—Upon the uniting
the vessels. *Boyle.*

* *UNMADE*. *adj.* 1. Not yet formed ; not
created.—Thou saw'st the secrets of the world
unmade. *Spenser.*—An *unmade* grave. *Shak.* 2.
Deprived of form or qualities.—The first earth
was perfectly *unmade* again. *Woodward.* 3. O-
mitted to be made.—That other works by nature
are *unmade*. *Blackmore.*

* *UNMAIMED*. *adj.* Not deprived of any
essential part.—An interpreter should give his in-
ter or entire and *unmaimed*. *Pope.*

* *UNMAKABLE*. *adj.* Not possible to be
made.—*Unmakable* by any but a divine power.
Crow's Cosmology.

* *To UNMAKE*. *v. a.* To deprive of former
qualities before possessed. To deprive of form or
being.—

They've made themselves, and their fitness now
Does *unmake* you. *Shak.*

—God does not make or *unmake* things, to try
experiments.

experiments. *Burnet*.—When such as these make a king. *Dryden*.—God, when he makes a prophet, does not *unmake* the man. *Locke*.

* **UNMAN.** *v. a.* 1. To deprive of the constituent qualities of a human being, as reason.—What, quite *unmann'd* in folly. *Shak*.—Gross errors *unman*, and strip them of the very principles of reason. *South*. 2. To emasculate. 3. To break into irrefolution; to deject.—*Unman* their courage, and augment their fears. *Dryden*.—Again *unmann'd*, a shower of sorrows shed. *Pope*.

* **UNMANAGEABLE.** *adj.* 1. Not manageable; not easily governed.—*Unmanageable* by any authority. *Glanville*.—None can be concluded *unmanageable*. *Locke*. 2. Not easily wiled.

* **UNMANAGED.** *adj.* 1. Not broken by horsemanship.—Like colts, or *unmanaged* horses. *Taylor*. 2. Not tutored; not educated.—An unguided force, and *unmanaged* virtue. *Felton*.

* **UNMANLIKE.** } *adj.* 1. Unbecoming a human. }
* **UNMANLY.** } man being.—It is strange to see the *unmanlike* cruelty of mankind. *Sidon*.—The act is *unmanly*. *Collier*. 2. Unsuitable to a man; effeminate.—It was a very *unmanlike* voice. *Sidon*.—New customs, though *unmanly*, yet are follow'd. *Shak*.—A poor *unmanly* melancholy. *Shak*.—*Unmanly*, ignominious, infamous. *Milton*.—*Unmanly* dread invades the French astoni'd. *Philips*.—*Unmanly* warmth, and tenderness of love. *Addison*.

* **UNMANNERED.** *adj.* Rude; brutal; uncivil.—*Unmanner'd* lord. *B. Jonson*.—Th' *unmanner'd* malefactor is arraign'd. *Dryden*.

* **UNMANNERLINESS.** *n. f.* Breach of civility; ill behaviour.—A sort of *unmannerliness* is apt to grow up with young people. *Locke*.

(1.) * **UNMANNERLY.** *adj.* Ill-bred; not civil; not complaisant.—I were *unmannerly* to take you out. *Shak*.—He call'd them untought knaves, *unmannerly*. *Shak*.—*Unmannerly* sadness. *Shak*.—Bare-face'd ribaldry is *unmannerly*. *Dryden*.—Au *unmannerly* jest. *Swift*.

(2.) * **UNMANNERLY.** *adv.* Uncivily.—If I have us'd myself *unmannerly*. *Shak*.

* **UNMANURED.** *adj.* Not cultivated.—*Unpeopl'd, unmanur'd, unprov'd, unprais'd*. *Spens*.

* **UNMARKED.** *adj.* Not observed; not regarded.—I got a time, *unmark'd* by any, to steal away. *Sidney*.—This place *unmark'd*, though oft I walk'd the green. *Dryden*.—He mix'd *unmark'd* among the busy throng. *Dryden*.—*Unmark'd*, unhonour'd at a monarch's gate. *Pope*.

* **UNMARRIED.** *adj.* Having no husband, or no wife.—*Unmarried* men are not always best subjects, for they are light to run away. *Bacon*.—Husbands and wives, boys and *unmarry'd* maids. *Dryd*.

(1.) * **TO UNMASK.** *v. a.* 1. To strip of a mask. 2. To strip of any disguise.—With full cups they had *unmask'd* his soul. *Recommon*.—Though in Greek or Latin they amuse us, yet a translation *unmasks* them. *Glanville*.

(2.) * **TO UNMASK.** *v. n.* To put off the mask.—My husband bids me; now I will *unmask*. *Shak*.

* **UNMASKED.** *adj.* Naked; open to the view.—My kindness and my hate *unmask'd* I wear. *Dryden*.

* **UNMASTERABLE.** *adj.* Unconquerable; not to be subdued.—The factor is *unmasterable* by the natural heat of man. *Brown*.

* **UNMASTERED.** *adj.* 1. Not subdued. 2. Not conquerable.—To his *unmaster'd* opportunity. *Shak*.—He cannot his *unmaster'd* grief sustain. *Dryden*.

* **UNMATCHABLE.** *adj.* Unparalleled; unequalled.—In an *unmatchable* degree of perfection. *Hooker*.—Their matiffs are of *unmatchable* courage. *Shak*.

* **UNMATCHED.** *adj.* Matchless; having no match or equal.—Navies *unmatch'd*, might to the world give law. *Dryd*.

* **UNMEANING.** *adj.* Expressing no meaning; having no meaning.—With round, *unmeaning* face. *Pope*.

* **UNMEANT.** *adj.* Not intended.—But Rhætus happen'd on a death *unmeant*. *Dryd*.

* **UNMEASURABLE.** *adj.* Boundless; unbounded.—Common mother! thou whose womb *unmeasurable*. *Shak*.—The *unmeasurable* profusion of ancestors. *Swift*.

* **UNMEASURED.** *adj.* 1. Immense; infinite.—Loft to the world, in vast, *unmeasur'd* space. *Blackm*. 2. Not measured; plentiful beyond measure.—From him all perfect good, *unmeasur'd* out, descends. *Milt*.

* **UNMEDITATED.** *adj.* Not formed by previous thought.—

In fit strains pronounc'd, or sung

Unmeditated. *Milton*.

* **UNMEDDLED with.** *adj.* Not touch'd; not altered.—The flood-gate is opened and closed for six days, continuing other ten days *unmeddled with*. *Carew*.

* **UNMEET.** *adj.* Not fit; not proper; not worthy.—Madam was young, *unmeet* the rule of sway. *Spens*.—I am *unmeet*. *Shak*.—At hours *unmeet*. *Shak*.—Vow, alack! for youth *unmeet*. *Shak*.—Its fellowship *unmeet* for thee. *Milt*.—That mute *unmeet*, yet touch'd the trembling string. *Prior*.

* **UNMELLOWED.** *adj.* Not fully ripened.—His head *unmellow'd*, but his judgment ripe. *Shak*.

* **UNMELTED.** *adj.* Undissolved by heat.—Snow on *Ætna* does *unmelted* lie. *Waller*.

* **UNMENTIONED.** *adj.* Not told; not named.—They left not any error *unmentioned* or unpressed. *Clar*.—*Unmention'd* and unmourn'd! *Southern*.

* **UNMERCHANTABLE.** *adj.* Unsaleable; not vendible.—They feed on salt, *unmerchantable* pilchard. *Carew*.

* **UNMERCIFUL.** *adj.* 1. Cruel; severe; inclement.—*Unmerciful* pride in the cage. *L'Estr*.—How cruel and *unmerciful* it is. *Locke*.—Unjust and *unmerciful*. *Rogers*. 2. Unconscionable; exorbitant.—*Unmerciful* demands were made of applause. *Pope*.

* **UNMERCIFULLY.** *adv.* Without mercy; without tenderness.—A little warm fellow fell most *unmercifully* upon his Gallick majesty. *Add*.

* **UNMERCIFULNESS.** *n. f.* Inclemency; cruelty; want of tenderness.—Left justice turn into *unmercifulness*. *Taylor*.

* **UNMERITABLE.**

* **UNMERITABLE.** *adj.* Having no desert. Not in use.—My desert *unmeritable*, shuns your high request. *Shak.*

* **UNMERITED.** *adj.* Not deserved; not obtained otherwise than by favour.—Favour *unmerited* by me. *Milt.*—A tottering pinnacle *unmerited* greatness is. *Gov. Tongue.*

* **UNMERITEDNESS.** *n. f.* State of being deserved.—The freeness or *unmeritedness* of God's love. *Boyle.*

* **UNMILKED.** *adj.* Not milked.—*Unmilk'd*, lay bleating in distrestful cries. *Pope.*

* **UNMINDED.** *adj.* Not heeded; not regarded.—A poor, *unminded* outlaw, sneaking home. *Shak.*—He after Eve seduc'd, *unminded*, flunk. *Milt.*

* **UNMINDFUL.** *adj.* Not heedful; not regardful; negligent; inattentive.—*Unmindful* of this law. *Spens.*—I am not *unmindful* of the things you would have me remember. *Boyle.*—Of flattering gales *unmindful*. *Milt.*—*Unmindful* of the crown that virtue gives. *Milt.*—He, not *unmindful* of his usual art. *Dryd.*—*Unmindful* of their party. *Swift.*

* **To UNMINGLE.** *v. a.* To separate things mixed.—It will *unmingle* the wine from the water. *Bacon.*

* **UNMINGLEABLE.** *adj.* Not susceptible of mixture. Not used.—The property of oil being *unmingleable* with water. *Boyle.*—The *unmingleable* liquors retain their distinct surfaces. *Boyle.*

* **UNMINGLED.** *adj.* Pure; not vitiated by any thing mingled.—And take *unmingled* thence your drop again. *Shak.*—Springs on high hills, are pure and *unmingled*. *Bac.*—His cup is full of pure and *unmingled* sorrow. *Taylor.*—Vessels of *unmingled* wine. *Pope.*

* **UNMIRY.** *adj.* Not fouled with dirt.—Pais, with safe, *unmiry* feet. *Gay.*

* **UNMITIGATED.** *adj.* Not softened.—*Unmitigated* rancour. *Shak.*

* **UNMIXED.** } *adj.* Not mingled with any
* **UNMIXT.** } thing; pure; not corrupted
by additions.—*Unmix'd* with baser matter. *Shak.*
—The new, *unmixed* otherwise than with some little asperion of the old. *Bac.*—With *unmix'd* joy, uninterrupted rest. *Roscom.*—The people's praise, if always praise *unmixt*? *Milt.*—*Unmixt* with foreign filth, and undefil'd. *Dryd.*—And this or that *unmixt* no mortal ear shall hind. *Pope.*

* **UNMOANED.** *adj.* Not lamented.—Fatherless distress was left *unmoan'd*. *Shak.*

* *UNPROFITABLENESS.* *n. s.* Uselessness.—The *unprofitableness* of your science. *Add.*

* *UNPROFITABLY.* *adv.* Uselessly; without advantage.—I should not now *unprofitably* spend Ben Jonson. In Roman blood *unprofitably* shed. *Addison.*

* *UNPROFITED.* *adj.* Having no gain.—Rather than make *unprofit* return. *Shak.*

* *UNPROLIFICK.* *adj.* Barren; not productive.—Great rains drown many insects, and render their eggs *unprolific*. *Hale.*

* *UNPROMISING.* *adj.* Giving no promise of excellence; having no appearance of value.—This *unpromising* disposition. *Locke.*—An attempt difficult and *unpromising* of success. *Bent.*

* *UNPRONOUNCED.* *adj.* Not uttered not spoken.—

Mad'st imperfect words, with childish tripe
Unpronounc'd, slide through my infant lips. *Milton.*

* *UNPROPER.* *adj.* 1. Not peculiar.—Millions nightly lie in those *unproper* beds. *Shak.* 2. Unfit; not right.

* *UNPROPERLY.* *adv.* Contrarily to propriety; improperly.—

I kneel before thee, and *unproperly*
Shew duty as mistaken all the while
Between the child and parent. *Shak.*

* *UNPROFITIOUS.* *adj.* Not favourable inauspicious.—'Twas then the dog-star's *unprofitous* ray. *Pope.*

* *UNPROPORTIONED.* *adj.* Not suited to something else.—Nor any *unproportion'd* thought his act. *Shak.*

* *UNPROPOSED.* *adj.* Not proposed.—This means are *unpropos'd*. *Dryd.*

* *UNPROPPED.* *adj.* Not supported; not upheld.—With languish'd head *unpropp'd*. *Milt.*—Thy bulk, *unpropp'd*, falls headlong on the plain. *Dryd.*

* *UNPROSPEROUS.* *adj.* [improsper, Latine.] Unfortunate; not prosperous.—*Unprosperous* and unsuccessful to the king. *Clar.*—Nought *unprosperous* shall thy ways attend. *Pope.*

* *UNPROSPEROUSLY.* *adv.* Unsuccessfully.—When a prince fights justly, and yet *unprosperously*. *Taylor.*

* *UNPROTECTED*

* **UNPROTECTED.** *adj.* Not protected; not supported; not defended.—*Unprotected* from above, endure. *Hooker.*

* **UNPROVED.** *adj.* 1. Not tried; not known by trial.—*Unproven*’d, unmanur’d, *unprov’d*, unrais’d. *Spenser.*—There I found a fresh *unproved* night. *Spenser.* 2. Not evinced by argument.—There is much left *unproved*. *Boyle.*

* **To UNPROVIDE.** *v. a.* To divest of resolution or qualifications; to unfurnish.—I’ll not expostulate with her, lest

Her beauty *unprovide* my mind again. *Shak.*
—With various arts to *unprovide* my mind. *South.*

* **UNPROVIDED.** *adj.* 1. Not secured or qualified by previous measures.—I am heinously *unprovided*. *Shak.*—My *unprovided* body. *Shak.*—But *unprovided* for a sudden blow. *Dryd.* 2. Not furnished; not previously supplied.—Those *unprovided* of tackling and victual, are forced to sea. *K. Charles.*—The seditious being in all things *unprovided*, were slain like beasts. *Hayward.*—Th’ *unprovided* town to take. *Dryden.*—Utterly *unprovided* of all other abilities. *Spratt.*—Courts are seldom *unprovided* of persons under this character. *Swift.*

* **UNPROVOKED.** *adj.* Not provoked.—The teaming earth, yet guiltless of the plough, And *unprovok’d*, did fruitless stores allow. *Dryd.*—A rebellion so destructive, and so *unprovoked*. *Addison.*

* **UNPROVOKING.** *adj.* Giving no offence.—I stabbed him a stranger, *unprovoking*, inoffensive. *Fleetw.*

* **UNPRUNED.** *adj.* Not cut; not lopped.—The whole land is full of weeds;

Her fruit trees all *unprun’d*. *Shak.*

* **UNPUBLISH.** *adj.* Private; not generally known, or seen.—Virgins must be retired and *unpublish*. *Taylor.*

* **UNPUBLISHED.** *adj.* 1. Secret; unknown.—All you *unpublish’d* virtues of the earth. *Shak.* 2. Not given to the publick.—Apply your care wholly to those which are *unpublish’d*. *Pope.*

* **UNPUNISHED.** *adj.* [impunis, Fr.] Not punished; suffered to continue in impunity.—In one sin thou shalt not be *unpunished*. *Ecclesi.*—Divine justice will not let oppression go *unpunish’d* hence. *L’Estr.*—The vent’rous victor, march’d *unpunish’d* hence. *Dryden.*

* **UNPURCHASED.** *adj.* Unbought.—*Unpurchased*’d plenty our full tables loads. *Denham.*

* **UNPURGED.** *adj.* Not purged; unpurified.—To tempt the rheumy and *unpurged* air. *Shak.*—In her village round those spots, *unpurg’d*. *Milton.*

* **UNPURIFIED.** *adj.* 1. Not freed from recrement. 2. Not cleansed from sin.—Our sinful nation *unpurified*. *Decay of Piety.*

* **UNPURPOSED.** *adj.* Not designed; not intentional.—Accidents *unpurpos’d*. *Shak.*

* **UNPURSUED.** *adj.* Not pursued.—All night the dreadful angel *unpursued*. *Milt.*

* **UNPUTRIED.** *adj.* Not corrupted by rottenness.—Meat and drink last longer *unputrid* in winter than in summer. *Bacon.*—No animal *unputrid*, being burnt, yields any alkaline salt. *Arbutnot.*

* **UNQUALIFIED.** *adj.* Not fit.—*Unqualified* for these agonies. *Decay of Piety.*—All the writers against Christianity have been wholly *unqualified* to propagate heresies. *Swift.*—Tories are as much *unqualified* for the smallest offices. *Swift.*

* **To UNQUALIFY.** *v. a.* To disqualify; to divest of qualification.—To *unqualify* a woman for an evening walk. *Addison.*—Our private misfortunes may *unqualify* us for charity. *Atterb.*—Deafness *unqualifies* me for all company. *Swift.*

* **UNQUARRELLABLE.** *adj.* Such as cannot be impugned.—Satisfactory and *unquarrellable* reasons. *Brown.*

* **To UNQUEEN.** *v. a.* To divest of the dignity of queen.—

Embalm me;
Then lay me forth; although *unqueen’d*, yet like
A queen, and daughter to a king, inter me. *Shak.*

* **UNQUENCHABLE.** *adj.* Unextinguishable.—We represent wildfires burning in water and *unquenchable*. *Bacon.*

The people on their holidays,
Impetuous, insolent, *unquenchable*. *Milt.*
—The criminal’s penitence may have numbered him among the saints, when our unretracted uncharitableness may send us to *unquenchable* flames. *Gov. of Tong.*—Our love of God, our *unquenchable* desires to promote our well-grounded hopes to enjoy his glory, should take the chief place in our zeal. *Spratt.*

* **UNQUENCHABLENESS.** *n. f.* Unextinguishableness.—I was amaz’d to see the *unquenchableness* of this fire. *Hakewill.*

* **UNQUENCHED.** *adj.* 1. Not extinguished.—We have heats of dungs, and of lime *unquenched*. *Bac.* 2. Not extinguishable.—*Unquenched* thirst. *Arbutnot.*

* **UNQUESTIONABLE.** *adj.* 1. Indubitable; not to be doubted.—The duke was of *unquestionable* courage in himself, and rather fearful of fame than danger. *Wotton.*—Interest hath no place in those *unquestionable* verities. *Glanv.*—There is an *unquestionable* magnificence in every part of Paradise Lost. *Addison.* 2. Such as cannot bear to be questioned without impatience: this seems to be the meaning here.—

What were his marks?—
—A lean cheek, which you have not; an *unquestionable* spirit, which you have not. *Shak.*

* **UNQUESTIONABLY.** *adv.* Indubitably; without doubt.—The fathers were *unquestionably* of the household of faith. *Spratt.*—St Austin was *unquestionably* a man of parts, but interposing in a controversy where his talent did not lie, threw his zeal against the antipodes to very ill purpose. *Burnet.*

* **UNQUESTIONED.** *adj.* 1. Not doubted; passed without doubt.—Other relations in good authors have not been *unquestioned* by some. *Brown.* 2. Indisputable; not to be opposed.—

And their *unquestion’d* pleasures must be serv’d,
B. Jonf.

3. Not interrogated; not examined.—
She mutt’ring pray’rs as holy rites she meant,
Through the divided crowd *unquestion’d* went.
Dryden.

Titts • **UNQUICK.**

- * **UNQUICK.** *adj.* Motionless; not alive.—
His senses droop, his steady eyes *unquick*.
Dan.
- * **UNQUICKENED.** *adj.* Not animated; not ripened to vitality.—

A num'rous, but *unquicken'd* progeny,
Clasp'd and enwrap'd within each other lie.

Blackmore.

- * **UNQUIET.** *adj.* [*inquiet*, Fr. *inquietus*, Lat.]
1. Moved with perpetual agitation; not calm; not still.—They are tossed and turmoiled in fathomless and *unquiet* depths of controversy. *Milt.*
2. Disturbed; full of perturbation; not at peace.—
Never shall you lie by Portia's side
With an *unquiet* soul. *Shak.*

What thoughts in my *unquiet* breast are ris'n!
Milton.

3. Reflex; unsatisfied.—

A vain, *unquiet*, glitt'ring, wretched thing.

Pope.

—Mirth from company is but a fluttering, *unquiet* motion. *Pope.*

- * **UNQUIETLY.** *adv.* Without rest.—

Who's there besides the weather?—

—One minded like the weather, most

Unquietly.

Shak.

- * **UNQUIETNESS.** *n. f.* 1. Want of tranquillity.—

Thou, like a violent noise, cam'st rushing in,
And mak'st them wake and start to new *unquietness*.
Denb.

2. Want of peace.—It is most enemy to war, and most hateth *unquietness*. *Spens.* 3. Reflexness; turbulence.—

What pleasure can there be in that estate,
Which your *unquietness* has made me hate.

Dryden.

4. Perturbation; uneasiness.—

He went in strange *unquietness*. *Shak.*

—From inordinate love and vain fear comes all *unquietness* of spirit. *Taylor.*

- * **UNRACKED.** *adj.* Not poured from the lees.—Pour the lees of the unrack'd vessel into the *unracked* vessel. *Bacon.*

- * **UNRAKED.** *adj.* Not thrown together and covered. Used only of fire.—

Where fires thou find'st *unraked* and hearths unwept,

There pinch the maids. *Shak.*

- * **UNRANSACKED.** *adj.* Not pillaged.—The soldiers left neither house nor corner of that rich city *unransacked*. *Knolles.*

- * **UNRANSOMED.** *adj.* Not set free by payment for liberty.—

Unransom'd here receive the spotless fair.

Pope.

- * **TO UNRAVEL.** *v. a.* 1. To disentangle; to extricate; to clear.—He has *unravell'd* the studied cheats of great artificers. *Fell.*—

There *unravel* all

This dark design, this mystery of fate. *Add.*

—Thou *unravell'st* intrigues of state. *Arbutnot.*

2. To disorder; to throw out of the present order.—How can any thing succeed well with people that are to be pleased with nothing unless the ball of the universe may be *unravell'd*, and the laws of Providence reversed. *L'Estr.*

O the traitor's name!

Ill know it; I will: art shall be conjur'd for it,
And nature all *unravell'd*. *Dryd.*

—*Unravelling* all the received principles of reason and religion. *Tillot.* 3. To clear up the intrigue of a play.—The solution, or *unravelling* of the intrigue commences, when the reader begins to see the doubts cleared up. *Pope.*—Thus is the plot supernaturally brought to perfection; nor is the *unravelling* of it less happily imagined. *Shak.*

- * **UNRAZORED.** *adj.* Unshaven.—

As smooth as Hebe's their *unrazor'd* lips.

Milton.

- * **UNREACHED.** *adj.* Not attained.—

That lofty hill, *unreach'd* by former time.

Dryd.

- * **UNREAD.** *adj.* 1. Not read; not publicly pronounced.—These books are safer and better to be left publicly *unread*. *Hooker.*

His muse had starv'd, had not a piece *unread*,
And by a player bought, supply'd her bread.

Dryden.

2. Untaught; not learned in books.—

Uncertain whose the narrower span,

The clown *unread*, or half-read gentleman.

Dryden.

- * **UNREADINESS.** *n. f.* 1. Want of readiness; want of promptness.—Im preparation and *unreadiness*. *Hook.* 2. Want of preparation.—Nothing is so great an enemy to tranquillity and a contented spirit, as the amazement and confusion of *unreadiness* and inconsideration. *Taylor.*

- * **UNREADY.** *adj.* 1. Not prepared; not fit.

The fairy knight

Departed thence, albe his wounds wide

Not thoroughly heal'd, *unready* were to ride.

Spenser.

How now, my lords? what all *unready* to?

Shak.

2. Not prompt; not quick.—*Unready* to put in execution the suggestions of reason. *Brown.* 3. Awkward; ungain.—An *unready* horse will neither stop nor turn. *Bacon.*

- * **UNREAL.** *adj.* Unsubstantial; having only appearance.—

Hence terrible shadow!

Unreal mock'ry, hence.

Shak.

I with pain

Voyag'd th' *unreal*, vast, unbounded deep

Of horrible confusion.

Milt.

- * **UNREASONABLE.** *adj.* 1. Exorbitant; claiming, or insisting on more than is fit.—It would be *unreasonable* to limit a translator to the narrow compass of his author's words. *Dryd.*—A very *unreasonable* request. *Swift.* 2. Not agreeable to reason.—No reason known to us; but that there is no reason thereof, I judge most *unreasonable* to imagine. *Hook.*—It is *unreasonable* for men to be judges in their own cases. *Locke.*—She entertained many *unreasonable* prejudices. *Add.* 3. Greater than is fit; immoderate.—Those that place their hope in another world have, in a great measure, conquered dread of death, and *unreasonable* love of life. *Atterb.*

- * **UNREASONABLENESS.** *n. f.* 1. Inconsistency with reason.—The *unreasonableness* and presumption of those that thus project have not

h as a thought, all their lives long, to ad-
as far as attrition. *Hammond.* 2. Exorbi-
excessive demand.—The *unreasonableness*
in propositions is evident. *K. Charles.*—A
university disputant was complaining of
reasonableness of a lady with whom he was
d in a point of controversy. *Addison.*

UNREASONABLY. *adv.* 1. In a manner
ry to reason. 2. More than enough.—You
yourself most *unreasonably.* *Shak.*

UNREAVE. *v. a.* [now *unravel*; from
unravel, or *ravel*; perhaps the same with
to tear, or break asunder.] To unwind; to
unple.—

Levi'd a web her woers to deceive;

Same at night she did *unreave.* *Spens.*

UNREBATED. *adj.* Not blunted.—A num-
bers try it out with *unrebated* swords.

Shak.

UNREPUKABLE. *adj.* Obnoxious to no
re.—Keep this commandment without spot,
shakle until the appearing of Christ. *1 Tim.*

UNRECEIVED. *adj.* Not received.—Where
gns and sacraments of his grace are not
gh contempt *unreceived*, or received with
mpt, they really give what they promise,
re what they signify. *Hock.*

UNRECLAIMED. *adj.* 1. Not tamed.—
agencies of *unreclaimed* blood. *Shak.* 2. Not
ned.—This is the most favourable treatment
er can hope for, who continues *unreclaimed*
e goodness of God. *Rogers.*

UNRECONCILABLE. *adj.* 1. Not to be
sed; implacable.—

Let me lament,
at our stars, *unreconcilable*, should have di-
vided

ir equalness to this. *Shak.*

ot to be made consistent with.—He had many
nities and sins, *unreconcilable* with perfect
couness. *Hammond.*

UNRECONCILED. *adj.* Not reconciled.—
If you bethink yourself of any crime
reconcil'd as yet to heav'n and grace,
licit for it straight. *Shak.*

UNRECORDED. *adj.* Not kept in remem-
ce by publick monuments.—

Unrecorded left through many an age
ortby t' have not remain'd to long unsung.

Milton.

The great Antiochus! a name
ot *unrecorded* in the rolls of fame. *Pope.*

UNRECOUNTED. *adj.* Not told; not re-

—

This is yet but young, and may be left
some years *unrecounted.* *Shak.*

UNREQUITABLE. *adj.* Incapable of re-
ng the deficiencies of an army.—Empty and
unrequisite colonels of twenty men in a company.

Shak.

UNRECURING. *adj.* Irremediable.—

I found her straying in the park,
eking to hide herself, as doth the deer
hat hath receiv'd some *unrecuring* wound.

Shak.

UNREDUCED. *adj.* Not reduced.—The
divided all the rest of the Irish counties *un-*
red into threes. *Davies.*

* **UNREFORMABLE.** *adj.* Not to be put
into a new form.—The rule of faith is alone im-
moveable and *unreformable*; to wit, of believing
in one only God omnipotent, creator of the world,
and in his son Jesus Christ, born of the virgin
Mary. *Hammond.*

* **UNREFORMED.** *adj.* 1. Not amended; not
corrected.—This general revolt, when overcome,
produced a general reformation of the Irishry,
which ever before had been *unreformed.* *Davies.*
—We retain the Julian constitution of the year,
unreformed, without consideration of the defective
minutes. *Halder.* 2. Not brought to newness of
life.—If he may believe that Christ died for him,
as now he is an *unreformed* Christian, then what
needs he reformation? *Hammond.*

Unhumbled, unrepentant, *unreformed.* *Milt.*

* **UNREFRACTED.** *adj.* Not refracted.—
The sun's circular image is made by an *unrefract-*
ed beam of light. *Newton.*

* **UNREFRESHED.** *adj.* Not cheered; not
relieved.—Its symptoms are a spontaneous lass-
itude, being *unrefreshed* by sleep. *Arbuth.*

* **UNREGARDED.** *adj.* Not heeded; not re-
spected; neglected.—

We, ever by his might,
Had thrown to ground the *unregarded* right.

Spenser.

Doft see, how *unregarded* now
That piece of beauty passes?

There was a time when I did vow

To that alone;

But mark the fate of faces. *Suckling.*

On the cold earth lies th' *unregarded* king's

A headless carcass, and a nameless thing. *Denb.*

Me you have often counsel'd to remove

My vain pursuit of *unregarded* love. *Dryd.*

—Laws against immorality have not been execu-
ted, and proclamations to enforce them are wholly
unregarded. *Swift.*

* **UNREGENERATE.** *adj.* Not brought to
a new life.—This is not to be understood prom-
iscuously of all men, *unregenerate* persons as well
as regenerate. *Stephens.*

* **UNREGISTERED.** *adj.* Not recorded.—
Hotter hours,

Unregister'd in vulgar fame, you have

Luxuriously pick'd out. *Shak.*

* **UNREINED.** *adj.* Not restrained by the
bridle.—

Left from thy flying speed *unrein'd*, as once
Bellerophon, though from a lower clime
Dismounted, on the Aleian field I fall. *Milt.*

* **UNRELENTING.** *adj.* Hard; cruel; feel-
ing no pity.—

By many hands your father was subdued;
But only slaughter'd by the ireful arm
Of *unrelenting* Clifford. *Shak.*

Place pitchy barrels on the fatal stake,
That so her torture may be shortened.
Will nothing turn your *unrelenting* hearts?

Shak.

These are the realms of *unrelenting* fate;
And awful Rhadamanthus rules the state.

Dryden.

False tears shall wet his *unrelenting* eyes,
And his glad heart with artful sighs shall heave.

Smith.

* **UNRELIEVABLE.**

* **UNRELIEVABLE.** *adj.* Admitting no succour.—As no degree of distress is *unrelievable* by his power, so no extremity of it is inconsistent with his compassion. *Boyle.*

* **UNRELIEVED.** *adj.* Not succoured.—
The goddess griev'd,
Her favour'd host should perish *unreliev'd.*

Dryden.
2. Not eased.—The uneasiness of *unrelieved* thirst is not lessened by continuance, but grows the more unsupportable. *Boyle.*

* **UNREMARKABLE.** *adj.* Not capable of being observed.—Our understanding, to make a complete notion, must add something else to this fleeting and *unremarkable* superficialities, that may bring it to our acquaintance. *Digby.* 2. Not worthy of notice.

* **UNREMEDIAL.** *adj.* Admitting no remedy.—He so handled it, that it rather seemed he had more come into a defence of an *unremediable* mischief already committed, than that they had done it at first by his consent. *Sidney.*

* **UNREMEMBERED.** *adj.* Not retained in the mind; not recollected.—I cannot pass *unremembered* their manner of disguising the shafts of chimneys in various fashions, whereof the noblest is the pyramidal. *Wotton.*

* **UNREMEMBERING.** *adj.* Having no memory.—

That, *unrememb'ring* of its former pain,
The soul may suffer mortal flesh again. *Dryd.*

* **UNREMEMBRANCE.** *n. f.* Forgetfulness; want of remembrance.—Some words are negative in their original language, but seem positive, because the negation is unknown; as amnesty, an *unremembrance*, or general pardon. *Watts.*

* **UNREMOVABLE.** *adj.* Not to be taken away.—Never was there any woman, that with more *unremovable* determination gave herself to love, after she had once set before her mind the worthiness of Amphialus. *Sidney.*

You know the fiery quality of the duke,
How *unremovable* and fixt he is
In his own course. *Shak.*

* **UNREMOVABLY.** *adv.* In a manner that admits no removal.—His discontents are *unremovably* coupled to his nature. *Shak.*

* **UNREMOVED.** *adj.* 1. Not taken away.—It is impossible, where this opinion is imbibed and *unremoved*, to found any convincing argument. *Hammond.*—We could have had no certain prospect of his happiness, while the last obstacle was *unremoved.* *Dryden.* 2. Not capable of being removed.—

Like Teneriff or Atlas *unremov'd.* *Milt.*

* **UNREPAID.** *adj.* Not recompensed; not compensated.—

Hadst thou full pow'r
To measure out his torments by thy will;
Yet what couldst thou, tormentor, hope to gain?
Thy loss continues, *unrepaid* by pain. *Dryd.*

* **UNREPEALED.** *adj.* Not revoked; not abrogated.—When you are pinched with any *unrepealed* act of parliament, you declare you will not be obliged by it. *Dryd.*

Nature's law, and *unrepeal'd* command,
That gives to lighter things the greatest height.
Blackmore.

* **UNREPENTANT.** See **UNREPENTING.**

* **UNREPENTED.** *adj.* Not expiated by penitential sorrow.—They are no fit supplicants to seek his mercy in the behalf of others, whose own *unrepented* sins provoked his just indignation. *Hooker.*

If I ventr'ing to displease
God for the fear of man, and man prefer,
Set God behind: which in his jealousy
Shall never, *unrepented*, find forgiveness. *Mil.*
As in *unrepented* sin she died,
Doom'd to the same bad place, is punish'd to
her pride. *Dryden.*

—With what confusion will he bear all his *unrepented* sins produced before men and angels. *Rogers.*

* **UNREPENTING.** *adj.* Not repenting; not penitent; not sorrowful for sin.—

Should I of these the liberty regard,
Who freed as to their ancient patrimony,
Unhumbled, *unrepenting*, unreform'd,
Headlong would follow. *Milton.*

My unprepar'd and *unrepenting* breath
Was snatch'd away by the swift hand of death. *Rafson.*

All his arts reveal,
From the first moment of his vital breath,
To his last hour of *unrepenting* death. *Dryden.*
Nor tyrants fierce, that *unrepenting* die,
E'er felt such rage as thou. *Pope.*

* **UNREPINING.** *adj.* Not peevishly complaining.—

Barefoot as she trod the flinty pavement,
Her footsteps all along were mark'd with blood;
Yet silent on the pass'd, and *unrepining.* *Ross.*

* **UNREPLENISHED.** *adj.* Not filled.—Some air retreated thither, kept the mercury out of the *unreplenish'd* space. *Boyle.*

* **UNREPRESENTED.** *adj.* Having no representative in parliament.

* **UNREPRIEABLE.** *adj.* Not to be repited from penal death.—

Within me is a hell; and there the poison
Is, as a fiend, confin'd, to tyrannize
In *unreprievable* condemned blood. *Shak.*

* **UNREPROACHED.** *adj.* Not upbraided; not censured.—Sir John Hotham, *unreproach'd*, uncurled by any imprecation of mine, pays his head. *K. Charles.*

* **UNREPROVEABLE.** *adj.* Not liable to blame.—You hath he reconciled, to present you holy, unblamable, and *unreproveable* in his sight. *Caloffians.*

* **UNREPROVED.** *adj.* 1. Not censured.—Christians have their churches, and *unreproved* exercise of religion. *Sandys.* 2. Not liable to censure.—*Unreproved* truth. *Spens.*—In *unreproved* pleasures free. *Milton.*

* **UNREPUGNANT.** *adj.* Not opposite.—*Unrepugnant* laws. *Hook.*

* **UNREPUTABLE.** *adj.* Not creditable.—Piety is no *unreputable* qualification. *Rogers.*

* **UNREQUESTED.** *adj.* Not asked.—With what security can our ambassadors go, *unrequested* of the Turkish emperor. *Knolles.*

* **UNREQUITABLE.** *adj.* Not to be retaliated.—An *unrequitable* evil may ensue. *Brown.*—So *unrequitable* is God's love. *Boyle.*

* **UNRESENTED.**

* **UNRESENTED.** *adj.* Not regarded with ger.—Their failings passed not *unresented* by od. *Rogers.*

* **UNRESERVED.** *adj.* 1. Not limited by y private convenience.—*Unreserved* obedience his commands. *Rogers.* 2. Open; frank; con- aling nothing.

* **UNRESERVEDLY.** *adv.* 1. Without limita- tions.—I am not to embrace absolutely and *unre- servedly* the opinion of Aristotle. *Boyle.* 2. With- out concealment; openly.—I open my mind *un- reservedly* to you. *Pope.*

* **UNRESERVEDNESS.** *n. f.* Unlimitedness; inkness; largeness; openness.—The tenderness d *unreservedness* of his love. *Boyle.*—I write with ore *unreservedness* than ever man wrote. *Pope.*

* **UNRESISTED.** *adj.* 1. Not opposed.—The anets roll through free and *unresisted.* *Bentley.* 2. sifflens; such as cannot be opposed.—*Unresisted* ight. *Dryd.*—The conqu'ring force of *unresisted* el. *Pope.*

* **UNRESISTING.** *adj.* Not opposing; not aking resistance.—But meek and *unresisting* inno- nce. *Dryden.*—The liquid and *unresisting* spaces the heavens. *Bentley.*

* **UNRESOLVABLE.** *adj.* Not to be solved; soluble.—A problem *unresolvable* upon any o- der ground. *South.*

* **UNRESOLVED.** *adj.* 1. Not determined; ving made no resolution: sometimes with of.— arm'd, and *unresolved* d to beat them back. *Shak.* -Turnus, *unresolved* d of flight. *Dryden.* 2. Not lved; not cleared.—Leave no doubt *unresolved.* *Shak.*

* **UNRESOLVING.** *adj.* Not resolving; not determined.—She her arms about her *unresolving* sband threw. *Dryd.*

* **UNRESPECTIVE.** *adj.* Inattentive; taking tle notice.—

I will converse with iron-witted fools, And *unrespective* boys. *Shak.*

* **UNREST.** *n. f.* Disquiet; want of tranqui- y; quietness. Not in use.—Before their rage ew to so great *unrest.* *Spenser.*

Repose, sweet gold, for their *unrest*, That have their alms out of the empress's chest. *Shak.*

Then runs amaz'd distress, with sad *unrest.* *Dan.* Yet, let me borrow from mine own *unrest.* *Wott.* Up they rose, as from *unrest.* *Milton.*

* **UNRESTORED.** *adj.* 1. Not restored. 2. ot cleared from an attainer.—The son of an *unrestored* traitor. *Collier.*

* **UNRESTRAINED.** *adj.* 1. Not confined; ot hindered.—My hours my own, my pleasures *unrestrained.* *Dryd.* 2. Licentious; loose.—With *unrestrained*, loose companions. *Shak.* 3. Not li- ted.—An *unrestrained* truth. *Brown.*

* **UNRETRACTED.** *adj.* Not revoked; not called.—Our *unretracted* uncharitableness. *Gov. the Tongue.*—Malevolence *unretracted.* *Collier.*

* **UNREVEALED.** *adj.* Not told; not disco- vered.—*Unrevealed* pleasures. *Spens.*—Dear, fatal me! rest ever *unreveal'd.* *Pope.*

* **UNREVENGED.** *adj.* Not revenged.—So ould we die, not *unrevenged* all. *Fairfax.*—Not *reveng'd* that impious act shall be. *Dryd.*—And ipio's ghost walks *unreveng'd* amongst us. *Add.*

* **UNREVEREND.** *adj.* Irreverent; disrespect- ful.—See not your bride in these *unreverent* robes. *Shak.*—Fie! *unreverend* tongue! *Shak.*

* **UNREVERENTLY.** *adv.* Disrespectfully.— I did *unreverently* blame the gods. *Ben. Jon.*

* **UNREVERSED.** *adj.* Not revoked; not repealed.—It *unreversed* stands in effectual force. *Shak.*

* **UNREVOKED.** *adj.* Not recalled.—Hear my decree, which *unrevok'd* shall stand. *Milton.*

* **UNREWARDED.** *adj.* Not rewarded; not recompensed.—Good offices may not pass *unre- warded.* *L'Estrange.*—Nor *unrewarded* let your prince complain. *Pope.*

* **To UNRIDDLE.** *v. a.* To solve an enigma; to explain a problem.—Some kind power *unriddle* where it lies. *Suckling.*—The Platonick principles will not *unriddle* the doubt. *Glanville.*—A reverse often clears up the passage of an old poet, as the poet often serves to *unriddle* the reverse. *Addison.*

* **UNRIDICULOUS.** *adj.* Not ridiculous.— An indifferent and *unridiculous* object. *Brown.*

* **To UNRIG.** *v. a.* To strip of the tackle.— Their ships *unrigg'd.* *Dryden.*

* **UNRIGHT.** *adj.* Wrong. In *Spenser*, this word should perhaps be *untight*.—What in most English writers used to be loose, and as it were *unright*, in this author is well grounded, timely framed, and strongly trusted up together. *Spenser.*—Shew that thy judgment is not *unright.* *Wisd.*

* **UNRIGHTEOUS.** *adj.* Unjust; wicked; sin- ful; bad.—His place usurped by *unrighteous* doom. *Spenser.*—The salt of most *unrighteous* tears. *Shak.*—Let the wicked man forsake his way, and the *unrighteous* man his thought. *Isa. lv.*

* **UNRIGHTEOUSLY.** *adv.* Unjustly; wick- edly; sinfully.—*Unrighteously* it was decreed. *Dryd.*—*Unrighteously* oppressed. *Collier.*
